Radiative heat transfer in optically thick gas between concentric spheres treated by matched asymptotic expansions, comparing results with Roseland approximation and numerical solution

14 p2663 A70-30266

Plane wave ray optical scattering by two spheres for arbitrary angle of incidence and observation, noting importance of first order interaction terms

14 p2551 A70-31157

Rarefied gas flow past sphere, using integral iteration method for Krook equation

15 p2671 A70-31467

Conducting incompressible fluid flow past sphere, examining effect on magnetic field for small magnetic Reynolds number

15 p2778 A70-31913

Wave scattering by acoustically soft, hard and perfectly conducting spheres

15 p2700 A70-32410

Aerodynamic wake structure of cylinders and spheres in hypersonic rarefied gas flow as function of Mach and Knudsen numbers

16 p2836 A70-33756

Hypervelocity impact of spheres on thin targets using numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model

16 p2991 A70-33853

Sphere slow motion in viscous fluid with solid particle suspension, considering Stokes flow pattern small relaxation time perturbation

16 p2896 A70-34272

Critical Levitation Loci for floating spheres on cryogenic fluids

17 p3136 A70-34743

German monograph on shock wave diffraction at spheres and cylinders

17 p3071 A70-35377

Al spheres hypervelocity impact against dry quartz sand targets in light gas gun facility, discussing energy partitioning

18 p3344 A70-36769

Integrating sphere theory with wall mounted specular sample in reflectance and transmittance measurements

18 p3284 A70-36776

Projection of integrating photometric spheres, discussing angular dependence on wall thickness, radiation losses and aperture dimensions

18 p3260 A70-36974

Magnetic field and permeability effects on drag in steady axisymmetric MHD flow of incompressible fluid around full and hollow spheres

19 p3477 A70-37577

Lift forces acting on spheres in cylindrical tube laminar flow

19 p3352 A70-37647

Interference wave functions for diffraction on cylinder and sphere, including noninterfering waves of geometric optics

19 p3380 A70-38398

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form
20 p3719 A70-39379

Gravitational collapse of slightly spherical body with axial symmetry characteristics, taking linear approximation of equation for additions to metric in empty space
20 p3710 A70-40098

Viscous conducting fluid slow motion past sphere in presence of toroidal magnetic field, calculating Stokes flow perturbations
20 p3682 A70-40113

Hypersonic sphere turbulent wake velocity measurement by spark technique, determining distribution from least mean squares fits of Gaussian curves
20 p3559 A70-40283

Radiative heat transfer between concentric spheres separated by absorbing-emitting medium with heat sources, deriving approximate solution
20 p3739 A70-40294

Dynamic external boundary value problems for elastic body bounded by spherical surfaces
20 p3734 A70-40433

Pool film boiling heat transfer data from small spheres, noting curvature effects and similarities of flat plate, cylinder and sphere theoretical analyses
21 p3949 A70-41310

Turbulent energy balance and spectra of axisymmetric wake behind sphere in incompressible fluid, measuring flow velocity
21 p3745 A70-41376

Free stream turbulence effect on heat transfer to stagnation point of sphere
21 p3953 A70-42095

Sphere and axisymmetric body with spherical blunting in low density gas flow, measuring local heat transfer flux
21 p3748 A70-42218

Micropolar incompressible fluid slow stationary flow past sphere
21 p3812 A70-42252

Spherical cavity nonuniform expansion in compressible elastic plastic solid, calculating velocity field and pressure by approximate similarity solution
22 p4114 A70-42635

Spatial problem of elastic spherical transversal isotropic medium solved by reducing Lamé equations
22 p4118 A70-43481

EM wave multiple scattering by spheres, attributing cross-polarization absence in backscattered field to spherical symmetry
23 p4160 A70-43767

Mass transfer between sphere and liquid flow at small Reynolds numbers
23 p4276 A70-44219

Chemical reaction product fluctuations in reacting and nonreacting turbulent wake of sphere in water tunnel detected by injected salts conductimetric titration [AIAA PAPER 68-686]
23 p4134 A70-44570

EM wave backscattering from lossless dielectric sphere, examining diffracted field surface waves role
23 p4165 A70-44960

Two monopole antennas on perfectly conducting sphere, calculating radiation pattern by numerical technique
23 p4165 A70-44968

Porous media MHD equations for general case, considering magnetized sphere surrounded by homogeneous envelope
24 p4384 A70-45367

Beltrami flows on spherical surfaces, using scalar equations from kinematic conditions
24 p4326 A70-45990

Spherical shape gas or liquid drop steady motion at large Reynolds numbers, examining buoyancy forces and velocity gradients
24 p4326 A70-45996

Inertia effects and suspension rheology for incompressible Newtonian fluid shear flow around neutrally buoyant rigid sphere
24 p4327 A70-46243

Plane parallel collision of two solid spherical bodies with mass centers coincident with geometrical centers
24 p4427 A70-46377

SHERICAL CAPS

Torospherical heads attached to cylinders and under internal pressure as elastic and/or elastic-plastic shells, using finite element
[AIAA PAPER 69-WA/PVP-7] 04 p0769 A70-14792

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89] 04 p0778 A70-15587

Torospherical heads design pressures compared from results of elastic-plastic and elastic-stress analyses to examine use of limiting stress criteria
05 p0944 A70-16816

Continuum mechanics equations for calculating strain energy in spherical bottoms production as function of radius and angle
06 p1077 A70-17870

Shallow spherical caps elastic buckling under uniform pressure, considering symmetric and asymmetric deformation modes
07 p1405 A70-19252

Partially loaded clamped plastic shallow spherical caps collapse loads and stress and velocity distributions
09 p1781 A70-23230

Clamped shallow spherical cap elastic buckling and initial postbuckling behavior under uniformly distributed load over circular region centered at apex
12 p2326 A70-27814

Boundary value problems in potential theory for electrical disk and spherical cap reduced to problems for two dimensional Laplace equation
20 p3657 A70-39446

SHERICAL HARMONICS

Atmospheric dynamics nonlinear equations reduction to spectral form using generalized spherical functions series
01 p0135 A70-10203

Geomagnetic field representation in terms of spherical harmonics, analyzing data for spherical and oblate models of earth
03 p0476 A70-13906

Earth external gravitational potential expressed as infinite series of spherical harmonics, using transformation property on coefficients
03 p0478 A70-14178

Coordinates computation method using spherical harmonic expansion of geomagnetic field, discussing direct computations by perturbation method
05 p0837 A70-15926

Spherical harmonics expansion for earth surface and outer space geopotential by mapping earth surface onto sphere
05 p0837 A70-15926

Geomagnetic normal fields determination using spherical harmonic analysis, including extension to local fields
05 p0842 A70-16749

Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis
07 p1278 A70-20460

Paired integral equations of elasticity with kernels containing Legendre spherical harmonics, admitting exact solution in quadratures
08 p1544 A70-20960

Geometric and predictive methods for developing bounds on epsilon-entropy for infinity error norm constraint
11 p2014 A70-26306

Spherical harmonic coefficients of eccentric dipole potential and coinciding magnetic and mass center, noting geophysical prospecting applicability
11 p2047 A70-26571

Explorer 4 magnetic coordinates recalculation using spherical harmonic representation and modified B-L package
12 p2222 A70-27191

Cross coupling relations in Boltzmann equations solution for inhomogeneous plasmas, using spherical harmonics expansion and Laguerre-Sonine polynomials
13 p2464 A70-29539

Numerical solution to Laplace equation in spherical coordinates with axial symmetry, using Dirichlet method to obtain difference equations
15 p2767 A70-31751

Spherical harmonic analysis of geomagnetic secular variation, applying to regional effects
15 p2799 A70-31992

Artificial satellite orbital motion numerical integration, computing spherical harmonic terms for earth gravitational potential
18 p3334 A70-37063

Spherical harmonic analysis of geomagnetic field strength for global magnetic anomaly charts
19 p3408 A70-37317

Solar envelope unstable gravitational mode model, considering spherical harmonics by numerical integration and asymptotic representation
19 p3523 A70-38688

Computer program transforming spherical harmonic coefficients into arbitrarily tilted coordinate systems, tabulating coefficients of International Geomagnetic Reference Field 1965 in dipole coordinate system
20 p3621 A70-39353

Paired integral equations of elasticity with kernels containing Legendre spherical harmonics, admitting exact solution in quadratures
20 p3672 A70-39382

Microwave antenna near field patterns analysis by spherical harmonic expansion, discussing validity conditions and convergence
21 p3796 A70-40556

Spherical harmonic analysis of declination and secular geomagnetic variation
21 p3820 A70-41884

Magnetic declination data, using spherical harmonics to examine global and secular geomagnetic field variations
23 p4189 A70-44067

Gravitational field fine structure representation near earth surface as sum of global model in spherical harmonics and local model in harmonic B functions
24 p4328 A70-45287

Geopotential zonal spherical harmonics coefficients revised values determined from reduced Baker-Nunn observations for satellites
24 p4407 A70-45537

SHERICAL SHELLS

NT SHERICAL CAPS

Interior shell equations compared with classical shell theory, considering helicoidal, spherical and circular cylindrical geometry
01 p0200 A70-10542

Pressure waves in accelerated sphere filled with compressible liquid, using convolution integral for pressure distribution on inner surface
01 p0067 A70-11186

Thick walled incompressible hyperelastic dielectric sphere periodic oscillations, noting dielectric properties influence on amplitude and period
01 p0209 A70-11386

Electromagnetic field structure and interaction inside and outside of spherical shell of arbitrary linear media excited by monochromatic plane wave
03 p0443 A70-13151

Spherical shell elasticity having circular hole at apex using asymptotic method, calculating stress concentration at hole
03 p0590 A70-13381

Unsteady temperature field induced stresses and strains in hollow viscoelastic sphere calculated by solving integrodifferential equation having right hand side dependent on time function
03 p0590 A70-13398

Stress-strain state equations of shallow spherical shells in rectangular and polar coordinates, discussing reduction to plate and Cauchy-Riemann equations
03 p0591 A70-13427

Stress-strain state under bending of shallow spherical shell having form of circular rectangle with clamped edges
04 p0767 A70-14486

Elastic spherical shell excited by point force, analyzing HF response in terms of near field and flexural wave field [ASME PAPER 69-WA/APM-18]
04 p0771 A70-14912

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression
04 p0773 A70-15008

Clamped and simply supported shallow spherical shells buckling using computer programs
04 p0778 A70-15555

Polooidal magnetic field influence on compressible fluid convection in spherical shells, using variational method to obtain stability criteria
04 p0758 A70-15695

Stress concentration of spherical hoop with discretely spaced meridional ribs under uniform pressure
05 p0935 A70-16229

Stressed state of shallow spherical shells of revolution undergoing large displacements reduced to Karman equation, solved by small parameter method
05 p0935 A70-16235

Shallow spherical shells stability under combined loading, hinging and edge clamping conditions, deriving strain energy expressions
05 p0936 A70-16238

Shallow spherical shell subjected to arbitrarily located concentrated normal force, discussing boundary effects on resulting stress distribution
05 p0945 A70-16817

Thermal stresses in shell with spherical and circular cylindrical sections, using thin shell approximations and shallow shell theory
05 p0945 A70-16818

Thin shell buckling stressing maximum applied loads analysis for circular cylindrical shells with imperfect walls under axial compression
06 p1165 A70-17647

Velocity, magnetic field and drag equations for steady incompressible viscous conducting fluid flow around spherical hollow shell
06 p1122 A70-17917

Nonlinear postbuckling equilibrium of thin cylindrical shell and axisymmetric buckling pressure of imperfect spherical shell calculated by Rayleigh-Ritz method
[AIAA PAPER 70-102] 06 p1169 A70-18036

Interface stresses in ceramic/metallic spherical shells for deep submergence structures using hydrostatic testing and photoelastic analysis
[AIAA PAPER 70-135] 06 p1170 A70-18089

Shallow spherical sandwich shells under concentrated forces, obtaining inhomogeneous equations solution by integral Hankel transforms
07 p1402 A70-19053

Human head model for craniocerebral trauma analysis, studying fluid filled spherical shell free vibrations axisymmetric response
07 p1219 A70-19243

Nonlinear spinning shallow spherical shell equations solved for equilibrium stress and displacement distributions, discussing inertia loading
07 p1406 A70-19342

Radial vibrations of hollow elastic sphere in acoustic medium, considering Laplace transform of field equations with respect to time
08 p1587 A70-21076

Rheological factors effect on deformation behavior of thin walled spherical shell made of strongly extensible elastically hereditary material and subjected to internal pressure
08 p1587 A70-21168

Spherical and cylindrical cavities dynamic plastic expansion analysis by finite element method allowing for inertia forces
09 p1777 A70-22724

Asymmetric deformation of spherical shell by solving homogeneous differential equation in spherical functions, assessing approximation error
09 p1786 A70-23719

Spherical isotropic shells motion equations solved in terms of associated Legendre functions, considering surface loads and body forces
10 p1953 A70-23876

Membrane deformations in second order rotating surfaces with positive Gaussian curvature investigated for external couple loaded spherical shells
10 p1958 A70-24515

Tapered spherical shell under constant initial pressure calculated for strength, stiffness and durability on digital computer using numerical algorithm
11 p2134 A70-25846

Creep deflections and collapse times for supported thin shallow spherical shells under uniform pressure predicted using variational theorem
11 p2135 A70-25963

Elastic properties determined for reinforced composite material with hollow spherical inclusions embedded in matrix
11 p2136 A70-26083

Stresses and displacements determinations in spherical shells under concentrated loads, considering transverse shear deformation effect
11 p2139 A70-26347

Blunted spherical shells stability under hydrostatic pressure by reducing equilibrium equations to differential
12 p2322 A70-27333

Shallow spherical shells stress-strain state in multiply connected regions resting on Winklerian base
12 p2323 A70-27334

Composite spherically aeolotropic sphere with isotropic core, analyzing stress concentration during twisting
12 p2327 A70-27836

Three-nodes analysis for thermal design of spinning spherical satellite using heat transfer equations in mathematical model
12 p2332 A70-28061

Transversely isotropic hollow spherical shell with elastic filler, analyzing stability
12 p2328 A70-28281

Thermal stability of simply supported bimetallic shallow spherical shell, considering rotationally symmetric deflection modes
14 p2657 A70-30845

Thin spherical shell postbuckling behavior with constrained rigid boundary under edge load, using deep and shallow shell theory
14 p2658 A70-30848

Angular distribution of diffusely reflected solar rays over spherical shell planetary atmosphere, determining halo brightness
14 p2632 A70-31222

Shell homogeneity theory, considering uniform states, spheres and circular cylinders
14 p2600 A70-31280

Convective heat transfer in Cu spherical shell and plate in supersonic rarefied gas flow at zero angle of attack from wind tunnel experiments
15 p2824 A70-31497

Strength and critical load determination for spherical shells with reinforced hole under internal pressure based on stress-strain state analysis during deformations
15 p2814 A70-31543

Stress-strain state of catenoid, cylindrical and spherical shells of revolution, emphasizing catenoid shell bending problem
15 p2815 A70-31648

Closed spherical shell, demonstrating effects of concentrated forces at poles
15 p2818 A70-32170

Gravitational instability and collapse of thin spherical shell of charged fluid, using energy conservation law
16 p2952 A70-33787

Plane acoustic wave interaction with elastic spherical shell, discussing effects of membrane, bending, rotatory inertia and shear deformation
16 p2993 A70-34087

Displacements and stresses in freely vibrating aeolotropic deep spherical shells, including effects of

shear deformation, rotatory inertia and transverse normal strain
16 p2993 A70-34091

Radial vibration frequency variation with wall thickness in hollow spherical shells, tabulating and plotting results
17 p3186 A70-34978

Nonlinear three nodes analysis for thermal design of spinning spherical satellite
17 p3177 A70-35249

Spherical shell of variable thickness, calculating stress-strain state around reinforced circular hole during elastoplastic deformation
18 p3336 A70-36138

Shallow spherical shell dynamics nonlinear problems solution with algorithm permitting use of straight lines method
18 p3341 A70-36590

Transient thermal stresses in spherical shell with distributed source and general Sturm-Liouville boundary conditions
19 p3539 A70-37800

Complete elastic spherical shell asymmetric buckling mode under pressure
19 p3539 A70-37801

Forced torsional vibrations of thin elastic spherical and hemispherical shells with free or restrained edge, using Gegenbauer transform
19 p3541 A70-38037

Boundary value problems for elastic sphere, extending Kelvin general solution of Cauchy equations
19 p3545 A70-38333

Clamped spherical shells under concentrated, distributed and ring loadings, analyzing large axisymmetric deflections for prebuckled and postbuckled states
19 p3545 A70-38336

Solid and hollow spheres gravitational and surface load stresses determination by freezing method of photoelasticity and mercury immersion
20 p3717 A70-38998

Spherical shell under nonuniform temperature field, calculating stress-strain state around round hole
20 p3719 A70-39247

Radial and shearing stresses in hollow composite sphere due to thermoelastic strain nucleus
20 p3719 A70-39602

Spherical shell equilibrium states dynamic calculation method applied to thin plates nonlinear theory statistical problems
20 p3725 A70-39871

Statistically nonhomogeneous fields by variational principles of elasticity, obtaining bounds of average displacement for hollow sphere under pressure
20 p3732 A70-40112

Thin walled spherical shell spacecraft solar heating in planetary surface proximity, considering skin temperature distribution
21 p3944 A70-41019

Uniformly loaded thin elastoplastic spherical shells, calculating strain hardening and strain rate effects on transient response
21 p3935 A70-41255

Cyclic thermal loading in viscoelastic spherical and cylindrical pressure vessels, investigating thermal frequency effect
21 p3937 A70-41430

Fluid filled elastic spherical shell, calculating free vibration axisymmetric response and fundamental mode
21 p3940 A70-42053

Hollow spheres and hemispheres nonlinear axisymmetric deformation, using shell theory reduced to two point boundary value problem for differential equations
22 p4112 A70-42288

Electron beam welded hollow balls for high speed ball bearings, comparing fatigue life with solid balls [ASME PAPER 70-LUBS-17]
22 p4044 A70-42444

Nonaxisymmetric convection of rotating spherical shell in Herring approximation, noting applicability to sun
22 p4104 A70-42994

Stress-strain of thin multilayer isotropic spherical shell under radial load employing shallow shell theory
22 p4120 A70-43716

Limiting pressure for isotropic plastic plates and spherical shells with stress dependent yield, using flow theory
22 p4120 A70-43717

Spherical multilayer shell unsteady temperature fields, assuming mixed convective and radiative transfer at inner surface due to hot gas flow
23 p4276 A70-44165

Spherical shell nonaxisymmetric deformation under varying loads, relating parameters, Poisson coefficient and complex function
23 p4267 A70-44168

Stability of elastic stretched ring on thin spherical shell under critical loads
23 p4268 A70-44318

Plastic postbuckling and imperfection sensitivity of spherical shells under axisymmetric bifurcation
23 p4272 A70-44714

Rotating spherical shell equations as initial value problem, noting maximum convective heat transport at equator
23 p4249 A70-44805

Radar cross section for thin dielectric plate and spherical and conical shells
23 p4166 A70-44975

Perturbation of steady MHD Stokes flow past hollow sphere assuming small Hartmann and Reynolds numbers
24 p4384 A70-45262

Axisymmetrically imperfect spherical thin shell stability analysis, comparing results with theory of initial postbuckling behavior
24 p4421 A70-45282

Truncated spherical shells nonlinear asymmetric buckling calculation from equilibrium equations
24 p4421 A70-45284

SPHERICAL TANKS

Spherical pressure vessel fracture initiation and propagation from long flaws considered from theoretical and experimental approaches
01 p0199 A70-10264

Ideal fluid in lightly filled spherical vessel under gravitational force investigated for surface tension effect on vibration frequencies
08 p1482 A70-20853

Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects [AIAA PAPER 69-1004]
09 p1657 A70-23255

SPHERICAL WAVES

Spherical detonation waves propagation initiated by laser-induced spark in gaseous explosives, discussing propagation energy regimes
02 p0278 A70-12029

Propagation equations for spherical waves in elastoplastic work hardening materials
03 p0585 A70-12972

Holographic technique for transferring phase perturbation of subject waves onto spherical waves focusable through aperture and examinable by interferometric and schlieren methods
04 p0691 A70-15034

Small amplitude spherical elastic-plastic waves initial behavior studied for critical and supercritical loading
05 p0945 A70-16819

Eigenvalues of spheroidal wave functions calculations dependent on complex propagation constants, discussing branch point values in tabular form
06 p1009 A70-17907

Isentropic model for time behavior of steady spherical source expanding into arbitrary ambient gas [AIAA PAPER 70-232]
06 p1042 A70-18215

Pressure-time history in spherical shock waves flow field at low ambient pressures recorded with piezoelectric transducers, showing shock strength decrease
06 p1052 A70-18385

Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum
07 p1237 A70-20424

Amplitude and phase correlations of spherical waves propagating in turbulent atmosphere using smooth perturbation method
09 p1636 A70-23139

Diffraction of plane cylindrical and spherical waves in wedge-shaped regions with reflecting edge, using asymptotic expansions
10 p1911 A70-25186

Spherical electroacoustic waves in drifting thermal plasma, describing ion acoustic perturbations
12 p2279 A70-27779

Plane cylindrical and spherical explosion waves propagation in detonating gas mixtures with counter-pressure, calculating perturbed flow parameters by numerical method of integral relations
13 p2388 A70-29308

Radial displacements in cylindrical circular shell by impinging spherical waves propagating in acoustic medium, deriving equations by Fourier and Laplace transforms
13 p2515 A70-29318

Obliquely incident spherical wave amplitude and phase fluctuations, deriving formulae to compare variances behavior for refractive index fluctuation autocorrelation functions
14 p2574 A70-30750

Holography without reference waves, describing image characteristics of spherical waves from point source
15 p2743 A70-32893

Atmospheric optical inhomogeneity effect on image quality, investigating deflection angles for spherical light wave passage at various altitudes
16 p2915 A70-34215

Convergent spherical rarefaction wave asymptotic behavior
17 p3075 A70-35892

Electromagnetic wave Poynting vector trajectories in absorbing inhomogeneous media, discussing rever-

- stability and energy propagation of spherical and plane structures
18 p3293 A70-36144
- Holographic velocity data recording /velocimetry/, discussing axial resolution enhancement by spherical wave illumination
19 p3423 A70-37859
- Electromagnetic wave propagation in spherical impedance waveguide, determining eigenvalues with negligible refraction
19 p3381 A70-38565
- Spherical radiation drive shock wave similarity solution, discussing time function, velocity, radial dependence and density
21 p3948 A70-41245
- One-dimensional propagation of elastic spherical waves in inhomogeneous unbounded medium under normal stress on cavity surface
24 p4424 A70-45631
- Spheroidal wave function theory, calculating eigenvalues with branch points for propagation constants complex values
24 p4315 A70-46134
- ## SPHEROIDS
- ### NT OBLATE SPHEROIDS
- ### NT PROLATE SPHEROIDS
- Relative motion of two spheroidal homogeneous rigid bodies of isolated binary system, obtaining potential energy
05 p0880 A70-15760
- Steady motions and stability of gravitating gyrostat and spheroid, considering dynamically asymmetrical and symmetrical conditions
08 p1544 A70-20965
- Electromagnetic wave diffraction by sphere and spheroid at resonance frequencies with incident wavelength comparable to bodies dimensions
09 p1632 A70-22402
- Dynamic stability of Jeans spheroid and Roches ellipsoid using small perturbations method
09 p1759 A70-22749
- Refractory oxide submillimeter spherical particle preparation by focused emission from carbon dioxide laser
09 p1697 A70-22984
- Rigid body mode of viscous incompressible fluid flow response to small perturbations of rotating spheroidal container, applying torque interaction
10 p1868 A70-24196
- Elongated rotating configuration evolution by gravitational radiation and secular instability using homogeneous figures of Maclaurin and Jacobi
10 p1916 A70-24404
- Steady motions and stability of gravitating gyrostat and spheroid, considering dynamically asymmetrical and symmetrical conditions
20 p3672 A70-39387
- Spheroidal wave function theory, calculating eigenvalues with branch points for propagation constants complex values
24 p4315 A70-46134
- ## SPHERULES
- Fluid flow visualization in closed channels, using spherules of pulverized fusible materials prepared in swirl injector
03 p0485 A70-13473
- Fragment fabrication of hybrid propellant solid grain emphasizing spherical shape and diameter uniformity
04 p0737 A70-15673
- Free flight ballistic range method for measuring average drag coefficients for microscopic spherical iron particles in free molecular flow
06 p0983 A70-18378
- Magnetic spherules extracted from manganese nodules classified by X ray diffraction and electron microprobe data, suggesting volcanic, stony and iron meteoritic origins
08 p1578 A70-21560
- Microscopic meteoritic spherules in soil surrounding terrestrial impact craters
09 p1758 A70-22745
- Pelagic sediment natural spherules identification based on formation process and manganese nodules abundance
13 p2400 A70-29859
- Extraterrestrial magnetic spherules concentration in relation to meteor shower activity and rainfall probability
14 p2640 A70-30740
- Compositions of lunar fines, crystalline rock and glass spherules, showing high normative anorthite
21 p3899 A70-41531
- Glass spherule lunar particles and breccia from Apollo 11 site, showing passage through impact generated cloud of hot fragmental material
21 p3901 A70-41541
- Microprobe analysis of glass spherules from Apollo 11 lunar regolith, discussing zoning, composition and hypervelocity impact formation
21 p3903 A70-41558
- Apollo 11 lunar fines glass spherules magnetic properties, considering soft and hard ferromagnetic components
21 p3918 A70-41681
- Apollo 11 lunar dust small glassy spherules and cylinders examination by interferometry, discussing specular reflection, microcracking, chipping and origin
21 p3919 A70-41682
- ## SPHYGMOGRAPHY
- Human body elastic properties effects on arterial pressure measurement by sphygmomanometer
20 p3581 A70-39879
- Differential sphygmogram of young men, determining lean body mass on basis of anthropometrical data
21 p3763 A70-41229
- ## SPICULES
- High resolution observations of low chromosphere beyond limb at H-alpha line center revealing fine structures, identifying chromospheric spicules with dark mottles
05 p0910 A70-16429
- Monte Carlo radiative transfer techniques applied to develop height dependent spicule model, computing contrast curves of model against chromospheric background
05 p0911 A70-16431
- Solar chromosphere dark and bright mottles mean lifetime from photographs, identifying with spicules
09 p1757 A70-22733
- Chromospheric spicules fine structure recorded on H alpha spectrograms and filtergrams from high altitude coronagraph
17 p3174 A70-35863
- Supergranular network time and shape changes, examining correlations with solar rotation, activity and cycles
21 p3885 A70-40954
- Spinning cylindrical spicule model with radial and axial gradients in electron number and temperature forming Ca II K line
21 p3879 A70-40955
- Solar far UV limb brightening of C III, N III, N IV, O III, O IV and Si IV lines in chromosphere-corona transition region, correcting coronal model for spicule effects
21 p3925 A70-42186
- Solar chromosphere spicules acceleration via supersonic jet formed by magnetic field under gravity and Melon seed effect
21 p3925 A70-42192
- Solar spectra isodentitraces indicating transition zones between and on sides of spicules in sheaths
21 p3926 A70-42197
- ## SPIKE ANTENNAS
- ### U MONOPOLE ANTENNAS
- ## SPIKE POTENTIALS
- Alouette spikes decrease with time equivalent to antenna transient response during hot plasma immersion
13 p2371 A70-29921
- ## SPIKES
- Floating resonance spike on Alouette 2 ionograms after sounder pulse transmission at half upper hybrid frequency, noting harmonic excitation role
13 p2370 A70-29905
- ## SPIKES (AERODYNAMIC CONFIGURATIONS)
- Spike effect on nose drag and static stability of blunt bodies, estimating optimum length for drag reduction at zero angle of attack
20 p3558 A70-39702
- ## SPIKING
- Ammonia maser transient spiking effects under periodic oscillation condition modulation, noting frequency sweep width role
07 p1299 A70-19685
- Spiking in deep partial penetration electron beam weld in U dependence on machine parameters
18 p3264 A70-37116
- ## SPILLING
- Spilled Hg removal from metal surfaces, describing brush technique based on capillary action
15 p2748 A70-32775
- Liquid or solid Leidenfrost film boiling on saturated cryogenic liquid surface, discussing hydrodynamic model similar to propellant spillage accidents
17 p3194 A70-34744
- ## SPIN
- ### NT ELECTRON CAPTURE
- ### NT ELECTRON SPIN
- ### NT HYDROSPINNING
- ### NT NUCLEAR SPIN
- ### NT SPIN-ORBIT INTERACTIONS
- ### NT SPIN-SPIN COUPLING
- Infinite-dimensional relativistic wave equations for mass spin dependence
07 p1333 A70-18959
- Aerodynamic causes for aircraft spinning, discussing initiation and termination
16 p2842 A70-34173
- ## SPIN DYNAMICS
- Spinning top motion stability in homogeneous incompressible ideal resting fluid, using stability derivative for body of revolution
01 p0145 A70-11438
- Cross section calculation for spin change in H atoms pair collision, discussing wave number and temperature effects
02 p0341 A70-11796
- Solar radiation influence on Alouette satellite spin behavior with long flexible antennae, taking into account sunlight/shadow history and solar vector inclination
02 p0380 A70-11852
- Time history of spin and forward motion accuracy of rocket launched from smoothbore, using analytical model and motion coupling through dynamic friction coefficient
03 p0582 A70-14311
- Anomalous roll behavior of spinning ballistic reentry vehicles with compound aerodynamic asymmetry consisting of lateral offset combined with trim angle of attack
04 p0763 A70-15411
- Spin-up of electrically conducting fluid between infinite flat plates under axial magnetic field, considering Ekman-Hartmann boundary layer on single plate
05 p0832 A70-16017
- Magnetoelastic spin Hamiltonians applied to magnetostriiction of Yb in YIG
06 p1128 A70-18642
- Spin decay from telemetered flight data of Explorer 20 compared with calculation based on solar influence theory
07 p1394 A70-19721
- Spin angular momentum of planets based on particle accretion, discussing particles cloud condensation
08 p1576 A70-21400
- Spin axis motion of n-body coaxially mounted cluster of differentially spinning bodies, considering combined precession and nutation
11 p2123 A70-26128
- Venus obliquity dynamic implications, developing equations for independent parameter set to define spin vector
13 p2489 A70-28907
- Wind tunnel tests, analytical methods and fixed base simulation for predicting fighter aircraft spin characteristics
13 p2346 A70-29030
- Galactic formation by spinning core theory, determining core properties by mass, energy and spin fluctuation parameters
14 p2640 A70-30734
- Attitude dynamics of slowly spinning axisymmetric satellites under influence of gravity gradient torques, using analytical and numerical techniques
15 p2809 A70-31778
- Small reentry vehicles roll motions and impact point dispersion due to spin reversal
15 p2813 A70-32522
- Spinning symmetric satellite attitude stability in hyperbolic orbit on flyby mission, examining by numerical integrations of equations of motion
17 p3181 A70-35753
- Spinning body with rigid and elastic parts, using Liapunov direct method for attitude stability analysis
18 p2922 A70-36677
- Full scale aircraft spinning motion, computing static, damping, cross and acceleration aerodynamic characteristics for antispin devices
20 p3561 A70-39581
- Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing LF radio telescope
21 p3931 A70-41854
- Flexible antennae and solar panels effect on dynamic behavior and control system response of dual spin spacecraft
21 p3931 A70-41855
- Single crystal and pyrolytic graphite, examining spin split Landau levels, Fermi energy changes and anomalous g shifts
21 p3854 A70-42110
- Atomic and molecular spin in cosmic medium
22 p4107 A70-43460
- Rigid body with external torque acting along one principal axis, deriving Euler equations of motion
23 p4221 A70-44572
- Dynamics of spin-stabilized flexible satellites of long crossed dipoles or slender beams, noting Alouette and ISIS-1 spacecraft
24 p4415 A70-45549
- ## SPIN REDUCTION
- Aircraft optimal spin recovery by aileron, elevator and rudder control calculated using Pontryagin principle to minimize altitude loss
01 p0006 A70-10924
- Mass loss role in early despinning of sun without magnetic field braking effect, considering present surface vs core rotating velocity
05 p0913 A70-16569
- Despin ball bearing assemblies performance data for TACSAT and Intelsat 4, discussing technology needed for accelerated testing, higher precision, failure detection and lubricants
11 p2058 A70-25471
- X band mechanically despun antenna system with RF and motor drive assembly developed for earth coverage communications satellite
11 p2001 A70-25481

Rigid and stretch yo-yo device equations of motion for despinning rotating rigid body derived for two and three dimensional model

12 p2271 A70-27228

Single stage /rigid/, two stage and stretch yo-yo despin mechanisms, discussing advantages, disadvantages and flight tests

16 p2985 A70-34114

Two stage yo-yo with nutation damper for despinning ATS synchronous satellites, describing mechanical and thermal design, lubrication, assembly, testing, etc

16 p2985 A70-34115

Torque motor driven despin bearing assembly design with integral slip ring for tactical communications satellite [TACOMSAT]

16 p2986 A70-34160

Brushless despin mechanical drive and control system design and performance for orientation of high gain communications antenna from spin stabilized satellite

16 p2986 A70-34161

Luneberg lens application to construct multiple beam mechanically despun antenna for spin stabilized satellites, discussing temperature problems

17 p3055 A70-35663

Fighter aircraft design for spin resistance and recovery using analytical approach, wind tunnel and flight tests

17 p3020 A70-35838

Spacecraft thin walled tubular booms thermal curvature time constants in relation to solar induced despin of satellites

23 p4258 A70-44521

SPIN RESONANCE

Mercury shape estimated with isostatic form of equilibrium controlled by situation near perihelion passage at 3-2 resonance spin rate, discussing solidification thermal effects

05 p0908 A70-16332

Venus spin-orbit resonance resulting in consistent inferior conjunction with earth, suggesting solar atmosphere tidal influence

14 p2650 A70-31216

Microwave oscillator by transposing principle of spin oscillator at low frequencies in nuclear magnetic resonance in X band

16 p2877 A70-33413

SPIN STABILIZATION

Satellite attitude control, discussing passive, active and hybrid stabilization methods including spin, gravity gradient and magnetic stabilization

01 p0197 A70-11264

Time optimal attitude control for alignment of spin stabilized sounding rocket, discussing feedback control system

03 p0580 A70-13805

ASTRID two axis stabilization system for rocket payloads, aligning optical axis of experiment with star [DGLR-69-42]

04 p0762 A70-15161

Dodge satellite postlaunch attitude stabilization and flight data comparison with digital simulation, underlying simulation use in design analyses

04 p0765 A70-15674

Optimal stabilization of spinning body motion about dynamic symmetry axis by controllable gyroscope

05 p0923 A70-16221

Onboard computer requirements for inertial navigation of spinning and maneuvering vehicle, determining design parameters

[AIAA PAPER 68-839]

06 p1013 A70-17161

Spread fin design as antisuperstall and antispin auxiliary device, discussing wind tunnel and simulation tests

06 p0967 A70-17258

Suboptimal stabilization of axially symmetric satellite angular velocity, using ionic propulsion system as control torque

06 p1155 A70-17554

Oil vapor lubricated bearing for compensated antenna of spin stabilized spacecraft, discussing service life, power and storage in sintered porous material [DGLR-69-062]

07 p1391 A70-18775

Sterilized solid propellant motors applicability to planetary landing capsule spin stabilization

[AIAA PAPER 69-823]

07 p1365 A70-19716

Earth horizon signal sensors on spin stabilized satellites using micron filters for cloud signal rejection

09 p1686 A70-23757

Large angle suboptimal attitude control of rigid spinning spacecraft

10 p1856 A70-25236

Fuel suboptimal attitude control of spin stabilized axisymmetric spacecraft

10 p1953 A70-25237

Nutation damping in gyrostat stabilization for multispin satellites in terms of energy momentum and damping torque arguments

11 p2119 A70-25357

Linearized equations of motion solved for stability of dual spin satellite with two dampers, comparing to Floquet analysis

[AIAA PAPER 70-431]

11 p2120 A70-25440

TACSAT 1 communication satellite design, dual-spin stabilization principles and dynamic characteristics, noting nutation behavior

[AIAA PAPER 70-455]

11 p2120 A70-25447

Sun-pointing spinning spacecraft attitude control by solar radiation pressure using paddle arrangement without power, sensor and moving parts requirement

11 p2123 A70-26145

Spin stabilized satellite attitude and orbital maneuvers computation, considering required accuracy and computer time in numerical integration procedures

11 p2125 A70-26278

Kalman filter modifications for spinning satellite attitude determination in elliptical orbit prior to apogee maneuver, using sun and IR earth sensors

11 p2028 A70-26304

Equations of motion for dynamic stability of flexible freely spinning Alouette-type satellite with crossed dipole configuration

12 p2312 A70-27194

Spin requirement to limit projectile yawing oscillations in hyperballistic range

12 p2157 A70-27835

Dual spin satellite stability with four mass nutation damper

12 p2314 A70-27842

Spin stabilized nonrigid satellite dynamics, considering liquid propellant behavior effect

13 p2499 A70-28401

Electromagnetic control system for spin rate and axis orientation of ISIS ionospheric research satellites, describing design parameters

13 p2501 A70-28414

Spin-stabilized rockets stage separation dynamics, considering guide shoe-guide rail lateral motion constraint system

13 p2503 A70-28508

Attitude control system of three axis stabilized payload for spectral survey of comet head light

13 p2505 A70-28770

Oil-vapor lubricated ball bearing system for deployable spin-free antenna of spin stabilized spacecraft

13 p2349 A70-28843

Subcaliber cylindrical boom at base of spin stabilized projectile shown to produce aerodynamic changes in static and Magnus moments

[AIAA PAPER 70-558]

13 p2340 A70-29023

Freely spinning finned stabilizer static wind tunnel tests on free fall research store, determining Magnus effect, body flow interference and static stability

[AIAA PAPER 70-559]

13 p2340 A70-29024

Satellite spin stabilization by Cs contact ion microthrusters with beam deflection, investigating performance obtained by optimal and suboptimal laws

13 p2506 A70-29143

Satellite orientation control and stabilization by gyro with statically and dynamically balanced rotors, showing steady motions and stability region augmentation

13 p2507 A70-29769

Gravity gradient ATS program experiments including spin scan cloud cover and stabilization research

14 p2654 A70-31145

Nutation damper for dual-spin spacecraft, considering various two degree of freedom systems with two natural frequencies

14 p2655 A70-31367

Spin stabilized Project Scanner spacecraft attitude determination by star mapping technique, describing optics, photomultiplier, reticle, electronics and sun shield

15 p2772 A70-31791

Damping by hemispheric torquing to control spin axis in gyroscope rotor while remaining unchanged with respect to case fixed reference

15 p2741 A70-32505

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect

[AIAA PAPER 69-857]

15 p2812 A70-32508

Optimal orientation of axisymmetric spin stabilized rigid bodies as function of moments of inertia ratios, using single jet for alignment

[DFVLR-SONDDR-50]

16 p2976 A70-33773

Single stage /rigid/, two stage and stretch yo-yo despin mechanisms, discussing advantages, disadvantages and flight tests

16 p2985 A70-34114

Mechanically despun multifrequency, attitude sensing antenna for spin stabilized spacecraft, deep space probes, tactical communications and community broadcast applications

16 p2986 A70-34159

Solid propellant combustion, observing burning rate in spin acceleration environments

17 p3145 A70-35209

Electronically despun antenna for spin stabilized medium altitude satellites

17 p3179 A70-35270

Spin stabilized satellite reorientation, using magnetic dipole interaction with geomagnetic field

17 p3179 A70-35287

Control moment gyros for spinning satellite stabilization and attitude control

18 p3289 A70-36714

Dual spin spacecraft bearing assembly flexibility effects on attitude stability

[AIAA PAPER 70-1043]

19 p3533 A70-38858

Dual spin spacecraft, considering nonlinear damping effect on attitude stability

[AIAA PAPER 70-1044]

19 p3533 A70-38859

Liapunov stability analysis of dynamic systems described by simultaneous ordinary and partial differential equations of motion, applying to satellite spin stabilization

[AIAA PAPER 70-1045]

19 p3472 A70-38860

Torque free spinning satellite with flexible appendages, investigating design parameters effects on nutational stability

[AIAA PAPER 70-1046]

19 p3534 A70-38861

Freely spinning satellites gimbal and momentum wheel system, determining static equilibrium states by analog computer simulations

[AIAA PAPER 70-982]

20 p3714 A70-39547

Nutational stability and closed loop position control of dual spin spacecraft with despun platform

[AIAA PAPER 70-975]

20 p3715 A70-39554

Magnetic three degree of freedom attitude control system for axisymmetric spinning spacecraft, using Kalman filter

[AIAA PAPER 70-974]

20 p3668 A70-39555

Axisymmetric dual spin spacecraft consisting of nonconcentric frictionlessly mounted cylinders equipped with viscous damping mechanisms, evaluating stability criteria by energy method

[AIAA PAPER 70-973]

20 p3715 A70-39556

Direction cosine attitude control logic for spin stabilized axisymmetric spacecraft, using control torques generated by reaction jet system

20 p3669 A70-39679

Air navigation Dioscures project satellites, discussing spin or three axis stabilization, system replenishment strategies and subsystem reliability

21 p3929 A70-41259

Dual spin bodies stability, controlling nutation by passive damper fitted to despun platform

22 p4110 A70-42486

Earth gravity deforming effect on flexible crossed-dipole satellite configuration, considering dynamic stability and spin stabilization

22 p4110 A70-43434

Earth gravity effect on spin vector attitude stability of flexible crossed dipole satellite configuration

22 p4110 A70-43435

Comparative stability of freely spinning satellites for arbitrary number of flexible booms in rotation plane

22 p4111 A70-43440

Dynamics of spin-stabilized flexible satellites of long crossed dipoles or slender beams, noting Alouette and ISIS-1 spacecraft

24 p4415 A70-45549

SPIN TESTS

Helical engraving influence on aerodynamic stability of bullets at long range, discussing wind tunnel tests

[AIAA PAPER 70-557]

13 p2340 A70-29022

Spin effect on internal ballistic of radial burning solid propellant rocket motor spun about longitudinal axis

15 p2791 A70-32794

SPIN WAVES

U MAGNONS

SPIN-LATTICE RELAXATION

Spin-lattice NMR and EPR relaxation time measurements, using train signals and free induction decays

09 p1679 A70-22995

Ag species paramagnetic relaxation in gamma-irradiated frozen aqueous solutions and in frozen methanol, relating spin-lattice relaxation to isotropic coupling

14 p2544 A70-30117

SPIN-ORBIT INTERACTIONS

NT ELECTRON CAPTURE

Ruby green [U] absorption band magnetic circular dichroism calculations in linear approximation, considering spin-orbital interaction constant and magnetic field strength

01 p0156 A70-10188

Venus obliquity dynamic implications, developing equations for independent parameter set to define spin vector

13 p2489 A70-28907

Ferromagnetic Ni band structure and Fermi surface including spin-orbit and exchange interactions obtained by Mueller interpolation scheme

14 p2626 A70-30479

Bilinear scalar spin Hamiltonian inadequacy to describe electron exchange in systems containing orbitally degenerate ions, considering cobalt magnon spectra

15 p2777 A70-32399

Differential elastic cross sections of 42 MeV alpha particles scattering from He 3, using optical model with spin-orbit potential

22 p4076 A70-42722

Spin waves amplification in ferromagnetic conductor crystals, taking into account arbitrary external electric field and propagation vector orientations and space charge

24 p4392 A70-46363

SPIN-SPIN COUPLING

Gravitational wave propagation velocity determined by laboratory measurement of spin-spin coupling of two rotating masses 04 p0718 A70-14397

Ferromagnetic crystal weakly coupled spin Green and correlation functions calculated for wide temperature range 09 p1740 A70-23193

Atomic Russell-Saunders coupling states classification from equivalent electrons configurations, using Young diagrams method 14 p2618 A70-30450

Spin-spin correlation in Heisenberg magnet linear chain at infinite temperature, discussing non-monotonic frequency dependence 14 p2619 A70-30486

NMR spin-spin coupling constants between vinyl protons in cyclopentadiene, 1,3-cyclohexadiene and 1-3-cyclooctadiene from spectrum analysis 21 p3780 A70-41704

Binary star axial rotational correlation, determining coupling between components spin angular momenta 23 p4250 A70-44817

SPINACH

Electron paramagnetic property in chlorophyll molecules of spinach subchloroplast determined using pulsed ruby laser 03 p0421 A70-13551

SPIRAL CORD

NT SPINE

Vasomotor activity of neurons located in spinal cord lateral crescent in curarized decerebrated and intact cats 01 p0030 A70-11471

Spinal cord blood flow response to carbon dioxide partial pressure in anesthetized goats 02 p0232 A70-11713

Spinal cord and skin temperature effects on tension-extension diagrams in cats red and pale muscles 02 p0236 A70-12092

Spinal cord overstretching and circumscribed pathological tension mechanism, considering histological and radiological findings 07 p1204 A70-19242

Connection character of rubrospinal tract fibers with various neuron groups of spinal cord on basis of electrophysiological and morphological investigations 07 p1206 A70-19468

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation 09 p1615 A70-22091

Neurological differences in spinal projections of animals subjected to cordotomies compared with human material, using selective silver impregnation technique 13 p2350 A70-28998

Evoked cerebellar potentials time characteristics during spinal cord stimulation in cats, investigating cerebellar intercentral connections effect 13 p2353 A70-29357

Fatigue phenomena at spinal motor synapses, investigating role of accompanying vegetative phenomena as source of fatigue 15 p2680 A70-31740

Dogs spinal cord bioelectric activity monitoring by implanted electrodes, noting interelectrode resistances after prolonged operation 15 p2685 A70-32687

Spinal reflex activity in normal and altitude exposed cats before, during and after acute hypoxia 17 p3031 A70-35430

Posterior ventral thalamic nucleus neuron reactions converging lemniscus and spinothalamic signals in cats 18 p3221 A70-36639

Localization and functional topology of thermosensitive central nervous structures in rats cervical spinal cord, discussing role in generating heat to avert coldness 22 p3967 A70-42316

Blood flow antagonistic changes in various vascular beds following spinal cord central thermal stimulation attributed to sympathetic vasoconstrictor activity 22 p3971 A70-43405

Spinal cord thermal stimulation effects on regional sympathetic activity in rabbits and cats determined from integrated sympathetic efferents discharges 22 p3971 A70-43406

SPINE

Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination 03 p0423 A70-13712

Radiography of spine in seated position, discussing aircraft seats, aeronautical ergonomics, etc 05 p0804 A70-15765

Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination 11 p1985 A70-25512

Radiological studies of young adult spines for selecting aircrew personnel and collecting data to compile reference dossiers in case of accidents 12 p2171 A70-28039

Intentional scolioses effect on intrapulmonary blood circulation, using photoelectrical cinedensigraphic technique 14 p2537 A70-30384

Spinal injury prediction during emergency ejection and crash impact protection research 23 p4153 A70-44489

SPINEL

Oxide spinel formation kinetics and reaction mechanisms with emphasis on Ni and Co chromites, discussing cation diffusion 09 p1739 A70-22307

Elastic constants pressure dependence of cubic crystals in NaCl and spinel structures using homogeneous static deformation method 13 p2396 A70-29172

Magnetite and ferrite spinels Hall effect, magnetoresistance and electrical conductivity over wide temperature range 19 p3485 A70-37627

Titanium and aluminian chromites and chromian ulvospinel in Apollo 11 fines, microbreccias and basaltic type igneous rocks 21 p3895 A70-41505

SPIROR GROUPS

Five dimensional rotations and representation of isomorphic spinor groups by boson operators calculus, expanding Gelfand states in Weyl patterns 01 p0147 A70-10521

Explicit spinor basis states for irreducible unitary representations of spinor covering group of deSitter group SO(4,1) 02 p0344 A70-12282

Electromagnetic and gravitational fields classification methods using spinor techniques, introducing five dimensional complex linear space with Weyl tensors elements 07 p1337 A70-20302

SPIRAL ANTENNAS

Ionosonde spiral antenna for HF polarization studies 02 p0269 A70-12584

Active AM scatterer/spiral antenna/used as transponder in elementary CW radar system 04 p0652 A70-15346

Dual mode log periodic spiral DF antenna system, using monopulse to provide azimuth and bearing elevation data 16 p2863 A70-33450

Unidirectional tear drop radiation Archimedean spiral broad band frequency independent antenna using printed circuit with cavity 21 p3801 A70-42246

N-arm spiral or conical antennas radiation patterns calculation for sigma and delta excitations, using bicomplex functions 23 p4176 A70-44965

SPIRAL GALAXIES

NT MILKY WAY GALAXY

Two armed spiral galactic shock waves as triggering mechanism for gravitational collapse leading to star formation, considering gaseous disk motion using Schmidt model 02 p0363 A70-11781

Gravitational theory for disk galaxies, considering radial velocity variations, spiral structure, heat equation verification, etc 02 p0378 A70-12688

Energy analysis of unstable gravitational oscillations in galaxies, using two component model for normal spiral galaxies 03 p0570 A70-13532

Companion galaxies on spiral arms endings, discussing age, expansion and ejection and stopping mechanism 04 p0759 A70-15710

Nonlinear effects in spiral galaxies with emphasis on solar neighborhood region, discussing radial motion, stationary state with excited waves and vertex deviation 05 p0917 A70-16905

Barred galaxies colorimetric data to study relative intensities and mean surface brightnesses as function of color 07 p1376 A70-18905

Interstellar gas ionization and heating by background X radiation, studying neutral hydrogen density distribution between spiral arms and at galactic peripheries 07 p1383 A70-19401

Galaxies and stars interactions, explaining observe peculiarities by electrostatic and electromagnetic forces 09 p1750 A70-22097

Uniformly rotating gas disk large scale spiral structure analysis, studying density waves due to gravitational disturbance by supersonic particle 09 p1755 A70-22503

Nonaxisymmetric free oscillations of self gravitating disk reduced to eigenvalue problem to investigate galactic spiral structures 10 p1917 A70-25207

Observational data for distributions of physical and optical companions to spiral galactic systems and number of satellites as function of central galaxy size 10 p1948 A70-25247

Spiral structure of disk galaxies as nonaxisymmetric perturbations in density, using pressure free hydrodynamical equations 14 p2639 A70-30731

Galactic spiral structure effects on residual stellar velocities local distributions 14 p2652 A70-31380

Absolute photovisual magnitude and classification of supernova in NGC 3389 spiral galaxy, using UVB measurements and comparison stars 15 p2797 A70-31611

Normal logarithmic spiral model of radius vector-tangent characteristic angles for multiarm galaxies 15 p2797 A70-31617

Galactic spiral structure model, examining nonlinear stellar density waves in plasma cylinder 18 p3322 A70-37131

Milky Way spiral structure - Conference, Basel, August-September 1969 18 p3324 A70-37151

Spiral galaxies structure, considering maintenance problem and effect of possible gas inflow from intergalactic space 18 p3326 A70-37152

Spiral structure definition in external galaxies, discussing optical form types, Messier 33 outer and inner parts and differences in arms 18 p3326 A70-37153

Milky Way and other galaxies spiral arms configuration, comparing to Andromeda 18 p3326 A70-37154

Spiral galaxies pattern statistics, examining morphological type of Milky Way galaxy 18 p3326 A70-37155

H 2 regions in Sc galaxies NGC 628, 4254 and 5194 18 p3327 A70-37159

Spiral galaxy NGC 6946 structure and stellar associations distribution, indicating no relation between color and magnitude and distance from center 18 p3327 A70-37160

Galactic spiral structure from atomic hydrogen line intensity longitudinal distribution 18 p3328 A70-37168

Galactic spiral structure from optical radial velocities of H II regions 18 p3329 A70-37179

Milky Way appearance and galactic spiral structure, using models with variable and different absorption values of arms 18 p3329 A70-37181

Young cepheids galactic distribution determined by photometric method, showing correlation with spiral arms 18 p3330 A70-37184

Tightly wound spiral nonlinear density waves in pressureless self gravitating disk with external gravitational field, examining solid body and differential rotation 18 p3331 A70-37192

Plane galactic orbits near spiral field particle resonance, calculating numerically for ring orbits librating near maxima at Lagrangian points 18 p3331 A70-37193

Dynat-type barred spiral galaxies structure and dynamics with asymmetric mass distribution, using model consisting of small prolate spheroid displaced from disk center 18 p3331 A70-37194

Stellar isolated disks spiral structure, examining large numbers of point masses self consistent motion in galactic plane 18 p3331 A70-37195

Large scale spiral galaxy structure interpretation, examining density wave theory, Milky Way System and spiral form origin 18 p3331 A70-37196

Disk shaped galaxy stationary spiral shock pattern, examining gas cloud gravitational collapse for star formation 18 p3331 A70-37198

Galactic spiral structure, discussing gravitational theory, pattern origin, radio and optical structure and magnetic field effects 18 p3332 A70-37201

Sbc galaxy NGC 7320 radio emission and neutral H observations, showing improbability of physical association with Stephan Quintet by distance measurement 19 p3524 A70-38699

Spiral galaxy NGC 4319 arms high red shift Seyfert nucleus, discussing UV continua of Markarian 205 20 p3701 A70-39005

Universe density estimation by galaxy formation theory, discussing spiral galaxies intergalactic gas thermal radiation and soft X rays 21 p3887 A70-41113

Computer model of self gravitating gas-stars system with spiral structure surviving galactic rotations 22 p4103 A70-42982

Supernovae frequency in Sb and Sc spiral galaxies, considering luminosity class, absolute magnitude and mass of parent galaxy 24 p4413 A70-46164

SPIRALS

SPIRALS

Varianular wind spirals for vertical wind and shear profile estimation in atmospheric boundary layer
14 p2602 A70-30370

Neutral H spiral structure in Milky Way galaxy, discussing map derivation, pattern interpretation, arm characteristics and kinematics
18 p3327 A70-37161

H 2 region and neutral gas spiral structure and radial distribution, using optical observations and radio continuum surveys
18 p3327 A70-37162

Milky Way galaxy spiral structure analysis, using neutral H Hat Creek survey with southern observations
18 p3327 A70-37164

Interstellar dust spatial distribution, indicating galactic spiral structure
18 p3329 A70-37183

Spiral structure gravitational theory, discussing separation between linear and nonlinear effects
18 p3330 A70-37189

Large scale spiral galaxy structure interpretation, examining density wave theory, Milky Way System and spiral form origin
18 p3331 A70-37196

Organic spiropolymers synthesis for thermal stability by condensation of aliphatic spirotetraamines and aromatic dianhydrides
21 p3782 A70-42128

German monograph on Milky Way spiral structure, describing elliptic orbit model
24 p4399 A70-45100

SPIROMETERS

Spirometers for ventilation measurement of separate lungs, recording impedance changes during respiratory cycle
14 p2541 A70-30378

Human respiration activity measurement in pressure chamber with different pressures and mixture compositions by spiograph equipment
20 p3581 A70-40175

SPLASH POINTS

U RECOVERY ZONES

U WATER LANDING

SPLEEN

High speed fluorescent cell sorting system for sorting mouse spleen cells from Chinese hamster ovarian tumor cells
02 p0240 A70-12695

Space cabin atmosphere effects on primary and secondary immunological responses in mice relative to spleen weight and antibody titers following antigenic stimulation
03 p0437 A70-14062

Spacecraft cabin atmosphere effects on mice primary and secondary immunological responses relative to spleen histochemical and biochemical changes in enzyme activity
03 p0437 A70-14063

Acid soluble nucleotides content in normal and gamma irradiated rat spleens, presenting table
06 p0995 A70-17799

SPLICING

Al alloys missile splice rings fabrication, discussing extrusion, draw forming, flash butt welding and stretch sizing
18 p3264 A70-37112

SPLINE FUNCTIONS

Spline data techniques for error elimination in trajectory optimization to offer improvement over linear interpolation scheme
07 p1325 A70-19340

Quadrature formulas with minimum remainder estimate for differentiable functions classes, considering piecewise polynomial /spline/ functions characteristic properties
09 p1711 A70-22147

Quasi-linearization for VTOL aircraft equations of motion, using spline functions for unknown parameters initial estimation
16 p2942 A70-33328

Periodic boundary value problems with cyclic totally positive Green functions, considering applications in vibrating physical systems and spline theory
23 p4213 A70-44899

Approximations by spline functions and polynomials, discussing modulus of continuity
24 p4369 A70-45126

SPLITTING

Splitting procedures application to steady and unsteady problems of mathematical physics and predictor-corrector method application to unsteady problems
04 p0719 A70-14959

Sunspot spectrograms analysis, observing wavelength shift in Zeeman triplet circular components and magnetic splitting inequality under different circular polarizations
18 p3322 A70-37136

SPOILERS

Flow field of jet spoilers downstream from nozzle, accounting for main stream and secondary jet mixing

and fuel injection problems during supersonic combustion
03 p0608 A70-14098

Tail screens and spoiler rings aerodynamic braking effect in hypersonic range, discussing separated boundary layer periodic unsteady flow
06 p0965 A70-17247

Sound radiation from rigid flow spoilers correlated with fluctuating forces, measuring jet-pipe drag and lift components with transducers
11 p2085 A70-26699

Pressure distribution in two dimensional incompressible potential flow on Joukowski airfoils with normal upper surface spoilers, emphasizing potential flow theory
12 p2155 A70-27193

Supersonic jet spoilers flow fields with various nozzle shapes to determine secondary jets penetration depth and mixing in wake
13 p2338 A70-28480

Reentry vehicle recovery deployment initiation, comparing performances of conical wake drogue and body attached spoilers hypersonic deceleration devices
21 p3752 A70-41811

Spoiler theory based on mathematical model, using two dimensional potential theory in conjunction with experimental data on wake phenomena
22 p3957 A70-42273

SPONGES [MATERIALS]

Titanium sponge secondary structure obtained by magnesiothermal reduction of concentrated Ti-containing chloride melts, discussing temperature effect on porosity
09 p1709 A70-23783

SPONTANEOUS COMBUSTION

Liquid sodium droplets spontaneous ignition and combustion in controlled oxidizing atmosphere, discussing vapor phase diffusion flame, burning rates and evaporation constants
02 p0396 A70-12005

Gas detonation dynamics associated with shock tube self ignition kinetics, noting chemokinetic factors role
02 p0397 A70-12024

Limits of self ignition in reaction of F with H detected photoelectrically
05 p0956 A70-16156

Spontaneous ignition temperature as function of surface-to-volume ratio in static systems for fuels
11 p2151 A70-26384

Spontaneous ignition dependence on transient temperature variations accompanying gas entry to evacuated vessel
12 p2330 A70-27222

Thermal testing of decomposition and spontaneous ignition of diethyl peroxide before explosion
12 p2330 A70-27224

Combustion rates and self ignition vs pressure and activity in ammonium perchlorate mixtures with Al and Mg powders compressed to maximum densities
18 p3299 A70-36249

Self flammability temperature of binary alloy Al-Si powders in aerosol state as function of chemical and phase compositions
23 p4205 A70-44046

SPONTANEOUS EMISSION

Ar ion laser with high discharge current density observed for working level populations by simultaneously measuring power gain and spontaneous emission lines intensity
01 p0106 A70-10063

GaAs - Conference, Dallas, October 1968
01 p0157 A70-10515

Phase lock technique study of 10.6 micron radiation effect in carbon dioxide laser plasmas on 2.4 micron spontaneous emissions and plasma impedance
05 p0857 A70-16071

Emission saturation in Ar CW laser at high discharge current densities under different pressures and tube channel parameters
08 p1511 A70-20542

Quantization of Wheeler-Feynman electrodynamics, discussing spontaneous emission and connection between quantum and classical interparticle action theories
11 p2108 A70-25700

Amplitude and phase fluctuations in laser with nonlinear absorption due to spontaneous emission, studying lasing instability near hysteresis threshold
12 p2248 A70-27548

Hanle effect in single mode He-Ne laser, observing spontaneous emission on different spectral lines and estimating lifetimes of Ne excited states
13 p2424 A70-28598

Spontaneous emission modulation, interference beat and level crossings observable in gas laser operating at two output frequencies
13 p2425 A70-28599

P-type GaAs laser diodes spontaneous emission power temperature dependence, considering radiative recombination mechanism
13 p2378 A70-29545

Ultrashort pulse generation by solid state Q switched lasers, discussing spontaneous emission effects, atomic polarization and populations variation
14 p2594 A70-30477

Fluorescence method of determining solid state laser parameters using spontaneous and stimulated emission observations
17 p3106 A70-35101

Spontaneous megawatt pulsing in ruby laser with output beam reflected back into cavity
17 p3108 A70-35909

Spontaneous emission spectra and band tailing from GaAs laser diodes fabricated by vapor phase epitaxy with compensation in p-type side of junction
18 p3268 A70-36730

Excitation transfer by spontaneous emission in atomic gas, investigating static magnetic field effect on radioactive cascade
19 p3443 A70-37363

Spontaneous and induced Cerenkov emission by charged particle in turbulent medium, discussing random fluctuations effect on radiation spectra
21 p3879 A70-40928

Semiconductor junction diode spontaneous emission sources, considering frequency-energy characteristics relationship
22 p4085 A70-42504

Magnetic flux dependent interference beats in spontaneous emission of gas discharge of He-Ne laser, estimating Hertzian coherence duration
23 p4202 A70-45052

Spectroscopic features of mercury laser associated with electron energy levels and spontaneous emission line structure, giving excitation and disruption mechanisms
23 p4202 A70-45054

Pb-Sn-Te junction diodes prepared by Sb diffusion, investigating spontaneous and laserlike emission
24 p4355 A70-46086

SPONTANEOUS IGNITION TEMPERATURE

U IGNITION TEMPERATURE

U SPONTANEOUS COMBUSTION

SPOOLS

Three spool turbopump engine design regarding maintainability, noting on-condition module removal and overhaul
11 p2101 A70-25877

SPORADIC E LAYER

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanisms and ambient electron density
01 p0084 A70-11552

Vertical probe observations of short radio waves propagation through sporadic E at various frequencies and path lengths
01 p0084 A70-11553

Auroral breakup effects on sporadic E via comparison between sequential ionograms and riometer absorption data indicating transient effect in D/E regions
02 p0288 A70-11744

Seasonal variations of sporadic E virtual height at middle latitudes attributed to hemispheric expansion depending on ozone amount
03 p0476 A70-13907

Statistical ionospheric model of sporadic E layer frequency characteristics dependence on equipment parameters, determining permissible variation of transmitter power and receiver gain
04 p0682 A70-15727

Vertical motion of ionized formations in ionospheric F region related to sporadic E layer
05 p0842 A70-16760

Temporal and spatial variations and patch velocity of sporadic E layer obtained at Japan ionospheric stations
06 p1057 A70-17906

Ionization irregularities and drift in sporadic E layer determined using Mitra method for ground based radio reflection
06 p1012 A70-18543

Sporadic E layer parameters spatial distribution, describing analytic planetary coordinate system
07 p1267 A70-19453

Sporadic E layer formation by vertical winds, discussing effect on ionospheric electron concentration distribution
07 p1267 A70-19454

Sporadic E layers structure and dynamic characteristics during polar aurorae, determining critical frequencies
07 p1267 A70-19455

Simultaneous riometer and ionosonde measurements at high latitude suggesting absorption events due to cosmic noise scattering by auroral sporadic E
07 p1271 A70-20165

May 1966 solar eclipse effects on sporadic E layer, including ionizing radiation decrease relation to boundary and blanketing frequencies decrease
08 p1490 A70-21432

Blanketing type sporadic E layer associated with equatorial electrojet as thin layer of enhanced ionization
10 p1880 A70-24801

- Midlatitude sporadic E layer critical frequencies dependence on solar activity using vertical ionospheric sounding data, observing ionization correlation
10 p1882 A70-25197
- Sporadic E formation correlation to geomagnetic activity from ionospheric radio absorption observed at midlatitude and polar zone stations
11 p2044 A70-25554
- Diurnal and seasonal variations of sporadic E layer observed at ionospheric station
14 p2568 A70-30134
- Sporadic E layer space diversity reception data from stations 20 km apart, noting horizontal ionization gradient effect
14 p2571 A70-30234
- Lower ionosphere influence on radio reflection from sporadic E layer, determining diurnal variations of D region absorption for various frequencies
14 p2547 A70-30235
- Geomagnetism-sporadic E layer relationship, discussing critical frequencies and H component variations
14 p2571 A70-30236
- Statistical ionospheric model of sporadic E layer frequency characteristics dependence on equipment parameters, determining permissible variation of transmitter power and receiver gain
14 p2575 A70-30811
- Lunar tidal diurnal and semi-diurnal variations in equatorial sporadic E layer related to H geomagnetic field and sunspot period
15 p2726 A70-31862
- Synchronous measurements of reflection coefficient and frequency characteristics of sporadic E layer by ionospheric sounding
18 p3247 A70-36293
- Sporadic E layer parameters spatial distribution, describing analytic planetary coordinate system
18 p3249 A70-36927
- Sporadic E layer formation by vortical winds, discussing effect on ionospheric electron concentration distribution
18 p3249 A70-36928
- Sporadic E layers structure and dynamic characteristics during polar aurorae, determining critical frequencies
18 p3250 A70-36929
- Sporadic ionization occurrences nighttime observation in auroral E region, describing vertical electron concentration profile
19 p3410 A70-37331
- Temperate equatorial and auroral zones sporadic E observations and formation theories survey for prediction
19 p3416 A70-38441
- Sporadic E layer occurrence probability over Dushanbe from ionospheric station data, discussing curves for diurnal and annual PE variations
19 p3417 A70-38785
- High scintillation indices associated with vertical spreading of sporadic E layer from minute-by-minute ionograms and signal amplitude recordings from Explorer 22 satellite
20 p3624 A70-40489
- Sporadic E layer ionization correlated with geomagnetic disturbances in northern auroral and polar regions
21 p3812 A70-40592
- Sporadic E formation correlation to geomagnetic activity from ionospheric radio absorption observed at midlatitude and polar zone stations
21 p3819 A70-41304
- Day and nighttime E and sporadic E layer drifts over low latitude station recorded by spaced receiver technique
22 p4020 A70-43166
- Sporadic E layer characteristics from spaced ionogram analysis, discussing layers formation and dispersion and ionization irregularities motions
24 p4328 A70-45352
- Sporadic E layer space diversity reception data from stations 20 km apart, noting horizontal ionization gradient effect
24 p4331 A70-46309
- Lower ionosphere influence on radio reflection from sporadic E layer, determining diurnal variations of D region absorption for various frequencies
24 p4316 A70-46310
- Geomagnetism-sporadic E layer relationship, discussing critical frequencies and H component variations
24 p4332 A70-46311
- SPORES**
Spore and vegetative cell adenylate kinases of *Bacillus subtilis* proved indistinguishable by polyacrylamide gel electrophoresis DEAE cellulose chromatography
01 p0021 A70-10789
- Dry heat resistance of *Bacillus subtilis* var. niger spores on selected planetary lander capsule surface materials
04 p0645 A70-15442
- SPOT WELDS**
Solar cell array fabrication methods extending operating temperature by pulsed spot welding techniques and deletion of adhesives
02 p0228 A70-12080
- Strain gage high temperature performance in rocket engines tested by spot welding to turbine manifold, noting installation and position influence
06 p1069 A70-18440
- Nondestructive process control analyzer for spot welds in aircraft structural components, monitoring expansion, current and spotweld properties
08 p1507 A70-21486
- High fatigue life resulting from titanium spot welding realized by preweld and postweld treatment
11 p2059 A70-25662
- Metal matrix composite resistance spot welding, discussing value of nondestructive tests
17 p3100 A70-34636
- Microwelding by pulsed ruby laser radiation, discussing characteristics and advantages
20 p3638 A70-40149
- Stainless steel gas tungsten arc welding, considering anode spot size variation and current density
22 p4042 A70-42377
- SPRAY CHARACTERISTICS**
Electronic spray analyzers and conductance and capacitance probes for two phase flow studies, describing operation, characteristics and types of data obtainable
02 p0305 A70-12837
- Parameters effect on radius of dispersion during plasma and detonation spray coating process of niobium and zirconium carbides
06 p1076 A70-17849
- Liquid propellant spray injection into high pressure gaseous environment noting geometric, dynamic and thermal characteristics
06 p1182 A70-18211
- Propellant sprays behavior in high pressure combustors, calculating jet breakup or atomization length
07 p1257 A70-19331
- SPRAYED COATINGS**
Parameters effect on radius of dispersion during plasma and detonation spray coating process of niobium and zirconium carbides
06 p1076 A70-17849
- Abradable and abrasive types thermal spray coatings application to jet engine parts
10 p1893 A70-23856
- Thermal conductivity and shock resistance of flame and plasma sprayed zirconia coatings on Ni-Mo-C metal
15 p2762 A70-32527
- Fatigue properties of solution treated and age hardened hot rolled Ti alloy bars, discussing sprayed tungsten carbide coatings effects on bearing properties
17 p3121 A70-34432
- SPRAYED PROTECTIVE COATINGS**
U PROTECTIVE COATINGS
U SPRAYED COATINGS
- SPRAYERS**
Temperature limit of efficiency threshold for ground based liquid propane sprayer for supercooled fog dispersal at Orly airport
02 p0324 A70-11872
- SPRAYING**
NT ARC SPRAYING
NT METAL SPRAYING
NT PLASMA SPRAYING
- Reflection of single leaves and field plots of cotton, determining Cycocel treatment effects on aerial IR photography
14 p2577 A70-31233
- SPRAYING APPARATUS**
U SPRAYERS
- SPRAYS**
U SPRAYERS
- SPREAD F**
Spread F echoes occurrence variations over solar cycle, observing range and frequency splitting type during maximum and minimum sunspot years
01 p0080 A70-11222
- Electrostatic drift-dissipative plasma instability and nocturnal equatorial spread F irregularities, discussing amplification in collision dominated medium
03 p0477 A70-13990
- Spread F echoes due to total reflection from large tilted ionized surfaces, using ionograms and airglow observations to study surface geometry
07 p1271 A70-20158
- Seasonal variation of spread F near magnetic equator, showing relationship with solar cycle at different geographic locations
10 p1881 A70-24818
- Low latitude scintillations from satellite transmission scintillations correlation with solar activity spread F, electron content and ionospheric irregularities
13 p2397 A70-29189
- Low latitude observations of spread F echoes and stationary satellite scintillations, correlating with ionospheric disturbances and geomagnetic activity
21 p3818 A70-41097
- SPREAD REFLECTION**
U DIFFUSE RADIATION
- U REFLECTION**
- SPRINGS [ELASTIC]**
Cessna single engine aircraft tubular and flat steel landing gear springs, describing quality control through nondestructive testing
01 p0098 A70-10018
- Motion equations for vibratory two degrees of freedom spring mass system subjected to rotation, discussing use for small rates of turn measurement
01 p0199 A70-10266
- Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dashpot model [ASME PAPER 69-LUB-23]
01 p0101 A70-10384
- Cylindrical compression spring relaxation at high temperatures, presenting design data for time-temperature initial stress relationships [ASME PAPER 69-WA/MET-10]
04 p0697 A70-14758
- Dynamic torsion of anisotropic circular cantilever beams and small pitch diameter springs under linear time dependent moment calculated by Saint Venant method
06 p1037 A70-17862
- Static deflection effect on harmonic vibration of system with restoring forces of hardening nonlinear spring, considering gravity effect
08 p1586 A70-21035
- Popping pressure of relief valve with helical spring under dynamic load noting frequency dependence [ASME PAPER 69-VIBR-48]
08 p1441 A70-21479
- Equations of motion integration for solid body in potential forces field induced by elastic springs
09 p1728 A70-23386
- Cylindrical coil springs cold winding loading processes, considering initial tension or compression of wire and combined stresses
10 p1894 A70-24297
- Euler-Bernoulli and Timoshenko beam impact models compared for case of finite beam resting on spring supports
12 p2327 A70-27843
- Age hardenable monolithic spring material composed of Ag-Pd-Cu alloys for make-break electrical contact
13 p2376 A70-28839
- Ultrahigh strength stainless steel for light gage springs and satellite antennas
13 p2420 A70-29248
- Compression spring mechanisms for separation of spacecraft and shrouds, summarizing design characteristics
16 p2921 A70-34116
- Minimum weight springs design, discussing load deflection curves, materials resilience, etc
16 p2924 A70-34171
- Harmonic oscillator with exponentially decreasing spring constant, obtaining closed form solution for equation of motion
17 p3137 A70-35602
- Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dash model [ASME PAPER 69-LUB-23]
19 p3435 A70-37607
- Undamped forced two degree of freedom system with one linear and one nonlinear spring, analyzing subharmonic vibrations by Ritz averaging method
19 p3544 A70-38329
- Static and dynamic spring constants of peripheral jet air cushion vehicle in heaving motion, obtaining sinusoidal input response characteristics
22 p3960 A70-42279
- Periodic motions of arbitrarily long periods for idealized nonlinear spring-mass systems with two or more degrees of freedom
22 p4073 A70-42699
- SPUR [REACTORS]**
U SPACE POWER UNIT REACTORS
- SPUTTERING**
Sputtering yield of amorphous and polycrystalline targets bombarded by energetic ions or recoil atoms calculated by integrodifferential equations derived from Boltzmann transport equation
02 p0343 A70-11885
- Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation
03 p0569 A70-13357
- Sputter machining thickness reduction methods for VHF resonant piezoelectric transducers
03 p0496 A70-14207
- Sputtering method used for applying metallizing layer to ceramics in producing ceramic to metal seals
10 p1895 A70-24555
- Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation
11 p2118 A70-26722
- Superconducting thin films of beta-tungsten structure Nb-Al-Ge compound, discussing high purity sputtering preparation techniques and properties in magnetic fields
12 p2285 A70-27259
- RF-sputtered CdS thin films structural and electrical characteristics from X ray diffractometer tracings,

reflection electron diffraction and X ray double crystal spectrometry

13 p2470 A70-29201

Solid film lubricants deposited by DC and RF sputtering on metal and glass surfaces, determining friction characteristics by electron microscopy

17 p3099 A70-34516

Adherent Ta films deposition onto Teflon disks by sputtering

18 p3264 A70-37098

Optical multilayer metal coatings vacuum deposition by cathode sputtering, using automatic apparatus

22 p4045 A70-42510

Semiconductor junctions passivation by silicon nitride insulation layers, discussing pyrolysis and cathode sputtering fabrication methods

22 p4087 A70-43444

SQUALLS

Stratospheric clear air turbulence over squall line, discussing turbulence over thunderstorms

06 p1102 A70-18588

Heavy squalls observations by satellite TV and radar, considering wave disturbances at cold front

13 p2444 A70-28585

SQUARE WAVES

Reactive filter synthesis for step-voltage output inverter smoothing, using network theory

14 p2559 A70-30373

High power short rise time square wave inverter using power transistors

22 p3965 A70-43336

Dissipativity and asymptotic stability criteria derived for systems of ordinary differential equations, considering application to automatic control problem

03 p0518 A70-13469

Existence and uniqueness, stability and asymptotic stability of nonlinear operator differential equation

05 p0878 A70-17098

Existence and stability problems of nonlinear operator differential equations containing linear operator with domain and range contained in real Hilbert space

05 p0878 A70-17099

Stability and limiting frequency of analog computer solutions of differential equations with root shifts caused by resolver imperfection

07 p1321 A70-18689

Nonlinear computational stability of partial difference approximations to meteorological equations

08 p1534 A70-21024

Stability of solutions to linear differential equations pair, determining bound conditions having S-property

08 p1534 A70-21100

Interval of values with stability and convergence for correctors for differential equations

09 p1641 A70-22286

Liapunov stability conditions for critical point of ordinary differential equation, determining optimal criterion

09 p1727 A70-22664

Triangular Lagrangian equilibrium points stability in planar restricted problem of three bodies at order two mass ratio using two variable expansion method

10 p1939 A70-24184

Distance separating shock wave front of contact surface between motor and target gases in electromagnetic shock tube, discussing surface instabilities

11 p1977 A70-26467

Linear periodic coefficient differential equations stability analysis by infinite determinate method, con-

sidering applications to damped mechanical systems motion and dual spin satellite

12 p2261 A70-27813

Algorithm for integrating ordinary differential equations system determined for stability condition by trial-and-error procedure programmed on computer

12 p2262 A70-28030

Variable mesh multistep predictor-corrector method for iterative solution of ordinary differential equations, considering numerical stability and algorithm efficiency

13 p2440 A70-29087

Banach space stability in presence of constantly acting perturbations bounded in mean, investigating differential operator equation

13 p2452 A70-29309

Stability requirements for precision magnetic field measurements on ground and in space, discussing magnetic balances and fluxgate magnetometers for geomagnetic variations and spacecraft attitude

13 p2415 A70-30050

Algorithm for fourth order stability equation

16 p2867 A70-32925

Shock wave stability in plane steady flow at uniform entropy and limiting velocity

16 p2890 A70-33101

Ti alloy stability after long term creep exposure at various temperatures

17 p3120 A70-34421

Triangular libration points stability in elliptic restricted three body problem, determining parametric resonance region

17 p3137 A70-35690

Stability criteria for differential equations with complex variables, considering boundary value requirements and sufficient conditions theorems

18 p3281 A70-36352

Schwarzschild exterior metric stability against perturbations from asymptotic behavior of Einstein field equations solution in Kruskal coordinates

18 p3291 A70-36650

Real matrix stability determination by right half plane eigenvalues, using symmetric solution of Liapunov equation

24 p4370 A70-46098

STABILITY AUGMENTATION

U FEEDBACK CONTROL

U STABILIZATION

STABILITY DERIVATIVES

NT PITCHING MOMENTS

NT ROLLING MOMENTS

NT YAWING MOMENTS

Stability and asymptotic stability criteria for attraction sets in dispersed dynamic systems obtained in terms of Liapunov function

01 p0141 A70-10152

Spinning top motion stability in homogeneous incompressible ideal resting fluid, using stability derivative for body of revolution

01 p0145 A70-11438

Aerodynamic derivatives in equations of motion governing aircraft longitudinal short period motion estimated using least squares methods

02 p0224 A70-11866

Internal stability of turbulent combustion, developing analysis for one dimensional model and deriving sufficient instability criterion

03 p0607 A70-13862

Stability characteristics from flight test results using regression analysis

04 p0623 A70-15155

Longitudinal stability derivatives prediction for rigid and elastic airplanes, using influence coefficient method

[AIAA PAPER 69-131]

04 p0624 A70-15383

Roll acceleration influence on angle of attack convergence and windward meridian rotation rate of rolling reentry vehicles

[AIAA PAPER 69-100]

04 p0764 A70-15546

Einstein field equations based on variational principle applied to stability of general self gravitating relativistic gaseous mass obeying specific equation of state

06 p1138 A70-17304

Gyrostatt satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostatic satellite equations of motion

06 p1155 A70-17884

Nonlinear aerodynamic moments for arbitrary motions of bodies of revolution in free flight

[AIAA PAPER 70-205]

06 p0971 A70-18102

Stability derivatives for bodies of revolution at subsonic and transonic speeds

[AIAA PAPER 70-190]

06 p0976 A70-18239

Stability derivatives from flight data of fixed-wing aircraft determined by modified Newton-Raphson method

07 p1194 A70-19272

Satellite orbit using analytic partial derivatives of perturbed motion based on state transition matrices

07 p1381 A70-19301

Laminar boundary layer critical height determination using Rouse stability parameter

07 p1257 A70-19336

Aerodynamic drag coefficients and moments for axisymmetric bodies of revolution in rarefied plasma derived for limiting case of delta flux

08 p1432 A70-21088

Aerodynamic forces and moments effect of VTOL aircraft lift fan configurations on flow past wing

10 p1798 A70-24047

Finite difference methods stability for time dependent Navier-Stokes equations coupled to energy equation with quadratic terms in velocity gradients

10 p1866 A70-24106

Triangular system of linear differential equations reducible to block form by Liapunov transformation, deriving indices stability conditions

10 p1911 A70-25303

Aerodynamic moment on satellite with asymmetrically positioned solar cell platforms, analyzing motion around center of mass for diffuse scattering flow

12 p2314 A70-28254

Nondimensional aerodynamic forces and moments coefficients independent of air density and acting on satellites in low orbits

13 p2500 A70-28403

Dimensional stability derivatives from XV-4B aircraft simulator varied in computer program for extracting roots of lateral-directional characteristic equation

[AIAA PAPER 70-551]

13 p2346 A70-29016

Atmospheric density variations and functional dependence of aerodynamic moment coefficient on incident angle from Saturn Workshop flight experiment

14 p2528 A70-30559

Dynamic stability derivatives calculation using steady and oscillatory lifting surface theory with allowance for Bryan limitations

14 p2529 A70-30864

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph

16 p2945 A70-33219

Blade flexibility effects on static stability derivatives of prop/rotors in propeller flight mode

17 p3013 A70-34701

Parameter model of VTOL airplane in transition, considering aerodynamic forces and moments and digital simulation

17 p3015 A70-34724

Flight test instrumentation for V/STOL stability derivatives extraction, noting instrument errors and required compensation

17 p3094 A70-35502

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph

24 p4371 A70-45194

Gyro system determining aerodynamic moment integral vector in wind measurements

24 p4340 A70-46402

STABILITY TESTS

NT FLIGHT STABILITY TESTS

NT WIND TUNNEL STABILITY TESTS

Dimensional stability of nickel maraging steel at ambient temperature measured for applications as gage block materials

01 p0102 A70-10742

Structural qualification testing of experimental tactical communication satellite /TAC COM SAT/

02 p0274 A70-11936

Transverse g-force tolerance and stability after prolonged hypodinaemia in bed rest, noting effects of pharmaceuticals, physical exercise and prophylactic measures

10 p1817 A70-24695

Powered nacelles simulating exhaust flow for propulsion and airframe problems in subsonic flow

[AIAA PAPER 70-636]

16 p2888 A70-33594

Modeling techniques based on Froude scaling laws for helicopter ditching and flotation stability characteristics

17 p3016 A70-34738

Helicopter dynamic tests for aeroelastic and mechanical instabilities and forced vibration problems

21 p3749 A70-40583

STABILIZATION

NT SIGNAL STABILIZATION

NT SPIN STABILIZATION

Algebraic criteria for absolute stability and equilibrium position in nonlinear continuous automatic control systems, using complex gain amplifier substitution

01 p0053 A70-11041

Nutational NMR nonuniform magnetic field stabilizer for beta spectrometer, structural details and circuit schematic

03 p0485 A70-13467

Splitting procedures application to steady and unsteady problems of mathematical physics and predictor-corrector method application to unsteady problems

04 p0719 A70-14959

Variational problems of stationarization under constraints, using imbedding integrodifferential equations

05 p0882 A70-16085

Monograph on conditions for stabilization of oscillatory systems with random parametric excitations covering approximate calculations, stability concept definition, etc
11 p2129 A70-25496

Amplitude stabilization transient processes at output of four terminal network with arbitrary phase and amplitude characteristics by representing pulse transfer function in series
12 p2184 A70-27537

Satellite orientation control and stabilization by gyro with statically and dynamically balanced rotors, showing steady motions and stability region augmentation
13 p2507 A70-29769

VTOL aircraft stability augmentation system design based on control theory state variable methods, using minimum power levels
14 p2531 A70-30856

Relay stabilization system for flight vehicle motion about center of mass, using point transformations method and bifurcations theory
15 p2674 A70-32151

Optimal control in nonlinear systems, discussing conditions for analytical solutions for Hamilton-Jacobi equations
16 p2886 A70-33335

Aircraft stability augmentation systems design by parameter optimization techniques and feedback selection
16 p2840 A70-33342

Automatic stabilization and control of computerized nonlinear processes, proposing algorithm for stability criteria
17 p3049 A70-34640

Satellite optimal guidance, discussing gyroscope application for stabilization and orientation control
17 p3181 A70-35691

Solid phase stabilization of zirconium dioxide by combined addition of yttrium and magnesium oxides
19 p3455 A70-38732

Nd-YAIG laser design for sleeve stabilization, discussing flicker problem and rod cladding
21 p3836 A70-40822

Stability augmentation in aircraft design for handling and operation benefits, discussing control techniques, autopilot modes and load limitations [ICAS PAPER 70-24]
23 p4138 A70-44109

Hybrid fluidic damper control for yaw axis stability augmentation of commercial jet aircraft [SAE PAPER 700794]
24 p4294 A70-45853

Hydrofluidics flight controls for aircraft stability augmentation systems, noting component performance, transfer functions and operation [SAE PAPER 700793]
24 p4294 A70-45854

STABILIZED PLATFORMS
Project ABLE stabilized platform, discussing logistics support requirement effects on system design and acquisition, reliability, maintainability and costs
02 p0401 A70-11670

Gyroplatform angular position with respect to reference stars from solving nonlinear differential equations, applying Liapunov method
03 p0524 A70-13366

Gyrostabilized attitude reference platform for high altitude rotating research rocket payload alignment with preselected star
03 p0579 A70-13606

Semiactive gravity gradient attitude stabilization system /SAGS/ providing active pitch control and semipassive roll/yaw control, discussing design, development and testing [SAE PAPER 690691]
05 p0923 A70-15863

Closed form variational synthesis of optimally fast acting stabilization systems for rigid single axis gyroscopic platforms using integrating nonanalytic equations
06 p1103 A70-17860

Flywheel stabilization for communication satellites, considering stabilization by reaction wheels, gyros, gas jets, etc [DGLR-69-058]
07 p1392 A70-18817

Kinematic drifts of three axis gyrostabilizer platform associated with angular oscillations using theory of finite rotations
07 p1282 A70-19531

Gyrocompass with sensitive element mounted on horizontally stabilized platform and aligned with meridian by applied correcting moments, deriving equations of motion
07 p1282 A70-19532

Stability of three axis indicator gyrostabilizer system consisting of stabilized platform mounted in three degree of freedom Cardan suspension
07 p1288 A70-20179

Stable moored ocean platforms providing reliable VHF communications and secondary surveillance radar facilities for civil aviation operations over North Atlantic
09 p1723 A70-23035

North-finding gyroscope applicability for directional gyros and stabilized platforms
10 p1891 A70-24865

Gyroscopic platform stabilizers /GPS/ dynamic properties improved by compensation of perturbing torques
12 p2237 A70-28155

Gimbal influence on three axis gyrostabilized platform in spacecraft guidance during maneuvers
13 p2446 A70-28388

Dynamics of gravity stabilized satellite having maximum damping rate
13 p2499 A70-28391

Gyrostabilized platforms for astronomical observations, minimizing position errors
13 p2403 A70-28441

Drift of two platform gyroazimuth with stabilized base under harmonic or random vibrations
15 p2734 A70-31622

Stabilized platform stellar detector for French probe balloons, using semicircular light modulator
15 p2738 A70-32249

Gyroplatform for controlling rocket motion during rotation about longitudinal axis
19 p3420 A70-37258

Instruments for platforms stability determination, considering azimuth, tilt rotation and translational motion [AIAA PAPER 70-961]
20 p3605 A70-39568

STABILIZERS
Wing and empennage structures automated fully stressed design procedures, discussing application to supersonic aircraft stabilizer
12 p2319 A70-27136

Aircraft all-movable stabilator computer aided design for optimized structural weight and performance
12 p2319 A70-27137

Flameout and ignition correlation for diffusion fuel burnup behind angled stabilizers in annular turbine combustion chamber
18 p3300 A70-36127

STABILIZERS [AGENTS]
Gas saturation and inhomogeneity in surface layer of Ti alloys with alpha and beta stabilizers after high temperature heating
09 p1700 A70-22078

STABILIZERS [FLUID DYNAMICS]
NT HORIZONTAL TAIL SURFACES
Wind tunnel investigated flow stabilization at horizontal control surfaces by vortex BCL technique, considering angles of attack, elevator deflection and shape
06 p0968 A70-17853

Lifting reentry dynamic stability of flare stabilizers and flap controls
09 p1766 A70-23242

STABLE OSCILLATIONS
Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations
01 p0082 A70-11508

Pressure and temperature sensitivity tests of fluoric oscillator for timer application, testing fluid relaxation oscillators using R-C-R feedback loops [ASME PAPER 69-WA/FLCS-9]
04 p0626 A70-14844

Oscillations stability along symmetrical axis in galaxies analyzed by Jacobi and Lagrange equations, obtaining cylindrical coordinates upper and lower limits
09 p1761 A70-23052

Steady harmonic oscillations of half space with circular holes, deriving algebraic equations for boundary value problems
09 p1782 A70-23296

Flat rectangular elastic body stable oscillations with clamped base under compression loads, deriving difference scheme for approximation
09 p1782 A70-23297

Unsteady plasma oscillation stabilization by envelope controller with spatial and temporal dispersion
11 p2087 A70-25604

Forced oscillations of oscillator matched to transistor as active element, obtaining stability conditions by Liapunov first method
11 p2018 A70-25945

High stability oscillators frequency check, using meteor trails and combined least squares and moving averages methods
14 p2583 A70-30320

Oscillation frequency retuning and stabilization and loss factor determination in solid state lasers by dispersive resonators
17 p3106 A70-35100

Unmodulated microwave oscillations power stabilizer with semiconductor attenuator
21 p3796 A70-40635

Oscillation stability of stars moving along axis of symmetry in galaxy, discussing first order orbit perturbations in general resonance case
21 p3884 A70-40873

Oscillatory stability of selective RF transistor amplifiers, using stage dimensioning and gain graphs
22 p3996 A70-42818

Gunn oscillation stabilization in layered semiconductors based on space charge growth reduction via

two-stream interaction between GaAs diode and passive bias semiconductor
23 p4230 A70-44196

Single-frequency oscillations mode in nonlinear catenary systems, considering factors promoting stabilization and uniformity
23 p4218 A70-44344

Pendulum dynamic stability under parametric excitation, presenting transient and steady state solutions by linear and nonlinear theory applications
24 p4379 A70-45587

STACKING FAULT ENERGY
Transmission electron microscopy observation of thermal annihilation of stacking faults in epitaxial layers of GaAs grown from liquid phase
21 p3863 A70-42004

Alloys stacking faults thermodynamics based on Gibbs treatment of interfacial free energy
22 p4124 A70-42726

Stacking fault energy determination, discussing impurities influence in equilibrium dimensions distortion of extended nodes in titanium carbide
22 p4053 A70-42727

Stacking faults in gamma prime precipitation hardened high temperature Ni base alloys, relating fault energy to strength
22 p4053 A70-42728

STACKING FAULTS
U CRYSTAL DEFECTS
STAGE SEPARATION
ELDO booster rocket third stage design and construction, including pictures of parts and devices
03 p0580 A70-13795

Linear separation systems for aerospace applications covering mild detonating fuse and cord flexible linear shaped charge, SUPER ZIP concepts, etc
03 p0546 A70-14103

Scout missile destruct charge system premature operational response to high temperature environment caused by combustion gas leak during stage separation
03 p0550 A70-14140

Design and qualification test criteria for components derived by enveloping peaks of shock response spectra in ground tests of missile stages explosive separation [SAE PAPER 690616]
05 p0922 A70-15849

Abort and staging separation maneuvers of two equal size reusable lifting entry vehicles in wind tunnel tests [AIAA PAPER 70-260]
07 p1397 A70-20389

Staging along reentry trajectory in atmosphere, discussing parent body and separation point influence on aerodynamic loading and heating of ejected body
11 p2124 A70-26151

Spin-stabilized rockets stage separation dynamics, considering guide shoe-guide rail lateral motion constraint system
13 p2503 A70-28508

Delta launch vehicle for scientific and application satellites, describing three stage liquid and solid propulsion systems
15 p2810 A70-31783

Flight behavior of pyrotechnic circuits in ELDO-EUROPA 1 booster for separating stages and autodestruction
15 p2709 A70-32288

Multibody lifting entry vehicle clusters separation dynamics, describing digital simulation, wind tunnel tests, separation mechanisms, etc
16 p2981 A70-33704

Reliable latch diaphragm release mechanism for separation of payload from spacecraft, discussing design, operation and tests
16 p2921 A70-34117

Reliable collet release mechanism design for separation and ejection of reentry vehicle payload from booster
16 p2922 A70-34118

Spacecraft separation mechanisms selection, design and use, discussing multiple device point and linear systems
17 p3175 A70-34767

Dynamic force and pressure measurement on rocket nozzle during simulated stage separation, describing instrumentation and control system
17 p3061 A70-35478

Optimal separation height of instrument container in atmospheric gas composition mass spectrometric studies
18 p3260 A70-36996

Europa 2 launcher fourth /perigee/ stage, describing trajectories, propulsion system design and performance, separation systems, etc
19 p3532 A70-37871

Rocket nose cone optimal turn into horizontal ballistic trajectory after separation from booster, using dynamic programming
22 p3962 A70-43351

STAGING [ROCKETS]
U STAGE SEPARATION

U STAGNATION POINT

STAGNATION FLOW

Hydrodynamic model of blood coagulation in stagnation point flow, analyzing platelet diffusion, white cell bonding stress and thrombus formation [AIAA PAPER 70-143] 06 p1003 A70-18123

Plasma arc tests to simulate stagnation reentry heating on spherical subized models of nuclear heat source to investigate heat shield materials ablation characteristics [AIAA PAPER 70-200] 06 p0974 A70-18172

Navier-Stokes equations solved for unsteady incompressible three dimensional stagnation point flow, noting reduction to two dimensional and axisymmetric cases 07 p1188 A70-19343

Pressure recovery for stagnation of underexpanded sonic air jet in chamber having transparent walls and containing nozzle and diffuser in coaxial positions 07 p1189 A70-19811

Radiation effects on viscous hypersonic low density stagnation flow using two layer model, calculating flow field and heat transfer coefficient 12 p2158 A70-28204

Gas phase chemical reactions effect on heat transfer to charring ablator, deriving numerical solution for multicomponent stagnation point flow [AIAA PAPER 70-869] 16 p2999 A70-33912

Falkner-Skan type boundary value problem of three dimensional flow near stagnation point 20 p3658 A70-40103

STAGNATION POINT

Transient heat transfer near two dimensional stagnation point in viscous incompressible fluid steady flow 01 p0002 A70-10457

Flow about blunted wedge with laminar boundary layer at stagnation point and approaching Falkner-Skan flow at infinity, discussing asymptotic behavior 01 p0061 A70-10540

MHD boundary layers in transverse magnetic field with low Reynolds number, investigating suppression of separation with emphasis on behavior near rear stagnation point 01 p0152 A70-11095

Boundary layer and singular inviscid stagnation point reacting flow matching, corrections structure and decay and ranking comparison with second order effects in fluid mechanics 01 p0065 A70-11096

Laminar counterflow diffusion flame chemical structure and blow-off mechanism established in forward stagnation region of porous cylinder at atmospheric pressure 02 p0398 A70-12032

Stagnation point velocity gradients for spherical segment models with bluntness ranging from hemisphere to flatnose cylinder in hypersonic flow 03 p0406 A70-12947

Approximate solution for hypersonic inviscid flow around spherically blunted bodies at small angle of attack, noting stagnation problems 03 p0407 A70-13547

MHD boundary layer separation near rear stagnation point with magnetic field normal to wall solved by series expansion, calculating skin friction by numerical quadratures 03 p0469 A70-14182

Free stream turbulence effect on heat transfer in circular cylinder stagnation region 03 p0469 A70-14216

Heat transfer rates to stagnation point of hemisphere in supersonic high enthalpy low density nitrogen plasma flow [ASME PAPER 69-WA/HT-49] 04 p0614 A70-14799

Thermal recovery factors at hemispheric probe stagnation point in low density supersonic jets of He-Ar and H-N mixtures [ASME PAPER 69-WA/HT-27] 04 p0782 A70-14810

Viscous shock layer at hypersonic blunt body stagnation point, applying finite difference and nonlinear overrelaxation methods to seven species air model 04 p0620 A70-15539

Surface recession of low density phenolic nylon in arc heated air using stagnation point models, noting char removal processes 04 p0787 A70-15602

Self similar problems of anisotropic fluid boundary layer involving infinite disk rotation and fluid flow near stagnation point 05 p0835 A70-16857

Inviscid hypersonic blunt body flow of hydrogen-oxygen mixtures in shock layer stagnation region 06 p0968 A70-17555

Heat and mass transfer across laminar boundary layer around stagnation line of cylinder in crossflow affected by free stream turbulence intensity 06 p1176 A70-17693

Massive blowing effect on stagnation point radiative energy transfer of ablative heat shield during planetary entry at hypersonic velocities 06 p0971 A70-18101

Hypersonic rarefied gas flow near stagnation point investigated to predict drag on sphere in high speed gas stream with densities in transition regime 06 p0984 A70-18382

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc 06 p0985 A70-18557

Asymptotic behavior of inviscid radiating gas flow near stagnation point of blunt body 07 p1188 A70-19315

Unsteady MHD flow at forward stagnation point analyzed for magnetic field effect on transient phenomena, using difference-differential numerical method 07 p1354 A70-20235

Incompressible conducting fluid MHD flow at infinite plane wall forward stagnation point, considering suction or injection effects 07 p1354 A70-20237

Heat exchange at stagnation point of subsonic and supersonic axisymmetric jets interacting with perpendicular plane partition, allowing for turbulence 08 p1482 A70-20919

Monograph on convective heat flow in stagnation points of turbulent partly premixed free jet flames at cooled plates 08 p1598 A70-21343

Shock layer thickness in supersonic inviscid gas flow past blunt bodies, calculating boundary layer near stagnation point 09 p1603 A70-22442

Supersonic flow behind cone, studying subsonic pressure and stagnation zone dependence on incident flow parameters and static pressure distribution 09 p1663 A70-23623

Plane shock wave interaction with supersonic blunt body, considering pressure-time studies for stagnation point of flow 10 p1801 A70-24145

Laminar boundary layer and heat flux at forward stagnation point of indestructible body in partially ionized air flow calculated as function of enthalpy 12 p2156 A70-27287

Solid particle motions in dusty gas in inviscid hypersonic shock layers of slender wedges and cones and stagnation regions of cylinders and spheres 12 p2156 A70-27827

Stagnation point position as function of gas thermodynamic state behind detached shock for spherical segment at incidence in three dimensional hypersonic flow 12 p2159 A70-28247

Stagnation point position and entropy at surfaces of supersonic paraboloids in perfect gas 12 p2160 A70-28250

Heat transfer increase near stagnation point for turbulent jet impinging on paraffin coated plates used for flow visualization 13 p2521 A70-28866

Stagnation point electrostatic probe for measuring local electrical properties of solid propellant rocket exhausts [AIAA PAPER 69-573] 13 p2475 A70-29960

Shock slip analysis of merged layer stagnation point air ionization, clarifying effects of reaction rates, species diffusion, etc 13 p2343 A70-29987

Chemically reacting stagnation point boundary layers with wall injection of gas, comparing multicomponent solution with binary approximation and chemical simplifications 14 p2565 A70-30265

Three dimensional boundary layer along semi-infinite swept stagnation line, assessing counteracting effects of cross flow and mass transfer 14 p2565 A70-30278

Viscous absorbing emitting shock layer in blunt body stagnation region, calculating skin friction and radiative heat transfer [AIAA PAPER 70-868] 16 p2999 A70-33911

Continuum radiative flux from nonisothermal stagnation shock layer of nongray atomic gases, employing ionization edges and bound free spectral forms [AIAA PAPER 70-837] 16 p3001 A70-33932

Equilibrium air boundary layer flows at three dimensional stagnation points, discussing flow characteristics and real gas heat transfer parameters [AIAA PAPER 70-806] 17 p3005 A70-34455

Thrombus formation on foreign surface in fresh blood stagnation point flow, applying fluid mechanical and mass transfer models 17 p3035 A70-34470

Laminar gas flow enthalpy determination in stagnation regions based on energy balance equation across separation streamline 18 p3240 A70-36266

Nonuniform external flow near blunt body stagnation point in diverging hypersonic thin shock layer 18 p3206 A70-36267

Nonequilibrium processes and body geometry as stagnation point conditions in blunt body inviscid flow 20 p3557 A70-39355

Stagnation point heat transfer coefficient to elliptical model taking into account pressure, model blunting and diameter, Mach number, etc 20 p3737 A70-39699

Stagnation point heat transfer of spherical cylinder in argon and air, developing electrically insulated calorimeter gage theory 21 p3941 A70-40774

Reentry vehicle with multicomponent gas mixture injection, calculating heat and mass transfer correlations for stagnation point flow 21 p3945 A70-41033

Freezing and melting of warm water flow at stagnation point over cooled plate for convective condition at solid-liquid interface 21 p3949 A70-41311

Free stream turbulence effect on heat transfer to stagnation point of sphere 21 p3953 A70-42095

Three dimensional laminar boundary layer equations for film condensation on curved surface in quiescent vapor, investigating flow at stagnation point 21 p3954 A70-42168

Thermal boundary layer near stagnation point in three dimensional fluctuating incompressible flow, using Lighthill method 22 p4124 A70-42685

Time-mean velocity and skin friction of laminar boundary layer near two dimensional stagnation point with oscillating oncoming flow 22 p4010 A70-42686

Nonequilibrium radiation from stagnation region of high velocity spherical gas cap traveling through air 22 p4124 A70-42758

Radiative transfer upstream absorption effect on inviscid stagnation region shock layer radiation 23 p4133 A70-44551

Three dimensional laminar boundary layer separation at infinite swept stagnation line with high mass injection rates 23 p4182 A70-44568

Inviscid rotational supersonic flow near three dimensional stagnation point, examining solutions for compatibility with vortical shock layer boundary conditions 23 p4183 A70-44692

STAGNATION PRESSURE

Stagnation pressure losses in radial vaneless diffusers to estimate compressor performance, noting one dimensional analysis 11 p1974 A70-25782

Large MHD generator channel aerodynamics, discussing pressure distributions to stall and stagnation pressure loss 20 p3612 A70-40002

STAGNATION REGION

U STAGNATION POINT

STAGNATION TEMPERATURE

Heat transfer boundary conditions determination in studying heat protective coatings effectiveness, discussing measurement methods for stagnation temperatures and heat fluxes from exhaust gases 06 p1173 A70-17662

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary gas injection into supersonic stream [AIAA PAPER 69-1] 09 p1733 A70-23217

Injectant stagnation temperature and molecular weight effects in jet interaction flowfield 11 p2036 A70-25989

Stagnation temperature of two phase nozzle gas jet containing solid particles on particle density and velocity 21 p3748 A70-42220

STAINLESS STEELS

NT AUSTENITIC STAINLESS STEELS

NT MARTENSITIC STAINLESS STEELS

Ferritic stainless steel embrittlement caused by He injected into tensile samples by alpha particle cyclotron irradiation tested at elevated temperatures 01 p0122 A70-11235

High temperature ductility improvement in stainless steels containing He, analyzing lattice damage and interphase cavities after fast neutron irradiation 01 p0123 A70-11246

Potential lubricants in friction and cup forming tests of stainless steel, Ti- and Ni-base alloys, considering boron nitride, graphitic materials and Mo oxides 02 p0309 A70-12540

Structure and segregation effects in Type 304L stainless steel weldments using transmission electron microscopy, optical microscopy and electron microprobe, comparing weld types 02 p0319 A70-12754

Reversed bending fatigue tests on stainless steel fibermetal with porous structure to investigate effects of density, thickness, wire diameter, screen stiffening, etc 03 p0481 A70-12957

Intergranular corrosion mechanisms in ferritic stainless steels observed by electronmicroscopic examination on Cr Fe-base alloys vacuum-melt with C and N 03 p0506 A70-13131

Surface treatment effects on stainless steels corrosion resistance, relating resistance changes to surface composition, integrity, stability and roughness 03 p0507 A70-13136

Heat transfer effects on corrosion behavior of stainless steel in boiling water, noting stress corrosion cracking increase with chloride ion contamination

03 p0507 A70-13137

Mechanical responses and residual defect structures in brass and stainless steel following explosive shock loading and cold reduction by rolling

03 p0507 A70-13139

Stainless steel stress corrosion cracking test in magnesium chloride solution, emphasizing crack crystallographic orientation observation

03 p0513 A70-14299

Press load prediction for deep drawing Ti-Al-V alloy, stainless steel and Inconel X under various lubrication conditions at room temperature
[ASME PAPER 69-WA/PROD-15]

04 p0698 A70-14835

Thermal resistance of multicontact heat conducting stainless steel plate stacks with different interface purities in vacuum

05 p0957 A70-16293

Chromium stainless steels nitrided cases formation and phase composition, studying temperature effects

07 p1304 A70-18744

Stainless steels case hardening in hydrogen, nitrogen, propane and butane mixture, showing temperature and process duration effects

07 p1291 A70-18831

High chromium stainless steels nitriding and carburizing processes stabilized by nickel galvanic coating, enhancing nitrogen or carbon diffusion into steel

07 p1291 A70-18832

Reverse-bend and tension-tension fatigue properties of high strength Cr-Mn-N stainless steel sheet in notched and unnotched conditions

07 p1305 A70-18993

Dynamic creep rupture of stainless steel tested at high stress levels and temperatures

08 p1518 A70-21333

High temperature thermomechanical treatment effects on stainless steels and Ti alloys microheterogeneity, noting corrosion resistance improvement

08 p1519 A70-21444

Automatic cladding method for submerged arc stainless steel welding, discussing delta ferrite to sigma phase transformation for surfacing with low ferrite stainless steel

08 p1508 A70-21489

Stainless steel wire-reinforced Al alloy diffusion bonded scarf joints, considering aluminum oxide coating and bonding times effects

08 p1509 A70-21906

Passive film on stainless steels in boiling nitric medium studied by recording constant potential on sample subjected to polarizations

09 p1700 A70-22010

Internal stresses and substructures dependence on thermomechanical histories of stainless steel during creep, noting subgrain orientation

09 p1705 A70-22805

Particle fracture in oxide dispersed stainless steels during plastic deformation at room temperature

09 p1706 A70-22813

Zr and stainless steel pitting in acidic and near neutral chloride media, comparing controlled potential and conventional chemical corrosion tests results

09 p1706 A70-22939

Stainless steel corrosion rates in flowing liquid Na from mechanism based on thermodynamic partitioning of oxygen

09 p1706 A70-22942

Fatigue properties of electron beam welded precipitation hardening stainless steels

11 p2059 A70-25664

Low cycle fatigue tests on stainless steel, discussing crack behavior dependence on temperature and plastic strain range

11 p2139 A70-26405

Regeneratively cooled stainless steel thrust chamber failure related to internal carburization by fuel decomposition and propellant combustion

12 p2290 A70-27111

Annealed stainless steel low cycle fatigue data analysis leading to method of characteristic slopes approach for correlating plastic strain range to fracture time

12 p2255 A70-27604

Ductile fracture in Al matrix composite reinforced with unidirectional stainless steel fibers described by critical crack tip displacement and fracture strain criteria

13 p2512 A70-28917

Solid state welding processes for space, nuclear and deep submergence technologies, discussing diffusion bonding of Al and stainless steels

13 p2419 A70-29117

Ultrahigh strength stainless steel for light gage springs and satellite antennas

13 p2420 A70-29248

Stainless steel fiber reinforced Sn-Pb eutectic alloy composite mechanical properties, noting tensile strength and rupture behavior

13 p2436 A70-29625

Uniaxial yielding correlation with substructure in Al-stainless steel metal matrix composites, using compressive loading test

15 p2756 A70-31565

High temperature oxidation of Ni-Cr alloys and stainless steels in molten salt, observing grain boundary corrosion with electron probe

15 p2757 A70-31875

Thermal-mechanically treated stainless steels structure and properties, discussing stress relief aging effects

15 p2761 A70-32380

Stainless steels creep behavior under long term tensile loads at high temperature

15 p2764 A70-32898

Molten contaminated Li effects on microstructure, tensile strength and stress corrosion of stainless steels and refractory metals

16 p2933 A70-34206

Iron, Ni, Cr and Co corrosion and mass transfer in high temperature Na, examining properties of stainless steels and cobalt base alloys

16 p2933 A70-34209

Cr-Ni stainless steels room temperature yield and tensile strengths improvement by nitrogen addition

17 p3122 A70-34553

Low cycle fatigue and short term tensile behavior correlation for irradiated and unirradiated stainless steels

17 p3123 A70-34627

Precipitation hardening Co-Cu-Mo stainless steels, determining martensitic structures free from delta ferrite and residual austenite

18 p3262 A70-35965

Two phase stainless steels with microduplex structures, taking into account martensite and ferrite effects on mechanical properties

18 p3272 A70-36038

Oxygen pressure effect on stainless steel cyclic hardening during vibration tests at resonant frequency

18 p3273 A70-36042

Stainless steel load-strain characteristics and cumulative damage in cyclic fatigue life

18 p3273 A70-36048

Carbide precipitation and grain boundary migration in solution annealed duplex stainless steel as function of aging time

18 p3274 A70-36050

Physiosorption isotherms for nitrogen on stainless steel at various temperatures and very low pressures

18 p3226 A70-36322

Concorde engine bay thermal insulation combining stainless steel foil and polytetrafluorethylene film, considering noise level, engine fire conditions and molten Ti globules penetration

18 p3346 A70-36345

Al alloy matrix-boron fiber-stainless steel wire composites fabrication into various shapes with desired mechanical properties for aerospace structural components applications

18 p3263 A70-36837

Fluxless paste for thermomodification coloring stainless and heat resistant steels and alloys

19 p3434 A70-37459

Steady state and transient fatigue behavior of stainless steel wire-Al alloy composite subjected to push-pull and pull-release frequency tests

20 p3649 A70-39946

Stainless maraging steel bolts tensile, shear and fatigue strengths and stress corrosion resistance at room and high temperatures

20 p3650 A70-39964

Al alloys and stainless steels tensile properties and application in lightweight cryogenic propellant tank structures, discussing Ti alloys and reinforced composite materials tests

20 p3651 A70-40123

One-step closure sealing of pressurized stainless steel capillary tubes by resistance pinch welding

21 p3832 A70-40789

Stainless steel sheet-to-plate tee joint resistance welded by Magnetic Force Upset Welding process, testing performance

21 p3832 A70-40792

Accelerated failure tests of ammonia-Al-stainless steel heat pipes for fluid loss or energy transport degradation

21 p3947 A70-41049

Stainless steel gas tungsten arc welding, considering anode spot size variation and current density

22 p4042 A70-42377

Fatigue of turbine blade stainless steels and nickel alloys as function of temperature, stress and surface layers

23 p4205 A70-44135

Aluminum, duraluminum and stainless steel tensile strength tests at cryogenic temperatures

23 p4206 A70-44353

18-8 stainless steels pitting corrosion, examining grain boundaries influence

24 p4362 A70-46184

Stainless steel oxide films structures and chemical compositions, examining oxidation time, polishing conditions, vapor humidity and temperature effects

24 p4362 A70-46191

STALL

U BOUNDARY LAYER SEPARATION

STAMPING

Facility for studying energy characteristics of electrohydraulic stamping, discussing copper wire exploding in water

06 p1077 A70-17869

STANDARD ATMOSPHERES

U REFERENCE ATMOSPHERES

STANDARD DEVIATION

Reconnaissance uncertainty effect on precision of return to fixed point applied to circular error probable, drms calculations and Loran

04 p0652 A70-15345

Arithmetic mean, least squares method and standard deviation concepts in random error analysis of measurement data

11 p2117 A70-26674

STANDARDIZATION

Human factors data standardization in NASA Apollo Applications Program for computer data processing

09 p1623 A70-22295

Absolute radiometric reference scale, noting International Pyrheliometric Scale 1956 materialization by standard instruments

15 p2735 A70-31805

Parts standardization in military electronics industry for cost reduction and reliability, discussing design transform from software to hardware

15 p2831 A70-32632

Fastener standardization for airline maintenance requirements

17 p3102 A70-35811

Spectrosensitometer for standardizing meteor spectrograms

19 p3514 A70-37643

Flight data acquisition methods standardization, discussing digital recording modes and formats and hardware rationalization

19 p3429 A70-38515

STANDARDS

NT FREQUENCY STANDARDS

NT REFERENCE ATMOSPHERES

Earth satellites magnetic survey contributions to World Magnetic Survey project (WMS), discussing international reference standards and magnetic mapping

01 p0075 A70-10595

Recommended design practices to assure good brake system performance with compatibility for skid control equipped aircraft

01 p0007 A70-11457

Aircraft/aerospace fluid systems flexible hose and rigid tube assemblies fire resistance and test requirements

01 p0011 A70-11459

Quick-disconnect couplings selection guide for aerospace fluid systems, emphasizing functional and weight considerations

01 p0197 A70-11461

Helicopter turbine engine bleed air requirements obtained by compressor extraction for engine designers

01 p0167 A70-11462

Photoelectric UVB photometry of stars in Carina, Vela and Centaurus, giving standard connection sequences for continued photometry

02 p0370 A70-12074

FAA engineering approach to SST certification involving airworthiness standards development and coordination with industry and foreign governments

03 p0437 A70-14060

Allowable leakage guidelines for in-service aircraft hydraulic components, discussing causes and measurements, tabulating rates for static and dynamic seals

05 p0797 A70-15776

Systems engineering management process for satisfying MIL-STD-499 requirements, detailing functional analysis, tradeoffs and resulting design analysis data

05 p0959 A70-16462

Selection criteria for nonturbobcharged air or liquid cooled reciprocating type prime movers used in aircraft ground support equipment

07 p1248 A70-18801

Back-up rings and special sealing devices performance qualification testing specifications

07 p1290 A70-18802

Liquids particulate contamination sizing and counting by membrane filtration, specifying procedures and apparatus used

07 p1195 A70-18804

Propellant transfer unit for weapon or space vehicle systems, specifying aerospace ground equipment criteria

07 p1248 A70-18806

Fluids for aerospace power technology, tabulating properties of hydraulic, damper and heat transfer fluids, fuels, oils, etc

07 p1316 A70-18807

Specification of minimum performance standards and test procedures for automatic pressure altitude digitizer equipment

07 p1279 A70-18901

Air-land demountable cargo containers specifications, establishing dimensional, structural and environmental requirements
[SAE-AS-832] 07 p1249 A70-19599

Test standards for boron epoxy flat laminates, proposing specimen geometries and testing methods
08 p1530 A70-21887

Sailplane design standards concerning retractable undercarriage and trailing-edge flaps revised to achieve better performance
09 p1612 A70-23575

Abbot pyranometer as reference standard for calibration, reporting performance tests of time constant, cosine response and attitude
10 p1886 A70-23933

FAA recommendations on general aviation airports and heliport design standards, explaining standards establishment or modification procedures
[SAE PAPER 700231] 11 p2031 A70-25900

Bonded resistance strain gages technical characteristics noting need for uniform standards
11 p2053 A70-26427

International safety standards for SST airworthiness
12 p2161 A70-27599

Minimum performance standards established by Radio Technical Commission for Aeronautics for airborne radio marker receiving equipment operating on 75 MHz
13 p2364 A70-28999

Minimum performance standards for airborne radio receiving and direction finding equipment covering normal and environmental test procedures
13 p2365 A70-29000

Black bodies radiation properties and design for applications as absolute radiation standards
13 p2410 A70-29657

Standard pattern recognition with spatial discretization, concerning discrete cell or segment viewing
14 p2553 A70-30422

Radiometers calibration equipment maintaining radiation standards, investigating long and short waves by digital voltmeter coupled to paper tape punch
15 p2735 A70-31806

Airport safety standards for overall system including aircraft, ATC, navigation, runways, etc
15 p2717 A70-32229

Computer system maintainability demonstration test in accordance with MIL-STD-471, discussing techniques for failure indication and repair crew qualifications and training
15 p2706 A70-32657

Air safety R and D and future safety standards
16 p2842 A70-33816

Engineering standard for solar constant and zero air mass solar spectral irradiance from high altitude measurements
17 p3077 A70-35161

Piezoelectric controlled device as standard for holographic interferometry, providing continuously variable subject plate displacement and/or rotation
19 p3425 A70-37890

Defect grouping role in MIL-STD-105D inspection techniques, discussing costs and acceptance probabilities
22 p4048 A70-43727

MIL-STD-882 systems and subsystems and equipment safety requirements related to program management activities
22 p4048 A70-43730

Information handling for safety design concerning standards, criteria and requirements
23 p4153 A70-44493

STOL aircraft FAA airworthiness standards and certification rules, examining noise, control systems, all weather operation, fire protection, handling qualities and performance
[AIAA PAPER 70-1331] 24 p4291 A70-45937

STANDING WAVE RATIOS

Standing wave ratio of ultrasonic field determined by holographic method, using acoustic transmission lines with termination impedances
05 p0848 A70-16403

Rectangular-slot antenna pair self and mutual admittances in inhomogeneous plasma layer on slender conical body, calculating VSWR and isolation
06 p1020 A70-17565

Standing wave ratio frequency dependence in miniature stripline power dividers and ring structure hybrid junction
09 p1652 A70-23653

Thin window for circularly polarizing antennas, measuring circularity and VSWR performance on S and X band test sections
16 p2877 A70-33410

STANDING WAVES

Vertical wind observations during lower ionosphere wind measurements by Na release method, discussing gravity effects and standing waves
01 p0078 A70-11213

Resonance amplification theory of standing interfacial gravity waves in viscous fluids applied to obtain wavelengths prediction of atmospheric bow waves
01 p0081 A70-11299

Standing bow shock in plasma flow into dipole magnetic field, measuring particle density, electron temperature, magnetic field flux and oscillations
03 p0530 A70-13158

T and L spiral waves existence in disk galaxies, noting helical and ring structures formation near center from standing waves onset
03 p0564 A70-13223

Mean acoustic force on small spherical and nonspherical inclusions in standing acoustic field, discussing equilibrium orientations of body
04 p0720 A70-15085

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field
07 p1296 A70-18765

T and L spiral waves existence in disk galaxies, noting helical and ring structures formation near center from standing waves onset
08 p1580 A70-21656

Standing wave measurements on radiating traveling wave dipole arrays with glide symmetric excitation, showing multimode propagation and effect on log periodic balancing
09 p1633 A70-22688

Stationary collisionless shock waves in hot initial plasma produced by theta pinch discharge, discussing magnetic field, density and electron temperature profiles
10 p1924 A70-24697

Transverse laser modes interaction in traveling and standing wave generators allowing for spatial distribution
13 p2424 A70-28597

Optical system with orthogonal standing waves in liquid used for two dimensional scanning of laser beam in ultrasonic field
18 p3271 A70-37109

STANDS

U SUPPORTS

STAR CLUSTERS

NT VIRGO STAR CLUSTER

Stellar systems models numerical construction, using data on star cluster density distribution, centroid velocity, potential distribution, etc
01 p0174 A70-10200

Computer model for evolution investigation of disks of stars, discussing methods to obtain gravitational potential
01 p0185 A70-11065

Soviet collection of articles on structure and dynamics of stellar systems, Part 2
02 p0375 A70-12442

Stellar clusters equilibrium state in gravitational field, discussing dispersed clusters formation by gravitational instability in gas containing stars of various ages
02 p0376 A70-12446

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy
03 p0565 A70-13230

Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud
03 p0565 A70-13235

Envelope stars evaporation effects on star cluster contraction, discussing energy inflow from envelope to nucleus
04 p0745 A70-14475

Stars distribution in depleted globular clusters determined by integral equations describing distribution as function of cluster parameters
04 p0754 A70-15256

Horizontal branch and red giant stars ratio estimated in globular clusters for He abundance
05 p0906 A70-15894

Pulsed gravitational radiation emitted by dense star clusters
05 p0921 A70-16977

Neutrino emission, mass loss and giant branch termination in young clusters with giants originating from intermediate mass main sequence stars
06 p1138 A70-17277

Globular clusters in M31, discussing metallicity and heavy element enrichment in Andromeda
06 p1138 A70-17306

Mean magnitudes, colors and amplitudes for RR Lyrae variables in omega Centauri cluster obtained from photometric observations
06 p1148 A70-18455

Stellar velocity distribution function for small mass stars in nonrotating systems
07 p1389 A70-20208

Double and multiple stars components magnitude differences tabulated based on visual and photometric observations
08 p1574 A70-21163

Pulsar clusters and associations within 1 kpc of sun and hot O-stars and supergiants, calculating radius of surrounding H II regions
08 p1577 A70-21493

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy
08 p1580 A70-21663

Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud
08 p1580 A70-21668

Hydrogen 21 cm emission line in Perseus region observed for motion of neutral hydrogen connected with II Per, discussing stellar radial velocity
10 p1937 A70-23944

Excess color method for photometric and spectral studies of interstellar absorption in cluster NGC 6913
11 p2116 A70-26585

Excess color method for studying interstellar absorption around cluster NGC 6823
11 p2116 A70-26586

Densities and extents of absorbing clouds in open cluster NGC 7086 determined from photometry and spectral classifications of stars
11 p2116 A70-26587

Young stars evolution rates in expanding and disintegrating stellar associations, giving age estimates
12 p2306 A70-27862

Red dwarfs and supernovae determination in stellar clusters, outlining statistical probability technique for total number of flare stars
12 p2308 A70-27872

Self gravitating three dimensional particles system evolution using water bag model
13 p2498 A70-30012

Galactic structure of Milky Way towards Taurus based on two dimensional classification and three color photography of star group
15 p2797 A70-31621

Stellar associations formation theory including effects of radiation, Rayleigh-Taylor instability and interstellar gas cold regions
15 p2801 A70-32478

Flare stars distribution in Pleiades, discussing flare visual magnitude and frequency
15 p2807 A70-32876

Quasars as protoclusters of galaxies, discussing hypothesis of dense matter cascading fragmentation with subsequent scattering in form dispersing stellar systems
15 p2808 A70-32881

Stellar evolution in globular clusters, considering H-R diagrams of age, He abundance and thermal instability
16 p2973 A70-33076

Globular cluster stars, discussing cosmological importance, stellar development models, main sequence stars, red giant models, He content, age computation, etc
17 p3171 A70-35447

Galaxies and globular clusters, obtaining data by measurements with intermediate bandpass photometry
18 p3321 A70-37121

Dispersed stellar clusters color excesses and distance moduli from color-magnitude diagram, considering evolutionary deviation from main sequence
18 p3323 A70-37138

Peculiar velocities nonisotropic distribution in stationary differentially rotating stellar system based on Boltzmann equation solution
18 p3324 A70-37149

Spiral galaxy NGC 6946 structure and stellar associations distribution, indicating no relation between color and magnitude and distance from center
18 p3327 A70-37160

O type stellar clusters hydrogen line observation revealing associated gas clouds
18 p3328 A70-37172

Galactic spiral structure relation to local stellar distribution, discussing OB associations, galactic cluster, WR stars, cepheids, and common stars in sun neighborhood
18 p3329 A70-37176

H 2 region galactic clusters and exciting stars, reevaluating distances by color magnitude diagrams
18 p3329 A70-37178

Association Carina OB 2 photometric investigation of mean distances
18 p3330 A70-37186

Rotating stellar systems cooperative phenomena, estimating star-star collisions effect on perturbation rate and damping
19 p3525 A70-38772

Relativistic gas spheres and collisionless star cluster models with large red shifts, showing radial perturbation stability
20 p3703 A70-39175

Globular cluster color-magnitude diagram parameters, examining giant branch and metal content
21 p3889 A70-41153

Color-color diagram of M92, computing synthetic stellar spectra for line absorption effect
21 p3892 A70-41249

Open star h and chi Persei cluster four color and H beta photoelectric photometry, discussing interstellar reddening, ages and distances
21 p3922 A70-41982

Color-magnitude diagram of star cluster Kron 3 in Small Magellanic Cloud, using electronographic photometry
22 p4102 A70-42978

Stellar population of young clusters containing red supergiants, determining spectral types and luminosity classes 22 p4102 A70-42979

Time constant loci and theoretical luminosity functions for various compositions and ages of metal poor globular clusters 22 p4108 A70-43735

Globular cluster relaxation time using nonMaxwellian velocity distribution and polytropic spatial distribution 22 p4109 A70-43744

Globular cluster M5 giant, asymptotic and horizontal branches, determining color-magnitude diagram and luminosity 22 p4109 A70-43745

Stellar associations formation theory including effects of radiation, Rayleigh-Taylor instability and interstellar gas cold regions 23 p4239 A70-43903

Stellar spectra above horizontal branch in globular clusters, discussing stellar evolution, composition and structure 23 p4246 A70-44755

Stellar rotational velocities in open star clusters, noting evolutionary expansion, tidal coupling in binaries and Ap stars magnetic braking 23 p4251 A70-44820

Cluster evolution model for stars with equal masses, calculating density and velocity distribution for various cluster types 24 p4404 A70-45417

Old open clusters red giant observations comparison with stellar evolution calculations, discussing proper motions, magnitudes, data acquisition and analysis, etc 24 p4404 A70-45418

STAR DISTRIBUTION

Duplication characteristics of low luminosity stars, considering nearby M dwarfs, white dwarfs and high velocity subdwarfs 01 p0188 A70-11334

PreHayashi phase of stellar evolution, discussing protostellar disks /stellisks/ formation from flattened fragments of collapsed interstellar cloud under turbulent viscosity 01 p0190 A70-11346

Spacecraft orientation from onboard stellar photographs, calculating absolute and relative elements, accuracy and camera parameters 01 p0198 A70-11512

MK stellar spectral types in Monoceros, analyzing spatial distribution and interstellar absorption using slit spectograms 02 p0369 A70-12063

Radio sources emission separations statistical analysis, establishing little physical association in pairs of sources 02 p0370 A70-12112

Pulsar distance and distribution estimation, considering galactic spiral structure and nature of interstellar medium 02 p0371 A70-12201

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy 03 p0565 A70-13230

Young flare stars in solar vicinity, considering spatial density, kinematic properties and luminosities 03 p0567 A70-13318

Smithsonian Astrophysical Observatory (SAO) Star Atlas of reference stars and nonstellar objects 04 p0749 A70-14676

Stars distribution in depleted globular clusters determined by integral equations describing distribution as function of cluster parameters 04 p0754 A70-15256

Time determination at astronomical observatories using transit instrument observations concerning stellar distributions and magnitudes 04 p0756 A70-15486

Elliptical cosmology, discussing evolutionary geometry, Synge distribution, galactic age and distance from earth, Friedman equations and independence of constants 05 p0905 A70-15794

Horizontal branch and red giant stars ratio estimated in globular clusters for He abundance 05 p0906 A70-15894

Diffuse far UV radiation analysis in connection with stars and dust grains distribution and grains optical properties 05 p0903 A70-16571

Binary star frequency and orbital axes distribution, discussing visual orbits, mass ratios, photometrical detection, etc 06 p1138 A70-17308

Milky way and interstellar clouds brightness fluctuations statistical analysis by surface photometry, studying dust distribution, cloud absorption and dimensions, star distribution, etc 06 p1149 A70-18463

Neutron stars equation of state derived, suggesting three body forces inclusion at high densities 07 p1388 A70-19924

Anomalous fast OB stars separation method based on spatial kinematic characteristics measurements, noting accuracy 08 p1580 A70-21663

Galaxies and stars interactions, explaining observed peculiarities by electrostatic and electromagnetic forces 09 p1750 A70-22097

Nonlinear stellar density waves in galaxy using gas dynamic equations, assuming one dimensional and steady waves 09 p1762 A70-23073

Star field pattern recognition methods for spacecraft attitude determination without a priori knowledge of star position-vehicle attitude relationship 09 p1725 A70-23516

Multiplicity recorder for cosmic rays neutron component studies, reducing star redistribution errors by coincidence effect compensation 11 p2103 A70-25527

Stars identification on photographic plates and position computation in FORTRAN, using CONTROL DATA 6600 and IBM 1130 computers 11 p2113 A70-26183

Diffuse matter distribution in northern region of Milky Way, examining relation with O-BO stars distribution 11 p2116 A70-26588

Latitude determination from observations of pairs of bright stars at equal altitudes, using computer ephemeris calculations 14 p2633 A70-30142

Spiral structure of disk galaxies as nonaxisymmetric perturbations in density, using pressure free hydrodynamical equations 14 p2639 A70-30731

Near Galactic plane condensations of spectral A stars in HD catalog, investigating by Monte Carlo method and Poisson formula 15 p2797 A70-31616

Galactic structure of Milky Way towards Taurus based on two dimensional classification and three color photography of star group 15 p2797 A70-31621

Holographic device for satellite attitude determination, providing three axis reference information in analog or digital form from single star field sampling 16 p2946 A70-33158

G and K stars spectral classification using narrow band photometry 17 p3169 A70-35380

Soviet book on declination observation of bright and faint stars in one system 18 p3314 A70-36402

Galactic spiral structure model, examining nonlinear stellar density waves in plasma cylinder 18 p3322 A70-37131

Dispersed stellar clusters color excesses and distance moduli from color-magnitude diagram, considering evolutionary deviation from main sequence 18 p3323 A70-37138

Clock corrections determinations by stars pairs situated symmetrically around zenith, obtaining formulas by various methods 18 p3324 A70-37146

Spiral structure definition in external galaxies, discussing optical form types, Messier 33 outer and inner parts and differences in arms 18 p3326 A70-37153

Milky Way and other galaxies spiral arms configuration, comparing to Andromeda 18 p3326 A70-37154

M-31 galaxy OB /outermost border/ stars 18 p3326 A70-37156

Spiral galaxy NGC 6946 structure and stellar associations distribution, indicating no relation between color and magnitude and distance from center 18 p3327 A70-37160

Pulsar galactic longitudinal distribution, discussing observability impaired by high electron density in spiral 18 p3328 A70-37173

Galactic spiral structure relation to local stellar distribution, discussing OB associations, galactic cluster, WR stars, cepheids, and common stars in sun neighborhood 18 p3329 A70-37176

Orion arm local structure and kinematics, discussing outward or inward motion to galactic center and component direction 18 p3329 A70-37177

Local spiral arm H 2 regions distribution in Cygnus direction, discussing symmetry due to magnetic field 18 p3329 A70-37180

Young cepheids galactic distribution determined by photometric method, showing correlation with spiral arms 18 p3330 A70-37184

Association Carina OB 2 photometric investigation of mean distances 18 p3330 A70-37186

Stellar rings and galactic structure, examining protol elliptoidal star aggregate diameter constancy 18 p3330 A70-37187

O-B5 stars mean ages estimation by hyperbolic approximation based on distribution in stellar associations 19 p3524 A70-38762

Stellar ring 373, comparing color-magnitude and color-color diagrams to adjacent star fields 21 p3888 A70-41121

Photographic determination of star positions at closed block plate adjustment, considering accuracy expectancy 21 p3889 A70-41146

Intermediate band photometry of companions to RR Lyrae variables, identifying AP Ser K line excess subdwarf 21 p3892 A70-41187

Galactic distribution of supernova remnants and association with pulsars and X ray sources 21 p3892 A70-41188

Multiplicity recorder for cosmic rays neutron component studies, reducing star redistribution errors by coincidence effect compensation 21 p3882 A70-41277

Sirius components relative photographic positions and magnitude difference, discussing color effect, grating image separations and emulsion contraction 21 p3922 A70-41984

Star content in Small Magellanic Cloud wing counted to determine detachability from tidal arm and main body 22 p4099 A70-42628

OB star distribution statistical analysis in Southern Milky Way, discussing concentrations, relations and systematic deviations 22 p4100 A70-42854

Stellar ring 274 reality confirmed by photometric measurements of OB member stars, determining variable shell star P Cygni location 22 p4101 A70-42868

Computer model of self gravitating gas-stars system with spiral structure surviving galactic rotations 22 p4103 A70-42982

Cosmic rays galactic propagation and confinement, discussing matter and star distributions, magnetic fields, positron flux and energy spectrum, etc 22 p4096 A70-43396

Photometric search for metal deficient stars, using objective prism plates and four color Stromgren technique 22 p4109 A70-43736

Radial velocity-light amplitude ratios of grouped variable stars in continuous sequence, comparing pulsation prediction 23 p4247 A70-44793

Pulsars correlation with stellar evolution using model, discussing distribution and formation rate in Milky Way galaxy 24 p4412 A70-45981

STAR FIELDS

U STAR DISTRIBUTION

STAR TRACKERS

Statistical decision problem of Brownian motion with moving boundaries in automatic daylight star tracker design for aircraft navigation solved by image method 01 p0139 A70-11635

Gyrostabilized attitude reference platform for high altitude rotating research rocket payload alignment with preselected star 03 p0579 A70-13606

Delay characteristics of narrow band double bridge amplifier used as inertial component of photoelectric star transit recorder 04 p0693 A70-15489

Transistorized photoelectric star transit recorder operable in ambient media with large temperature variations ensuring low zero point drift 04 p0694 A70-15490

Electronic recorder design and operation for mean moments of star transit times 04 p0694 A70-15491

Danjon astrolabe for star position and aberration constant determination with improved accuracy, discussing Mars observation 05 p0912 A70-16453

Stars photographic position determination errors with NAFA-3C/25 camera, comparing films and plates 09 p1673 A70-22164

Wide angle electronic camera for astronomical photometry designed to seek photometric standard stars remote from nebular regions 09 p1681 A70-23313

Star field pattern recognition methods for spacecraft attitude determination without a priori knowledge of star position-vehicle attitude relationship 09 p1725 A70-23516

Star tracker linear and nonlinear model selection influence on satellite attitude stability 10 p1953 A70-25231

Three axis star pointing attitude control system for stabilized Skylark sounding rocket program 13 p2447 A70-28687

Stellar sensors and deviation measurement procedures, discussing photosensitive elements, astrophysical data, etc

13 p2407 A70-29140

Spin stabilized Project Scanner spacecraft attitude determination by star mapping technique, describing optics, photomultiplier, reticle, electronics and sun shield

15 p2772 A70-31791

Mariner spacecraft electro-optically controlled star sensors design and performance, discussing star simulation and stray light test techniques

15 p2736 A70-32033

Stabilized platform stellar detector for French probe balloons, using semicircular light modulator

15 p2738 A70-32249

Attitude sensing and target pointing instrumentation in earth orbiting stellar telescopes in inertial space

16 p2905 A70-33155

Shipborne day/night star tracker assisting Missile Guidance System monitoring in Atlantic and Pacific Missile Ranges

16 p2905 A70-33156

Star tracker rigidly connected to spacecraft frame for attitude determination by star field correlation

16 p2946 A70-33157

Surveyor Canopus sensor and Project Scanner dual IR radiometer mechanical design

16 p2914 A70-34107

Balloon-borne X ray telescope star sensor with one arc minute accuracy, discussing design and Cyg X-1 location measurement

17 p3090 A70-35312

Mariner spacecraft roll control star sensors and trackers design and flight performance

20 p3665 A70-39239

Spacecraft position determination by holographic approach involving single star formation

20 p3665 A70-39422

Navigation instrument geometrical calibration by natural satellites and reference stars during interplanetary flight

[AIAA PAPER 70-1023] 20 p3669 A70-39586

Aerospace electronics covering fly-by-wire aircraft flight control, ATC, star trackers for spacecraft attitude control, etc

20 p3669 A70-39668

Guidance and navigation systems precision azimuth measurement by star sighting and gyrocompass techniques

22 p4067 A70-42663

STAR TRACKING

U STAR TRACKERS

STARFIGHTER AIRCRAFT

U F-104 AIRCRAFT

STARK EFFECT

Classical path methods for treating Stark spectral line broadening in plasmas illustrated by Lyman alpha line of hydrogen calculations

04 p0726 A70-14670

Stark broadening of ionized helium lines by collective electric fields in theta pinch

04 p0722 A70-14684

Transition probability and Stark profile of H alpha standards for absolute intensity calibration of spectroscopic data from thermal shock tube plasma

05 p0853 A70-17083

Carbon dioxide laser beam modulation by molecular Stark effect

06 p1080 A70-17448

Numerical calculation of S matrices for Stark broadening of Lyman-alpha line based on straight line classical path model

09 p1730 A70-22228

Stark broadening of singly ionized nitrogen lines measured in dense high temperature plasma behind reflected shock wave in T tube

09 p1731 A70-22776

Stark effect He II and H beta on lines observed for transverse and longitudinal fields, using beam-foil light source

09 p1731 A70-22779

Measured and theoretical Stark-broadened line profiles and asymptotic wing approximation of hydrogen Balmer lines at specific electron density and temperature

09 p1732 A70-22782

Quadratic Stark shifts of absorption lines hyperfine components in cesium atom beam measured using optical spectroscopy

10 p1887 A70-24033

Stark cell with high electric fields for studying inactive IR spectrum of homonuclear diatomic gas molecules

13 p2450 A70-28499

Stark-broadened neutral atomic line widths and shifts, determining electron densities from H beta profiles and pressure-temperature data

13 p2455 A70-29220

Stark broadening of neutral helium line in plasmas for electron densities measurements accuracy, comparing to H beta determined densities

13 p2456 A70-29225

Nitrous oxide and carbon dioxide laser Q switching by ammonia Stark effect

13 p2431 A70-29835

Stark broadening calculations of H alpha and H gamma hydrogen lineshapes

14 p2620 A70-31303

Ion line Stark broadening, considering electron-ion quadrupole excitation and electron resonant scattering

14 p2620 A70-31376

H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity

15 p2777 A70-32490

Near collisions approximation in Stark broadening of hydrogen Lyman alpha line

18 p3296 A70-37227

H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity

23 p4221 A70-43912

Stark effect in hydrogen atoms for nonuniform electric fields, considering correction of energy eigenvalues of Schrodinger equation by WKB method

23 p4221 A70-44401

Hydrogen cluster beam discharges, determining transient plasma ion density from Stark broadening measurements of H beta line

23 p4228 A70-44939

Stellar objects position accuracy with respect to reference stars improved by applying differential corrections methods to optical center coordinates of stellar photographs

02 p0362 A70-11759

Selenodetic control systems orientation based on lunar features correlation with reference stars, considering ephemeris times corrections

08 p1572 A70-20941

Stars of galactic nebulae - Conference, Buirakan, Armenian SSR, September 1968

12 p2304 A70-27851

Selenodetic control systems orientation based on lunar features correlation with reference stars, considering ephemeris times corrections

15 p2806 A70-32753

Diffraction by star bounded by closed contour scalar field created by surrounding medium, reducing solution to boundary value problem via algorithm

19 p3470 A70-37431

STARTERS

NT ENGINE STARTERS

STARTING

Combined gyromotors optimal starting and operating conditions, considering size and weight characteristics

09 p1680 A70-23146

Nickel cadmium battery for aircraft jet engine starting, discussing selection for optimum service life and reliability under maintenance and environmental conditions

[SAE PAPER 700211] 11 p1980 A70-25883

Low drag supersonic compressors for aircraft engines, calculating start and cruise conditions of quasi-isentropic flow cascades

21 p3745 A70-41405

Gas turbine engine combustion chamber starting, discussing effects of temperature, nozzle characteristics and fuel physicochemical properties

22 p4092 A70-43356

Start-up characteristics for three-phase synchronous reactive motors with various starting unit designs

24 p4293 A70-45471

STATE EQUATIONS

U EQUATIONS OF STATE

STATE VECTORS

State variable diagram for transfer function of single output/input linear stationary system obtained by parallel, direct and iterative methods

05 p0928 A70-16027

Liapunov functions generation by matrix transformation of state-space system vector applicable to linear and nonlinear systems

06 p1023 A70-17544

Apollo onboard computers tracking data state-vector corrections covariance matrix, considering initial estimate, noise and tracking geometry errors

[AIAA PAPER 70-162] 06 p1015 A70-18072

State transition matrix computation method with efficient algorithm for orbit prediction in n-body gravitational field

06 p1095 A70-18497

Final state vector norm minimizing in linear optimal control, using successive approximation and quadratic programming

10 p1856 A70-25188

State space models of remote manipulation problem applied to human supervised or autonomous computer manipulators

10 p1828 A70-25230

Transition matrix of Markov chain with finite states from noisy measurements of state, discussing algorithms convergence rates and computations

12 p2261 A70-27421

State-space synthesis of multipoint passive reciprocal networks with minimum number of resistors, using Gauss factorization procedure

14 p2556 A70-30516

State transitions and couplings in reliability of complex systems, using logic algebra suitable for computer

15 p2709 A70-32132

Augmented state variable method of nonlinear discrete system identification with noise corrupted input observations

15 p2704 A70-32592

Decoupling by dynamic compensation using algebraic machinery, considering state space extension role in pole assignment

16 p2886 A70-33333

Systems consisting of redundant and different modules, deriving vector and matrix expressions for effectiveness

17 p3099 A70-34581

Constraint optimization in state coordinates by variable structure system flexibility, using mathematical model

18 p3281 A70-36353

Kalman filter set for state vector and observation error variance estimation in discrete-time linear system, using empirical Bayes techniques

[AIAA PAPER 70-1058] 19 p3395 A70-38873

Dynamic plants optimal control, deriving algorithm for determining a posteriori probability density of generalized state vector

20 p3604 A70-39907

General linear /Kalman/ sequential filter to account for finite correlated white noise without state vector augmentation or measurement differentiation

21 p3828 A70-41735

Stochastic optimal control for nonlinear dynamical systems under noisy observations, designing suboptimal state estimates and feedback controls

22 p4063 A70-43429

State-space method of parameter tracking for adaptive control, using Riccati equation and Kalman filtering

23 p4177 A70-44675

Controllable states with prescribed heat flux for incompressible isotropic thermoelastic bodies with temperature dependent response functions

24 p4426 A70-46041

STATIC AERODYNAMIC CHARACTERISTICS

Pitch damping derivatives computation for missile configurations undergoing small amplitude oscillations at subsonic speeds, using static aerodynamic data

[AIAA PAPER 70-537] 13 p2339 A70-29004

Static longitudinal aerodynamic characteristics predictions for missile configurations at various angles of attack, using digital computer

[AIAA PAPER 70-981] 20 p3558 A70-39548

Full scale aircraft spinning motion, computing static, damping, cross and acceleration aerodynamic characteristics for antispin devices

[AIAA PAPER 70-946] 20 p3561 A70-39581

STATIC DEFORMATION

Static deformation of radially polarized inhomogeneous rotating cylindrical shaft of barium titanate using elasticity, electric field and constitutive equations for piezoelectric materials

01 p0118 A70-10549

Triangular conforming plate bending element applied to static and dynamic problems, investigating convergence rates of finite element approximations

03 p0584 A70-12924

Static and shock kink bands in biotite deformed by metamorphism, meteorite impact, nuclear explosion and laboratory experiments

09 p1665 A70-22053

Elastic constants pressure dependence of cubic crystals in NaCl and spinel structures using homogeneous static deformation method

13 p2396 A70-29172

Lunar crystalline rock static and dynamic deformation, examining regolith and silicates textures and structures

21 p3897 A70-41515

STATIC DISCHARGERS

Static electricity generation and discharge in human beings due to clothing layers, analyzing body capacitance, resistance and inductance for ordnance and fuels safety

- 03 p0439 A70-14133
- Wire dischargers at helicopter propeller blade tips reducing electrostatic RF interference, substituting stainless steel wire tufts for nichrome wire
- 05 p0848 A70-16320
- Static charge reducer for aircraft fuels handling safety, discussing performance factors
- [SAE PAPER 700277]
- 18 p3263 A70-36808

STATIC ELECTRICITY

Integrated static discharge frequencies of cat lingual cold receptors measured as function of constant temperature

- 01 p0017 A70-10472
- Static breakdown voltage of air and nitrogen measured under uniform field conditions for specific gas number densities, comparing results with Paschen law
- 03 p0528 A70-14086
- Static electricity generation and discharge in human beings due to clothing layers, analyzing body capacitance, resistance and inductance for ordnance and fuels safety
- 03 p0439 A70-14133

Static electricity suppression for textile materials by blending conducting metal fibers into yarn

- 05 p0870 A70-16299
- Static electricity hazards and problems in electronics and aerospace industries
- 07 p1333 A70-18930

Avalanche diodes properties, establishing equivalent circuit accounting for static electricity, carriers transit time and thermal effects

- 10 p1850 A70-24625
- Electrostatic discharge at magnetopause by idealized circuit analog, discussing transmission lines and terminal impedances
- 14 p2579 A70-31247

Slow tail atmospheric and VLF pulse measurements at close-to-thunderstorm fields, indicating return stroke origin

- 17 p3046 A70-35395
- Soviet book on aircraft electrification in clouds and precipitation during subsonic flight covering atmospheric electrical properties, flight dynamics modification, communications interference, etc
- 19 p3356 A70-38800

STATIC FIRING

Pressure peaks control in hydrazine propulsion system during static tests by controlling initial hydrazine injection

- 11 p2101 A70-25691

STATIC FRICTION

Elastoplastic strains in machine element surface layers under static friction force using polarization-optical techniques

- 04 p0696 A70-14410
- Radial clearance, pressure and piston length and diameter dependence of friction force at rest in piston type hydraulic devices
- 14 p2534 A70-30872

Ball in tube nutation damper for spinning satellite, describing design, testing and fabrication techniques for achieving low friction level

- 16 p2985 A70-34136

STATIC INVERTERS

Operation mode for full-bridge programmed waveform static inverter permitting saturation of power transistors in DC power conversion

- 08 p1439 A70-20707

STATIC LOADS

Computer calculation in elastoplastic range of statically indeterminate structure of bars, considering collapse load, stress and hinge rotation

- 01 p0200 A70-10524
- Finite element bending stiffness matrices for deflections analysis of pretwisted cantilever plate subjected to static loads
- 02 p0384 A70-11858

Static and cyclic stress distributions in buckling shear panel comprising flat plate of clad Cu-Al alloy

- 02 p0388 A70-12497
- Correlation between sustained-load and fatigue crack growth in high strength steels for aggressive environment effects
- 02 p0318 A70-12544

Stress concentration in optically active fiberglass reinforced plastics during static loading determined by optical polarization method

- 02 p0390 A70-12812
- Support moment of beam with ends embedded in elastic medium subject to creep, noting dependence on load
- 05 p0947 A70-17010

Friction on fuselage surface layer under static and instantaneous loads without allowance for oscillation

- 05 p0856 A70-17015
- E1617 alloy breakdown resistance tests under multiple alternating static tension-compression and vibrational loads at 800 C
- 05 p0867 A70-17044

Complex load strength criterion containing stress and strain invariants applied to simple static loads and cyclic symmetric deformation

- 06 p1162 A70-17389
- Damage accumulation and failure of low carbon and low alloy steels subjected to repeated static loading, varying cyclic load frequency
- 06 p1085 A70-17400

Metal adhesive joints behavior under prolonged static stresses, showing time dependence of tensile strength

- 08 p1504 A70-20887
- Static loading effect at high temperatures in argon and liquid lithium on mechanical properties stability of steel
- 08 p1515 A70-20920

Toroidal metallic shells stability under static loads, determining snap-through pressures in pressure chamber with nitrogen working gas

- 08 p1588 A70-21195
- Turbine components thermal stress calculations for static and variable loads, considering plastic strain, creep and temperature effects
- 09 p1775 A70-22592

Fatigue strength tests of alloy during static and programmed loading at high temperatures from statistical standpoint

- 09 p1703 A70-22620
- Gages for static strain measurements at high temperatures, discussing resistivity temperature coefficient compensation
- 09 p1680 A70-23109

Airframe critical part structural reliability on basis of ultimate static strength test data and extreme gust spectrum and maneuver loads

- 14 p2658 A70-30852
- Dynamic and static stress effects on martensite formation temperature in Fe-Ni-C alloys
- 19 p3451 A70-37569

Complementary energy bounding theorem for statically loaded bodies composed of time independent plastic material

- 19 p3546 A70-38353
- Cosserrat spectrum elastic theory, considering static problems
- 20 p3726 A70-39876

Skeletal muscles static tension influence on dog respiratory center functional properties, showing increased frequency volume and sensitivity under stimulation

- 20 p3574 A70-40174
- Hypokinesia and reduced diet effects on human tolerance to static loads, discussing acceleration tolerance prediction
- 20 p3576 A70-40198

Dynamic stability of cylindrical shell with small curvature under static or periodically variable axial pressure loads

- 21 p3932 A70-40554
- Pure Ni plastic flow threshold measurement under combined ultrasonic and static loadings, noting annealing
- 22 p4053 A70-42644

Optimal design of minimum weight bar and beam structures under static loads, comparing computer time with nonlinear programming methods

- 23 p4271 A70-44702

STATIC PRESSURE

NT HYDROSTATIC PRESSURE

Static pressure distributions and velocity profiles for Hg flow through circular pipes in transverse magnetic field, studying laminar and turbulent flows

- 04 p0728 A70-15001
- Static pressure, temperature profiles, heat transfer and optical data for turbulent boundary layer-shock interaction with/without injection
- [AIAA PAPER 70-91]
- 06 p1042 A70-18210

Premixed compression initiated supersonic combustion, noting sensitivity to small perturbations in inlet flow variables

- [AIAA PAPER 68-995]
- 07 p1421 A70-19318
- Radial static pressure distribution of turbulent jet flow over rotating cylinder with constant curvature
- 14 p2567 A70-31399

Error measurements of sharpened edged circular static pressure hole normal to moving fluid boundary using flush transducers

- 15 p2722 A70-32374
- Static pressure probes selection for measuring three dimensional flow at high velocities, considering sensitivity and errors
- 20 p3628 A70-39262

Solar wind static and dynamic pressures on earth magnetosphere, using geomagnetic parameters

- 21 p3878 A70-40845
- Nitrogen plasma viscosity measurements as function of velocity and axial static pressure gradient
- 23 p4226 A70-44439

Static pressure effects on heat flux critical density for free convection and forced flow in circular pipes

- 23 p4282 A70-44726

STATIC STABILITY

NT DIMENSIONAL STABILITY

NT SHELL STABILITY

NT STRUCTURAL STABILITY

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations

- [AIAA PAPER 69-89]
- 04 p0778 A70-15587
- Static stability criterion applicable to elastoplastics problems with/without nontrivial equilibrium states, noting effect on buckling loads
- 06 p1167 A70-17900

Equilibrium equations solved for statics of double row radial thrust ball bearing, neglecting load angle changes caused by deformations of races and ball bearings

- 06 p1077 A70-17929
- Rotating parabolic mirror /antenna/ on multisupported suspension analyzed for static rigidity, determining elastic deformation under mirror weight
- 08 p1586 A70-21055

Dynamic tensile properties of monolithic and pyrolytic graphite compared with static tensile strength

- 08 p1527 A70-21334
- Soviet book on servo systems for radar automatic tracking and control stations covering static, dynamic and frequency characteristics, amplifiers and correction devices
- 09 p1654 A70-22597

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers

- [AIAA PAPER 69-133]
- 09 p1605 A70-23218
- Long time static strength, durability and thermal stability relations determined for heat resistant alloys at operational temperatures
- 10 p1903 A70-24238

Static longitudinal stick free and stick fixed aircraft stability equations for several configurations and power effects

- [SAE PAPER 700238]
- 11 p1981 A70-25907
- Three dimensional variational dynamic and static large deformation equations solutions for stability and natural frequencies and wave propagation in bodies under initial strains
- 12 p2322 A70-27331

Transonic static and dynamic stability of large angle spherically blunted high-drag cones

- [AIAA PAPER 70-564]
- 13 p2341 A70-29029
- Static and dynamic stability of wind tunnel models with flexible support, considering binary rigid body freedoms
- 14 p2564 A70-31398

Static stability requirements relaxation and wing control devices additions for alleviating wing root bending moments in controls configured vehicle /CCV/ design concepts

- 19 p3355 A70-37395
- Asymmetric boundary layer transition effects on slender reentry vehicle motion by changing static stability characteristics
- [AIAA PAPER 70-987]
- 20 p3557 A70-39542

Spike effect on nose drag and static stability of blunt bodies, estimating optimum length for drag reduction at zero angle of attack

- 20 p3558 A70-39702
- Elastic bodies static stability theory variational principles, introducing equilibrium equations and boundary conditions of initial state by Lagrange multipliers
- 20 p3724 A70-39857

Static and dynamic longitudinal stability of semirigid parafoil gliding descent system in pitching motion

- [AIAA PAPER 70-1191]
- 21 p3753 A70-41825

STATIC TESTS

NT STATIC FIRING

Photogrammetric deformation measurement of thin steel sheets during static bending tests

- 02 p0302 A70-12653
- Metal particle and wire combustion using static and flow methods, obtaining experimental results for Al, Be, Mg and B
- [ONERA-TP-735]
- 03 p0543 A70-13633

Analytical structural design reliability, discussing static test failures of wings, fuselage, horizontal and vertical stabilizer and landing gear

- 07 p1417 A70-20400
- Flowfields in lifting-line approximation for finite bladed, lightly loaded propellers in axial cruise and heavily loaded propellers in static operation
- 07 p1190 A70-20411

Metal adhesive joints peeling and stripping strength determinations, describing static and dynamic tests

- 08 p1503 A70-20884
- Start-stop dynamics as cost effective method for computerized testing of digital modules and subassemblies, providing static and dynamic capability
- 17 p3062 A70-35504

Strapdown inertial attitude indication, describing static and dynamic tests, error propagation profiles, performance prediction, etc

- 22 p4068 A70-42668

STATIC THRUST

Thrust static characteristics of poppet valves with specific angle range indicating validity of momentum theory for thrust estimation

- 06 p1075 A70-17139

STATICS

NT ELECTROSTATICS
NT HYDROSTATICS

Spherical gas bearings static characteristics and performance, discussing materials selection, optimum clearances and surface hardness

07 p1294 A70-19122

People as conservative processors of fallible information, treating stationary data generating process as nonstationary

14 p2537 A70-30898

Linear stationary systems observability with stochastic inputs for linearly independent row vectors, determining state vector components mean values

15 p2716 A70-32346

Transversely isotropic Timoshenko beam statics and dynamics under initial stress and transverse loading

17 p3182 A70-34561

Relativistic three force transformation showing no contraction in static conditions

17 p3136 A70-34823

Quasi-equilibration of static or dynamic universal solutions of compressible or incompressible simple bodies, investigating homogeneity of symmetry and objectivity conditions

18 p3336 A70-36221

STATIONARY ORBITS

NASA network and Thor Delta type booster to launch Italian satellite to geostationary orbit, evaluating feasibility

03 p0451 A70-13841

Solar or nuclear energy powered electric propulsion systems for transferring satellite from low to geostationary orbit, discussing feasibility and costs of various designs

04 p0735 A70-15174

Geostationary mode application to earth sensing, examining resolution requirements for earth scanning tracking telescope

06 p1154 A70-17152

Stationary satellite perturbed motion calculations, assuming small initial orbital eccentricity and inclination and revolution period close to that of earth

07 p1386 A70-19485

European launcher for geostationary orbit (ELGO) program, describing Europa 3 payload, propulsion unit, propellant transfer, etc

13 p2502 A70-28449

Ion electric propulsion system coupled with small booster for geostationary orbit realization

15 p2790 A70-32276

Stationary satellite perturbed motion calculations, assuming small initial orbital eccentricity and inclination and revolution period close to that of earth

15 p2805 A70-32730

Synchronous satellites characteristics and applications to radio connection, light signals, positioning, telecommunications, manned space stations and space shuttles

22 p4109 A70-42467

Low thrust trajectory transfer from low to synchronous orbit, examining hydrogen resistance jet and mercury bombardment ion thruster

22 p4089 A70-42487

Geostationary satellites for magnetosphere and ionosphere sounding, discussing specific observational capabilities

22 p4024 A70-43397

Ion micropulsion for geostationary satellites time optimal attitude control

23 p4261 A70-44669

Europa III SLV payload for geostationary equatorial orbit, describing engine thrust and propellant capacity for high energy second stage

24 p4414 A70-46357

STATIONKEEPING

Orbit determination program for launching and stationkeeping of 24 hr geostationary satellites, using azimuth and elevation of single autotrack antenna

03 p0578 A70-14339

Satellite stationkeeping by ground command, self contained or combined methods compared for networks of synchronous satellites

[AIAA PAPER 70-479]

11 p2121 A70-25463

ATS-3 hydrazine orbit control system efficiency evaluation statistical method, considering stationkeeping maneuvers

[AIAA PAPER 70-460]

11 p2121 A70-25464

LES 5 and 6 feasibility demonstration of satellite communications at VHF/UHF to mobile terminals and as test beds, emphasizing stationkeeping and attitude control

[AIAA PAPER 70-494]

11 p2121 A70-25474

Roll and pitch attitude control for long range stationkeeping mission of synchronous flywheel stabilized communication satellite, discussing constraints on on-board equipment and technology

11 p2126 A70-26279

Low thrust station keeping guidance scheme for gravity gradient stabilized 24-hour satellite, solving equations of motion for near circular equatorial orbit

18 p3289 A70-36676

Guidance and navigation system design for automatic stationkeeping one earth orbiting vehicle with respect to other

[AIAA PAPER 70-1005]

20 p3667 A70-39526

Spinning satellites stationkeeping at synchronous altitude, using solid propellant pulsed plasma microthrusters

[AIAA PAPER 70-1148]

20 p3690 A70-40206

Parameterized design data and selection criteria of biowaste resistojet system for orbit keeping and control moment gyro desaturation of manned space station

[AIAA PAPER 70-1132]

20 p3567 A70-40213

Ion thrust vectoring systems for satellite attitude control and stationkeeping, discussing deflection techniques

[AIAA PAPER 70-1150]

21 p3868 A70-41783

Attitude and orbit control electric propulsion systems for long term space stations, discussing resistojets and electron bombardment and contact ionization ion thrusters

22 p4092 A70-43654

Formation flight stability in dynamic environment, using stationkeeping geometry simulation

[AIAA PAPER 70-1337]

24 p4373 A70-45931

Life-test sampling plan for electron tubes based on

exponential failure distribution for reliability demand

of military specifications

01 p0099 A70-10112

Missile miss distance evaluation model with emphasis on statistical nature, noting application to systems analysis

01 p0193 A70-10118

Probability selection of useful plants based on distribution of resolving statistics

01 p0053 A70-11023

Mathematical theory of time domain statistical description of random signals in terms of probability theory

01 p0044 A70-11042

Nonlinear system under random excitation, discussing analytic solution method and statistical properties

01 p0206 A70-11149

Book on mathematical methods of reliability theory covering probability theory, statistics, Laplace transformation, set theory, testing, quality control, mass production, sampling, etc

01 p0133 A70-11308

Gas turbine engines vibration characteristics, discussing statistical analysis obtained through condensed vibration overload control program

01 p0166 A70-11420

Materials strength characteristics with respect to breakdown probability parameter by statistical fatigue stability analysis under unsteady loads and various distribution laws

01 p0211 A70-11424

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data

01 p0094 A70-11484

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis

01 p0172 A70-11524

Ionized meteor trails initial radii statistical characteristics determined for two models

01 p0192 A70-11537

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence

01 p0068 A70-11594

Shock wave structure determination in simple monatomic gas, using statistical counting and successive approximation algorithm

01 p0068 A70-11601

Radio sources emission separations statistical analysis, establishing little physical association in pairs of sources

02 p0370 A70-12112

Expected values optimal measurement, given auxiliary conditions between measured value number and quantization

02 p0299 A70-12400

Discrete statistical stellar system relation existence with continuous model proved by introducing unique volume concept for discrete systems

02 p0376 A70-12443

Stationary Gaussian stochastic processes sample functions properties and local times

02 p0324 A70-12504

Statistical measurements of deformation structures and refractive indices in experimentally shock loaded quartz specimens with different crystallographic orientations

02 p0292 A70-12509

Geomagnetic activity effect on ionospheric electron content from statistical analysis of data obtained during three year period

02 p0293 A70-12576

Statistical model of turbulent chemically reacting shear flows, analyzing wave number fluctuations effect and Couette flow

03 p0464 A70-12928

Single dispersion statistical analysis by simultaneous parameters tolerances application

03 p0518 A70-12937

Human blood platelets volume measured in Coulter counter, noting relation to temperature

03 p0416 A70-13008

Statistical analysis of satellite drag data for characteristic time of thermal fluctuations in upper atmosphere caused by soft solar X-rays

03 p0472 A70-13179

Nonperiodic phenomena in variable stars by statistical and physical analysis, noting role of magnetic fields

03 p0566 A70-13313

Statistical equation of motion of blood by averaging motion of individual blood elements over small volume, finding constitutive equations

03 p0434 A70-13572

Sunspot motion statistics for 1965-1967 from observational data, complementing electron-corona differential rotation and spectroscopic measurements

03 p0571 A70-13597

Meteor flakes nature and statistics obtained from meteors characterized by irregular brightness curve

03 p0574 A70-13883

Pressure changes in troposphere and lower stratosphere after strong solar flares analyzed statistically for Northern Hemisphere

03 p0476 A70-13909

Statistical data to demonstrate atherosclerotic diseases affected by cholesterol and saturated fatty acids in foods

03 p0430 A70-14277

Statistical model equations to predict discharge coefficients for concentric orifice plates as function of line size, diameter ratio and Reynolds number

[ASME PAPER 69-WA/FM-6]

04 p0667 A70-14837

HF propagation losses from statistical measurement over north-south path found dependent on mode, day and night and high and low ray

04 p0649 A70-14968

Statistical model of ozone absorption bands for calculating intensity, rotational line position and transmission functions of complex spectral regions

04 p0680 A70-15252

Public health services problems analyzed by statistical simulation method, using Markov process

04 p0644 A70-15356

Statistical stress distribution of breakdown during scaling of wound fiberglass reinforced plastics, noting relation between critical stress and defects

05 p0870 A70-16214

Statistical characteristics of field of linear antenna with square phase characteristics, deriving formulas for presence of amplitude phase errors

05 p0820 A70-16255

Computerized statistical analysis of digital filters used to eliminate digital radar interference

05 p0822 A70-16530

Ternary Ti-Ta-Nb solidus surface determination by simplex lattices and cubic approximation, statistically evaluating equation derived

05 p0864 A70-16547

Statistical analysis for personal variations contribution to total mean square error in time determinations
05 p0914 A70-16649

Statistical analysis of Zwicky catalog of galaxies and clusters of galaxies, interpreting very distant clusters in terms of intergalactic extinction
05 p0915 A70-16697

Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts
05 p0842 A70-16748

Dispersion and correlation function for atmospheric transparency due to water vapor, from statistical model of absorption bands and effective mass
06 p1053 A70-17204

Electromagnetic wave scattering from finite plasma, discussing statistical measurement errors in degrees of freedom studies
06 p1007 A70-17464

Classification analysis methods application to plant identification for case with incomplete initial statistical information
06 p1014 A70-17632

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by cosmo satellites short wave transmitter radio signal scintillation statistical evaluation
06 p1057 A70-17888

Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems
[AIAA PAPER 70-160] 06 p1158 A70-18177

Statistical model based on kinetic and probability theories to determine drag coefficient of orbiting satellites
06 p1159 A70-18289

Statistical models in kinetic theory for describing gases ranging from gas with no internal degrees of freedom to multicomponent reacting mixtures
06 p1047 A70-18312

Statistical analysis of dynamic plant based on steady signal, showing numerical determination of operator by least squares method
07 p1226 A70-18726

Metal particle size relation to combustion time using statistical method applied to polydisperse Mg powder
07 p1419 A70-18756

Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion
07 p1209 A70-19517

Static tensibility and vital capacity of lungs statistically analyzed in relation to sex and age
07 p1210 A70-19524

Statistical methods for characterizing interval sequences of ECG, treating interval distribution and joint probability density function of adjacent interval pairs
07 p1211 A70-19593

Ergodic steady random functions measurement and analysis in terms of statistical properties
[ONERA-TP-720] 07 p1411 A70-19825

Book on statistical methods in structural mechanics covering design, fracture, stability, random loads, damage accumulation, reliability, etc
07 p1411 A70-19849

Extremal statistics for signal and noise error probabilities estimation and computer simulation of digital feedback communication systems
08 p1459 A70-20800

Error statistics recording for digital communications channel performance by extreme value technique
08 p1459 A70-20801

Statistical analysis of rotation and macroturbulence in early type Ia and IaB supergiants, discussing evolutionary effects
08 p1571 A70-20908

Statistical characteristics of random wind effects on radio telescopes tracking cosmic object
08 p1586 A70-21062

Meteor flare photographs statistical analysis, noting duration and weight distribution dependence on meteor velocity
08 p1574 A70-21214

Statistics and coincidences of Argonne-Maryland gravitational radiation detector array with and without time delays
08 p1545 A70-21271

Partial statistical description of turbulent flame interior and turbulent flame speed determination for effects of turbulence on flame propagation
08 p1485 A70-21607

Reliability engineering for complex systems of multiple repairable parts based on analysis involving signal flow graphs and Markov renewal processes
09 p1691 A70-22574

Soviet collection of papers on mechanical fatigue from statistical standpoint
09 p1775 A70-22614

Stress concentration effect, surface states and similarity conditions in fatigue ruptures in machine construction, considering statistical analysis
09 p1776 A70-22615

Fatigue life cyclic sensitivity threshold with random nature statistically estimated on basis of maximum likelihood principle
09 p1776 A70-22618

Remote sensing data applications to agricultural statistics, discussing policy and standards for aggregate data release, confidentiality, error analysis, etc
[AIAA PAPER 70-312] 09 p1793 A70-22868

Statistical linearization technique for nonlinear control systems with feedback and zero memory under random input excitation evaluated for output signal characteristics
09 p1654 A70-22960

Mars primitive atmosphere analyzed from statistics of craters quantity as function of diameter, using Mariner 6 and 7 probe photographs
09 p1763 A70-23318

Soviet book on solar activity influence on earth natural processes covering atmospheric circulation and pressure, air temperature, precipitations and hydrological changes
09 p1719 A70-23471

Molecular-statistical theory of second-harmonic light generation by isotropic bodies immersed in external AC or DC electric field
10 p1916 A70-24379

Statistical chance characteristics of velocity profiles and friction for flow along infinite plane wall with constant suction
10 p1869 A70-24519

Probability of given configuration and statistical distribution of peaks between mean crossings of broad-band locally stationary and Gaussian processes
[ONERA-TP-806] 10 p1805 A70-24546

Statistical methods for flying quality research concerning sailplane dynamic stability, maneuverability, sensitivity, rolling and pilot induced oscillations
10 p1805 A70-24582

Statistical estimation of aeromagnetic survey data errors due to diurnal variations, navigational inaccuracies and instrument drift
10 p1914 A70-24646

Approximations implicit in Cayrel statistical equilibrium or non-LTE analysis of ionic hydrogen bound free continuum in sun
10 p1947 A70-24989

Stress, strain and acceleration spatial variation in plate structures under broad frequency band excitation using statistical energy method
10 p1962 A70-25065

VLF radio noise statistical parameters observed as functions of azimuth, considering atmospheric distribution and parameters correlations
10 p1884 A70-25259

Statistical analysis of aurora backscatter VHF measurements, discussing related stream plasma instability theory and diurnal variation
10 p1885 A70-25263

Statistical energy concepts application to Mariner Mars 1969 spacecraft, estimating coupling of damping factors to analyze structural vibration
[SAE PAPER 700171] 11 p2128 A70-25374

Interfacial thermal conductivity model based on statistical features of two faces in contact, discussing surface roughness and heat flow
11 p2083 A70-25763

Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion
11 p1988 A70-26116

Additive pseudorandom number generator with semiinfinite sequence length, proposing statistical tests for randomness
11 p2074 A70-26325

Book on statistical processing of geophysical and meteorological data covering independent and autocorrelated data, random processes, check tests, stochastic functions, filtering, etc
11 p2046 A70-26425

Statistical classifier for analyzing tape recorded transients
11 p2056 A70-26457

Time-convergent approximations to statistical turbulence functions constructed starting with functions expansion as Taylor series in time
11 p2074 A70-26534

Statistical analysis of latitude distribution of magnetically classified sunspot groups and associated flares
11 p2106 A70-26646

Asymptotics of linear diffusion processes altered by weak nonlinear effects, discussing deterministic and statistical initial value problems
11 p2074 A70-26686

Atmospheric turbulence effects on line-of-sight electromagnetic wave propagation, deriving signal statistics for nonvalid weak scattering solutions case
11 p2012 A70-26764

Statistical properties of random intensity field during coherent laser radiation scattering by moving diffuse surface
11 p2064 A70-26812

Superlayer structure in turbulent boundary layer on flat plate obtained by statistical processing of signals from hot-wire probes
12 p2209 A70-27226

Transient process statistical characteristics in He-Ne laser operating near excitation threshold with pronounced rise time oscillations of light wave field
12 p2247 A70-27507

Phase modulated laser light beam statistical analysis, using Michelson interferometer with piezoelectric crystal driven mirror connected to Gaussian random noise generator
12 p2249 A70-27877

Statistical analysis of control system with nonlinear zero-memory element evaluated for error using Fokker-Planck equation
12 p2204 A70-27985

Statistical design of density tapered planar circular and elliptical arrays for radiation patterns with good sidelobe behavior
12 p2199 A70-27987

Cosmic rays components fluxes, interactions, lifetimes and anisotropy in statistical discrete source model, tabulating and graphing results
12 p2295 A70-27996

Statistical analysis of atmospheric wind and temperature variables relationships to high altitude clear air turbulence observed by U-2 flights
12 p2264 A70-28092

Nonlinear rotating systems optimal control problems approximation by modified Krylov-Bogoliubov averaging technique
12 p2273 A70-28192

Elsasser and statistical band models in single parameter functions representing mean absorption in given spectral range
12 p2191 A70-28295

Meteorological situations and fields quantitative classification and regional grouping by statistical main components application
12 p2265 A70-28333

Wind field statistical properties using model incorporating quasi-steady state speed, shear, gusts and small scale motions
[AGARDGRAPH-115] 13 p2444 A70-28752

Cratered planetary surface distribution and covariance functions of elevations using statistical model
13 p2488 A70-28763

Atmospheric turbulence and irregularities, examining classical exchange coefficient and statistical theories
13 p2445 A70-28788

Burger turbulence model late decay statistical analysis using kernels of Cameron-Martin-Wiener expansion of random velocity field
13 p2386 A70-28820

Statistical characteristics and energy spectra of pulse code signals in data transmission estimated by matrix methods
13 p2364 A70-28871

Random-input describing function as linear approximation to instantaneous nonlinearity in terms of minimum mean-squared error
13 p2382 A70-29070

Plane multielement antenna field statistics as function of correlated phase-amplitude aperture errors
13 p2378 A70-29306

Galaxies rotation, applying optical and radio data to statistical analysis of angular velocities and periods
13 p2492 A70-29386

Extratropical planetary high altitude frontal zones statistical analysis and position forecasting by eigenfunction expansion
13 p2445 A70-29673

Geopotential fields seasonal statistical analysis over first natural synoptic region, using expansion into orthogonal eigenfunctions
13 p2446 A70-29674

Statistical estimation of resolvability of incoherently radiating object sampled at aperture field of observing optical instrument, using Cramer-Rao inequality
13 p2453 A70-29823

Random data analysis application to aircraft inlet diagnostics
[AIAA PAPER 70-597] 13 p2375 A70-29878

Parameters optimization of nonlinear electric servo actuator on basis of statistical criteria
14 p2559 A70-30157

Computer-controlled single-server queueing system with constant access cycle and general service times, calculating mean size and waiting time at statistical equilibrium
14 p2553 A70-30518

Surface wind speed durations statistics analysis, discussing meteorological, orographic and physiographic features
14 p2607 A70-30582

Cloud size clear area spacing statistics development for satellite mission and simulation analyses
14 p2609 A70-30598

SCAMP I DC statistical circuit analysis program for linear and nonlinear circuits, describing program structure
14 p2560 A70-30664

SCAMP 2 program for statistical analysis of electronic circuit sensitivity to variations in parameters and DC input values

14 p2560 A70-30665

SCAMP 4 program for electronic circuits statistical analysis in frequency domain, obtaining mathematical models and transfer functions

14 p2561 A70-30667

Weibull distribution as statistical method for interpreting fatigue test data

14 p2656 A70-30700

Cloud cover statistical data applied to planning remote satellite-borne sensing missions, using Monte Carlo method

14 p2611 A70-31232

Radar imagery for crop discrimination, discussing sensor and data requirements and statistical analysis methods

14 p2578 A70-31237

Statistical analysis of photogrammetrically surveyed three dimensional space points sets for aerospace vehicles and projectiles position location

15 p2733 A70-31550

Computerized statistical analysis programs finding plastic stress and acoustic emission as predictors of annealed steel fatigue life

15 p2760 A70-32326

Statistical test of Melchior laws governing Chandlerian motion of earth pole based on polar coordinates

15 p2732 A70-32497

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits

15 p2773 A70-32503

Vector valued Gaussian random processes with Gaussian measurement noise, estimating phase and time delay parameters by maximum likelihood theory

15 p2704 A70-32593

Plane wave random signals arrival angle maximum likelihood estimation for multiple antenna systems

15 p2704 A70-32594

Statistical theory of material strength applied to composite materials reinforced with whiskers and noncontinuous fibers

15 p2763 A70-32833

Diffusion flame development in homologous turbulent shear flow, investigating flame structure and chemical reaction by statistical theory

16 p2997 A70-33499

Corporate aircraft accident statistics, causes and prevention, noting pilot errors, mechanical failures, etc

16 p2842 A70-33814

Mechanical system random excitation, evaluating parameters to satisfy conditions for statistical characteristics of steady state output processes

16 p2953 A70-34296

Helicopter structural weight statistical prediction and evaluation, discussing comparable fixed wing experience

17 p3015 A70-34728

Antenna arrays with nonuniform spacings, synthesizing radiation patterns by deterministic and statistical density taper methods

17 p3044 A70-35056

IR heterodyne signal statistics, discussing receiver characteristics and design

17 p3105 A70-35096

Atmospheric noise statistical parameters analysis on digital computer designed to measure short duration atmospheric radio noise

17 p3170 A70-35396

Statistical theory of irreversible transport processes in fluids, considering deviation from equilibrium as stochastic process

17 p3131 A70-35532

Statistical directivity, radiation pattern, drift and dispersion of segmented traveling wave antennas

17 p3055 A70-35687

Statistical properties of subtropical jet stream maxima over U.S. from Nimbus II IR radiometry

17 p3133 A70-35931

German Air Force aircraft bird strikes statistics

18 p3211 A70-35979

Statistical measurement of bird hazards to aircraft in terms of strike rates at airports, considering international strike rate standard

18 p3211 A70-35981

Statistical characteristics of steady random signal of pulse frequency modulator, obtaining moments of output signal

18 p3234 A70-36072

Statistical analysis of cosmic radiation neutron component monitor error, taking into account generation multiplicity

18 p3307 A70-36097

Statistical properties of civil ATC system based on central processor, discussing system informational congestion

18 p3288 A70-36394

Partially polarized wave with log-normal distribution law of component envelopes, investigating statistical characteristics of polarization parameters

18 p3228 A70-36624

Vertical deflections errors statistical analysis by gravity anomaly measurements, determining autocorrelation functions

18 p3248 A70-36771

Soviet book on statistical calculation methods for linear and nonlinear automatic aircraft control systems design, using correlation theory of stochastic processes

19 p3463 A70-37403

Daylight sky brightness at different wavelengths by airborne photometer, investigating statistical characteristics

19 p3460 A70-37419

Forecasted algorithms to predict random processes, using mathematical statistics

19 p3382 A70-37450

Statistical analysis of short periodic time series in biological rhythms including cosinor, periodic regression, harmonic and synchronization analyses

19 p3365 A70-38412

Random values statistical characteristics by digital methods, deriving errors as function of quantization parameters

19 p3432 A70-38705

Satellite TV cloud picture digital representation, deriving algorithms for statistical analysis of geometrical features

19 p3463 A70-38755

Soviet book on statistical algorithms for reliability covering repairable and first failure systems with ideal and imperfect switching

19 p3395 A70-38798

Pulsar 1919 plus 21, discussing pulse intensity vs phase and number by statistical analysis of two dimensional data array

20 p3705 A70-39489

Missile systems accuracy determination, analyzing pertinent errors statistical properties

20 p3657 A70-39525

Automatic control system stability error analysis, discussing sensitivity and statistical dispersion analysis

20 p3668 A70-39544

Discrete Kalman-Bucy linear filtering with inaccurate noise covariances, considering optimal and sub-optimal systems, error analysis, probability theory, etc

20 p3601 A70-39573

Failure probability from finite sampling characteristics, emphasizing statistical safety factors to characterize structures strength reliability

20 p3724 A70-39856

Solid bodies statistical creep analysis, assuming macroscopically homogeneous isotropic polycrystallinity

20 p3725 A70-39866

Soviet book on brightness of irregular and semiregular variable stars by statistical methods

20 p3705 A70-39899

Statistical problems in technical automation - Conference, Moscow, February 1967

20 p3592 A70-39901

Complex plants process control by experimental statistical methods, considering curves plotting, computer requirements, optimum method selection, etc

20 p3592 A70-39902

Computer calculations automation in mathematical models construction by statistical methods, discussing programs for distributed parameter systems, stochastic approximation, etc

20 p3592 A70-39903

Controlled systems characteristics multistep statistical evaluation by extrapolation, analyzing prediction errors

20 p3593 A70-39904

Extremal dynamic controlled plant with random input signals, identifying components weighting functions by statistical approximation

20 p3604 A70-39908

Statistical analyzer for complex plants dynamic characteristics

20 p3604 A70-39912

Small hybrid computer design, describing algorithms and subsystems for statistical studies

20 p3593 A70-39914

Statistical information processing equipment, describing correlators and digital coding devices design for graphic form information transformation into binary code

20 p3594 A70-39919

Multichannel computer for statistical investigations of complex nonlinear controlled plants based on recordings of input, output and internal state variables

20 p3594 A70-39921

Heterogeneous materials statistical theory, evaluating bounds for effective elastic constants by cell model using variational principles and perturbation solution

20 p3729 A70-40033

Differential game theory, discussing two player zero sum situation

20 p3659 A70-40108

Nonlinear dynamic systems phase coordinate variations statistical characteristics, describing data reduction method

20 p3674 A70-40183

Statistical analysis of random oscillations excited in electron beam-plasma system based on signal recording data

21 p3855 A70-40631

Statistical data for optimum fatigue reliability design for dynamic and rotary machinery, considering static strength, cycle-to-failure and stress-to-failure distributions

21 p3833 A70-41004

Pc 1 geomagnetic micropulsation statistics for middle latitudes, discussing solar cycle and annual variations in occurrence rates

21 p3817 A70-41088

Turbulent density fluctuations statistical properties analysis by cross correlation technique with schlieren instruments

21 p3807 A70-41242

Statistical pattern recognition and threshold learning in signal detection of noisy binary pulses

21 p3794 A70-41332

Plasma turbulence statistical theory in magnetic field based on averaging operators, deriving nonlinear dispersion relation

21 p3857 A70-41386

Statistical data on waivers granted to airline flight crew members by French Civil Aviation Medical Board based on ICAO medical standards

21 p3771 A70-41491

Statistical orbit and position determination for Mars orbiters and landers based on Viking 1973 mission requirements, discussing tracking problems

21 p3931 A70-41861

Natural language a priori description and linguistic algorithms construction, using statistical phrase contraction with Hoffman codes

22 p3993 A70-42492

Meteor impact probability on spacecraft from statistical evidence from Pegasus, Explorer and Gemini spacecraft, discussing damage prevention methods

22 p4097 A70-42524

Soviet papers on statistical methods in nonlinear automatic control systems design

22 p4002 A70-42881

Statistical methods for nonlinear automatic control systems, including Monte Carlo method, equivalent perturbations, linearization and analytical techniques

22 p4002 A70-42882

Quantitative reduction of statistical nodes for nonlinear automatic control system with random noise, using minimal approximating polynomials

22 p4003 A70-42887

Digital statistical modeling of nonlinear automatic control systems including accuracy analysis, generation of random perturbations and parameter optimization

22 p4004 A70-42892

Water vapor emission computation from statistical band model, investigating accuracy limitations

22 p4065 A70-43169

Nonlinear rotating systems optimal control problems approximation by modified Krylov-Bogoliubov averaging technique

22 p4004 A70-43317

Brittle fracture stress statistics for Weibull distribution function parameter determination, comparing linearizing, least squares curve fitting and maximum likelihood techniques

22 p4117 A70-43414

Statistical test of Melchior laws governing Chandlerian motion of earth pole based on polar coordinates

23 p4187 A70-43918

Statistical analysis of durability data of heat resistant alloys for gas turbine engines, using long term strength tests of melts in mass production

23 p4204 A70-43940

Strong coupled rotational excitation problem in atom-diatom molecule scattering system, discussing transition probability matrices statistical analysis

23 p4212 A70-44600

Statistical estimates of precessional corrections, solar motion and galactic rotation from proper motions

23 p4246 A70-44752

Stellar axial rotational velocity statistical analysis to break-up limit, obtaining velocity distribution approximation from observed histogram

23 p4251 A70-44823

Statistical properties of random intensity field during coherent laser radiation scattering by moving diffuse surface

24 p4351 A70-45184

Turbulent flow mechanics heuristic exposition, discussing random processes, instability, nonlinear interactions, energy exchange, intermittency dependence on Reynolds number, fluid properties and boundary conditions effects, etc

24 p4326 A70-45948

Perfect gas statistical relations by perturbation form of state equation for atmosphere

24 p4372 A70-46071

Time evolution of instantaneous light intensity mean and variance for Q switched single mode laser near oscillation threshold
24 p4355 A70-46090

Aircraft maintenance cost statistical analysis recursive regression model for aircraft failure and manhour cost data
24 p4292 A70-46125

Statistical characteristics of stability of single phase one component system under external force
24 p4381 A70-46144

STATISTICAL COMMUNICATION THEORY
U COMMUNICATION THEORY

STATISTICAL CORRELATION

Correlation characteristics and dimensionality of speech spectra from statistical properties derived from continuous speech and summarized by covariance-matrix eigenvectors
02 p0237 A70-12324

Correlations between organizational factors and individual engineer performance, analyzing stability of relationships and time lags in measurement
02 p0246 A70-12378

Temporal and statistical characteristics of HF oscillations from electron beam interaction with plasma in magnetic field
03 p0532 A70-13524

Reflectance spectra obtained for igneous rocks and minerals, establishing correlation between reflectance and energy wavelength, composition and sample particle size
05 p0839 A70-16390

Meteorite falls statistics correlations for fragmentation relationships with mass, time of fall and class
05 p0912 A70-16447

Surface and underwater swimming tests for statistical correlation to linear maximum accelerations effects
07 p1201 A70-18788

Cosmic ray intensity increase preceding Forbush effect using statistical correlation method
07 p1367 A70-19444

Statistical correlation between polar magnetic disturbances and magnetospheric energetic electron flux increase from IMP-1 satellite observations
08 p1491 A70-21714

Random processes correlation functions determined by stochastic differential equations applied to lunar surface statistical characteristics determination
11 p2118 A70-26785

Aircraft turbojet and turbofan engines cost correlation to performance statistically analyzed in terms of various parameters
12 p2335 A70-27437

Midair collisions incidence correlated with traffic factor proportional to square of number of operations
12 p2269 A70-27912

Sufficient statistics for optimal correlation function in classifying optical images in pattern recognition, using permissible transformations
14 p2553 A70-30421

Human and machine pattern discrimination correlated by statistical correlation method from pattern recognition task involving computer simulation and humans
16 p2852 A70-33461

Cosmic ray intensity increase preceding Forbush effect using statistical correlation method
18 p3309 A70-36918

Spiral galaxies pattern statistics, examining morphological type of Milky Way galaxy
18 p3326 A70-37155

Bounded electromagnetic wave propagation in randomly inhomogeneous medium, calculating correlation in amplitude and phase fluctuations
19 p3375 A70-37282

Turbulent velocity correlation function computation in Burger fluid model, using functional integral expression
19 p3403 A70-37530

Gaussian gravity field structure, calculating gravity correlation function using differential equation from density correlation function
20 p3617 A70-39075

Radar angels activity seasonal variation and height distribution statistical relationship to meteorological parameters
20 p3661 A70-39169

Cardiovascular blood circulation system dynamic characteristics analysis by linear statistical correlation methods, describing test for determining weighting function
20 p3581 A70-39905

Photon flow delay regarding fluctuating source field in two points, applying correlation statistics by Pearson method of moments
22 p3988 A70-42564

Galactic noncircular velocity fields, discussing statistical correlation with radio luminosity, nuclear brightness and total mass
22 p4100 A70-42844

Nighttime and daytime midlatitude magnetic bays statistical correlations with riometer-auroral absorption, suggesting precipitating particles role
22 p4018 A70-43107

Ionospheric electron trough and magnetospheric plasmapause movements from satellite observations, showing statistical correlation with geomagnetic field
23 p4186 A70-43854

STATISTICAL DECISION THEORY

Statistical decision problem of Brownian motion with moving boundaries in automatic daylight star tracker design for aircraft navigation solved by image method
01 p0139 A70-11635

Quantum statistical decision theory for detection and estimation of signals in random noise
07 p1333 A70-18919

Statistical methods for feature selection and ordering, mode estimation and pattern classification in pattern recognition, describing sequential decision model
13 p2374 A70-29578

Error correcting algorithms for pattern classification, finding optimal approximation to unknown optimal decision function
13 p2374 A70-29579

Decision directed receiver with unknown a priori probabilities, obtaining tight bound on runaway for binary and multiple signal detection
14 p2554 A70-31117

Decision making role in management contribution towards success of research and development based on statistical decision theory
15 p2828 A70-31573

Optimum decision rule /likelihood ratio/ algorithm for random signals detection in Gaussian noise, using pseudo Bayes approach
15 p2703 A70-32560

STATISTICAL DISTRIBUTIONS

NT PROBABILITY DISTRIBUTION FUNCTIONS

NT RAYLEIGH DISTRIBUTION

Materials strength characteristics with respect to breakdown probability parameter by statistical fatigue stability analysis under unsteady loads and various distribution laws
01 p0211 A70-11424

Elasticity theory equilibrium equations derivation using distribution theory
02 p0388 A70-12270

Electromagnetic scattering from randomly rough surface with finite conductivity, using Kirchhoff approximation
02 p0261 A70-12587

Statistical electron density distributions and Thomas-Fermi-Dirac screening functions for positive ions with various ionization degrees
04 p0721 A70-14666

Subjects sensitivity to differences in statistical distributions of locally defined element density and shape, using stochastically textured visual patterns
06 p0998 A70-17223

Grouping method estimation of statistical data during hydrometeorological information processing to calculate essential data for distribution curve judgement
06 p1096 A70-17786

Statistical distribution of quasi-stellar objects with known red shifts over celestial sphere, observing symmetry over galactic equator
07 p1374 A70-18706

Galaxies statistical distribution studied to determine superclusters existence, correlating results with random distribution expectations
07 p1375 A70-18868

Convolution formulas for Cauchy and standard normal random variable distributions derived from geometry of circular symmetric distribution on plane
07 p1323 A70-18946

Distributional results pertaining to complex Wishart processes and time varying spectral estimators on null hypothesis of stationary Gaussian time series
07 p1323 A70-19028

Statistical characteristics of Q switched He-Ne laser emission gain during transient process from subthreshold to superthreshold value
08 p1514 A70-21814

Optical coherence and light fluctuations, determining statistical distributions of light from photoelectric counting experiments
09 p1728 A70-23372

Transient process statistical calculation in discrete elastic mechanical system possessing energy dissipation under time dependent cross correlated random forces
09 p1729 A70-23595

Intercensus population estimate by air photos, topographic maps and local and state census of population and housing
10 p1878 A70-24737

Atmospheric turbulent boundary layer velocity signals correlation with lognormal distribution
11 p2076 A70-26531

Wave scattering by statistical distributions of discrete obstacles, deriving various functions for diagnostic applications
11 p2086 A70-26762

Materials fatigue life dependence on statistical characteristics of random loads obtained from energy balance equation solution
12 p2323 A70-27339

Electromagnetic wave scattering on passively reflecting statistical clusters of inhomogeneities
12 p2184 A70-27498

Intensity and photocounts statistical distribution of harmonic generated in nonlinear crystal by laser and thermal radiation
12 p2248 A70-27547

Random reversible failures effect on linear automatic control systems precision treated as randomly varying structure, proposing statistical characteristics calculation
13 p2382 A70-29279

Statistical variation of number of VLF atmospherics per unit time above given vertical electric field strength threshold
14 p2550 A70-30515

SCAMP 3 program for calculation of electronic circuit DC performances statistical distribution as function of component parameters variation
14 p2560 A70-30666

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph
16 p2945 A70-33219

Alloy hardening statistical theory, applying flow stress to second phase randomly dispersed particles
17 p3191 A70-35458

Warm fog clearing effectiveness by seeding with hygroscopic nuclei as function of fog droplet and seeding nuclei distribution
17 p3132 A70-35928

Brittle fibers strand strength as function of statistical distribution of limiting stresses
18 p3342 A70-36648

Density and distribution functions for quotient of ellipsoids of variance volumes, yielding probabilities and fractiles in three dimensional sets of points
19 p3382 A70-37835

Plane symmetrical and axisymmetrical laminar and turbulent free jets, interpreting statistical character of boundary layer profiles
19 p3407 A70-38684

Prior distributions computer aided selection for generating Monte Carlo confidence bounds on system reliability
20 p3658 A70-39641

Inclined electromagnetic wave incidence on randomly inhomogeneous medium with changing mean dielectric permittivity, calculating reflected and scattered fields
20 p3587 A70-39726

Statistically nonhomogeneous fields by variational principles of elasticity, obtaining bounds of average displacement for hollow sphere under pressure
20 p3732 A70-40112

Computerized mathematical modeling of transistors statistical and dynamic characteristics as functions of structural parameters
23 p4171 A70-43954

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph
24 p4371 A70-45194

STATISTICAL MECHANICS

Soviet monograph on transfer processes theory in statistical mechanical systems based on probabilistic approach to random particle walk
01 p0215 A70-10650

Statistical mechanical method deriving ionization equilibrium and equations of state for low mass stars, considering Coulombic interactions, nonideal effects, etc
01 p0188 A70-11336

Multiple particle production at high energy levels and associated peripheral interaction and statistical theories
03 p0555 A70-13035

Euler-Lagrange linear operators in variational embedding with one dependent function
05 p0881 A70-16058

Stationarization problems involving nonlocal and null class Euler-Lagrange operators, considering vector spaces of function spaces
05 p0881 A70-16059

Analytical mechanics of discrete and continuous systems covering systems with limited degrees of freedom, statistical and continuum mechanics
08 p1543 A70-20526

Soviet monograph on accelerated convergence method in nonlinear mechanics, discussing quasiperiodic differential equations solutions, smoothing techniques, etc
09 p1729 A70-23726

Information theory as basis for statistical thermodynamics, discussing maximum entropy principle and probability as frequency in Gibbs ensemble
11 p2083 A70-25694

Thermodynamics and statistical mechanics taking into account irreversibility, arrow of time and astrophysical schemes

11 p2146 A70-25695

BBGKY hierarchy state functional formalism in nonequilibrium statistical mechanics for many particle system using Fourier transformation

11 p2087 A70-26548

Statistical mechanics of partially ionized hydrogen plasma, deriving Saha equation to calculate ionization degree and potential for various electron densities and temperature

12 p2281 A70-27882

Incompressible fluid turbulent motion statistical equations, considering Lagrangian distributions of fluid particles coordinates and velocities

12 p2212 A70-28190

First order statistical model for temperature dependence of carbon activity in austenite

13 p2436 A70-29605

Galactic cosmic rays origin in terms of statistical mechanical model of supernova explosions

15 p2799 A70-31793

Polyatomic molecules radiationless transition rate statistical analysis, suggesting role of Franck-Condon principle in determination of nonradiative decay rates

16 p2858 A70-34014

Coherent behavior associated with thermodynamic description projected from dynamical behavior of many body system, using relation between asymptotic operators

22 p4062 A70-42547

Stellar system statistical mechanics, discussing collisionless gas in gravitational field, galaxy formation, stellar dynamics, double stars and bounded isothermal spheres

22 p4098 A70-42577

Incompressible fluid turbulent motion statistical equations, considering Lagrangian distributions of fluid particles coordinates and velocities

22 p4012 A70-43315

Thermodynamics and statistical physics of dense plasma with particle interaction energy exceeding kinetic energy, discussing three-component model phase equilibrium

23 p4229 A70-45073

STATISTICAL MOMENTS

U DISTRIBUTION MOMENTS

STATISTICAL PROBABILITY

U PROBABILITY THEORY

STATISTICAL TESTS

NT RANK TESTS

Turbine blades durability and fatigue characteristics, plotting fatigue diagram from statistical tests

01 p0105 A70-11418

Protruding, stepped and conical end fittings for confined detonating fuse, discussing assembly procedures effect on characteristics based on statistical scanning test

03 p0547 A70-14115

Statistical control charts for evaluating instrumentation performance during ordnance devices testing, discussing evolution, interpretation and application

03 p0494 A70-14126

Chain pooling tests for two level factorial replication-free experiments using Monte Carlo methods

06 p1093 A70-17305

Dependence effects on nonparametric mixed statistical tests

06 p1095 A70-18622

Statistical testing role in synoptic meteorological analysis, discussing pressure and temperature patterns, front identification, computer applications, etc

07 p1329 A70-19574

Destructive and nondestructive tests optimum procedure for quality control based on information theory, decision statistics and cost optimization

09 p1691 A70-22573

Variables control charts based on sample means for determining in-control probability properties

09 p1691 A70-22575

Cramer-Rao efficiencies of best linear invariant estimators, using Weibull distribution in model for survival populations connected with life testing

10 p1910 A70-24604

Nonlinear regression techniques for statistical simultaneous measurement of thermal properties including convergence criterion

16 p2998 A70-33859

Parallelism of two regression lines, suggesting distribution free signed rank test

22 p4064 A70-43526

Critical values tables for Wilcoxon rank sum test in randomized blocks

22 p4064 A70-43729

STATISTICAL WEATHER FORECASTING

Linear statistical forecast accuracy and optimal predictor dimensionality based on multiple regression equation

04 p0715 A70-15251

Statistical testing role in synoptic meteorological analysis, discussing pressure and temperature patterns, front identification, computer applications, etc

07 p1329 A70-19574

Combined statistical synoptic methods for mesometeorological forecasts

10 p1913 A70-24947

Soviet book on statistical analysis of meteorological elements based on expanding natural orthogonal functions covering horizontal, vertical and time distributions including applications

15 p2772 A70-32842

Synoptic meteorological prediction by statistical and dynamical theory based on statistical mechanics

17 p3131 A70-35926

Sea surface temperature determination from satellite high resolution IR window radiation measurements by statistical histogram inference method

21 p3820 A70-42122

Airport fog layers repetition frequency after low visibility periods

22 p4065 A70-43246

Weather regimes in statistical meteorology constructed in stochastic models representing randomly transformed Markov chain

24 p4371 A70-46035

STATISTICS

Climatological cloud type statistics for simulating earth sensing mission data output as function of sensor field of view and spatial resolution

06 p1065 A70-18098

STATOR BLADES

Axial flow turbine stator and impeller blade twist calculated from gas flow stage area diameter using continuity and vorticity equations

01 p0001 A70-10175

Nickel base alloy, WAZ-20 with improved strength in 2000-2200 F range for application to gas turbine engine stator vanes

04 p0706 A70-15097

Discrete noise generation and propagation due to fan engine rotor forcing excitation and interaction with downstream stator

05 p0896 A70-16791

Rotor wakes intrastator transport effects on high Mach number axial flow compressors performance, considering stagnation temperature profile and rotor blade loss factor

18 p3209 A70-36869

Transonic high turning low aspect ratio stator cascades flow field performance prediction, reducing secondary flows by partial slots

18 p3209 A70-36875

STATORS

Brushless DC motor consisting of permanent magnet rotor, wound stator and optical rotor position sensing

16 p2843 A70-33000

Monograph on radial flow between air cooled gas turbine rotating and stationary disk near stator covering turbulent boundary layer, velocity distribution, etc

19 p3404 A70-38007

STEADY FLOW

NT COUETTE FLOW

NT HARTMANN FLOW

Hall current effect on steady boundary layer flow of incompressible viscous electrically conducting fluid past semiinfinite flat plate in transverse magnetic field

03 p0469 A70-14183

Martin method for reducing determination of steady plane MHD flow to Bernoulli and direct functions satisfying quasi-linear partial differential equations

03 p0533 A70-14200

Boundary value problems for partial differential equations representing steady gas flow hydrodynamic problems

03 p0469 A70-14228

Heat transfer in steady state flow of electrically conducting incompressible viscous fluid in annular channel between coaxial circular cylinders under magnetic field

03 p0608 A70-14335

Method of integral relations, finite differences and method of characteristics applied to numerical solution of steady state problems of gas dynamics

04 p0670 A70-14961

One dimensional steady adiabatic source nonisentropic flow of thermally and calorically perfect gas in conical nozzle, considering exit divergence and nonuniform flow effects

04 p0619 A70-15427

Steady state boundary layer of anisotropic Erickson fluid incident obliquely on infinite cylinder, obtaining differential equations for dynamic behavior

05 p0835 A70-16860

Steady laminar flow with frictionless central core surrounded by boundary layer in circular curved pipe, discussing friction factor and flowmeter discharge coefficient

05 p0836 A70-17107

Laminar steady radial flow of simple fluid of short memory between two parallel disks, demonstrating relation to Newtonian fluid

06 p1037 A70-17915

Far and near field solutions of plane steady transonic flow past thin airfoil including imbedded shock waves using small disturbance theory

06 p0969 A70-18056

Steady supercritical planar inviscid transonic flows over lifting airfoils, generating unsteady flow by impulsively imposing airfoil boundary condition

[AIAA PAPER 70-47] 06 p0972 A70-18130

Asymptotic behavior /for small mean free path/ of rarefied gas steady flow over smooth solid boundary

06 p1048 A70-18328

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem

07 p1252 A70-18669

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution

07 p1252 A70-18670

Steady and unsteady flow through Napier turboblower axial flow turbine for full and partial admission, estimating mass flow and power output

07 p1189 A70-20294

Steady pressure driven flow of conducting fluid through insulating circular pipe in transverse magnetic field

08 p1549 A70-20502

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas

08 p1485 A70-21638

Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity

08 p1485 A70-21639

Steady laminar gas flow on duct wall boundary layer considering external swirling flow and wall heat transfer

09 p1659 A70-22428

Steady turbulent perfect compressible gas flow in axisymmetrical or plane channel, using equations governing channel height and static pressure variations

09 p1659 A70-22429

Self similar and steady state flows near singularities, studying flow stability by partial differential equations

10 p1863 A70-24071

Plane steady flows characteristics of incompressible viscous fluids in rigid walled rectangular channels found asymptotic to Poiseuille and Couette flows

10 p1866 A70-24112

Steady two dimensional cavity flow past sharp-edged airfoil and blunt nosed obstacle, using linearization hypothesis

10 p1801 A70-24193

Analog computation in supersonic steady flow and digital technique for wing-fuselage and wing-tail interactions

10 p1802 A70-24544

Monograph on Beltrami steady state, frictionless flow of incompressible medium past spherical surfaces, assuming vortex and stream lines agreement

11 p2034 A70-25498

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics

11 p1975 A70-25969

Linear viscous theory of steady rotating fluid flows with nonlinear modification of boundary layers, considering inertial modifications

11 p2036 A70-26011

Perturbation theory of supersonic steady anisotropic flow with radiative heat transfer using hyperbolic characteristic coordinates

12 p2334 A70-28203

Liquid film steady motion on ablating body surface allowing for radiative heat transfer from interior

12 p2334 A70-28244

Steady expansion flows at three dimensional supersonic edges with small corner angles using analytical method of characteristics

13 p2338 A70-28491

One dimensional steady state flows and discontinuities in radiation gas dynamics, neglecting radiation pressure, viscosity and heat conduction

13 p2387 A70-28937

Basic flow convergence or divergence effect on steady flow pattern around circular cylinder using fluid motion visualization

13 p2387 A70-29058

Steady diabatic complex lamellar gas flow, obtaining parameters by extending geometric theory of surfaces and curves in fluid flow theory

13 p2387 A70-29122

Two dimensional incompressible steady turbulent flows based on Prandtl hypothesis relating eddy viscosity to kinetic energy and scale

14 p2564 A70-30259

Steady plane relativistic flow small irrotational perturbation theory determining subsonic, transonic and supersonic approximation

14 p2566 A70-30472

Boundary value problem for Navier-Stokes equations to obtain stationary flows as limits of nonstationary solutions

14 p2600 A70-31347

Laminar velocity distribution from temperature profiles developed under steady flow through tube, constructing numerical temperature grid
15 p2718 A70-31449

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem
15 p2718 A70-31461

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution
15 p2718 A70-31462

Finite difference algorithm for supersonic three dimensional steady flow past blunt bodies with generating line bends, allowing for gas equilibrium and frozen states
15 p2671 A70-31495

Incompressible viscous fluid steady flow admission into bounded space from cylindrical tube, demonstrating solvability of plane and three dimensional versions
15 p2720 A70-31642

Steady and nonsteady engine/inlet flow field simulation for engine/compressor testing, determining feasibility of variable ramp aerodynamic device
[AIAA PAPER 70-591] 15 p2672 A70-31788

Axial wall conduction effects on steady state laminar flow heat transfer
15 p2825 A70-31815

Steady flow of incompressible fluid through converging-diverging tube, considering implications in occlusive vascular disease
15 p2691 A70-31936

Baecklund transformations applications to hodograph equations for steady two dimensional nondissipative MGD flows with aligned velocity and magnetic fields
15 p2781 A70-32453

Shock wave stability in plane steady flow at uniform entropy and limiting velocity
16 p2890 A70-33101

Steady isentropic weakly perturbed supersonic flows past arbitrary slender tapered wings with subsonic leading edges
16 p2838 A70-33971

Steady two dimensional MHD boundary layer flow with uniform suction or injection past semiinfinite flat plate in cross fields
17 p3067 A70-34618

Steady and unsteady gas dynamics analogies with two dimensional water flow, taking into account energy and continuity equations
17 p3069 A70-35032

Steady supersonic flow past conical bodies at yaw, adapting Telenin numerical method
17 p3012 A70-35889

Steady incompressible flow past circular cylinder at Reynolds numbers up to 100, using finite difference solutions of motion equations
18 p3238 A70-36191

One dimensional steady gas flow, deriving algorithm for iterative solution of Boltzmann kinetic equation by statistical approach
18 p3241 A70-36285

Compression and expansion characteristics of steady supersonic flow passing along yawing slender body of rotation, linearizing differential equations
18 p3207 A70-36382

Temperature profile along hot-wire anemometer attached to wall and normal to subsonic velocity steady flow field, using singular perturbation techniques
18 p3242 A70-36488

Velocity profiles in steady and unsteady rotating flows for impulsive slow down and acceleration in cylindrical chamber
19 p3403 A70-37527

Steady symmetric flow model for Jupiter cloud banded structure, representing variable concentration of condensing constituents with latitude
19 p3519 A70-38254

Steady two dimensional incompressible shear flow, correlating velocity profiles with resistance distribution
19 p3406 A70-38350

Viscous incompressible electrically conducting fluid steady flow between parallel coaxial rotating disks with transverse magnetic field
19 p3481 A70-38446

Hodograph equations for relativistic irrotational steady plane flows, investigating transformation to physical plane
19 p3406 A70-38664

Two dimensional steady inviscid incompressible flow past profiles in parallel flow with noniform velocity distribution
19 p3354 A70-38676

Steady compressible supersonic planar flow of viscous heat conducting fluid under linearization freestream conditions, describing slip flow past finite flat plate
20 p3557 A70-39228

Weak stratification and geometry effect on steady mechanically driven motion of contained rotating viscous fluid
20 p3608 A70-39357

Perturbation method for nonlinear acoustic wave propagation in steady one dimensional flow through variable cross section duct
20 p3673 A70-39612

Steady sub and supersonic flow calculations behind receding shock wave, using finite difference scheme
20 p3611 A70-39803

Compressible viscous fluid steady plane flow in laminar boundary layer on impermeable isothermal surface, describing parametric method of integrating flow equations
20 p3611 A70-39806

Steady turbulent flow heat exchange in near wall region at large Prandtl numbers, plotting temperature distribution curves
20 p3612 A70-39811

Aerodynamics of steady, inviscid transonic flows around slender bodies and wing-body combinations at free stream Mach number one
[AIAA PAPER 70-798] 20 p3559 A70-39900

Stellar wind theory and related steady radial flows, discussing gravitating point mass, heat conduction, shocks, viscosity, outflows and inflows
20 p3706 A70-39928

Shock wave extinction point within plane steady upstream flow with uniform entropy and limit velocity
21 p3808 A70-41441

Aerodynamic parameters of ionized Ar supersonic steady one dimensional nonviscous flow in thermodynamic equilibrium and subjected to Laplace accelerating forces
21 p3858 A70-41444

Steady viscous flow past oblique flat plate at high Reynolds number, using Oseen linearized approximation
21 p3809 A70-41714

Two dimensional steady flow around slender profiles at free transonic stream with curved compression shocks, approximating by hodographic method
23 p4131 A70-44023

Rotational two dimensional steady shear flows of perfect incompressible fluid, considering channel flow characteristics for various wave modes
23 p4181 A70-44202

MHD equations for one dimensional plane steady flow, considering conservative difference schemes for approximation
23 p4226 A70-44307

Pressure distribution on thin nonlifting airfoils in steady two dimensional flow with freestream Mach number at or near unity
23 p4134 A70-44583

Collisionless plasma, calculating effects of energy dissipation due to weak firehose instability on steady planar flow, based on quasi-linear fluid equations
24 p4382 A70-45110

Perturbation of steady MHD Stokes flow past hollow sphere assuming small Hartmann and Reynolds numbers
24 p4384 A70-45262

Spherical shape gas or liquid drop steady motion at large Reynolds numbers, examining buoyancy forces and velocity gradients
24 p4326 A70-45996

Simple wave functions solutions in multidimensional nonviscous polytropic gas unsteady and steady flow
24 p4327 A70-46030

Inviscid conducting incompressible fluid steady motion past thin airfoils, presenting crossed and aligned fields and Alfvén motion with Hall effect
24 p4289 A70-46033

Diabatic steady gas flow vorticity, examining various kinematic and kinetic properties
24 p4328 A70-46365

STEADY STATE
System with recovery consisting of n elements, discussing reliability and solution to steady state problem
10 p1855 A70-24798

Steady state symmetrical model for solar wind near equatorial plane, investigating effects of magnetic forces, viscosity and anisotropic pressure on azimuthal motion
13 p2477 A70-29179

Steady state heat conduction in wedge shaped bodies with boundary conditions of third kind
13 p2522 A70-29515

Gravity effects on impact damper performance, investigating dynamic stability and kinematic viability of various steady state motion solutions
20 p3717 A70-38974

Steady state magnetic and electric fields in magnetosheath by linear superposition of field vectors, using axisymmetric velocity function from gas dynamics
21 p3815 A70-41063

Pulse-time multistable state elements for automatic and remote control constructed from pulse sequence interactions with multiple frequency relations
22 p4005 A70-43567

Glauber equations applied to trailing wire shape for steady state aerodynamic forces on aircraft and trailing antennas, discussing computer solutions
23 p4131 A70-43893

Gyroscope system steady states, showing dynamic couplings centering in finite angular precession rate case
24 p4335 A70-45630

STEADY STATE CREEP
Polycrystalline Ni steady state creep characteristics measurement emphasizing temperature dependence of creep rate
03 p0504 A70-13022

Thin walled tubular aluminum specimens hardening by temporary reduction of temperature during creep under torsion
06 p1089 A70-17795

Steady creep process microscopic mechanisms, discussing creep due to glide of jogged screw dislocations, climbing of edge dislocations and stress directed vacancy diffusion
08 p1593 A70-21519

Stress concentrations in turbine disks with eccentric holes under steady creep
09 p1780 A70-23200

Steady state creep of composite material with short fibers, discussing effects of fiber/aspect ratio, fiber volume fraction and distribution
11 p2144 A70-26671

Al-aluminum oxide composite steady state creep due to grain boundary sliding, accounting for activation energy level
12 p2258 A70-28348

Steady state high temperature creep theory, including internal back stress and temperature dependencies
15 p2765 A70-32810

Tubular Al creep resistance increase by temperature jumps during steady phase of creep
22 p4056 A70-43344

Steady state creep behavior during multiple deformation process, developing grain boundary sliding relation to grain size
23 p4207 A70-44759

STEADY STATE FLOW
U EQUILIBRIUM FLOW
STEAM
Charge exchange and electron loss measurements in steam target exposed to high energy hydrogen ions beam, using equilibrium fractions method
07 p1345 A70-20142

Subsonic flow visualization, using steam and cold nitrogen gas mixture and normal tunnel lighting
18 p3237 A70-36460

STEAM FLOW
High velocity isothermal viscous compressible steam flow in circular tubes, measuring pressure drops
22 p4011 A70-42845

STEAM GENERATORS
U BOILERS
STEAM TURBINES
Fatigue strength of T-shaped blade roots of steam turbine regulating stages subjected to combined static tension and cyclic bending
05 p0954 A70-17060

Thermal gradients and associated strains measurement in steam turbogenerator casings, considering strain gage placement and heat transfer calculations
09 p1774 A70-22590

STEEL STRUCTURES
Steel objects microstructure and hardness tested by continuous magnetic technique, describing experimental apparatus model
02 p0300 A70-12479

Ductile-brittle fracture transition in steel pressure vessels suppressed by utilizing thin laminations
03 p0583 A70-12903

Flight type pressure vessels fabricated with quenched and tempered Ni-Cr-Mo-V structural steel, discussing fracture toughness, design, fabrication techniques
[SAE PAPER 690680] 05 p0853 A70-15866

Steel tube deformation under constant internal pressure and cyclic heating, plotting tangential and axial strain curves as function of cyclic loading
06 p1163 A70-17399

Hydrogen embrittlement of landing gear steels, discussing plating bath program additions for optimum safety conditions
07 p1294 A70-19349

Steel conical disks two dimensional stressed state determined with deformations at elastic and elastoplastic strains using digital computers
10 p1956 A70-24242

Fracture toughness and cyclic crack propagation of surface cracked high strength aircraft structure steels
12 p2254 A70-27467

Dislocation structure during fretting corrosion in steel plates, analyzing via electron microscopy
12 p2258 A70-28318

Steel plates with penetration of oblique circular cylindrical aperture tested for effects on stress concentration
13 p2510 A70-28728

Instrumented Charpy impact test evaluating strain rate, alloying and irradiation effects on ductile-brittle transition temperature and fracture of pressure vessel steels
15 p2820 A70-32239

STEELS

- F-111 high strength steel design experience concerning wing, fuselage and empennage support structure [AIAA PAPER 70-884] 17 p3018 A70-35803
- Longitudinal and transverse tensile strengths of Al sheet reinforced with continuous oriented steel wire of various cross sectional shapes 19 p3541 A70-38047
- Perforated steel strip axial tension load limit, considering various hole diameters and numbers 21 p3936 A70-41415
- Nonweldable internal flaws detection containing oxides in steel slabs by neutron activation analysis 24 p4376 A70-45750

STEELS

- NT AUSTENITIC STAINLESS STEELS
- NT BAINITIC STEEL
- NT CARBON STEELS
- NT CHROMIUM STEELS
- NT HIGH STRENGTH STEELS
- NT MARAGING STEELS
- NT MARTENSITIC STAINLESS STEELS
- NT NICKEL STEELS
- NT STAINLESS STEELS
- Transformation induced plasticity steels tensile properties measurement indicating loss of ductility due to H embrittlement 01 p0118 A70-10729
- Martensite start depressed temperatures vs pressure for steels, discussing hardness effects and microstructure 01 p0120 A70-10740
- Crack propagation mode in laminated steel-Ni composites, analyzing softer layer effect using impact tests and C replica fractographs 01 p0120 A70-10743
- Steels tested to evaluate proposed incremental strain theories predicting loads on thin walled cylinders subjected to nonproportionate loading, discussing stress-strain diagram 01 p0202 A70-11057
- Fretting corrosion effect on structural steel fatigue strength under asymmetric load cycles 01 p0207 A70-11155
- Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc 02 p0352 A70-11659
- Mechanical strength and breakdown metallography of plate shaped structural steel and Al alloy specimen under various HF elastic vibrations 02 p0318 A70-12398
- Low alloy and stainless steels durability in various natural atmospheres, discussing corrosivity dependence on atmosphere pollutants, temperature and humidity 02 p0318 A70-12476
- Sheath-enclosed steel cable inspection using induction coil transducer in conical sleeve 02 p0301 A70-12490
- Sliding steel specimens anomalous friction behavior in vacuum, noting friction-time plot dependence on oxide film rupture, load, environmental pressure, etc 02 p0321 A70-12534
- Photogrammetric deformation measurement of thin steel sheets during static bending tests 02 p0302 A70-12653
- Cr diffusion coating influence on fatigue life of Fe and steel, discussing residual stress measurement technique 02 p0320 A70-12848
- Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability 03 p0588 A70-13251
- Al alloy and structural steel fatigue strength under superelastic cyclic axial stresses, describing observed plastic deformation patterns 03 p0509 A70-13271
- Case hardened steels structure and properties, intermetallic phases, hardness variation with depth and hardening techniques by Be and B 03 p0510 A70-13351
- Steel crystal lattice fine structure and mechanical properties during annealing using X rays as function of temperature 03 p0511 A70-13422
- Rolling, pickling and annealing influence on composition of steel sheet surface 03 p0497 A70-13775
- Sound attenuation rate of rectangular flat steel plates contact and branch point relation to velocity difference and absorption length 03 p0526 A70-14353
- Stress-strain spatial distribution in notched plate fatigue specimen of mild steel determined by finite element method, noting cyclic strain softening effect [ASME PAPER 69-MET-C] 04 p0770 A70-14876
- Steel welding processes in thicknesses useful to future booster production 04 p0700 A70-15652
- Dilatometric diagrams of phase transformations at low temperatures in Re steels, studying dilatation coefficient behavior 05 p0862 A70-16201

Internal friction method for studying dislocation, stacking points and strengthening processes in steels and heat resisting austenitic steel behavior at high temperatures 05 p0864 A70-16870

Low cycle fatigue of alloy and steel materials under bending and cyclic heating, relating strains and number of cycles to failure 05 p0866 A70-17036

Optimal thermomechanical treatment for austenitic steel stability to resist propagation and unloading of dislocations in cyclic loading process 05 p0867 A70-17041

Heat resistant steel and nickel alloys stress rupture strength at operating temperatures, discussing endurance diagrams under cyclic bending loads 05 p0868 A70-17047

Vibration damping properties of steels and Ti- and Al-based alloys at various temperatures under tensile and compression loads 05 p0868 A70-17048

Heat resistant enamel coatings effect on vibration damping of cast steels for turbine blades 05 p0868 A70-17050

Heating influence on circular bending fatigue strength of refractory steel and alloys, using radiative and HF inductive heating 05 p0868 A70-17059

Cyclic creep curves plotted from expansion diagrams for steel, copper and brass under small numbers of cyclic compression tension loads 06 p1162 A70-17388

Steel elements failure during nonstationary thermal fatigue with varying strain and temperature, discussing linear damage accumulation theory 06 p1163 A70-17397

Damage accumulation and failure of low carbon and low alloy steels subjected to repeated static loading, varying cyclic load frequency 06 p1085 A70-17400

Steels crack propagation direction dependence on load magnitude in low cycle fatigue, noting groove width effects on resistance to static loading 06 p1163 A70-17401

Surface work hardening effects on steels resistance to low cycle fatigue with stress concentration, applying results to aircraft parts 06 p1085 A70-17403

Normalized steel low cycle fatigue strength under bending and torsional rotation, testing linear damage accumulation theory 06 p1163 A70-17404

Energy dissipation patterns of metal fatigue failure during static and cyclic loading applied to untreated and heat treated steel samples 06 p1166 A70-17651

Mean cyclic stress effect on stress concentration and fatigue strength of smooth and notched steel specimens at normal and high temperatures with superimposed bending 06 p1088 A70-17653

Critical brittleness temperatures of low C steels determined to distinguish main failure types 06 p1166 A70-17655

Steels microstructural plastic deformation under pulsed laser irradiation 07 p1303 A70-18712

Steels fatigue strength under biaxial tension, considering complex stress-strain state 07 p1304 A70-18823

Selenium additions effect on structural steels transverse mechanical properties, emphasizing plasticity, shock resistance and machinability 07 p1310 A70-19750

Dynamic pearlite-austenite transformation and melt temperatures measured in laser-irradiated steel, discussing thermal response as function of heating rate 07 p1301 A70-19897

Soviet book on mechanical properties of heat resistant steels and alloys at room and elevated temperatures 08 p1515 A70-20691

Static loading effect at high temperatures in argon and liquid lithium on mechanical properties stability of steel 08 p1515 A70-20920

Quenched and tempered steels ductile fracture with respect to plasticity, structure and crack development conditions using microfractography 08 p1515 A70-20922

Hydrogen penetrability in heat resistant steels subjected to high temperature creep, observing activation energy decrease with increased stress 08 p1515 A70-20923

Ti additions influence on steel work hardening, specific weight, magnetic properties and structure 08 p1515 A70-20924

Steel strength under prolonged preliminary loading at elevated temperatures 08 p1515 A70-20934

Steel structure and mechanical properties under preliminary loading at elevated temperature and liquid Li at various exposure times 08 p1515 A70-20935

Epoxy-phenolic coatings effect on fatigue durability of bent steel samples 08 p1587 A70-21075

Stress and strain spatial distribution in notched steel plate under cyclic loading determined by finite element method 08 p1590 A70-21315

Static and dynamic low temperature crack toughness behavior of steels, determining strain rate effect 08 p1518 A70-21317

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties derived from fatigue tests 08 p1590 A70-21413

Carburization resistance of refractory steels, emphasizing chemical composition effect on corrosion rate 08 p1519 A70-21434

Aluminum nitride morphology in structural Cr-Ni-Mo steel, discussing dependence on austenitization temperature and cooling conditions 08 p1519 A70-21435

Simultaneous titration of gases, metalloids and metals in steels and refractory alloys by far UV vacuum spectrometry [ONERA-TP-765] 08 p1455 A70-21842

Brittle failure mechanics application to steels sensitivity to rupture at low temperatures, discussing crack propagation resistance and heat treatment effect on impact toughness 09 p1768 A70-22076

Strain rate and hold time effects on steels low cycle fatigue behavior, graphing various correlations among stress amplitude, time to fracture, etc 09 p1774 A70-22589

Heat treatment effects on hardened steels acoustic constants, calculating sound velocity in liquid metals 09 p1692 A70-22643

Kinematic viscosity of molten steel containing corundum inclusions as function of temperature 10 p1904 A70-24271

Microstructure and ductility of air- and vacuum-melted heats of corrosion resistant steels, investigating tensile and yield strengths for all grain directions 10 p1905 A70-25170

Prestrain and mean stress effects on fatigue life using cumulative damage procedure based on Al alloy and aircraft quality steel tests 11 p2137 A70-26092

Low temperature tempering effects on steel transformations and axial rigidity of radial thrust ball bearings in aircraft 12 p2243 A70-27568

Plastic strain state effect on ductility and toughness of structural steels 13 p2432 A70-28675

Large deflections in impulsively loaded clamped circular Al alloy and steel viscoplastic plates 13 p2511 A70-28736

Diffuse coatings effect on strength characteristics and corrosion resistance of steels, analyzing structure, thickness and purity of surface layers 13 p2433 A70-28888

Oxygen motion velocity effect at various pressures on heatproof and heat resistant steels and alloys ignition, noting minimum ignition temperature 13 p2434 A70-29168

Transformations on surfaces of molybdenum disulfide-steel system during friction in air, noting Mo oxides formation and friction coefficient increase 13 p2421 A70-29427

Total nitrogen content determination in silicate samples of rocks, synthetic silicate standards, NBS steels and meteorites using inert carrier-gas extraction-gas chromatography 13 p2362 A70-29497

Titanium effect on iron and steels nitriding at high temperature, obtaining high surface hardness 13 p2423 A70-29773

Fine grained structure effect on steels and Ni alloys short term heat resistance at high temperatures 14 p1594 A70-30168

Austenitization temperature, cooling rate and tempering conditions effect on steel castings structure, strength and impact properties 14 p2596 A70-30875

Fast brittle crack slowing by mechanical twins in transformer steel and by slip bands in LiF and NaCl crystals 15 p2755 A70-31526

Plastic deformation and aging effects on fatigue characteristics of steels until rupture under cyclic loads 15 p2755 A70-31540

Transient overloads effect on long term fatigue strength of notched and smooth steel samples, emphasizing heat treatment effect on notch sensitivity at high temperatures 15 p2814 A70-31546

Oxygen interlayer diffusion effects on wear change during gliding friction of normalized steel samples 15 p2743 A70-31636

Molybdenum disulfide and phenol formaldehyde resin lubricants for hydroextrusion of steel 15 p2743 A70-31639

Ultrasonics for steel cleanliness rating, considering advantages and fatigue life 15 p2743 A70-31768

Alloying elements and austenization conditions effects on hardenability of steels, investigating critical cooling rates based on TTT diagrams 15 p2744 A70-31929

Niobium carbides formation in Nb containing steels during gamma-alpha transformation, establishing relationship between brittleness and carbide distribution characteristics 15 p2758 A70-32123

Dynamic fracture toughness measurement of low strength steels via instrumented Charpy impact test with correction factor for inertia loading effects 15 p2820 A70-32237

Impact test machines, specimen design and energy measurement in dynamic tear test method for steel fracture strength 15 p2759 A70-32242

Dynamic fracture toughness test on heat treated precracked steel specimens under dynamic loading 15 p2759 A70-32243

Steel and copper alloys torsion-tension members under nonproportionate loads, predicting creep behavior [SESA PAPER 1615] 15 p2759 A70-32316

Computerized statistical analysis programs finding plastic stress and acoustic emission as predictors of annealed steel fatigue life 15 p2760 A70-32326

Size effects on impact energy disposition in plastically deformed thick steel specimens at shelf temperature, using similitude laws 15 p2760 A70-32332

Austenite strength effect on austenite-martensite transformation in alloy steels, measuring resistance to plastic deformation 15 p2760 A70-32376

Fracture of failed tensile impact and compression test pieces of hardened SAE 52100 steel, using scanning electron microscope 15 p2745 A70-32443

Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C 17 p3102 A70-35409

Cyclic strain effects on creep for steel at elevated temperatures, discussing overload frequency effects on plastic strain buildup 17 p3127 A70-35719

Steel and cast iron early stage fatigue failure, using photoelastic coatings 17 p3192 A70-35741

Ultrasonic irradiation effects on steel hardenability and carbon diffusion rate during annealing, noting microstructure 18 p3273 A70-36049

Automatic dilatometers for volume variations in steel and Co-W alloy during aging and heat treatment, noting microstructural changes 18 p3257 A70-36202

Quantitative analysis of nonmetallic inclusions in steels containing Ti after electrochemical anodic dissolution 18 p3277 A70-36464

Photometric determination of Ti with diantipyril-methane in steels containing Se 18 p3277 A70-36465

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc 19 p3547 A70-38432

Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability 19 p3548 A70-38469

Nb effects on steel susceptibility to brittle fracture at various temperatures, discussing impact strength and nucleation energy of crack formation 19 p3453 A70-38709

Soviet papers on heat resistant alloys and steels structure by electron microscopes 20 p3644 A70-39036

Fretting corrosion zone steel, measuring transient temperature distribution during contact friction 20 p3647 A70-39243

Steels thermal fatigue in testing machine, investigating strains and stresses due to nonuniform temperature distribution during thermal cycle 21 p3840 A70-41433

Polyvinyl chloride sheet steel manufacture, properties and welding methods 22 p4045 A70-42479

Fracture behavior and tempered martensite embrittlement relationship in steel, using V- notched and fatigue precracked Charpy specimens 22 p4054 A70-42736

Succession of passes in rolling and hot shaping of thin walled angle steel 22 p4045 A70-42813

Low cycle notch fatigue tests on Inconel and low alloy steel, giving fatigue strength reduction factors for design 22 p4055 A70-43103

Pulsed spray welding electrode melting rates for Al alloy, mild steel and stainless steel electrodes over range of pulse current levels 22 p4046 A70-43147

German monograph on notched structural steels fatigue properties and crack propagation under tensile-compressive alternating loads 24 p4356 A70-45086

Steel and duralumin strips with circular holes tested under axial tension, determining relationship between strength weakening and ultimate stress 24 p4420 A70-45272

Crack detection in cyclic strained steel and Al alloys, using ultrasonic Rayleigh and longitudinal waves 24 p4424 A70-45718

Brittle fracture of welded notched steels with different stress concentrations, using subzero tensile tests 24 p4347 A70-45732

High purity Cr-Ni heat resisting steels, investigating phase transformations with microhardness measurements magnetic analysis, X ray diffraction and microstructure examination 24 p4362 A70-46181

Steel surface diffusive saturation with elements of chlorides, noting role of iron chloride phase in promoting coating uniformity 24 p4350 A70-46332

Aluminized Armco iron and steel diffusion layers phase composition and microstructure 24 p4350 A70-46337

STEEP GRADIENT AIRCRAFT

U V/STOL AIRCRAFT

STEEPEST ASCENT METHOD

U STEEPEST DESCENT METHOD

STEEPEST DESCENT METHOD

Closed loop frequency response analyzer with steepest descent computing procedure to obtain in-phase and quadrature signal components in linear or nonlinear systems [ASME PAPER 69-WA/AUT-3] 04 p0688 A70-14830

Radar signals synthesis using steepest descent for minimizing Hermitian form 05 p0812 A70-16247

Asymptotic expansion of contour integrals involving analytic functions of complex variable, using steepest descent method 15 p2767 A70-31696

Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method 16 p2977 A70-33871

Tangential descent direction determination for optimum control problems based on problem of moments 18 p3235 A70-36574

Stochastic approximation iterative algorithms for multivariable plants mathematical models, including steepest descent method 20 p3593 A70-39910

Steepest descent method for determining lowest ground state eigenvectors for molecular wave configurations 22 p4062 A70-42747

STEEPNESS

U SLOPES

STEERABLE ANTENNAS

Design methods for self steerable antenna arrays in unidirectional and two directional radio links 03 p0456 A70-13196

Satellite communications influence on ground stations design, describing steerable antenna and receive and transmit configurations for domestic station 05 p0811 A70-16095

Cross type radio telescope beam forming and steering system, describing switched delay lines and phasing circuits 08 p1477 A70-21823

Elevation patterns of vertically polarized elements above circular finite ground screens directly on soil, discussing steering illumination 09 p1634 A70-22700

Vertical tilt and horizontal position of antenna rotating device in radio astronomy and radar observations using photogrammetric methods 12 p2195 A70-27478

Radiation patterns of phased array scanning antenna using digital phase shifter, reducing peak sidelobe level 13 p2380 A70-29785

Steerable microwave circular array to provide 360 deg electronic beam steering with computerized adaptive amplitude and phase control 16 p2874 A70-33392

C band radar antenna with pencil beam steered in plane by ferrite phase shifters 16 p2875 A70-33394

Steerable C band waveguide arrays design for forming monopulse cluster of sum and difference beams 16 p2875 A70-33395

Steerable 100 meter radio telescope, discussing foundations, azimuth towers, reflector, assembly, electric motors, steering and receivers 16 p2888 A70-33656

X band aircraft antennas selection and design for defense communications satellite systems, emphasizing steerable phased array 16 p2865 A70-33712

Artificial pilot phased array /APPA/ for use as multiple narrow beam communication satellite, obtaining beam steering from phase shifter setting 16 p2983 A70-34070

STEERING

Hydrostatic synchronized steering of tow tractor for Boeing 747 and wide body jets compared to mechanical system 05 p0829 A70-16421

Minimum fuel continuous thrust elliptical orbit transfer problem, obtaining optimal steering function for departure and arrival points 11 p2124 A70-26214

Lunar vehicle design, discussing dual power steering, switching and joystick control handle 12 p2208 A70-27944

Lunar roving vehicle stability and agility design approach by Grumman, using articulated steering and conical wheels 12 p2208 A70-27946

Chrysler lunar vehicle design featuring flexible metal wheels and Ackerman front wheel steering, noting back-to-back seating and centrally mounted control display panel 12 p2208 A70-27947

Visual feedback delay effects on steering and tracking performance 12 p2179 A70-28147

Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft [AIAA PAPER 69-790] 13 p2344 A70-28514

Cross product steering for space vehicles and ballistic missiles guidance during powered vacuum flight, pointing thrust acceleration vector to null velocity at termination 16 p2947 A70-33440

Feedback analysis of learning and performance in hand-yoked, steering and stimulus tracking control of breath-produced visual target 16 p2852 A70-33660

Feedback delay effects on eye-hand synchronism in stimulus tracking and steering using self generated body movements 16 p2852 A70-33662

Thor launch vehicles steering filters design using automated method of optimizing large order linear stochastic systems control 20 p3600 A70-39543

Booster parameterized guidance algorithms investigated on basis of steering forms validity, discussing exoatmospheric ascent applications [AIAA PAPER 70-1066] 20 p3669 A70-39584

Steering behavior during learning as function of self generated stimuli by movement compared with stimulus tracking 20 p3580 A70-39674

STEERING ROCKETS

U CONTROL ROCKETS

STEFAN-BOLTZMANN LAW

Stefan heat conduction problem with time dependent first kind boundary conditions approximate solution, taking into account unsteady temperature field of solidifying liquid 03 p0604 A70-13210

Positive time-periodic solutions to parabolic problems with Stefan-Boltzmann boundary conditions using straight lines method 07 p1333 A70-18748

Nonlinear difference approximating scheme and iterative method for Stefan problem with several unknown fronts 08 p1534 A70-20851

Stefan-Boltzmann formula validity for flames and combustion products radiation affected by time dependence of emissivity coefficient, place and wavelength 14 p2662 A70-30179

STELLAR ATMOSPHERES

NT CHROMOSPHERE

NT SOLAR ATMOSPHERE

White dwarf spectra interpretation based on model atmosphere method, discussing chemical composition, low luminosity high pressure atmospheres, electron density, etc 01 p0189 A70-11340

Cool dwarf stars atmospheric models including IR opacity due to water vapor and pressure induced dipole of molecular hydrogen 01 p0190 A70-11347

M dwarf stars model atmosphere construction taking into account molecular opacities in cool stellar atmospheres 01 p0190 A70-11348

High temperature atmospheric models for red dwarf stars and sun to determine convection effect on atmospheric surface layers and emitted flux
01 p0190 A70-11349

Nongray and constant radiative flux model atmosphere for K dwarf stars with 4000 K effective temperature and 4.5 log surface gravity
01 p0191 A70-11350

Electron pressure and negative H ion population in late type dwarfs atmospheres by Ca I resonance line observation, noting non-LTE mechanism
01 p0191 A70-11351

Stellar spectral lines fine analysis methods compared for curves of growth, line profiles and related contribution curves in model atmospheres for Procyon and sun
02 p0343 A70-11906

Neutron star atmospheric composition as function of time, including effects of diffusion, cooling and nucleosynthesis
02 p0378 A70-12698

Hyperon and resonance particle effects on neutron star vibration, discussing vibrational energy storage and atmospheric electromagnetic generation
02 p0379 A70-12699

Stellar model surface convective zone using diffusion equation taking into account transport due to gravitational separation, noting role of turbulent diffusion
03 p0574 A70-13932

Convective nongray stellar atmospheres construction for stellar stability studies, accounting for convective flow nonlocality and nongray radiative transfer
04 p0745 A70-14472

Stellar atmosphere high dispersion spectroscopy, discussing limitations for stars over 17,000 K
04 p0746 A70-14508

Rayleigh scattering cross sections of stellar He C, N and O computed by quantum defect method, discussing effects of wavelength dependent polarizabilities
04 p0723 A70-15692

Stellar atmospheric models thermal conductivity coefficient computation for various temperatures and pressures neglecting magnetic field
06 p1150 A70-18464

Carbon particles formation and growth model for cool variable carbon star atmosphere with sinusoidal carbon star atmosphere with sinusoidal temperature variations
07 p1380 A70-19260

Carbon particles formation and growth in Mira variables atmospheres, considering extinction effects on stellar structure and appearance
07 p1380 A70-19261

Line profiles in expanding and rotating atmospheres via Monte Carlo techniques, considering noncoherent scattering, atomic levels and atmospheric characteristics
07 p1339 A70-20057

Von Zeipel 1128 O star spectrum analysis, discussing mass, He/H ratio, metal abundances, etc
08 p1571 A70-20913

Sigma Orionis E hydrogen-deficient atmosphere, using grid of constant-flux model atmospheres to determine abundances of five elements
09 p1755 A70-22504

Book on stellar spectroscopy, covering stellar atmospheric models, rotation, evolution, etc
09 p1756 A70-22640

Stellar wind theory based on spherically symmetric isothermal and stationary stellar atmosphere with non-negligible gravitational potential
09 p1747 A70-23605

Model for FU Orion irregular variable to determine turbulent convection characteristics in atmosphere at optical transparency level
11 p2115 A70-26580

Stellar atmosphere and shell models in spectral range AO-G5 for studying stellar structures dependence on chemical composition
11 p2115 A70-26582

OB supergiants atmospheric expansion indicated by medium-dispersion spectra, noting mass loss rate increase with luminosity and effective temperature
11 p2117 A70-26657

Nonlinear integral equations of radiation transfer of stellar and planetary atmospheres
12 p2305 A70-27852

Stellar atmosphere model for multilevel spectral line emission, assuming semiinfinite hydrogen atmosphere with sequence of plane parallel zones
12 p2306 A70-27856

Thermal shock waves structure and effective temperature in stellar atmospheres taking into account absorption effects and possible isothermicity
12 p2306 A70-27861

Stellar upper atmospheric shock wave motion, discussing emission spectra interpretation and temperature gradients
13 p2493 A70-29395

Stellar observations in near UV by camera having two color photometric slides, discussing atmospheric models
13 p2498 A70-30013

Arcturus atmosphere Mg abundances from rotational lines noting terrestrial proportions
14 p2637 A70-30540

Narrow band photometry calibration, using model stellar atmospheres and laboratory data for high resolution synthetic spectra of G and K giant stars
14 p2639 A70-30728

Galactic cosmic ray actions on interstellar medium for origin of Li, Be and boron in stellar atmospheres and solar system
14 p2640 A70-30786

Non-LTE and LTE line profiles and equivalent widths for transitions in singlet and triplet systems of neutral He in hot stars, explaining anomaly
14 p2641 A70-30884

A-type supergiants microturbulence, determining atmospheric small scale velocity fields
14 p2641 A70-30885

Spectral line formation, assuming frequency redistribution for plane parallel stellar atmosphere containing nonuniform distribution of internal emission sources
14 p2651 A70-31289

Ap star kappa Cancr model atmosphere analysis based on observed energy distribution and hydrogen line profiles
14 p2652 A70-31381

B3V stars atmospheres by LTE model and spectroscopic techniques
14 p2652 A70-31384

CH Cygni irregular light variations and spectrum peculiarities, considering upper atmosphere perturbation by variable hot satellite
15 p2809 A70-32904

Radiative transfer in spherical stellar atmosphere, considering free electrons density gradient and thermal motions, atmospheric layer curvature, optical thickness, etc
15 p2732 A70-32905

Book on interpretation of spectra and atmospheric structure of cool stars covering line identification, dissociative equilibrium, opacity, chemical composition, carbon stars, etc
16 p2978 A70-33962

Shock wave propagation through giant star atmosphere, using approximate analytical method
16 p2980 A70-34305

Spectrum of bright IR object VY Canis Majoris, noting absorption feature attributed to SiO molecules in stellar atmosphere
17 p3154 A70-34540

Stellar UV and visual continuum observations, discussing recalibration of absolute energy distribution of alpha Lyr to improve model atmospheres
17 p3160 A70-34881

Early-type star spectral scan analysis from OAO observation, comparing model atmosphere calculations
17 p3161 A70-34887

Supergiant alpha Car UV spectrophotometry from Gemini 11, comparing with model atmosphere
17 p3161 A70-34888

Normal stellar atmospheres - Conference, Cambridge, Mass., April 1968
17 p3168 A70-35379

Observational evidence concerning validity of Saha and Boltzmann laws in O, B and A stellar atmospheres
17 p3170 A70-35387

Meridional circulation velocities in Roche envelope of uniformly rotating star, using nonlocal equation for radiative heat transfer
17 p3171 A70-35560

Energy transfer in convective envelope of rotating star and solar differential rotation, using Lucy gravity-darkening law
18 p3313 A70-36214

Stellar atmosphere radiation field quantity vs quality, deriving electron temperature as function of tau
18 p3309 A70-37007

Ionization degree in moving stellar envelopes with large optical thickness
19 p3525 A70-38763

Dwarf Me stars flare spectra, examining hydrogen recombination layer and impulse heating of photosphere
20 p3702 A70-39013

K and M star molecular constituent density calculations using model atmospheres and observations
20 p3702 A70-39015

Neutron stars, discussing equations of state and stellar interiors, models, atmosphere, cooling, vibration, rotation and magnetic fields
20 p3706 A70-39932

Stellar coronas X ray fluxes from models of convection zones and corresponding mechanical energy fluxes
21 p3875 A70-40681

Schroedinger equation for hydrogen solved for high pressure behavior of materials, applying to stellar atmospheres and laboratory plasmas
21 p3849 A70-40933

Be star HD 37202 zeta Tauri II envelope instability, discussing radial velocities, profiles, line width and electron density in layers
21 p3888 A70-41119

Radiation line transfer in Wolf-Rayet envelopes with rapid radial expansion by escape probability method, including radiation effect from stellar core
21 p3892 A70-41248

Book on astrophysics and stellar structure covering physical characteristics, atmospheres, interiors and evolution
21 p3919 A70-41792

Stellar envelope physical structure studied to solve equilibrium equation, applying results to stellar model
22 p4097 A70-42545

Gravitational acoustic wave emission in isothermal stellar atmosphere with mass sources
23 p4242 A70-44267

Stellar rotation effects on atmospheres of early type main sequence stars, using models for surface gravity and temperature variations
23 p4249 A70-44810

Rotating stellar atmospheric models for middle and late A star masses, emphasizing Altair observed and predicted energy distribution
23 p4250 A70-44812

Effective temperature of star zeta Puppis from combined angular diameter measurement and model atmospheres, comparing hot stars
24 p4404 A70-45414

Cool star atmospheric structure, discussing models with and without graphite particle inclusion opacity
24 p4410 A70-45765

Stellar structure in advanced phases of evolution, considering mixing between hydrogen-rich envelope and core through surface convection zone
24 p4412 A70-46102

Main sequence and giant stars atmospheric structure models, noting metal deficiency effects
24 p4413 A70-46159

Novae and supernovae envelope properties, observing optical polarization and magnetic field for Crab Nebula
24 p4413 A70-46169

Atmospheric composition of cool stars in relation to nucleosynthesis and galactic evolution
24 p4414 A70-46227

STELLAR DOPPLER SHIFT
U DOPPLER EFFECT
U EXTRATERRESTRIAL RADIATION

STELLAR EVOLUTION
White dwarf luminosity functions based on birth rate, white dwarf space density in solar neighborhood and possible red degenerate stars deficiency
01 p0189 A70-11339

Cooling time estimation for white dwarf stars with ion component undergoing condensation, based on plasma thermodynamic properties
01 p0189 A70-11341

High luminosity white dwarfs possible evolution from planetary nebulae, discussing plasma neutrino processes
01 p0189 A70-11342

White dwarfs formation in close binary systems ascribed to mass exchange between components, describing evolutionary followup of primary from main sequence by model
01 p0189 A70-11343

Protostars rapid contraction and flare up evolutionary phases, solving hydrodynamic equations of motion
01 p0190 A70-11344

Low mass protostar evolution in dynamic collapse, investigating opacity laws
01 p0190 A70-11345

PreHayashi phase of stellar evolution, discussing protostellar disks/stellisks/formation from flattened fragments of collapsed interstellar cloud under turbulent viscosity
01 p0190 A70-11346

Two armed spiral galactic shock waves as triggering mechanism for gravitational collapse leading to star formation, considering gaseous disk motion using Schmidt model
02 p0363 A70-11781

Final state of matter resulting from star contraction, white dwarfs development and neutron stars problem, explaining hydrostatic equilibrium
02 p0370 A70-12085

Thermal energies and angular momenta of Hubble galactic sequence using differential rotation and decreasing density stellar system model to test stellar evolution theories
02 p0376 A70-12447

Relativistic phase of stellar system evolution caused by inelastic stellar collisions, discussing thermal relaxation rate, obtaining distribution function
03 p0564 A70-13226

Late stars spectral characteristics, verifying criteria for spectral classification and anomalous spectra determination
03 p0569 A70-13424

Astronomical and space research methods probing fundamental questions concerning universe unsolvable by classical astronomy, discussing solar wind and stellar formation and evolution
03 p0571 A70-13790

Neutron star electrical conductivity, discussing stellar flux and magnetic field decay times
03 p0578 A70-14220

- Binary star formation using singular solution of Kepler problem in general theory of relativity
04 p0755 A70-15355
- S Doradus spectroscopic behavior study during minimum and maximum phases suggesting ejected-shell mechanism and premain sequence star classification
04 p0759 A70-15712
- Time variation of gravitational constant on structure of central solar region and neutrino luminosity
05 p0899 A70-15952
- Thermal and dynamical evolution of gas clouds in transparent and opaque stages by comparing rates of cooling, heating, contraction and expansion
05 p0907 A70-16041
- Models constructed for advanced evolution phases in massive convective red supergiants, considering carbon, Ne and oxygen burning in stellar core
05 p0919 A70-16935
- Metal content effects on evolution tracks of five solar mass stars with different chemical composition, discussing Magellanic Clouds composition
05 p0919 A70-16936
- LTE departures in late B stars from measurements of Balmer and Paschen discontinuities
05 p0919 A70-16937
- Red giants age and mass estimation based on K-line luminosities, noting role of metal abundance
06 p1139 A70-17416
- Cosmological theories taking into consideration gravitational collapse, discussing pulsars, quasars and X ray stars evolution
06 p1140 A70-17584
- Age mixtures and physical heterogeneity of G-M cold stars emphasized in study of galactic fine structure and evolution
06 p1140 A70-17640
- Solar system evolution theories to explain planetary orbits, angular momentum and matter distribution, satellite systems and chemical composition
07 p1376 A70-18898
- Interstellar cloud models to investigate heating, cooling and density distribution effects on collapse and to suggest theory of stellar evolution
07 p1390 A70-20292
- Earth observations of collapsing star neutrinos and neutrino oscillations in Milky Way galaxy
07 p1371 A70-20331
- Age dating of earth and universe emphasizing methods based on radioactivity, discussing stellar evolution, galactic age and assessment of cosmic time
08 p1568 A70-20633
- Solar system origin theory emphasizing brother star approaching nebula for instability of boundary layer
08 p1568 A70-20638
- Statistical analysis of rotation and macro turbulence in early type Ia and IaB supergiants, discussing evolutionary effects
08 p1571 A70-20908
- Magnetothermal instability and radiative effects on incipient fragmentation of rotating gravitating interstellar fluid forming condensations
08 p1578 A70-21545
- Stellar formation and explosions in compact gas clouds to explain quasar phenomenon, discussing temporary star concept
08 p1578 A70-21548
- Relativistic phase of stellar system evolution caused by inelastic stellar collisions, discussing thermal relaxation rate, obtaining distribution function
08 p1580 A70-21659
- Supernovae remnants evolution, properties and galactic distribution, discussing criteria for catalog listing and remnants as X ray sources
09 p1749 A70-21990
- Relativistic gravitational stellar collapse calculations for stars exceeding neutron star limit, discussing results in terms of supernovae or neutrinos
09 p1749 A70-21991
- Late stage stellar evolution association with supernovae in terms of gravitational collapse and exploding light emission using evolutionary model
09 p1749 A70-21993
- Quasar-associated evolutionary effects, considering uniform distribution, constant optical luminosity and evolving radio luminosity
09 p1753 A70-22455
- Metal-poor stars evolution during hydrogen and helium burning from main sequence to giant branch, estimating relative cluster ages
09 p1755 A70-22507
- Stellar evolution computations numerical instability due to coupling between hydrostatic equilibrium and thermal processes
09 p1755 A70-22508
- Book on stellar spectroscopy, covering stellar atmospheric models, rotation, evolution, etc
09 p1756 A70-22640
- Galactic halo origin and evolution postulated from chemical evolution assuming stellar evolution details
09 p1758 A70-22742
- Twelffold solar mass star evolution computed using chemically homogeneous model showing faster evolution rate
09 p1758 A70-22746
- Stellar rotation theory applied to evolution of nine solar mass star from main sequence to helium exhaustion
10 p1946 A70-24969
- Low mass star evolution from helium burning to white dwarf, describing red giant and mass loss stages in model
10 p1946 A70-24982
- WZ Sagittae ultrashort period binary evolution, considering mass-radius relation, initial separation and present position
11 p2108 A70-25696
- Evolution of very low mass stars with low mass companions in solar neighborhood
11 p2111 A70-26033
- Pulsars nature based on hypothesis for main energy of novae and supernovae bursts equaling gravitational energy of collapse
11 p2117 A70-26708
- Stellar plasma neutrino pair emission, comparing photon neutrino coupling with current current coupling theory and white dwarf evolution
12 p2297 A70-26976
- Gravitational collapse of star and general relativity role, considering Schwarzschild solution to Einstein vacuum equations
12 p2298 A70-27058
- Vibrationally unstable high mass main sequence star, reinvestigating destruction by radial oscillations
12 p2302 A70-27587
- Young stars evolution rates in expanding and disintegrating stellar associations, giving age estimates
12 p2306 A70-27862
- Vlasov equation approximate solution by minimum energy principle, deriving equilibrium equation for stellar gas
13 p2457 A70-28552
- Density wave theory and spiral gravitational field effects in migrating stars orbits and origins in Milky Way spiral arm, using Schmidt model
13 p2495 A70-29801
- Stellar evolution numerical model for point masses constant with time in absence of external field
13 p2498 A70-30011
- Self gravitating three dimensional particles system evolution using water bag model
13 p2498 A70-30012
- Red giant model, investigating inclusion of semirelativistic partially degenerate gas characteristics by perturbatory technique
14 p2651 A70-31290
- Overstable convection formation of semiconvective zones in massive stars, noting Schwarzschild and Harm models
14 p2652 A70-31386
- O-Of stellar evolution yielding Wolf-Rayet type, considering spectral evidence and H-He interaction
15 p2800 A70-32202
- Massive hydrogen burning stars evolution with pulsational mass loss based on minimizing pulsational instability degree to specify mass loss rate
15 p2803 A70-32612
- Pulsar formation mechanism, showing core collapse to neutron star state
15 p2806 A70-32773
- Hot small mass neutron stars cooling time and internal characteristics, discussing evolution based on H-R diagram
15 p2808 A70-32886
- Stellar evolution in globular clusters, considering H-R diagrams of age, He abundance and thermal instability
16 p2973 A70-33076
- Cosmic time varying gravitational constant effects on stellar age determination
16 p2978 A70-33966
- Pulsar observations based on magnetic dipole model, discussing turnover time, emission characteristics, birth rate and scale height
17 p3153 A70-34531
- Globular cluster stars, discussing cosmological importance, stellar development models, main sequence stars, red giant models, He content, age computation, etc
17 p3171 A70-35447
- Stellar thermal and vibrational energy losses due to URCA shells in interiors
18 p3310 A70-35935
- Asteroidal parent bodies heating by electrical induction during early solar evolution
18 p3310 A70-35938
- Helium abundance in unevolved main sequence eclipsing binaries by comparing to homogeneous models in mass luminosity plane
18 p3318 A70-37023
- Dispersed stellar clusters color excesses and distance moduli from color-magnitude diagram, considering evolutionary deviation from main sequence
18 p3323 A70-37138
- Disk shaped galaxy stationary spiral shock pattern, examining gas cloud gravitational collapse for star formation
18 p3331 A70-37198
- Young star velocity ellipse vertex deviation, discussing formation at right angles to galactic center direction
18 p3331 A70-37199
- Soviet book on variable stars covering properties, evolution, structure, methods of investigation, etc
19 p3520 A70-38397
- Stellar evolution covering formation, structure and time-varying properties of single spherical, nonspherical, magnetic and binary stars
19 p3531 A70-38950
- Horizontal branch stars evolution based on mass distributions from comparison with giant branch, investigating evolutionary track characteristics during core helium burning
20 p3702 A70-39019
- Carbon-nitrogen-oxygen isotope bi-cycle function in solar evolution, noting first cycle role in solar energy release and neutrino production
20 p3698 A70-39306
- Explosive nucleosynthesis as heavy nuclei source for stars
20 p3712 A70-40426
- Close binary stars evolution, discussing initial parameters effects on mass exchange and orbital period model
21 p3884 A70-40872
- Pulsar research review, discussing characteristics, neutron star theory and galactic origin
21 p3886 A70-41072
- Stable hyperon star existence in general relativity, discussing state equations for baryon matter, radial pulsation and superlumina and ultrablastic conditions
21 p3888 A70-41116
- Beta Cephei star discovery criteria, examining mu-mechanism theory by He and N overabundances, far UV flux, spectral line width and binary character
21 p3890 A70-41159
- Book on astrophysics and stellar structure covering physical characteristics, atmospheres, interiors and evolution
21 p3919 A70-41792
- Rotating magnetic star thermal behavior, discussing central nuclear burning stability, homologous changes, cooling, degeneracy and helium flash
22 p4100 A70-42855
- Stellar evolution, rotation and atmospheric motion, discussing gravity darkening, spectral lines, angular momentum, braking mechanisms and late stars
22 p4102 A70-42970
- Electron capture involving iron nuclei in contracting iron stars treated as endothermic nuclear reaction
22 p4104 A70-42992
- Polytropic premain-sequence evolutionary tracks and main sequence models of solar composition low mass stars
22 p4104 A70-42993
- Interstellar molecules from stellar and galactic evolution viewpoint, emphasizing OH emission spectrum characteristics
23 p4238 A70-43801
- Stellar spectra above horizontal branch in globular clusters, discussing stellar evolution, composition and structure
23 p4246 A70-44755
- Be stars rotation, considering emission properties and evolutionary state of main sequence
23 p4249 A70-44807
- Rapidly rotating B and Be stars interior evolution models, considering mass and radiation pressure
23 p4249 A70-44808
- Stellar rotation angular momentum loss in premain sequence convective phase, discussing polytropic structure, formation time and velocity changes
23 p4249 A70-44809
- Upper main sequence and close early type binaries evolution by fission of rapidly rotating protostars
23 p4250 A70-44815
- Stellar rotational velocities in open star clusters, noting evolutionary expansion, tidal coupling in binaries and Ap stars magnetic braking
23 p4251 A70-44820
- Cluster evolution model for stars with equal masses, calculating density and velocity distribution for various cluster types
24 p4404 A70-45417
- Old open clusters red giant observations comparison with stellar evolution calculations, discussing proper motions, magnitudes, data acquisition and analysis, etc
24 p4404 A70-45418
- Massive star pulsational stability in He burning phase, investigating opacity variation effects on flux dissipation in outer layers
24 p4405 A70-45419
- Heavy elements diffusive separation as explanation of metallic and magnetic A stars abundance anomalies at outer convective envelope bases
24 p4410 A70-45775
- Pulsars correlation with stellar evolution using model, discussing distribution and formation rate in Milky Way galaxy
24 p4412 A70-45981

Pulsars radio evolution mechanism by phenomenological analysis, deriving time dependences of period, luminosity and emitting region size
24 p4412 A70-46101

Stellar structure in advanced phases of evolution, considering mixing between hydrogen-rich envelope and core through surface convection zone
24 p4412 A70-46102

Pulsar distributions without magnetic decay, concerning age dependence of surface field and radio luminosity of neutron stars
24 p4413 A70-46138

U INERTIAL NAVIGATION

STELLAR LUMINOSITY

Solar brightness variations observed photometrically, discussing periodicity, sunspot locations, photosphere and subsurface rotations, etc
01 p1886 A70-11273

Low luminosity stars - Conference, Charlottesville, March 1968
01 p1887 A70-11330

Photometric data for white dwarf low luminosity stars listed in color classes and proper motion fields
01 p1887 A70-11331

Lowell Observatory Northern Hemisphere proper motion survey, analyzing preliminary data for low luminosity stars
01 p1887 A70-11332

Duplicity characteristics of low luminosity stars, considering nearby M dwarfs, white dwarfs and high velocity subdwarfs
01 p1888 A70-11334

Faint, metal poor, subluminescent and red degenerate stars occurrence and properties, considering spectra of candidate degenerates
01 p1888 A70-11338

White dwarf luminosity functions based on birth rate, white dwarf space density in solar neighborhood and possible red degenerate stars deficiency
01 p1889 A70-11339

High luminosity white dwarfs possible evolution from planetary nebulae, discussing plasma neutrino processes
01 p1889 A70-11342

Protostars rapid contraction and flare up evolutionary phases, solving hydrodynamic equations of motion
01 p1890 A70-11344

Catalog of faint Ob stars between Carina and Centaurus
02 p0370 A70-12075

Beta Lyr spectral and brightness characteristics long period variations related to orbital motion perturbations
03 p0564 A70-13229

Young flare stars in solar vicinity, considering spatial density, kinematic properties and luminosities
03 p0567 A70-13318

Light variation curves for distorted white dwarf hypothetical secondaries in close binary systems calculated by integrating monochromatic fluxes
03 p0567 A70-13323

Beta lyrae light curve changes by comparing international program observations with 1958 Lick Observatory results, discussing period, brightness, spectra, etc
03 p0568 A70-13327

Psi Orionis light variations, using photoelectric photometry, indicating ellipsoidal variability
03 p0570 A70-13552

Time determination at astronomical observatories using transit instrument observations concerning stellar distributions and magnitudes
04 p0756 A70-15486

Hot star photogravitational acceleration determined from difference between apex and antipex brightness, noting constant magnitude and direction of principal component of apex force
05 p0918 A70-16914

Red giants age and mass estimation based on K- line luminosities, noting role of metal abundance
06 p1139 A70-17416

Mean magnitudes, colors and amplitudes for RR Lyrae variables in omega Centauri cluster obtained from photometric observations
06 p1148 A70-18455

HR diagram calibration based on proper motions and radial velocities, deriving absolute magnitudes and statistical parallaxes
06 p1149 A70-18456

Milky way and interstellar clouds brightness fluctuations statistical analysis by surface photometry, studying dust distribution, cloud absorption and dimensions, star distribution, etc
06 p1149 A70-18463

Optical density vs illumination amount characteristic curve determined for photometric calibration of astronomical photographs of celestial bodies
07 p1279 A70-19046

Effective, brilliance, color and gradient temperature measurements in astrophysics, considering observer bond and thermodynamic nonequilibrium of stars
07 p1386 A70-19597

Supernova remnant luminosity dependence on central star rotation period, deriving parameters for pulsars in Cas A
08 p1570 A70-20897

Quasi-stellar objects absolute spectral energy distribution, considering electron temperature and photon density
08 p1572 A70-20916

Double and multiple stars components magnitude differences tabulated based on visual and photometric observations
08 p1574 A70-21163

Cosmic rays induced Cerenkov light pulses effect on stellar intensity interferometer from measuring correlated pulses
08 p1497 A70-21492

Beta Lyr spectral and brightness characteristics long period variations related to orbital motion perturbations
08 p1580 A70-21662

Secondary minimums role in studying eclipsing variable stars, correlating observability with detection of line of apsides motion
08 p1581 A70-21759

Supernovae and remnants, data concerning radio brightness distribution of Tycho supernova remnant and Cassiopeia and Crab Nebula origin
09 p1748 A70-21989

Stellar scintillation saturation at large zenith angles interpreted in terms of combined dispersion and aperture filtering
09 p1726 A70-22073

Bright star weak longitudinal magnetic fields from telescope spectrograph
09 p1755 A70-22515

Electron-neutrino weak interaction and beat decay coupling constants found nearly equal, describing astrophysical tests based on white dwarf stars luminosity intervals
09 p1733 A70-23451

Cepheid type variable stars nuclear reaction and opacity pulsation excitation mechanisms
10 p1940 A70-24409

Zero-point of period-luminosity-relation of Cepheids based on proper motions, radial velocities and photometric data, applying secular parallax method
10 p1945 A70-24964

Coefficients for linear and nonlinear limb darkening in early type stars
11 p2113 A70-26469

VX Cas brightness determination from color plates, giving values in tabular form
11 p2115 A70-26583

Coordinates and brightness characteristics of variable observed during photographic studies of VX Cas
11 p2116 A70-26584

Densities and extents of absorbing clouds in open cluster NGC 7086 determined from photometry and spectral classifications of stars
11 p2116 A70-26587

Spectra, luminescence and gas dynamic effects in variable stars, discussing nonthermal theory to explain continuous emission
12 p2306 A70-27857

Nova Delphini brightness variations, observing absorption lines shift toward violet
12 p2306 A70-27860

Comet-like nebulae, describing brightness and spectral characteristics of variable stars in nebulae
12 p2307 A70-27863

Sudden disappearance of large quiescent prominence on solar disk with subsequent brightenings, using photospheric and gravitational model
13 p2497 A70-29850

Bright southern Cepheids UVB observations, discussing blue companion effect on two color plot
14 p2639 A70-30726

Stellar intensity interferometer for close binaries and emission line stars, investigating gamma-two Velorum
14 p2640 A70-30733

A-type supergiants microturbulence, determining atmospheric small scale velocity fields
14 p2641 A70-30885

Cepheids distance scale from proper motions data, using maximum likelihood method for period-luminosity relation
14 p2652 A70-31387

Binary AX Monocerotis brightness variations in UV from photoelectric UVB observations
15 p2796 A70-31610

Absolute photovisual magnitude and classification of supernova in NGC 3389 spiral galaxy, using UVB measurements and comparison stars
15 p2797 A70-31611

Spectral classification of relatively bright stars in near UV based on moderate and low dispersion spectra including F, G and K stars
15 p2797 A70-31614

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction
15 p2802 A70-32483

Luminosity criteria in O stars via narrow band photoelectric photometry suggesting VI Cygni proximity
15 p2807 A70-32804

Flare stars distribution in Pleiades, discussing flare visual magnitude and frequency
15 p2807 A70-32876

RW Aur type variable stars percentage with photographically observable flares
15 p2807 A70-32877

AG Peg brightness variations by three color photoelectric photometry, discussing orbital motion of cold component
15 p2807 A70-32878

Long period variable stars light polarization as function of brightness and wavelength, discussing molecular scattering and nonthermal emission
15 p2808 A70-32879

CH Cygni irregular light variations and spectrum peculiarities, considering upper atmosphere perturbation by variable hot satellite
15 p2809 A70-32904

Hyades stars between F4 and K5, measuring chromospheric H and K emission lines dependence on bolometric luminosity
17 p3157 A70-34832

Stellar UV photometry using telescope experiment in OAO
17 p3160 A70-34883

Luminosity effects in Balmer lines of early type stars, noting H alpha equivalent width decrease
17 p3170 A70-35388

Hydrogen abundance in white dwarfs, discussing inconsistencies in mass and bolometric magnitude models for Sirius and Eri B
17 p3170 A70-35389

Delta Scuti stars, determining consistent absolute magnitudes by Stromgren intermediate band colors and Crawford photoelectric H beta indices
17 p3171 A70-35443

Central pulsars effects on supernova envelopes, examining luminosity, energy input, shape and light curve
18 p3314 A70-36333

Pulsars period galactic equator concentration correlation, discussing period-radio luminosity relation and spatial distribution
18 p3314 A70-36335

Soviet book on declination observation of bright and faint stars in one system
18 p3314 A70-36402

Initial horizontal branch metal poor star models, examining opacities, luminosity and cluster ages of RR Lyrae stars
18 p3317 A70-37006

Stellar magnitude equation from corrected catalog data to determine absolute proper motions relative to galaxies
18 p3323 A70-37145

Spiral galaxy NGC 6946 structure and stellar associations distribution, indicating no relation between color and magnitude and distance from center
18 p3327 A70-37160

Soviet book on variable stars covering properties, evolution, structure, methods of investigation, etc
19 p3520 A70-38397

Light curves bumps properties of Population I cepheids in Magellanic Clouds, Milky Way galaxy and M 31 as function of period
19 p3523 A70-38691

Binary stars dynamical parallaxes, masses, absolute magnitudes and provisional orbits, fitting deduced masses into empirical visual mass-luminosity relations
19 p3531 A70-38896

Nova Ser 1970 and Aql 1970 luminous IR emission, discussing stellar brightness, grain formation and optical decay
20 p3701 A70-39004

Main sequence stars faint end IR observations for luminosities and temperatures
20 p3702 A70-39014

Soviet book on brightness of irregular and semiregular variable stars by statistical methods
20 p3705 A70-39899

OPL astrolabe catalog corrections, discussing Danjon prototype, color-magnitude effect, time and latitude values
21 p3887 A70-41111

Reflection nebulae dust density, noting lower limit dependence on absolute magnitude of illuminating star
21 p3889 A70-41149

Total energies of stars with velocities perpendicular to galactic plane, examining absolute luminosities, galaxy size and local gravitational potential
21 p3890 A70-41162

Sirius components relative photographic positions and magnitude difference, discussing color effect, grating image separations and emulsion contraction
21 p3922 A70-41984

- Blue stellar objects emission at 9.5 and 3.5 mm, suggesting quasi-stellar objects with small intrinsic radio luminosity 21 p3922 A70-41993
- Emission and escape of light from inside spherically symmetric gravitational mass, examining escape cone 21 p3923 A70-42106
- Solar equatorial limb brightening of far UV resonance lines of lithium-like N V, O VI, Ne VIII, Mg X and Si XIII ions, interpreting os0-4 data with coronal model 21 p3924 A70-42185
- Star flare HD 160202 in M6, discussing luminosity, time duration, magnitude and temperature 22 p4102 A70-42971
- Color-magnitude diagram of star cluster Kron 3 in Small Magellanic Cloud, using electronographic photometry 22 p4102 A70-42978
- Stellar population of young clusters containing red supergiants, determining spectral types and luminosity classes 22 p4102 A70-42979
- Light curve for eclipsing stars with scattering envelopes applied to V444 Cygni binary system 22 p4103 A70-42989
- Time constant loci and theoretical luminosity functions for various compositions and ages of metal poor globular clusters 22 p4108 A70-43735
- Globular cluster M5 giant, asymptotic and horizontal branches, determining color-magnitude diagram and luminosity 22 p4109 A70-43745
- Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction 23 p4240 A70-43907
- Orbital eccentricity effects on solutions of eclipsing binary light curves, comparing circular orbits solutions 23 p4242 A70-44290
- CA II chromospheric emission lines for deriving Mnu in stellar luminosity, discussing calibration 23 p4242 A70-44293
- Eclipsing binary stars minima variations related to orbit perturbations and rotational angular momentum of component interiors 23 p4251 A70-44819
- Neutron star or defunct pulsar accretion of interstellar matter, discussing effects on total luminosity and radiation spectrum 24 p4403 A70-45397
- Southern early stars away from galactic plane, reporting magnitudes and colors on UVB system and MK spectral classifications 24 p4404 A70-45412
- Gamma Cas star time and spectra observations, examining emission line profile variations and envelope and stellar model 24 p4404 A70-45415
- Pulsar intensity variations, showing fine frequency structure by interstellar scintillation model 24 p4404 A70-45416
- Light velocity frequency dependence in variable stars gravitational fields suggested from yellow and UV NP 0532 observations 24 p4405 A70-45488
- Sc0 XR-1 optical intensity power spectra oscillations searched for in pulsar frequencies and fundamental radial mode vibrations in white dwarfs and neutron stars 24 p4410 A70-45762
- High luminosity M type star photometry, determining supergiant intrinsic properties, interstellar extinction mean law and galactic evolution 24 p4410 A70-45764
- Pulsars radio evolution mechanism by phenomenological analysis, deriving time dependences of period, luminosity and emitting region size 24 p4412 A70-46101
- STELLAR MAGNETIC FIELDS**
- NT SOLAR MAGNETIC FIELD**
- Dynamo theory of stellar and planetary magnetic fields, discussing mathematical analysis and electronic computation of eigenvalue problems and field parameters 01 p0185 A70-10957
- Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature 03 p0557 A70-13220
- Nonperiodic phenomena in variable stars by statistical and physical analysis, noting role of magnetic fields 03 p0566 A70-13313
- Neutron star electrical conductivity, discussing stellar flux and magnetic field decay times 03 p0578 A70-14220
- Prescribed circulations within conducting spheres effect on initially prescribed magnetic fields, discussing magnetic field structure in uniformly rotating stars 04 p0758 A70-15694
- Landau Orbital Ferromagnetism in electron gas as magnetic field source for neutron stars 07 p1380 A70-19279
- Compton scattering of synchrotron radiation from parent electrons in pulsars, calculating Compton-synchrotron radiation from NP 0532 leads to lower limit for magnetic field 07 p1369 A70-20221
- Pulsar magnetorelativistic model assuming neutron star with magnetic field 08 p1563 A70-20478
- Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature 08 p1563 A70-21653
- Magnetic moment associated with Landau levels in magnetic induction in electron gas and magnetic fields of white dwarfs and neutron stars 09 p1752 A70-22306
- Bright star weak longitudinal magnetic fields from telescope spectrograph 09 p1755 A70-22515
- Pulsars period distribution not related to decay of magnetic field in rotating neutron star 09 p1756 A70-22518
- Poloidal magnetic field effects on main sequence stars core convection 11 p2117 A70-26654
- Stellar and nebular magnetic fields formation, considering role of high temperature plasma random charge and current fluctuations 12 p2307 A70-27864
- Galactic, stellar and solar magnet fields origin, considering fluid motions role 14 p2641 A70-30876
- Magnetic fields of DA dwarfs observed with photoelectric polarimeter, noting no fields observable 17 p3154 A70-34537
- Pulsars theories review, discussing geometrical model picturing pulsar as rotating neutron star with high magnetic field 17 p3164 A70-35117
- Pulsars electrodynamics concerning EM emissions, discussing roles of rotation and magnetic field 17 p3172 A70-35591
- Pulsar radiation mechanisms, discussing magnetic field topology and current distribution estimation 19 p3518 A70-38022
- White dwarf star circular polarized light, indicating strong magnetic field 20 p3701 A70-39001
- Pulsars subpulse intensities and shapes in magnetic field, noting drift speed sawtooth patterns 20 p3713 A70-40428
- Sc0 X-1 extar high energy radiation production, discussing relativistic electron synchrotron emission and magnetic fluctuations spectrum 21 p3878 A70-40709
- Corotating magnetic field model of pulsar, using electromagnetic field equations of dipole radiation in low density plasma 24 p4413 A70-46137
- Pulsar distributions without magnetic decay, concerning age dependence of surface field and radio luminosity of neutron stars 24 p4413 A70-46138
- Novae and supernovae envelope properties, observing optical polarization and magnetic field for Crab Nebula 24 p4413 A70-46169
- STELLAR MASS**
- White dwarf mass changes during cooling, describing white dwarf collapse-type I supernova outbursts relationship 01 p0174 A70-10197
- Statistical mechanical method deriving ionization equilibrium and equations of state for low mass stars, considering Coulombic interactions, nonideal effects, etc 01 p0188 A70-11336
- Low mass protostar evolution in dynamic collapse, investigating opacity laws 01 p0190 A70-11345
- Upper mass limit of quasar in galactic cluster from velocity dispersion of galaxies using generalized form of virial theorem, determining B264 mass 02 p0372 A70-12245
- Physical conditions of stars in presupernova stage for type II supernovae with outburst expected due to Fe-He transition in core, confirming lower mass limit 03 p0566 A70-13314
- Superfluid states of matter in interior of neutron stars, discussing strong interaction forces role 03 p0578 A70-14219
- Galactic expansion due to mass energy loss by gravitational radiation 05 p0913 A70-16557
- Metal content effects on evolution tracks of five solar mass stars with different chemical composition, discussing Magellanic Clouds composition 05 p0919 A70-16936
- Red giants age and mass estimation based on K-line luminosities, noting role of metal abundance 06 p1139 A70-17416
- Stellar velocity distribution function for small mass stars in nonrotating systems 07 p1389 A70-20208
- O star red shift considering gravitation interpretation effects on stellar masses 07 p1391 A70-20465
- Von Zeipel 1128 O star spectrum analysis, discussing mass, He/H ratio, metal abundances, etc 08 p1571 A70-20913
- General relativity equations of gravitation consistent with empirical data, discussing curvature tensor, scalar gravitational waves and solar mass difference 08 p1577 A70-21419
- Neutron stars properties, using static cold stellar model to examine relation between central density and mass, and cool hyperonic matter composition 09 p1749 A70-21995
- Twelvefold solar mass star evolution computed using chemically homogeneous model showing faster evolution rate 09 p1758 A70-22746
- Zero age intermediate and low mass stellar models and evaluation of physical parameters for population I and II chemical compositions 10 p1944 A70-24955
- Stellar rotation theory applied to evolution of nine solar mass star from main sequence to helium exhaustion 10 p1946 A70-24969
- WZ Sagittae ultrashort period binary evolution, considering mass-radius relation, initial separation and present position 11 p2108 A70-25696
- Evolution of very low mass stars with low mass companions in solar neighborhood 11 p2111 A70-26033
- Vibrationally unstable high mass main sequence star, reinvestigating destruction by radial oscillations 12 p2302 A70-27587
- Mass transfer in close binary stars and in highly variable stars 12 p2306 A70-27858
- Stellar evolution numerical model for point masses constant with time in absence of external field 13 p2498 A70-30011
- Hot small mass neutron stars cooling time and internal characteristics, discussing evolution based on H-R diagram 15 p2808 A70-32886
- Massive homogeneous star pulsation stability, determining maximum mass by opacity formula 17 p3154 A70-34533
- Stellar mass loss, considering radiation field momentum transfer or coronal heating as mechanisms 17 p3157 A70-34841
- Hydrogen abundance in white dwarfs, discussing inconsistencies in mass and bolometric magnitude models for Sirius and Eri B 17 p3170 A70-35389
- Binary stars dynamical parallaxes, masses, absolute magnitudes and provisional orbits, fitting deduced masses into empirical visual mass-luminosity relations 19 p3531 A70-38896
- Horizontal branch stars evolution based on mass distributions from comparison with giant branch, investigating evolutionary track characteristics during core helium burning 20 p3702 A70-39019
- Emission and escape of light from inside spherically symmetric gravitational mass, examining escape cone 21 p3923 A70-42106
- Pulsars and neutron stars origin and properties, discussing superdense star angular velocity, blackholes, supernovae remnants, rotation, etc 21 p3923 A70-42171
- Polytropic premain-sequence evolutionary tracks and main sequence models of solar composition low mass stars 22 p4104 A70-42993
- Stability conditions for relativistic stars, discussing mass-energy density distribution, Taylor instability, Schwarzschild criterion, Newtonian stellar model, gravitational red shift, etc 22 p4104 A70-42999
- STELLAR MASS EJECTION**
- S Doradus spectroscopic behavior study during minimum and maximum phases suggesting ejected-shell mechanism and premain sequence star classification 04 p0759 A70-15712
- Mass loss role in early spinning of sun without magnetic field braking effect, considering present surface vs core rotating velocity 05 p0913 A70-16569
- Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence 05 p0917 A70-16909
- Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition 07 p1391 A70-20418

Solar wind ejection, analyzing regions of heat conducting fluxes and laminar patterns
08 p1561 A70-21059

Stellar gas ejection processes in corona-interplanetary plasma system, proposing hydrodynamic model with frequent collision region having finite radius
08 p1573 A70-21060

Hydrogen rich material forming planetary nebula ejected from contracted core of evolved star with 20,000 times solar luminosity
10 p1936 A70-23906

Potential flow pertaining to motion of gas surrounding close binary systems generated by orbital motion of stars and matter outflow from stars
10 p1946 A70-24968

Luminous hot stars mass loss attributed to negative effective gravities in outer parts of reversing layers from ionic UV resonance lines
10 p1946 A70-24981

Low mass star evolution from helium burning to white dwarf, describing red giant and mass loss stages in model
10 p1946 A70-24982

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux
11 p2107 A70-25526

OB supergiants atmospheric expansion indicated by medium-dispersion spectra, noting mass loss rate increase with luminosity and effective temperature
11 p2117 A70-26657

Massive hydrogen burning stars evolution with pulsational mass loss based on minimizing pulsational instability degree to specify mass loss rate
15 p2803 A70-32612

Stellar wind effect on accretion, showing critical intensity of particle ejection replacement
18 p3324 A70-37148

Cosmic rays shock from small mass supernovae explosions
19 p3507 A70-38128

Close binary stars evolution, discussing initial parameters effects on mass exchange and orbital period model
21 p3884 A70-40872

Particle acceleration during solar plasma ejection, disregarding magnetic effects on flux
21 p3892 A70-41276

T tauri star mass loss, observing variations in spectral emission line widths
22 p4101 A70-42858

Red supergiants location in H-R diagram, discussing significance of mass loss, rotational mixing and neutrino emission as stellar model mechanisms
24 p4403 A70-45393

STELLAR MOTIONS

Elliptic integrals for plane motion of stars, assuming stationary gravitational potential of stellar system
01 p0174 A70-10138

Velocity field measurements in NGC 5128 galaxy, discussing relative motion between gas and stars and correspondence of emission and absorption lines
01 p0184 A70-10898

Solar motion effects on planetary orbits, discussing preferred coordinate systems of scalar theory of gravitation
01 p0186 A70-11104

Photometric data for white dwarf low luminosity stars listed in color classes and proper motion fields
01 p0187 A70-11331

Lowell Observatory Northern Hemisphere proper motion survey, analyzing preliminary data for low luminosity stars
01 p0187 A70-11332

Radial velocities determined from prism spectrograms for O and B stars in Milky Way field in Scorpius
02 p0369 A70-12062

X ray source Sco XR-1 proper motion using photometry, suggesting association with Scorpius-Centaurus complex of young disk stars
02 p0372 A70-12248

Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field
03 p0564 A70-13227

Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud
03 p0565 A70-13235

Young flare stars in solar vicinity, considering spatial density, kinematic properties and luminosities
03 p0567 A70-13318

Double galaxy systems hypothesis with tidal interaction, presenting data from galaxy internal motion studies
04 p0747 A70-14519

Models of partially relaxed stellar disks in galaxies, discussing gravitational instability and stellar velocities
04 p0748 A70-14588

Stellar systems dynamics, discussing dynamic interactions of point masses, forces in gravitational field, galactic model construction, etc
04 p0754 A70-15353

Semidiurnal lunar tidal wave influence on clock corrections obtained by observations of stellar meridian passages at four localities
04 p0756 A70-15479

Tsl catalog of right ascensions of stars based on photoelectric observations, including clock corrections
04 p0756 A70-15480

Catalog of right ascensions of stars obtained from photoelectric observations, comparing equatorial and zenith region with F6 catalog
04 p0756 A70-15481

Electronic recorder design and operation for mean moments of star transit times
04 p0694 A70-15491

Von Zeipel method applied to stellar three body problem, eliminating short period terms and establishing two integrals of motion
05 p0909 A70-16337

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity
05 p0917 A70-16906

Hot star photogravitational acceleration determined from difference between apex and antipex brightness, noting constant magnitude and direction of principal component of apex force
05 p0918 A70-16914

Galaxy mass loss on billion year time scale, discussing possibility on basis of bound stellar orbits
06 p1139 A70-17472

Stellar velocity distribution function for small mass stars in nonrotating systems
07 p1389 A70-20208

Equivalent line widths of anomalously fast stars of early spectral classes and reference stars, discussing binary nature and radial velocities of OB stars
08 p1569 A70-20828

Instantaneous latitudes observations during stellar transit at Poltava, describing error correction procedure
08 p1488 A70-21153

Latitude observations at Pulkovo, considering star declinations and proper motions
08 p1574 A70-21162

Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field
08 p1580 A70-21660

Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud
08 p1580 A70-21668

Nonlinear stellar density waves in galaxy using gas dynamic equations, assuming one dimensional and steady waves
09 p1762 A70-23073

Positional contact micrometer used to eliminate stars apparent oblique motion in astronomical universal instruments
09 p1681 A70-23342

Radial velocities tabulated for late B-type north and south of equator listed in Catalog of Bright Stars
09 p1763 A70-23452

Magnetic funneling model proposed for accretion of matter onto neutron star to study X ray production during motion through interstellar cloud
10 p1931 A70-23902

Hydrogen 21 cm emission line in Perseus region observed for motion of neutral hydrogen connected with II Per, discussing stellar radial velocity
10 p1937 A70-23944

Zero-point of period-luminosity-relation of Cepheids based on proper motions, radial velocities and photometric data, applying secular parallax method
10 p1945 A70-24964

Dynamic orbital mixing in self gravitating spherical stellar system using water bag model
10 p1945 A70-24965

Potential flow pertaining to motion of gas surrounding close binary systems generated by orbital motion of stars and matter outflow from stars
10 p1946 A70-24968

Radial velocities of supergiant distant stars in southern Milky Way regions of I Sco Association
11 p2113 A70-26465

Stellar hydrodynamic equations for thin disk galaxy derived from collisionless Boltzmann equation moments
11 p2117 A70-26688

Pulsars starquakes frequency relationship to solid crust shear strength based on Ruderman model, considering Crab Nebula
12 p2310 A70-27998

Density wave theory and spiral gravitational field effects in migrating stars orbits and origins in Milky Way spiral arm, using Schmidt model
13 p2495 A70-29801

F-type close stars residual spatial motions and rotational velocity relationship, discussing angular momentum loss
13 p2498 A70-30015

Runaway stars and pulsars near Crab Nebula, discussing binary system explosion and remnant motion
14 p2642 A70-30894

Third integral of stellar dynamics, considering Contopoulos galactic system model separability
14 p2651 A70-31288

Galactic spiral structure effects on residual stellar velocities local distributions
14 p2652 A70-31380

Cepheids distance scale from proper motions data, using maximum likelihood method for period-luminosity relation
14 p2652 A70-31387

Orbit and component velocities of double line spectroscopic binary HR4072 on high dispersion spectrograms, noting mass ratio close to Guthrie relation
16 p2976 A70-33786

Galaxies pairs motions, considering disintegrating, rotational and oscillatory types for comparison with observational data
18 p3322 A70-37133

Stellar magnitude equation from corrected catalog data to determine absolute proper motions relative to galaxies
18 p3323 A70-37145

Peculiar velocities nonisotropic distribution in stationary differentially rotating stellar system based on Boltzmann equation solution
18 p3324 A70-37149

Stellar velocity field in M 51 from image tube spectra
18 p3327 A70-37158

Orion arm local structure and kinematics, discussing outward or inward motion to galactic center and component direction
18 p3329 A70-37177

O and B stars velocity dispersion, considering Oort terms and average residual radial velocity
18 p3330 A70-37188

Stellar isolated disks spiral structure, examining large numbers of point masses self consistent motion in galactic plane
18 p3331 A70-37195

Young star velocity ellipse vertex deviation, discussing formation at right angles to galactic center direction
18 p3331 A70-37199

Stars and stellar gas motions interaction equations, analyzing plasma and gravitation problems
19 p3525 A70-38771

Rotating stellar systems cooperative phenomena, estimating star-star collisions effect on perturbation rate and damping
19 p3525 A70-38772

B stars kinematic parameters determination from radial and tangential velocities
19 p3525 A70-38775

Black hole objects in elliptical galaxies, using stellar light and velocity dispersion distribution in nuclear regions for mass limits
20 p3702 A70-39010

Proper motion evidence for existence of X ray stars associated with Sco X-1 and Cen X-2, indicating formation by neutron stars
21 p3873 A70-40673

Oscillation stability of stars moving along axis of symmetry in galaxy, discussing first order orbit perturbations in general resonance case
21 p3884 A70-40873

Total energies of stars with velocities perpendicular to galactic plane, examining absolute luminosities, galaxy size and local gravitational potential
21 p3890 A70-41162

Stellar system statistical mechanics, discussing collisionless gas in gravitational field, galaxy formation, stellar dynamics, double stars and bounded isothermal spheres
22 p4098 A70-42577

High velocity stars in Large Magellanic Cloud from spectroscopic observations, including A dwarfs and G-K giants
23 p4240 A70-44212

Statistical estimates of precessional corrections, solar motion and galactic rotation from proper motions
23 p4246 A70-44752

STELLAR OCCULTATION

Venusian cloud layer radius, discussing error in determination of occultation level height of regulus by venus
03 p0574 A70-13881

Viking Mars orbiter/lander mission planning, studying sun, earth and star occultations sensitive mission characteristics
06 p1146 A70-18193

Meridian circle observations before and after occultation of ZC 2232 by Neptune on 7 April 1968, correcting ephemeris for star and Neptune
06 p1151 A70-18489

Neptune data from photoelectric observations of 7 April 1968 occultation of BD-17 deg 4388, determining hydrogen dominance and molecular density
14 p2642 A70-30890

Lunar occultation photoelectric measurements, investigating irregularities of occulted stars
17 p3171 A70-35442

Lunar limb tabular position angles accuracy, discussing Watt charts used for star occultation examination
18 p3321 A70-37124

Neptune position errors by meridian observations compared with photoelectric observation of stellar occultation
19 p3518 A70-38008

Watts lunar limb correction charts parameters solution, using grazing and total stellar occultations by moon
20 p3705 A70-39478

Pulse counting photoelectric photometer for lunar occultation recording of stars, discussing design, associated equipment and operation principles
22 p4030 A70-42860

STELLAR RADIATION

NT STELLAR WINDS

IR emission from planetary nebulae, W-R, Of and symbiotic stars, discussing dust hypothesis for IR excess
01 p0173 A70-10039

Light curve and relative dimensions of eclipsing system V338 Herculis, from photoelectric measurements, discussing component stars
01 p0184 A70-10951

Light curves of Algol eclipsing variable AD Herculis and semidetached system relative dimensions from BV photoelectric observations
01 p0184 A70-10952

Polarization of nonspherical plasma emission region in thermal X ray stars
02 p0357 A70-11787

Stellar X ray sources quanta fluxes estimation based on solar coronal emissions analysis
02 p0360 A70-12793

Eta Carinae IR region emission and absorption spectra characteristics in tabular form
03 p0565 A70-13269

Free-bound and free-free continuous emission of hydrogen near Balmer jump in T Tauri star AS209
03 p0566 A70-13315

UV Ceti type flare stars observational and theoretical results related to nebular or chromospheric flare models
03 p0566 A70-13316

Nonperiodic changes in radiation connected with orbital period in eclipsing conventional binaries observed in R Canis Majoris
03 p0568 A70-13326

Stellar X ray effect on nighttime lower ionosphere wave reflection suggested from VLF propagation data
03 p0562 A70-14224

Low resolution spectra of IR stars NML Tau, CIT 3, 6 and 13 considered inadequate for molecular band identification
04 p0748 A70-14591

Stratospheric balloon measurement of near UV from early type stars, discussing gondola, observation method, telescope and photographic recordings analysis
04 p0750 A70-14704

Radiative excitation in planetary and Orion nebulae by solving transfer equations for Lyman line and continuum radiation, using normalized on-the-spot/NOS/approximation
04 p0758 A70-15700

Cepheid variable 1 Carinae light curve from photoelectric observations, calculating periodicities from best fitting Fourier series
04 p0759 A70-15708

Experimental observations of neutrino in collapsing stars in Galaxy, showing detector capability of recording positrons or electrons from antineutrino-neutrino flux induced reactions
05 p0900 A70-15966

Bolometric albedo of main sequence stars with deep convective envelopes in close binary systems derived as function of photometric proximity using entropy invariance
05 p0914 A70-16694

Cameras photogrammetric parameters determined from stellar photographs, considering distortion components, reference points, etc
05 p0852 A70-16921

Pulsed gravitational radiation emitted by dense star clusters
05 p0921 A70-16977

Color difference method for interstellar extinction laws applied to O stars study
06 p1140 A70-17641

Stellar light absorption in optically dense cometary atmospheres
06 p1141 A70-17738

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models
06 p1135 A70-17885

Dynamic effect of radiation from massive protostar showing formation of transparent zone free of dust

about star and gas density decrease until pressure equalization
06 p1148 A70-18400

Effective, brilliance, color and gradient temperature measurements in astrophysics, considering observer bond and thermodynamic nonequilibrium of stars
07 p1386 A70-19597

Earth observations of collapsing star neutrinos and neutrino oscillations in Milky Way galaxy
07 p1371 A70-20331

Stellar interferometer with superposed beams designed for measurements of close binaries, showing point light modulation convenient for photoelectric recording
08 p1493 A70-20564

Red giants and supergiants intrinsic radiation polarization characteristics
08 p1569 A70-20826

Binary star spectrum analysis establishing seasonal and season-to-season variations in He II emission band intensity and shift toward long wave region
08 p1569 A70-20827

Optical to IR conversion in circumstellar dust envelope with spherical symmetry based on optical radiation scattering and absorption by dust
08 p1573 A70-21047

Nonthermal mechanism for high energy radiation and particle emission from X-stars and pulsars
08 p1575 A70-21364

Solar and stellar convection regions and coronas using photospheric models, taking into account molecule formation
08 p1581 A70-21953

Supernovae remnants X ray emission associated with explosion process generating relativistic particles, indicating Crab Nebula as X ray object
09 p1749 A70-21998

Phase variations in polarization parameters of eclipsing binary Z Vul during polarimetric studies for interstellar polarization component
09 p1751 A70-22156

Pulsar mathematical model accounting for pulse width, polarization and spectrum of emitted radiation
09 p1753 A70-22383

Free-free opacity of stellar interiors by ion correlations applied to red giant degenerate cores
09 p1755 A70-22510

Stellar optical spectral power measurement by electronic spectroscopic technique using lasers
09 p1696 A70-22785

Flare star burst energy from radio telescope observations compared with solar flares
10 p1936 A70-23916

Thermal imbalance effect on stellar pulsational stability using linear quasi-adiabatic pulsation theory
10 p1946 A70-24980

Stellar plasma neutrino pair emission, comparing photon neutrino coupling with current current coupling theory and white dwarf evolution
12 p2297 A70-26976

Cold variable stars intrinsic polarization model proposing light scattering in circumstellar dust shells
12 p2307 A70-27865

Diffuse galactic radiation and absorbing clouds luminance illuminated by integral stellar radiation in Milky Way
12 p2307 A70-27866

Extragalactic objects polarization due to synchrotron radiation superimposed on stellar radiation, discussing Seyfert galaxies nuclei
12 p2307 A70-27869

Blue-violet and blue minus violet curves for beta Lyrae derived from analyzing photometric materials
12 p2309 A70-27900

Astronomical Netherlands Satellite /ANS/ for carrying out stellar UV and X ray emission experiments
13 p2506 A70-28989

Stellar light pressure and gravitational force ratios for spherical water, quartz and graphite particles in interstellar space, considering refractive dependence on wavelength
13 p2493 A70-29396

Galactic X ray stars and X ray sources positions, appearance frequency and intensities
13 p2495 A70-29818

Emission resonances at harmonics of electron cyclotron frequency in laboratory plasmas, considering stellar optical radiation
13 p2467 A70-29915

Bright IR stars observed using photometry and spectroscopy, suggesting protostars presence
14 p2641 A70-30880

Cosmic IR radiation sources, discussing galactic and stellar masses
14 p2632 A70-30882

Shilts method applicability to electronic camera for stellar magnitude photometry, studying instrument limitations and errors
14 p2589 A70-31379

Stellar interferometer with superposed beams designed for measurements of close binaries, showing point light modulation convenient for photoelectric recording
15 p2742 A70-32719

Flare stars distribution in Pleiades, discussing flare visual magnitude and frequency
15 p2807 A70-32876

Neutron stars gamma and radio emission in gas accretion state, determining surface gravitational potential
15 p2808 A70-32883

Massive homogeneous star pulsation stability, determining maximum mass by opacity formula
17 p3154 A70-34533

Stellar mass loss, considering radiation field momentum transfer or coronal heating as mechanisms
17 p3157 A70-34841

UV interstellar extinction from comparison of epsilon and zeta Persei, noting graphite features
17 p3159 A70-34877

UV interstellar extinction, examining reddened and unreddened early stars with OAO satellite spectrophotometric scans
17 p3159 A70-34878

Stellar UV and visual continuum observations, discussing recalibration of absolute energy distribution of alpha Lyr to improve model atmospheres
17 p3160 A70-34881

Soft X ray extended source in Cygnus Loop, indicating supernova remnant
18 p3310 A70-37022

Guiding center theory for relativistic plasma embedded in strong magnetic field, discussing connection with pulsars emission dynamics
19 p3479 A70-37596

Pulsar radiation mechanisms, discussing magnetic field topology and current distribution estimation
19 p3518 A70-38022

Astronomical gamma ray emission measurement by balloon-borne spark chamber, presenting results for discrete and diffuse sources and albedo intensities
19 p3501 A70-38088

Cosmic gamma ray sources detection in 100-1000 GeV range by atmospheric Cerenkov radiation from energetic particle showers
19 p3501 A70-38091

White dwarf star circular polarized light, indicating strong magnetic field
20 p3701 A70-39001

X ray star effects on ionospheric LF radio wave field strength, examining absorption and ionization in D region
21 p3873 A70-40668

Sco X-1 extar high energy radiation production, discussing relativistic electron synchrotron emission and magnetic fluctuations spectrum
21 p3878 A70-40709

Hyades giant stars epsilon and gamma Tau strong line profile analysis, obtaining effective temperatures
21 p3885 A70-40931

Stellar polarization measurements in Magellanic Clouds, tabulating position, magnitude, spectral type, percentage polarization and electric vector position angle
21 p3922 A70-41979

Ic class variables long wavelength anomalous radiation, discussing emission from circumstellar dust shell
22 p4094 A70-42934

Intrinsic polarization from Thomson scattering in binary systems with tidal distortions, taking into account gray atmosphere, axial rotation, gravitational interaction and radiative interaction
22 p4103 A70-42988

Diffuse X ray background attributed to X ray emission during supernova early phases
22 p4095 A70-42998

Pulsar emission mechanisms, discussing possible magnetospheric physics role and optical pulse generation
22 p4105 A70-43217

Narrow band IR photometry of star alpha Orion, testing hypothetical correlation of emission peak with starlight-reflecting silicate dust
22 p4105 A70-43229

Model fitting procedure applied to lunar occultation data and models analysis for point sources, close binaries and resolvable stars
24 p4399 A70-45130

Optical quasi-stellar objects radio emission observation for identification with radio sources
24 p4413 A70-46167

STELLAR REFRACTION

U ATMOSPHERIC REFRACTION

U STELLAR RADIATION

STELLAR ROTATION

NT SOLAR ROTATION

Solar /stellar/ wind solutions asymptotic behavior at large distances from central star for equations including effects of rotation and anisotropy
02 p0358 A70-12253

Thermal energies and angular momenta of Hubble galactic sequence using differential rotation and decreasing density stellar system model to test stellar evolution theories
02 p0376 A70-12447

Electric fields in rotating magnetic relativistic neutron stars, analyzing static fields in corotating frame and pulsar emission
02 p0379 A70-12726

Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction

03 p0564 A70-13228

Rotational properties of neutron star models for Crab Nebula energy source, using expressions for angular momentum and rotational kinetic energy

03 p0571 A70-13817

Pulsars observed properties and interpretation based on oblique rotator model for neutron stars

03 p0577 A70-14099

Prescribed circulations within conducting spheres effect on initially prescribed magnetic fields, discussing magnetic field structure in uniformly rotating stars

04 p0758 A70-15694

Hydrostatic equilibrium in self gravitating core of rotating relativistic star, considering Newton and Einstein gravitation theories

05 p0914 A70-16648

Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence

05 p0917 A70-16909

Angular velocities and equilibrium of rotating neutron stars compared with white dwarfs

07 p1376 A70-18911

Supernova remnant luminosity dependence on central star rotation period, deriving parameters for pulsars in Cas A

08 p1570 A70-20897

Statistical analysis of rotation and macroturbulence in early type Ia and Iab supergiants, discussing evolutionary effects

08 p1571 A70-20908

Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction

08 p1580 A70-21661

Book on stellar spectroscopy, covering stellar atmospheric models, rotation, evolution, etc

09 p1756 A70-22640

General relativistic expressions for angular momentum and rotational kinetic energy of slowly rotating stars

09 p1764 A70-23608

Stellar rotation theory applied to evolution of nine solar mass star from main sequence to helium exhaustion

10 p1946 A70-24969

Pulsar properties association with neutron star rotation energy, discussing alternate pulsar theories

12 p2301 A70-27579

Rotating stellar configurations structure consisting of degenerate matter or density dependent temperature describing boundary value problem reduction for Cauchy problem

13 p2494 A70-29518

F-type close stars residual spatial motions and rotational velocity relationship, discussing angular momentum loss

13 p2498 A70-30015

Pulsars theories review, discussing geometrical model picturing pulsar as rotating neutron star with high magnetic field

17 p3164 A70-35117

Meridional circulation velocities in Roche envelope of uniformly rotating star, using nonlocal equation for radiative heat transfer

17 p3171 A70-35560

Pulsars electrodynamics concerning EM emissions, discussing roles of rotation and magnetic field

17 p3172 A70-35591

Energy transfer in convective envelope of rotating star and solar differential rotation, using Lucy gravity-darkening law

18 p3313 A70-36214

Pulsars pulsation mechanism, using neutron star model with oblique rotation axis

18 p3319 A70-37048

Rotating neutron stars, pulsars and cosmic X ray sources relationship, discussing stellar model with mass loss in presence of magnetic field

21 p3874 A70-40678

Pulsars and neutron stars origin and properties, discussing superdense star angular velocity, blackholes, supernovae remnants, rotation, etc

21 p3923 A70-42171

Rotating magnetic star thermal behavior, discussing central nuclear burning stability, homologous changes, cooling, degeneracy and helium flash

22 p4100 A70-42855

Main sequence II stars rapid uniform rotation effect on structure

22 p4101 A70-42859

Stellar evolution, rotation and atmospheric motion, discussing gravity darkening, spectral lines, angular momentum, braking mechanisms and late stars

22 p4102 A70-42970

Stellar rotation - Conference, Ohio State University, Columbus, September 1969

23 p4248 A70-44801

Single normal main sequence stars rotational velocities compared with giant, supergiant, Be, A and metallic line stars and Population II objects

23 p4248 A70-44802

Stellar rotation effect on internal structures, discussing angular momentum steady state distribution for main sequence stars

23 p4249 A70-44803

Nonspherical stellar internal structure, developing method for models with rotational and tidal distortion

23 p4249 A70-44804

Rotational velocities for main sequence stars from spectral type A5 to F9, supporting solid body rotation hypothesis

23 p4249 A70-44806

Be stars rotation, considering emission properties and evolutionary state of main sequence

23 p4249 A70-44807

Rapidly rotating B and Be stars interior evolution models, considering mass and radiation pressure

23 p4249 A70-44808

Stellar rotation angular momentum loss in premain sequence convective phase, discussing polytropic structure, formation time and velocity changes

23 p4249 A70-44809

Stellar rotation effects on atmospheres of early type main sequence stars, using models for surface gravity and temperature variations

23 p4249 A70-44810

Stellar abundance determination, considering rapid uniform rotation effects on equivalent spectral line widths

23 p4250 A70-44811

Rotating stellar atmospheric models for middle and late A star masses, emphasizing Altair observed and predicted energy distribution

23 p4250 A70-44812

Early type Ia and Iab supergiant stars macroturbulence and rotation, investigating spectral line broadening, mass loss and angular momentum

23 p4250 A70-44813

Close binary star components axial rotation, considering synchronism, angular velocity and mass exchange

23 p4250 A70-44814

Upper main sequence and close early type binaries evolution by fission of rapidly rotating protostars

23 p4250 A70-44815

Synchronous close binary stars primary component structure, using rapidly rotating polytropic method

23 p4250 A70-44816

Binary star axial rotational correlation, determining coupling between components spin angular momenta

23 p4250 A70-44817

Algol type semidetached eclipsing binaries main sequence components rotational velocities, determining deviations from synchronism

23 p4251 A70-44818

Eclipsing binary stars minima variations related to orbit perturbations and rotational angular momentum of component interiors

23 p4251 A70-44819

Stellar rotational velocities in open star clusters, noting evolutionary expansion, tidal coupling in binaries and Ap stars magnetic braking

23 p4251 A70-44820

Spectral line width distributions in main sequence stars, emphasizing B2 to A2 range rotational velocities with Maxwellian distribution

23 p4251 A70-44821

A type stars rotation, examining UVB color and rotational velocity relationship, spectral classification and spectroscopic binaries

23 p4251 A70-44822

Stellar axial rotational velocity statistical analysis to break-up limit, obtaining velocity distribution approximation from observed histogram

23 p4251 A70-44823

UV Cet type flare star rotational velocity upper limits from H alpha emission line width in chromospheres

23 p4251 A70-44824

Deutsch period vs line width relation for periodic Ap stars, determining rotational velocities with rigid rotator model

23 p4251 A70-44825

Surface field model of rotating magnetic stars involving uniformity and Eddington-Sweet circulation suppression

23 p4251 A70-44826

Rotating magnetic star dynamic evolution, discussing magnetic and rotation axes inclinations for oblique rotator model

23 p4252 A70-44827

Be star rotation dynamics phenomenon, discussing time variations on main sequence scale

23 p4252 A70-44828

Pulsar radiation polarization, examining mean pulse profiles, frequency, position angle and rotational effects

24 p4403 A70-45404

Corotating magnetic field model of pulsar, using electromagnetic field equations of dipole radiation in low density plasma

24 p4413 A70-46137

Differentially rotating stellar interiors nonaxisymmetric perturbation stability in toroidal and poloidal magnetic fields

24 p4413 A70-46165

STELLAR SPECTRA

NT SOLAR SPECTRA

Stellar emission line spectra from comet-like nebulae, discussing stellar position instability and shell movements

01 p0174 A70-10198

Nova Delphini 1967 emission line spectrum at 8400-9600 A, using diffraction spectrograph attached to astronomical telescope

01 p0182 A70-10675

Red subluminescent stars and high UV excess stars in region between main sequence and white dwarfs, tabulating observations of stellar color and magnitude

01 p0182 A70-10795

Monk-Gillieson convergent beam dispersion method applied to rocket-borne photoelectric spectrophotometer for far UV stellar spectra observation

01 p0900 A70-10904

M dwarf stars spectroscopic, spectral and photometric parallaxes calibration based on trigonometric measurements

01 p0188 A70-11333

Faint, metal poor, subluminescent and red degenerate stars occurrence and properties, considering spectra of candidate degenerates

01 p0188 A70-11338

White dwarf spectra interpretation based on model atmosphere method, discussing chemical composition, low luminosity high pressure atmospheres, electron density, etc

01 p0189 A70-11340

Stellar spectral lines fine analysis methods compared for curves of growth, line profiles and related contribution curves in model atmospheres for Procyon and sun

02 p0343 A70-11906

MK stellar spectral types in Monoceros, analyzing spatial distribution and interstellar absorption using slit spectrograms

02 p0369 A70-12063

Galactic interstellar absorption lower limit in selected Area 19 determined from Stellar spectra densities, using Schmidt camera

02 p0370 A70-12073

IR spectra of four carbon stars and Sirius obtained with Michelson interferometer, indicating diatomic carbon and CO bands

02 p0372 A70-12252

NH bands in stellar spectra by visual inspection of spectrograms, noting abundance of N in normal and strong CN stars

02 p0379 A70-12708

Beta Lyr spectral and brightness characteristics long period variations related to orbital motion perturbations

03 p0564 A70-13229

Orbits computation from double line spectra of eclipsing binaries 31 Men and 9 Cha, emphasizing systemic velocity and mass ratio derivation method

03 p0565 A70-13268

Multicolor photometry of Orion flare stars in U, B, V and R, constructing diagrams confirming flare stars scattering about main sequence

03 p0567 A70-13317

U Geminorum type variables properties, orbital period changes in close binaries and origin of outbursts

03 p0567 A70-13322

Late stars spectral characteristics, verifying criteria for spectral classification and anomalous spectra determination

03 p0569 A70-13424

Peculiar emission object with emissions narrower and with lower ionization lines than cool Wolf-Rayet stars

03 p0574 A70-13933

Periodic clustering of red shift values in quasi-stellar and unusual objects spectra, using power spectra

03 p0577 A70-14217

Stellar atmosphere high dispersion spectroscopy, discussing limitations for stars over 17,000 K

04 p0746 A70-14508

IR spectra of M stars and alpha Tau obtained with Michelson interferometer, observing molecular features and water vapor absorption

04 p0747 A70-14548

L-alpha absorption equivalent width measurements in UV spectra of beta-one, delta and pi Scorpii for interstellar hydrogen densities

04 p0748 A70-14586

IR colors and optical and IR spectra of irregular M variable star and bright OH source VY CMa indicating supergiant classification

04 p0749 A70-14592

Variable object BL Lacertae flux measurements using Schmidt telescope photography and radio study, comparing results with quasar

04 p0759 A70-15711

S Doradus spectroscopic behavior study during minimum and maximum phases suggesting ejected-shell mechanism and premain sequence star classification

04 p0759 A70-15712

SS Cygni outburst origin in G type star indicated from radial velocity variations of hydrogen absorption lines during rising light

05 p0915 A70-16695

Color difference method for interstellar extinction laws applied to O stars study

06 p1140 A70-17641

Equivalent line widths of anomalously fast stars of early spectral classes and reference stars, discussing binary nature and radial velocities of OB stars

08 p1569 A70-20828

Titanium monoxide absorption bands in class M stars spectra, estimating band head intensities

08 p1569 A70-20829

Cygnus and Perseus symbiotic stars as binaries, studying radial velocities, relative emission line intensities and energy distribution

08 p1569 A70-20830

Von Zeipel 1128 O star spectrum analysis, discussing mass, He/H ratio, metal abundances, etc

08 p1571 A70-20913

Beta Lyr spectral and brightness characteristics long period variations related to orbital motion perturbations

08 p1580 A70-21662

Supernovae remnants evolution, properties and galactic distribution, discussing criteria for catalog listing and remnants as X ray sources

09 p1749 A70-21990

Water vapor emission detection from IR stars, discussing radial velocities of microwave lines

09 p1756 A70-22523

Book on stellar spectroscopy, covering stellar atmospheric models, rotation, evolution, etc

09 p1756 A70-22640

Planetary faint nebulae containing northern Milky Way portion in direction of galactic anticenter observed with spectral Schmidt camera, noting stellar appearance

09 p1761 A70-23051

Cosmic radio waves discrete sources spectra measured in decametric wavelength range, discussing wave generation and absorption

09 p1762 A70-23189

Line profiles and equivalent widths from Si II, Mg II, Ni II and Fe II spectra of shell star zeta Tauri

10 p1936 A70-23941

G and K stars classification /spectral type and luminosity class/ by narrow band photometry

10 p1937 A70-23945

Star 15 Vulpeculae metal lines analyzed by growth curve differential method

11 p2113 A70-26464

Stellar and planetary IR spectra from spectrometer with rotating circular variable thickness interference filter

11 p2113 A70-26468

Stellar atmosphere and shell models in spectral range AO-G5 for studying stellar structures dependence on chemical composition

11 p2115 A70-26582

Densities and extents of absorbing clouds in open cluster NGC 7086 determined from photometry and spectral classifications of stars

11 p2116 A70-26587

Spectral classification of stars from unbroadened spectra recordings possible when comparing optical depths of lines

11 p2116 A70-26589

Calcium H and K lines core residual intensities in stars with quiet and active chromosphere, suggesting activity due to thermal gradient

12 p2303 A70-27702

Spectra, luminescence and gas dynamic effects in variable stars, discussing nonthermal theory to explain continuous emission

12 p2306 A70-27857

Comet-like nebulae, describing brightness and spectral characteristics of variable stars in nebulae

12 p2307 A70-27863

Star eta Arietis spectra analyzed for Fe and V abundance

13 p2487 A70-28715

Star HBV 475 emission spectra in near IR due to H, He I, O and Ca II, confirming symbiotic character

13 p2495 A70-29641

Rossland stellar opacity calculation allowing for photon absorption in spectral lines using non-relativistic dipole approximation

13 p2495 A70-29752

Stellar intensity interferometer for close binaries and emission line stars, investigating gamma-two Velorum

14 p2640 A70-30733

H II region stellar color anomaly attributed to interstellar extinction

14 p2641 A70-30879

OH radio emission from IR stars, discussing spectra, polarization properties and red giant star model with expanding atmosphere

14 p2641 A70-30881

Rocket spectroscopy of zeta puppis, identifying multiplets of stellar and interstellar origin included in atmospheric models

14 p2641 A70-30883

Ap star kappa Cancr model atmosphere analysis based on observed energy distribution and hydrogen line profiles

14 p2652 A70-31381

Metal to hydrogen ratio for sun, Hyades and F-G stars based on photoelectric measurements of weak metal lines

14 p2652 A70-31388

Papers on spectroscopic astrophysics covering stellar spectral classification, growth curves, hydrogen lines, stellar spectra, interstellar space, stellar rotation, binary stars, etc

15 p2796 A70-31499

Two dimensional quantitative spectral classification of F-G5 stars, using meniscus telescope with preobjective prism at Abastuman observatory

15 p2797 A70-31613

Spectral classification of relatively bright stars in near UV based on moderate and low dispersion spectra including F, G and K stars

15 p2797 A70-31614

Spectral classification and continuous spectrum photometry of weak late stars in visual and near UV regions, noting anomalous C star in CH Cyg

15 p2797 A70-31615

Near Galactic plane condensations of spectral A stars in HD catalog, investigating by Monte Carlo method and Poisson formula

15 p2797 A70-31616

Energy distribution in continuous spectrum of star MWC 334 from spectrophotometric observations

15 p2808 A70-32888

CH Cygni irregular light variations and spectrum peculiarities, considering upper atmosphere perturbation by variable hot satellite

15 p2809 A70-32904

Book on stellar spectra theory covering line absorption coefficient expressions, radiative transfer, line source function, line broadening, etc

16 p2974 A70-33270

Orbit and component velocities of double line spectroscopic binary HR4072 on high dispersion spectrograms, noting mass ratio close to Guthrie relation

16 p2976 A70-33786

Spectrum of bright IR object VV Canis Majoris, noting absorption feature attributed to SiO molecules in stellar atmosphere

17 p3154 A70-34540

Hyades stars between F4 and K5, measuring chromospheric H and K emission lines dependence on bolometric luminosity

17 p3157 A70-34832

UV stellar spectra and related ground based observations - Conference, Luntenen, Netherlands, June 1969

17 p3158 A70-34876

UV stellar spectra absorption, considering silicon and carbon opacity effect on Balmer discontinuity and Paschen continuum

17 p3159 A70-34880

Orion stars far UV intensities, considering photometric data and electronographic spectra from rocket sounding

17 p3160 A70-34882

Stellar UV spectra observation methods, discussing objective spectrograph, scanning spectrometer system with telescope and grating cameras

17 p3160 A70-34885

Rocket spectroscopy of zeta Puppis below 1100 A

17 p3160 A70-34886

Early-type star spectral scan analysis from OAO observation, comparing model atmosphere calculations

17 p3161 A70-34887

Red giant star chromospheric activity, discussing Balmer absorption lines and emission lines

17 p3161 A70-34889

Stellar UV spectral line profiles interpretation, using atmospheric models and line formation theory

17 p3161 A70-34890

Symbiotic stars UV spectrum, discussing molecular fluorescence phenomena

17 p3161 A70-34891

Lyman alpha absorption by interstellar neutral hydrogen observed in O and B stars UV spectra

17 p3162 A70-34898

G and K stars spectral classification using narrow band photometry

17 p3169 A70-35380

H-R diagram stellar spectra interpretation using model atmospheres describing temperature, gravity and chemical composition

17 p3169 A70-35381

Star AG Draconis spectrum in visible range by meniscus prismatic camera, deriving energy distribution

18 p3315 A70-36575

Arcturus Co bands, examining equivalent widths, rotational lines and 12C/13C ratio

18 p3318 A70-37015

P Cygni line profiles emission and absorption components rectification procedure, considering errors

18 p3321 A70-37123

Spiral galaxy NGC 6946 structure and stellar associations distribution, indicating no relation between color and magnitude and distance from center

18 p3327 A70-37160

O type stellar clusters hydrogen line observation revealing associated gas clouds

18 p3328 A70-37172

Galactic spiral structure relation to local stellar distribution, discussing OB associations, galactic cluster, WR stars, cepheids, and common stars in sun neighborhood

18 p3329 A70-37176

Water vapor and OH spectra overlap, investigating association of galactic OH masers and water emission sources with IR stars

19 p3444 A70-37571

Am and Ap stars metallic absorption lines, determining photometrical indices correction

19 p3523 A70-38689

Light curves bumps properties of Population I cepheids in Magellanic Clouds, Milky Way galaxy and M 31 as function of period

19 p3523 A70-38691

Spectrum analysis of P Cygni star AG Carinae and derivation of mean radial velocities for different epochs

19 p3523 A70-38694

Dwarf Me stars flare spectra, examining hydrogen recombination layer and impulse heating of photosphere

20 p3702 A70-39013

X ray sources spectra, discussing distribution, supernova remnants, pulsars nebulae, optical spectra and general characteristics

21 p3873 A70-40670

OPL astrolabe catalog corrections, discussing Dannon prototype, color-magnitude effect, time and latitude values

21 p3887 A70-41111

Gravity darkening of tidally and nonuniformly rotating Roche components of close binary systems, calculating surface temperature and spectral distributions

21 p3888 A70-41120

Nova Vulpeculae 1968 Number 1 medium dispersion spectra, using radial velocity line identification and line profile reductions

21 p3889 A70-41152

Nova HR Delphini 1967 UVB photoelectric photometry, examining absolute magnitude, distance, response curves and spectra

21 p3889 A70-41154

Southern objective prism plates B stars with strong neutral He I absorption lines

21 p3890 A70-41160

BM Orionis eclipsing binary spectra, determining radial velocity curve

21 p3890 A70-41161

Radiation line transfer in Wolf-Rayet envelopes with rapid radial expansion by escape probability method, including radiation effect from stellar core

21 p3892 A70-41248

Color-color diagram of M92, computing synthetic stellar spectra for line absorption effect

21 p3892 A70-41249

Quark in stars, discussing electronic transitions and UV spectral lines

21 p3921 A70-41975

Stellar IR spectra for types A0 to M7, using Mertz type Michelson interferometer as Fourier transform spectrometer

21 p3922 A70-41980

Blue stellar objects emission at 9.5 and 3.5 mm, suggesting quasi-stellar objects with small intrinsic radio luminosity

21 p3922 A70-41993

Rossland stellar opacity calculation allowing for photon absorption in spectral lines using non-relativistic dipole approximation

21 p3923 A70-42072

Abundance ratios of metallic line star 15 UMa, using absorption spectrophotometric observations

21 p3926 A70-42270

Beta CMa variable star HD 43818 spectral observations, discussing line profiles and radial velocities

22 p4100 A70-42853

T tauri star mass loss, observing variations in spectral emission line widths

22 p4101 A70-42858

Computer synthesis of completely eclipsing binary light curves including limb darkening and simulated observational errors

22 p4103 A70-42990

Circumstellar dust cloud model of spectral distribution and anomalous excess emissions in IR T Tauri and red giant stars coincident with photometric measurements

23 p4239 A70-43868

Stellar spectra above horizontal branch in globular clusters, discussing stellar evolution, composition and structure

23 p4246 A70-44755

Rotational velocities for main sequence stars from spectral type A5 to F9, supporting solid body rotation hypothesis

23 p4249 A70-44806

Stellar abundance determination, considering rapid uniform rotation effects on equivalent spectral line widths

23 p4250 A70-44811

Early type Ia and Ia^b supergiant stars macroturbulence and rotation, investigating spectral line broadening, mass loss and angular momentum

23 p4250 A70-44813

Spectral line width distributions in main sequence stars, emphasizing B2 to A2 range rotational velocities with Maxwellian distribution

23 p4251 A70-44821

A type stars rotation, examining UVB color and rotational velocity relationship, spectral classification and spectroscopic binaries

23 p4251 A70-44822

Neutron star or defunct pulsar accretion of interstellar matter, discussing effects on total luminosity and radiation spectrum

24 p4403 A70-45397

Nitrogen abundance of subgiant nu Indi from observed and computed stellar spectra of CN violet bands

24 p4404 A70-45411

Southern early stars away from galactic plane, reporting magnitudes and colors on UBV system and MK spectral classifications

24 p4404 A70-45412

Gamma Cas star time and spectra observations, examining emission line profile variations and envelope and stellar model

24 p4404 A70-45415

White dwarf stars continuum circular polarization as function of time and wavelength, emphasizing magnetic star search

24 p4410 A70-45776

Low temperature stars SiO IR spectral band identification based on rotation-vibration spectrum calculation

24 p4411 A70-45777

G8, IV subdwarf 31 Aql spectrum at 4000-6600 Å, discussing Ba II 4554 Å, G and CN bands and spectral lines

24 p4414 A70-46329

STELLAR SPECTROPHOTOMETRY

Photometric data for white dwarf low luminosity stars listed in color classes and proper motion fields

01 p0187 A70-11331

M dwarf stars spectroscopic, spectral and photometric parallaxes calibration based on trigonometric measurements

01 p0188 A70-11333

Intermediate band four color photometry of white dwarfs, considering hydrogen line blocking and H delta line

01 p0188 A70-11335

Lund astronomical observatory, describing Cassegrain-Nasmyth reflector and attached electrophotometer for stellar measurements

02 p0275 A70-12061

Photoelectric UVB photometry of stars in Carina, Vela and Centaurus, giving standard connection sequences for continued photometry

02 p0370 A70-12074

UV photometry of stars and galaxies from OAO-2, discussing instruments and observational results

02 p0378 A70-12580

Multicolor photometry of Orion flare stars in U, B, V and R, constructing diagrams confirming flare stars scattering about main sequence

03 p0567 A70-13317

Color photoelectric study of eclipsing binary RY Gemini for determining orbital elements and structure

04 p0754 A70-15217

Identification of lines in Mohler photometric atlas of IR solar spectrum wavelengths

05 p0910 A70-16427

Delay in photoelectric recording of transit of stars, considering stellar image brightness distribution and temperature

05 p0918 A70-16920

Stellar systems observations using photometers with long narrow slits in identical telescopes

05 p0852 A70-16922

Magellanic Cloud cepheids two color light curves obtained by photoelectric photometry, discussing reddening

07 p1380 A70-19259

Double and multiple stars components magnitude differences tabulated based on visual and photometric observations

08 p1574 A70-21163

Hypersensitization of IR films for use in stellar photometry, discussing laboratory and astronomical tests

09 p1673 A70-22158

Stellar spectrophotometry by rocket-borne equipment, describing instrumentation, rocket assembly, calibration and spectra obtained

09 p1755 A70-22505

Stellar optical spectral power measurement by electronic spectroscopic technique using lasers

09 p1696 A70-22785

Wide field stellar astronomical ESO project, reviewing application of earth orbiting spin stabilized satellites and OAO

09 p1767 A70-23435

G and K stars classification /spectral type and luminosity class/ by narrow band photometry

10 p1937 A70-23945

Michelson interferometer usable in space for stellar spectroscopy, noting compactness achieved through mirror area reduction

10 p1887 A70-24032

Eclipsing binary beta Aurigae effective temperature and surface gravity determination from photoelectric spectrum and abundance analyses

10 p1938 A70-24100

Algol variable RV Ophiuchi photoelectric observation in B and V, representing light curve characteristics by gas stream model

10 p1945 A70-24967

Blue-violet and blue minus violet curves for beta Lyrae derived from analyzing photometric materials

12 p2309 A70-27900

Stellar observations in near UV by camera having two color photometric slides, discussing atmospheric models

13 p2498 A70-30013

Bend /near 4300 Å/ in Nandy interstellar extinction rules effect on Geneva Observatory photometric index in seven colors

13 p2498 A70-30014

Bright southern Cepheids UVB observations, discussing blue companion effect on two color plot

14 p2639 A70-30726

Narrow band photometry calibration, using model stellar atmospheres and laboratory data for high resolution synthetic spectra of G and K giant stars

14 p2639 A70-30728

Three color photometry of RW Auriga stars, discussing UVB curves, H-R diagram and UV emission excess

15 p2797 A70-31612

Spectral classification and continuous spectrum photometry of weak late stars in visual and near UV regions, noting anomalous C star in CH Cyg

15 p2797 A70-31615

Report to COSPAR on Netherlands space research /1969/ including solar and stellar X radiation and UV spectrophotometry, cosmic ray measurements, satellite geodesy, etc

15 p2830 A70-31719

Luminosity criteria in O stars via narrow band photoelectric photometry suggesting VI Cygni proximity

15 p2807 A70-32804

AG Peg brightness variations by three color photoelectric photometry, discussing orbital motion of cold component

15 p2807 A70-32878

Long period variable stars light polarization as function of brightness and wavelength, discussing molecular scattering and nonthermal emission

15 p2808 A70-32879

Energy distribution in continuous spectrum of star MWC 354 from spectrophotometric observations

15 p2808 A70-32888

Optical heterodyne interferometer for stellar diameter measurements

16 p2925 A70-33025

Book on stellar spectra theory covering line absorption coefficient expressions, radiative transfer, line source function, line broadening, etc

16 p2974 A70-33270

Stellar UV photometry using telescope experiment in OAO

17 p3160 A70-34883

Stellar UV spectra observation methods, discussing objective spectrograph, scanning spectrometer system with telescope and grating cameras

17 p3160 A70-34885

Rocket spectroscopy of zeta Puppis below 1100 Å

17 p3160 A70-34886

G and K stars spectral classification using narrow band photometry

17 p3169 A70-35380

Spectrophotometric solar brightness temperature measurements in far IR, discussing collision type spectral variation of absorption coefficient

18 p3319 A70-37056

Satellite-borne UV TV system for photometric investigations of UV stars

19 p3428 A70-38456

Intermediate band photometry of companions to RR Lyrae variables, identifying AP Ser K line excess subdwarf

21 p3892 A70-41187

Early B stars photometric examination of variable spectral lines, discussing beta Cephei stars possibility

21 p3922 A70-41981

Open star h and chi Persei cluster four color and H beta photoelectric photometry, discussing interstellar reddening, ages and distances

21 p3922 A70-41982

Be stars hydrogen emission lines widths measurement

22 p4101 A70-42867

Stellar ring 274 reality confirmed by photometric measurements of OB member stars, determining variable shell star P Cygni location

22 p4101 A70-42868

Narrow band IR photometry of star alpha Orion, testing hypothetical correlation of emission peak with starlight-reflecting silicate dust

22 p4105 A70-43229

High dispersion stellar spectroscopy with echelle grating, discussing instrument design, operation and performance

22 p4040 A70-43613

Photometric search for metal deficient stars, using objective prism plates and four color Stromgren technique

22 p4109 A70-43736

High velocity stars in Large Magellanic Cloud from spectroscopic observations, including A dwarfs and G-K giants

23 p4240 A70-44212

Omicron Ceti /Mira/ spectrophotometry before, during and after 1969 maximum, noting TiO bandwidth variations

23 p4242 A70-44294

Integrated data processor-operation controller for stellar TV photometer systems in spaceborne observatory, considering limited channel transmission capacity

23 p4167 A70-44649

Astronomical observations from outside terrestrial atmosphere, discussing vehicles and equipment for solar and stellar research, rocket and balloon data, etc

23 p4257 A70-45043

Of stars mean spectrophotometric gradients and Balmer jump data with corrections for interstellar absorption

24 p4409 A70-45632

Hercules 89 supergiant abnormal IR radiation flux originating in circumstellar shell of solid particles radiating at observed long wavelengths

24 p4410 A70-45772

STELLAR STRUCTURE

Convective red dwarfs Kr 60 A and 60 B structure and stability taking into account electrostatic interactions between gas particles

01 p0188 A70-11337

White dwarf spectra interpretation based on model atmosphere method, discussing chemical composition, low luminosity high pressure atmospheres, electron density, etc

01 p0189 A70-11340

Collective interactions effect on electron scattering opacity in stellar interiors, using Debye-Huckel radial distribution function and neglecting collisions

02 p0364 A70-11789

Isophote flattening functions of elliptical galaxies including identification of giant and dwarf galaxies

02 p0377 A70-12449

Physical conditions of stars in presupernova stage for type II supernovae with outburst expected due to Fe-He transition in core, confirming lower mass limit

03 p0566 A70-13314

Binary system Nova WZ Sge model with nonnegligible secondary component contribution to total light explaining W UMa type light curve

03 p0568 A70-13324

Hypotheses for symbiotic stars nature, emphasizing binary with late type giant and hot small star components

03 p0568 A70-13325

Color photoelectric study of eclipsing binary RY Gemini for determining orbital elements and structure

04 p0754 A70-15217

Solar structure models for neutrino flux prediction compared with solar structure, suggesting modification in solar and stellar evolution calculations

05 p0906 A70-15895

Time variation of gravitational constant on structure of central solar region and neutrino luminosity

05 p0899 A70-15952

Proton-proton cycle in star interior, calculating isotope concentrations, reaction duration and energy release as function of temperature and chemical composition

05 p0900 A70-15972

Relativistic stellar structure equations for spherically symmetric configurations in slow motion, using Einstein gravitational field and conservation equations

05 p0912 A70-16454

Variable stars, discussing equation of motion for envelope structure properties and determining oscillation energy change rate from linear theory

06 p1138 A70-17309

Hydrostatic equilibrium solutions of internal structure of neutron stars using Brueckner equation

06 p1139 A70-17541

Granular and intergranular region solar magnetic field difference detection attempt from line profiles, noting equivalent width increase in ionized Cr line

06 p1142 A70-17989

Dense pulsating stellar core structure model for pulsars, discussing catastrophic collapse mechanism

07 p1380 A70-19278

Book on physics of stellar interiors covering radiant energy, mechanical equilibrium, mass density distribution, nuclear reactions, etc

08 p1568 A70-20758

Stellar atmosphere and shell models in spectral range AO-G5 for studying stellar structures dependence on chemical composition

11 p2115 A70-26582

Linearized perturbation theory for quasi-static equilibrium stellar interior models, obtaining correction through bidirectional quadrature

11 p2118 A70-26709

Neutrino astronomy for processes in stellar interiors, emphasizing thermonuclear reactions in sun and main sequence stars

13 p2490 A70-28947

Rotating stellar configurations structure consisting of degenerate matter or density dependent temperature describing boundary value problem reduction for Cauchy problem

13 p2494 A70-29518

Pulsars crust plastic deformation leading to rotation damping, higher magnetic moments and rarer starquakes

14 p2638 A70-30672

Rocket spectroscopy of zeta puppis, identifying multiplets of stellar and interstellar origin included in atmospheric models

14 p2641 A70-30883

Overstable convection formation of semiconvective zones in massive stars, noting Schwarzschild and Harm models

14 p2652 A70-31386

Shock wave front propagation instability in decreasing density medium, applying to stellar structure

16 p2890 A70-33200

Outer corona during 7 March 1970 eclipse, discussing distance dominance of K corona

16 p2977 A70-33842

Book on interpretation of spectra and atmospheric structure of cool stars covering line identification, dissociative equilibrium, opacity, chemical composition, carbon stars, etc

16 p2978 A70-33962

Stellar thermal and vibrational energy losses due to URCA shells in interiors

18 p3310 A70-35935

Solar corona structure on 22 September 1968 using radio astronomical and optical eclipse data

18 p3315 A70-36607

Solar core opacity, investigating individual heavy elements influence and effect of changes in abundances

18 p3317 A70-37005

Soviet book on variable stars covering properties, evolution, structure, methods of investigation, etc

19 p3520 A70-38397

Stellar interiors and cosmic He abundance observations, discussing B stars, sun galactic and globular clusters, planetary nebulae, interstellar medium, novae, etc

20 p3706 A70-39931

Neutron stars, discussing equations of state and stellar interiors, models, atmosphere, cooling, vibration, rotation and magnetic fields

20 p3706 A70-39932

Sodium behavior in young and old late type stars, examining relation to iron abundance in F, G and K dwarf and giant stars

21 p3887 A70-41114

Beta Cephei star discovery criteria, examining mu-mechanism theory by He and N overabundances, far UV flux, spectral line width and binary character

21 p3890 A70-41159

Radio observations of limb darkening and structure of solar corona at 80 MHz

21 p3890 A70-41177

Position scatter of 80 MHz sources of type 3 solar bursts reflecting outer corona structure

21 p3891 A70-41182

Book on astrophysics and stellar structure covering physical characteristics, atmospheres, interiors and evolution

21 p3919 A70-41792

Stellar envelope physical structure studied to solve equilibrium equation, applying results to stellar model

22 p4097 A70-42545

Main sequence II stars rapid uniform rotation effect on structure

22 p4101 A70-42859

Thermodynamic parameters of stellar matter in electronic degeneration conditions, discussing energy balances discrepancies

22 p4106 A70-43260

Stellar rotation effect on internal structures, discussing angular momentum steady state distribution for main sequence stars

23 p4249 A70-44803

Nonspherical stellar internal structure, developing method for models with rotational and tidal distortion

23 p4249 A70-44804

Synchronous close binary stars primary component structure, using rapidly rotating polytrope method

23 p4250 A70-44816

Nonspherical stars thermal stability, considering solar rotational models and oblateness problem

23 p4252 A70-44833

Solar interior differential rotation, developing angular velocity distribution equilibrium model

23 p4252 A70-44834

Giant cell regular structures in solar atmosphere, using magnetic synoptic charts of solar activity

24 p4400 A70-45305

Neutron star crust conductivity, obtaining electrical conductivity formula for outer kilometer

24 p4403 A70-45394

Cool star atmospheric structure, discussing models with and without graphite particle inclusion opacity

24 p4410 A70-45765

Stellar structure in advanced phases of evolution, considering mixing between hydrogen-rich envelope and core through surface convection zone

24 p4412 A70-46102

Main sequence and giant stars atmospheric structure models, noting metal deficiency effects

24 p4413 A70-46159

Stellar surface and solar system light element abundances, explaining formation by energetic proton flux nucleosynthetic effect

24 p4398 A70-46163

Differentially rotating stellar interiors nonaxisymmetric perturbation stability in toroidal and poloidal magnetic fields

24 p4413 A70-46165

STELLAR WINDS

Solar/stellar/ wind solutions asymptotic behavior at large distances from central star for equations including effects of rotation and anisotropy

02 p0358 A70-12253

Solar wind-induced torque calculated considering special and general relativistic effects, extending method to pulsar rotational model

04 p0739 A70-14593

Stellar wind theory based on spherically symmetric isothermal and stationary stellar atmosphere with non-negligible gravitational potential

09 p1747 A70-23605

Relativistic solutions to model stellar wind, discussing equation of radial momentum

17 p3153 A70-34530

Stellar wind effect on accretion, showing critical intensity of particle ejection replacement

18 p3324 A70-37148

Stellar wind theory and related steady radial flows, discussing gravitating point mass, heat conduction, shocks, viscosity, outflows and inflows

20 p3706 A70-39928

STELLARATORS

Trapped particle vibrations stability during quasi-neutral plasma disturbance due to centrifugal drift in stellarator electric field

08 p1555 A70-21982

Plasma stabilizing effect of shear and magnetic flux minimum in asymmetric conductors and currents in helical stellarator winding

11 p2088 A70-25711

Plasma equilibrium in stellarator type magnetic trap /vintotron/ with magnetic configuration created by strong longitudinal field

12 p2277 A70-27313

Plasma source design using stellarator type magnetic field, eliminating electron beam and electrode produced impurities

21 p3858 A70-41713

Stochastic heating of plasma in toroidal trap /stellarator/, showing discharge ignition potential dependence on microwave oscillator frequency

22 p4084 A70-43394

Inertia effect on low density plasma losses in toroidal MHD equilibrium in model stellarator field

24 p4383 A70-45115

Plasma jet motion stability in axial magnetic field of stellarator diverter and solenoid

24 p4386 A70-45660

STENCIL PROCESSES

Printing, electro etching and vacuum deposition stencil methods for preparing moire grids

19 p3432 A70-38721

STEP FUNCTIONS

Uniaxial strain pulse propagation through various materials loaded uniformly with step function pressure by gas dynamic shock wave reflection

09 p1783 A70-23449

Piezoelectric annular disk transducer mechanical response to step voltage input with prescribed temperature field

14 p2588 A70-31228

Pulse characteristics received by loop antenna in field of second antenna excited with step functions, calculating radiation characteristics

16 p2871 A70-32961

Electric and magnetic field components of step function excited electric dipole immersed in dissipative homogeneous medium with specified conductivity and dielectric constant

20 p3589 A70-40464

Step and ramp input functions and pursuit and compensatory display modes effects on tracking performance

21 p3767 A70-40753

Dual mode suboptimum minimum time control of high order systems with negative roots and step displacement inputs, using simplified computer switching

21 p3801 A70-40756

STEPS

Incompressible turbulent boundary layer and separation flow into forward facing normal step, considering step heights and boundary layer thickness

01 p0066 A70-11133

Step tracking in normal human subjects, studying muscle system around ankle joint

10 p1824 A70-23898

Backward facing separated step boundary layer flow at Mach 2.25 investigated by diffraction grating interferometer and color schlieren technique

13 p2343 A70-29898

STEREOCHEMISTRY

Isomeric 1-phenylheptenes mass spectra, investigating electron impact induced rearrangements of double bond

09 p1631 A70-23401

Stereospecificity and reaction rate of enzymatic hydrolysis of racemic substrate by pepsin determined by nuclear magnetic resonance spectroscopy

12 p2181 A70-27472

Sterically hindered aryldiazonium salts absorption spectra and quantum yield data interpretation, considering photochemical properties

12 p2182 A70-28300

Electron impact promoted phenyl migration of trans phenylcyclohexane, considering mass spectrometry and stereochemistry

14 p2544 A70-30189

Optically active amino acids synthesis by reduction of Schiff bases with sodium borohydride

17 p3041 A70-34748

Stereochemical course of sterically controlled syntheses of dipeptides, using optically active amino acids

22 p3983 A70-43095

U STEREOGRAPHY

STEREOGRAPHY

Lunar surface far side stereoscopic photography by Apollo 8 mission considered for lunar control

04 p0686 A70-14618

Scaling and angular resolution for sequential type holographic stereogram, comparing results with conventional hologram

04 p0695 A70-15574

Stereophotogrammetric measurement for dynamic deformation of circular membrane subjected to underwater detonation

05 p0927 A70-16009

Aircraft range-only radar trial applications in stereotopographic surveys of difficult-access areas, discussing organizational problems

07 p1282 A70-19632

Light beam deflection for three dimensional fixed and time varying visual displays, discussing mechanical, acousto-optic, electro-optic, digital and holographic techniques

08 p1449 A70-20673

Holographic recording of three dimensional rapid events, using Q switched laser pulses with sufficient coherence length for illumination

09 p1676 A70-22786

Stereo photographs conjugate image area matching, comparing automatic optical and electronic correlation techniques

09 p1680 A70-23067

Errors in aerial stereo photogrammetry, deriving equation to account for lens distortion and internal orientation

09 p1682 A70-23394

Radar flight configuration parameters effect on visual stereo model, expressing equivalent camera locations in terms of radar beams depression angles

10 p1841 A70-24752

Modified holographic technique for three dimensional display of X ray pictures

11 p2050 A70-25644

Cloud formation and structure determination using aircraft-borne IR stereo imagery

15 p2769 A70-31687

Holographic stereo model, comparing stereoscopic perception of phase and amplitude to model consisting of overlapping photos

16 p2908 A70-33228

Stereo synchroballistic shadowgraph system for explosively projected shock wave, using streak camera [SMPT PREPRINT 114]

22 p4031 A70-43027

Stereo laser framing camera for miniature surface cracks and perturbations produced in materials by explosively induced shock waves

22 p4035 A70-43052

SFR high speed photochronograph for visible and UV raster, stereoscopic and spectral photography

24 p4335 A70-45652

STEREOSCOPIC PHOTOGRAPHY

U STEREOGRAPHY

STEREOSCOPIC VISION

Autostereoscopic display using vibrating varifocal mirrors, including laboratory computer generated real time image and movie projection systems

02 p0302 A70-12631

Macaque monkey stereoscopic vision, obtaining behavioral evidence by random dot stereoscopic patterns and finding cells sensitive to binocular depth in cortex

07 p1205 A70-19276

Macaque monkey stereoscopic vision demonstrated behaviorally by combining random dot patterns with standard operant conditioning

07 p1205 A70-19277

Horizontal disparity and ratio of perceived egocentric distance related in stereoscopic vision during investigation of three point light sources problem

08 p1447 A70-21725

Stimuli eliciting vergence eye movements and stereopsis, discussing retinal disparity locations and limits due to form, spatial position, luminance, contrast and onset

12 p2171 A70-28034

Distorting and distorted components during geometrical illusions stereoscopic registration

19 p3366 A70-38926

Hypoxia effects on aviators visual accommodation, convergence and stereoacuity, noting myopia increase with altitude

20 p3569 A70-38996

Astronaut distance judgement enhancement in space by combining stereopsis effect with apparent movement phenomenon

23 p4150 A70-43965

Stroboscopic stereophenomenon, investigating depth shift of oscillating target motion binocularly viewed for interocular luminance differences

23 p4147 A70-44781

STEREOSCOPY

Stereoscopic device for photogrammetric points selection and marking on aerial photographs

03 p0482 A70-13109

STEREOTELEVISION

Roving vehicle self contained automatic control systems, discussing terrain scanning technique, stereo TV and electronic coordinate measuring and data processing equipment

23 p4260 A70-44628

STERILIZATION

NT CHEMICAL STERILIZATION

NT SPACECRAFT STERILIZATION

STERNS

U AFTERBODIES

STEROIDS

NT ALDOSTERONE

NT CHOLESTEROL

NT CORTICOSTEROIDS

NT CORTISONE

NT STREPTOMYCIN

Synthesis of alpha-dichloro-seco-A-norcholestone from diol monoacetate reaction with triphenylphosphine followed by hydrolysis and repeated chlorination

06 p1005 A70-17975

Electron impact induced fragmentation of androstane using deuterium labeling

08 p1454 A70-20524

Helical twisting power of steroidal solutes in cholesteric mesophases, discussing nematic temperature shift dependence on ester chain

08 p1455 A70-21524

Chlorella species found to contain ergosterol as major sterol

09 p1616 A70-22330

Circadian variation of pituitary-adrenal steroid levels, noting light role

14 p2540 A70-31430

STIELTJES INTEGRAL

Mathematical programming and conditional extremum problems solution in analytic functions based on Chebyshev function systems and Stieltjes moments

08 p1534 A70-21451

Relaxation function of linear viscoelastic body, defining mechanical deformation process using Stieltjes integral

12 p2327 A70-28046

STIFF STRUCTURES

U RIGID STRUCTURES

STIFFENING

Stiffeners reinforced rectangular plates parametric stability under dynamic load, deriving equilibrium equations and boundary conditions by averaging stiffener effects

01 p0205 A70-11146

Stiffener inclination effect on pressurized cylinder instability under pure bending

04 p0769 A70-14868

Stiffeners inclination effects on instability of pressurized cylinder under bending by Ritz method, considering finite deflection and initial imperfections in strain-displacement relations

08 p1591 A70-21464

Minimum weight design for symmetrically stiffened cylindrical shells under compression based on linear orthotropic stability theory

10 p1958 A70-24560

Integrally stiffened structures made by hot isostatic pressing of metal powders followed by conventional rolling

12 p2242 A70-27109

Waffle plate structures least weight design under uniaxial, biaxial and multiple combined loading with various stiffening patterns, investigating pyramiding concept

12 p2318 A70-27133

Postbuckled integrally stiffened wide column weight optimization, developing stress equation

18 p3339 A70-36447

Disk equations to determine tensions around arbitrary hole or stiffening contours

20 p3720 A70-39623

STIFFNESS

Helical journal bearings analysis operated in turbulent regime with incompressible lubricant, determining optimum groove parameters for maximum radial stiffness

01 p0100 A70-10381

Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects

[ASME PAPER 69-LUB-25] 01 p0100 A70-10383

Elastic bending of pretwisted elliptical bars, showing stiffness response

02 p0387 A70-12216

Stiffness matrix derivation for curved beam emphasizing uncoupled normal to plane loads

03 p0584 A70-12949

Laminate approximation model of randomly oriented fibrous composites estimating stiffness and thermal and expansional strains

03 p0587 A70-13126

Stiffness and expansion properties of oriented short fiber composites, discussing longitudinal modulus and expansion strain dependence on aspect ratio

03 p0587 A70-13129

Natural frequency calculation accuracy for coupled beam bending vibrations shown dependent on connection stiffness determination

03 p0595 A70-13929

Adiabatic elastic stiffness constants of single crystal forsterite measured as function of hydrostatic pressure and temperature, using pulse superposition technique

04 p0678 A70-15055

Composite strength and stiffness prediction from fiber and matrix properties using computer

05 p0870 A70-16579

Minimum weight design of elastic sandwich beams with deflection constraints using n-dimensional space of discretized bending stiffness

07 p1407 A70-19358

Dissipative heating effects on loss factor of viscoelastically damped beam, discussing stiffness effects

[ASME PAPER 69-VIBR-37] 08 p1592 A70-21478

Panel sound absorber acoustic impedance variation with frequency predicted taking into account panel mass, stiffness and internal damping

09 p1770 A70-22390

Adiabatic elastic stiffness of single crystals of Ni-Co alloys, determining bulk modulus dependence on chemical composition

10 p1904 A70-24699

Finite element matrix structural analysis by direct stiffness method and use of computers, considering thin wall box beams

[SAE PAPER 700218] 11 p2134 A70-25890

Finite element bending stress analysis of thin rectangular and skew plates, discussing computational procedure generating stiffness matrices

11 p2143 A70-26641

Nonuniform beam element stiffness matrices for dynamic and elastic instability analysis, determining frequencies, mode shapes and critical loads

11 p2143 A70-26643

Elastic stiffness of unidirectional glass reinforced epoxy fiber composite determined from ultrasonic velocity measurements

11 p2071 A70-26692

Optimum damping and stiffness in nonlinear single degree of freedom systems, discussing protection from ground and velocity shock during landing impact

11 p2145 A70-26695

Stiffness matrices of three dimensional finite elements, considering tetrahedron, hexahedron and nodal configurations

14 p2659 A70-31127

Thin shells stiffness matrix and shear by finite curved triangular elements based on discrete Kirchhoff hypothesis

14 p2659 A70-31129

Curved finite element for shells of revolution based on minimum potential energy principle, discussing stiffness and equilibrium of domed and branched shells

14 p2659 A70-31130

Dynamic stiffness, natural frequencies and mode shapes of prismatic and thin walled open grids, including warping and shear flange deformation

14 p2659 A70-31132

Stress concentration in flat rectangular and skew panels with circular holes from photoelastic verification of direct stiffness method

[SESA PAPER 1633] 15 p2820 A70-32303

Stiffness of multipad externally pressurized journal bearings with incompressible fluid feeding, comparing hydrodynamic and rolling bearings

15 p2745 A70-32445

Flight vehicle dynamic response prediction from elastic fluid stiffness contained between rigid sphere and ellipsoidal shell

16 p2991 A70-33878

Twisted uniform beam element flexibility and stiffness matrices, using continuous bending theory

16 p2894 A70-33887

Stiffness matrix correction for curved element deficient in rigid body motion

18 p3342 A70-36687

Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects

[ASME PAPER 69-LUB-25] 19 p3435 A70-37611

Aerostatic journal bearings with double plane admission feeder holes, determining maximum load and stiffness by numerical method

19 p3443 A70-38898

Finite element stiffness matrix technique for composite structures, discussing airplane component design program

20 p3730 A70-40040

Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation

20 p3732 A70-40264

Externally pressurized air lubricated journal bearing with multiple supply holes, predicting load carrying capacity, flow requirement and stiffness

20 p3639 A70-40505

Parachute flexibility as performance parameter, discussing stiffness-weight index, inflation process, squidding, etc

[AIAA PAPER 70-1166] 21 p3755 A70-41845

Directional dependence of elastic shear stiffness on cubic axes for Si, Cu and Mo, making polar plots of shear stiffness coefficients

21 p3850 A70-41909

High thermal stability glass fibers alternatives improving stiffness-to-weight ratio of resin and Al-based composites used in F-111 boron epoxy wings

22 p4058 A70-42480

Boron-epoxy composites rectangular reinforcing arrays spacing aspect ratios, considering matrix stress concentrations and stiffness estimates

22 p4119 A70-43688

Finite beam element in bending, deriving shear deflection terms in stiffness matrix based on stress assumption

23 p4274 A70-44909

Large element method for stiffness matrix order reduction in two-dimensional continua problems

23 p4275 A70-44940

Rope transverse oscillations due to impact taking bending rigidity into account

24 p4424 A70-45627

STILBENE

Dicyanostilbene formation from phenylethynyl azide and isocyanate

05 p0811 A70-16054

Anthracene, polystyrene and stilbene for scintillation counters measuring cosmic ray protons, analyzing dosimetric properties

17 p3151 A70-35352

STIMULANT

NT ATROPINE

NT CAFFEINE

NT CENTRAL NERVOUS SYSTEM STIMULANTS

NT NORADRENALINE

NT NOREPINEPHRINE

Propranolol effects on human cardiac conduction and intraventricular conduction in dogs studied by recording His bundle electrograms, noting P-H interval prolongation

05 p0800 A70-16102

Electrocardiographic changes during positive headward acceleration of normal human subjects after oxygen breathing and propranolol administration

05 p0808 A70-16675

Vascular smooth muscle contraction regulation, discussing contractile protein, energy metabolism, excitation-contraction coupling, spontaneous rhythmicity, response to stimulants, etc

24 p4299 A70-45807

STIMULATED EMISSION

GaAs - Conference, Dallas, October 1968

01 p0157 A70-10515

Stimulated emission of RF recombination lines from ionized atoms in H I regions

02 p0372 A70-12251

- Maser-like stimulated OH emission regions observed in interstellar rarefied gas 06 p1148 A70-18391
- Doped semiconductor unsteady stimulated emission, solving kinetic reactions in multimodal approximation 07 p1357 A70-19862
- Laser emission from organic molecules under neodymium laser harmonics excitation, describing absorption and photochemical inversions effects and emission spectra characteristics 07 p1300 A70-19866
- Solid state lasers with strongly degenerated modes investigated for induced radiation spectral composition inertial properties 08 p1510 A70-20507
- Stokes components generation in presence of stimulated combination radiation in optical cavity, considering interaction between components and effect of material dispersion on interaction 08 p1510 A70-20511
- Stokes components simultaneous generation in presence of stimulated combination radiation in optical cavity, noting effects of incident monochromatic beam intensity 08 p1511 A70-20520
- Anisotropic angular distribution of electrons and ions emitted from W targets irradiated by ruby laser pulses 08 p1512 A70-21211
- Output energies of Stokes components of stimulated combination scattering excited by pulsed laser 09 p1696 A70-22482
- Transient stimulated rotational and vibrational Raman scattering in gases using mode locked ruby laser 09 p1700 A70-23568
- Strontium fluoride crystals containing trivalent neodymium cations investigated for laser action and radiation characteristics by spectroscopy 10 p1899 A70-24253
- Second harmonic emission from GaAs injection laser and from stimulated KDP crystal at room temperature 12 p2245 A70-27306
- Giant Stokes radiation pulse generation during stimulated combination scattering, emphasizing pulses traveling counter to pumping wave 12 p2250 A70-28288
- Thermospectrometric investigation of stimulated Raman lines in benzene to identify generation modes, observing optical sideband effect at 8050 A 13 p2425 A70-28712
- Flashlamp-excited organic liquid UV lasers 13 p2427 A70-29141
- Stimulated emission cut-off characteristics of laser based on crystals with Nd ions under UV irradiation 13 p2429 A70-29505
- Whistler mode VLF emissions stimulation mechanism 13 p2401 A70-29930
- Fluorescence method of determining solid state laser parameters using spontaneous and stimulated emission observations 17 p3106 A70-35101
- Crystal and glass lasers activated by Nd ions, examining stimulated emission temperature dependence by high temperature spectroscopy 17 p3106 A70-35105
- CdS crystals luminescence spectrum excitation by UV light of ruby laser, noting excitons and phonons recombination 19 p3444 A70-37368
- Vacuum UV laser action in molecular hydrogen Lyman bands, examining stimulated emission in P branch lines and light pulse duration 20 p3643 A70-40496
- Semiconductor platelet laser stimulated emission visual observation in unwanted reflected modes 21 p3838 A70-42022
- Excited state complexes laser action in coumarin dyes indicated from stimulated fluorescence time dependence 22 p4048 A70-42328
- Mode locked neodymium-glass pulsed laser stimulated picosecond time resolved light emission observation by cross beam technique 24 p4354 A70-45647
- STIMULATED EMISSION DEVICES**
- NT ARGON LASERS
- NT CARBON DIOXIDE LASERS
- NT CHEMICAL LASERS
- NT GALLIUM ARSENIDE LASERS
- NT GAS LASERS
- NT GAS MASERS
- NT INFRARED LASERS
- NT INJECTION LASERS
- NT LASERS
- NT LIQUID LASERS
- NT MASERS
- NT ORGANIC LASERS
- NT PULSED LASERS
- NT Q SWITCHED LASERS
- NT RING LASERS
- NT RUBY LASERS
- NT SEMICONDUCTOR LASERS
- NT SOLID STATE LASERS
- NT TRAVELING WAVE MASERS
- Ruby laser giant pulses time stretching and shaping using stimulated Raman scattering in liquid nitrogen cell inserted in laser resonator 05 p0857 A70-16076
- Multilevel quantum systems interaction with electromagnetic fields at frequencies near quantum transitions using small signal analysis 09 p1695 A70-22256
- STIMULATION**
- NT AUDITORY STIMULI
- NT SENSORY STIMULATION
- Non-specific influences on rabbits neurons reaction to nonvisual stimuli in central visual pathway using microelectrodes implantation in visual cortex 05 p0802 A70-16624
- STIMULI**
- Attention and cue-producing responses in response-mediated stimulus generalization 09 p1617 A70-22342
- Interindividual differences in judging stimulus similarities, explaining unsatisfactory results obtained by average scalings 19 p3366 A70-38506
- Selective stimulus encoding and overlearning in paired associate learning 22 p3971 A70-43401
- STIRLING CYCLE**
- Stirling free piston engine operating principles, performance limitations, heat transfer problems, fluid flow, mechanical design, test results and applications [ASME PAPER 69-WA/ENER-15] 04 p0627 A70-14895
- Equilibrium performance of closed Stirling cycle with chemically reactive gas as working fluid, discussing power density and thermal efficiency 22 p3982 A70-42756
- Effective pressure ratio nomographs for mechanical energy conversion and heat transfer of closed regenerative Stirling engines, using isothermal theory 22 p4091 A70-42757
- STOCHASTIC PROCESSES**
- NT MARKOV CHAINS
- NT MARKOV PROCESSES
- NT RANDOM PROCESSES
- Algorithm for L-shaped linear programs in optimal control problems and stochastic programming, outlining cutting hyperplane 01 p0047 A70-11069
- Stochastic processes providing exposition of differential-integral calculus for Brownian motion paths, with applications to diffusion processes and related parabolic partial differential equations 01 p0133 A70-11322
- Monograph on stochastic theory and cascade processes, discussing branching phenomena, point processes, electromagnetic cascades, extensive air showers, polarization, population growth, etc 01 p0134 A70-11327
- Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements 01 p0197 A70-11499
- Stationary Gaussian stochastic processes sample functions properties and local times 02 p0324 A70-12504
- Nonlinear stochastic differential equations formulated during random loading processes generation, designing testing devices with stable performance parameters 03 p0598 A70-14236
- Optical position estimation model based on defining photon density profile center of gravity in noise, using photon Poisson process theory 04 p0652 A70-15337
- Structure safety in cumulative damage, considering loading as time dependent stochastic process 05 p0937 A70-16369
- Random vibrations of linear system with viscous damping excited by stochastically acting force with monotonically varying frequency, using correlation method 05 p0882 A70-16372
- Arterial pressure and suprarenal blood flow in dogs under basal conditions and nerve stimulation by stochastic method using analog correlator 05 p0806 A70-16400
- Diffusion processes governed by stochastic equations 06 p1093 A70-17581
- Monograph on computation of density functions of parameters in stochastic systems, giving algorithms involving only matrix computations of fixed dimensionality 06 p1093 A70-17730
- Stochastic differential games with constrained state estimators, involving linear system, quadratic cost functional and white Gaussian noises corrupting output measurements 06 p1024 A70-17954
- Linear-quadratic pursuit-evasion game with dynamics perturbed by additive white Gaussian noise, obtaining linear minimax solutions 06 p1025 A70-17957
- M measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations 06 p1025 A70-17962
- Separation theorem for nonlinear measurements, discrete-time linear systems and quadratic cost to achieve stochastic control without dynamic programming 06 p1026 A70-17967
- Nonlinear control systems stability with stochastic coefficients, applying Liapunov function 06 p1026 A70-17971
- Linear optimal stochastic control systems described by covariance matrix correlating errors and estimates of state variables, analyzing instability under parameter variations 06 p1095 A70-18054
- Stochastic model of information handling centers as typified by document storage and retrieval derived from integral equation to determine expected primary store size 06 p1016 A70-18450
- Superposition of dressed particles in plasma kinetic theory proved by using generalized stochastic equation for conditional probability density for one particle 06 p1124 A70-18500
- Stochastic automata for parameter self optimization with multimodal performance criteria 07 p1244 A70-18861
- Kolmogoroff partial differential equations for non-Markovian stochastic processes, noting applications to reliability theory 07 p1323 A70-18938
- Distributional results pertaining to complex Wishart processes and time varying spectral estimators on null hypothesis of stationary Gaussian time series 07 p1323 A70-19028
- Multidimensional stochastic approximation theorems useful for infinite-dimensional Hilbert space or Banach space 07 p1324 A70-19029
- Stochastic differential equations for approximate continuous nonlinear minimal variance filtering, discussing existence and uniqueness conditions 07 p1245 A70-19092
- Multidimensional Kiefer-Wolfowitz stochastic approximation algorithm modified to locate regression function minimum 07 p1247 A70-20028
- Stability criteria for systems of nonlinear stochastic differential equations on finite time interval, considering stable motion of physical processes 08 p1533 A70-20488
- Deterministic and stochastic simulation models for obtaining optimal solution in operations research by trial and error 08 p1464 A70-20579
- Optimal spare parts inventory determined for stochastically failing components using mathematical model 08 p1501 A70-20603
- Stochastic programming models for flight scheduling within airlift system accounting for cargo uncertainties, using convex programming, linear programming codes, etc 08 p1600 A70-20605
- SOAR (Simulation of Airlift Resources) model for stochastic productivity variations of strategic airlift systems 08 p1466 A70-20930
- Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization 08 p1480 A70-21637
- Optimal control mathematical modeling for dynamic systems under statistically indeterminate disturbances based on game theory and pattern recognition 09 p1653 A70-22141
- One dimensional Poisson production process under costly surveillance, considering maximum attainable income rate approximation 09 p1653 A70-22347
- Stochastic predictor model for process control, discussing multivariable search techniques and effect of forcing function and noise 10 p1856 A70-24872
- Hardware and system testing mathematical model assuming stochastic design and manufacturing defects detection and nondetection probability equations analogous to reliability function 10 p1896 A70-24915
- Nonlinear system with piecewise linear spring characteristic response to stochastic excitation of white noise type process, discussing technical stability 10 p1918 A70-25323
- Control theory, Volume 1, covering linear, nonlinear, stochastic, optimal, adaptive and learning systems, sensitivity analysis, etc 11 p2023 A70-25771
- Error analysis algorithms for reducing computational load in stochastic estimation and control problems in hybrid navigation systems 11 p2025 A70-26208

Spacecraft stochastic optimal control, discussing design of least upper bound fuel optimal system with measurement uncertainty

11 p2025 A70-26222

Feedback controller specific suboptimal estimation and control parameters determination using stochastic approximation algorithms

11 p2026 A70-26236

Stochastic control system design methodology noting applications to ASW, law enforcement, document retrieval and autopilots

11 p2029 A70-26336

Gain determination from dynamic /on line/ solutions to Riccati equation for model reference adaptive control applicable to multiple input/ output or stochastic systems

11 p2029 A70-26339

Stochastic dynamic prediction assuming deterministic laws for atmospheric behavior while seeking solutions corresponding to probabilistic statements of initial conditions

11 p2076 A70-26497

Stochastic differential equations objectives, limitations and restrictive assumptions in physical problems, discussing electromagnetic wave propagation in random continuum or random d'Alembertian operator

11 p2074 A70-26550

Plasma turbulence stochastic processes, considering radiation, transport and acceleration mechanisms and relationships to fluid turbulence

11 p2094 A70-26752

Plasma turbulence theory, discussing particles stochastic acceleration in strong electric field

11 p2094 A70-26753

Transfer matrix spectrum for lattice gas models with finite interaction, constructing stochastic operator as stochastic matrices limit

12 p2272 A70-27343

Poisson shot noise process relationship with continuous stochastic intensity as sample function

12 p2203 A70-27418

Alias-free randomly timed sampling of stochastic processes, considering spectrum recovery by linear operation

12 p2204 A70-27419

Linear time dependent stochastic optimal control with nonquadratic performance indices using function space approach

12 p2204 A70-27668

Wideband stochastic signals for radar range and velocity measurements using polarity coincidence correlation technique

12 p2188 A70-27942

Diffusion processes on multidimensional cylindrical phase space for studying stochastic processes for physical systems with angular measurements, developing model for satellite under torque

12 p2273 A70-28067

Nonlinear discrete time sampled systems optimal control by dynamic programming, with application to stochastic systems

12 p2204 A70-28068

Stochastic optimal trajectory control for spacecraft reentry at supercircular velocity, deriving computer algorithm

13 p2499 A70-28382

Stochastic processes optimal control theory application to launcher attitude control under wind disturbance

13 p2501 A70-28428

Newton-Raphson method analog accelerating convergence of multidimensional stochastic approximation algorithm to local minimum for attitude controller design

13 p2382 A70-29069

Stochastic adaptation process, investigating asymptotic properties based on concept of random system with complete connections

13 p2383 A70-29490

Book on stochastic processes and filtering theory covering probability theory, Markov processes, linear and nonlinear filters, etc

13 p2442 A70-29575

Stochastic reinforcement learning model synthesizing control and pattern recognition systems with learning attributes

13 p2374 A70-29584

Stochastic analog approximation method minimizing criterion functions and for recovering functions from noisy measurements of values in learning systems

13 p2442 A70-29585

Stochastic approximation methods applied to pattern classification, estimation and control

13 p2442 A70-29586

Stochastic automata as learning system models in random environments with penalty-nonpenalty expectations, demonstrating convergence

13 p2374 A70-29587

Stochastic particle acceleration by VLF in weakly turbulent plasma in magnetic field, considering nonlinear cyclotron damping

13 p2468 A70-29935

Book on differential dynamic programming covering algorithms for continuous time control, bang-bang, discrete time and stochastic systems

14 p2560 A70-30631

Stochastic terminal optimal control for nonlinear dynamical systems with state independent noise

14 p2600 A70-31420

Stochastic processes for physiological analysis of cardiac rhythm dynamics during work

15 p2680 A70-31609

Stochastic linearized state estimator for nonlinear dynamic systems with Markovian noise, using digital simulation

15 p2715 A70-31975

Linear stationary systems observability with stochastic inputs for linearly independent row vectors, determining state vector components mean values

15 p2716 A70-32346

Optimal control stochastic problem with initial conditions treated as random variables, using matrix minimum principle

15 p2716 A70-32563

System maintainability stochastic modeling using probability density functions

15 p2748 A70-32670

Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking

16 p2851 A70-33340

Linear systems simultaneous optimal stochastic control and observation strategies, assuming quadratic observation cost

16 p2886 A70-33346

Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking situation, considering application to manual control system design

16 p2852 A70-33463

Limit theorems for sums of multidimensional stochastic step processes, giving necessary and sufficient conditions for convergence to Poisson measures

16 p2942 A70-33700

Kinetic theory of fatigue crack propagation, discussing stochastic nucleation process and power exponent relation

16 p2992 A70-33968

Thermorheologically simple model for viscoelastic materials stochastic behavior in random temperature fields, introducing reduced time scale

16 p3003 A70-34238

Stochastic systems technical stability problem solution by Fokker-Planck equation

16 p2944 A70-34294

Systems subject to failure and repair cycles, describing performance and reliability by stochastic processes in terms of excess time

17 p3099 A70-34580

Book on stochastic tools in turbulence covering generalized functions, probability, moments, characteristic functions, Gaussian distribution, random functions and multidimensional fields

17 p3128 A70-34601

Convolutional code decoder modeled as autonomous stochastic sequential machine, considering finite Markov chain theory for error probability

17 p3049 A70-34854

Stochastic linearization approximation to solve nonlinear dynamical systems filtering problems in Markovian framework

17 p3056 A70-34953

Sufficient condition for asymptotic stability of ergodic coefficient linear stochastic systems

17 p3129 A70-34982

Statistical theory of irreversible transport processes in fluids, considering deviation from equilibrium as stochastic process

17 p3131 A70-35532

Stochastic approximation for identification of distributed parameter system solutions described by linear partial differential equations

17 p3131 A70-35557

Stochastic processes with linear dynamics and quadratic control cost, considering application to aircraft landing approach path optimization

18 p3279 A70-35973

Noisy stochastic pattern recognition system, determining optimal measurement sequence by discrete Pontryagin maximum principle

18 p3234 A70-36337

Nonlinear stochastic discrete time processes prediction and filtering by Monte Carlo techniques

18 p3234 A70-36338

Nontrivial eigenvalues of stochastic matrices

19 p3456 A70-37414

Linear stochastic continuous feedback system with white noise and control input, investigating combined problem of filtering and optimal control

19 p3393 A70-37850

Satellite-based air traffic control system for North Atlantic, applying stochastic optimal control theory [AIAA PAPER 70-966]

20 p3669 A70-39563

Computer calculations automation in mathematical models construction by statistical methods, discussing

programs for distributed parameter systems, stochastic approximation, etc

20 p3592 A70-39903

Stochastic approximation iterative algorithms for multivariable plants mathematical models, including steepest descent method

20 p3593 A70-39910

Discrete parameter stochastic optimization problems necessary conditions, deriving maximum principle

20 p3659 A70-40107

Skeletal muscle force generation stochastic model based on motor unit, discussing Poisson distribution and dynamic force response

21 p3769 A70-41199

Control processes and optimization problems solutions by stochastic differential equations, discussing dynamic models and programming, linear filtering and optimal feedback

21 p3802 A70-41275

Thermoviscoelasticity stochastic problems for bar with temperature independent viscosity, discussing Fokker-Planck equation for two temperature processes

21 p3937 A70-41435

Stochastic kinetic theory for plasma turbulent heating by random fields, predicting acceleration effects

21 p3859 A70-41899

Stochastic processes control optimization, selecting elastic aircraft stabilizer planform

22 p4004 A70-43352

Stochastic heating of plasma in toroidal trap /stellarator/, showing discharge ignition potential dependence on microwave oscillator frequency

22 p4084 A70-43394

Stochastic optimal control for nonlinear dynamical systems under noisy observations, designing suboptimal state estimates and feedback controls

22 p4063 A70-43429

Stochastic control optimization, examining self organizing approach for performance adaptive controller with asymptotic optimal properties

22 p4005 A70-43733

Iterative linear prediction method for stochastic process with zero mean value and known covariance function

23 p4211 A70-44026

Deterministic vs stochastic signals for equipment and installations short cycle reliability tests over service life during changing environments

23 p4166 A70-44332

Weak compactness of set of measures in functional space corresponding to stochastic differential equations solutions for n-dimensional Euclidean space

23 p4212 A70-44341

Nonlinear filtering for linear parabolic distributed parameter systems with white noise, considering stochastic boundary value problem

23 p4177 A70-44905

Stochastic behavior of failed standby redundant electronic equipment with imperfect switching and opportunistic repairs

24 p4319 A70-46016

Stochastic boundary value problem involving differential equation with random forcing function, proving monotone property of solution covariance variation

24 p4426 A70-46039

STOICHIOMETRY

Color-electric voltage calculation for stoichiometric flame burning in air introducing allowance for charged particle densities

04 p0780 A70-14706

Stoichiometric compositions of niobium dioxide to pentoxide range, investigating X ray characteristics and thermal stability

07 p3135 A70-20312

Open cycle MHD generator operation, comparing below stoichiometric air-fuel ratios to excess air level

14 p2533 A70-30534

Impurities solubility in semiconducting indium telluride with stoichiometric vacancies, verifying thermodynamic model by phase diagrams

16 p2960 A70-33224

STOKES FLOW

MHD Stokes flow for magnetized bodies of revolution, rotating with steady motion in viscous conducting fluid at rest at infinity

04 p0726 A70-14615

Parachute design for decelerating upper atmosphere rocket probes at high altitudes, using high drag coefficients in Stokes flow regime

04 p0624 A70-15410

Stokes flow around sphere moving along axis of cylinder with near-unity diameters relationship

09 p1661 A70-22839

Homogeneous viscous fluid steady state parallel Stokes flow in annular region between concentric cylinders at low Reynolds numbers

11 p2038 A70-26478

Suspended Stokes particle-single wave interaction effect on energy dissipation and vorticity of random turbulent incompressible fluid approximated by Fourier-Stieltjes integral

12 p2213 A70-28236

Sphere slow motion in viscous fluid with solid particle suspension, considering Stokes flow pattern small relaxation time perturbation

16 p2896 A70-34272

Compressible and incompressible Stokesian fluids motion described by finite element analog of Navier-Stokes equation

20 p3607 A70-38999

Viscous conducting fluid slow motion past sphere in presence of toroidal magnetic field, calculating Stokes flow perturbations

20 p3682 A70-40113

Low Reynolds number gas flow past heated circular cylinder, considering Stokes region transport properties

23 p4284 A70-44978

Perturbation of steady MHD Stokes flow past hollow sphere assuming small Hartmann and Reynolds numbers

24 p4384 A70-45262

STOKES LAW

Stokes components generation in presence of stimulated combination radiation in optical cavity, considering interaction between components and effect of material dispersion on interaction

08 p1510 A70-20511

Stokes components simultaneous generation in presence of stimulated combination radiation in optical cavity, noting effects of incident monochromatic beam intensity

08 p1511 A70-20520

Output energies of Stokes components of stimulated combination scattering excited by pulsed laser

09 p1696 A70-22482

Giant Stokes radiation pulse generation during stimulated combination scattering, emphasizing pulses traveling counter to pumping wave

12 p2250 A70-28288

Uniform asymptotic solutions of second order linear differential equations with arbitrarily many turning points or Stokes lines

19 p3457 A70-37681

Stokes earth constants from gravity anomalies

20 p3617 A70-39070

STOKES LAW (FLUID MECHANICS)

Erythrocyte sedimentation rate in chicken blood predictable by Stokes equation

02 p0238 A70-12547

Viscous incompressible fluid secondary steady state flow due to rotating spheroid, considering acceleration terms in Stokes linear equation solution

11 p2034 A70-25390

STOKES THEOREM (VECTOR CALCULUS)

Radiation view factor from differential area to conical surface determined using Stokes theorem and contour integration

04 p0787 A70-15598

STOMACH

Pesinogens A, C and D from stomach mucosae of smooth dogfish separated by chromatography on DEAE cellulose

11 p1987 A70-26007

STONES (ROCKS)

U ROCKS

STONY METEORITES

NT ACHONDrites

NT AUSTRALITES

NT CARBONACEOUS METEORITES

NT CHONDRITES

NT KAPOETA ACHONDRITE

NT NORTON COUNTY ACHONDRITE

NT ORGUEIL METEORITE

NT TEKITES

NT TUNGUSK METEORITE

Stony meteorite trace elements groups neutron activation analysis with computer reduction of Ge/Li spectra

02 p0249 A70-11680

Dating method for stony meteorites feldspar phase based on time interval between solar nebula Al 26 production and decay into Mg 26

06 p1150 A70-18479

Stony meteorites age determination from decay of cosmic ray produced Kr 81 and 78, comparing production rate to He 3 ages

08 p1563 A70-20499

Magnetic spherules extracted from manganese nodules classified by X ray diffraction and electron microprobe data, suggesting volcanic, stony and iron meteoritic origins

08 p1578 A70-21560

Angra dos Reis stone meteorite containing cosmogenic and fissiogenic xenon

10 p1935 A70-23850

Ureilite structures and relationship to carbonaceous chondrites, considering chemical composition, diamond content, age, size, etc

10 p1941 A70-24552

Ar 37 and Ar 39 isotopes in recently fallen iron-ataxite and stony meteorites, discussing relevance to cosmic ray variations in space

12 p2309 A70-27950

Solar flare proton induced radioactivity in Apollo 11 lunar surface material compared with stony meteorite data, noting cobalt 56 concentration

13 p2489 A70-28910

Iron and stony iron meteorite cooling rates and thermal models, showing melting, radioactive heat source redistribution and surface heating effects

13 p2497 A70-29861

Gold and iridium distribution in stony meteorites, discussing metal silicate fractionation process during chondrite formation

13 p2497 A70-29862

Stony meteorites radionuclides gamma emission measurement, determining specific activity ratios

20 p3703 A70-39322

Dosso stony meteorite gamma emitters radioactivity by nondestructive spectroscopy, obtaining quantitative analysis by least squares method

21 p3893 A70-41446

Apollo 11 samples compared to stony meteorites and terrestrial basalt, discussing lunar rock formation processes

21 p3900 A70-41540

Sequential instrumental activation analysis for trace elements in rocks and stony meteorites, comparing with silicate method

24 p4310 A70-46407

STOPPING

NT THRUST TERMINATION

STORABLE PROPELLANTS

Earth storable liquid propellants combustion products simulation by combustion of gaseous fuel and oxidizer combination, discussing elemental composition and thermodynamic considerations

08 p1557 A70-21622

Gelled space-storable oxygen difluoride and diborane analysis, including particle preparation, yield stresses, viscosities and storability

16 p2962 A70-33607

STORAGE

Stochastic model of information handling centers as typified by document storage and retrieval derived from integral equation to determine expected primary store size

06 p1016 A70-18450

Light storage by Venus machine using refractive properties of gas and involving fluid mechanical optics

11 p2114 A70-26575

Lunar surface exploration vehicle (Lunar Rover)/design, analyzing stowage aspects in Lunar Module

16 p2888 A70-33680

STORAGE BATTERIES

NT NICKEL CADMIUM BATTERIES

NT NICKEL ZINC BATTERIES

NT SILVER ZINC BATTERIES

Book on alkaline storage batteries, design, manufacture, performance characteristics, charging and maintenance, electrochemical and thermodynamical background of alkaline systems, electrode kinetics, etc

09 p1612 A70-22638

Regenerative hydrogen-oxygen secondary fuel cells as rechargeable battery for communication satellites

21 p3756 A70-41007

Gas tight lead storage battery with negative plates for oxygen absorption

24 p4295 A70-46352

STORAGE STABILITY

Long term storage effects on noise, leakage current and thickness of Li drifted Si surface barrier detectors

03 p0482 A70-13023

Long term storage effects on systems reliability, emphasizing tradeoffs regarding availability, reliability and costs

15 p2712 A70-32637

Test data interpretation by design margin techniques in poststorage reliability of high quality gyro assemblies

19 p3441 A70-38822

Technical methods defining, monitoring and controlling life limited aerospace components during storage

19 p3441 A70-38831

Hydrogen slush characteristics, discussing advantages of liquid-solid mixture over liquid hydrogen, production methods, aging effects, transfer and pumping losses, storage, instrumentation, etc

23 p4232 A70-45075

Long term storage effects on recalibrated thermistors performance stability, comparing measurements with first calibration data

24 p4333 A70-45136

STORAGE TANKS

Fire performance of spray applied rigid urethane foam applied as storage vessel insulation, noting continued functioning until destruction

09 p1710 A70-23345

STORMS

NT CYCLONES

NT HURRICANES

NT IONOSPHERIC STORMS

NT MAGNETIC STORMS

NT NOISE STORMS

NT SOLAR STORMS

NT STORMS (METEOROLOGY)

NT SUDDEN IONOSPHERIC DISTURBANCES

NT THUNDERSTORMS

NT TORNADOES

NT TROPICAL STORMS

STORMS (METEOROLOGY)

NT HURRICANES

NT THUNDERSTORMS

NT TORNADOES

NT TROPICAL STORMS

Forward sounding sensors /weather radar/ development for aiding human eye in detecting flight hazards /storms and CAT/

02 p0297 A70-11989

F 2 region acoustic waves over Kansas and Nebraska attributed to local storms in troposphere

02 p0290 A70-12158

Ball lightning mechanism proposal based on mathematical model for electric discharge current in parabolic plasma shell forming vortex-type storm front

05 p0879 A70-17021

Deflecting forces on nonrotating convecting systems due to environmental shear, comparing magnitude to rotation forces

06 p1100 A70-18571

Pacific ocean equatorial trough zone disturbances structure, discussing organized convective downdrafts role in rapid structural decay

06 p1101 A70-18578

Objective quasi-Lagrangian index for forecasting convective weather outbreaks based on outbreak occurrence likelihood in convective instability areas

06 p1101 A70-18579

Satellite observed characteristics of severe local storms in central and eastern U.S., noting potential use for storm forecasting

06 p1102 A70-18584

Severe storm research importance to aircraft design and operating efficiencies improvement by identifying meteorological alternatives for operations in and near adverse environments

06 p1102 A70-18587

Hot-film anemometers for measuring storm turbulence in presence of heavy rain

10 p1887 A70-23940

Radar meteorology in electromagnetic communications to provide storm systems data, noting clear air radar echoes

13 p2445 A70-28791

STRAIGHT WINGS

U RECTANGULAR WINGS

STRAIN AGING

U PRECIPITATION HARDENING

STRAIN DISTRIBUTION

U STRESS CONCENTRATION

STRAIN ENERGY METHODS

Strain energy function for swollen crosslinked elastomers, extending application range by including third invariant

05 p0927 A70-15980

Strain energy release rate in terms of propagating crack surface displacements applied to infinite solid loaded in tension

05 p0938 A70-16480

Shear and linear strain energy criteria for limiting stress state model of solid deformable bodies, considering uniaxial, biaxial and triaxial loading

06 p1166 A70-17657

Continuum mechanics equations for calculating strain energy in spherical bottoms production as function of radius and angle

06 p1077 A70-17870

Strain energy method applied to stability analysis of short longitudinally reinforced cylindrical shells under axial compression

08 p1584 A70-20536

Critical radii of curvature in elastoplastic bending of rib-reinforced aircraft components from wafer panels determined using strain energy method

08 p1506 A70-21183

Flexural stress relaxation properties of thermoplastics and composite materials, assessing strain energy by ballistic pendulum

11 p2070 A70-26342

Cyclic strain energy method determining oxygen consumption rate of intact working human left ventricle by closed chest measurements

12 p2167 A70-27018

Shells of revolution nonlinear finite element analysis by matrix displacement method, including higher order strain energy terms

16 p2991 A70-33885

Strain compatibility equations for continuous shells from physical and mathematical considerations

16 p2991 A70-33893

Low aspect ratio wings under conditions of creep, calculating stress by method of strains

19 p3534 A70-37244

Strain gradient theory for random media, considering equations for response to forcing field

19 p3456 A70-37382

Isotropic finite strain expressions for compressional and shear velocities, noting no discrepancy with ultrasonic and seismic data

20 p3619 A70-39218

STRAIN FATIGUE

U FATIGUE (MATERIALS)

STRAIN GAGE ACCELEROMETERS

Simple harmonic scotch yoke mechanical oscillator for strain gage accelerometer calibration in VLF range

16 p2900 A70-32995

Subminiature three directional cantilever beam accelerometer using semiconductor strain gages

21 p3824 A70-40861

STRAIN GAGES

S/N fatigue life gage for nondestructive evaluation of cumulative damage, discussing calibration and two step, block and random tests

01 p0053 A70-10009

Silicon strain gage transducer for measurement of pressure between tongue and teeth, developing two types of temperature compensated strain gages

02 p0242 A70-12054

Resistance strain gage performance prediction, investigating response during temperature change for preattachment matching

02 p0302 A70-12498

Strain gage data obtainable on rosettes used for measuring test component stresses at 550 F in inert atmosphere

03 p0482 A70-12965

Time sharing computer systems for data reduction from semiconductor strain gauges applied to FORTRAN IV programs

03 p0453 A70-12969

Twin wave interferometer and strain gage mechanism for press-fit measurements of contact deformation on metallic and polymer samples

03 p0484 A70-13426

Inductive eddy current strain gage for repeated strains measurement in magnetic and nonmagnetic sheets offering direct readout and remote recording

03 p0485 A70-13475

Micrometeorite detection involving impact stress wave monitoring by strain gages embedded in viscoelastic plastic

03 p0487 A70-13573

P-n heterojunction diode strain sensor fabricated by vacuum evaporation onto substrate, investigating mechanical input and output impedance characteristics

03 p0495 A70-14192

Variable strain bending form design for determining environmental craze resistance of polymers

04 p0713 A70-15375

Dynamic strain measurement by solid state direct coupled amplifier with flat frequency response

05 p0936 A70-16322

Resistance strain gage load cell for measuring compressive loads under high hydrostatic pressure, discussing gage bonding

05 p0848 A70-16377

Miniature temperature and strain telemetry transmitters developed for measurements in areas inaccessible to direct wire connections

06 p1069 A70-18433

Subminiature sensor element integrated with silicon semiconductor strain gages for simultaneous three dimensional measurement of acceleration components

06 p1069 A70-18434

Magnetic, electrostatic and RF fields noise reduced for strain gage data acquisition

06 p1069 A70-18435

Strain gage high temperature performance in rocket engines tested by spot welding to turbine manifold, noting installation and position influence

06 p1069 A70-18440

Silicon semiconductor irradiated strain gages for precision measurement of low level strain

06 p1069 A70-18441

Electron irradiation for reducing thermal coefficient of resistance of Si strain gages, noting crystal orientation dependence of gage factor

06 p1070 A70-18442

Miniature resistance strain gage performance in low cycle fatigue, discussing zero drift and gage sensitivity changes

07 p1281 A70-19241

Active and compensating sensors resistances, strain sensitivities, temperature gradients and lead resistances differences effect on accuracy of resistance strain gage measurements

07 p1283 A70-19747

High precision strain gage installation, discussing specifications and errors caused by oblique load action, natural frequency and deformation

08 p1493 A70-20585

Strain gages design and development for small loads

08 p1493 A70-20586

Vinoflex glue for constantan strain gauges in low temperature tensometry, showing satisfactory recording at single and multiple loadings

08 p1495 A70-20984

Thermal strain measurement in operational and experimental components of high temperature plant, discussing full-bridge weldable type strain gage for transient strains

09 p1675 A70-22582

Thermal gradients and associated strains measurement in steam turbogenerator casings, considering strain gage placement and heat transfer calculations

09 p1774 A70-22590

Strain gages for static deformation measurement of fiberglass reinforced plastics at room and higher temperatures, discussing error sources and gage-specimen adhesive bonding

09 p1780 A70-23107

Gages for static strain measurements at high temperatures, discussing resistivity temperature coefficient compensation

09 p1680 A70-23109

Strain gage for measuring strain waves amplitude on surface of fused quartz to study electromagnetic waves interaction in Permalloy films

09 p1681 A70-23349

Transient and steady state thermal stress distribution measured by strain gages embedded in epoxy models

11 p2130 A70-25585

Strain gages moisture protection, deriving formula for calculating acceptable protection time of insulator

11 p2049 A70-25586

Slip-ringless propeller blade mounted measurement system for steady state and vibratory stresses from multiple strain-gage locations during flight and ground tests

[SAE PAPER 700223] 11 p2051 A70-25891

Bonded resistance strain gages technical characteristics noting need for uniform standards

11 p2053 A70-26427

Foil type resistance strain gages /tensometers/, studying measurement current effects on readings

11 p2053 A70-26428

Semiconductor strain gages /tensometers/ materials, fabrication and properties

11 p2054 A70-26429

Hermetically sealed miniature strain gages /tensometers/ design and testing, noting insensitivity to effects of fuels and oils

11 p2054 A70-26430

Resistance strain gages /tensometers/ for force and moment measurement in aerodynamic research, giving design and structural recommendations

11 p2054 A70-26431

Lead resistance effects on resistance strain gage measurements as function of utilized measurement system and procedure

11 p2054 A70-26432

Unbalanced Wheatstone bridge network operation for resistance strain gage measurements, determining dynamic transients variable extremes

11 p2054 A70-26434

Multichannel tensometric AC bridge network for static and dynamic measurements of mechanical quantities in structural elements

11 p2054 A70-26436

Transistorized system for static and dynamic strain measurements of mechanical quantities

11 p2055 A70-26437

Brush collector for strain measurement in jet engine compressor and turbine elements at high RPM

11 p1983 A70-26439

Cross sensitivity errors effect on stress determination by free-filament wire strain gages used at high temperature

11 p2058 A70-26838

Instrument for measuring and recording strains and birefringence in glasses and crystal under compressive, tensile or bending loads at low/high temperatures and in vacuum

12 p2237 A70-28161

Electric resistance type strain gages, eliminating errors due to device length

14 p2582 A70-30174

Thermally induced strain measurement using four gage rosettes without temperature gradient limitations

14 p2585 A70-30684

Heating rate effect on parameters of resistance wire strain gages subjected to temperature gradients

15 p2733 A70-31536

Measuring apparatus for cyclic plastic strains at high temperatures, discussing data processing techniques

15 p2733 A70-31538

Miniature wireless strain and temperature radio telemetry transmitters for measurements in areas inaccessible to direct wire connections

15 p2738 A70-32301

Strain gage maximum rise time estimation for longitudinally sweeping strain pulse, reducing gage length/pulse velocity ratio effects

[SESA PAPER 1620] 15 p2739 A70-32302

Electromechanical transducer to sense and record strain cycles, describing motion magnification principle, system and prototype evaluation

15 p2739 A70-32310

Piezoelectric field effect strain gage with semiconducting film for extremely small strains in electrically noisy background

[SESA PAPER 1676] 15 p2739 A70-32317

Glass bonding techniques for semiconductor strain gages, discussing outgassing minimization, hysteresis and repeatability and operational temperature range extension

15 p2739 A70-32325

Open faced polyimide-backed strain gage for transducer and/or long term applications, considering drift and zero shifts

15 p2739 A70-32329

Displacement and velocity measurements using strain gauges, linear potentiometers and seismic transducers

15 p2743 A70-32799

Servocontrolled laser strainmeter based on Michelson-Morley interferometer, determining dynamic characteristics dependence on feedback loop filter type

16 p2925 A70-33022

Laser interferometry strain gage for measuring earth strain, taking into account wavelength stabilization

16 p2925 A70-33023

Vacuum interferometer strain gage for absolute earth strain measurement via length change comparison with wavelength standard

16 p2925 A70-33024

Omnidirectional dynamic stress gage as embedded elastic inclusion, discussing transient response to ground shock compression wave pressure

19 p3422 A70-37699

Welded joint strain measurement by grating etching and moire fringe technique

19 p3428 A70-38513

Strain measurement on filament-wound structural members, incorporating electric resistance wire as strain gage within windings

19 p3550 A70-38719

Strain multiplier for fatigue sensor in moderate amplitude cyclic strain applications

20 p3628 A70-39159

Strain measuring apparatus for multiple samples simultaneous compression tests at near absolute zero temperatures

20 p3632 A70-39628

Tensile test device for continuous recording of sample load and strain

20 p3728 A70-40000

Strain gages for structural stress analysis in cryogenic environments, discussing correction factors for temperature dependent characteristics

21 p3932 A70-40545

Crystal orientation dependence of thermal resistance and gage factor in electron irradiated n-type silicon strain gages

21 p3824 A70-40862

Resistance strain foil gage response to dynamic plastic strain

22 p4039 A70-43451

Strain gage stress measurement under elastic-plastic strain conditions at high temperature

22 p4117 A70-43454

Aircraft structure fatigue load monitoring, discussing strain gage installation in critical areas [ICAS PAPER 70-31]

23 p4267 A70-44102

STRAIN HARDENING

Dislocation climb theories of creep and superplasticity derived, postulating strain hardening and recovery processes with independently determined rates

02 p0317 A70-12315

Strain hardening on single crystals of aging Ni-based alloys with ordered separated phase

03 p0505 A70-13104

Ni-Nb intermetallic compound precipitation effect on various phase formations in strained samples of Alloy 718 /wrought Ni base alloy/

03 p0511 A70-13568

Transient creep analysis of simply supported circular cylindrical shells subjected to internal pressure based on strain and time hardening theories

03 p0595 A70-13813

Elastoplastic analysis of strain hardening materials under multiaxial states of stress based on von Mises yield condition and stress-strain relationship

03 p0596 A70-14012

Strain hardening equation for anisotropic medium under creep

05 p0952 A70-17035

Mechanical and electrochemical polishing effect on turbine blade alloy fatigue strength, discussing surface strain hardening as function of temperature in mechanical polishing

07 p1304 A70-18838

Stress corrosion testing of vanadium alloys using precracked specimens in cantilever beam apparatus, discussing strain hardening exponent role and propagation rates

07 p1306 A70-19299

Dynamic strain aging effect on Mo-Ti-C alloy creep, relating carbides precipitation during plastic deformation to mobile dislocations density

08 p1524 A70-21954

Cold rolling characteristics of unidirectionally reinforced Al-B fiber composites, measuring hardness and tensile properties

08 p1524 A70-21957

Metals yield locus in strain hardening range in sigma-tau plane determined using slip theory, considering Bauschinger effects

09 p1771 A70-22395

Temperature and strain dependence of strain anisotropy in Ti tested on longitudinal and transverse tensile specimens

09 p1705 A70-22807

Thermal cyclic loads effects on heat resistant materials strength during strain hardening, considering role of time factors in durability

09 p1779 A70-23104

Total Poisson ratio derivation from stress-strain relationship with known variations of elastic and plastic Poisson ratios for particular strain-hardening case

10 p1956 A70-24096

Power-law stress-strain relation in plastic complex stressed state, showing identical strain hardening curves for shear and tension

10 p1957 A70-24280

Plastic strains buildup during thermal cycling, establishing relation between strain interval and cycles number to failure for strain hardening materials

10 p1965 A70-25293

Tensile strain rate and oxygen concentration effects on peaks of niobium hardening zones involving interstitial atoms

12 p2252 A70-27001

Airframe structures fatigue crack propagation with and without strain hardening during variable amplitude loading

12 p2315 A70-27014

Kinetic theory for fatigue crack propagation using cyclic stress-strain relation in connection with strain hardening characteristics

12 p2322 A70-27208

Structural Al-Zn-Mg alloys strain hardening effect on mechanical and corrosion properties, noting relationship between stress corrosion cracking and shear cracks

13 p2434 A70-29155

Finite element displacement method for elastoplastic bilinear strain hardening orthotropic plates and shells, comparing initial and tangent stiffness

14 p2660 A70-31136

Al-Mg alloy nonpropagating fatigue cracks at roots of sharp notches, discussing cyclic strain hardening

14 p2598 A70-31299

Unloading shock waves propagation in elastoplastic medium, investigating strain hardening effect on shock strength decay, residual strains and radial stresses

15 p2815 A70-32002

Beta phase decomposition kinetics and strain hardening inhibitions in Ti-base Mo alloys, using metallographic, dilatometric and X ray analyses

15 p2764 A70-32855

Hysteresis loop behavior under tension-compression cycle fatigue related to Meyer strain hardness values of cyclically strained metals

16 p2934 A70-34334

Unalloyed alpha titanium mechanical properties, emphasizing grain size and interstitial content effects on strain hardening and deformation dynamics

17 p3116 A70-34391

Rate-sensitive perfectly plastic linear strain hardened rings and tubes, calculating response to impulsive loads

17 p3184 A70-34907

Fiber reinforced composite with ductile matrix, discussing fatigue life prediction from strain hardening characteristics

17 p3128 A70-35465

Elastoplastic deformations during explosive extrusion of pipes of different materials with linear strain hardening law

18 p3335 A70-36132

Strain hardening directionality during creep tests of tubular samples under combined tensile stresses and bending moments

18 p3341 A70-36588

Plasticity and strain hardening in sintered metals, considering pressure at pores and elastoplastic limit under small plastic deformation

20 p3644 A70-38962

Structural Ti, investigating effect of surface strain hardening by cold rolling on fatigue strength

20 p3648 A70-39250

Uniformly loaded thin elastoplastic spherical shells, calculating strain hardening and strain rate effects on transient response

21 p3935 A70-41255

Mo alloys strengthening by hydrostatic extrusion, combining dynamic strain aging with low temperature strain hardening

24 p4341 A70-45251

Solid solution hardening of single crystal Ta base alloys, measuring critical shear stress at various temperatures

24 p4365 A70-46370

STRAIN RATE

Strain rate, temperature and alloy content effects on plastic flow in binary substitutional alloys of bcc iron

01 p0119 A70-10735

Test fixture for determining mechanical properties of metals and steels at moderate strain rates, detailing design and instrumentation

03 p0462 A70-12883

Polycrystalline material tensile failure at high temperature, discussing intergranular cracking, shearing, etc

03 p0508 A70-13155

Polycrystalline Co strength and plastic properties tested at various temperatures and strain rates

03 p0510 A70-13352

Tensile tests on alpha Ti containing oxygen and hydrogen at various temperatures and strain rates to determine deformation and fracture

04 p0706 A70-15133

Plastic-viscoplastic bar wave propagation due to longitudinal impact, analyzing stress profiles to determine effect of strain rate

05 p0926 A70-15913

Adverse effects of temperature and strain rate on low cycle fatigue resistance of austenitic stainless steels at elevated temperatures compared with tension tests

06 p1086 A70-17452

Strain rate tensor coincidence in Lagrangian and Eulerian descriptions of turbulence demonstrated for homogeneous flow of incompressible fluid

07 p1252 A70-18672

Dislocation velocity-stress exponent for Nb single crystals calculated from strain rate sensitivity measurements of effective flow stress

07 p1314 A70-20011

Polycarbonate ductile fracture measured for strain energy release rates and plastic zone size and shapes to correlate with existing theories and experimental data

07 p1321 A70-20041

Electrically conductive ablative materials rapidly heated to 7000 F in test facility, discussing heating method and high strain rate testing

07 p1250 A70-20042

Viscoelastic perfectly plastic ring failure under uniform external pressure characterized by infinite strain rate occurring at finite value of ring deflection

07 p1416 A70-20300

Loading frequency effect on carbon steel energy dissipation at large stress amplitudes, deriving strain rate relations

08 p1516 A70-20980

Static and dynamic low temperature crack toughness behavior of steels, determining strain rate effect

08 p1518 A70-21317

Strain rate effects in cold metal working processes involving rolling and drawing

08 p1590 A70-21327

Strain rate effects on mechanical properties of solids under dynamic loading

08 p1590 A70-21328

Dynamic compressive properties of polypropylene, polystyrene bead and extruded polystyrene foams tested at given strain rate under room temperature

08 p1527 A70-21329

Tensile properties of yarns at high strain rates and subambient temperatures determined for nylon, Dacron, Nomex, Beta Fiberglass and Karma metal

08 p1527 A70-21330

Stress-strain behavior of Al and Ti alloys, beryllium and nonmetallic structural materials based on constitutive equations describing strain rate and temperature effects

08 p1518 A70-21331

Elastic-plastic work hardening sandwich arch under given loading rate analyzed for stress rates using integral equation [ASME PAPER 69-APM-21]

08 p1593 A70-21616

Temperature, transformation and strain rate effects on tensile ductility properties of stable and metastable compositions of austenitic stainless steels

08 p1524 A70-21956

Potential function of creep strain rates for incompressible nonstrengthening materials exhibiting different creep characteristics in tension and compression

09 p1769 A70-22122

Strain rate and hold time effects on steels low cycle fatigue behavior, graphing various correlations among stress amplitude, time to fracture, etc

09 p1774 A70-22589

Metals and plastics tensile strain rate sensitivity tested by drop weight tests, obtaining dynamic and static stress-strain curves

09 p1704 A70-22725

Chromium structural dislocation and cell formation during deformation as function of temperature, impurities and strain rate

10 p1902 A70-23861

Aluminum and aluminum-copper alloys dislocation damping at high strain rates using impact shear tests

10 p1903 A70-23983

Flow rule for viscoplastic symmetric cylindrical shells, using constitutive equations for strain rate sensitive materials based on Huber-Mises yield condition

10 p1954 A70-24020

Tantalum mechanical properties dependence during deformation on temperature and strain rate irregularities, discussing serrated yielding

10 p1904 A70-24386

Glass-epoxy composites failure mode dependence on matrix characteristics and fiber orientation, observing flexural strength increase with strain rate

10 p1908 A70-25174

Filament reinforced composites tested under dynamic compression loads for determining relations among strain rate, constituent properties, stress-strain behavior, fracture energy and mode

12 p2253 A70-27119

Stress relaxation in alpha titanium during plastic strain, measuring temperature and strain rate dependence

12 p2255 A70-27608

High temperature dislocation model based on dislocation dynamics, rate theory and varying back stress ratio

13 p2436 A70-29563

S glass fibers strength characteristics at quasi-static strain rates, considering temperature effects on elastic modulus

13 p2439 A70-29707

Cr-Ni cold worked austenitic steel dislocation structure in tensile tests at different strains

14 p2596 A70-30874

Tensile properties of fibrous materials at high rates of strain and subambient temperatures, considering nylon, Dacron, Nomex, Beta Fiberglass and Karma metal yarns

14 p2598 A70-30928

Strain rate tensor coincidence in Lagrangian and Eulerian descriptions of turbulence demonstrated for homogeneous flow of incompressible fluid

15 p2718 A70-31464

Iron sample shape determination for studying relationship between tensile strength and rate from stress wave propagation during high speed tensile tests

15 p2814 A70-31547

Nonlinearly elastic bodies under subcritical strain, analyzing boundary value problems for three dimensional stability

15 p2818 A70-32179

Plane deformation of anisotropic plastic nonstrain-hardenable material, analyzing state equations for stresses and strain rates

15 p2818 A70-32184

Precrack Charpy slow rate straining sensitivity of high strength steel at increased temperatures, comparing fracture energy of impact tests

15 p2758 A70-32238

Tapered cantilever Al plate load characteristics, determining elastic and plastic strain due to regular, reverse and second regular deflection sequence

15 p2821 A70-32307

Human skull porous dipole layer shear and compressive properties, measuring static and dynamic strain rates

15 p2683 A70-32308

Heat treatment effect on maraging steel fracture toughness and subcritical crack growth loaded at slow strain rate in laboratory air

15 p2760 A70-32377

Inconel 600 high temperature high strain rate fracture process by hot torsion tester, noting temperature effects

15 p2762 A70-32389

Metal property effects on deformation and strain energy distribution during hypervelocity projectile cratering

15 p2824 A70-32790

Materials testing machine for tension, compression and flexure at constant strain rate and for fatigue

16 p2900 A70-33067

Hot plasticity elongation of cast and wrought Ti-Al-V alloy as function of temperature and strain rate

17 p3117 A70-34401

Temperature and strain rate effects on polycrystalline Al strength

17 p3124 A70-34655

Rate-sensitive perfectly plastic linear strain hardened rings and tubes, calculating response to impulsive loads

17 p3184 A70-34907

Strain rate effect on cyclic behavior of materials with hardening and softening characteristics

17 p3187 A70-34988

Shock wave response of metals and nonmetals under high strain rates

17 p3188 A70-35223

Work hardening maxima of alpha-Ti as function of strain rate and temperature

19 p3451 A70-37568

Linear relations between stress state and Euler strain rate in isotropic elastic bodies during superposition of small deformation on finite strain

20 p3728 A70-39893

- Strain component determination for grain boundary sliding influence in creep of alpha iron
20 p3735 A70-40446
- Stress-strain characteristics at high strain rates, obtaining materials dynamic plastic properties by thin wafer technique
21 p3932 A70-40543
- Uniformly loaded thin elastoplastic spherical shells, calculating strain hardening and strain rate effects on transient response
21 p3935 A70-41255
- Deformations with constant strain invariants for elastic bodies under surface traction
22 p4113 A70-42543
- Strain rate change effect on stress-strain diagram shape of polycrystalline alpha-Ti during tensile tests over temperature range
22 p4054 A70-42737
- Ti embrittlement by liquid Cd, discussing ductile-brittle transition temperature dependence on strain rate
22 p4054 A70-42738
- Strained state of Ti and steel sheets during unsymmetric rolling, constructing deformed metal particles displacements rates field based on ideal fluid motion equations
22 p4045 A70-42814
- Strain rate sensitivity and stress waves effects on dynamic response and adhesion failures of rain erosion resistant coatings
22 p4059 A70-43102
- Strain rate sensitive materials tensile tests using machine with external variable speed motor
24 p4422 A70-45517
- Zn-Al alloy high velocity deformation characteristics, examining ductility and aging at various temperatures and heat treatments
24 p4363 A70-46194
- Superplasticity, discussing strain rate-flow stress relationship and grain boundary sliding
24 p4363 A70-46218

STRAIN SOFTENING

U PLASTIC DEFORMATION

STRANDS

- Brittle fibers strand strength as function of statistical distribution of limiting stresses
18 p3342 A70-36648

STRAPDOWN INERTIAL GUIDANCE

- Strapdown inertial guidance systems performance and applications
02 p0336 A70-12264
- Onboard modular computer research in strapdown guidance technology for computational ability and long term reliability of unmanned missions
07 p1238 A70-20062
- Nonlinear filtering methods for attitude computation in strapdown inertial navigation system
13 p2382 A70-29067
- Stable, soupcan size, field replaceable, plug in/out gyro unit strapped to vehicle body without gimbals
13 p2409 A70-29480
- Gyro test package, dynamic test facility and real time attitude algorithm to investigate operational capabilities of strapdown inertial attitude package
17 p3134 A70-35652
- Commercial aircraft strapdown inertial navigation systems, examining initial self alignment techniques
18 p3289 A70-36442
- Strapdown inertial guidance systems critical dynamic errors mathematical modeling and verification
[AIAA PAPER 70-1029] 20 p3666 A70-39508
- Apollo Lunar Module strapdown Abort Guidance system, correlating performance prediction with flight test results
[AIAA PAPER 70-1028] 20 p3666 A70-39509
- Ring laser gyro angular rate sensor for strapdown inertial systems
[AIAA PAPER 70-1025] 20 p3631 A70-39510
- Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer
[AIAA PAPER 69-851] 21 p3849 A70-41858
- Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources
[AIAA PAPER 69-848] 21 p3849 A70-41859
- Strapdown inertial system mechanization and modularized instrument packaging with self contained failure isolation, temperature control and redundant components
[AIAA PAPER 70-1027] 22 p4066 A70-42315
- Strapdown inertial attitude indication, describing static and dynamic tests, error propagation profiles, performance prediction, etc
22 p4068 A70-42668
- Gyro misalignment and encoder quantization effects for strapdown attitude error sources
22 p4040 A70-43588

STRATA
NT SUBSTRATES

- Sonic boom wave shapes and amplitudes determination in still stratified atmosphere, comparing U.S.

standard atmosphere results to various atmospheric models
03 p0411 A70-12927

Radio wave propagation in stratified media consisting of periodically stacked dielectric slabs solved for boundary condition by reducing Maxwell equations to Hill equation
06 p1007 A70-17463

Dynamic shear modulus and depth of dominant layer of vibrating elastic medium, assuming foundation as isotropic stratum on rigid bed
10 p1957 A70-24481

STRATEGY

- Optimal strategy for searching for object hidden in box involving use of optimal return function
05 p0877 A70-16715
- Sufficient conditions of optimality for strategic couple in theory of quantitative differential games
07 p1245 A70-19379
- Fault finding strategy optimization in systems with single defective element
09 p1693 A70-22974
- Optimal strategies for game with nature and two-automata zero sum game under finite memory constraints
11 p2073 A70-26241
- Continuous and discrete minimum time problems relationships and state space portraits during application of optimal strategies to system
11 p2029 A70-26749
- Extremal strategy to assure successful termination of pursuit at definite time, investigating sufficient conditions theorem
13 p2443 A70-29754
- Linear systems simultaneous optimal stochastic control and observation strategies, assuming quadratic observation cost
16 p2886 A70-33346

STRATIFICATION

NT ATMOSPHERIC STRATIFICATION

- Electromagnetic wave propagation through stratified positive plasma column in waveguide, noting stratification travel effects on wave amplitude and phase shift
03 p0443 A70-13096
- Refractive index profile analysis for hypergeometric functions solutions for vertically polarized electromagnetic waves propagating in horizontally stratified isotropic media
04 p0647 A70-14616
- Automatic control for filling tanks with stably stratified liquids using analog mixture valve and digital metering pump methods
06 p1062 A70-17617
- HF cylindrical waves propagation by line source in stratified medium, investigating refraction and diffraction at plane boundary using mathematical and ray methods
07 p1335 A70-19683

STRATIFIED FLOW

- Stratified air flow above relief in baroclinic atmosphere, considering plane nonlinear and three dimensional linearized flow models
03 p0521 A70-13270
- Wave drag in stratified flow lee waves without upstream influence calculated for cylindrical and three dimensional obstacles
03 p0479 A70-14229
- Forced vertical oscillations in viscous stratified fluid, showing phase angle dependence on amplitude and relation to Brunt-Vaisala frequency
04 p0666 A70-14611
- Natural convection heat transfer from vertical plate immersed in thermally stratified fluid
06 p1175 A70-17685
- Instability of plane Couette flow of three superposed layers of fluids of different viscosity between two horizontal planes
07 p1260 A70-19978
- Turbulent energy spectra in stably stratified atmospheric boundary layer flow
09 p1715 A70-22360
- Stably stratified atmospheric turbulent shear flow governing spectral equations asymptotic solutions for buoyancy subrange
09 p1659 A70-22372
- Elasticity stratification stabilization effect on two layer flows down inclined plane found dependent on time response difference between layers
10 p1863 A70-24009
- Waves and mean currents excitation in stratified fluid due to moving heat source, studying effect on mean motion
11 p2036 A70-26167
- Interfacial and free surface mode instabilities of time periodic flows of viscosity and density stratified fluids at various Froude numbers
14 p2566 A70-31026
- Turbulent flow in stratified fluids over flat plate, relating density profile curvature and heat transfer
16 p2895 A70-34242
- Shear flow perturbations in inviscid incompressible stratified fluid of given density, comparing stability characteristics with jet flow
16 p2895 A70-34243

Stratified-rotating fluids mathematical analogy, examining flow constraints, parameters and variables
17 p3068 A70-34664

Horizontal boundary layers development on flat plate in nondiffusive stratified flow characterized by Reynolds and Russell numbers
18 p3239 A70-36192

Density diffusion and buoyancy effects on horizontal boundary layers in stratified flow
18 p3239 A70-36193

Viscoelastic fluids stratified flow down inclined plane, examining liquids elasticity role in stability
19 p3403 A70-37531

Stability of thermal and inertial perturbations superimposed on unstably stratified plane parallel flow with variable vertical shear
19 p3462 A70-37753

Weak stratification and geometry effect on steady mechanically driven motion of contained rotating viscous fluid
20 p3608 A70-39357

Small viscosity and heat conductivity in solutions to critical layer in stratified shear flow
20 p3608 A70-39447

Two dimensional body slow motion through stratified fluid bounded by parallel vertical walls, examining flow at different Peclet numbers
21 p3744 A70-41246

Miles-Howard theorem extension to gravitationally stratified compressible fluid containing parallel shear flow, considering stability against adiabatic perturbations
23 p4179 A70-43976

Two dimensional stratified flow over extended obstacles with source disturbances, indicating topographical effect on vertical wind shear in troposphere
23 p4214 A70-44031

STRATIFIED LAYERS

U STRATA

STRATIGRAPHY

- Continental migration role in lunar maria formation, suggesting similarity with geological formation of earth ocean floor
09 p1765 A70-23797
- Book on stratigraphic view of lunar geology covering lunar craters and terrestrial analogs, remote sensing, material ages, surface interpretations and Apollo mission results
13 p2491 A70-29060

STRATOCUMULUS CLOUDS

- Upper surface roughness of internal st-sc clouds as function of vertical temperature and moisture in overlying inversion layers
08 p1537 A70-21106
- Cloud layer vertical displacement effects on upper boundary and temperature changes in st-sc using aircraft sounding data
08 p1537 A70-21107

STRATOFORTRESS AIRCRAFT

U B-52 AIRCRAFT

STRATOPAUSE

- Molecular hydrogen, methane, water vapor and tritium concentrations near stratopause from air samples collected on Aerobee flight with liquid hydrogen cooled cryocondenser
15 p2728 A70-31995
- Zero pressure balloon as base for stratopause pressure and temperature measurements, analyzing winds and balloon trajectory and dynamics
17 p3075 A70-34608

STRATOSPHERE

- Stratospheric circulation and temperature variations periodicity, discussing midwinter warmings, polar vortex breakdown and relations to D region anomalies and solar events
01 p0072 A70-10580
- Stratospheric temperature changes connection with winter D region absorption changes
01 p0073 A70-10583
- Wind oscillations in stratosphere, lower mesosphere and meteor heights noting periodicities
01 p0074 A70-10591
- Stratospheric water vapor distribution from analyzing IR solar spectrum during sunset observed by balloon-borne spectrometer
01 p0081 A70-11295
- Ionospheric absorption associated with sudden stratospheric warmings following geomagnetic disturbances in 1958 and 1963
02 p0290 A70-12159
- Stratospheric circulation model developed from radioactive element measurements, discussing large scale processes, seasonal variations, etc
02 p0291 A70-12291
- Vertical ion concentration profile in troposphere and stratosphere from ozone distribution satellite measurements using aeronomical reactions
02 p0291 A70-12389
- Stratospheric air intrusion into troposphere calculated for speed and frequency of occurrence, considering mass and energy transfer
02 p0329 A70-12690
- Superpressure balloon flight trajectories for dynamics of tropical stratosphere, revealing distinctive circulation features
02 p0228 A70-12694

Vertical concentration and size distribution determinations for aerosols in stratosphere, suggesting volcanic origin

02 p0294 A70-12842

Rocket-borne cryogenic sampler for stratospheric composition measurement by mass spectrometer analysis for computing radiation balance in stratosphere [AAS-PAPER 69-569]

04 p0687 A70-14661

Daily variations of winter stratospheric zonal wind and planetary waves based on synoptic charts from balloon observation

05 p0878 A70-16148

Meteorological conditions effects on SST aircraft flight safety and economics, emphasizing stratospheric information for forecasting

06 p1095 A70-17193

Stratospheric clear air turbulence over squall line, discussing turbulence over thunderstorms

06 p1102 A70-18588

Soviet book on nonperiodic processes in Northern Hemisphere stratosphere, discussing seasonal temperature fields, geopotential and circulation formation

07 p1261 A70-18733

Tropospheric and stratospheric turbulent horizontal heat and momentum transfer spectral density profiles calculations from radio launchings data

07 p1269 A70-19646

Collection of papers on stratospheric circulation covering rocket sounding, upper atmospheric clouds, climatology, etc

07 p1272 A70-20251

Meteorological Rocket Network for limited synoptic inspection of stratospheric circulation

07 p1273 A70-20252

Skua meteorological rocket system for synoptic stratospheric sounding, describing system, launch preparation, firing and flight characteristics

07 p1395 A70-20253

PWN-8B meteorological rocket system for synoptic investigation of stratospheric circulation, describing sensor system deployment for descent measurements of wind and temperature

07 p1395 A70-20255

Kookaburra meteorological rocket system for sounding stratospheric circulation, describing instrument payload deployment for descending wind and temperature measurements

07 p1395 A70-20257

Parachute wind sensors used in Arcas and Loki sounding rocket systems for stratospheric sounding, describing position data acquisition via radar tracking

07 p1395 A70-20259

Temperature measurement in stratospheric circulation by meteorological rocketed-on wire sensor, presenting error correction technique

07 p1289 A70-20264

Stratosphere-ionosphere coupling, dynamo theory on geomagnetic Sq variation and ionosphere radio wave absorption and reflection

07 p1274 A70-20271

Planetary scale disturbances in winter stratospheric circulation during sudden warming using rocket observations

07 p1274 A70-20272

Stratospheric and mesospheric circulation during winter, investigating wind fluctuations using meteorological rocket observations

07 p1274 A70-20274

Spatial variations in zonal and meridional components of stratospheric and mesospheric winds traced over horizontal distances by Arcas ROBIN rockets

07 p1274 A70-20275

Atmospheric gravity wave generation, propagation and dissipation, considering stratospheric tides

07 p1275 A70-20276

Synoptic changes associated with midwinter 1967-1968 major stratospheric warming, including pressure and wind distributions and temperature maps

07 p1275 A70-20277

Meteorological rockets fired in Spain, obtaining stratospheric wind and circulation data

07 p1396 A70-20278

Meteorological guns for synoptic sounding of stratospheric circulation, discussing system characteristics and operations

07 p1250 A70-20280

Seasonal variation of vertical profiles of atmospheric radioactivity concentration between stratosphere and troposphere due to meridional zonal wind distribution caused by eddy diffusion

08 p1539 A70-21923

Troposphere-stratosphere kinetic energy transfer during 1967-1968 midwinter warming, comparing calculation by pressure interaction term with direct calculation of vertical velocity fields

08 p1540 A70-21969

Lee wave theory for two dimensional stratified atmospheric models, noting local intense vertical beam into high stratosphere

08 p1540 A70-21972

Linear nonstationary quasi-geostrophic model with external and internal heating and forcing for dynamics of ultralong waves in troposphere and lower stratosphere

09 p1713 A70-22304

Stratospheric CAT layer energy budget analysis, considering energy shear feeding, buoyant extraction and frictional dissipation

09 p1715 A70-22357

Stratosphere-mesosphere coupling phenomena during sudden stratospheric warmings, considering ozone and ionospheric drift measurements

10 p1913 A70-24948

Stratospheric equatorial wind period phases correlation with central European westerlies frequency, intensity and persistency, noting seasonal differences

10 p1913 A70-24950

Tropical and midlatitude stratospheric dust by twilight photometry, considering possible causes of anomalous turbidity levels

11 p2046 A70-26388

Water vapor pollution of stratosphere by supersonic transports, considering effects on temperature, cloudiness, albedo, etc

11 p2077 A70-26618

Stratospheric water vapor measurement by submillimeter wave sounding, considering signal fluctuations due to scattering by high cirrus clouds

11 p2077 A70-26619

Stratospheric clear air turbulence (CAT) vertical extent above thunderstorm graphically represented

12 p2265 A70-28095

Solar spectra recording by balloon-borne monochromator, measuring stratospheric Ir absorption

13 p2491 A70-29050

Lower stratosphere ozone formation, suggesting origin in cosmic rays absorption

13 p2400 A70-29472

Vertical momentum flux correction for planetary scale gravity waves in equatorial lower stratosphere

13 p2445 A70-29623

Middle stratospheric circulation in Southern Hemisphere, associating temperature changes and ozone content with planetary wave passage in Antarctic polar vortex

14 p2568 A70-30123

Lower stratosphere temperature and wind periodic variations associated with shear flow gravity waves

14 p2601 A70-30124

NO and nitrogen dioxide influence on ozone concentration and production rate in stratosphere

14 p2568 A70-30125

Mesoscale stratospheric turbulence recording using even activated memory recorder

14 p2573 A70-30578

Upper stratosphere-mesosphere monthly-mean charts from reentry heating and atmospheric model based on hydrodynamics

14 p2608 A70-30590

Stratospheric warmings effect on atmospheric density field variations

14 p2608 A70-30592

Strong wind and vertical wind shear in upper stratosphere and mesosphere

14 p2608 A70-30594

Stratospheric CAT-internal wave relationship, using aircraft and radiosonde HICAT measurements

14 p2609 A70-30603

Stratospheric and mesospheric ozone diurnal variation by rocket-borne ozonesonde in January 1968

14 p2577 A70-31170

Stabilized balloon flights during weak winds in stratosphere, discussing pressure vs time curves

14 p2531 A70-31311

Troposphere-stratosphere kinetic energy transfer (1964-1968), annual variations and vertical flux correlation to circulation pattern

15 p2722 A70-31441

Solar Monitoring Experiment program, observing solar activity relation to large enhancements of lower stratosphere secondary radiation

15 p2792 A70-31656

Vertical temperature profiles and global circulation patterns in stratosphere and mesosphere, discussing Northern Hemispheric seasonal, latitudinal and longitudinal variations

15 p2724 A70-31665

Upper stratosphere and mesosphere structure and circulation in Southern Hemisphere, using meteorological rockets and radiosonde data

15 p2724 A70-31683

Troposphere and lower stratosphere trace element concentration measurements, establishing origin, history and movement of various air masses

15 p2728 A70-31996

Kelvin wave propagation numerical model, showing influence of mean zonal wind vertical and horizontal shear in lower stratosphere

15 p2771 A70-32370

Lidar probing of stratosphere and mesosphere using automatic data acquisition system

16 p2862 A70-33016

Winter stratospheric circulation quasi-geostrophic model based on joint radiative-photochemical equilibrium, investigating ozone cycle and warming

16 p2945 A70-33250

Constant altitude helium filled zero pressure polyethylene balloon for stratospheric meteorological data and atmospheric tides studies

17 p3075 A70-34607

IR balloon observations of absolute solar brightness and stratosphere transparency, discussing BCA and HSRA models

17 p3078 A70-35580

Radionuclides production rates in stratosphere from spallation reactions of cosmic rays with Ar

17 p3152 A70-35759

Weak ion concentration in stratosphere and mesosphere measured using accumulated capacity amplifier

18 p3257 A70-36179

Charged particle balance equations for stratosphere and mesosphere, noting particle composition investigation and formation and annihilation processes

19 p3491 A70-37311

Ozone effect on stratospheric electricity based on numerical calculations of ion densities

19 p3413 A70-38005

Annual temperature variation in low stratosphere based on harmonic analyses at 100 mb

19 p3462 A70-38263

Stratospheric perturbation sources from atmospheric circulation as function of season, geographic latitude and altitude, suggesting high energy protons in atmosphere

20 p3618 A70-39183

Explosive and diffuse stratospheric warmings over Arctic attributed to solar activity and stratospheric circulation

20 p3618 A70-39184

Polar stratospheric winter explosive warmings correlated with solar high energy charged particles injections

20 p3618 A70-39185

Synoptic processes in Arctic tropospheric and lower stratospheric warming correlated with atmospheric circulation transformations

20 p3619 A70-39186

Synoptic processes in troposphere and stratosphere with large air temperature anomalies during early summer in U.S.S.R.

20 p3663 A70-39272

Troposphere and lower stratosphere circulation during natural synoptic autumn seasons in Northern Hemisphere, noting temperature role

20 p3663 A70-39273

Trace constituent changes effects on stratospheric properties after volcanic eruption, showing prolonged atmospheric temperature increase

20 p3622 A70-39490

Book on molecular and aerosol backscatter measurement from stratosphere by means of ground based laser beams

20 p3623 A70-39925

Midlatitude stratosphere and lower ionosphere density model, discussing vertical, diurnal and seasonal variations effects on spacecraft trajectories

21 p3813 A70-40830

Midwinter warming period upper stratospheric vertical motion fields, obtaining 2-mb charts

21 p3847 A70-42123

Temperature and height data for synoptic stratospheric evaluation, using Nimbus 3 satellite IR spectrometer

22 p4064 A70-42618

Stratospheric clear air turbulence probability based on vertical temperature gradients and rawinsonde ascensional rates

22 p4064 A70-42619

Air-earth current density time variation in stratosphere by high altitude balloon, comparing with potential gradient diurnal variation over ocean

22 p4017 A70-42798

Stratospheric electric field and conductivity measurements using balloon-borne electrometer tube circuit

22 p4018 A70-42799

Stratosphere annual temperature cycle amplitude, using biannual daily temperatures over Northern Hemisphere from IQSY data

22 p4018 A70-42913

Thermosphere, stratosphere and mesosphere reactions involving water, hydrogen, methane, ozone, nitric oxide and nitrogen peroxide

22 p4023 A70-43298

Air circulation spring restructuring in Northern Hemisphere upper stratosphere, investigating summer stratospheric anticyclone evolution

22 p4066 A70-43378

Stationary disturbances in winter Northern Hemisphere stratosphere considered as upward propagating Rossby waves, assuming zonal winds profile

23 p4213 A70-44030

STRATOSPHERE RADIATION

Solar protons in subpolar stratosphere during solar activity minimum indicated from proton measurements at Tiksi Bay

07 p1374 A70-20444

Stratosphere radiation measurements by Nimbus 3 infrared spectrometer for 15 micron frequency, considering temperature variations

24 p4330 A70-46074

STRATOTANKER AIRCRAFT

U C-135 AIRCRAFT

STRATUS CLOUDS

Time dependent height of lower boundary of subinversion stratus clouds using atmospheric moisture and heat transport equations

08 p1537 A70-21102

Vertical motions and turbulent exchange influence on height variation of stratus clouds based on atmospheric moisture and heat transport equations

08 p1537 A70-21103

Short wave radiation model of single layer stratus and stratocumulus cloud based on actinometric soundings of lower troposphere

08 p1537 A70-21104

Upper surface roughness of internal st-sc clouds as function of vertical temperature and moisture in overlying inversion layers

08 p1537 A70-21106

Cloud layer vertical displacement effects on upper boundary and temperature changes in st-sc using aircraft sounding data

08 p1537 A70-21107

Artificial crystallization theory for supercooled dry-ice seeded stratus clouds, taking into account condensation growth and turbulent diffusion of crystals

08 p1538 A70-21108

Vertical and horizontal expansion rate of crystallization of dry-ice seeded internal stratus clouds

08 p1538 A70-21109

IR reflectance of cirrostratus and cirrus clouds and jet contrail measured by spectrometer on high altitude aircraft

11 p2045 A70-25626

Vertical profiles of daytime and nighttime long wave radiation fluxes in atmosphere under stratus cloud conditions

12 p2264 A70-27521

Stratus cloud dissipation process in descending vertical currents, using thermohydrodynamic and kinetic equations for cloud droplet distribution function

22 p4066 A70-43377

STREAM FUNCTIONS [FLUIDS]

Ideal fluid planar potential flow, approximating stream function and velocity potential by matrix method

07 p1253 A70-18925

Nonlinear stability of plane Couette flow, computing stream function, vorticity distribution and Reynolds stresses

07 p1255 A70-19211

Two-stream and cross-stream effects on nonlinear wave stability with shock in collisionless plasma

10 p1921 A70-23967

Monograph on Beltrami steady state, frictionless flow of incompressible medium past spherical surfaces, assuming vortex and stream lines agreement

11 p2034 A70-25498

Regularity domain and singularity location of stream function of transonic two dimensional compressible fluid flow, using integral operators

12 p2260 A70-26972

Shear stress and velocity profiles in three dimensional mixing layer between grazing perpendicular streams

20 p3608 A70-39356

Coriolis parameter effects on stream and pressure functions in geostrophic wind equation

22 p4065 A70-43167

Momentum source interaction with viscous uniform stream, constructing perturbation solutions from nonlinear equations

24 p4327 A70-46040

STREAMLINE FLOW

U LAMINAR FLOW

STREAMLINED BODIES

Flow and pressure distribution for large normal injection along surface in supersonic stream solved numerically for two dimensional or axisymmetric body and wedge

01 p0001 A70-10336

Transonic flow theory for two and three dimensional streamlined bodies in steady irrotational flow of inviscid perfect gas

12 p2158 A70-28201

Flow past streamlined obstacles under nonNewtonian fluid injection into hydrodynamic laminar and turbulent boundary layer

21 p3812 A70-42266

STREAMLINING

Streamlining design for high altitude hypersonic flight vehicles based on drag minimization at flight condition

07 p1189 A70-19717

STREAMS

NT GAS STREAMS

NT RIVERS

Lunar sinuous rilles and Mojave desert stream channels similarities, discussing presence of terraces

11 p2108 A70-25701

STRENGTH OF MATERIALS

U MECHANICAL PROPERTIES

STREPTOMYCIN

Streptomycin effects on euglena gracilis chloroplasts, comparing effects on chloroplast ribosomal system to cytoplasmic ribosomal system

09 p1616 A70-22302

STRESS [BIOLOGY]

Penicillium mutant chemical stress tolerance in boric acid and potassium chloride selective media, studying carbohydrate and inosine-5-phosphate effects on growth rate

10 p1811 A70-24325

Force input and thoraco-abdominal strain due to sinusoidal motion of electrohydraulic shake table over 2-14 Hz range imposed on human body

13 p2359 A70-29438

Day/night thermal IR imagery detection of moisture stress of girdled trees in upland forest

16 p2898 A70-34047

STRESS [PHYSIOLOGY]

NT ACCELERATION STRESSES (PHYSIOLOGY)

NT CENTRIFUGING STRESS

Human EEG relationship to verbal behavior, discussing separation of stressful from nonstressful verbal stimuli, semantics and question-answer sequences

02 p0236 A70-12119

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises

03 p0425 A70-13898

Mechanical vibrations effect on man including motor vehicle dynamic vibrations

03 p0439 A70-14097

Physiological limitations of air traffic controllers, considering stress factors connected with workload

04 p0716 A70-15314

Coronary atheroma in hyperlipemic dog occurring in arterial tree at most intense physical stress exposure point, discussing interfacial tissue permeation

04 p0635 A70-15460

Glutethimide and aminoglutethimide reversible inhibitory effect on rat pituitary adrenal system in response to stress

07 p1203 A70-18902

Physiology of high altitude, studying animal and man adaptation and changes in body processes due to life stresses and hypoxia

08 p1441 A70-20469

Beta-adrenergic blockade effect on abnormal R-ST segment and T-wave changes, showing propranolol use in stress catecholamine and organic cardiovascular diagnosis

08 p1449 A70-21945

Heart frequency profiles of persons during parachute jumps measured by electrocardiograms recorded directly and telemetrically to investigate psychical and physical stresses

09 p1626 A70-23010

Biological performance studies under extreme environmental stresses for gaining insight into potential of earth-type life here and in universe

09 p1623 A70-23699

Prolonged hypodynamia effect on human external respiration, arterial blood oxygenation, circulation rate and gas exchange under various physical stress conditions

10 p1814 A70-24674

Ischemic heart disease /IHD/ prognosis using abnormal electrocardiographic stress test

10 p1820 A70-24940

Thermal stress /high ambient and body temperatures/ effect on human performance in high mental and low physical activities

12 p2177 A70-27043

Civilian pilot trainee stress level dependence on individual flying instructors, detecting psychophysiological variables by inflight recording

12 p2178 A70-27044

Physiological indices criteria for human thermal stress tolerance, discussing rectal temperature, body surface condition, body temperature and local cooling effects

13 p2351 A70-29332

Stress distribution and pressure distending air spaces in lungs, using mechanical pulmonary elasticity model

13 p2356 A70-29945

Human femur junctions load actions and stresses during walking calculated from measurements

15 p2692 A70-32327

Nonlinear wave equations model for human torso under impulsive stress, obtaining asymptotic solution

16 p2854 A70-34247

Environmental heat stress indices of human subjects in bicycle ergometer experiment

18 p3224 A70-36226

Heat stress effects on serial reaction time in subjects performing visual tasks

19 p3361 A70-38053

Cardiovascular stress testing using posterior bipolar lead for radiotelemetry monitoring

20 p3578 A70-39199

Sinusoidal vibrations effects on rats at different air pressures, discussing human vibration tolerances and resonant frequencies of thoraco-abdominal system

20 p3572 A70-39434

Book on environment and human efficiency covering stress mechanisms, experimentation, exposure to chemicals, radiation, noise, heat, cold, machines, etc

22 p3967 A70-42457

Epidemiological investigations of coronary disease in Finland, relating customary loads and working capacity

22 p3969 A70-42903

Sympathetic transmission model, discussing transmitter liberation capacity under various stresses by mobilization of stores, acceleration of synthesis, etc

24 p4299 A70-45804

Brain cortex protein metabolism alterations induced by anticipation stress and ACTH in rats

24 p4301 A70-45999

STRESS [PSYCHOLOGY]

Nervous stress effect on coronary thrombosis, deriving mathematical theory based on biophysical and biochemical approaches

01 p0028 A70-11369

Human EEG relationship to verbal behavior, discussing separation of stressful from nonstressful verbal stimuli, semantics and question-answer sequences

02 p0236 A70-12119

Management role in air traffic controllers stress reduction, considering human factors affecting ATC system capacity

03 p0439 A70-14316

Exercise habits and environmental emotional stresses role in origin and prevention of degenerative heart disease

07 p1212 A70-19692

Aircraft pilots psychic and flight stress admissible degree not resulting in hazardous consequences, suggesting measures to increase resistance

09 p1625 A70-23006

Heart frequency profiles of persons during parachute jumps measured by electrocardiograms recorded directly and telemetrically to investigate psychical and physical stresses

09 p1626 A70-23010

Psychic stress causing factors and reactions in aircraft pilots on duty, analyzing harmful effects on organism

09 p1620 A70-23012

Aircraft pilots physical exercise program to maintain optimal state of fitness, discussing harmful effects caused by nervous and psychic strains

09 p1626 A70-23014

Soviet book on nervous stress and cardiac activity covering hypothalamus and cardiovascular reactions and cardiac component of complex conditioned reflexes and emotional reactions

10 p1809 A70-23873

Mental blocking /incidental long reaction times/ during continuous serial performance using perceptual-selection and response theories

12 p2178 A70-27045

Human tracking performance in position, rate and acceleration control systems under short term psychological stress induced by electric shocks

16 p2853 A70-33689

Rheoencephalographic recording of healthy persons during rest and mental tension in expectation of stimulus

18 p3222 A70-37219

Air traffic controller stress reduction, discussing work-rest intervals and various management and human factors

19 p3371 A70-38647

Human mental stress evaluation through chemical analysis of 17-hydrocorticosteroid level in parotid fluid

24 p4308 A70-45509

Psychological training and selection of airline pilots for stress resistance [DEVL-SONDDR-53]

24 p4310 A70-46413

STRESS ANALYSIS

NT PHOTOGRAPHIC MEASUREMENT

NT SCHWARTZ METHOD

NT X RAY STRESS ANALYSIS

Holographic interferometry as stress analysis technique for crack propagation studies, discussing advantages over classic interferometric and conventional photoelastic methods

01 p0198 A70-10002

Stress criterion for unstable crack propagation from Al alloy sheet tests, examining fracture data for vessels of various geometries and materials [ASME PAPER 69-SESA-2]

01 p0117 A70-10451

Thermal stresses in infinite layer of transversely isotropic material due to crack with prescribed normal displacement, deriving temperature distribution

01 p0200 A70-10552

Nonlinear stress relation in elastic media incompatible deformations, eliminating elastic distortions for known temperature distribution and thermal distortion

01 p0201 A70-10890

Out-of-plane displacement restraint at thin photoelastic plates bonded to rigid boundaries of inclusions inducing transverse stress components causing plane stress solution deviation

01 p0202 A70-11059

Numerical solution of bending stresses in internally pressurized elliptical tubular or ring specimens for testing uniaxial and multiaxial fracture strength

01 p0203 A70-11061

- Stresses in plane elastic bodies analyzed by generalizing biharmonic stress function equation in polar coordinates, assuming constant Poisson ratio and nonhomogeneity 01 p0206 A70-11152
- Transient thermal stress concentration at small thickness change of plate obtained by photoelastic studies 01 p0207 A70-11157
- Residual stress determination in elastoplastic body with known plastic strains, using Hilbert space for symmetric tensor fields 01 p0209 A70-11399
- Sandwich panel equations derived from elasticity theory equations applicable to stress analysis in internal zone and edge effects analysis 01 p0210 A70-11409
- Stressed state of circular notched plane in tension under creep conditions 01 p0210 A70-11410
- Construction of formulas relating stresses and plastic deformations describing inelastic bodies behavior under complex loads 01 p0210 A70-11411
- Stress analysis of eyebolts in turbine blades hinged loads based on perforated plate theory with concentrated force, discussing stress distributions 01 p0210 A70-11416
- Automated structural design program to treat stress, displacement, gauge and cross sectional constraints, discussing applications to aircraft structures 02 p0386 A70-11944
- Linear theory of second grade elastic materials for small deformations, discussing special case of couple stress 02 p0387 A70-11995
- Photoelastic stress analysis of shouldered shafts with keyways in shanks under direct loading and torsion, including keyway and shoulder fillet stresses 02 p0388 A70-12496
- Stress-strain analysis of rectangular plates under concentrated load, noting sealed liquid compressibility effect on deflections and bending moments 02 p0388 A70-12499
- Piezoelectric transducer for photoelastic analysis of HF stress waves in thick ring subjected to transient loads 02 p0389 A70-12500
- Elastic deformation of plates with circular holes, determining stress concentration factors for compressible and incompressible materials on digital computer 02 p0390 A70-12810
- Bending strength analysis for high strength beam with thin and long fibers embedded in matrix of viscoelastic material noting maximum stress 03 p0584 A70-12934
- Out-of-plane restraint effect on plane-stress solutions near straight boundaries, predicting deviation of two dimensional photoelastic results 03 p0584 A70-12951
- Frozen stress techniques for photoelastic analysis of orthotropic plate on nonlinear foundation, providing results to compare with future finite element analysis 03 p0480 A70-12952
- Incremental strain theories for nonproportionate loading of thin walled cylinders, discussing Tresca flow, von Mises theory and Prandtl-Reuss relations 03 p0480 A70-12953
- Stress-optic law for orthotropic composites photoelastic stress analysis, investigating use of transparent filament-resin composites 03 p0481 A70-12956
- Case bonded solid propellant rocket motors stresses under transverse body force loading as function of load orientation, case stiffness and support method [SESA PAPER 1502] 03 p0579 A70-12961
- Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis 03 p0482 A70-12967
- Pseudo two dimensional photoelastic test method applied to axisymmetric solid propellant rocket grains under pressure and thermal loads 03 p0482 A70-12968
- Axisymmetric elasticity theory problem of stressed state of space weakened by concentric circular cracks solved using p-analytic functions to generate boundary value problems 03 p0586 A70-13077
- Plane elasticity solution for differential expansion stresses on interface of laminated elastic rectangular strip 03 p0586 A70-13114
- Stress-strain state of material computed from strain measurements using strain gages and strain circle 03 p0588 A70-13272
- Monograph on elevated temperature strength data for wrought austenitic stainless steels, considering yield, tensile, creep and rupture strengths for allowable stresses 03 p0510 A70-13300
- Stress distribution in half space of inhomogeneous media, studying scale and edge effects relation for elastic and ideally plastic media 03 p0590 A70-13376
- Spherical shell elasticity having circular hole at apex using asymptotic method, calculating stress concentration at hole 03 p0590 A70-13381
- Unsteady temperature field induced stresses and strains in hollow viscoelastic sphere calculated by solving integrodifferential equation having right hand side dependent on time function 03 p0590 A70-13398
- Stress-strain state of body of revolution having transversely isotropic elastic properties, using perturbation technique 03 p0591 A70-13441
- Thin shells stressed state calculations by iteration, considering suitability for computer adaptation 03 p0592 A70-13442
- Plane-strain equations for deformation of weakly plastic anisotropic body analyzed by small parameter method 03 p0592 A70-13446
- Rectangular anisotropic beam torsion using Green function combined with wide step network method 03 p0593 A70-13471
- Stress differential equations of equilibrium for thick prolate spheroid /left ventricle/, yielding practical values for mean stresses in thick walled ventricles 03 p0434 A70-13571
- Scattered light photoelastic stress analysis using doubly refracting materials and lasers 03 p0594 A70-13657
- Variational stress solutions for static case of bounded bodies in Cosserat continuum theory, assuming anisotropic inhomogeneous material and defining boundary value problem solution 03 p0596 A70-13973
- Variational principles in linear elasticity theory with couple stresses, solving boundary value problems in Mindlin theory with microstructure and first strain gradient theory 03 p0596 A70-13974
- Elastoplastic analysis of strain hardening materials under multiaxial states of stress based on von Mises yield condition and stress-strain relationship 03 p0596 A70-14012
- Shadow optical raster method for quantitative investigation of dynamic stress states in two dimensional transparent or reflecting bodies 03 p0496 A70-14215
- Polyurethane rubber time- and temperature- dependent visco- and photoviscoelastic coefficients using two dimensional strain and stress wave propagation photoviscoelastic analysis 03 p0599 A70-14243
- Book on stress analysis for designers covering stress types and calculation, specimen geometry, structural fatigue and stability, etc 03 p0600 A70-14307
- Transient thermal stresses in photoelastic models of various shapes under various steady state or transient temperature conditions, describing instrumentation and experimental methods 03 p0600 A70-14308
- Long thin cylindrical tube with circumferential restraint analyzed for thermal expansions, obtaining maximum strains, bending moments, shear forces and plastic zone extent [ASME PAPER 69-WA/NE-7] 04 p0768 A70-14756
- Pressure vessel deformation and stress analysis by matrix displacement method, considering solids and membrane shells under axisymmetric and asymmetric loading [ASME PAPER 69-WA/PVP-3] 04 p0768 A70-14790
- Astatic equilibrium loadings in Saint Venant principle for linear elasticity, analyzing physical distinction from self equilibrated loadings to explain smaller long range stresses [ASME PAPER 69-APM-L] 04 p0769 A70-14860
- Solid viscoelastic cylinder bonded to thin elastic casing, analyzing normal and tangential stresses for stress and displacement frequency responses in forced transverse vibration [ASME PAPER 69-WA/APM-20] 04 p0771 A70-14911
- Stress analysis for nonlinear viscoelastic cylinder with ablating moving inner surface used to investigate propellant grain in solid fuel rocket under firing condition [ASME PAPER 69-WA/APM-14] 04 p0771 A70-14914
- Stress analysis of shell loaded at free edge by concentrated forces and moments 04 p0772 A70-14920
- Disk stress concentrations calculation beyond elastic limits taking into account effect on bearing capacity 04 p0775 A70-15261
- Stress analysis split method for determining residual strength and fatigue crack life of damaged or initially cracked VTOL structures [AIAA PAPER 69-214] 04 p0624 A70-15395
- Stress factor-displacement relation in cruciform line crack deformation in elastic medium under arbitrary internal pressure 05 p0926 A70-15976
- Stress concentration effects around spherical cavity under uniaxial tension calculated by constitutive equations of micropolar elasticity 05 p0927 A70-15994
- Torsion tests on cylindrical plastic metals, considering shear stresses calculation as function of torsion angle and changes determination as function of increasing cold work 05 p0927 A70-15996
- Photoelastic and photorheological analysis of time-dependent variation of stress distribution in long strip compressed oppositely with elastic flat punches 05 p0928 A70-16012
- Materials in spatial motion criteria of stress power positiveness 05 p0929 A70-16069
- Axial point force stresses in infinite elastic cylinder determined by superposition of Love solution and normal and shearing tractions 05 p0930 A70-16081
- Axisymmetrical stress-strain analysis of viscoelastic cylinder enclosed in elastic shell under internal pressure using singular kernels 05 p0933 A70-16207
- Linear isothermal quasi-static theory for homogeneous and isotropic viscoelastic bodies with couple stresses 05 p0938 A70-16425
- Stress gradient theory interpreted in terms of time dependent failure criterion to study critical stress vs impulse theory of spall fracture 05 p0938 A70-16481
- Elastoplastic thick layer with disk-shaped crack analyzed for stress and strain, determining width of plastic zone 05 p0939 A70-16482
- Stress analysis of curved tubes capable of accounting for all end effects based on shell theory equations 05 p0944 A70-16811
- Torospherical heads design pressures compared from results of elastic-plastic and elastic-stress analyses to examine use of limiting stress criteria 05 p0944 A70-16816
- Effective stress evaluation under cyclic trapezoidal loading and creep noting use in stationary test data conversion 05 p0951 A70-17031
- Analog to Burger model applied to rotating disk creep problem solution and stress-strain state of plane sample with hyperbolic groove 05 p0952 A70-17038
- Turbine blades root joints endurance limit concerning tensile stress determination at stress raiser contour for elastoplastic deformation and creep 05 p0954 A70-17062
- Shell shear strain determined by expanding displacement vectors into covariant power series of distance from middle surface [DFVLR-SONDDR-23] 05 p0955 A70-17078
- Three dimensional stress-strain analysis of rotating finite hollow cylinder, emphasizing wall thickness effect on stress and strain distribution 06 p1160 A70-17130
- Inherent stresses in elastic solid assuming inherent strain as stress source, integrating stress functions 06 p1160 A70-17131
- Fractography utility to stress analyst, discussing fracture causes 06 p1085 A70-17438
- Finite element method applied to potential distribution and stress analysis in earth sciences, determining elastic response of rock layer using structural matrix analysis 06 p1055 A70-17606
- Shear and linear strain energy criteria for limiting stress state model of solid deformable bodies, considering uniaxial, biaxial and triaxial loading 06 p1166 A70-17657
- Uncoupled quasi-static boundary value problem for linear viscoelastic solids undergoing thermal and mechanical deformation solved by computational algorithm 06 p1168 A70-17937
- Liquid propellant rocket nozzle configurations maximum stress and stability limits using computer program for composite ring-stiffened shells of revolution [AIAA PAPER 70-138] 06 p1014 A70-18053
- Contact stresses between elastic half planes and elastic cover plates determined by integrodifferential equation with Hilbert kernel 07 p1400 A70-18667
- Plane elasticity problem for Cosserat medium rectangular region with parallel boundaries free of force and moment stresses solved by Airy and Mindlin stress functions 07 p1400 A70-18668
- Critical stresses for plate with circular hole and cracks assuming symmetrical load 07 p1402 A70-19054

Isotropic shells with shear deformations, investigating stress-strain relations in Cosserat continuum applied to plates [DFVLR-SONDDR-23] 07 p1404 A70-19233

Basic equations governing optical properties of telecentric lens systems for moire analysis, discussing suitability for stress analysis 07 p1248 A70-19238

Stress rate boundary value problem formulation for elastoplastic body by singular integral equations 07 p1405 A70-19258

Optimal localized heat treatment of welded products, analyzing temperature fields and stresses during heating and cooling of ferromagnetic materials 07 p1294 A70-19477

Stress concentrations calculation at holes in plates and shells of positive Gaussian curvature applicable to hyperbolic shells 07 p1408 A70-19548

Lens effects applied to measurement of stresses on plane transparent models in photoelastic analyses, visualizing stresses from moire fringes 07 p1409 A70-19746

Stress analysis of multiaxially loaded tubes of fiberglass reinforced composite wound in three directions 07 p1318 A70-19755

Buckling stress calculation and measurement in cylindrical fiberglass reinforced composite shells under axial pressure 07 p1409 A70-19756

Plane anisotropic elastic bodies stress determination using Somigliana type integral formula to relate elastic displacement field to boundary traction and displacement vectors 07 p1412 A70-19953

Photoelastic stress analysis of composite structures subjected to gravitational forces using immersion analogy, considering constant acceleration stresses 07 p1413 A70-20038

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis 07 p1286 A70-20040

Thick walled orthotropic cylinder subjected to internal pressure analyzed for stress distribution and creep rates, using constitutive equations and Norton law 07 p1416 A70-20234

Infinite strip with longitudinal crack and under loading, analyzing stress-strain state 08 p1585 A70-20938

Membrane stress in thin circular viscoelastic ring under impulsive loads and internal heat, using stress-strain relation for linear Maxwell material model 08 p1589 A70-21311

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges 08 p1591 A70-21415

Temperature dependence of microplastic yield and flow stress and transient creep responses of gamma prime phase 08 p1522 A70-21709

Stress analysis of composite materials reinforced with glass ribbons embedded in epoxy matrix by photoelastic technique, discussing perturbation effect 08 p1594 A70-21862

Temperature fields and thermoelastic stresses in doubly connected structural elements solved in curvilinear coordinates system corresponding to conformal mapping of annulus 09 p1777 A70-23080

Thermal stress state of nonuniformly heated elastic body with bounding surfaces formed by parts of coordinate surfaces 09 p1778 A70-23087

Axisymmetric thermal stress state in bodies of revolution studied by successive approximation algorithm for digital computer 09 p1778 A70-23088

Elastoplastic stressed state of variable thickness disk under combined effects of nonuniform heating, repeated centrifugal and surface tensile loads 09 p1778 A70-23091

Elastoplastic stressed state of thin walled shells of revolution under repeated loads, assuming isotropic incompressible material 09 p1779 A70-23092

Elastoplastic stress state of variable thickness disk under combined effect of nonuniform heating and centrifugal forces, applying flow theory to stress component determination 09 p1779 A70-23095

Nonisothermal loading model of polycrystalline material, investigating tangential stresses in slip direction and plastic deformation using linear strengthening law 09 p1779 A70-23102

Kantorovich variational method extended to thermoelastic plane stress problem of rectangular plates 09 p1781 A70-23278

Stress analysis for cylindrical shells with reinforced circular holes by collocation method 09 p1781 A70-23280

Magnetophotoelastic model applied to plates bending stress analysis, deriving polarized light propagation equations 09 p1728 A70-23447

Stress concentration analysis using Chebyshev polynomial curve fitting 09 p1784 A70-23450

Book on solid materials under stress covering mechanical testing, metals and polymers structure, ceramic crystals and creep and composite materials properties 09 p1708 A70-23476

Thermal stresses determination in turbine blades by making analogy between actual and electrical model, using EGDA integrator 09 p1785 A70-23598

Fracture mechanics applications in stress analysis and structural design, considering rocket motor case failure 09 p1786 A70-23799

Stress distribution in infinite strip of finite thickness under symmetric edge loading analyzed by linear couple stress theory using Fourier transforms 10 p1954 A70-24017

Stress-strain state analysis of prestrained thin circular cylindrical shell using Vlasov general shell theory 10 p1955 A70-24021

Thick-walled toroidal shell under various load distributions, analyzing stress-strain state by networks method using computer program 10 p1957 A70-24250

Adhesive bond stress of aircraft structural joints between metal plates of variable cross section designed for shear 10 p1957 A70-24296

Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation 10 p1960 A70-25007

Shrouded aircraft engine turbine blades vibration stresses found minimum by setting up paired blades with fixed tension along shroud 10 p1964 A70-25288

Electronic stress wave analysis technique /SWAT/ for delayed weld cracking data acquisition 10 p1897 A70-25312

Contact stresses in elastic half plane with boundary connected to rod and moment applied at arbitrary point 10 p1965 A70-25324

Thin cylindrical shell stresses and displacements enclosed in elastic casing under pressure band using classical theory of Flugge and Love functions 11 p2128 A70-25336

Experimental stress analysis and influence on design - Conference, Cambridge, England, April 1970 11 p2130 A70-25584

Profile plane state of stress in wedge with and without external notch using combined photoelastic analysis and moire method 11 p2131 A70-25591

Stress distributions in thin walled pressure vessels analyzed by scattered light photoelasticity technique compared to strain gage analysis 11 p2131 A70-25593

Photoelasticity stress analysis, determining principal stress differences and orientation, using holographic interferometry to obtain sum and separation 11 p2049 A70-25596

Macroscopic internal stresses in plastics surfaces, discussing stress effect on plastic moulding service life, Knoop hardness test and charts 11 p2132 A70-25597

Components life determination from calculating cumulative damage using empirical stress amplitude distributions 11 p2133 A70-25844

Interlaminar shear stresses analysis for laminated composites under generalized plane stress 11 p2136 A70-26080

Prestrain and mean stress effects on fatigue life using cumulative damage procedure based on Al alloy and aircraft quality steel tests 11 p2137 A70-26092

Temperature, stresses and deformations in melting plates of elastic perfectly plastic material, using penetration depth concept with heat balance approach 11 p2138 A70-26134

Stresses and displacements determinations in spherical shells under concentrated loads, considering transverse shear deformation effect 11 p2139 A70-26347

Moire-holographic technique for deformed plane spatial displacements determination, describing diffraction patterns generation and stress analysis 11 p2140 A70-26487

Solid and foam polyurethane creep stress, using multiplier for foam stress for comparison 11 p2141 A70-26601

Finite element bending stress analysis of thin rectangular and skew plates, discussing computational procedure generating stiffness matrices 11 p2143 A70-26641

Conforming plate bending solution with third degree polynomial deflection functions in triangular finite elements, using Lagrange multipliers as stress parameters 11 p2143 A70-26642

Finite element computer code /AXICRP/ for creep analysis of plane stress, plane strain and axisymmetric bodies of revolution 11 p2015 A70-26682

Elastic conical shells of revolution linear theory, calculating stress resultants and couples 11 p2145 A70-26689

Computer analysis of degree of constraint against butt joint transverse shrinkage, using finite element method for stress analysis 12 p2239 A70-26854

Stresses in dynamically loaded struts with one or three holes by photoelasticity, using Fastax camera 12 p2315 A70-26878

Stress analysis of plane, shell and three dimensional structures using finite element method 12 p2315 A70-26886

Stress analysis experimental techniques in aerospace engineering including strain gages, deformation methods, photoelasticity, etc 12 p2205 A70-27127

Experimental stress analyses for aircraft design enhancing structural fatigue strength, using S-N diagrams and photoelastic models 12 p2318 A70-27128

Wing and empennage structures automated fully stressed design procedures, discussing application to supersonic aircraft stabilizer 12 p2319 A70-27136

Shells of revolution under combined thermal and mechanical loading, presenting analytical basis of BOSOR 3 digital stress analysis program 12 p2320 A70-27144

Plates elastic-plastic behavior under combined stretching and bending by finite element method 12 p2320 A70-27146

Two dimensional structures large strain elastoplastic analysis by finite element method, using variational principles to derive equilibrium equations 12 p2320 A70-27148

Reissner variational theorem applied to stress analysis of vertically accelerated end burning solid propellant grain in studying elastic rocket launch failure 12 p2313 A70-27196

Stress and strain in matrix of fiber reinforced material within elastic region, calculating interface shear stress for rectangular fiber 12 p2322 A70-27231

Stress analysis using transmitted light polariscope and Mach-Zehnder interferometer for frozen-stress slice 12 p2325 A70-27620

Interferometric stress analysis in three dimensional photoelasticity, including practical measurements and analysis in terms of refractive index 12 p2326 A70-27621

Elastic-plastic plane stress analysis of two dimensional structures based on Tresca yield criterion, using finite element technique 12 p2326 A70-27795

Residual stresses in cylindrical shell made of two component solid solution under thermal diffusion 12 p2329 A70-28323

Stress analysis of infinite elastic plate containing elastic rectangular inclusion subjected to uniform stress field 13 p2508 A70-28486

Circular cylinders torsion and plain strain analysis, completing statics by asymmetric shear and moment stresses according to Cosserat theory for plastic flow 13 p2508 A70-28492

Configurations stress stability liquid propellant rocket nozzle analysis by BOSOR 3 digital program, describing mathematical model construction 13 p2508 A70-28509

Tensile prestrain effect on yield locus of thin walled Al tubes from stress tests in torsion-tension space 13 p2431 A70-28536

Elastoplastic thermal stress analysis using finite element matrix method exemplified by cylindrical bar induction quenching 13 p2513 A70-28992

Isotropic elastic three dimensional body steady stressed state under large subcritical triaxial strains described by solving linearized equations 13 p2515 A70-29316

Irreversible yield stress component of aluminum, Armco iron and tantalum with fcc lattice, showing temperature dependence 13 p2436 A70-29500

Contact stresses and radial displacements in circular rings with loaded inner and outer boundaries 13 p2515 A70-29506

Stress concentration coefficient around hole in isotropic nonlinear plate under shear, reducing solution to integrating fourth order differential equation 13 p2516 A70-29510

Composite cylindrical laser rods end region stress and optical pathlength change with thermal expansion or contraction between core and cladding 13 p2429 A70-29703

- Brittle rupture cracks theory, discussing unstable /Griffith/ crack, stress intensity coefficient, propagation criterion, etc 13 p2517 A70-29715
- Longitudinal temperature gradients effects on stress analysis in solid propellants, using viscoelastic data 14 p2627 A70-30755
- Flat circular parachute stress analysis in steady vertical descent, using computer program for design change effects on shape, drag and stress 14 p2531 A70-30863
- Plane waves propagation in elastic layer using Cauchy theory of initial stress 14 p2658 A70-30998
- Axisymmetric postyielded tongue and groove cylindrical joint stress analysis using finite element method 14 p2627 A70-31131
- Stress and deflection of nonisotropic assembled bar and plate composite structures, using computerized matrix displacement method 14 p2660 A70-31133
- Stresses in plate containing circular hole with notch under uniaxial tension, determining parametric coefficients by Fourier transforms 14 p2661 A70-31326
- Fracture mechanics and stress analyses comparison for fatigue cracked steel cantilever beam stress corrosion specimens 15 p2755 A70-31473
- Creep rate intensity approximate solution as invariant function of stress intensity, determining equivalent stresses under creep 15 p2814 A70-31542
- Shells of revolution zero moment stressed state calculation by analytical functions, solving boundary value problem for edge loading 15 p2814 A70-31587
- Photoelastic stress analysis, discussing holographic interferometry for main stresses separation and polyester resins application to birefringence pattern superposition elimination 15 p2815 A70-31809
- Elastic half plane with crack perpendicular to free surface and under arbitrary pressure distribution, obtaining exact solution for stress and displacement fields 15 p2767 A70-31854
- Saint Venant principle treating Neumann problem with nonthin two dimensional domain 15 p2767 A70-31855
- Elastic shells of revolution stability and critical loads, discussing moment stress state and edge effect 15 p2816 A70-32158
- Stress analysis of polystyrene plate weakened by doubly periodic system of equal circular holes 15 p2817 A70-32166
- Plane deformation of anisotropic plastic nonstrain-hardenable material, analyzing static equations for stresses and strain rates 15 p2818 A70-32184
- Plane rectangular plate in acoustic field of jet engine exhaust, calculating surface stresses 15 p2819 A70-32186
- Addition theorems for cylindrical functions, discussing applications to shell stress analysis and three dimensional elasticity theory 15 p2819 A70-32187
- Circular cylindrical cavity in elastic space, calculating stresses due to incident plane harmonic compression wave 15 p2819 A70-32204
- Stress analysis for plate with large displacements by multicamera photogrammetry, comparing results with numerical solution by finite differences 15 p2821 A70-32313
- Elastic and optical properties of polyurethane rubber under large deformation using natural stress concept derived from stress-strain linear relationship [SESA PAPER 1608] 15 p2821 A70-32319
- Scattered light rosette using three polarized light beams intersecting at surface point to evaluate photoelastic stress data 15 p2739 A70-32320
- Computerized statistical analysis programs finding plastic stress and acoustic emission as predictors of annealed steel fatigue life 15 p2760 A70-32326
- Semiclamped strut supported rectangular plate deflection determined holographically, mechanically and analytically 15 p2740 A70-32331
- Dangerous plane stressed state surfaces for fiberglass reinforced plastic pipes, using fourth degree polynomial 15 p2766 A70-32852
- Reference stress evaluated by numerical analysis techniques, discussing rectangular beam in pure bending 16 p2987 A70-32921
- Small displacements in noncircular cylindrical shells under various loads 16 p2987 A70-32992
- Holographic interferometry for moire strain analysis, discussing theory and applications 16 p2904 A70-33149
- Stress and vibration analysis of rocket engine turboprop inducer blades, using finite element method [AIAA PAPER 70-630] 16 p2964 A70-33529
- Membrane stresses on nonspherical domes with axisymmetric loads 16 p2990 A70-33743
- German monograph on stress calculation for rotating elliptical rimmed and notched turbine disks using Weinel integral equations and cascade computer procedure 16 p2993 A70-34079
- Displacements and stresses in freely vibrating aeolotropic deep spherical shells, including effects of shear deformation, rotary inertia and transverse normal strain 16 p2993 A70-34091
- Book on elasticity theory covering end effects, Saint Venant principle, edge and screw dislocations, moire method, thermoelasticity, cavity and inclusion effects, Muskhelishvili methods, etc 17 p3183 A70-34603
- Elastic thin walled toroidal shell under internal pressure, investigating large deformation and stress behavior 17 p3184 A70-34910
- One dimensional analysis of stress and strain concentration resulting from longitudinal impact of viscoelastic rods 17 p3185 A70-34965
- Membrane and bending stresses at crack tip in cylindrical shell weakened by elliptic hole with major axis perpendicular to shell axis 17 p3186 A70-34981
- Stress intensity analysis method for plates with random cracks array under plane stress 17 p3187 A70-34997
- Dynamical stresses in members and structures under impulsive loads, taking into account solid viscosities and frequencies effects 17 p3187 A70-34998
- German monograph on stress and displacement in plane elastic circular rings, disk strips and wedges, considering single load distributions 17 p3189 A70-35370
- German monograph on thermal stresses due to thermal shocks on front surface of infinitely long circular solid cylinder 17 p3189 A70-35371
- German monograph on form factors and torsion at shafts with longitudinal keyways under pure torsion 17 p3189 A70-35374
- Orowan stress calculation, discussing line tension, screw or edge character, spatial distribution and yield strength 17 p3191 A70-35457
- Alloy hardening statistical theory, applying flow stress to second phase randomly dispersed particles 17 p3191 A70-35458
- Unsymmetric vibrations of cylindrical shells, analyzing stress states by asymptotic method 18 p3335 A70-36059
- Singular integral equations of elasticity theory, formulating boundary value problem for discontinuous plane stresses 18 p3337 A70-36370
- Pressurized shells of revolution loaded axisymmetrically, formulating equations for calculation of displacements, forces and stresses 18 p3338 A70-36406
- Postbuckled integrally stiffened wide column weight optimization, developing stress equation 18 p3339 A70-36447
- Axisymmetric structure with elastic contact, analyzing stresses by finite element method with differential displacements 18 p3339 A70-36496
- Discrete element stress and displacement analysis of elastoplastic plates 18 p3342 A70-36686
- Holographic interferometry applications in stress analysis of photoelastic resins, describing holographic interferometry assembly 18 p3262 A70-37209
- Low aspect ratio wings under conditions of creep, calculating stress by method of strains 19 p3534 A70-37244
- Shallow circular cylindrical shell with rigid collar on lateral surface, calculating stress under axial tension and internal pressure loading 19 p3534 A70-37245
- Mechanical stresses effect on Vicalloy rotor packets magnetic properties 19 p3357 A70-37265
- Fiber reinforced materials with oriented armoring, calculating stress strain state under transverse shear 19 p3454 A70-37348
- Stress and displacement within internally pressurized composite cylinders having continuous fiber reinforcement in circumferential direction, using finite element method 19 p3538 A70-37797
- Physically nonlinear elastic solid three dimensional and generalized plane strain problem, discussing application to composite materials 19 p3538 A70-37798
- Composite bodies under plane deformations, determining stress dependence on elastic constants 19 p3455 A70-37952
- Micropolar mechanics application to stress and displacement within separate components of fibrous composite material 19 p3541 A70-37961
- Nonlinear stress-strain model of unloading in symmetric longitudinal impact of two elastic-plastic bars, using numerical method 19 p3541 A70-38046
- Elastic boundary layers analysis based on strain gradient theory of linear elasticity 19 p3544 A70-38331
- Composite body with free surface under plane deformation, analyzing residual, thermal and dislocation stresses dependence on elastic constants 19 p3544 A70-38332
- Clamped spherical shells under concentrated, distributed and ring loadings, analyzing large axisymmetric deflections for prebuckled and postbuckled states 19 p3545 A70-38336
- Anisotropic axisymmetric elastic shell theory including transverse stress effects, with application to orthotropic cylinder 19 p3545 A70-38337
- Long orthotropic pressurized cylindrical shell under radial line loads along equally spaced generators, analyzing stresses and deflections by linearization 19 p3545 A70-38338
- Open and multiply connected closed sections of varying thicknesses, solving for unrestrained torsion 19 p3545 A70-38339
- Sandwich panels geometrically and physically nonlinear theory, obtaining equations of motion and boundary conditions consistent with strain displacement relations 19 p3547 A70-38360
- Crack tip stress intensity factor in sheet structures, applying complex stress potentials and perturbation techniques in numerical calculations 19 p3549 A70-38627
- Stress differential equations of micropolar elasticity, considering mass forces and moments of inertia 19 p3549 A70-38672
- Solid and hollow spheres gravitational and surface load stresses determination by freezing method of photoelasticity and mercury immersion 20 p3717 A70-38998
- Spherical shell under nonuniform temperature field, calculating stress-strain state around round hole 20 p3719 A70-39247
- Transparent polymers stress-strain state induced by elastic waves, using model with space and time dependence of laser beam 20 p3654 A70-39248
- Radial and shearing stresses in hollow composite sphere due to thermoelastic strain nucleus 20 p3719 A70-39602
- Cylindrical shells subjected by sectors to constant radial pressure, investigating stress state and deformation 20 p3719 A70-39620
- Infinite elastic plate with pair of insulated unequal circular holes, calculating thermal stresses 20 p3720 A70-39672
- Long hollow nonlinearly viscoelastic cylinder in elastic shell, calculating stress and strain under internal pressure 20 p3720 A70-39731
- Axisymmetric contact problem of hollow semi-infinite elastic cylinder subjected to stresses on lower end face, solving by Fourier integral transform 20 p3720 A70-39734
- Microstresses in plasticity theory, considering continuous elastic body model of crystal with dislocations 20 p3724 A70-39859
- Brittle bodies with sharp pointed defects, constructing limiting equilibrium diagrams by stress concentration factor representations 20 p3733 A70-40393
- Strain gages for structural stress analysis in cryogenic environments, discussing correction factors for temperature dependent characteristics 21 p3932 A70-40545
- Brittle elastic material with wedge shaped void, calculating shear stresses during crack propagation generated by horizontally polarized shear wave 21 p3932 A70-40547
- Silicon solar cell array interconnector design based on analysis of stresses caused by thermal expansion and vibrational motion 21 p3756 A70-41009
- Cantilever bending under gradual contact with cylindrical supporting surface compared with solution by elasticity theory 21 p3934 A70-41251
- Bond stresses between fiber and matrix of fiber reinforced composite materials determined by numerical method based on superposition 21 p3934 A70-41252
- Swing tail cargo aircraft fuselage section stress analysis by finite element method, discussing displacement models, deformation modes and economics 21 p3935 A70-41260

Steels thermal fatigue in testing machine, investigating strains and stresses due to nonuniform temperature distribution during thermal cycle

21 p3840 A70-41433

Spacecraft parachute stress analysis, using finite elements with nonlinear elastic properties to obtain shape and load distribution

[AIAA PAPER 70-1195] 21 p3753 A70-41821

Half plane with stress-free surface deformed by protrusions or notches, deriving edge force or screw dislocation by linear elastic analysis

21 p3939 A70-42028

Cosserat elasticity constitutive equations, coupling rotation vectors to eliminate stress indeterminacies

21 p3941 A70-42251

Third isotropic point in rectangular beam under bending stresses by Hertzian load, using Stokes-Wilson method and photoelastic comparison

21 p3941 A70-42265

Filamentary composites stress wave amplitude distribution calculation and plotting

22 p4114 A70-42645

Elastoplastic flexure and critical loading of isotropic rectangular plates of constant and variable thickness, using Lagrange principle with numerical integration

22 p4115 A70-42810

Bounds to direct influence coefficient derived by hybrid stress finite element method

22 p4116 A70-43203

Brittle fracture stress statistics for Weibull distribution function parameter determination, comparing linearizing, least squares curve fitting and maximum likelihood techniques

22 p4117 A70-43414

Composite laminates under uniform axial strain, determining interlaminar stresses and displacements by finite difference techniques

22 p4060 A70-43684

Stress analysis of anisotropic circular ring with pressed-in solid disk, using sectionally holomorphic functions

22 p4119 A70-43686

Stress-strain of thin multilayer isotropic spherical shell under radial load employing shallow shell theory

22 p4120 A70-43716

Three dimensional elasticity for figures close to ellipsoid of revolution with displacements on boundary

23 p4266 A70-43988

Centrally cracked sheet, calculating riveted and uniformly spaced stringers effect on stress intensity factor

23 p4270 A70-44549

Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression

[AIAA PAPER 69-119] 23 p4270 A70-44563

Stress, buckling and vibration analysis of shells of revolution by numerical integration and finite difference methods, summarizing computer programs

23 p4273 A70-44725

Fiber-reinforced narrow rectangular beam flexural strain analysis by birefringent coating technique, deriving isochromatic and isoclinic patterns

23 p4275 A70-44915

German monograph on stress-strain state in prestressed, rigidly supported flexible plates subjected to large deflections, using extended Wolmir solution

24 p4418 A70-45083

Shell of revolution /pressure vessel/ with meridional slope discontinuity, calculating pressurization effect on stresses by computer program

24 p4420 A70-45277

Bending vibrations of propeller blades calculated by successive approximation

24 p4422 A70-45300

Polar elastic materials constitutive relations for thermoelastic couple stresses by general theory of incompatible strains, obtaining linearization for isotropic materials

24 p4428 A70-45578

Inhomogeneous anisotropic elastic plates large deflection, using asymptotic integration of nonlinear elasticity equations to obtain successive field equations systems

24 p4423 A70-45580

STRESS CALCULATIONS

U STRESS ANALYSIS STRESS CONCENTRATION

Bonded solid lubricant films wear life equation for low contact stress conditions, determining optimal film thickness

[ASME PAPER 69-LUB-5] 01 p0102 A70-10397

Transient temperature profiles and thermal stress distribution in circular plates and cylinders with eccentric hole determined by conformal mapping

01 p0207 A70-11153

Transient thermal stress concentration at small thickness change of plate obtained by photoelastic studies

01 p0207 A70-11157

Strain field association with random TaC precipitate particles in austenitic stainless steel shown by electron microscope

01 p0123 A70-11242

Stressed state of circular notched plane in tension under creep conditions

01 p0210 A70-11410

Elastoplastic stress concentrations calculations in notched strips and shafts under tension, bending and torsion, using approximate method

01 p0211 A70-11425

Stressed state of isotropic nonlinear multiply connected media with large deformations, using nonlinear elasticity theory

01 p0212 A70-11446

Curvature and hole spacing effects on stress concentration of isotropic plate weakened by two curvilinear holes, applying small parameter method

01 p0212 A70-11447

Two asymptotic dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads

01 p0212 A70-11563

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates

01 p0212 A70-11564

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function

01 p0212 A70-11565

Stress concentrations and load cycle asymmetry effect on materials stress and breakdown behavior under various load cycles

02 p0383 A70-11656

Extended mixing length method for computing turbulent shear stress distribution required in calculating two dimensional incompressible turbulent boundary layer

02 p0282 A70-12333

Dynamic stress concentration factor in strut containing symmetrically located elliptical discontinuity, using photoelastic technique with modulated ruby laser light source

02 p0388 A70-12495

Static and cyclic stress distributions in buckling shear panel comprising flat plate of clad Cu-Al alloy

02 p0388 A70-12497

Reinforced plastics models for determining internal stress, temperature and electromagnetic fields of multicomponent reinforced plastics

02 p0323 A70-12806

Elastic deformation of plates with circular holes, determining stress concentration factors for compressible and incompressible materials on digital computer

02 p0390 A70-12810

Stress concentration in optically active fiberglass reinforced plastics during static loading determined by optical polarization method

02 p0390 A70-12812

Photoelasticity extension to plane elastic problems with stress state depending on Poisson ratio, discussing multiple connected body with nonzero surface tractions on internal boundaries

[SESA PAPER 1570] 03 p0583 A70-12884

Three dimensional photoelastic case bonded solid propellant motor model, analyzing stress distribution using scattered light photoelasticity

[SESA PAPER 1587] 03 p0583 A70-12885

Out-of-plane restraint effect on plane-stress solutions near straight boundaries, predicting deviation of two dimensional photoelastic results

03 p0584 A70-12951

Stress distribution along stud hole threads in Al case, investigating stud design effect using strain gauge on models

03 p0585 A70-12962

Hologram interferometry to study stresses in fixed two dimensional photoelastic models and three dimensional slice qualitative analysis

[SESA PAPER 1530] 03 p0482 A70-12964

Complex stress functions and stress intensity factors at tips of star-shaped contour hole in infinite tensile sheet, including crack forking with arbitrary angle

03 p0585 A70-12974

Honeycomb structure fracture initiation flow detection method using liquid crystal determination of stress concentration sites, noting absence of external heat source

03 p0515 A70-13121

Constitutive equations for orthotropic bilinear elastic materials in plane stress case, discussing unidirectional composites

03 p0587 A70-13127

Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc

03 p0588 A70-13243

Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moire bands

03 p0588 A70-13248

Stress-strain state of material computed from strain measurements using strain gages and strain circle

03 p0588 A70-13272

Plane longitudinal elastic monochromatic wave diffraction on stress free circular holes in infinite plate, calculating stresses between holes

03 p0589 A70-13375

Stress distribution in half space of inhomogeneous media, studying scale and edge effects relation for elastic and ideally plastic media

03 p0590 A70-13376

Hole reinforcement providing stressed state beyond hole equivalent to plate stress without hole, reducing problem to annulus region mapping

03 p0590 A70-13378

Spherical shell elasticity having circular hole at apex using asymptotic method, calculating stress concentration at hole

03 p0590 A70-13381

Stress-strain state equations of shallow spherical shells in rectangular and polar coordinates, discussing reduction to plate and Cauchy-Riemann equations

03 p0591 A70-13427

Approximate method of boundary perturbation to solve elasticity and viscoelasticity problems for non-canonical bodies of revolution applied to stress concentration at ellipsoidal cavity

03 p0591 A70-13439

Thin shells stressed state calculations by iteration, considering suitability for computer adaptation

03 p0592 A70-13442

Nonuniformity of dislocation structure and stress distribution in deformation of Cr samples longitudinal sections subjected to upsetting

03 p0511 A70-13488

Circular cylindrical shell stressed state with rectangular opening under compressed torsion, noting opening effect on loads nonuniform distribution

03 p0593 A70-13501

Steady thermoelastic state of inhomogeneous plane with circular discontinuity on perimeter, studying stress concentration at thermally insulated crack

03 p0595 A70-13738

Strain distribution measurement in plastically deformed region around crack tip in metals using moire grid and optical interference

03 p0513 A70-14019

Stress distribution of thin walled structure of open section, considering warping and torsional bending, using calculus of variations

03 p0596 A70-14030

Residual stress distribution in butt joints during welding of sheet Nb measured by extensometer, noting annealing temperature effect on stress relieving

03 p0513 A70-14072

Creep rupture and fatigue strength in solid body mechanics, considering triaxial stress state and simplified creep rupture theory variant

03 p0599 A70-14249

Thermal stress concentration produced by cracks, notches and fillets in plates free from external loads measured photoelastically

03 p0600 A70-14310

Donnell shallow circular cylindrical shell equation, obtaining approximate solution for stresses in infinitely long circular cylindrical shell with circular hole subjected to edge loading

03 p0601 A70-14320

Stress distribution in anisotropic half plane with reinforced circular hole under external loads applied at plane infinity and ring edge

04 p0765 A70-14417

Linear nonaxisymmetric bending of infinite plate coupled to elastic half space under concentrated loads using double Fourier transforms

04 p0766 A70-14480

Bending analysis of cracked plate with arbitrary stress distribution across thickness

[ASME PAPER 69-WA/PVP-2] 04 p0768 A70-14791

Stress intensity and strain energy release rate in elastic fiber-reinforced composites with different thermomechanical properties and imperfect bonding

[ASME PAPER 69-WA/APM-15] 04 p0771 A70-14913

Linear stress distribution insertion into equations of motion for turbulent boundary layer, considering velocity profile in wall region

04 p0670 A70-14987

Disk stress concentrations calculation beyond elastic limits taking into account effect on bearing capacity

04 p0775 A70-15261

Surface work hardening and stress concentrations effects on fatigue strength of alloy under asymmetric tension and compression load cycles at high temperatures

04 p0707 A70-15270

Radial bond stresses in case/liner bond line of full-scale rocket motor measured, describing instrumentation, motor design and thermal cycling test sequence

[AIAA PAPER 68-510] 04 p0736 A70-15407

One dimensional stress waves propagation in elastoplastic medium, determining stress and velocity fields due to heat sources motion by characteristics method

04 p0776 A70-15447

Internal pressure deformed cruciform crack energy and stress intensity factor determined by linear equations 04 p0777 A70-15499

Plan hybrid element generalized to arbitrary quadrilateral form, considering hybrids having constant and linear stress distributions 04 p0779 A70-15614

Plastic-viscoplastic bar wave propagation due to longitudinal impact, analyzing stress profiles to determine effect of strain rate 05 p0926 A70-15913

Stress concentration effects around spherical cavity under uniaxial tension calculated by constitutive equations of micropolar elasticity 05 p0927 A70-15994

Photoelastic and photorheological analysis of time-dependent variation of stress distribution in long strip compressed oppositely with elastic flat punches 05 p0928 A70-16012

Stress distribution in long beams with circular annular inclusion under concentrated load solved in series form 05 p0928 A70-16024

Stress distributions in infinite elastic solids for shear loadings prescribed over coplanar circular regions, solving integral equations iteratively for coplanar penny-shaped cracks 05 p0928 A70-16057

Spread criterion and stress distribution near penny shaped crack in elastic solid under axisymmetric body forces distribution 05 p0930 A70-16079

Stress distribution in vicinity of stress-free Griffith crack in elastic solid acted upon by symmetric distribution of body forces 05 p0930 A70-16084

Surface stress distribution to maintain Griffith crack in prescribed shape, using theories of Fourier transforms and dual integral equations 05 p0930 A70-16086

Planar dislocation array in displacement dependent stress field, investigating tip stress intensification regarding crack nucleation 05 p0932 A70-16170

Linear and nonlinear inelastic spherical inclusion in elastic and viscoelastic isotropic matrix with constant strain or stress fields at infinity 05 p0932 A70-16171

Mixed boundary value problems of plane elasticity, solving stress field of central Griffith crack in wedge using singular integral equations 05 p0932 A70-16173

Statistical stress distribution of breakdown during scaling of wound fiberglass reinforced plastics, noting relation between critical stress and defects 05 p0870 A70-16214

Stress-strain state of circular orthotropic shells under bending, considering distributed loads applied to shell center 05 p0934 A70-16217

Stress concentration of spherical hoop with discretely spaced meridional ribs under uniform pressure 05 p0935 A70-16229

Steady temperature field and stressed state of elastic plane containing heat resistant arc shaped cracks produced by uniform thermal flux 05 p0935 A70-16231

Stressed state of shallow spherical shells of revolution undergoing large displacements reduced to Kármán equation, solved by small parameter method 05 p0935 A70-16235

Stress gradient theory interpreted in terms of time dependent failure criterion to study critical stress vs impulse theory of spall fracture 05 p0938 A70-16481

Stress distribution around crack tip of initially curved sheets 05 p0939 A70-16484

Stress concentration in long thick cylindrical tube under diametrically opposite normal loads using elasticity theory 05 p0939 A70-16505

Stress distribution in restrained hyperelastic sphere based on elastomer reinforcement theory by carbon black 05 p0940 A70-16510

Displacements and stresses obtained for elastic half plane with variable Poisson ratio under certain traction boundary conditions, using Fourier transform method 05 p0940 A70-16512

Membrane stress concentration near circular cutouts in uniaxially stressed sheets reduced by predeforming immediate surroundings of hole 05 p0940 A70-16515

Shallow spherical shell subjected to arbitrarily located concentrated normal force, discussing boundary effects on resulting stress distribution 05 p0945 A70-16817

Stress-strain state of plates weakened by reinforced hole and under tensile and bending loads, including boundary conditions 05 p0945 A70-16856

Stress concentration effect on mechanical properties of Ti-Ta alloys at low temperatures, showing insensitivity to notch and suitability for cryogenics 05 p0864 A70-16869

Stress concentration of circular cylindrical shell weakened by elliptic hole under torsion 05 p0947 A70-16965

Heat resistant materials damping properties at high temperatures under distributed stresses measured in thin walled tubular specimens with vibrogram 05 p0952 A70-17049

Residual strains determination in rotating disks from photoelastic coatings interference 05 p0955 A70-17063

External hydrostatic pressure effect on fiberglass-reinforced plastics strength under unilateral heating, analyzing stress distribution 05 p0875 A70-17067

Facility for testing thin walled tubular specimens in stressed state at low temperatures by keeping stresses constant with helical gear 05 p0830 A70-17075

Incremental stress distribution near circular crack with internal pressure in neo-Hookean solid under deformation due to triaxial compression, illustrating initial stress effect 05 p0956 A70-17108

Three dimensional stress-strain analysis of rotating finite hollow cylinder, emphasizing wall thickness effect on stress and strain distribution 06 p1160 A70-17130

Plastic bodies stress-strain state under variable loads generalized to cases of cyclic loads and plasticity 06 p1162 A70-17384

Complex load strength criterion containing stress and strain invariants applied to simple static loads and cyclic symmetric deformation 06 p1162 A70-17389

Fatigue breakdown criteria for elastoplastic materials under cyclic loads, deriving equations as functions of stress-strain states kinetic behavior 06 p1162 A70-17390

Normalized steel low cycle fatigue strength under bending and torsional rotation, testing linear damage accumulation theory 06 p1163 A70-17404

Limiting stress states analysis in isotropic solids using loading history and replacing nonlinear stress-strain curve by approximating rectilinear polygon 06 p1165 A70-17547

Mean cyclic stress effect on stress concentration and fatigue strength of smooth and notched steel specimens at normal and high temperatures with superimposed bending 06 p1088 A70-17653

Stress field equations of material in maximum deformation region during inversion of tubular products 06 p1077 A70-17871

Bending stress concentrations in elastic square plate with central hole under uniform load, using finite element solutions of modified Rayleigh-Ritz method 06 p1168 A70-17940

Interface stresses in ceramic/metallic spherical shells for deep submergence structures using hydrostatic testing and photoelastic analysis 06 p1170 A70-18089

Stress-strain state equations for axisymmetrically loaded shells of revolution made of materials with variable moduli 07 p1399 A70-18660

Stress-strain state of curved rod made of anisotropic material under bending loads applied to end face cross sections 07 p1399 A70-18661

Contact stresses between elastic half planes and elastic cover plates determined by integrodifferential equation with Hilbert kernel 07 p1400 A70-18667

Elastic and plastic deformation zones stress-strain state under complex stresses, obtaining relation for stress and strain components 07 p1401 A70-18834

Uniform thickness thin helicoidal shell stress-strain state with middle surface in asymptotic lines, assuming parameters governed by one dimensional law 07 p1402 A70-19055

Rotating disk stability relation with stress distribution in plastic deformation of material 07 p1402 A70-19056

Centrifugal force induced stressed state in gas turbine blades using photoelastic analysis, emphasizing stress distribution at shroud holes 07 p1403 A70-19118

Stress distribution in vicinity of arbitrarily shaped slender notches as function of notch symmetry using photoelastic analysis 07 p1404 A70-19240

Buckling of clamped skew plates under uniform system of applied stress using Galerkin method 07 p1406 A70-19339

Nonlinear spinning shallow spherical shell equations solved for equilibrium stress and displacement distributions, discussing inertia loading 07 p1406 A70-19342

Inelastic behavior of solids strained at high temperature emphasizing hot creep phenomena in aviation materials 07 p1406 A70-19346

Effect of uniformly distributed circular holes infinite double row on stress distribution in transversely bent strip, based on Kirchhoff bending theory 07 p1407 A70-19385

Stressed state of plate with reinforced circular hole under tension and bending using Airy stress functions 07 p1407 A70-19540

Isotropic plate stress-strain state weakened by doubly periodic curvilinear holes using nonlinear theory 07 p1408 A70-19544

Stress concentrations calculation at holes in plates and shells of positive Gaussian curvature applicable to hyperbolic shells 07 p1408 A70-19548

Three dimensional electrostriction theory for stress and displacement on penny-shaped crack in elastic dielectric with conducting oblate spheroidal inclusion 07 p1409 A70-19569

Singular part of half plane stress field solution using Cosserat elasticity theory 07 p1409 A70-19570

Temperature stress distribution in cylinder or sphere with variable surface temperature and heated by external sources 07 p1411 A70-19819

Elastic fields in bimaterial plate under uniform compressive and anti-plane shear loadings, finding stress distribution and induced interfacial shear stresses 07 p1412 A70-19957

Isothermal steady state creep extension and flexure of laminated beams with alternating layers, indicating nonlinear stress distribution 07 p1412 A70-19964

Viscoelasticity in shearing and accelerative flows by integral theory, discussing stress distribution and pressure drop 07 p1412 A70-20000

Horizontally curved I beams flanges elastic buckling, determining prebuckling flange stresses in longitudinal and radial directions 07 p1413 A70-20001

Hole reinforcement in flat plate under uniaxial load with high stress region at boundary, resulting in weight savings 07 p1414 A70-20174

Quasi-steady propagation of Prandtl crack in viscoelastic body, noting stress distribution identity for viscoelastic and elastic cases 07 p1414 A70-20181

Elastoplastic torsion of combined prismatic bars with transverse distribution of constant properties solved by computer 07 p1415 A70-20189

Thick walled orthotropic cylinder subjected to internal pressure analyzed for stress distribution and creep rates, using constitutive equations and Norton law 07 p1416 A70-20234

Two dimensional wave front shapes induced in finitely strained elastic body by impulsive point body force, discussing normal and double inflection points 08 p1584 A70-20581

Metal adhesive joints under cyclic stresses, studying stress distribution and fracture occurrence by high speed cameras 08 p1504 A70-20889

Shear stress distribution in metal adhesive joints, discussing methods for calculating 08 p1504 A70-20892

Darkening and brightening of disturbed spot on sun surface determined by abnormal stress in seen layers due to magnetic and velocity fields 08 p1570 A70-20903

Transparent polymethylene methacrylate and polystyrene stressed state effect on failure characteristics under laser beam irradiation 08 p1526 A70-20936

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory 08 p1585 A70-20955

Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 08 p1585 A70-20962

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solutions convergence 08 p1585 A70-20963

Low temperature effects on deformability of middle C steel under complex stress state, showing invalid stress-strain relation and deviator similarity 08 p1516 A70-20983

Steady temperature field and stresses produced by thermal sources in infinite elastic plane containing insulated rectilinear crack, determining thermoelastic state of half plane 08 p1587 A70-21172

Dynamic creep rupture of stainless steel tested at high stress levels and temperatures 08 p1518 A70-21333

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses
[ASME PAPER 68-WA/MET-19]

08 p1591 A70-21457

Astatic equilibrium in Saint Venant principle applied to surface of linear elastic body, discussing stress field produced by boundary loading

08 p1591 A70-21463

Multiple scattering of plane time harmonic compressional elastic wave impinging on parallel circular cylindrical inclusions in finite domain, analyzing stress field

08 p1592 A70-21469

Elastic-plastic plane strain solutions in infinitesimal plastic flow theory with separable stress fields

[ASME PAPER 69-APMW-13] 08 p1592 A70-21470

Hertzian contact stress deformation coefficients defined in transcendental equation with elliptic integrals noting errors

08 p1593 A70-21617

Stresses and displacements in largely deflected cantilever beams subjected to gravity using photoelasticity

08 p1593 A70-21619

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms

08 p1594 A70-21635

Nondestructive testing and inspection by acoustic emission from stressed materials, discussing microstructure effect and crack initiation detection

08 p1508 A70-21747

Creep and rupture of graphite-epoxy composites under unidirectional state of stress and controlled temperature environment, extrapolating long term loading behavior

08 p1531 A70-21897

Microstructure of wrought arc-cast polycrystalline W sheet after high temperature creep deformation at various stress levels

08 p1525 A70-21962

Theorem for highest statically admissible multiplier for plates and shells, noting association with stress field satisfying yield equality at all cross sections

08 p1595 A70-21977

High speed rotating disks design and stress analysis [ASME PAPER 69-DE-1]

09 p1770 A70-22268

Stressed state in region of strain raisers /round holes/ in plate subjected to two axial tension associated with plastic yield

09 p1771 A70-22464

Alloy equivalent susceptibility to damage at intermediary service periods and different stress levels under creep conditions at 750 C

09 p1701 A70-22470

Turbines rotary shafts and stationary components thermal fatigue analysis, considering cycle numbers and stress concentrations under start-up, continuous operation and shut-down

09 p1775 A70-22593

Stress and displacement distribution formulas for two and three dimensional crack extension problems in linear viscoelastic body

09 p1775 A70-22611

Stress concentration effect, surface states and similarity conditions in fatigue ruptures in machine construction, considering statistical analysis

09 p1776 A70-22615

Fatigue limits distribution functions of full-scale machine parts estimated by rupture similarity criterion, discussing stress concentration and scale factor effects

09 p1776 A70-22616

Stress concentration effect on fatigue strength of Al- and Mg-base structural alloy specimens of different sizes analyzed statistically

09 p1703 A70-22617

Fatigue limit and rupture stress distribution patterns of Al- and Mg-base structural alloys using accelerated Prot and Enomoto methods

09 p1703 A70-22621

Stress concentrations and load transfer around cutouts in fiber reinforced laminates, discussing boron epoxy plates with circular holes

09 p1710 A70-22793

Temperature and stress fields in orthotropic plate with partial surface insulation, examining boundary conditions

09 p1777 A70-23078

Temperature fields and stress-strain state in elastic bodies with thin walled cylindrical shell inclusions during uniform heat flow at infinity

09 p1778 A70-23083

Thermal stress concentrations at arbitrary holes for nonlinearly elastic materials, developing small deformation theory for two dimensional problem

09 p1779 A70-23093

Stress concentrations in turbine disks with eccentric holes under steady creep

09 p1780 A70-23200

Partially loaded clamped plastic shallow spherical caps collapse loads and stress and velocity distributions

09 p1781 A70-23230

Strain and temperature fields interrelation effect on longitudinal wave propagation in viscoelastic cylinder, determining phase velocities and attenuation coefficients

09 p1781 A70-23285

Stress distribution in shells of revolution with variable elastic moduli, considering material rigidity and strain state

09 p1781 A70-23286

Stress concentration at circular hole in plate, considering material creep and aging effects

09 p1782 A70-23290

Stress-strain state analysis of transversely isotropic plates with inclusions under bending loads

09 p1782 A70-23298

Stress concentration at elliptical hole of arbitrary eccentricity in shallow sandwich shells with hard and soft fillers

09 p1783 A70-23385

Cylindrical shell critical load boundaries under uniform external stress and small torsion

09 p1783 A70-23389

Dynamic photoelastic analysis of fracturing plastic plates, studying elastic and stress fields around propagating cracks

09 p1783 A70-23448

Stress concentration analysis using Chebyshev polynomial curve fitting

09 p1784 A70-23450

Elastic ribs reinforced thin cylindrical shells stress-strain state under arbitrary load distribution allowing for rib spacing discreteness

09 p1784 A70-23590

Stress concentration in plate with hole reinforced by elastic cylinder described by equations of three dimensional elasticity theory

09 p1784 A70-23592

Crack widening in infinite plane field with wedge in absence of slip, based on elasticity theory, plotting contact forces and stresses on crack boundary

09 p1785 A70-23624

Stress distribution in rib reinforced cylindrical shells under concentrated forces calculated using finite difference scheme

09 p1791 A70-23718

Transition of stress distribution on collision surface of semiinfinite elastic plane with rigid beam, using Fredholm integral equation

10 p1954 A70-23950

Stress distribution in infinite strip of finite thickness under symmetric edge loading analyzed by linear couple stress theory using Fourier transforms

10 p1954 A70-24017

Stress distribution in strip with asymmetrically positioned infinite row of equal and equally spaced circular holes subjected to longitudinal tension or transverse bending

10 p1955 A70-24082

Stress distribution in anisotropic disk shaped into wedge loaded at vertex by concentrated moment determined by complex potentials method

10 p1956 A70-24084

Stress intensity and strain energy of pressurized line crack in cross form in thin elastic plate solved by Wiener-Hopf technique

10 p1956 A70-24192

Steel conical disks two dimensional stressed state determined with deformations at elastic and elastoplastic strains using digital computers

10 p1956 A70-24242

Aluminum alloy deformations and rupture strength under complex stress at low temperatures, observing anisotropy decrease with temperature

10 p1903 A70-24243

Stress, strain and acceleration spatial variation in plate structures under broad frequency band excitation using statistical energy method

10 p1962 A70-25065

Rigid/plastic or rigid/perfectly plastic anisotropic plate under uniform bending, analyzing stress distribution

10 p1964 A70-25092

Design mean stress and ground-air cycles minimum stress effect on fatigue behavior of titanium alloy in supersonic transport operating environment [SAE PAPER 700033]

11 p2128 A70-25370

Stress concentration near ellipsoidal cavity in transversely isotropic body using solutions for transversely isotropic ellipsoid of revolution

11 p2129 A70-25564

Transient and steady state thermal stress distribution measured by strain gages embedded in epoxy models

11 p2130 A70-25585

Stress distributions in thin walled pressure vessels analyzed by scattered light photoelasticity technique compared to strain gage analysis

11 p2131 A70-25593

Nonuniform stress distribution along side fillet welds and in welded plates of lap joint, discussing tangential stresses and plate width

11 p2058 A70-25598

Wall shear stress distribution in rectangular ducts, discussing secondary currents and main flow prediction

11 p2035 A70-25779

Stress concentration in elastoplastic and creep deformations determined by approximate solution

11 p2134 A70-25845

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration

[AIAA PAPER 69-56] 11 p2135 A70-25962

Interlaminar shear stresses analysis for laminated composites under generalized plane stress

11 p2136 A70-26080

Stress peak distribution effects on fatigue life of test specimen excited to bending by Gaussian random vibrations

11 p2137 A70-26093

Stress level, block size and constant and variable loading sequence effect on fatigue life of Al alloy box beams

11 p2138 A70-26094

Piezo-rotatory coefficients $R_{11}/$ and $R_{12}/$ of isotropic non-enantiomorphic optically active crystals from fourth rank axial tensor, discussing stress effects

11 p2098 A70-26298

Semiinfinite elastic body with instantaneous heat source on surface, analyzing temperature and thermal stress distributions

11 p2139 A70-26406

Stress concentration around elastic spheroidal inclusions in isotropic elastic body under shear

11 p2140 A70-26483

Crack model analysis taking into account nonlinear force-deformation ahead of crack tip

11 p2143 A70-26667

Finite element methods applications to linear fracture mechanics and crack propagation theory, computing stress intensity

11 p2144 A70-26685

Extensional waves asymptotic nature and stress distributions in infinite elastic plate of finite thickness under axisymmetric and in-plate disturbances using perturbation

11 p2145 A70-26696

Flexural vibrations of homogeneous elastic circular cylinder supported at both ends, imposing zero stress conditions on skirt

12 p2321 A70-27154

Wall shear stress distribution in noncircular ducts with steady incompressible fluid flow

12 p2209 A70-27217

Stress-strain state of thin revolving shells composed of multiple variable thickness layers, assuming layers deformation free of slipping and separation

12 p2322 A70-27332

Shallow spherical shells stress-strain state in multiply connected regions resting on Winklerian base

12 p2323 A70-27334

Stress concentration coefficients in multiply connected plates and bulky elements made of nonlinearly elastic materials

12 p2323 A70-27336

Thermal stress concentration in constant thickness orthotropic plate with rounded square hole

12 p2323 A70-27338

Stress-strain state of epoxy resin cylinder situated in centrifugal force field using three dimensional photoelastic method

12 p2323 A70-27340

Orthotropic plates bending with shallow and sharp fillets, determining normal stresses

12 p2325 A70-27533

Residual stresses levels in glass fiber reinforced plastic components after production by compression or winding

12 p2325 A70-27534

Composite spherically aeolotropic sphere with isotropic core, analyzing stress concentration during twisting

12 p2327 A70-27836

Stress concentration in fiberglass reinforced plastic composite cantilever cylindrical shell in round hole region subjected to concentrated load on free supported end

12 p2328 A70-28286

Anisotropy effect on stress distribution at crack apex in elastic plate

12 p2329 A70-28322

Thermoelastic stresses distribution in transmitting dielectric under short nonfocused laser pulses

12 p2251 A70-28327

Pressure buckling values of rod and plate profiles with thicknesses graduated across pressure direction in presence of uniform and nonuniform stress distributions

13 p2507 A70-28477

Stress analysis of infinite elastic plate containing elastic rectangular inclusion subjected to uniform stress field

13 p2508 A70-28486

Stresses in cylindrical pressure vessels with heads formed by internal fluid pressure

13 p2509 A70-28532

Stress concentration in fiber reinforced materials resulting from thermal self straining, using finite element method and photoelastic analysis
13 p2509 A70-28533

Stress concentration factors determined for u-shaped and semielliptical edge notches in semiinfinite sheet under uniaxial tension parallel to edge
13 p2509 A70-28535

Width corrections in calculation of stress intensity factor for sheet with central crack in uniform uniaxial tension
13 p2510 A70-28608

Steel plates with penetration of oblique circular cylindrical aperture tested for effects on stress concentration
13 p2510 A70-28728

Stress concentrations and optimum shape minimum-weight reinforcement of circular holes in plates determined by polarization-optical technique
13 p2512 A70-28864

Vibrocreep effect on Al-Mg-Si alloy vibration frequency and mean and maximum stress at constant temperature
13 p2512 A70-28980

Stress distribution in isotropic plates weakened by elliptical holes under bending based on elastic shallow shell theory and small parameter technique
13 p2514 A70-29291

Stressed state of infinite plate with circular hole induced by displacement discontinuity in form of cracks
13 p2514 A70-29292

Stress-strain state of infinite isotropic plate weakened by curvilinear slit
13 p2514 A70-29293

Elastic isotropic circular perforated plate stress-strain state, proving quasi-regularity of infinite linear algebraic equations
13 p2515 A70-29317

Critical equilibrium of plate under omnidirectional tension with radial rectilinear cracks
13 p2515 A70-29429

Stress concentration coefficient around hole in isotropic nonlinear plate under shear, reducing solution to integrating fourth order differential equation
13 p2516 A70-29510

Tensile test on perforated Al-filled rectangular plate of photoelastic material, obtaining stress concentration at hole by photoelastic visualization
13 p2516 A70-29628

Contour notch position effects on stress concentration in taper section of dumbbell shafts, using photoelastic shaft models and cyclic tests
13 p2517 A70-29750

Nonlinear wave propagation in continuous media involving stress-strain state of half space under pressure or load expanding over boundary
13 p2517 A70-29770

Polycrystalline Al microstrain distribution nonuniformity under creep and static tension
14 p2595 A70-30173

Stress distributions in elastomers under different loads, proposing appropriate measuring technique
14 p2655 A70-30178

Soviet monograph on thermal conductivity of plates and bodies of revolution covering temperature and stress distributions, multilayer shells, etc
14 p2666 A70-30952

Stress distribution in aeolotropic cylindrical shell due to shearing force varying linearly and quadratically with depth on inner boundary
14 p2658 A70-30994

Stress, strain, temperature, electric and magnetic field distributions resulting from magneto-thermoelastic interactions in infinite elastic solid subjected to transient heat source
14 p2661 A70-31229

Stress distribution in spirally corrugated shell under torsional deformation, calculating twisting moment for stiffness
14 p2661 A70-31327

Stress and deformations three dimensional solution in semiinfinite elastic body with spherical cavity based on Boussinesq stress function
14 p2661 A70-31328

Thermoplastics fatigue strength, considering stress variations with time in constant strain tests
14 p2598 A70-31425

Materials durability in presence of stress concentration under biharmonic loading
15 p2813 A70-31527

Two dimensional stress-strain fields under elastic and elastic-plastic strains and steady state creep, calculating stress distribution around hole in cylindrical shell
15 p2813 A70-31533

Creep rate intensity approximate solution as invariant function of stress intensity, determining equivalent stresses under creep
15 p2814 A70-31542

Yield criteria for plastic deformation on glassy high polymers induced by stress field, noting crazing and shear yielding dependence on first stress invariant
15 p2764 A70-31787

Elastic half plane with crack perpendicular to free surface and under arbitrary pressure distribution, obtaining exact solution for stress and displacement fields
15 p2767 A70-31854

Structural components strength calculation with design required functional notches, noting stress limit for ductile materials under static loads
15 p2815 A70-31874

Lamellae stresses and magnetostrictive effects on magnetic properties of titanomagnetite and ilmenohematite series minerals
15 p2728 A70-31993

Positive/negative curvature shells local stresses due to concentrated loads and heat sources, deriving approximate solutions
15 p2817 A70-32161

Influence function for the thin toroidal shell under uniformly distributed axisymmetric load, determining stresses and displacements in various cross sections
15 p2817 A70-32163

Stress distribution in fiberglass unidirectionally reinforced composite material under uniaxial tension
15 p2765 A70-32180

Point heat source generation of thermal stresses in elliptical plate with circular hole, using functions of complex variable for stress field determination
15 p2818 A70-32182

Stress concentration problems for partially strengthened circular hole in plate under uniaxial tension
15 p2819 A70-32185

Plane strain stress intensity factor-Charpy V notch impact test correlations in transition temperature range under slow bend and dynamic loading
15 p2759 A70-32244

Stress concentration in flat rectangular and skew panels with circular holes from photoelastic verification of direct stiffness method
15 p2820 A70-32303

[SESA PAPER 1633] Stress distribution around oblique holes in uniaxially loaded plate using three dimensional photoelastic analysis
15 p2820 A70-32305

[SESA PAPER 1618] Stress concentration around oblique circular cylindrical apertures in steel plates
15 p2820 A70-32306

[SESA PAPER 1533] Axial stress at notch root of shafts under axially symmetric loading, utilizing integrated birefringent patterns in transmitted light at room temperature
15 p2821 A70-32315

[SESA PAPER 1970] Radial and tangential stress distribution through annulus fibrosus dependence on material inhomogeneity for human intervertebral disk
15 p2692 A70-32328

Cumulative creep strain and damage based on stress amplitude coefficients, considering continuous single step system of loads
15 p2821 A70-32339

Boundary value problem of elastic isotropic material, obtaining pointwise bounds of Cosserat continuum, considering couple stresses and constrained rotation of particles
15 p2821 A70-32340

Monograph on temperature dependent material properties effect on elastic stress distribution in thin rotating disks of arbitrary profile
15 p2823 A70-32700

Maximum stress distribution in laminar composites, considering loads on boundary of reinforcing layers
15 p2766 A70-32854

Shear stress distribution in axially nonuniform circular shaft subjected to torsion, using finite difference approximations
16 p2988 A70-33001

Flow stress and dislocation density dependence on temperature in polycrystalline molybdenum
16 p2930 A70-33085

Elastoplastic bending of thin plate under increasing and uniformly distributed loads, defining statically admissible stresses
16 p2988 A70-33107

Stress distributions in tapered bolt assemblies due to interference and uniaxial tension
16 p2992 A70-33989

Stress, strain and acceleration spatial variation in structures subject to broad frequency band vibration excitation, considering simply supported flat plate
16 p2992 A70-34017

German monograph on calculation and measurement of stress distribution in turbine rotors with radial flow, discussing differential equations for rotating disks
16 p2993 A70-34076

Rigid inclusion effect on stress distribution in isotropic infinite solid with Griffith crack under plane strain
16 p2994 A70-34250

Polymeric materials fatigue tests, investigating correlation between crack propagation and stress intensity factor
17 p3127 A70-34624

Stress concentration around small elastic spherical inhomogeneous inclusion on circular cylinder in torsion
17 p3183 A70-34631

Residual stress concentration at fatigue crack tip, using oscillating crystal X ray microbeam diffraction photographic method
17 p3183 A70-34652

Composite orthotropic cylindrical shells linear thermoelastic equations solution for fixed end boundary conditions, noting heterogeneity effects on stress distribution
17 p3184 A70-34909

Bond stress distribution in elastic solid with axisymmetrical inclusions under uniform tension, using three function and point matching techniques
17 p3184 A70-34911

Anisotropy and variable thickness effects on elastic stress distribution in rotating disks, discussing limiting cases
17 p3185 A70-34912

One dimensional analysis of stress and strain concentration resulting from longitudinal impact of viscoelastic rods
17 p3185 A70-34965

Singular solutions to concentrated loads on shallow shell equations with quadratic middle surface
17 p3186 A70-34968

Fatigue life prediction under irregular stress conditions, considering material characteristics determination by standard tests
17 p3187 A70-34990

Plastic flow and failure of elastic fiber reinforced composite materials with noninteracting and interacting discontinuities, obtaining stress distribution for various work hardening degrees
17 p3187 A70-34991

Viscoelastic materials cut growth, discussing strain, fracture and modulus of elasticity dependence on temperature variations
17 p3146 A70-35220

Nonstationary temperature fields and stresses in wedge shaped strip and thin plates with heat transfer for discontinuous boundary conditions
17 p3189 A70-35342

Nonaxisymmetric thermal stress distribution in infinite elastic solid containing external stress-free crack with prescribed heat flux
17 p3196 A70-35437

Elastic properties of complex screw dislocation arrays from equations for stress fields of dislocation segments
17 p3190 A70-35455

Thin elastic shells linear theory, examining three dimensional stress distribution and displacement field
17 p3191 A70-35608

Shallow shell theory boundary value problems, calculating stress concentration for domes and shells with holes
17 p3192 A70-35694

Elastic layer with circular cylindrical cavity under axial tension /Kirsch problem/, determining stress concentration from boundary value problem
18 p3335 A70-36130

Circular cylindrical shell with round holes along generatrix subjected to internal pressure, determining stress concentration with aid of computer
18 p3335 A70-36131

Stress concentration near holes in plate in plane problem of thermoelasticity, taking into account physical and geometrical nonlinearities
18 p3336 A70-36133

Nonlinearly elastic plate with hole of general shape, determining stress concentration
18 p3336 A70-36139

Probability theory of stresses during random vibrations of flat panel in acoustic field of jet engine exhaust
18 p3301 A70-36301

Stress concentration on axisymmetric annular rings calculated using method of singularities
18 p3207 A70-36377

Stress concentration in notched flat samples under plane plastic deformation
18 p3340 A70-36570

Plane cross section hypothesis applied to fully developed creep in thin walled tube subjected to internal pressure and bending moments, calculating stress concentration
18 p3340 A70-36571

Brittle fibers strand strength as function of statistical distribution of limiting stresses
18 p3342 A70-36648

Plates and rods tendency to warp and form nonsymmetrical stress systems during heat treatment
19 p3433 A70-37272

Power and exponential time dependences of long term creep strength for wide stress range, assuming linear heat resistance
19 p3449 A70-37340

Stress concentrations in edge-bonded elastic quarter planes with normal and shear loading at boundary
19 p3535 A70-37384

Holographic registration of isochromatic and isopachous diffraction patterns of photoelastic birefringent objects, showing stress concentrations 19 p3422 A70-37649

Granular medium particles contact forces distribution measurement by absolute retardation method using photoelastic techniques 19 p3427 A70-38344

Stress concentrations and load cycle asymmetry effect on materials stress and breakdown behavior under various load cycles 19 p3547 A70-38429

Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc 19 p3548 A70-38461

Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moiré bands 19 p3548 A70-38466

Blade root design for axial flow compressors and turbines, avoiding tensile stress concentration 19 p3490 A70-38616

Finite element method with first order displacement functions to compute crack tip stress intensity factor in various shapes under different loading conditions 19 p3548 A70-38623

Fatigue crack closure in flat sheet specimens under zero-to-peak tension cyclic loading, analyzing stress distribution from fractographic striation patterns 19 p3549 A70-38625

Pop-in fractures analyzed by semiquantitative model, establishing relationship between pop-in length, stress intensity factor and crack-front plastic deformation 19 p3549 A70-38626

Crack tip stress intensity factor in sheet structures, applying complex stress potentials and perturbation techniques in numerical calculations 19 p3549 A70-38627

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory 20 p3719 A70-39378

Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 20 p3719 A70-39384

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solution convergence 20 p3719 A70-39385

Plate temperature field and stress distribution under thermal pulses, evaluating critical heat load for damage 20 p3737 A70-39635

Stressed state in thermoelasticity plane steady state problem of thin plate under bending based on dislocations and temperature stresses relationship 20 p3721 A70-39780

Fatigue phenomena based on solid body model, establishing breaking stress dependence on time or load cycles number 20 p3724 A70-39854

Low cycle metal fatigue under stress concentration, examining complex loading, cyclic strain, stress-strain state and plastic deformation 20 p3727 A70-39885

Thermoelasticity of fiber reinforced materials, considering stress concentration in beams and reinforcing fibers buckling under thermal loading 20 p3730 A70-40037

Stress concentrations due to cylindrical inclusions in homogeneous matrix, using stress function methods 20 p3656 A70-40045

Brittle bodies with sharp pointed defects, constructing limiting equilibrium diagrams by stress concentration factor representations 20 p3733 A70-40393

Longitudinal shear crack propagation in random internal stress field, examining quasi-brittle rupture theory and cyclic loading 20 p3733 A70-40396

Stress distribution at hole in orthotropic cylindrical sandwich shell under internal pressure 20 p3734 A70-40440

Cross shaped plates with circular hole, determining stress concentrations under uniaxial and biaxial tension 20 p3734 A70-40443

Strain component determination for grain boundary sliding influence in creep of alpha iron 20 p3735 A70-40446

Perforated cantilever beams and plates vibration damping capacity improvement by stress concentration introduction 21 p3933 A70-40729

Stresses around circular hole in shallow conical shell under torsional load, using perturbations in parameters for curvature and cone angle 21 p3934 A70-40779

Notched polycrystalline Al-Mg alloy dislocation structure near propagating fatigue crack at various stress levels 21 p3839 A70-40925

Slip band formation dislocation-diffusion mechanism for single crystal and polycrystalline metals, considering stress intensity and load cycles effects 21 p3936 A70-41416

Bending stress at clamped support of impulsively loaded semiinfinite conical shell, obtaining formulas from perturbation theory 21 p3938 A70-41759

Stress distribution and shape in arbitrarily shaped gore parachute under unsteady pressure distribution during inflation and descent 21 p3752 A70-41819

Finite element analysis of critical stress distribution in canopy of deployed twin keel parawing, predicting failure stress levels 21 p3753 A70-41820

Stress concentration effect on perforated Al alloy panel fatigue, using theory for material critical thickness near notch 21 p3938 A70-41955

Boundary value problem solution for elliptical crack subjected to impulsive load by method of characteristics and discontinuity relations, calculating stress distribution 21 p3938 A70-41960

Butt joined epoxy Al plates tensile strength, observing fracture strength dependence on stress concentration at bond edges below characteristic crack length 21 p3939 A70-42032

Stress intensity factors for complicated crack configurations in finite plates, using finite element method with cracked elements 21 p3940 A70-42034

Cracks stress intensity factors in plane problems by combined conformal mapping and boundary collocation technique 21 p3940 A70-42036

Circular cylindrical hole in uniaxial tension field of elastic media, solving plane strain problem for stress concentration factors 21 p3941 A70-42107

Flow structure in plane submerged turbulent jet, determining velocity, friction stress and correlation coefficients distributions 21 p3749 A70-42221

Filamentary composites stress wave amplitude distribution calculation and plotting 22 p4114 A70-42645

Stresses and strains concentration around elliptic hole in finite plates subjected to uniform load, using photoelasticity, moiré effect and grids 22 p4114 A70-42697

Stress distribution around moving cracks in finite width strip, obtaining solutions for boundary conditions by Schwarz-Christoffel transformation and complex functions theory 22 p4116 A70-43025

Inconel short term creep properties measured for various temperature and stress levels, presenting results in polynomial and graph form 22 p4055 A70-43098

Elastic plane equilibrium with thin walled flexible rectangular finite inclusion under symmetrical concentrated load, including computer calculated tangential stresses 22 p4118 A70-43569

Boron-epoxy composites rectangular reinforcing arrays spacing aspect ratios, considering matrix stress concentrations and stiffness estimates 22 p4119 A70-43688

Isotropic nonlinear elasticity problems of stress concentration near spherical cavity in field of triaxial tension, using small parameter method 22 p4120 A70-43714

Mg high temperature creep mechanism in high and low stress regions, using isothermal tensile creep tests 23 p4204 A70-43885

Free and supported curvilinear holes with random roughness, investigating stress concentration by conformal mapping 23 p4265 A70-43984

Anisotropic media weakened by elliptical holes, using doubly periodic solution for stress concentration 23 p4266 A70-43986

Stress concentration near holes in nonlinear viscoelastic plate, using elastic theory 23 p4266 A70-43989

Notch stress intensity factor representation as boundary traction weighted average, deriving weight functions from stress field boundary displacements 23 p4266 A70-44021

Stress fields of screw and edge dislocations in linearly elastic isotropic Cosserat continuum using stress functions 23 p4266 A70-44022

Plane strain fracture toughness testing of high strength Al alloys and steels, using fatigue cracked bend specimens 23 p4206 A70-44191

Specimen size and mechanical factors in plane strain fracture toughness testing of metallic materials 23 p4206 A70-44195

Turbulent boundary layer velocity profiles and shear stress distributions computation based on mixing length approach 23 p4182 A70-44574

Wrought Nimonic alloy, measuring stress redistribution due to creep under variable load and temperature 23 p4274 A70-44911

German monograph on stress concentration around doubly symmetrical cut-out in cylindrical shells subjected to symmetrical load, using elliptical cut-out theory 24 p4418 A70-45092

Fibrous composite interface effects and fracture work, discussing tip stresses of crack normal to fiber, energy dissipation by pullout and debonding in brittle fiber composites, etc 24 p4419 A70-45171

Unimodal and bimodal distribution of fiber composite properties at different stress levels using quantitative metallography 24 p4359 A70-45250

Semiinfinite elastic medium under variable dynamic pressure on boundary, investigating couple stresses effect on stress distribution 24 p4426 A70-46006

Crystal elastic dislocations general solution, deriving stress function for stress and displacement fields in bipolar coordinates 24 p4426 A70-46018

Plane flow of incompressible elastic perfectly plastic solid, deriving hyperbolic stress and velocity equations 24 p4427 A70-46043

STRESS CORROSION

Stress corrosion cracking in Cu-Al alloys shown dependent on alloy and Cu ion content, solution pH and stress level, discussing tarnish film formation role 01 p0119 A70-10734

Ternary Al-Zn-Mg alloys stress corrosion cracking properties, showing effects of aging temperature and prestrain 01 p0123 A70-11387

Al alloy rectangular beam stress corrosion crack initiation and propagation measurement using ultrasonic techniques, showing relationship between crack velocity and initial stress 03 p0481 A70-12958

Heat transfer effects on corrosion behavior of stainless steel in boiling water, noting stress corrosion cracking increase with chloride ion contamination 03 p0507 A70-13137

Stainless steel stress corrosion cracking test in magnesium chloride solution, emphasizing crack crystallographic orientation observation 03 p0513 A70-14299

Silicon effect on stress corrosion resistance of low alloy high strength steels in NaCl solution for different tensile strength ranges 04 p0707 A70-15272

Heat treatment produced semicoherent and incoherent precipitations diminished susceptibility to stress corrosion cracking of aluminum binary and ternary alloys 04 p0708 A70-15370

Stress corrosion testing method to separate corrosion and stress effects applied to Al and Ti alloys 04 p0708 A70-15374

Stress corrosion of martensitic and austenitic steels, discussing hydrogen embrittlement, mechanical strains, etc 04 p0710 A70-15676

Delayed failure due to hydrogen embrittlement of structural high strength steels, discussing stress corrosion 04 p0710 A70-15678

Aircraft Ti alloys failure due to stress-induced pseudocorrosion caused by trichloroethylene and Freon noting microstructure, heat treatment and welding effects 04 p0710 A70-15679

Aluminum alloys intergranular and stress corrosion, noting electron microscopy application for alloys performance improvement 04 p0710 A70-15680

Martensitic steels microstructure and ductility influence on stress corrosion resistance in magnesium chloride salt chamber 04 p0711 A70-15681

Stress corrosion testing of vanadium alloys using precracked specimens in cantilever beam apparatus, discussing strain hardening exponent role and propagation rates 07 p1306 A70-19299

Stress and intercrystalline corrosion causes and sensitivity in supersaturated Al alloys 07 p1307 A70-19391

Corrosion cracking mechanism for notched metal surface in aqueous environment under tensile stress, discussing electron distribution and H ion concentration 07 p1310 A70-19737

Maraging steels stress corrosion sensitivity in marine environment tested in humid atmosphere, salt fog, natural seawater and salt solutions
07 p1310 A70-19749

Stress corrosion-fatigue crack propagation in high strength structural steels, relating growth rates to crack tip stress intensity factor
[ASME PAPER 69-MET-5] 08 p1519 A70-21452

Ti alloys failure-safe design developing procedures for incorporation of stress-corrosion cracking characterizations into ratio analysis diagram system
08 p1519 A70-21456

High strength stress corrosion resistant aluminum alloy die forgings, evaluating tensile, tensile fatigue and fracture toughness properties
09 p1702 A70-22556

Transcrystalline stress corrosion crack initiation in austenitic stainless steel tested in boiling magnesium chloride solution
09 p1706 A70-22940

Fracture mechanics model for stress corrosion cracking of Al alloys, discussing bond strength lessening by adsorption of damaging species
09 p1706 A70-22941

Polyamides /nylons/ stress cracking by metal halides and halide-like salts, investigating effects of nylon temperature, moisture content, concentration, etc
10 p1907 A70-24224

Polyamide and secondary amide mode compounds stress cracking by metal halides using IR and nuclear magnetic resonance techniques
10 p1907 A70-24299

Li and Cr additives effects on Al-Zn-Mg stress corrosion resistance, considering cracking, precipitation hardening and intercrystalline corrosion
13 p2433 A70-28844

Structural Al-Zn-Mg alloys strain hardening effect on mechanical and corrosion properties, noting relationship between stress corrosion cracking and shear cracks
13 p2434 A70-29155

PH variation effect on sea water on stress corrosion cracking behavior of Ti alloys
13 p2435 A70-29174

Quality control technique for predicting exfoliation and stress corrosion resistance of Al alloy sheet and plate
13 p2435 A70-29175

Work hardening and tempering effects on Al-Mg alloy stress corrosion and mechanical properties
14 p2597 A70-30963

Fracture mechanics and stress analyses comparison for fatigue cracked steel cantilever beam stress corrosion specimens
15 p2755 A70-31473

Electrochemical processes associated with stress corrosion cracking of Ti-Al-Mo-V alloy in aqueous environments
15 p2755 A70-31474

Stress corrosion cracking of Ti and Ti-Al-V alloy in liquid nitrogen tetroxide
15 p2755 A70-31475

Plain strain fracture toughness index measurement, discussing application to metal fatigue and stress corrosion
15 p2757 A70-31927

Ti alloy suitability for fastener applications noting cold workability, high strength and stress corrosion resistance
[ASM PAPER W70-17.3] 15 p2760 A70-32338

High temperature scaling of Ni, investigating role of oxide microstructure and growth stresses
15 p2762 A70-32388

Stress corrosion cracking of high strength structural, tool and marring steels due to hydride, diffusion controlled and mixed embrittlement
16 p2934 A70-34301

Electrochemical mechanism in Ti alloys stress corrosion cracking, formulating mass transport kinetics model
17 p3113 A70-34368

Stress corrosion cracking of alpha-Ti alloys at room temperature, suggesting cathodic polarization promotion of film buildup
17 p3113 A70-34369

Aqueous stress corrosion dependence on microstructural features of Ti alloys, using optical and electron microscopy and X ray diffraction
17 p3113 A70-34370

Ti-Al-Mo-V alloy stress corrosion cracking, investigating correlation between dislocation substructure and ambient temperature corrosion susceptibility
17 p3113 A70-34371

Stress corrosion cracking in Ti and alloys, discussing metallurgical and environmental factors emphasizing exposure to hot salt, methanol, seawater, etc
17 p3114 A70-34372

Stress corrosion cracking in Ti-Al-V alloy exposed to Freon environments
17 p3114 A70-34373

Ti alloys crack formation during oxidation under stress, considering annealing and recrystallizing effects
17 p3114 A70-34374

Ti alloys crack initiation and propagation during hot salt stress corrosion
17 p3114 A70-34375

Titanium hydride deformation assisted nucleation in alpha-beta titanium alloy, showing low strain rate embrittlement and stress corrosion crack propagation in aqueous environments
17 p3116 A70-34395

Stress corrosion cracking of Ti alloys in nitrogen tetroxide and methyl alcohol environments in Apollo spacecraft pressure vessels
17 p3199 A70-34453

High strength ferrous alloys susceptibility to stress corrosion in seawater environment, tension loading single edge notched and fatigue cracked specimens in NaCl solution
17 p3123 A70-34554

Neutron irradiation effects on stress corrosion susceptibility of Al alloy
17 p3124 A70-34822

Corrosion and stress corrosion behavior comparison of aged Al-Zn-Mg alloy in aqueous chloride solution, discussing pH variation effect
18 p3271 A70-36028

Precorrosion effects on strained Al alloy electrochemical response, examining strain test results graphically
19 p3451 A70-37780

High strength and stress corrosion resistant materials, considering Ti, Ni, Al alloys, metal-matrix composites and polymers
20 p3655 A70-39666

Al alloy stress corrosion susceptibility, examining grain size and anisotropy role
20 p3651 A70-40070

Two stage aging effects on stress corrosion cracking of Al-Zn-Mg alloys, discussing precipitated particles size, surface roughness change and temperature effects
22 p4052 A70-42306

Atmospheric environment effect on residual shear stress corrosion cracking of commercial Al-Zn-Mg alloys subjected to heat treatment regimes
22 p4052 A70-42307

High strength martensitic stainless steel stress corrosion resistance and fatigue crack growth rate, considering austenite content, strain aging and tempering temperatures
24 p4359 A70-45245

Nondestructive inspection methods for welded structures affected by stress corrosion
24 p4347 A70-45730

Cold reduction, refrigeration and annealing effects on stress corrosion cracking of austenitic stainless steels
24 p4365 A70-46389

STRESS CYCLES

Ultrasonic detection system for crack initiation and propagation in notched low cycle axial fatigue testing using surface and longitudinal waves
01 p0096 A70-10004

Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages
01 p0212 A70-11607

Static and cyclic stress distributions in buckling shear panel comprising flat plate of clad Cu-Al alloy
02 p0388 A70-12497

Periodic biharmonic stress cycling determination of load influence of fatigue failure used for random load serviceability tests
02 p0391 A70-12855

Out-of-phase or nonsynchronous biaxial straining effects on low cycle fatigue observed on Al specimen by cycling tension-compression and cyclic torsion
03 p0481 A70-12955

Stress cycle asymmetry effects on energy dissipation in rods under torsional vibration
03 p0588 A70-13249

Al alloy and structural steel fatigue strength under superelastic cyclic axial stresses, describing observed plastic deformation patterns
03 p0509 A70-13271

Equipment for cyclic biaxial testing, producing five biaxial stress states by simultaneous direct pressurization and axial loading of thin walled cylindrical specimen
03 p0464 A70-14309

Thermoelastic stresses in solid cylinder under cyclic temperature variation, calculating amplitude for Biot numbers
04 p0766 A70-14477

Cyclic bending stress in disk type gyroscope rotor under steady precession, discussing solutions for modal functions and resonant frequencies
[ASME PAPER 69-DE-A] 04 p0689 A70-14873

Overstress cycles sensitivity for welded specimens on basis of French fatigue damage line and Wohler S-N line
05 p0941 A70-16520

Low cycle fatigue of alloy and steel materials under bending and cyclic heating, relating strains and number of cycles to failure
05 p0866 A70-17036

Stress kinetics and breakdown time of hardening Al alloys and steels under cyclic loads, noting dependence on plastic deformation
06 p1162 A70-17391

Rotation of circular cross sectioned continuous rod with constant bending moment, assuming linear strengthening with fixed cyclic strain diagram
06 p1163 A70-17396

Mean cyclic stress effect on stress concentration and fatigue strength of smooth and notched steel specimens at normal and high temperatures with superimposed bending
06 p1088 A70-17653

Spiral gears bearing disks contact fatigue endurance process, deriving critical points cyclic stability from stress distribution considerations
07 p1291 A70-18819

Cylindrical Mo single crystals during cyclic heating, studying characteristic dislocation changes at various stages of thermal fatigue
07 p1308 A70-19609

Tensile and compressive stress cycles effect on short term strength of glass fiber plastic laminates
07 p1411 A70-19769

Stability criterion applied to asymmetric rigid cyclic strains and plastic cyclic strains, considering failure of metals
07 p1315 A70-20182

Adhesive bonds strength in metal joints under stress cycling, examining effects of temperature and cycles frequency
08 p1504 A70-20888

Metal adhesive joints under cyclic stresses, studying stress distribution and fracture occurrence by high speed cameras
08 p1504 A70-20889

Cyclic bending stresses in web of precessing disk-type gyroscope rotor, considering fatigue failure and forced vibration response
09 p1770 A70-22270

Thermal and high strain fatigue covering cyclic tests, crack initiation and propagation, stress-strain behavior, structural design, frequency and temperature effects, etc
09 p1773 A70-22576

Damage model for materials failure prediction under cyclic loading developed for strain controlled cycle with hold time
09 p1774 A70-22588

Mean stress effect on low cycle fatigue strength, deriving expression for completely reversed stress cycling
10 p1964 A70-25091

Plastic strains buildup during thermal cycling, establishing relation between strain interval and cycles number to failure for strain hardening materials
10 p1965 A70-25293

Programmed and randomized loading flight-by-flight tests for fatigue life, noting stress cycles
11 p2138 A70-26096

Collection of papers on low cycle fatigue testing covering mechanical properties and test facilities
11 p2033 A70-26608

Metals low cycle fatigue resistance, discussing repeated plastic straining effect on mechanical properties
11 p2141 A70-26609

Low cycle fatigue testing facility and methods used at NASA Lewis Research Center
11 p2033 A70-26610

Low cycle fatigue tests advantages by reversed bending ascribed to simplicity, specimen stability at high strain levels and minimum equipment costs
11 p2034 A70-26614

Uniaxial low cycle thermal fatigue test procedure for ductile metals, describing strain measuring system allowing direct recording of load vs mechanical deformation
11 p2034 A70-26615

Metallic materials under cyclic stress conditions, investigating creep rate dependence on cycling frequency and impurities during static-to-dynamic transition
13 p2513 A70-28993

Automatic Failure Rate Assessment Machine /FRAM/ for subjecting guided weapons electronic modules to cyclic stresses inducing failure of inherent weakness
13 p2379 A70-29686

Fibre reinforced polymers fatigue life under cyclic stresses, obtaining data from rotary cantilever tests
15 p2764 A70-31933

Electromechanical transducer to sense and record strain cycles, describing motion magnification principle, system and prototype evaluation
15 p2739 A70-32310

Alternating stress required for edge crack propagation in metal plates under tensile loading cycles
15 p2762 A70-32464

Unalloyed polycrystalline Ti fatigue tests, observing cyclic stresses effect on twinning
17 p3116 A70-34393

Strain rate effect on cyclic behavior of materials with hardening and softening characteristics
17 p3187 A70-34988

- Combined mechanical and cyclic thermal stresses effect on plastic deformation buildup in E1435 alloy preceding breakdown 19 p3449 A70-37349
- Stress cycle asymmetry effects on energy dissipation in rods under torsional vibration 19 p3548 A70-38467
- Fatigue crack propagation under programmed loads, correlating crack growth rates and tip opening displacements 19 p3549 A70-38628
- Statistical data for optimum fatigue reliability design for dynamic and rotary machinery, considering static strength, cycle-to-failure and stress-to-failure distributions 21 p3833 A70-41004
- Low cycle notch fatigue tests on Inconel and low alloy steel, giving fatigue strength reduction factors for design 22 p4055 A70-43103
- Step-amplitude stress cycle program effects on durability of heat resistant alloy for turbine blades under cyclic loading 23 p4204 A70-43934
- ### STRESS DISTRIBUTION
- #### U STRESS CONCENTRATION
- #### STRESS FUNCTIONS
- Moments and shear forces in plate flexure represented by single valued stress functions of position, stating variational principle for compatibility 01 p0201 A70-10931
- Stresses in plane elastic bodies analyzed by generalizing biharmonic stress function equation in polar coordinates, assuming constant Poisson ratio and nonhomogeneity 01 p0206 A70-11152
- Complex stress functions and stress intensity factors at tips of star-shaped contour hole in infinite tensile sheet, including crack forking with arbitrary angle 03 p0585 A70-12974
- Axisymmetric problem analysis for cylindrically anisotropic elastic bodies with restricted orthotropy based on Love-Lekhnitsky stress function generalization 03 p0601 A70-14327
- Strain energy function for swollen crosslinked elastomers, extending application range by including third invariant 05 p0927 A70-15980
- Dynamics theory of displacement on basis of equations of motion solution by stress functions 05 p0931 A70-16133
- Stress functions in three dimensional nonaxisymmetric elastostatics problems in circular cylindrical coordinates, proving representation completeness for cylindrical bodies 05 p0932 A70-16172
- Inherent stresses in elastic solid assuming inherent strain as stress source, integrating stress functions 06 p1160 A70-17131
- Variational theorem for compatibility and plasticity for Mises solids based on stress functions 09 p1771 A70-22397
- Boundary point least squares technique extended to thermal and thermal stress problems in similar regions, deriving temperature and stress functions 09 p1774 A70-22580
- Axisymmetric elasticity theory problem solution for hollow finite cylinder with symmetrical end loading, employing stress function 11 p2128 A70-25388
- Equilibrium displacement equations for linear infinitesimal isotropic Cosserat elasticity solved in terms of stress functions 11 p2142 A70-26630
- Complex potentials used in semicomplex variable method for plane-strain problems in two dimensional linearized elasticity with couple stresses 13 p2508 A70-28494
- Plane stress state equations for micropolar elastic plates using complex potentials 13 p2517 A70-29629
- Incompressible solid propellant rocket charges axisymmetric problems, using Galerkin stress functions 14 p2657 A70-30772
- Stress and deformations three dimensional solution in semiinfinite elastic body with spherical cavity based on Boussinesq stress function 14 p2661 A70-31328
- German monograph on stress-strain state determination for rotors of turbomachines covering strain equations, partial differential equations, boundary conditions, etc 16 p2971 A70-34078
- Double curved shell membrane stress calculation under arbitrary load, using stress functions 18 p3338 A70-36373
- Two dimensional piezoelectric problems of electroelasticity, formulating general solutions in terms of stress and electric potentials using complex variables 19 p3487 A70-37946
- Stress concentrations due to cylindrical inclusions in homogeneous matrix, using stress function methods 20 p3656 A70-40045
- Membrane theory of shells, reducing equilibrium equations to single second order partial differential equation through transformation in terms of stress function derivatives 21 p3939 A70-42031
- Numerical solution of first boundary value problem of elasticity theory involving biharmonic stress function relating to rim loads 23 p4275 A70-44942
- Crystal elastic dislocations general solution, deriving stress function for stress and displacement fields in bipolar coordinates 24 p4426 A70-46018
- ### STRESS MEASUREMENT
- #### NT X RAY STRESS MEASUREMENT
- Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation 03 p0480 A70-12882
- Strain gauge data obtainable on rosettes used for measuring stress component stresses at 550 F in inert atmosphere 03 p0482 A70-12965
- Equipment for cyclic biaxial stress states testing by simultaneous direct pressurization and axial loading of thin walled cylindrical specimens 03 p0462 A70-12966
- Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moire bands 03 p0588 A70-13248
- Stress-strain state of material computed from strain measurements using strain gages and strain circle 03 p0588 A70-13272
- Inductive eddy current strain gage for repeated strains measurement in magnetic and nonmagnetic sheets offering direct readout and remote recording 03 p0485 A70-13475
- Elastoplastic strains in machine element surface layers under static friction force using polarization-optical techniques 04 p0696 A70-14410
- Turbulent flow velocity and stress components simultaneous measurement by single hot wire, discussing equations and computer program 04 p0685 A70-14447
- Stress analysis based on observing birefringence effects in photoelastic surface coating 04 p0689 A70-14922
- Diodes on cordwood module measured for stress during soldering, foaming and operation, describing methods for mounting semiconductor strain gages 05 p0854 A70-16036
- Laser interferometer for earth strain study, measuring Michelson arm length changes by counting fringes in interference pattern 05 p0861 A70-16843
- Stress and buckling measurement of shallow cylindrical steel shells linked to thin plate using resistant strain gauges and high precision indicators 06 p1167 A70-17866
- Calibrating rods design for vibrating components stress measurement gauges 07 p1400 A70-18822
- Semiconducting components reliability test involving electrical parameters measurement following thermomechanical stresses 09 p1689 A70-22002
- Thermomechanical tests effectiveness and determination of stress level defining boundary between destructive and nondestructive testing 09 p1689 A70-22004
- Sensors design for studying temperature fields and stressed state of structures 09 p1680 A70-23106
- Polarization-optical kinematographic method for study of mechanical stresses during dynamic loading 09 p1680 A70-23174
- Amplitude dependence of Young modulus defect in metals during large stress HF oscillations 10 p1956 A70-24247
- Tensile and compressive strain measurements close to weld deposits, using moire fringe technique and mismatch grating 10 p1890 A70-24591
- Nomograms for thermoelastic stress in plate determined as function of dimensions and heat transfer 10 p1965 A70-25300
- Plane tension in elastic infinite strip covered by elastic plate, considering applicability to strain measurement errors calculation 11 p2129 A70-25565
- Transient and steady state thermal stress distribution measured by strain gages embedded in epoxy models 11 p2130 A70-25585
- Stress measurement in discontinuous layered medium subjected to perpendicular load under sliding friction, using photoelastic interferometric models 11 p2131 A70-25587
- Transient and steady state thermal stresses measured by holographic extension of photoelastic analysis 11 p2049 A70-25592
- Slip-ringless propeller blade mounted measurement system for steady state and vibratory stresses from multiple strain-gage locations during flight and ground tests [SAE PAPER 700223] 11 p2051 A70-25891
- Moire theory applied to direct strain measurement methods based on light diffraction 11 p2058 A70-26835
- Strain measurement over large steel plate surface ground to reasonable flatness and in welded joints by applying moire method 11 p2061 A70-26836
- Cross sensitivity errors effect on stress determination by free-filament wire strain gages used at high temperature 11 p2058 A70-26838
- Residual macrostress measurement by X ray diffractometer methods 11 p2058 A70-26839
- High temperature compressive creep tests at constant stress, describing strain measurement techniques and servocontrolled compressive equipment 12 p2206 A70-27214
- Stress relaxation in alpha titanium during plastic strain, measuring temperature and strain rate dependence 12 p2255 A70-27608
- Athermal component of plastic flow stress in alpha titanium at room temperature using incremental unloading technique 12 p2257 A70-28100
- Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading 12 p2328 A70-28200
- Steel plates with penetration of oblique circular cylindrical aperture tested for effects on stress concentration 13 p2510 A70-28728
- Thermocompensated wire loop microtensensors for machine part stress concentration measurements, including parameter selection nomograms 13 p2409 A70-29519
- Inertial load-time effects in instrumented impact tests, showing corrections for bending stress and dynamic fracture toughness measurements 15 p2820 A70-32240
- Pure iron and low carbon steel macroscopic stress measurements, determining correlation between residual stress, fatigue damage and fatigue life 15 p2759 A70-32322
- FM/FM radio telemetry system for transmitting strain and temperature data from rotating parts 15 p2739 A70-32330
- Stress intensity analysis method for plates with random cracks array under plane stress 17 p3187 A70-34997
- Combined lens-hologram system for strain measurements by moire technique 17 p3087 A70-35024
- Stress decay rates in Saint Venant boundary region in truncated semiinfinite elastic cone, using Papkovitch-Neuber functions for eigenfunctions formulation 18 p3339 A70-36489
- Polarization optical determination of plane stress plastic region, using celluloid model 18 p3343 A70-36723
- Stress measurements in rotating plane disks with notched disturbed symmetry, using stroboscopic photoelasticity and numerical methods [ASME PAPER 70-GT-26] 18 p3344 A70-36867
- Omnidirectional dynamic stress gage as embedded elastic inclusion, discussing transient response to ground shock compression wave pressure 19 p3422 A70-37699
- Precorrosion effects on strained Al alloy electrochemical response, examining strain test results graphically 19 p3451 A70-37780
- Stress and vibration effects measurement by holographic interferometry, comparing results with direct measurements 19 p3427 A70-38450
- Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moire bands 19 p3548 A70-38466
- Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation 20 p3718 A70-39158
- Asymmetric micropolar thermoelasticity, deriving integral expressions for strains, rotations and temperatures in finite body 20 p3726 A70-39878
- Contact shaped fiberglass-reinforced plastic tensile creep tests, showing strain property linearity dependence on direction 21 p3841 A70-40642
- Photoelastic stress measurement of metal powder particles during sintering, using two dimensional models 21 p3935 A70-41410

Compressive and rarefaction shock wave propagation in polymethyl methacrylate, fused silica and sapphire, using laser interferometer measurements
22 p4031 A70-43020

Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading
22 p4117 A70-43324

Strain gage stress measurement under elastic-plastic strain conditions at high temperature
22 p4117 A70-43454

Reynolds stress measurement, using laser flowmeter with cylindrical lenses and square aperture mask
23 p4202 A70-44945

Nondestructive testing - Conference, Hanover, June 1970, Materials properties determination, Stress measurements
24 p4347 A70-45728

Residual stress measurement using programmed horizontal X ray diffractometer
24 p4425 A70-45729

STRESS PROPAGATION

Cracks development in hydrogenated silicon iron, investigating plastic strain relation and brittle rupture propagation
06 p1165 A70-17580

Stress wave propagation in particulate loaded carbonaceous materials induced by homogeneous laser beam
07 p1302 A70-20097

Plane and cylindrical stress wave propagation in elastoplastic medium, studying stress interrelations
09 p1775 A70-22610

Uniaxial strain pulse propagation through various materials loaded uniformly with step function pressure by gas dynamic shock wave reflection
09 p1783 A70-23449

Compression stress wave generated by longitudinal impact of two cylindrical elastic rods, measuring propagation along rod by strain gage stations
12 p2325 A70-27617

Longitudinal stress waves propagation in polymeric optically active plastic bars using photoelasticity method
12 p2328 A70-28277

Stress wave generation in elastic temperature-dependent absorbing solids by impulsive EM radiation
17 p3185 A70-34967

Stability conditions in straight bar, taking into account stress direction changes caused by deformation
18 p3337 A70-36372

Stress wave propagation based on elasticity theory for reentry heat shield composites reinforced with unidirectional high strength high modulus fibers
19 p3537 A70-37788

Unidirectional composites subjected to free vibration and axial end loading, considering longitudinal stress wave propagation in fiber direction
19 p3540 A70-37954

Circular cylindrical shell with annular orthotropic elastic core, analyzing stress wave propagation under pressure pulse
21 p3938 A70-41740

STRESS RATIO

Stress ratio effects on Al alloy during crack propagation and fatigue, introducing notch stress and strain approximations
11 p2066 A70-26089

STRESS RELAXATION

Relieving microstrains in Ni powders by cold compaction at room temperature using X ray analysis, discussing polygonization process
01 p0117 A70-10161

Annular metal specimens protection against oxidation during high temperature relaxation testing by covering specimens with Al powder thinned with alcohol
01 p0121 A70-11109

Dislocation climb theories of creep and superplasticity derived, postulating strain hardening and recovery processes with independently determined rates
02 p0317 A70-12315

Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration
03 p0588 A70-13246

Cylindrical compression spring relaxation at high temperatures, presenting design data for time-temperature initial stress relationships
[ASME PAPER 69-WA/MET-10]
04 p0697 A70-14758

Structural metals hysteresis properties under cyclic plastic loading at room temperature, considering cycle dependent creep and stress relaxation
[ASME PAPER 69-WA/MET-4]
04 p0705 A70-14763

Polystyrene and polyamide stress relaxation graphs, considering tensile stresses and temperature effects
04 p0712 A70-15101

Activation energy measurement using stress relaxation for plastic flow in commercially pure Al compared with creep and tensile method
04 p0777 A70-15495

Plastic deformation of refractory alloys during stress relaxation tests under vibrations, showing enhanced stability
05 p0866 A70-17033

Stress rupture strength and relaxation and time to failure of AMG-6M sheet under creep using energy dissipation method
05 p0952 A70-17034

Test facilities for studying materials thermophysical properties and stress relaxation, including dynamic hardness measurement and torsion tests up to 2500 K
05 p0830 A70-17074

Alloy specimen shortening due to aging during stress relaxation under vibration
07 p1304 A70-18820

Creep and stress relaxation tests to investigate time dependent fracture strength of unidirectional glass fiber reinforced epoxy composites
07 p1321 A70-19962

Stress relaxation in polytetrafluoroethylene (PTFE) at various compression deformations and temperatures, considering residual stresses degree
07 p1321 A70-20228

Cyclic creep and relaxation of heat resistant alloys at high temperatures, showing inapplicability of static load conditions
08 p1516 A70-20982

Thermal and athermal components of flow stress and deformation dynamics in Ti-Al alloy
08 p1521 A70-21578

Energy storage in creep deformed graphite from stress reduction tests, discussing negative creep, test procedures and results
09 p1709 A70-22386

Austenitic steels and alloys high temperature softening under conditions of stress relaxation and creep, noting hardening action of plastic deformation
09 p1709 A70-23785

VTOL aircraft metal fatigue examination by photoelasticity emphasizing stress reduction
11 p2132 A70-25622

Flexural stress relaxation properties of thermoplastics and composite materials, assessing strain energy by ballistic pendulum
11 p2070 A70-26342

Stress relaxation in combined torsion-tension, developing expressions for torque and axial force
11 p2140 A70-26482

Stress relaxation in alpha titanium during plastic strain, measuring temperature and strain rate dependence
12 p2255 A70-27608

Stress relaxation of Mo under plastic deformation controlled by diffusion of interstitial atoms and dislocations, determining activation energy
15 p2758 A70-32124

Holographic interferometry measurements, including low frequency quartz vibration and relaxation effects in materials following strain or impacts
17 p3085 A70-35005

Ring and cylindrical structures comparative stress relaxation at room temperature
19 p3535 A70-37341

Stress relaxation in rings and rods, discussing errors possible in data correlation
19 p3535 A70-37342

Internal residual stress relaxation theory in dielectric aging in tetragonal solid solutions of calcium titanate in barium titanate
19 p3486 A70-37776

Stress relaxation interpretation at wave fronts in one dimensional media by nonlinear viscoelastic models, giving constitutive equations
19 p3542 A70-38057

Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration
19 p3548 A70-38464

Bcc metals and alloys stress relaxation, internal stress and work hardening, discussing temperature dependence and dislocation motion
20 p3647 A70-39108

Ti alloy tension creep tests at room temperature, determining strength for correlation with stress relaxation
22 p4055 A70-43097

Equations of state in quadratic viscoelasticity for orthotropic media, deriving tensors of creep and relaxation centers
22 p4119 A70-43711

Limiting pressure for isotropic plastic plates and spherical shells with stress dependent yield, using flow theory
22 p4120 A70-43717

Fiberglass reinforced plastic strength and deformation properties under creep and stress relaxation, investigating temperature effects and load duration
23 p4209 A70-43980

STRESS RELIEVING

Fiber composite cylinder tensile performance improvement through mechanical residual stress relief by axial straining
01 p0120 A70-10737

Residual stresses in cylindrical shells eliminated by local heat treatment, determining temperature field in elastic strain regions
03 p0497 A70-13739

Commercial Ni-Co gas tungsten arc filler metal with mechanical properties stable following stress relief
04 p0710 A70-15653

Membrane stress concentration near circular cutouts in uniaxially stressed sheets reduced by predeforming immediate surroundings of hole
05 p0940 A70-16515

Phenomenological properties of stress relief embrittlement in nickel steel, noting toughness recovery via retempering
11 p2059 A70-25665

Residual stresses near weld in spherical rocket motor casing constructed from maraging steel sheet, discussing moire measurement and reduction treatments
15 p2744 A70-31926

STRESS RUPTURE STRENGTH

U CREEP RUPTURE STRENGTH

STRESS TENSORS

Einstein equations for Bianchi type IX universe model suitable for numerical solution and application to cosmology with pure fluid stress tensor
01 p0142 A70-10522

Discontinuity surfaces /cracks/ propagation in continuous medium having energy and stresses as functions of strain tensor gradient, using variational principle
03 p0589 A70-13330

Difference equations and axial stress tensor component for turbomachinery in curvilinear coordinates systems
04 p0776 A70-15268

Time dependent transport equations for full Reynolds stress tensor and turbulence decay function using flux approximations and relaxation model
[AIAA PAPER 70-7]
06 p1038 A70-18080

Stress tensor for relativistic weakly ionized plasma in HF electromagnetic field taking into account collisions
07 p1348 A70-19197

Green and Cauchy deformation tensors determined from moire fringe pitch and angle measurements, deriving equations by specimen and master grid geometries indicial representation
[ASME PAPER 69-APMW-21]
08 p1591 A70-21462

Natural bending vibrations of circular plates with allowance for stress tensor asymmetry, deriving transcendental frequency equation
09 p1782 A70-23292

Stress tensors in initial value problem for incompressible flow with nonlinear viscosity
09 p1663 A70-23570

Stress tensor and displacement vector in thin elastic shells/plates derived from three dimensional nonlinear equations using asymptotic integration
11 p2142 A70-26634

Axisymmetrical stress tensor singularity convergence of rigidly clamped circular plate, showing identity of plane stressed state transcendental equations
12 p2325 A70-27558

Normalized Reynolds stress tensor in upstream region of fully developed turbulent shear flow as function of position, using inviscid linear model
[ASME PAPER 70-FE-2]
16 p2891 A70-33626

Stationarity of complementary energy in nonlinear elasticity theory, using Piola stress tensor representation for isotropic elastic media
17 p3192 A70-35692

Stress energy tensor equal time commutation, observing metric dependence inability to satisfy relations for linearized gravitational fields
19 p3536 A70-37550

STRESS WAVES

Book on nonlinear stress waves propagation in elastic solids covering adiabatic shocks, isentropic plane waves, Lagrange equation, spherical waves, heat conduction effect, etc
01 p0202 A70-10966

Micrometeorite detection involving impact stress wave monitoring by strain gages embedded in viscoelastic plastic
03 p0487 A70-13573

Stress wave propagation tests in thin walled tubes under combined tension and torsion, discussing predicted and observed strain-time profiles discrepancies
03 p0599 A70-14245

Transient processes of strain wave propagation in elastic shells and plates under time varying loads
04 p0773 A70-15010

One dimensional stress waves propagation in elastoplastic medium, determining stress and velocity fields due to heat sources motion by characteristics method
04 p0776 A70-15447

Transient stress waves generated by spatially uniform distribution of transverse forces in laminated medium, using modal analysis
05 p0938 A70-16409

- Radially nonsymmetric stress wave propagation from tip of moving crack in infinite plates, deriving minimal group velocity 05 p0941 A70-16516
- Double giant pulse ruby laser with 1.5 m coherence length for producing double exposure holograms of stress wave propagation in solids 05 p0861 A70-16850
- Stress wave propagation in particulate loaded carbonaceous materials induced by homogeneous laser beam 07 p1302 A70-20097
- Curved thin rods torsional and flexural waves propagation equations, considering geometry and shear and Young moduli 08 p1588 A70-21201
- Dynamic stresses during abrupt temperature changes of medium, showing internal stress waves amplitude increasability by suitable internal stress source selection 09 p1778 A70-23089
- Strain gage for measuring strain waves amplitude on surface of fused quartz to study electromagnetic waves interaction in Permalloy films 09 p1681 A70-23349
- Electronic stress wave analysis technique /SWAT/ for delayed weld cracking data acquisition 10 p1897 A70-25312
- Gas passing through shock wave, investigating constitutive relations for stress and heat flux using Maxwell moment method 11 p2036 A70-26015
- Transient analysis of stress waves around cracks under antplane strain with time dependent loadings based on integral transforms 11 p2145 A70-26698
- Compression stress wave generated by longitudinal impact of two cylindrical elastic rods, measuring propagation along rod by strain gage stations 12 p2325 A70-27617
- Iron sample shape determination for studying relationship between tensile strength and rate from stress wave propagation during high speed tensile tests 15 p2814 A70-31547
- Stress wave propagation in solid infinite elastic medium and laminated materials 15 p2823 A70-32784
- Three dimensional dynamic analysis of small harmonic stress wave propagation in elastic-plastic and viscoplastic materials, using finite differences 18 p3344 A70-36724
- Lumped parameter model for multidimensional solid mechanics problems with inelasticity, discussing stress wave interaction in cylindrical cavity 19 p3458 A70-38357
- Filamentary composites stress wave amplitude distribution calculation and plotting 22 p4114 A70-42645
- Finite difference method for stress wave propagation and multiple reflection in elastic bar with discontinuities 22 p4115 A70-42744
- Strain rate sensitivity and stress waves effects on dynamic response and adhesion failures of rain erosion resistant coatings 22 p4059 A70-43102
- Perturbation effects on nonlinear first order wave equations discontinuous solutions decay, discussing boundary value problem for stress wave propagation in rod with viscous damping 24 p4426 A70-46026
- STRESS-STRAIN DIAGRAMS**
- Nonlinear stress-strain equations for incompressible hyperelastic media developed for undeformed and deformed continuum states 01 p0201 A70-10892
- Digital computer for data recording in stress-strain curves and data points for mechanical tests 01 p0058 A70-11062
- Stress-strain effect on dislocation densities of cylindrical Mg single crystals deformed by torsion basal slip compared to tension test 01 p0122 A70-11236
- Metal and alloys micro and macro stress-strain behavior data correlated for linear differential transformers, strain gages, longitudinal resonance waves and X ray diffraction 01 p0092 A70-11248
- Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius enclosed in shell under pressure and unsteady temperature field 02 p0384 A70-11663
- Stress-strain state of epoxy resin plates with single or paired wire reinforcement, using polarization-optical method 02 p0384 A70-11664
- Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis 02 p0384 A70-11665

- Temperature effects on tensile deformation mechanism of Mo single crystals, investigating stress-strain characteristics and slip geometry 02 p0316 A70-11699
- Left ventricle wall forces and dimensional measurements during cardiac cycle based on stress-strain terms, including results for mitral, aortic and myocardial disease 02 p0238 A70-12512
- Strain rates and stresses relations in plasticity theory for consolidatable orthotropic bodies having three elastic planes of symmetry 02 p0389 A70-12686
- Load and strain trajectory vectors components determined for tension followed by transverse compression in five dimensional space 02 p0390 A70-12803
- Quasi-linear stress-strain deviators relations in viscoelastic theory, indicating kernels and functions determinable from creep relaxation loading and deformation tests 02 p0390 A70-12804
- Stress-strain state of material computed from strain measurements using strain gages and strain circle 03 p0588 A70-13272
- Stress-strain state of perforated shallow shells with arbitrary curvature using Green matrices 03 p0591 A70-13416
- Integral equations for antisymmetric shallow shell stress-strain state with crack, obtaining asymptotic solution in form of power series 03 p0591 A70-13420
- Stress-strain state of body of revolution having transversely isotropic elastic properties, using perturbation technique 03 p0591 A70-13441
- Stress-strain state of infinite isotropic perforated plate under cyclic symmetry, assuming finite strains and nonlinear material 03 p0592 A70-13445
- Stress-strain relations for rigidly sealed orthotropic planes with finite number of slits 03 p0592 A70-13447
- Stress-strain state of arbitrarily cracked cylindrical shell under symmetric and asymmetric loading 03 p0594 A70-13736
- Elastoplastic analysis of strain hardening materials under multiaxial states of stress based on von Mises yield condition and stress-strain relationship 03 p0596 A70-14012
- Stress-strain state under bending of shallow spherical shell having form of circular rectangle with clamped edges 04 p0767 A70-14486
- Cyclic hysteresis-loop stress-strain behavior of 1100 aluminum, deriving power function [ASME PAPER 69-WA/MET-1] 04 p0705 A70-14764
- Stress-strain spatial distribution in notched plate fatigue specimen of mild steel determined by finite element method, noting cyclic strain softening effect [ASME PAPER 69-MET-C] 04 p0770 A70-14876
- Nonlinear stress-strain laws and yield conditions derived for anisotropic materials on basis of one, two and three invariants 05 p0926 A70-15914
- Integral constitutive relation representing incompressible viscoelastic materials and plane stress and strain conditions 05 p0930 A70-16087
- Stress-strain relations for elastic anisotropic crystal lattice systems derived in terms of orientation vectors and scalar moduli 05 p0932 A70-16135
- Stress-strain state of circular orthotropic shells under bending, considering distributed loads applied to shell center 05 p0934 A70-16217
- Book on analysis of laminated composite structures covering orthotropic materials stress-strain relations, laminated composite shells, plates, beams and columns 05 p0938 A70-16467
- Load distribution in Christmas tree turbine attachments due to centrifugal force on blades, showing strain diagrams 05 p0939 A70-16488
- Hydrodynamic theory of elastic-viscous liquid lubrication for journal bearings, assuming stress-strain relationship with unequal cross stresses 05 p0855 A70-16509
- Creep rupture effect on fatigue damage of structural material, constructing nondimensional stress range diagrams 05 p0943 A70-16806
- Stress-strain state of plates weakened by reinforced hole and under tensile and bending loads, including boundary conditions 05 p0945 A70-16856
- Small elastoplastic deformation effects on stress-strain state of rib-reinforced cylindrical shells 05 p0946 A70-16955
- Stress-strain state of drawn and bent circular plate made of rigid viscoplastic work hardened material 05 p0946 A70-16958

- Uniform cross section rings creep characteristics testing method, proposing relations for calculating stresses and strains 05 p0952 A70-17037
- Analog to Burger model applied to rotating disk creep problem solution and stress-strain state of plane sample with hyperbolic groove 05 p0952 A70-17038
- Three dimensional stress-strain analysis of rotating finite hollow cylinder, emphasizing wall thickness effect on stress and strain distribution 06 p1160 A70-17130
- Modulus of rigidity and stress-strain state measured in square plate during shear produced by twisting 06 p1060 A70-17132
- Carrying capacity of machine parts under small numbers of cyclic plastic deformation, reviewing breakdown criteria relation to kinetics of stress-strain states 06 p1161 A70-17383
- Copper specimens stress-strain diagrams under cyclic loads of various amplitudes, noting three stage process plastic deformation 06 p1162 A70-17386
- Rotation of circular cross sectioned continuous rod with constant bending moment, assuming linear strengthening with fixed cyclic strain diagram 06 p1163 A70-17396
- Limiting stress states analysis in isotropic solids using loading history and replacing nonlinear stress-strain curve by approximating rectilinear polygon 06 p1165 A70-17547
- Longitudinal vibration equations of beams for non-linear stress-strain relation reduced to equivalent linear partial differential equations 06 p1106 A70-17863
- Stress-strain state equations for axisymmetrically loaded shells of revolution made of materials with variable moduli 07 p1399 A70-18660
- Stress-strain state of curved rod made of anisotropic material under bending loads applied to end face cross sections 07 p1399 A70-18661
- Steels fatigue strength under biaxial tension, considering complex stress-strain state 07 p1304 A70-18823
- Elastic and plastic deformation zones stress-strain state under complex stresses, obtaining relation for stress and strain components 07 p1401 A70-18834
- Cylindrical shell of revolution stress-strain state calculated during shaping in stamp with unclamping dies 07 p1292 A70-18836
- Stress-strain distributions in linear viscoelastic cylinder, reducing problem of hollow cylinder with moving inner boundary to Volterra integral equation 07 p1406 A70-19303
- Piecewise linear elastic material with jump-like non-homogeneity, analyzing stress-strain relation 07 p1407 A70-19384
- Critical stress-strain diagrams for brittle plate possessing notch-type stress raisers under biaxial tension 07 p1408 A70-19547
- Rib-reinforced cylindrical shells stability under longitudinal compressive loading, studying stress-strain state using network method 08 p1583 A70-20528
- Stress-strain state of flexible circular plates as function of thickness distribution using finite difference theory 08 p1583 A70-20529
- Matrix method for converting time variable stress vector into strain vector allowing for linear creep and aging 08 p1583 A70-20531
- Infinite strip with longitudinal crack and under loading, analyzing stress-strain state 08 p1585 A70-20938
- Electronic recording of cyclic strain diagrams of metals in wide loading frequency range using dynamic hysteresis method 08 p1585 A70-20987
- Stress-strain state of shells with positive Gaussian curvature under concentrated tangential loads, basing fundamental solution on two dimensional Fourier transform 08 p1587 A70-21169
- Stress-strain analysis for rod-shaped structural elements under combined tensile and bending loads 08 p1588 A70-21191
- Stress and strain spatial distribution in notched steel plate under cyclic loading determined by finite element method 08 p1590 A70-21315
- Stress-strain behavior of Al and Ti alloys, beryllium and nonmetallic structural materials based on constitutive equations describing strain rate and temperature effects 08 p1518 A70-21331
- Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges 08 p1591 A70-21415

Stress, strain and strain rate relations determined from dynamic flexural beam tests with bending moment in terms of curvature

08 p1592 A70-21475

Residual stresses in continuous fiber reinforced composites with unknown strain history determined by empirical methods

08 p1520 A70-21498

Inplane shear stress-strain response determined for unidirectional composites, using uniaxial test method for laminated plates

08 p1530 A70-21884

Composite materials fatigue determinations providing curves of stress-strain magnitude vs usable life or time to failure, considering environmental effects in service for design criteria

08 p1531 A70-21895

Microstrain characteristics of continuously reinforced W-Cu composites as function of volume fraction of fibers and prestrain, discussing dislocation friction stress

08 p1524 A70-21917

Metastable austenitic steel mechanical properties after thermomechanical treatment with deformation, discussing stress-strain curves to exhibit yield point

08 p1525 A70-21963

Stress-strain characteristics of reinforced elastoplastic layer using mathematical model

09 p1769 A70-22183

Creep behavior transition analysis, considering activation energies and creep rate dependence on temperature, stress and grain size

09 p1704 A70-22720

Metals and plastics tensile strain rate sensitivity tested by drop weight tests, obtaining dynamic and static stress-strain curves

09 p1704 A70-22725

Algorithm for stress-strain state calculation of nonuniformly heated cylinder weakened by star-shaped cavity

09 p1779 A70-23094

Rotating cylinder stress-strain state under steady and unsteady creep, using Lagrange variational principle for differential equations

09 p1779 A70-23100

Reinforced cylindrical shells stress-strain state under concentrated longitudinal loads, considering ribs of variable rigidity

09 p1782 A70-23289

Nb-W single crystal low temperature thermally activated deformation, observing slope change in temperature dependence curves of flow stress and strain rate sensitivity

09 p1708 A70-23572

Elastic ribs reinforced thin cylindrical shells stress-strain state under arbitrary load distribution allowing for rib spacing discreteness

09 p1784 A70-23590

Annealing effect on stress-strain curves of overaged and cold-rolled Al-Li alloy, observing yield drop

09 p1708 A70-23727

Stress-strain state analysis of prestrained thin circular cylindrical shell using Vlasov general shell theory

10 p1955 A70-24021

Total Poisson ratio derivation from stress-strain relationship with known variations of elastic and plastic Poisson ratios for particular strain-hardening case

10 p1956 A70-24096

Thick-walled toroidal shell under various load distributions, analyzing stress-strain state by networks method using computer program

10 p1957 A70-24250

Power-law stress-strain relation in plastic complex stressed state, showing identical strain hardening curves for shear and tension

10 p1957 A70-24280

Stress-strain determination in nonuniformly heated thin walled cylindrical beams with nonlinear stringers and skin

10 p1957 A70-24281

Elastic stress-strain states in spherical reservoir and thick walled tube during nuclear radiation induced phase transformations

10 p1894 A70-24513

Macrolon elastic-plastic strain model, studying stress-strain relationship and optico-mechanical properties

11 p2128 A70-25385

Monograph on integral calculation method for disk problems with mixed boundary conditions covering two dimensional stress-strain state, extrapolation methods, etc

11 p2140 A70-26474

Filament reinforced composites tested under dynamic compression loads for determining relations among strain rate, constituent properties, stress-strain behavior, fracture energy and mode

12 p2253 A70-27119

Kinetic theory for fatigue crack propagation using cyclic stress-strain relation in connection with strain hardening characteristics

12 p2322 A70-27208

Shallow spherical shells stress-strain state in multiply connected regions resting on Winklerian base

12 p2323 A70-27334

Stress-strain state effects on Cu and Ni tubular samples plasticity and strength using polarization-optical technique

12 p2323 A70-27341

Longitudinal waves propagation in polyethylene bar using Boltzmann-Volterra equation, constructing dynamical stress-strain diagrams by viscous-elastic standard body model

12 p2328 A70-28276

Stress-strain relationships model for nonlinear restrained cylinders, using compression tests and finite element method

14 p2660 A70-31135

Alloy high temperature creep and long term strength, determining exponential relations between stress, strain rate and durability

15 p2755 A70-31529

Two dimensional stress-strain fields under elastic and elastic-plastic strains and steady state creep, calculating stress distribution around hole in cylindrical shell

15 p2813 A70-31533

Low temperature tensometry application to stress-strain state of turbine disks

15 p2733 A70-31537

Stress-strain state of catenoid, cylindrical and spherical shells of revolution, emphasizing catenoid shell bending problem

15 p2815 A70-31648

Sinusoidal stress and strain in elastic shells of revolution, reducing linear theory to simultaneous second order differential equations

15 p2816 A70-32008

Internal pressure deformation of thin cylindrical shells of materials with nonlinear stress-strain relations, considering Al alloy shell and axial strain

15 p2816 A70-32009

Torsional vibrations amplitude effect on polycrystalline Al stress-strain curve during uniaxial tensile test

15 p2758 A70-32125

Stress-strain vector for straight bar of constant or stepwise cross section, using initial parameter matrix method

15 p2822 A70-32363

Monograph on elastic stability covering eigenvalues of matrix series, stress-strain state calculation, critical ratio derivation, etc

15 p2823 A70-32550

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

16 p2988 A70-33251

Structural fatigue failure analysis and design, applying local stress-strain approach

16 p2989 A70-33424

German monograph on stress-strain state determination for rotors of turbomachines covering strain equations, partial differential equations, boundary conditions, etc

16 p2971 A70-34078

Structural hardening of nickel maraging steels related to Portevin-Le Chatelier effect in necking zone of stress-strain curves

17 p3124 A70-35141

German monograph on two dimensional stress-strain state for material subjected to creep, using differential equations derived from equilibrium conditions

17 p3189 A70-35376

Structural stability in tension and strength tests of thin walled tubes at various stress and strain intensities, noting dependence on stress-strain state type

17 p3192 A70-35713

Deformation behavior of continuous W and B fibers reinforced Al alloy matrix composites, monitoring stress-strain characteristics by X ray diffraction

18 p3272 A70-36036

Spherical shell of variable thickness, calculating stress-strain state around reinforced circular hole during elastoplastic deformation

18 p3336 A70-36138

Plane strain and stress produced in elastic micropolar medium by action of temperature

18 p3338 A70-36429

Stress-strain equilibrium of thin isotropic elastic shells of revolution loaded along meridian

18 p3340 A70-36577

Zero moment theory for stress-strain state of thin walled anisotropic shells with nonuniform moduli under simultaneous torsion and tension

18 p3340 A70-36578

Barium fluorides single crystals compression, investigating stress-strain behavior and dislocation mobility

19 p3483 A70-37339

Fiber reinforced materials with oriented armoring, calculating stress strain state under transverse shear

19 p3454 A70-37348

Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius en-

cased in shell under pressure and unsteady temperature field

19 p3547 A70-38437

Stress-strain state of epoxy resin plates with single or paired wire reinforcement, using polarization-optical method

19 p3547 A70-38438

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis

19 p3547 A70-38439

Reciprocity theorem for stresses and strains in medium under creep and temperature field

19 p3548 A70-38582

Large deflection of simply supported aluminum alloy annular plate with nonlinear stress-strain curve, considering compressibility effects and membrane force

20 p3718 A70-39138

Polyurethane swelling in liquid media, measuring surface orientation effects during chemical machining on stress strain state

20 p3654 A70-39249

Three dimensional photoelastic analysis of stresses and strains in hollow circular cylinders with conical ends bonded to shell and shrunk

20 p3720 A70-39686

Long hollow nonlinearly viscoelastic cylinder in elastic shell, calculating stress and strain under internal pressure

20 p3720 A70-39731

Elastoplastic deformation in strip with symmetrical semicircular notches simulating stress strain state on celluloid models by polarization-optical method

20 p3720 A70-39735

Stress-strain zero moment state of thin walled helical shell under uniformly distributed tensile loads

20 p3721 A70-39778

Thin shell theory elastic coupling conditions, discussing stress-strain and edge effect states

20 p3726 A70-39875

Hollow shell theory equations for complex stress-strain states, using complex transform method

20 p3726 A70-39880

Low cycle metal fatigue under stress concentration, examining complex loading, cyclic strain, stress-strain state and plastic deformation

20 p3727 A70-39885

Linear relations between stress state and Euler strain rate in isotropic elastic bodies during superposition of small deformation on finite strain

20 p3728 A70-39893

Thin elastic shells displacement vector and strain boundary conditions determination from stress-strain relations

20 p3728 A70-39896

Fiber reinforced composite shell structures stress-strain relations, noting membrane and flexural variables coupling in constitutive relations

20 p3729 A70-40034

Strains and stresses along interfaces and near fiber ends in composite structures made of reinforced matrix, using photoelastic methods

20 p3730 A70-40035

Perturbation method for stress-strain state of circular cylindrical shell with large curvilinear hole

20 p3734 A70-40442

Stress-strain characteristics at high strain rates, obtaining materials dynamic plastic properties by thin wafer technique

21 p3932 A70-40543

Stress-strain state of finite length elastic beam free of bending moments and coupled to semifinite plate

21 p3933 A70-40603

Orthotropic fiberglass-reinforced plastic cylindrical shell with allowance for material creep, calculating stress-strain state during bending under external pressure

21 p3842 A70-40649

Epoxy and polyurethane adhesives stress-strain behavior in lap joints, examining bond thickness and cryogenic temperature effects

21 p3844 A70-42139

Stresses and strains concentration around elliptic hole in finite plates subjected to uniform load, using photoelasticity, moire effect and grids

22 p4114 A70-42697

Strain rate change effect on stress-strain diagram shape of polycrystalline alpha-Ti during tensile tests over temperature range

22 p4054 A70-42737

Strained state of Ti and steel sheets during unsymmetric rolling, constructing deformed metal particles displacements rates field based on ideal fluid motion equations

22 p4045 A70-42814

Transient stresses and strains in plane wedge under dynamic load, using photoelastic, high speed photographic and strain gage studies

22 p4036 A70-43062

Stress-strain diagrams for oriented fiberglass-reinforced plastic under tension taking into account temperature and anisotropy effects

23 p4209 A70-43938

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity
23 p4268 A70-44287

Simplified Sanders-Koiter linear thin shell equations with uncoupled stress-strain relations for arbitrary, nonzero Gaussian curvature, catenoidal and helicoidal midsurface geometries
23 p4269 A70-44399

Servohydraulic testing machine for measuring cyclic stress-strain behavior of materials subjected to fatigue and creep at elevated temperature
23 p4178 A70-44912

German monograph on stress-strain state in prestressed, rigidly supported flexible plates subjected to large deflections, using extended Wolmir solution
24 p4418 A70-45083

Stress-strain curves of polycrystalline metals and composites using single crystal elastoplastic model
24 p4425 A70-45779

Al-Zn-Mg alloy prolonged aging behavior, examining Gp and intermediate zones, equilibrium phases, maximum strength and serrated stress strain curve
24 p4362 A70-46189

STRESS-STRAIN DISTRIBUTION

U STRESS CONCENTRATION

STRESS-STRAIN RELATIONSHIPS

U STRESS-STRAIN DIAGRAMS

STRESS-STRAIN-TIME RELATIONS

Creep propagation determination in pure Al for microscopic and macroscopic continuum points used for determining stiffness and strain time history
01 p0121 A70-11156

Left ventricular muscle time varying elastic properties, using dynamic model and Fourier series representations
01 p0040 A70-11371

Temperature-time-variable stress-strain state of polymer structures, solving creep equation by linear model with rheological properties
01 p0211 A70-11426

Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration
03 p0588 A70-13246

Cylindrical compression spring relaxation at high temperatures, presenting design data for time-temperature initial stress relationships
[ASME PAPER 69-WA/MET-10]
04 p0697 A70-14758

Life fraction hypothesis equation in creep testing derived on basis of chemical reaction rate theory
[ASME PAPER 69-MET-A]
04 p0705 A70-14875

Time-to-rupture dependence on temperature and stress related to chemical reaction rate equation in creep testing
[ASME PAPER 69-MET-B]
04 p0770 A70-14877

Time dependent creep and elastic strain interaction in plates and pressure vessels of cylindrical and spherical geometry
05 p0942 A70-16804

Stress, strain and strain rate relations determined from dynamic flexural beam tests with bending moment in terms of curvature
08 p1592 A70-21475

Stresses and strains in multilayer systems of viscoelastic materials showing aging solved by quadratures and Volterra equations, noting dependence on time
08 p1594 A70-21672

Dynamic postbuckling response of thin elastic circular plates under axisymmetric time dependent radial thrust, discussing response to step loading
10 p1964 A70-25206

Versamid cured epoxies time-dependent mechanical properties, determining loading mode, strain level and reinforcing agent effects on time-temperature shift factors
13 p2438 A70-29205

Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration
19 p3548 A70-38464

Conducting viscoelastic fluid flow near harmonically oscillating nonconducting flat plate under uniform transverse magnetic field, considering stress-strain rate relationship
23 p4226 A70-44375

STRESSED-SKIN STRUCTURES

Crack tip stress intensity factor in sheet structures, applying complex stress potentials and perturbation techniques in numerical calculations
19 p3549 A70-38627

STRESSES

NT AXIAL STRESS
NT COMBINED STRESS
NT CRITICAL LOADING
NT RESIDUAL STRESS
NT SHEAR STRESS
NT TENSILE STRESS
NT THERMAL STRESSES
NT TORSIONAL STRESS
NT TRIAXIAL STRESSES
NT VIBRATIONAL STRESS

STRETCHING

Incompressible elastomer viscoelastic response to exponential extension ratio history in simple tension based on constitutive equations
01 p0201 A70-10893

Static deformation fields producible in isotropic homogeneous incompressible elastic body with uniform transverse stretch
05 p0931 A70-16134

Spinal cord overstretching and circumscribed pathological tension mechanism, considering histological and radiological findings
07 p1204 A70-19242

Orthotropic fiberglass reinforced plastic deformation during stretching with allowance for binder breakdown in transverse layer
12 p2259 A70-28283

Elastoplastic material mechanical theory, considering constitutive equations with plastic deformations and decompositions of total velocity-strain/stretching/
14 p2661 A70-31281

Fiber reinforced solid material, determining swelling or temperature change induced dilatation by micromechanics and physical chemistry
19 p3540 A70-37943

Structural mechanics of continuous fiber reinforced composites, discussing bending and stretching of cylinders, pressure vessels, plates and beams
20 p3730 A70-40039

Snatch force during lines-first deployment of aerodynamic decelerator, including effects of canopy skirt acceleration and suspension wave propagation characteristics
[AIAA PAPER 70-1171]
21 p3754 A70-41842

Stretch fabric materials for personnel high speed escape parachute systems
23 p4141 A70-44482

Metal and alloy sheets, investigating deformation and failure under biaxial stretching tensile tests
24 p4358 A70-45240

STRIATION

Fatigue crack growth rate for high strength steels from crack length during cyclic loading and striation spacings after fracture
01 p0119 A70-10732

Polycarbonate fatigue fracture surfaces and striation feature
12 p2259 A70-27168

He-Ne laser noise caused by discharge current fluctuation and moving striation in long capillary tubes
12 p2245 A70-27272

Barium ion clouds striation formation above E layer ascribed to LF gradient drift instability
15 p2727 A70-31908

Ion density and electron temperature variations as function of maximum electric field density in independently excited plasma column striations
19 p3475 A70-37552

Microwave diagnostics of electron density, temperature and light emission in self excited moving striations in hydrogen plasma
19 p3475 A70-37553

Striation formation in artificial ion clouds aligned with local geomagnetic fields, considering visual indication of ionospheric electric field transferal along magnetic field
19 p3415 A70-38387

Striations due to mechanical oscillations in fast wire explosions, using dispersion for elastic waves in solid cylinders
22 p4074 A70-43002

STRINGERS

Natural oscillation frequencies of closed circular orthotropic cylindrical shells having freely supported end faces, particularly with stringers
01 p0210 A70-11413

Centrally cracked sheet, calculating riveted and uniformly spaced stringers effect on stress intensity factor
23 p4270 A70-44549

STRINGS

Gas effect on natural frequency of electrostatically excited string vibrating between flat electrodes at medium pressures
11 p2048 A70-25582

Self excited systems limiting states with traveling wave, analyzing oscillator moving along string under tension
16 p2990 A70-33781

STRIP

Thin walled strip stability, calculating critical force and rotation angles assuming small subcritical strains
07 p1415 A70-20188

Infinite strip with longitudinal crack and under loading, analyzing stress-strain state
08 p1585 A70-20938

Stripline elements centimeter wavelength emission level determination by comparison with reference antenna radiation patterns
09 p1652 A70-23650

Diffraction on strip, investigating for Dirichlet boundary conditions, deriving excited current density and scattered pattern
15 p2696 A70-31515

Viscoelastic strip in gas flow, analyzing stability conditions
22 p4117 A70-43353

Symmetrical bending of isotropic elastic half-strip with free longitudinal edges and end displacements, indicating use for plate and shell theory
22 p4118 A70-43568

STRIP TRANSMISSION LINES

Microwave conductivity of thick film screen-printed microstrip circuits, measuring closed resonators SHF Q factors
19 p3388 A70-37964

Correction to Wu theory of microstrip leading to exponentially increasing fields
21 p3784 A70-40558

GaAs stripline domains and guided EM waves, discussing velocity, conductivity, drift and transmission amplification gain
22 p3996 A70-42917

Integrated 7 GHz small signal microwave balanced mixer, using microstrip transmission lines
23 p4168 A70-43777

Stripline and microstrip junction circulators analysis for microwave integrated circuits, based on clockwise and counterclockwise rotation modes
23 p4169 A70-43787

Ferrite junction microwave circulator bibliography /1956-1969/ covering stripline and waveguide versions theory, designs, constructions and applications
24 p3318 A70-45210

Variable microwave attenuator using p-i-n diodes and three-port hybrids built in stripline technique
24 p3318 A70-45222

STROBOSCOPES

Stroboscope lighting system for microstructural examination of fatigue test sample failure
05 p0845 A70-15882

Inexpensive live stroboscopic holographic interferometry, discussing time averaged and stroboscopic methods
09 p1676 A70-22787

Electronically modified stroboscope as light source for multiframe photography of transient events, noting mechanical switches elimination
18 p3262 A70-37095

High speed stroboscopic photography, discussing multiple flash and motion picture photography and TV operated strobe light
[SMPT PREPRINT 42]
22 p4033 A70-43040

Stroboscopic stereophenomenon, investigating depth shift of oscillating target motion binocularly viewed for interocular luminance differences
23 p4147 A70-44781

STRONTIUM

NT STRONTIUM ISOTOPES

Submarine basalt sea water alteration effects, examining Sr and rare earth concentrations, Ba enrichments or depletions and trace element data
19 p3413 A70-38015

Luminous intensity profile of optically thick Sr artificial clouds in upper atmosphere, using Monte Carlo calculations
19 p3415 A70-38388

STRONTIUM COMPOUNDS

NT STRONTIUM FLUORIDES

NT STRONTIUM TITANATES

NT STRONTIUM TRICONATES

Strontium chloride lanthanum ion system with dynamic Jahn-Teller effect, indicating isotropic EPM spectrum resulting from averaging by relaxation
13 p2470 A70-29109

Strontium nitride hydrolysis, investigating hydrazine presence among products
23 p4158 A70-44598

Phase transitions in FeW doped strontium and barium oxides, using X ray diffraction and Mossbauer effect for transition temperature
24 p4390 A70-45605

STRONTIUM FLUORIDES

Strontium fluoride crystals containing trivalent neodymium cations investigated for laser action and radiation characteristics by spectroscopy
10 p1899 A70-24253

STRONTIUM ISOTOPES

Age and initial strontium for Guarena chondrite, determining differential evolution of Rb/Sr systems involving simple metamorphism of closed systems or multistage processes
03 p0576 A70-14088

Rb-Sr internal isochron ages from Ocean of Storms, discussing analytical results of two texturally and mineralogically distinct crystalline rocks from Apollo 12
16 p2975 A70-33659

Sr 83, 85 and 87 level structure and mass defect, using stripping and pickup reactions
17 p3138 A70-34625

Middle Devonian Tioga Bentonite age from Rb, Sr and Sr isotopes in weathered whole rock samples
20 p3615 A70-38989

Apollo 11 lunar rock Rb-Sr isotopic age relationships, discussing magmatic fractionation of Rb relative to Sr in moon primordial material
21 p3908 A70-41585

STRONTIUM TITANATES

- Hologram storage and retrieval in photochromic SrTiO crystals at ruby laser wavelengths 06 p1072 A70-18519
- Alkoxy-derived strontium zirconate and titanate preparation and characterization, considering purity control, crystallite size and ceramics synthesis 09 p1740 A70-22981
- Temperature dependence of electrical conductivity and optical properties of strontium titanate semiconductor single crystals doped with Ce and Nb 12 p2288 A70-28328
- Strontium titanates ceramics containing various trivalent rare earth ions, observing dielectric relaxation 19 p3486 A70-37755
- Inorganic photochromic and cathodochromic recording materials, examining transition metal doped strontium titanates, rare earth doped calcium fluorides and Fe or S doped sodalite 22 p4088 A70-43601

STRONTIUM ZIRCONATES

- Alkoxy-derived strontium zirconate and titanate preparation and characterization, considering purity control, crystallite size and ceramics synthesis 09 p1740 A70-22981

STROUHAL NUMBER

- Vibrational response of thin walled pipes to internal turbulent water flow as function of Strouhal number 21 p3940 A70-42052
- Round pulsed jet diffusion rate from velocity measurements, considering Strouhal number and pulse amplitude 24 p4327 A70-46205

STRUCTURAL ANALYSIS

- NT DYNAMIC STRUCTURAL ANALYSIS
- NT ENERGY METHODS
- NT EQUILIBRIUM METHODS
- NT FLUTTER ANALYSIS
- NT MATRIX METHODS
- NT STRAIN ENERGY METHODS
- Acoustic emission to monitor metal structures, pipes, pressure vessels and graphite shapes to detect structural deterioration before failure, emphasizing nuclear reactor pressure systems 01 p0054 A70-10015
- Cantilevered and doubly supported structures calculated for critical aeroelastic divergence speed resulting from lift and drag 01 p0200 A70-10551
- Ultrasonic imaging of internal structure by Bragg diffraction, noting reflection and dark field extension and use for flaw detection and medical diagnostics 01 p0111 A70-10570
- Semiautomatic mass condensation transformation for reducing structural vibration calculations, including computer program and mode shape plotting 01 p0200 A70-10868
- Equilibrium of thin curved cylindrical panels subjected to thermal expansion and pressure numerically analyzed by Ritz method 01 p0201 A70-10945
- Clamped skew plates of orthotropic material under transverse load analyzed by stationary potential energy method and compared with isotropic case 01 p0205 A70-11140
- Linear structures response to pressure fields of deterministic excitation with input function spectra as meromorphic functions of wave number and frequency 01 p0208 A70-11191
- Temperature-time-variable stress-strain state of polymer structures, solving creep equation by linear model with rheological properties 01 p0211 A70-11426
- Semidiscrete approximation of equation for free vibrations of beam with nonuniform cross section, using method of straight lines 01 p0213 A70-11636
- Aerodynamic load distribution due to wind action on elastic structures, calculating various ratios between wind and critical divergence velocity 02 p0385 A70-11913
- Digital computer program /LANDIT/ for predicting structural impact response of axisymmetric landing vehicles consisting of rigid payload and crushable impact limiter system 02 p0380 A70-11945
- Bolted and bonded joints design in composite materials loaded in tension, presenting methods for strength prediction, testing and analysis 02 p0306 A70-11952
- Harmonic vibration testing of aircraft structural nonlinearities caused by dry friction, describing pitch control system 02 p0387 A70-12215
- Two dimensional structural analysis of engineering systems by computer graphics, outlining discrete element representation 02 p0388 A70-12477
- Three dimensional photoelastic case bonded solid propellant motor model, analyzing stress distribution using scattered light photoelasticity [SESA PAPER 1587] 03 p0583 A70-12885

- Finite element method for postbuckling analysis of thin elastic plates, using iterative method to obtain equilibrium configurations 03 p0583 A70-12917
- Snap-through dynamic instability of clamped shallow arches subjected to timewise step loads, establishing stability and instability conditions 03 p0583 A70-12919
- Elastoplastic bodies stability under compression, using theory of small elastoplastic deformations and linearized equations of nonlinear elasticity theory 03 p0591 A70-13440
- Three dimensional structure determination for weakly scattering semitransparent objects from holographic data, discussing inverse scattering problem and refractive index calculation 03 p0487 A70-13647
- Load analysis for aircraft landing gear during touchdown and braking operations 03 p0596 A70-14093
- Wide strut analysis for determining weight minimizing cross sectional dimensions of panels having unflanged integral stiffeners 03 p0596 A70-14145
- Structure theorem for time invariant multivariable linear systems proof and formulation for use in controller design and synthesis 03 p0461 A70-14166
- Buckling in one dimensional elastic media, discussing pendulum equations for Jacobi elliptic functions, critical loads determination, Timoshenko energy method, etc 03 p0597 A70-14227
- Far nonlinear postbuckling behavior of noncircular cylindrical shell under axial compression 03 p0598 A70-14241
- Thermal stress concentration produced by cracks, notches and fillets in plates free from external loads measured photoelastically 03 p0600 A70-14310
- Thermal stresses of semiinfinite plate with circular hole filled with elastic inclusion and subjected to uniform heat flow 03 p0601 A70-14317
- Structural analysis of rectangular plates simply supported on two edges subjected to free edge uniform moments 03 p0602 A70-14332
- Deformability calculation of two phase composite solid materials through laminated structural models 03 p0602 A70-14337
- Kamchatka regions volcanic deposits structural and mechanical characteristics compared with lunar soil characteristics 04 p0744 A70-14440
- Nonlinearity sources in elastic structures under large displacements, developing general matrix formulation 04 p0768 A70-14748
- Computer programs for numerical analysis of shell structures, considering series expansion, numerical integration, finite differences and finite elements 04 p0768 A70-14787
- Elastic postbuckling behavior of axially stiffened and barreled cylindrical shells [ASME PAPER 69-APM-U] 04 p0769 A70-14866
- Governing equations of plane elasticity to define suitable approximate theories for structural analysis [ASME PAPER 69-WA/APM-22] 04 p0771 A70-14909
- Thin walled plate simply supported on three edges, studying behavior following local stability loss 04 p0772 A70-14923
- Matrix algorithm from parallel element method derived for reducing computer time required in structural modification analysis 04 p0779 A70-15589
- Plan hybrid element generalized to arbitrary quadrilateral form, considering hybrids having constant and linear stress distributions 04 p0779 A70-15614
- Optical, electrical and structural properties of transition metal dichalcogenides 05 p0890 A70-15755
- NASTRAN digital computer program for static and dynamic structural analysis using finite element method [SAE PAPER 690612] 05 p0816 A70-15851
- Three dimensional analysis of nonhomogeneous elastic solids based on finite element method and equilibrium equations, discussing iterative solution 05 p0926 A70-15915
- Three dimensional photoelastic model for structural analysis of aircraft bulkhead to improve fatigue life 05 p0937 A70-16376
- Book on analysis of laminated composite structures covering orthotropic materials stress-strain relations, laminated composite shells, plates, beams and columns 05 p0938 A70-16467
- Finite element analysis of elastic thin shells, approximating shell surface by network of triangular plate elements 05 p0944 A70-16813

- Structural elements elastoplastic deformation regularities under repeated loadings, using adaptability theory 06 p1163 A70-17394
- Finite element method applied to potential distribution and stress analysis in earth sciences, determining elastic response of rock layer using structural matrix analysis 06 p1055 A70-17606
- Hybrid finite element analysis for combination of axisymmetric shell and linear displacement triangular ring elements [AIAA PAPER 70-137] 06 p1169 A70-18052
- Triangular plate bending elements with enforced compatibility, using cubic interpolation polynomial to describe element displacement [AIAA PAPER 70-136] 06 p1171 A70-18169
- Structural element for discrete element idealization missile and liquid propellant as one composite structure [AIAA PAPER 70-123] 06 p1042 A70-18182
- Airframes dynamic response during simulated launchings of externally carried missile measured in laboratory, describing dynamic load simulation and structural analysis 06 p1159 A70-18439
- Structural analysis of thin walled cylinder material using normal ultrasonic wave to achieve high resolution determination of components 06 p1172 A70-18630
- Rectangular plates with symmetrical cracks, studying bending under various crack distributions 07 p1399 A70-18662
- Minimum weight beams and frames calculation for random loads taking into account material carrying capacity 07 p1400 A70-18821
- Integration by orthogonalizations of envelopes of revolution loaded asymmetrically, introducing boundary conditions and structure discontinuities 07 p1404 A70-19128
- Optimal linear viscoelastic synthetic sandwich structures, investigating test/calculation agreement for simply supported beams and embedded plates [ONERA-TP-702] 07 p1404 A70-19137
- Governing equations solution for simply supported laminated anisotropic rectangular plate using Fourier series method 07 p1406 A70-19305
- Buckling of clamped skew plates under uniform system of applied stress using Galerkin method 07 p1406 A70-19339
- Inextensional nonlinear theory of arches applied to analysis of hinged-hinged circular arches subjected to downward point load, calculating critical load value 07 p1408 A70-19561
- Book on statistical methods in structural mechanics covering design, fracture, stability, random loads, damage accumulation, reliability, etc 07 p1411 A70-19849
- Digital computer applications to structural analysis, discussing interactive graphics and engineering design 07 p1239 A70-20360
- Structural design analysis techniques for one, two and three dimensional continua, discussing various problem solving methods 07 p1417 A70-20361
- Automatic system of kinematic analysis /ASKA/, based on matrix displacement finite element method, applied to structural strains calculations 07 p1417 A70-20362
- Mo effect on structure and properties of Ni-Al-Nb system alloys in gamma and gamma prime solid solutions range, discussing high temperature strength 08 p1514 A70-20549
- Deformable bodies subjected to given load using method of equivalences 08 p1584 A70-20589
- Soviet book on motion of guided rockets in space covering aerodynamic and structural aspects, stabilized and disturbed rocket motion, etc 08 p1582 A70-20756
- Asymptotic analysis for axisymmetric buckling of axially compressed short cylindrical shells with free edges, using Batterman method 08 p1593 A70-21620
- Semiinfinite elastic strip supporting thin heavy beam using Airy stress function and Laplace transform, with boundary conditions expressed as Fourier series 08 p1594 A70-21768
- Structural analysis of Titan 3 Stage 2 ablative nozzle extension made of composite material 08 p1595 A70-21910
- Structural analysis of boron filament-epoxy composite laminate tubes for use as spacecraft long column members 08 p1595 A70-21911
- Matrix decomposition and full release methods for substructure analysis 09 p1770 A70-22258
- Microhardness method for property changes in structural materials during sequential cyclic loading,

discussing material identification, statistical fatigue theory, fine structure effects, etc

09 p1701 A70-22299

Multispan horizontally curved beams natural frequencies determination illustrated by developing frequency equation

09 p1770 A70-22388

Rigid rectangular box with supported flexible wall analyzed for internal acoustostructural mode coupling factors and corresponding modal average radiation efficiency

09 p1770 A70-22393

Soviet collection of papers on control mechanics and processes, computational mathematics

09 p1772 A70-22532

Axisymmetric thermal stress state in bodies of revolution studied by successive approximation algorithm for digital computer

09 p1778 A70-23088

Dynamic stresses during abrupt temperature changes of medium, showing internal stress waves amplitude increasability by suitable internal stress source selection

09 p1778 A70-23089

Additive elements effect on structure and properties of sintered powder Al-Cr and Al-Fe alloys obtained by atomization method, analyzing homogeneity

09 p1707 A70-23124

Soviet book on creep of structural elements at high temperature noting metals, concrete and polymer materials, buckling, variety of structural elements and creep resistance

09 p1781 A70-23266

Elasticity theory two dimensional problem solution for circular segment in polar coordinates, applying Love symbolic notation and Prokopov minimum potential energy principle

09 p1782 A70-23291

Titanium sponge secondary structure obtained by magnesiothermal reduction of concentrated Ti-containing chloride melts, discussing temperature effect on porosity

09 p1709 A70-23783

Acoustic impact technique (AIT) for aerospace structures nondestructive testing, describing theory, instrumentation and applications

10 p1894 A70-24175

Concorde SST aerodynamic, structural and thermal analysis and simulation using computers

10 p1849 A70-24382

Plate bending triangular finite element for shell structure analysis, considering displacement functions, stiffness matrix and load vector

10 p1957 A70-24482

Membrane deformations in second order rotating surfaces with positive Gaussian curvature investigated for external couple loaded spherical shells

10 p1958 A70-24515

Photogrammetry methods for experimental structural mechanics, describing Balplex 525 Plotter camera system, image measurement and displacement vector computation

10 p1827 A70-24736

Dynamic characteristics of structures measured, using digital computer to analyze transient data from frequency sweep tests

10 p1961 A70-25059

Structural detail in transparent object through holographic measurement of scattered monochromatic light, noting similarity to crystal structure reconstruction in X ray diffraction experiments

11 p2048 A70-25360

Optical filtering applied to moire method for measuring small structural strains

11 p2131 A70-25595

Aircraft design structural development and substantiation utilizing computer analysis and testing [SAE PAPER 700216]

11 p2134 A70-25888

Complex redundant structures matrix analysis by substructure approach, obtaining elastic properties of system by subdivision and synthesis [SAE PAPER 700217]

11 p2134 A70-25889

Finite element matrix structural analysis by direct stiffness method and use of computers, considering thin wall box beams [SAE PAPER 700218]

11 p2134 A70-25890

Elastic properties determined for reinforced composite material with hollow spherical inclusions embedded in matrix

11 p2136 A70-26083

Membrane theory for thin single layer orthotropic cylindrical shells experiencing harmonic axisymmetric motion

11 p2136 A70-26084

Continually changing residual stress patterns effect defined for predicting cumulative damage in structural fatigue

11 p2137 A70-26090

Energy principle providing upper bounds on plastic deformation in elastoplastic structures subjected to blast loading

11 p2144 A70-26670

Materials fatigue lifetime estimation under irregular loads by simultaneous use of random programming for testing machines and computing equipment

12 p2315 A70-26873

Lumped linear model parameters determined from dynamic test data on mode shapes and frequencies for approximating distributed elastic structure

12 p2317 A70-27122

Structures, structural mechanics and materials - AIAA-ASME Conference, Denver, April 1970

12 p2317 A70-27126

Two dimensional structures large strain elastoplastic analysis by finite element method, using variational principles to derive equilibrium equations

12 p2320 A70-27148

Tension rays and load transfer from compact member via wrinkled membrane determined by variational technique using maximum strain energy

12 p2322 A70-27225

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc

12 p2327 A70-27823

Composite spherically aeolotropic sphere with isotropic core, analyzing stress concentration during twisting

12 p2327 A70-27836

Circular arch finite element solutions compared for convergence rates

12 p2327 A70-27838

Fiber diameter effects on metal matrix composites strength from proposed model

12 p2329 A70-28370

Rotating shaft model with slight curvature for estimating maximum bending moment through Fourier series analysis

13 p2416 A70-28372

Kamchatka regions volcanic deposits structural and mechanical characteristics compared with lunar soil characteristics

13 p2485 A70-28465

Viscoelastic plate crack growth analysis within continuum mechanics framework as analog to Griffith problem

13 p2510 A70-28671

Secondary crack growth direction from preexisting crack under longitudinal shear loading

13 p2510 A70-28674

Buckling, postbuckling and limit analysis of symmetric elastic structure subjected to increasing loads

13 p2511 A70-28737

Saint Venant principle in linear isotropic viscoelasticity of Toupin estimates for body of arbitrary shape to allow integration by parts

13 p2513 A70-28990

Eccentrically stiffened orthotropic cylinders with intermittently attached stiffeners under bending and axial load, analyzing instability and buckling

13 p2518 A70-29966

Arbitrary planform plates with edge clamping and elastic beam spanwise support using Green function

14 p2655 A70-30182

Mechanics of solid structures including shells and beams, considering three dimensional behavior laws in plasticity and creep

14 p2656 A70-30294

Unstable Ekman boundary layer vortex structure analysis by generating similar flow in liquid filled rotating cylinder

14 p2604 A70-30545

Turbulent boundary layer loading function for use with finite element structural analysis system applied to elastic aircraft structures random vibration [AIAA PAPER 69-20]

14 p2658 A70-30853

Stiffness matrices of three dimensional finite elements, considering tetrahedron, hexahedron and nodal configurations

14 p2659 A70-31127

Stress and deflection of nonisotropic assembled bar and plate composite structures, using computerized matrix displacement method

14 p2660 A70-31133

Finite element method applications to structural analysis problems involving geometric and material nonlinearities

14 p2660 A70-31134

Stress concentration in flat rectangular and skew panels with circular holes from photoelastic verification of direct stiffness method [SESA PAPER 1633]

15 p2820 A70-32303

Stress-strain vector for straight bar of constant or stepwise cross section, using initial parameter matrix method

15 p2822 A70-32363

Monograph on elastic stability covering eigenvalues of matrix series, stress-strain state calculation, critical ratio derivation, etc

15 p2823 A70-32550

Book on structural mechanics with introduction to elasticity and plasticity

16 p2987 A70-32915

One dimensional controlled plants structure identification with mathematical model composed of

aperiodic nonlinear and delay components connected in series

16 p2883 A70-33235

Arbitrary shaped shell structures analysis by finite element method, using curved shell elements approach

16 p2988 A70-33289

Glass fiber reinforced resin structures evaluation by photographic analysis using visual, macrographic, stereomicroscopic, and scanning electron microscope methods

16 p2908 A70-33361

Composite beam testing concepts and interpretation under three and four point loading, noting shear deformation effect

16 p2989 A70-33385

Closed form difference equations for finite element models in structural mechanics, noting plate and grid applications

16 p2990 A70-33672

Nonlinear structural analysis of Mariner spacecraft solar panel, using damper test characteristics

17 p3022 A70-34769

Finite element formulation for large strain and displacement problems with emphasis on elastic-plastic behavior in metals

17 p3184 A70-34905

Nonlinear vibrations of beam harmonically excited by periodic motion of supporting base, using Galerkin method

17 p3185 A70-34962

Linear compressibility assumption incorporated into third order multiple integral representation of nonlinear creep of polyurethane, reducing time independent kernel functions

17 p3186 A70-34972

Holographic measurement of transient behavior of structures under unsteady or impulsive loading, using pulsed lasers

17 p3085 A70-35008

Shakedown theory of elastic-plastic structures under time dependent loadings

17 p3188 A70-35191

German monograph on stress and displacement in plane elastic circular rings, disk strips and wedges, considering single load distributions

17 p3189 A70-35370

Structural fatigue testing by computer control of random force cycles

17 p3062 A70-35505

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structure and thermal analyses

18 p3301 A70-36450

Buckling problem numerical analysis by nonlinear programming and minimum energy formulation

18 p3339 A70-36495

Discrete element stress and displacement analysis of elastoplastic plates

18 p3342 A70-36686

Late-type barred spiral galaxies structure and dynamics with asymmetric mass distribution, using model consisting of small prolate spheroid displaced from disk center

18 p3331 A70-37194

Stress relaxation in rings and rods, discussing errors possible in data correlation

19 p3535 A70-37342

Bent plates strain analysis using in-plane moire method for small and large deflections

19 p3535 A70-37383

Damped linearly tapered cantilever beam elastically restrained against rotation at wall, analyzing displacement under general initial and distributed load conditions

19 p3539 A70-37802

Book on extremum principles covering energy methods of static and dynamic structural analysis

19 p3541 A70-37976

Boundary value problems for elastic sphere, extending Kelvin general solution of Cauchy equations

19 p3545 A70-38333

Book on structural analysis by finite difference calculus covering elastic and elastoplastic states, vibration and buckling of beams, gridworks, plates and shells

19 p3548 A70-38599

Integrated structural analysis for reliability prediction of solid propellant rocket motors

19 p3489 A70-38844

Soviet book on matrix theory application to problem solutions in structural mechanics covering computer techniques, internal forces, initial parameter method, displacements, etc

20 p3719 A70-39600

Soviet papers on mechanics of solid deformed body covering elasticity and plasticity theories, shell stability, eigenvalue problems, etc

20 p3722 A70-39851

Thin plane bars elasticity theory, constructing integrals of equations by asymptotic series expansion

20 p3726 A70-39881

Finite element stiffness matrix technique for composite structures, discussing airplane component design program

20 p3730 A70-40040

Composites potential structural performance, determining mechanical properties for fiber and matrix materials and unidirectional and isotropic composites in cylinders and box beams

20 p3651 A70-40042

Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation

20 p3732 A70-40264

Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces

20 p3732 A70-40268

Plate structural analysis by finite element method, obtaining geometric continuity by additional displacements and forces at corner nodes

21 p3932 A70-40553

Structural stability analysis by matrix decomposition and iteration, extending to structures with nearly equal critical loads

21 p3934 A70-40888

Decelerator fabric elastic constants for structural analyses using generalized Hooke's law [AIAA PAPER 70-1179]

21 p3843 A70-41834

Structural and environmental design criteria for acoustical duct-lining materials in turbofan noise suppression

22 p4089 A70-42531

Nonlinear heat transport in structural elements due to radiative transfer, analyzing temperature field dynamics

22 p4125 A70-43360

Boundary value problems of elasticity for layer and strip with arbitrary inhomogeneity along thickness

22 p4120 A70-43712

Minimum weight structural design within given stress limits due to different loads or natural frequency vibrations, using finite element method for structural analysis

23 p4268 A70-44226

Aircraft structures acoustic fatigue testing, discussing test facilities, environment simulation, etc

23 p4269 A70-44329

Digital computer codes for production finite element structural analysis, discussing input, output and engineering details

23 p4270 A70-44701

Asymptotic and computer methods interaction in thin walled shells structural analysis and design, considering pressure vessels, cone vibration and dynamic loads

23 p4271 A70-44703

Thin walled shells structural vibration, buckling and stress analysis by computer methods, discussing shell theory and design

23 p4271 A70-44704

Elastic continua structural optimization analysis decisions for maximizing calculation accuracy, insuring efficient complex numerical analyses

23 p4271 A70-44706

General purpose computer programs for shell structural analysis, using finite element modeling and displacement methods

23 p4271 A70-44707

Rectangular and triangular grids with variably sized mesh elements for finite difference analysis of shell structures

23 p4272 A70-44709

Thin shell structural analysis by doubly curved arbitrary quadrilateral finite element, using Kirchhoff theory and cubic polynomial for membrane displacements

23 p4272 A70-44711

Mixed formulations for finite element shell analysis based on flat and curved elements

23 p4272 A70-44713

Shell analysis based on discretization into one, two and three dimensional configurations, comparing finite difference, numerical integration and finite element methods

23 p4272 A70-44715

Finite element structural analysis /FESTRAN/ computer program predicting static structural response of plate and shell structures

23 p4273 A70-44717

Nonlinear material and geometric behavior of shell structures studied by Eulerian and Lagrangian approaches

23 p4273 A70-44718

Integration operators for transient structural response in qualification tests for internal components of dynamically loaded structures

23 p4273 A70-44719

Second approximation for limit loads due to imperfection sensitivity of axisymmetric elastic shell structures with unique harmonic buckling modes

23 p4273 A70-44720

Computer program for geometrical nonlinear static and dynamic structural analysis of arbitrarily loaded shells of revolution

23 p4273 A70-44724

Approximation method for large deflection analysis of impulsively loaded rigid plastic circular plates and symmetric shells

23 p4275 A70-44943

Gradient iterative solution of large algebraic systems arising from finite element discretization, using computer methods

24 p4419 A70-45153

Numerical solutions of three dimensional static elasticity, using physical analogies

24 p4419 A70-45195

Numerical integration of equations of motion from finite element analysis in structural mechanics, using computer program

24 p4420 A70-45278

Bending vibrations of propeller blades calculated by successive approximation

24 p4422 A70-45300

Polyvinyl chloride /Novodur/ mechanical properties application to structural model testing

24 p4367 A70-45445

Al alloys structural analysis using electron diffraction pattern techniques

24 p4360 A70-45737

Rheology and structure formation in three dimensional and two dimensional bulk phase and pigmented systems in surface layers and films, including paints and varnishes

24 p4368 A70-46141

STRUCTURAL BEAMS

U BEAMS [SUPPORTS]

STRUCTURAL DESIGN

NT PRESSURE VESSEL DESIGN

60 cm intermittent blowdown type trisomic wind tunnel, discussing main parts basic dimensions and characteristics determination method, detailing design and construction

01 p0055 A70-10148

Concorde aircraft structural acoustics and design problems, discussing noise, fatigue and testing techniques and facilities

01 p0199 A70-10288

Radiator selection for manned spacecraft, considering thermal coating degradation, structural design, micrometeorite protection, plume impingement, reliability and fabrication [AIAA PAPER 69-1070]

01 p0215 A70-10631

Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability [AIAA PAPER 69-1068]

01 p0195 A70-10633

Optimal structural design including service requirements on strength, buckling and natural frequency stated as optimal control problem

01 p0207 A70-11158

Book on vibrational motions of straight and curved shafts, covering dynamic analysis for noncircular cross sections, applications to machine tools and vehicles design, etc

01 p0209 A70-11378

Aerospace structures design - Conference, Seattle, Washington, August 1969

02 p0385 A70-11931

Structural design experience in developing large area Be solar array for Mars flyby mission, describing configurations, requirements, material and manufacturing

02 p0228 A70-11935

F-8 wing service life extension design techniques, emphasizing fatigue design curves and procedures

02 p0386 A70-11939

Structural design and fabrication of load bearing Ta alloy radiation cooled elevon control surface for high L/D hypersonic flight vehicle

02 p0306 A70-11941

Structural support strut design for cryogenic propellant tanks to optimize load carrying capability and heat transfer characteristics

02 p0306 A70-11942

Automated structural design program to treat stress, displacement, gauge and cross sectional constraints, discussing applications to aircraft structures

02 p0386 A70-11944

Beaded-doubler reinforced skin design concept for Improved HAWK Missile wing, considering compression stress, weight, cost and field service characteristics

02 p0380 A70-11946

Attachment loads and beam bending moments design curves for linear and right angle fittings on honeycomb inserts to determine internal loading

02 p0386 A70-11949

Boron-polyimide composite reinforced Ti fuselage stringers design and test program for SST

02 p0387 A70-11950

Design allowable curves based on laminate test data for high modulus graphite fiber and resin systems, considering Wagner cantilever beam specimens

02 p0387 A70-11954

Safe-life and fail-safe structural design philosophies in fatigue damage and operating lifetime control

02 p0389 A70-12615

Stress distribution along stud hole threads in Al case, investigating stud design effect using strain gauge on models

03 p0585 A70-12962

Momentless design of composite plate and shell structures with variable elastic constants based on loading and shape requirements

03 p0586 A70-13112

Rigid and flexible pavements response to jumbo jets load using elastic theory

03 p0462 A70-13175

Rational design of structurally anisotropic plane multilayer plates with weak binder, suggesting strengthening fibers orientation in internal stresses direction

03 p0516 A70-13379

Two seater hovercraft development, considering lift system, fan, transmission and structural designs and construction steps to keep within automobile cost range

03 p0414 A70-14148

Book on stress analysis for designers covering stress types and calculation, specimen geometry, structural fatigue and stability, etc

03 p0600 A70-14307

Al fasteners design guidelines including material forming capabilities, cost consideration, applications, etc

04 p0697 A70-14722

Pontyagin principle applied to minimum structural weight design problem in optimal control theory with state and control inequality constraints [ASME PAPER 69-WA/AUT-1]

04 p0769 A70-14832

Rectangular waffle plates minimum-weight design efficiency with multiple rib sizes in stiffening direction compared to honeycomb core sandwich construction

04 p0777 A70-15526

Structural design of boron/epoxy front housing for T-56 turboprop reduction gear case achieving reduced weight and increased stiffness

05 p0853 A70-15837

Honeycomb and sandwich construction design, discussing optimal material selection, filament wound technology, panels fabrication, destructive and non-destructive test methods, etc

05 p0941 A70-16616

Clean room design problems concerning dampers, high pressure blowers, humidifiers, filters, etc

05 p0808 A70-16709

Tensile tests facility design for wide temperature ranges with loading system to maintain constant strain rate up to failure

05 p0830 A70-17072

Galerkin method to formulate buckling problem of homogeneous and fiber reinforced anisotropic plates simply supported under uniform membrane loads

06 p1160 A70-17313

Buckling-critical composite shell structures, describing pseudo T-rib stiffening and integrated composite design concepts [AIAA PAPER 70-101]

06 p1171 A70-18235

Design concept, materials application and performance characteristics of high temperature fasteners [AIME PAPER F-69-6]

07 p1290 A70-18811

Ring seal elements structural parameters influence on fluid leakage at various shaft speeds and fluid pressures

07 p1294 A70-19123

Minimum weight design of elastic sandwich beams with deflection constraints using n-dimensional space of discretized bending stiffness

07 p1407 A70-19358

Soviet book on structures design for stability at high temperatures with large gradients, discussing thermoelasticity, thermoplasticity and creep equations for shells, plates, etc

07 p1409 A70-19601

Sizing and design of large vessels of fiberglass reinforced composites based on minimum cost

07 p1409 A70-19757

Fiberglass plastics structure safety design using time dependent limiting states with wear allowance

07 p1410 A70-19761

Reinforced plastics underframe design based on hooks law, noting middle layer loaded laminates and shell advantages

07 p1410 A70-19762

Structural material selection for thermal shock conditions, deriving index from parameters governing solutions in thermoelasticity

07 p1413 A70-20002

Analytical structural design reliability, discussing static test failures of wings, fuselage, horizontal and vertical stabilizer and landing gear

07 p1417 A70-20400

Hawker Siddeley Harrier structural design, power plant, rear fuselage, wing tail unit structures, undercarriage features, weight control, fatigue testing, etc

08 p1435 A70-20620

Metal adhesive joints strength and suitable dimensions determination, presenting parameter relations for design

08 p1584 A70-20893

Spaced damping reducing structural response to vibration, discussing efficiency, design flexibility and weight addition

08 p1507 A70-21269

Ti alloys failure-safe design developing procedures for incorporation of stress-corrosion cracking characterizations into ratio analysis diagram system 08 p1519 A70-21456

Fibrous reinforced composites influence in aircraft structural design based on DOD industry development programs, investigating interlaminar shear 08 p1595 A70-21899

Design allowables and factors of safety for filamentary composite materials, discussing reliability 08 p1595 A70-21900

Seadrome advantages and structural design concepts, describing floating runways, breakwaters, noise reduction, building costs, etc 09 p1655 A70-22243

Minimum weight design for two dimensional bodies with given load system determined by variational method 09 p1771 A70-22400

Soviet book on rocket structure mechanics covering acting loads and selection of tanks, stage segments, nose section and propulsion units 09 p1772 A70-22527

Limit and shakedown loads in creep range investigated on sheet rolled aluminum at room temperature for structural design applications 09 p1775 A70-22591

Aeroelasticity problems, discussing unrestrained flexible structures design, nonconservative systems stability, biomechanics, etc 09 p1777 A70-22972

Prestressing in minimum weight design of statically indeterminate structures 09 p1781 A70-23231

Ribs reinforced shells of revolution designs calculations by approximate numerical method, considering surface geometry and cyclic temperature loads effect 09 p1784 A70-23589

Fracture mechanics applications in stress analysis and structural design, considering rocket motor case failure 09 p1786 A70-23799

Optimal trusses design, considering minimal volume/weight/ and elastoplastic stability in compressed and stretched bars 10 p1958 A70-24514

Minimum weight design for symmetrically stiffened cylindrical shells under compression based on linear orthotropic stability theory 10 p1958 A70-24560

Iterative numerical method for determining optimal mass distribution in complex frameworks, maintaining dynamic response level 10 p1960 A70-25053

Experimental stress analysis and influence on design - Conference, Cambridge, England, April 1970 11 p2130 A70-25584

Compressive stress critical moment induced instability and weakening incorporated in thin walled beam design 11 p2131 A70-25590

Missile radome design optimization, considering compromise between conflicting aerodynamic, thermal and structural aspects 11 p2134 A70-25862

Nonsteady flow past duct junctures, investigating ventilation system of underground bomb shelter for blast wave passage prevention 11 p2036 A70-26139

Thin shell design for minimum bending stresses and transverse shear for composite materials with low interlaminar shear strength 11 p2141 A70-26490

Structural design for allowable plastic deformation under dynamic loads, deriving finite element representation of elastic-plastic plane frame beam 12 p2317 A70-27117

Supersonic aerial target wing synthesis using sandwich construction with graphite-epoxy laminate skins bonded to Al honeycomb, achieving significant weight reduction 12 p2160 A70-27118

Experimental stress analyses for aircraft design enhancing structural fatigue strength, using S-N diagrams and photoelastic models 12 p2318 A70-27128

Waffle plate structures least weight design under uniaxial, biaxial and multiple combined loading with various stiffening patterns, investigating pyramiding concept 12 p2318 A70-27133

Wing and empennage structures automated fully stressed design procedures, discussing application to supersonic aircraft stabilizer 12 p2319 A70-27136

Automated optimum structural design by variable step direct search algorithm, noting application to stiffened cylindrical shells 12 p2319 A70-27138

Stiffened fiber composite cylindrical shells minimum weight design, discussing configuration and material parameters 12 p2319 A70-27139

Cylindrical shells design under axially compressed loads by elastic stability analysis, predicting critical loads 12 p2320 A70-27142

Complex airframe design for economic and safe operation and long life using fatigue and fracture mechanics [AIAA PAPER 70-512] 12 p2324 A70-27466

Radio telescope construction, discussing early planning decisions, site selection, structural compensation for built-in elastic deformation, foundation, telescope mount, etc 12 p2207 A70-27578

Design parameters for optimum heavily loaded single rotation ducted fan characterized by ultimate wake vortex system [AIAA PAPER 69-222] 12 p2157 A70-28083

Elastomeric liner material for missile launch system design, developing bowed-knotted strut for compression-deflection characteristics 13 p2513 A70-29256

Minimum weight structural member size and configuration simultaneous optimization using computer program 13 p2516 A70-29550

Minimum weight design for complex structures subject to frequency constraint using finite element method and computer program 13 p2517 A70-29965

Preliminary aircraft wing design for gusts or landing impacts inducing vibrations, inertia effects and dynamic overloads 14 p2655 A70-30177

Space design, considering problems due to weightlessness, vacuum, thermal effects, micrometeorite, cosmic forces, etc 14 p2656 A70-30301

Optimum overlap design of thin walled tubular extendible spacecraft structures under solar heating in zero-g environment 14 p2657 A70-30762

Structural components strength calculation with design required functional notches, noting stress limit for ductile materials under static loads 15 p2815 A70-31874

Optimal design for composite material structure, considering internal and external reinforcement 15 p2816 A70-32005

Structural fatigue failure analysis and design, applying local stress-strain approach [ASME PAPER 70-DE-24] 16 p2989 A70-33424

Dynamic structures design optimization subject to shock spectrum, describing conversational type computer program [ASME PAPER 70-DE-28] 16 p2989 A70-33501

Reinforced polymer composites design for aircraft structures [ASME PAPER 70-DE-67] 16 p2939 A70-33518

Metallic diaphragms design, fabrication and testing for cryogenic fluid and positive expulsion systems [AIAA PAPER 70-683] 16 p2918 A70-33582

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method 16 p2991 A70-33854

Compression spring mechanisms for separation of spacecraft and shrouds, summarizing design characteristics 16 p2921 A70-34116

Mariner 4 spacecraft structural dampers construction and performance 16 p2922 A70-34120

Solar power panel orientation servomechanism using passive elements without power consumption 16 p2846 A70-34130

Flow control valve without moving parts used in ATS A and D, describing design, operation and theoretical performance 16 p2846 A70-34132

Spacecraft boom design and performance, including Russian spacecraft photographs 16 p2985 A70-34137

Space shuttle systems structural design and thermal protection technology, stressing hardware reliability and reusability 16 p2986 A70-34227

Mathematical techniques for optimal design of single purpose structures under dynamic deflection 17 p3182 A70-34544

Anisotropic and laminated cylindrical shells geometric design for reduction of elastic stress gradients to predetermined limit 17 p3182 A70-34559

Aerodynamic and structural considerations in prop/rotor design for tilt-rotor aircraft, discussing blade twist effect on cruise efficiency and figure of merit 17 p3014 A70-34719

Space vehicle optimal design based on reliability analysis, taking into account cost of materials strength tests [JPL-TR-32-1496] 17 p3188 A70-35224

Wide body commercial jet transport structural design considerations applied to DC 10 aircraft [AIAA PAPER 70-895] 17 p3193 A70-35812

Extensible wing flap system for cargo aircraft, discussing structural design details and advantages [AIAA PAPER 70-911] 17 p3020 A70-35823

Optimal design of elastic sandwich, solid beam and plate structures under dynamic harmonically varying loads 18 p3336 A70-36220

Flutter design charts for isotropic panels stressed to verge of buckling for tropical values of structural damping 18 p3338 A70-36446

Soviet book on wing structures analytical design methods covering thin supersonic wings, mass distribution, aerodynamic characteristics, etc 18 p3344 A70-37025

Minimum weight design for structures with stability constraint by nonlinear programming 18 p3344 A70-37068

Optimal rectangular plates with adaptability, using convex programming 19 p3535 A70-37344

Pivoted plane pad bearings, calculating design variables from inner products of two vectors and Rayleigh-Ritz matrix function [ASME PAPER 69-LUB-1] 19 p3435 A70-37612

Minimum weight design of sandwich beams with elementwise constant cross section for prescribed compliances under alternative loads 19 p3543 A70-38303

Classical reliability concept generalization for subjective and objective factors in structural engineering design, obtaining risk of failure 19 p3443 A70-38849

Structural design load factors statistical evaluation for element optimal reliability 19 p3550 A70-38850

Papers on design and materials, discussing alloys for aircraft structures, stress-rupture life of Ni base alloy, single crystal structures, etc 20 p3648 A70-39412

Structural fatigue design loads computation for fighter aircraft using multivariable load environment model from oscillograph recorded multichannel aircraft response data [AIAA PAPER 70-948] 20 p3719 A70-39579

Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability 20 p3715 A70-39677

Filamentary composite materials for space vehicles structural design, noting mass reduction, strength, foldability, formability, etc 20 p3656 A70-40030

Cylindrical or tapered composite shell structures optimal design with closed circular or elliptical cross section under combined bending and torsional loads 20 p3730 A70-40043

Structural synthesis concept in optimal design of composite material structural systems, considering failure modes of rectangular fiber composite plate 20 p3731 A70-40044

Thin cylindrical shells optimum design with symmetrically paired spiral type stiffeners under uniform axial compressible load and lateral pressure 20 p3732 A70-40287

Design management by critical element objectives, correlating various engineering functions in production process [SAWE PAPER 868] 20 p3741 A70-40352

Shape factors for weight prediction and design optimization of structural members requiring given area moment of inertia [SAWE PAPER 828] 20 p3732 A70-40354

Structural weight design optimization by computer aided geometrical programming technique [SAWE PAPER 822] 20 p3733 A70-40357

Helicopter mechanical power transmission design, describing gearing, shaft bending, bearings, lubrication, weight factors, etc [SAWE PAPER 844] 20 p3563 A70-40367

Mathematical techniques for optimal design of single purpose structures under dynamic deflection 20 p3733 A70-40381

Elastic beams optimal design for multipurpose loading, considering compliance and minimum cross section constraints 20 p3733 A70-40382

Thermoelectric outer planet spacecraft /TOPS/ structural problems associated with high gain antenna and electronic equipment 21 p3930 A70-41803

Design component size index as function of various system demands, using Monte Carlo method 21 p3846 A70-41870

Weight-optimal sandwich beam design for given static deflection, using energy approach 22 p4113 A70-42535

Canadair CL-84 V/STOL aircraft flight characteristics and structural design 23 p4137 A70-44017

V/STOL aircraft landing performance, discussing relationships between approach speeds, rates of descent, structural criteria and weight penalties [ICAS PAPER 70-53] 23 p4139 A70-44149

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics 23 p4270 A70-44562

Optimal design of minimum weight bar and beam structures under static loads, comparing computer time with nonlinear programming methods 23 p4271 A70-44702

Asymptotic and computer methods interaction in thin walled shells structural analysis and design, considering pressure vessels, cone vibration and dynamic loads 23 p4271 A70-44703

Thin walled shells structural vibration, buckling and stress analysis by computer methods, discussing shell theory and design 23 p4271 A70-44704

Elastic circular sandwich beams optimal design for minimum compliance and given weight, considering rings and semicircular arches 24 p4420 A70-45276

Spacecraft astronomical instrument structural design, examining aging, vibration and temperature distribution deformations and optical surface contamination 24 p4339 A70-45823

Space shuttle structural design concepts and fabrication, tabulating structural and heat shield materials [SAE PAPER 700768] 24 p4415 A70-45867

Bonded honeycomb sandwich structure fastening techniques in aerospace design, noting application to aircraft and spacecraft structures [SAE PAPER 700850] 24 p4425 A70-45882

STRUCTURAL DYNAMICS

U DYNAMIC STRUCTURAL ANALYSIS

STRUCTURAL ENGINEERING

Commercial aircraft design, considering structural allowances effect on economics, using shear web analysis program as example 02 p0225 A70-11947

Two dimensional structural analysis of engineering systems by computer graphics, outlining discrete element representation 02 p0388 A70-12477

Structural reinforcement for existing airport pavements, discussing construction procedures 03 p0462 A70-13174

Structural material selection for thermal shock conditions, deriving index from parameters governing solutions in thermoelasticity 07 p1413 A70-20002

Structural synthesis of functional control systems represented by first order differential equations, determining hypersurface 08 p1479 A70-20871

Computers impact on engineering science and design, detailing digital computers use in aerodynamics, structures and aeroelasticity 08 p1466 A70-21030

Civil engineering research needs in air transportation, discussing information sources and processing and industry estimates of manpower, facilities and funding 08 p1481 A70-21305

Book on torsion emphasizing beam stressed state calculation and civil engineering problems 13 p2512 A70-28850

Engineering properties and structure of plastics - Conference, New York, May 1970 13 p2438 A70-29251

Size and cost of Al mirror IR photometric telescopes optimized for scientific information acquisition 14 p2586 A70-30896

Finite element methods application in civil engineering - Conference, Vanderbilt University, November 1969 14 p2658 A70-31126

Book on engineering properties of thermoplastics covering strength characteristics, plastic components design, etc 15 p2766 A70-32843

Macaulay method extended for slope and deflection of statically indeterminate beams, rewriting design equations into index notation for computer programming [ASME PAPER 70-DE-2] 16 p2989 A70-33419

Flexural pivots for space structures, describing design, fabrication and applications 16 p2924 A70-34170

Fiberglass reinforced plastics fatigue life, analyzing structural factors role 20 p3655 A70-39891

Composite material engineering problems, discussing tensile, compressive and shear strengths, design approaches, unidirectional properties and substance characterizations 20 p3651 A70-40027

Beryllium use in inertial navigation as stable platform structure and control gyro, discussing physical properties, design concept, fabrication, service, cost and tradeoffs 20 p3639 A70-40451

Space shuttle structural technology for booster and orbiter, discussing hot and cold structure concepts, reentry bodies, military payloads, radiating protective coatings, refractory materials, etc 22 p4111 A70-43516

Materials design and development for engineering applications, discussing relationships and importance of strength, stiffness, weight, toughness and work of fracture 24 p4419 A70-45174

STRUCTURAL FAILURE

Stress criterion for unstable crack propagation from Al alloy sheet tests, examining fracture data for vessels of various geometries and materials [ASME PAPER 69-SESA-2] 01 p0117 A70-10451

Fracture predictions in engineering structures based on small scale tests, materials microstructure, crack initiation and propagation 01 p0121 A70-11159

Polymethylmethacrylate block breakdown under focused pulsed laser radiation in free emission regime, noting light absorption during crack development 02 p0314 A70-12813

Polycrystalline material tensile failure at high temperature, discussing intergranular cracking, shearing, etc 03 p0508 A70-13155

Local buckling and failure of thin walled compression column with supported flanges, analyzing strength reduction by eccentricity 03 p0600 A70-14254

Compression failure of unidirectional fiberglass reinforced plastics 04 p0712 A70-14487

Plastic flow failure of matrix of fiber reinforced composite sheet, discussing plane stress and simple tension [ASME PAPER 69-APM-Z] 04 p0770 A70-14869

Fiberglass reinforced plastics energy dissipation during fatigue failure phases, studying mechanical-to-thermal energy transformation under cyclic strain 04 p0713 A70-15263

Fatigue tests results parametric representation for nickel base alloys tested at various temperatures and times to failure 04 p0707 A70-15264

Stress analysis split method for determining residual strength and fatigue crack life of damaged or initially cracked VTOL structures [AIAA PAPER 69-214] 04 p0624 A70-15395

Delayed failure due to hydrogen embrittlement of structural high strength steels, discussing stress corrosion 04 p0710 A70-15678

Aircraft Ti alloys failure due to stress-induced pseudocorrosion caused by trichloroethylene and Freon noting microstructure, heat treatment and welding effects 04 p0710 A70-15679

Stroboscope lighting system for microstructural examination of fatigue test sample failure 05 p0845 A70-15882

Failure prediction for arbitrary shape flawed pressurized vessels using structural geometry, crack length, ultimate and yield stresses and fracture toughness 05 p0942 A70-16803

Reinforced openings effect on burst strength of ductile circular plates subjected to pressure loads 05 p0943 A70-16810

Unsteady cyclic creep effect on stressed state and margin safety of elements, noting discrepancy of experimental and theoretical characteristics 05 p0866 A70-17030

Bursting speed and mode of high speed rotating disk with rim, boss and blades, noting influence of boss thickness 06 p1129 A70-17129

Fatigue breakdown criteria for elastoplastic materials under cyclic loads, deriving equations as functions of stress-strain states kinetic behavior 06 p1162 A70-17390

Elastoplastic rod systems under repeated variable loads, calculating carrying capacity from plastic failure considerations 06 p1163 A70-17395

Steel elements failure during nonstationary thermal fatigue with varying strain and temperature, discussing linear damage accumulation theory 06 p1163 A70-17397

Damage accumulation and failure of low carbon and low alloy steels subjected to repeated static loading, varying cyclic load frequency 06 p1085 A70-17400

Creep effects on structural failure under low cycle fatigue at high temperatures, noting role of plastic deformation 06 p1164 A70-17409

Energy dissipation patterns of metal fatigue failure during static and cyclic loading applied to untreated and heat treated steel samples 06 p1166 A70-17651

Critical brittleness temperatures of low C steels determined to distinguish main failure types 06 p1166 A70-17655

Gas turbine compensating bellows structural strength, discussing low cycle fatigue test under static loads 06 p1167 A70-17664

Materials fatigue failure ultrasonic early detection by continuous surface wave irradiation 06 p1077 A70-17920

Solid propellant mechanical properties tests, failure and physical deterioration/aging/ 07 p1361 A70-19913

Viscoelastic perfectly plastic ring failure under uniform external pressure characterized by infinite strain rate occurring at finite value of ring deflection 07 p1416 A70-20300

Analytical structural design reliability, discussing static test failures of wings, fuselage, horizontal and vertical stabilizer and landing gear 07 p1417 A70-20400

Ductile flexure location in bent beams and systems with variable cross sections to determine critical load using plasticity theory 08 p1587 A70-21072

Fiber-reinforced composite sheet matrix failure by plastic flow, investigating two ply laminate in simple tension 08 p1592 A70-21471

Compression test data of Al-B composites used for predicting structural element failure 08 p1523 A70-21886

Composite materials fatigue determinations providing curves of stress-strain magnitude vs usable life or time to failure, considering environmental effects in service for design criteria 08 p1531 A70-21895

Brittle failure mechanics application to steels sensitivity to rupture at low temperatures, discussing crack propagation resistance and heat treatment effect on impact toughness 09 p1768 A70-22076

Cyclic heating and thermal stresses effect on fatigue strength and durability of turbine blade alloys and structural elements 09 p1771 A70-22463

Variational principle application to stability in failure mechanics of arbitrary linearly elastic bodies, discussing inertia effect on steady state vibrations of cracked bodies 09 p1771 A70-22465

Shallow rectangular shell panels nonsymmetric nonlinear deflection states computed by finite difference equations iteration, discussing snap-through buckling loads 09 p1780 A70-23209

Failure compression tests of flat rectangular Al alloy panels presented in unitary form, adopting structural load index for solution from weight standpoint 09 p1782 A70-23376

Fracture mechanics applications in stress analysis and structural design, considering rocket motor case failure 09 p1786 A70-23799

Subcritical cracking rate behavior estimation in metallic service structures by linear elastic fracture mechanics 10 p1960 A70-24977

Glass-epoxy composites failure mode dependence on matrix characteristics and fiber orientation, observing flexural strength increase with strain rate 10 p1908 A70-25174

First excursion failure survival probability of randomly excited structures, considering single degree of freedom linear oscillator under Gaussian white noise 12 p2327 A70-27819

Seismic measurements of sonic boom induced ground vibrations for hazard to structures 12 p2227 A70-28078

Rotating disk service life and structural failure under creep, using Tresca yield and maximum stress criterion 13 p2514 A70-29290

Crack initiation and breakdown under thermal stresses of boron nitride containing aluminosilicate 15 p2764 A70-31532

Metallic materials damage accumulation and structural failures due to fatigue, considering surface changes, crack initiation and dislocation pattern 15 p2757 A70-31928

Cylindrical shells with longitudinal rib reinforcements, deriving yield surface from strain mapping and collapse under pressure 15 p2816 A70-32006

Moisture induced failure of glass-resin composites at interface, discussing water adsorption, crack propagation, wet strength and nonsilicate reinforcements 16 p2937 A70-33373

Structural fatigue failure analysis and design, applying local stress-strain approach [ASME PAPER 70-DE-24] 16 p2989 A70-33424

Single phase alpha Ti alloy welds breaking strength, discussing delayed failure and cold cracking with various oxygen and hydrogen contents 17 p3117 A70-34399

Inelastic analysis of unidirectional composite subjected to transverse normal loading, discussing linear

response up to elastic limit and subsequent crack propagation and failure 17 p3182 A70-34557

Linear stress based cumulative damage law for structural component failures 17 p3186 A70-34987

Plastic flow and failure of elastic fiber reinforced composite materials with noninteracting and interacting discontinuities, obtaining stress distribution for various work hardening degrees 17 p3187 A70-34991

Failure prediction for interlaminar shear stress in filament wound rectangular plate 17 p3188 A70-35228

Creep and failure tests for Ti alloys at 500 C, discussing work dissipation during creep process 17 p3126 A70-35714

Steel and cast iron early stage fatigue failure, using photoelastic coatings 17 p3192 A70-35741

Cyclic plastic breakdown of thin cylindrical shell under ring shaped load in temperature field, using linear programming method 18 p3341 A70-36585

Failure of materials under multicycle fatigue, deriving general theory of defects 18 p3341 A70-36586

Carrying capacity of nonshallow rectangular shells, showing corner dependent collapse 19 p3535 A70-37345

Nonuniqueness of collapse load for isotropic frictional material with or without cohesion 19 p3433 A70-37385

Circular sandwich arc subject to central concentrated load and symmetrically applied edge couple, obtaining shakedown interaction curve 19 p3546 A70-38354

Notched sheet failure prediction based on Dugdale crack model, including work hardening and finite width effects, strain fracture criterion and yield failure mechanism 19 p3548 A70-38624

Asymmetric snap-through buckling in cantilevered column restrained at tip by stiff wire, discussing ratio of flexural rigidity to extensional stiffness 19 p3549 A70-38670

Creep and breakdown of thin walled cylindrical shells with circular holes subjected to internal loads at high temperature, discussing time to failure 20 p3721 A70-39777

Structural synthesis concept in optimal design of composite material structural systems, considering failure modes of rectangular fiber composite plate 20 p3731 A70-40044

Aircraft wing box beams bending tests to failure loads, considering crushing pressure, bulkhead flexural deformations, structure initial imperfections and instability phenomena [ICAS PAPER 70-33] 23 p4267 A70-44103

Cylindrical shell stability under off-center compression loads applied to end faces, determining collapse conditions 23 p4268 A70-44169

Plastic postbuckling and imperfection sensitivity of spherical shells under axisymmetric bifurcation 23 p4272 A70-44714

Metal and alloy sheets, investigating deformation and failure under biaxial stretching tensile tests 24 p4358 A70-45240

Aircraft design for low weight, discussing structural failures [AIAA PAPER 70-1232] 24 p4425 A70-45917

Miner rule for cumulative fatigue damage, obtaining upper and lower bounds on load cycle number to failure 24 p4426 A70-46024

Scale factor effect on crack development in blanks and structure elements undergoing linear and complex stressed states under cyclic thermal loads 05 p0867 A70-17045

Refractory metal structural elements stress rupture strength in vacuum and inert gas tested up to 2000 K 05 p0829 A70-17071

Boundary conditions effect on natural vibration frequencies of unloaded components and components loaded with concentrated masses, obtaining frequency equations 08 p1584 A70-20698

Adhesive joints design, considering layer type, pipe connections and honeycomb structures for application in aircraft and automotive industries 08 p1585 A70-20894

Composite materials application to structural members, considering bond or adhesive shear strength 08 p1594 A70-21855

Diffusion and electron beam welding combined with forging for cost reduction and production enhancement of titanium structural components [SME PAPER AD-70-735] 12 p2241 A70-27087

Titanium structural element allowable requirements and test programs for SST design 12 p2318 A70-27132

Creep properties of torsion-tension metal members subjected to nonproportionate loading at high temperatures 14 p2656 A70-30637

Steel and copper alloys torsion-tension members under nonproportionate loads, predicting creep behavior [SESA PAPER 1615] 15 p2759 A70-32316

Structural members of isotropic and anisotropic polymers, investigating creep behavior under simple stressed state 17 p3192 A70-35740

Magnetomotive loading of cantilevers, beams and frames, studying dynamic loading of structures 19 p3541 A70-38045

Long structural shape production for titanium and super alloys, discussing rolling, extrusion, drawing, frictionless forming and filler techniques 19 p3437 A70-38420

Strain measurement on filament-wound structural members, incorporating electric resistance wire as strain gage within windings 19 p3550 A70-38719

DC potentiometer for nondestructive tests of structural components, obtaining crack detection, depths and angles and wall thicknesses 24 p4338 A70-45740

STRUCTURAL RELIABILITY

Reliability analysis formulation for statically indeterminate structures, using modified transition probabilities and computer program for systematic failure paths counting 04 p0768 A70-14747

Structure safety in cumulative damage, considering loading as time dependent stochastic process 05 p0937 A70-16369

Minimum weight reliable beams and frames calculation for random loads, using one degree of freedom system to obtain closed form solution 07 p1401 A70-18825

Damage tolerance as design consideration for aircraft safety and reliability, discussing application of failed single principal member concept to airframe construction [AIAA PAPER 69-212] 07 p1417 A70-20401

Structural elements reliability determination simulated by microinhomogeneous polycrystalline medium under thermal stresses and in stationary nonuniform temperature fields 09 p1778 A70-23085

Structural reliability of missile and aircraft solid propellant engines, estimating effect of loads variance, geometrical dimensions and mechanical strength 10 p1930 A70-24294

Fatigue behavior prediction for complex parts and structures using laboratory tests of small specimens 11 p2137 A70-26091

Airframe structural tests in elevated temperature environment by applied load ratios and room temperature static results 12 p2205 A70-27134

Complex airframe design for economic and safe operation and long life using fatigue and fracture mechanics [AIAA PAPER 70-512] 12 p2324 A70-27466

Plastic encapsulated semiconductors reliability test programs with emphasis on accelerated humidity-temperature method 13 p2377 A70-29259

Airframe critical part structural reliability on basis of ultimate static strength test data and extreme gust spectrum and maneuver loads 14 p2658 A70-30852

Safety, microdamages and lifetime of elastic structures under random Poisson pulsed loads 16 p2996 A70-34328

Linear stress based cumulative damage law for structural component failures 17 p3186 A70-34987

Structural reliability testing methods and loads prediction for rotary wing vehicle components, considering AH-56A compound helicopter 19 p3356 A70-38612

Classical reliability concept generalization for subjective and objective factors in structural engineering design, obtaining risk of failure 19 p3443 A70-38849

Failure probability from finite sampling characteristics, emphasizing statistical safety factors to characterize structures strength reliability 20 p3724 A70-39856

Laminated composites time dependent static strength and reliability under uniaxial tension 22 p4119 A70-43678

STRUCTURAL RIGIDITY

U STRUCTURAL STABILITY

STRUCTURAL STABILITY

NT SHELL STABILITY

Structural efficiency of composite tube columns with zero axial coefficient of thermal expansion, discussing three dimensional and planar fiber arrays 01 p0126 A70-10120

Elastic properties of thin curved cylindrical panels with constant mechanical properties subjected to thermal expansion and single face pressure 01 p0201 A70-10943

Liquid metals contact effect on mechanical strength of T shaped graphite specimens at high temperatures in argon atmosphere 01 p0129 A70-11038

Sandwich plates plastic buckling stability under uniaxial compressive loads from compressible theory viewpoint 01 p0204 A70-11137

Stiffeners reinforced rectangular plates parametric stability under dynamic load, deriving equilibrium equations and boundary conditions by averaging stiffener effects 01 p0205 A70-11146

Optimal structural design including service requirements on strength, buckling and natural frequency stated as optimal control problem 01 p0207 A70-11158

Elastic ring reinforced annular plate of uniform thickness, heated nonuniformly along radius, discussing axisymmetric and asymmetric stability losses 01 p0210 A70-11415

Impeller elastic and elastoplastic strength of centrifugal supercharger with curved disks and radial blades, using variational method 01 p0211 A70-11417

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance 01 p0124 A70-11621

Structural qualification testing of experimental tactical communication satellite /TACOM SAT/ 02 p0274 A70-11936

Mathematical model for local postbuckling strength of flat truss core sandwich panels loaded in compression, considering application to Ti structures 02 p0386 A70-11948

Ductile-brittle fracture transition in steel pressure vessels suppressed by utilizing thin laminations 03 p0583 A70-12903

Soviet book on experimental investigation of thin walled structures elastoplastic work with complex reinforcement, outlining test procedures 03 p0585 A70-12985

Monograph on buckling and postbuckling behavior of plates tapered in planform, comparing stability of tapered and rectangular plates 03 p0586 A70-13002

Stability analysis of orthotropically symmetric strip under uniformly distributed compressive forces applied to shorter ends, deriving critical load formula 03 p0590 A70-13402

Infinitesimal deflections of piecewise-regular unfolding scanning surfaces fixed along edge with respect to one point, discussing rigidity 03 p0591 A70-13414

Equivalent rigidity of doubly periodic symmetrically perforated infinite plate strengthened by elastic ring under isotropic tension 03 p0595 A70-13754

Elastoplastic bar stability compressed by tangential force, showing ductility effect on critical parameters, perturbed motion and stability loss process
04 p0767 A70-14484

Stiffener inclination effect on pressurized cylinder instability under pure bending
[ASME PAPER 69-APM-X]
04 p0769 A70-14868

Structural strength under impact loading with allowance for shock waves, comparing various strength calculation methods
04 p0774 A70-15098

Thin walled uniform open bar stability under arbitrary boundary conditions, using Vlasov assumptions and matrix methods
04 p0774 A70-15099

Turbine blade materials resonant vibration resistance criterion dependence on temperature and cyclic and static stresses amplitude
04 p0776 A70-15262

Thin cylindrical circular shell and three layered plate, analyzing vibration and stability due to loads and temperature
05 p0926 A70-15916

Computational procedures for matrix analysis of stability and vibration of thin flat rectangular plates in longitudinal compression
05 p0927 A70-16010

Energy method for analyzing rectangular panels buckling under nonuniform in-plane loading, considering stability under uniform compression
05 p0931 A70-16117

Stability and critical loads of transversally isotropic reinforced plastic annular plates with weak shear resistance under axisymmetrical buckling
05 p0933 A70-16213

Three layer plate of elastic fiber glass reinforced plastic outer layers and metallic plastic filler, studying elastoplastic stability
05 p0934 A70-16218

Three dimensional brittle body limiting axisymmetric stability under tensile stresses and weakened by ring shaped cracks, determining critical tensile loads
05 p0945 A70-16855

Computerized calculations for cylindrical tank bottoms with outlet based on strength analysis, using zero moment theory for surface stability under uniform pressure
05 p0946 A70-16957

Thermal stability of materials and structural elements - Conference, Kiev, Ukrainian SSR, December 1967
05 p0947 A70-17026

Heat resistant plastics stability subject to unilateral heating with allowance for mass removal, obtaining dimensionless stability characteristics for structures design
05 p0874 A70-17066

Fiberglass reinforced plastics load carrying capacity under unsteady unilateral heating described by thermal similarity criteria
05 p0955 A70-17070

Modulus of rigidity and stress-strain state measured in square plate during shear produced by twisting
06 p1060 A70-17132

Prismatic pendularly supported beam load-forced vertical vibrations, critical load amplitude and force pulsation in case of stability loss
06 p1165 A70-17586

Rectangular and nonrectangular anisotropic plate bending and stability analysis by difference- differential technique, allowing for combined freely supported and clamped end conditions
06 p1167 A70-17864

Thin walled glass fiber reinforced plastics beams strength analysis combined with results from elasticity theory of anisotropic bodies
06 p1167 A70-17913

Equilibrium cracks in elastic bodies on basis of atomic interaction law, using Griffith problem to estimate bearing capacity
07 p1400 A70-18666

Precision tungsten alloy tubing manufacture and properties, discussing direct conversion of metal powder to finished tubing with high temperature structural stability
07 p1292 A70-18928

Rotating disk stability relation with stress distribution in plastic deformation of material
07 p1402 A70-19056

Critical slope load calculation for circular elastic embedded and supported arcs under radial and variable force
07 p1404 A70-19136

Finite structural rigidity of statically unbalanced three degree of freedom gyroscope influence on operation, discussing instrument error
07 p1282 A70-19535

Three dimensional nonlinear viscoelastic body stability under triaxial compression, extending results obtained for elastic body
07 p1408 A70-19542

Elastic stability theory applied to equilibrium and stability of discrete continuous structural systems, detailing discrete critical points
07 p1408 A70-19560

Soviet book on structures design for stability at high temperatures with large gradients, discussing thermoelasticity, thermoplasticity and creep equations for shells, plates, etc
07 p1409 A70-19601

Creep rupture and residual tensile strength tests to evaluate long time properties and structural stability of Inconel 718 alloy, performing phase analysis
07 p1310 A70-19731

Boron fiber reinforced composites structure and loading capacity, describing network-like fiber winding technique for light reinforced structures
07 p1318 A70-19771

Stability criterion applied to asymmetric rigid cyclic strains and plastic cyclic strains, considering failure of metals
07 p1315 A70-20182

Stability equations of three layer panels with allowance for rigid filler transverse deformations
07 p1415 A70-20186

Thin walled strip stability, calculating critical force and rotation angles assuming small subcritical strains
07 p1415 A70-20188

Limiting equilibrium of rigid-plastic cylinder subjected to compression by concave stamps
08 p1583 A70-20533

Statistical analysis of model parabolic mirror rigidity on multisupported suspension under symmetrically distributed load represented by mirror weight
08 p1586 A70-21057

Multisupported radially symmetrical suspension systems designs for parabolic antennas, assessing performance in terms of maximum rigidities
08 p1586 A70-21058

Nickel alloy based metal fiber reinforced composites long-time structural stability at high temperatures
08 p1517 A70-21150

Lateral buckling of simply supported uniform diaphragm using slope-deflection equations for orthogonally intersecting beams, prescribing boundary conditions
08 p1589 A70-21244

Optimal inextensional buckling of uniformly loaded simply supported arches with large opening angle
08 p1589 A70-21310

Elastic post stability under longitudinal impact on rigid support, considering loading/unloading phases for calculating shock half wave length and critical rate
08 p1591 A70-21443

Cr-Mo steel strength and structural stability during tubular stress-rupture testing with high pressure hydrogen, discussing welding effect on strengths
08 p1519 A70-21455

Stiffeners inclination effects on instability of pressurized cylinder under bending by Ritz method, considering finite deflection and initial imperfections in strain-displacement relations
08 p1591 A70-21464

Laminated anisotropic rectangular plates of boron-epoxy composite material, studying shear stability by potential energy and Ritz method
08 p1595 A70-21903

Theorem for highest statically admissible multiplier for plates and shells, noting association with stress field satisfying yield equality at all cross sections
08 p1595 A70-21977

Limiting equilibrium of unbounded cracked elastic plate with circular hole, studying crack propagation under compression
09 p1769 A70-22121

Book on sonic boom effects covering shock waves generation and propagation, elastic structures response to dynamic loads, structural damage, etc
09 p1609 A70-22203

Aircraft turbine engines strength and gas dynamic characteristics improved by vibration decrease using elastic elements
09 p1742 A70-22471

Elastic body equilibrium forms bifurcation solution for uniform strain applied to cylindrical rod and shell under compressive strain
09 p1773 A70-22539

Creep and stability of perforated and unperforated turbine disks under operating conditions
09 p1779 A70-23097

Elastic beam stability, natural frequencies and critical forces under longitudinal impact with nonuniform compressing force
09 p1780 A70-23116

Mandrel adhesion and cure shrinkage impact on structural integrity of solid propellant grain
09 p1742 A70-23263

Sandwich plates stability in conducting compressible fluid flow under magnetic field
09 p1785 A70-23621

Flexural rigidity of thin walled beams, analyzing relationship between loads and displacements taking into account Saint Venant torsional resistance
10 p1955 A70-24052

Buckling stability of slender knife-edge suspended rods subjected to compression end loads
10 p1955 A70-24053

Rigid fire-retardant polyurethane foams obtained from phosphonopropionate polyols, discussing physical properties and shelf stability tests
10 p1907 A70-24063

Optimal trusses design, considering minimal volume /weight/ and elastoplastic stability in compressed and stretched bars
10 p1958 A70-24514

Beams stability under flexural stress with periodic intensity variations, deriving differential equation of motion
10 p1960 A70-24973

Equivalent rigidity of doubly periodic symmetrically perforated infinite plate strengthened by elastic ring under isotropic tension
10 p1960 A70-25009

Stability conditions in metal specimens tension tests, considering fcc and bcc metals strain hardening, rate and gradients and temperature dependence
10 p1966 A70-25326

Rectangular sandwich plates stability under combined loads, deriving equations for determining critical loads
11 p2129 A70-25563

Panel flutter theory applied to aeroelastic stability of flat unloaded plates and cylindrical shells
11 p2134 A70-25951

Elastic stability of discrete conservative structures under combined loads
11 p2142 A70-26636

Apollo lunar module structural integrity for lunar landing verified by Monte Carlo dynamic analysis
12 p2312 A70-27114

Sandwich beams elastoplastic stability, determining critical load
12 p2323 A70-27342

Synthetic pyroxenoid stability and crystallography, noting pyroxmangite structure similar to yellow lunar mineral from Mare Tranquillitatis
12 p2226 A70-28022

Fiberglass plastic reinforced high pressure balloons design and fabrication with oblated ellipsoid of revolution, discussing deformability, strength and cyclic loadings resistance
12 p2328 A70-28285

Structural stability of friction welded joint between high temperature low alloy weld metal from CrMoV electrode and high temperature Cr steel
12 p2244 A70-28349

Cantilevered column stability under constant follower load in presence of external damping
13 p2510 A70-28733

Elastic stability of structural systems with generalized coordinates and independent loading parameters associated with critical point
13 p2511 A70-28739

Lateral motions of vertical uniform tubular cantilever conveying fluid, considering oscillatory instability at high flow velocities
13 p2511 A70-28741

Dynamic instability of multirecess hydrostatic journal bearings at critical shaft rotation velocity
13 p2418 A70-28745

Fixed end nonprismatic bar stability in fluid flow, studying form influence on critical flow velocity
13 p2512 A70-28982

Critical equilibrium of plate under omnidirectional tension with radial rectilinear cracks
13 p2515 A70-29429

Contact stresses and radial displacements in circular rings with loaded inner and outer boundaries
13 p2515 A70-29506

Eccentrically stiffened orthotropic cylinders with intermittently attached stiffeners under bending and axial load, analyzing instability and buckling
13 p2518 A70-29966

Structural components strength calculation with design required functional notches, noting stress limit for ductile materials under static loads
15 p2815 A70-31874

Boron-epoxy stiffener reinforced metal wings, examining structural efficiency of multiweb beam aluminum cover skins and S stiffened panels
16 p2994 A70-34230

Ti alloys systems physical properties and structural phase stability, discussing electronic Fermi state density variation
17 p3114 A70-34376

Creep resistant Ti alloys with high temperature strength and stability, comparing tensile data for room temperature and 900 F
17 p3122 A70-34440

Optimum filament orientation for maximum strength in composite with combined normal and shear stresses
17 p3183 A70-34563

Displacement bounding principle for finitely deforming rigid plastic structures exhibiting geometric stability, with application to cylindrical shell
17 p3184 A70-34906

Structural stability in tension and strength tests of thin walled tubes at various stress and strain intensities, noting dependence on stress-strain state type
17 p3192 A70-35713

Kinetic instability of elastic cantilever beam under excitation by rotating masses, relating bending and torsional vibrations to masses angular velocity
18 p3334 A70-35960

Mass distribution role in stability theory of rods under nonconservative buckling load
18 p3335 A70-35961

Elastic continuum conducting heat under general loads, investigating stability thermodynamics- Liapunov criterion relations
18 p3337 A70-36336

Critical stresses and stability of thin Maxwell plates under random temperature fields
18 p3337 A70-36368

Stability conditions in straight bar, taking into account stress direction changes caused by deformation
18 p3337 A70-36372

Large wheel and tire imperfection effects on nosegear parametric shimmy instability, using Mathieu equation
18 p3213 A70-36455

Infinite Bernoulli-Euler beam transient and steady state response, considering damping, elastic foundation and constant axial load effects
18 p3339 A70-36490

Structure of flexural members, analyzing torsional and lateral stability by finite element method and matrix formulation
18 p3339 A70-36494

Minimum weight design for structures with stability constraint by nonlinear programming
18 p3344 A70-37068

Soviet book on theory of shell and plate type thin walled structural elements stability covering strength, boundary value problems, oscillations, design, etc
19 p3535 A70-37401

Covariance matrix of mean square response in structural systems under white noise
19 p3536 A70-37702

Spacecraft thermal vacuum test installations design and operations for locating spacecraft structural weak points
19 p3400 A70-38297

Continuous one dimensional nonconservative elastic systems under complex forces, examining stability theory
19 p3546 A70-38341

Complementary energy bounding theorem for statically loaded bodies composed of time independent plastic material
19 p3546 A70-38353

Structural fatigue strength model tests for turbine blade root connections, using asymmetric load cycle and working temperature
19 p3547 A70-38433

Elastic-plastic equilibrium bifurcation in geometrically simple frame model with symmetrically loaded beam, comparing characteristics with Shanley uniformly stressed column model
19 p3549 A70-38671

Oxide dispersed Cu alloys preparation by surface oxidation of powders, considering structural stability and stress rupture properties
20 p3646 A70-39103

Anticlastic bending analysis of long narrow plates oscillations and stability based on elastic plates nonlinear theory
20 p3721 A70-39779

Elastic bodies stability criteria, investigating loss under nonconservative forces influence
20 p3722 A70-39785

Compressive force on elastic plate of arbitrary shape related to number of equilibrium forms, using Karman equations
20 p3724 A70-39861

Harmonic forced transverse vibrations effects on rectangular plates with cross braces, deriving motion stability equations
20 p3725 A70-39867

Prestrained laminated media stability, discussing column buckling, standing waves, natural frequencies, wave propagation, stress-strain relations, motion equations and elastic moduli
20 p3731 A70-40049

Clamped circular shallow Al arches stability under impulsive loading, obtaining deflection time history by high speed photography and computerized data reduction
20 p3732 A70-40265

Limit surface behavior equations for structural membrane elements in terms of number, orientation and limit load of constituent fibers by limit theorems
21 p3934 A70-40778

Structural stability analysis by matrix decomposition and iteration, extending to structures with nearly equal critical loads
21 p3934 A70-40888

Book on stability of dynamic systems and solid bodies covering variation equations, Liapunov method and functions, approximations, harmonic balance and applications
21 p3850 A70-41370

Creep and stability of microstructural Al elements under varying temperatures, noting grain boundary migration
21 p3839 A70-41429

Viscous fluid cylinders electromagnetodynamic stability, discussing viscous forces effects
21 p3858 A70-41699

High strength glass for aircraft structures, discussing applications to passenger cabin windows
21 p3843 A70-41891

Earth upper mantle phase change instability, discussing temperature gradient, transformation influence on fluid, olivine-spinel phase flow patterns and tectonics
21 p3820 A70-41895

Elastic stability theory Cosserat surface subjected to conservative nongravitational surface and edge loading
21 p3939 A70-42027

Metastable beta Ti alloy as-quenched microstructure stability with respect to thin foils transformation during electrolytic polishing and bulk specimens during cold rolling
21 p3841 A70-42150

Acoustic emissions method for monitoring structural stability of solid materials assemblies via crack formation and movement detection
22 p4027 A70-42582

Hyperelastic bodies stability subject to conservative configuration dependent forces, formulating surface potential for hydrostatic loading
22 p4114 A70-42695

Cantilever beam optimal stability under concentrated and uniformly distributed bending loads
23 p4268 A70-44171

Stability of elastic stretched ring on thin spherical shell under critical loads
23 p4268 A70-44318

Survival probability of randomly excited structures, using maximum entropy principle
23 p4270 A70-44582

Elastic structure equilibrium state stability, discussing damping and stiffening effects
23 p4275 A70-44941

Dynamic structural stability analysis, describing integral equation matrix technique
24 p4419 A70-45156

Continuous structural systems stability under random load excitation from linear partial differential equations of motion
24 p4421 A70-45281

Infinite plates and shallow shells stability under doubly periodic surface loadings, using nonlinear analysis
24 p4421 A70-45283

Undamped elastic cantilever column with concentrated masses, considering transition from stability to divergence under nonconservative forces
24 p4421 A70-45286

Shallow arch clamped at ends and subjected to uniform lateral load, deriving nonunique equilibrium stability states
24 p4426 A70-46038

STRUCTURAL STRAIN

Thin elastic shells parallel surface nonlinear tangential strains derived in terms of midsurface tangential and bending strain components
01 p0205 A70-11143

Transient thermal stress concentration at small thickness change of plate obtained by photoelastic studies
01 p0207 A70-11157

Construction of formulas relating stresses and plastic deformations describing inelastic bodies behavior under complex loads
01 p0210 A70-11411

Crack propagation in pure alpha-Ti at room temperature using optical and electron microscopy, considering propagation rate relation to strain amplitude
01 p0125 A70-11643

Stress-strain analysis of rectangular plates under concentrated load, noting sealed liquid compressibility effect on deflections and bending moments
02 p0388 A70-12499

Load and strain trajectory vectors components determined for tension followed by transverse compression in five dimensional space
02 p0390 A70-12803

Cauchy integrals extension to axisymmetric elasticity problems, obtaining numerical results for stressed circularly symmetrical state of hollow cylinder under uniform load
03 p0586 A70-13080

Discontinuity surfaces /cracks/ propagation in continuous medium having energy and stresses as functions of strain tensor gradient, using variational principle
03 p0589 A70-13330

Thin shells stressed state calculations by iteration, considering suitability for computer adaptation
03 p0592 A70-13442

Nonlinear theory for thin elastic shells with small strains and rotations, analyzing nonzero Gaussian curvature
03 p0594 A70-13622

Stress distribution of thin walled structure of open section, considering warping and torsional bending, using calculus of variations
03 p0596 A70-14030

Finite strain in bending rectangular block into right circular cylindrical shell for transversely isotropic medium along radius vector, using Saint Venant stress-strain relations
03 p0602 A70-14329

Nonlinear thin shell theory kinematics generalized in terms of physical strain and surface deformation and geometry
04 p0766 A70-14450

Supercritical strains and buckling in rib-reinforced cylindrical shells under axial compression using strain-energy method
04 p0766 A70-14478

Axisymmetric structures under load and temperature distribution analyzed by matrix displacement method
04 p0774 A70-15167

Divergences in tension textures and values of anisotropy coefficients ascribed to imperfections in cubic texture of aluminum sheet deformed by straining
05 p0927 A70-15995

Plasticity theory of single crystals based on dislocations behavior, considering only plane and elastic strains
05 p0928 A70-16061

Strain parameters and equilibrium equation of rib-reinforced thin shells, analyzing length, curvature and torsion variations using smooth shell analogy
05 p0935 A70-16230

Strain energy release rate in terms of propagating crack surface displacements applied to infinite solid loaded in tension
05 p0938 A70-16480

Inherent stresses in elastic solid assuming inherent strain as stress source, integrating stress functions
06 p1160 A70-17131

Complex load strength criterion containing stress and strain invariants applied to simple static loads and cyclic symmetric deformation
06 p1162 A70-17389

Elastic and plastic deformation zones stress-strain state under complex stresses, obtaining relation for stress and strain components
07 p1401 A70-18834

Cylindrical shell of revolution stress-strain state calculated during shaping in stamp with unclamping dies
07 p1292 A70-18836

Uniform thickness thin helicoidal shell stress-strain state with middle surface in asymptotic lines, assuming parameters governed by one dimensional law
07 p1402 A70-19055

Isotropic plate stress-strain state weakened by doubly periodic curvilinear holes using nonlinear theory
07 p1408 A70-19544

Transverse stress failure analysis of reinforced extruded plastic laminates taking into account cohesive and adhesive failure
07 p1410 A70-19768

Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media
08 p1585 A70-20962

Elastic-plastic plane strain solutions in infinitesimal plastic flow theory with separable stress fields
08 p1592 A70-21470

Stresses and strains in multilayer systems of viscoelastic materials showing aging solved by quadratures and Volterra equations, noting dependence on time
08 p1594 A70-21672

Microstrain characteristics of continuously reinforced W-Cu composites as function of volume fraction of fibers and prestrain, discussing dislocation friction stress
08 p1524 A70-21917

Variable modular elasticity theory demonstrated for anisotropic body subjected to plane stressed state, deriving expression for potential energy of deformation
09 p1779 A70-22547

Beams torsion problems solution by variational method of variables separation, obtaining values for torsional rigidity and stress function
09 p1777 A70-23080

Temperature fields and thermoelastic stresses in doubly connected structural elements solved in curvilinear coordinates system corresponding to conformal mapping of annulus
09 p1781 A70-23233

Stress-strain state analysis of transversely isotropic plates with inclusions under bending loads
09 p1782 A70-23298

Chromium structural dislocation and cell formation during deformation as function of temperature, impurities and strain rate
10 p1902 A70-23861

Stress-strain state analysis of prestrained thin circular cylindrical shell using Vlasov general shell theory 10 p1955 A70-24021

Stress intensity and strain energy of pressurized line crack in cross form in thin elastic plate solved by Wiener-Hopf technique 10 p1956 A70-24192

Steel conical disks two dimensional stressed state determined with deformations at elastic and elastoplastic strains using digital computers 10 p1956 A70-24242

Tensile and compressive strain measurements close to weld deposits, using moire fringe technique and mismatch grating 10 p1890 A70-24591

Plastic strains buildup during thermal cycling, establishing relation between strain interval and cycles number to failure for strain hardening materials 10 p1965 A70-25293

Gasdynamic test stand analyzing elastoplastic strains in aircraft gas turbine disks and liquid-propellant rocket engines turbopumps under alternating nonisothermal loads 10 p1862 A70-25298

Aluminum alloys hot cracking during welding, ascribing failure to combination of strain and susceptible microstructure 10 p1897 A70-25313

Optical filtering applied to moire method for measuring small structural strains 11 p2131 A70-25595

Stress concentration in elastoplastic and creep deformations determined by approximate solution 11 p2134 A70-25845

Brush current collectors for strain measurements in rotating machine parts, discussing acceptance testing 11 p1983 A70-26438

Deformation theory for small elastic-plastic strains in orthotropic material and discretization and iterative solution techniques 11 p2144 A70-26684

Transient analysis of stress waves around cracks under antiplane strain with time dependent loadings based on integral transforms 11 p2145 A70-26698

Stress-strain state of thin revolving shells composed of multiple variable thickness layers, assuming layers deformation free of slipping and separation 12 p2322 A70-27332

Shallow spherical shells stress-strain state in multiply connected regions resting on Winklerian base 12 p2323 A70-27334

Stress-strain state of epoxy resin cylinder situated in centrifugal force field using three dimensional photoelastic method 12 p2323 A70-27340

Strain induced in laminated orthotropic fiberglass plastic cylindrical shell by normal concentrated load, using equations free from rectilinear normals hypothesis 12 p2328 A70-28279

Circular cylinders torsion and plain strain analysis, completing statics by asymmetric shear and moment stresses according to Cosserat theory for plastic flow 13 p2508 A70-28492

Elastic isotropic circular perforated plate stress-strain state, proving quasi-regularity of infinite linear algebraic equations 13 p2515 A70-29317

Nonlinear wave propagation in continuous media involving stress-strain state of half space under pressure or load expanding over boundary 13 p2517 A70-29770

Plain strain fracture toughness index measurement, discussing application to metal fatigue and stress corrosion 15 p2757 A70-31927

Induced strain plane state in elastic micropolar medium by temperature effect, discussing thermoelastic problem stress functions 15 p2821 A70-32341

Materials real time strain measurements by optical correlation techniques, noting sensitivity 16 p2913 A70-33980

Stress, strain and acceleration spatial variation in structures subject to broad frequency band vibration excitation, considering simply supported flat plate 16 p2992 A70-34017

Plane strain vibrations of two layered elastic cylinders, analyzing results for lobar mode numbers 2, 3 and 4 16 p2994 A70-34096

Oxidized alpha Ti crystals strain analysis based on X ray divergent beam, discussing hardening effects 17 p3115 A70-34387

Hologram interferometry for measuring surface deformation under force and anisotropy in transparent objects 17 p3085 A70-35009

Strain transducer/optical diffraction grating/for plastic wave propagation measurement along specimens subjected to impact 19 p3425 A70-37884

Continuum bodies strain subjected to shearing stresses in incremental form based on slip theory of metals plasticity 19 p3549 A70-38668

Strain and stress compatibility from extension of Saint Venant and Beltrami-Mitchell equations for physically and geometrically linear to nonlinear media 20 p3719 A70-39384

Thin circular plate clamped along edge, calculating large displacements and elastoplastic strains for comparison with measurement 21 p3935 A70-41406

Thermomechanical disturbances propagation in viscoelastic solids, investigating effects of viscous flow, second order strains and temperature dependent material properties 21 p3937 A70-41427

Elastic-plastic deformation analysis at finite strain by two component thermodynamic model 21 p3937 A70-41431

Steels thermal fatigue in testing machine, investigating strains and stresses due to nonuniform temperature distribution during thermal cycle 21 p3840 A70-41433

Thin epitaxial Ag films on mica, measuring electrical resistivity strain dependence 24 p4391 A70-46266

STRUCTURAL VIBRATION

Vibrating system response to damping insert introduced between two distinct coordinates, discussing Butyl rubber and vibration amplitude reduction 01 p0199 A70-10265

Semiautomatic mass condensation transformation for reducing structural vibration calculations, including computer program and mode shape plotting 01 p0200 A70-10868

Book on vibrational motions of straight and curved shafts, covering dynamic analysis for noncircular cross sections, applications to machine tools and vehicles design, etc 01 p0209 A70-11378

Human vibration test program for airline passenger reaction to vibration environments of large commercial aircraft 02 p0244 A70-12132

Flight vehicles intrinsic vibration frequency spectra for controllable flight determined by graph-analytical method 02 p0227 A70-12415

Normal and tangential displacements distribution at surface and along cross section of bar with free boundaries computed for symmetric and antisymmetric oscillations 02 p0301 A70-12484

Elastic stability of Coriolis-coupled oscillations of thin rotating disk under influence of centrifugal forces 02 p0389 A70-12650

Helicopter vibrations recording on magnetic tape for subsequent frequency analysis, describing frequency spectrogram 02 p0304 A70-12761

Vibrational response of simply supported and clamped circular plates subjected to gyroscopically induced inertia loads, using equations of motion 03 p0583 A70-12920

First and second boundary value problems of steady vibrations of viscoelastic bodies reduced to algebraic equations 03 p0589 A70-13345

Eigenfunctions of oscillating infinite perforated membranes for various boundary conditions at holes 03 p0591 A70-13415

Bubnov-Galerkin approximations convergence in problem of thin plate nonlinear vibrations, allowing for inertial forces due to rotation 03 p0593 A70-13470

Nonlinear flexural vibration properties of thin circular cylindrical shells with simply supported ends assuming deflection mode 03 p0594 A70-13549

Elastokinetic three dimensional boundary value vibration problem, involving rectangular area on surface of elastic half space under periodic normal stress 03 p0601 A70-14319

Thin elastic plate oscillations plane two dimensional steady state problem assuming constant thickness, finite dimension and moving load 04 p0766 A70-14420

Natural circular frequencies of small axisymmetric vibrations of shells of revolution of arbitrary shape, using Rutishauser algorithm for eigenvalues 04 p0767 A70-14525

Soviet monograph on numerical determination of dynamic characteristics of plates and shells by method

of summary representations, covering oscillation and stability problems 04 p0773 A70-14954

Spectral response of cylindrical shell due to random acoustic pressure input computed using modal approach 04 p0778 A70-15528

Stiffness and mass matrices of free-free vibration structure reduced to eliminate zero frequencies 04 p0778 A70-15553

Circular sandwich plates fundamental natural frequencies, considering face members membrane characteristics and thickness, face and core isotropy, etc 04 p0778 A70-15559

Kacner method applied to longitudinal vibrations study of nonhomogeneous nonuniform bars, noting applicability to geometrical and elastic properties variations 04 p0779 A70-15702

Ultraharmonic resonance excited by centrifugal force in system with Duffing restoring force characteristic using Ritz method 05 p0925 A70-15886

Thin cylindrical circular shell and three layered plate, analyzing vibration and stability due to loads and temperature 05 p0926 A70-15916

Computational procedures for matrix analysis of stability and vibration of thin flat rectangular plates in longitudinal compression 05 p0927 A70-16010

Parametric oscillations of unclamped rod under variable longitudinal force applied to end, approximating resonance boundaries and instability regions 05 p0934 A70-16226

Natural vibrational frequencies of trapezoidal, triangular, circular and elliptical isotropic flat plates with different edge conditions tabulated 05 p0936 A70-16319

Natural frequencies upper and lower bounds of elastic clamped vibrating curved beams/arcs/ determined on basis of differential operator theory 05 p0937 A70-16405

Displacement determination by orthogonality relationship for dynamic vibrations and stresses in composite elastic plates 05 p0937 A70-16406

Transverse vibrations of isotropic truncated-cone beam fixed at ends compared with cylindrical beam 05 p0942 A70-16666

Experimental and analytical work on structural panels vibratory response and acoustic radiation excited by turbulent boundary pressure fluctuations, evaluating applicability to noise research 05 p0835 A70-16789

Sonic boom research, considering exposure pattern development, propagation in inhomogeneous atmosphere and effects on structural responses 05 p0796 A70-16795

Cylindrical shell walls vibrations under impact loads, calculating damping factor in differential equation of motion of wall element 05 p0947 A70-17008

Longitudinal vibration equations of beams for nonlinear stress-strain relation reduced to equivalent linear partial differential equations 06 p1106 A70-17863

Rectilinear oblique harmonic vibration effect on gyrocompass with torsional suspension 07 p1278 A70-18737

Linear vibrations in gimbal suspension rotor and base, estimating gyroscope drift during base and rotor vibrational coincidence 07 p1279 A70-18738

Forced and free vibrations of shaft carrying unsymmetrical rotor, studying effects of distributed shaft mass and nonlinear shaft stiffness 07 p1401 A70-18976

Unstable vibrations in rotating flat shaft with unsymmetrical flexibility carrying unsymmetrical rotor in four degrees of freedom 07 p1402 A70-18978

Soviet papers on vibrations, strength and structure of aircraft engine elements 07 p1363 A70-19109

Segmented elastic shells of revolution supported by rings, studying buckling and vibration by matrix method 07 p1405 A70-19257

Mechanical vibration of beams analyzed by partial differential equations of beam vibration involving mass concentration and flexibility 07 p1411 A70-19786

Bernoulli-Euler beam equation describing natural frequencies and mode shapes for vibrating beam immersed in fluid 07 p1413 A70-20043

Complex modulus measurement for rigid linear viscoelastic materials over audio frequency spectrum by harmonic end displacement ratio method 07 p1413 A70-20044

Dynamic calculation of oscillating liquid filled elastic cavity on elastic kinematic system under random load, using random signals transmission theory
07 p1416 A70-20194

Von Karman equations for rectilinear plate vibrations used for triangular plates, discussing amplitude/thickness effect and multimodal frequency formula
07 p1416 A70-20211

Single frequency oscillations of variable cross section rods with random perturbations using asymptotic methods of nonlinear mechanics, discussing wedge oscillations
08 p1583 A70-20487

Rotating shaft vibrations on assembly designed to balance rotor in magnetic field, eliminating bearings effect on shaft to determine internal friction
08 p1584 A70-20697

Soviet book on free, forced and parametric vibrations of thin walled shells containing liquid, gas and continuous elastic medium
08 p1584 A70-20762

Elastic systems vibrations calculated with allowance for amplitude and frequency dependent energy dissipation using hysteresis loop contour expression
08 p1585 A70-20978

Vibration insulation of rib estimated with respect to diffuse flexural wave field in reinforced plate
08 p1586 A70-21010

Static deflection effect on harmonic vibration of system with restoring forces of hardening nonlinear spring, considering gravity effect
08 p1586 A70-21035

Computer graphics applications to three dimensional vibration analysis, changing mass, stiffness, exciting load or load frequency at any point with light pen
08 p1467 A70-21050

Radial vibrations of hollow elastic sphere in acoustic medium, considering Laplace transform of field equations with respect to time
08 p1587 A70-21076

Rectangular planform shallow cylindrical shell parametric vibrations using method applied to large bending vibrations of plates
08 p1588 A70-21212

Spaced damping reducing structural response to vibration, discussing efficiency, design flexibility and weight addition
08 p1507 A70-21269

Rigid rotating cylindrical shaft vibrations along diameter in viscous fluid using inner and outer expansions method
08 p1589 A70-21307

Tuned resonant test for measuring damping characteristics of lead and asbestos filled epoxy- polysulfide copolymer
08 p1527 A70-21336

Eigenfrequencies of thin barrel shaped shells on simple supports, noting correspondence of ratio of radius to shell wall thickness
08 p1592 A70-21474

Transverse oscillation periods of cylinder containing flowing fluid obtained by solving nonlinear partial differential equations describing transverse and longitudinal motion
08 p1592 A70-21480

Structural vibration of ring stiffened and mass- attached hemispherical shells
08 p1593 A70-21618

Frequency change for coupled vibrations of slender rotating beam due to hub radius change determined in centrifugal force field by perturbation method
08 p1594 A70-21772

Simply supported rectangular plate investigated for effect of thermal gradient on transverse vibrational frequencies
08 p1595 A70-21976

Cylindrical shell vibration modal characteristics finite element solutions accuracy compared with exact solutions
08 p1596 A70-21979

Book on sonic boom effects covering shock waves generation and propagation, elastic structures response to dynamic loads, structural damage, etc.
09 p1609 A70-22203

Rotatory inertia and shear deformation effects on structural vibrations of Timoshenko beams and frameworks using matrix formulation
09 p1770 A70-22257

Four point supported square plate fundamental frequency by finite difference and energy methods
09 p1770 A70-22389

Self excited vibrations in balanced vertical shaft running on plain lubricated bearings, making numerical analysis of small perturbation transition to fully developed swirl
09 p1690 A70-22399

Vibration of thin bodies subjected to large angle attack in hypersonic flow, discussing curved bodies method to reduce problem to steady state flows
09 p1771 A70-22445

Longitudinal vibrations propagation in nonlinear elastic beam under harmonic kinematic disturbance solved by harmonic linearization method
09 p1773 A70-22541

Truss vibrations calculations by method of dynamic rigidities, describing numerical methods for solving frequency equation to save computer storage capacity
09 p1773 A70-22546

Longitudinal vibration of finite viscoelastic rod with changing boundaries under time-variant force, analyzing impulse response by transform calculus
09 p1777 A70-22833

Stetson-Powell time fringe hologram technique of vibration analysis applied to nodal patterns in compressor blade and turbine disks
09 p1679 A70-22979

Turbine blade vibration measurement by contactless discrete-phase method, discussing sensor positioning for displacement amplitudes and flutter speeds determination
09 p1681 A70-23199

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect
09 p1766 A70-23239

Rotating cantilever beams mounted on disk periphery, analyzing forced and free vibrations characteristics
09 p1781 A70-23283

Flat rectangular elastic body stable oscillations with clamped base under compression loads, deriving difference scheme for approximation
09 p1782 A70-23297

Torsional vibrations frequency calculations for multibeam system exhibiting linear rigidity and viscous damping, constructing algorithm for digital computer
09 p1783 A70-23409

Centrifugal forces and nonuniform heating effect on natural vibration frequencies of circular plates using lumped parameter method
09 p1784 A70-23588

Elastic chain systems stability and natural vibrations using parameter coupling method permitting integral equation construction
09 p1784 A70-23596

Beam vibration eigenfunctions with allowance for shear compliance used to determine beams dynamic stability under pulsating axial load
09 p1785 A70-23600

Nonlinear many degrees of freedom systems steady state forced vibrations analysis, expressing response in nonlinear normal coordinates
10 p1954 A70-24010

Nonautonomous boundary value problems for plates in plane and three dimensional supersonic flows, obtaining eigenfunctions of vibration by Laplace transform
10 p1956 A70-24118

Energy dissipation-fatigue strength relationships during vibrations for prestained metals and alloys
10 p1956 A70-24244

Amplitude dependence of Young modulus defect in metals during large stress HF oscillations
10 p1956 A70-24247

Large amplitude free vibration of heated circular plates, analyzing energy equations by successive approximation method and elliptic integrals
10 p1957 A70-24480

Linearization of elastic forces in vibration system with percussion
10 p1958 A70-24516

Numerical analysis of forced parametrically excited plate vibration in plane supersonic flow, using digital computer
10 p1958 A70-24527

Synchronous harmonics generation of sinusoidal signal with given frequency for vibration analysis of linear and nonlinear structures
10 p1860 A70-24550

Uniform beams flexural vibration natural frequencies approximate calculation showing effect of shear flexibility and rotatory inertia
10 p1959 A70-24562

Transverse vibrations of rods, plates and shells based on hyperbolic, circular and Bessel functions
10 p1959 A70-24586

Soviet book on vibrations of complex oscillatory systems with mechanical, pneumatic and electromagnetic couplings
10 p1959 A70-24650

Aerospace vehicles structural vibration environments prediction methods emphasizing vibration sensor mounting resonances
10 p1959 A70-24903

Beams stability under flexural stress with periodic intensity variations, deriving differential equation of motion
10 p1960 A70-24973

Free vibration analysis of elastic structures using Rayleigh-Ritz method and finite element methods
10 p1961 A70-25055

Hysteretic linear damping theory applied to representation of structural damping under harmonic excitation
10 p1961 A70-25060

Forced vibrations of cylindrically curved multispan shell structures, using transfer matrix methods
10 p1962 A70-25062

Space vehicle residual thrust oscillation and dynamic response using power spectral density functions from flight data
10 p1953 A70-25068

Launch load simulation on scaled vibration model concerning Saturn 5 structural integrity and flight failure
10 p1953 A70-25072

Two-disk flexible rotor balancing method based on shaft vibration and bearing forces analysis
10 p1896 A70-25093

Truncated, structurally orthotropic and round conical shell oscillations taking into account reinforcing ribs eccentricity
10 p1964 A70-25195

Support vibration effect on zero shift of damped vertical pendulum, using equivalent linearization with perturbation scheme
10 p1917 A70-25205

Multilayer plate vibrations calculated with allowance for energy dissipation in material, deriving equations of motion
10 p1965 A70-25297

Statistical energy concepts application to Mariner Mars 1969 spacecraft, estimating coupling of damping factors to analyze structural vibration
11 p1218 A70-25374

Monograph on conditions for stabilization of oscillatory systems with random parametric excitations covering approximate calculations, stability concept definition, etc
11 p1219 A70-25496

Three degrees of freedom astatic gyroscope drift due to base vibrations according to harmonic law
11 p2048 A70-25579

Natural vibrations of truss systems of four circular cylinders hinged along walls, using linear group representation
11 p1232 A70-25605

ARAVA aircraft free-free vibrational characteristics evaluation by integral-aircraft lumped mass analytical method verified by ground resonance test
11 p1979 A70-25688

Crack propagation in tensioned plates subjected to sonically induced vibrations
11 p1233 A70-25731

Boundary conditions effect on bending, vibrations and buckling of unsymmetrically laminated rectangular plates
11 p1236 A70-26079

Vibration of thin elastic plates under random driving forces simulated digitally, using power residue method for pseudorandom number generation
11 p1239 A70-26277

Multidegree of freedom linear vibrating system analysis by dividing differential equation method
11 p1239 A70-26414

Vibrations of combination of cylindrical shells and circular plates, giving bending moment distribution
11 p1239 A70-26415

Random vibration isolation for two degrees of freedom model system investigated statistically, assuming wide band white noise
11 p1239 A70-26416

Vibration equations for closed and open sandwich cylindrical shell with thickness-shear deformation in core and face layers compared with membrane theory
11 p1245 A70-26697

Metal plates vibration under viscoelastic damping layers using electromagnetic transducer and impact excitation
11 p1245 A70-26702

Lunar Orbiter spacecraft vibration responses based on mathematical models, comparing results with experiment
12 p2315 A70-27098

Limited frequency range analytical model for predicting mass and stiffness changes effect on natural frequencies and normal modes
12 p2317 A70-27121

Complex structures vibration using component vibration modes, considering dynamic behavior from interface reactions effects
12 p2317 A70-27123

Subdivisional method for linear systems vibration and buckling problems, reducing governing equation to ordinary differential equation with variable coefficients
12 p2320 A70-27145

Longitudinal vibrations of circular elastic homogeneous cylinders with end restraints
12 p2321 A70-27152

Three dimensional variational dynamic and static large deformation equations solutions for stability and natural frequencies and wave propagation in bodies under initial strains
12 p2322 A70-27331

- Vibrating thin beam cross sectional displacement-force equations coefficients included in coefficient matrix, considering shear deformation and rotary inertia effects on vibration modes 12 p2324 A70-27397
- Elastic beam vibration under constant amplitude and varying frequency periodic forces during passage through resonance 12 p2326 A70-27798
- VTOL and STOL design and operation, discussing noise and vibration reduction 13 p2344 A70-28544
- Rotorcraft design and aerodynamics, discussing structural vibrations and all-weather operation 13 p2344 A70-28545
- Vibrocreeper effect on Al-Mg-Si alloy vibration frequency and mean and maximum stress at constant temperature 13 p2512 A70-28980
- Pitch damping derivatives computation for missile configurations undergoing small amplitude oscillations at subsonic speeds, using static aerodynamic data [AIAA PAPER 70-537] 13 p2339 A70-29004
- Eigenvalue and eigenvector derivatives in dynamic system designs involving vibrations and oscillations, discussing applications in modeling 13 p2518 A70-29971
- Gutenberg-Bullen interior model applied to fading of earth spheroidal oscillations 14 p2568 A70-30153
- First and second boundary value problems of steady vibrations of viscoelastic bodies reduced to algebraic equations 14 p2657 A70-30720
- Turbulent boundary layer loading function for use with finite element structural analysis system applied to elastic aircraft structures random vibration [AIAA PAPER 69-20] 14 p2658 A70-30853
- Plane frames with and without shear walls, determining dynamic response under vibration by finite element method 14 p2660 A70-31137
- Pontryagin principle for thin vibrating plates under mixed boundary conditions, examining optimal control 14 p2660 A70-31205
- Differential equations for coupled bending and torsional vibrations of slender beam in centrifugal force field 14 p2661 A70-31226
- Cylindrical shell nonaxisymmetric vibration frequencies and boundary values relation, using Lagrangian 14 p2661 A70-31273
- Natural oscillation frequencies in rectangular shallow shells weakened by cuts, using summary representations method for eigenvalues determination 15 p2814 A70-31585
- Differential equation for longitudinal vibrations of rod at high temperature, giving asymptotic solution 15 p2814 A70-31589
- Natural oscillation frequencies of shallow shells with mixed boundary conditions on clamped edges, using summary representations method 15 p2814 A70-31590
- Rarefaction wave analytical construction by successive approximation, solving hyperbolic equations for longitudinal vibrations of rods 15 p2815 A70-31644
- Transverse vibration of thin circular elastic turbine disk of variable thickness rotating axially at constant angular velocity 16 p2916 A70-32994
- Clamped skew plates influence coefficients, natural vibration frequencies and nodal patterns measurement, comparing to Galerkin method results 16 p2988 A70-33124
- Constrained and constant coefficient optimal controls compared in optimizing performance criteria of vibrating beams 16 p2886 A70-33332
- Linear continuous vibratory system unknown parameters identification from frequency response data 16 p2988 A70-33337
- Saturn 5 S-2 stage propellant feedlines and J-2 engines simulating structural longitudinal oscillation by analog computer 16 p2968 A70-33591
- Annular fluids hydrodynamic mass and damping effects on long rotating cylinders vibrations, discussing theory of fluid friction and forces, vortex and turbulent flows, etc [ASME PAPER 70-FE-30] 16 p2892 A70-33636
- Annular fluids hydrodynamic mass and damping effects on long rotating cylinders vibrations, analyzing test results [ASME PAPER 70-FE-31] 16 p2892 A70-33637
- Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method 16 p2991 A70-33854
- Stress, strain and acceleration spatial variation in structures subject to broad frequency band vibration excitation, considering simply supported flat plate 16 p2992 A70-34017

- Plane strain vibrations of two layered elastic cylinders, analyzing results for lobar mode numbers 2, 3 and 4 16 p2994 A70-34096
- Transversely isotropic elastic plates vibrations without initial specification of field variables spatial dependence on thickness coordinate by two dimensional asymptotic theory 16 p2994 A70-34232
- Free oscillations of Euler-Bernoulli and Timoshenko cantilever beams of variable cross section, obtaining approximate modes and natural frequencies bounds 16 p2994 A70-34234
- Statistically indeterminate Timoshenko beams oscillations natural frequencies and modes by lumping properties of linear and rotary inertia at discrete points 16 p2994 A70-34235
- Free and forced vibrations of linear systems, dissipative systems with nonlinear friction, aeroelastic vibrations, rotor vibrations, mode locking, random vibrations, etc 16 p3004 A70-34277
- Neutral type differential equations transformation to time lag system making periodic vibrations existence and stability theorems applicable 16 p2944 A70-34282
- Mechanical vibrations models and analysis techniques, emphasizing problem of weak couplings in discrete systems 16 p2996 A70-34290
- Frequency analysis of cylindrically curved panel with clamped and elastic boundaries, using mathematical and panel models 17 p3181 A70-34524
- Hingeless rotor helicopter airborne and ground resonance characteristics, noting feedback stability control interference with rotors aerodynamic damping 17 p3015 A70-34733
- Helicopter vibration reduction techniques, considering antivibration devices design and comfort crossover speed increase 17 p3015 A70-34735
- Time-average holographic interferometry applied to HF transverse vibrations of uniform cantilever beam, noting correlation with Timoshenko beam theory 17 p3083 A70-34961
- Nonlinear vibrations of beam harmonically excited by periodic motion of supporting base, using Galerkin method 17 p3185 A70-34962
- Radial vibration frequency variation with wall thickness in hollow spherical shells, tabulating and plotting results 17 p3186 A70-34978
- Turbine blades vibrations based on thick curved shell theory, deriving element from isoparametric solid 17 p3187 A70-34989
- Engineering components vibration mode studies by time averaged holographic interferometry 17 p3087 A70-35019
- Vibrating structure mathematical model for predicting radiated noise level 17 p3187 A70-35169
- High intensity noise enveloping space vehicle as distributed excitation, examining correlation effects on structural response 17 p3059 A70-35170
- Matricial group representation theory for constructing elastic vibration equations of symmetric flexible mobile controlled members 17 p3180 A70-35293
- Natural vibrations of complex plates for combined free and clamped conditions 17 p3189 A70-35343
- Structural vibration test system, using hybrid computer for automatic control and data acquisition and reduction 17 p3061 A70-35488
- Unsymmetric vibrations of cylindrical shells, analyzing stress states by asymptotic method 18 p3335 A70-36059
- Incompressible fluid flow past array of arbitrary profiles vibrating with arbitrary phase shift, taking into account blade displacement and vortex wake effect 18 p3206 A70-36277
- Longitudinal wave absorbers attenuating resonance vibrations in rods and plates 18 p3337 A70-36304
- Automatic matrix method for vibration modes of large structures with multiple degrees of freedom 18 p3342 A70-36684
- Vibration characteristics of low aspect ratio compressor blades, using thin shell theory and Rayleigh-Ritz method 18 p3305 A70-36876
- Soviet book on vibration and balancing of aircraft engine rotors covering structural deformation and dynamics of turbine engines and compressors 19 p3489 A70-37237
- Nonhomogeneous Helmholtz vibration equation for sectorial-annular membranes and plates under arbitrary load, using Fourier method 19 p3535 A70-37343
- Energy dissipation in material under complex vibrations, noting role of summary shear stress 19 p3535 A70-37347
- Rib stiffened elliptical and circular plate vibrations, determining fundamental frequencies by variational techniques 19 p3536 A70-37693
- Constrained viscoelastic layer optimal length for vibration damping of metallic structures 19 p3536 A70-37696
- High intensity noise testing of missile and spacecraft structures, simulating acoustically induced vibrations due to aerodynamic turbulence 19 p3531 A70-37697
- WKB or eikonal approximation for waves and vibrations in inhomogeneous Euler-Bernoulli beams and plates and Timoshenko beams 19 p3536 A70-37700
- Satellite structural vibration damping material and methods, discussing high polymer synthetics and viscoelastic laminae and damping systems data 19 p3533 A70-38291
- Anticlastic bending analysis of long narrow plates oscillations and stability based on elastic plates nonlinear theory 20 p3721 A70-39779
- Vibrating plate thickness function, applying eigenvalue problem 20 p3726 A70-39877
- Structural vibration tests, analyzing errors due to couplings and dampers addition 20 p3734 A70-40439
- Natural flexural vibration frequencies of bars with periodic thickness variations, comparing Hamilton principle, matrix approach and experimental investigations 20 p3735 A70-40536
- Dynamic response of simply supported nonhomogeneous beam and triangular pulse loads 21 p3933 A70-40584
- Rotating shaft system consisting of variable cross sections, disks and journal bearings, calculating unbalance vibration by numerical method 21 p3832 A70-40898
- Linearly elastic skeletal structures, calculating natural frequencies of undamped vibration by computer program 21 p3935 A70-41254
- Solid and sandwich beams lateral vibrations under transverse shear, rotary inertia and variable midplane stretching 21 p3938 A70-41761
- Quasi-harmonic friction induced near sinusoidal form vibration, calculating amplitude dependence on sliding velocity [ASME PAPER 70-LUBS-16] 22 p4044 A70-42445
- Steady vibrations of mechanical system with asymmetrical restoring force, reviewing formulas for mean angular frequency and Fourier expansion coefficients 22 p4113 A70-42544
- Acoustic frequency spectra of transverse vibrations in bracketed bar caused by dry friction, using Lagrange method 22 p4073 A70-42612
- Circular plates dynamic stability under variable periodic loads, using differential equations of vibrational motion for median surface 22 p4114 A70-42613
- Axisymmetric vibrations of cylindrical shell with concentric circular plates at each end, obtaining Lagrangian of combined system 22 p4115 A70-42843
- Linear elastomechanical systems natural vibration parameters by harmonic excitation method 22 p4116 A70-43200
- Elastic bending, vibration and buckling of simply supported thick orthotropic rectangular plates and laminates 22 p4116 A70-43205
- Equations solution for turbine blade flexural vibration, considering internal friction 22 p4117 A70-43363
- Vortex induced vibration problems, deriving mathematical model for periodic lift on circular cylinder 22 p3960 A70-43546
- Data acquisition and processing in structural model characteristics analysis during ground resonance tests [ICAS PAPER 70-36] 23 p4267 A70-44133
- Rigid and elastic rectangular plates vibration under uniformly distributed dynamic load, investigating bending behavior by Galerkin method 23 p4268 A70-44170

- Minimum weight structural design within given stress limits due to different loads or natural frequency vibrations, using finite element method for structural analysis 23 p4268 A70-44226
- Mechanical structure dynamic response to vibration environment, using mobility method analysis 23 p4269 A70-44334
- Point accelerations on semirigid body spacecraft from accelerometer data with structural vibration noise at landing 23 p4200 A70-44387
- Axisymmetric vibration modal properties/frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences 23 p4270 A70-44501
- Gradient minimization and higher order discrete elements application to shell buckling and vibration eigenproblems, using 48 degree of freedom Bogner cylindrical panel element 23 p4271 A70-44705
- Structural eigenvalue problems solved by sparsely populated matrices for structural vibrations and critical buckling, using finite element method 23 p4271 A70-44708
- Stress, buckling and vibration analysis of shells of revolution by numerical integration and finite difference methods, summarizing computer programs 23 p4273 A70-44725
- Heat exchange during flat plate transverse vibrations in water, discussing frequency and amplitude effects and natural convection role 23 p4282 A70-44728
- Orthogonality of eigenmodes of aircraft vibrations based on F-104G ground measurements 23 p4274 A70-44766
- Oscillating vane and rotating disk pressure gage theory, considering gas damping and density variations 23 p4198 A70-44948
- Rectangular cable networks covered by or embedded in membrane matrix, calculating vibration response under load by Galerkin method 24 p4421 A70-45279
- Coriolis acceleration effect on inplane vibration resonant frequencies of rotating disks 24 p4425 A70-45780
- Saturn 5 Apollo booster stages oscillations induced by coupling between vehicle structure and engine thrust corrected within existing systems [AIAA PAPER 70-1236] 24 p4417 A70-45954
- STRUCTURAL WEIGHT**
- Economic tradeoffs in airport and commercial aircraft design, considering traffic growth, increased weight impact minimization and costs [AIAA PAPER 69-1087] 01 p0056 A70-10623
- Bird impact damage effect on aircraft structural design, considering forward facing areas and minimum weight 01 p0200 A70-10687
- Minimum weight sandwich plates complying with von Mises criterion, providing constant dissipated energy density 01 p0202 A70-10947
- Quick-disconnect couplings selection guide for aerospace fluid systems, emphasizing functional and weight considerations [SAE-AIR-1047A] 01 p0197 A70-11461
- Deployment systems for extending large area lightweight flexible solar arrays in space, tabulating estimated design weights including power-weight ratios 02 p0228 A70-11932
- Functionally integrated superheterodyne receivers design by applying microwave IC technology, providing weight reduction, interconnecting cables elimination and circuit interface problems minimization 02 p0267 A70-12055
- Wide strut analysis for determining weight minimizing cross sectional dimensions of panels having unflanged integral stiffeners 03 p0596 A70-14145
- Aircraft structural weight optimization for given fundamental vibration frequency obtained by aeroelastic constraints 03 p0598 A70-14231
- Pontryagin principle applied to minimum structural weight design problem in optimal control theory with state and control inequality constraints [ASME PAPER 69-WA/AUT-1] 04 p0769 A70-14832
- Performance characteristics analysis of large area roll-up solar arrays based on support structure size and weight [ASME PAPER 69-WA/ENER-11] 04 p0770 A70-14898
- V/STOL power drive systems structural efficiency, comparing mechanical and pneumatic components from weight-optimal viewpoint [ASME PAPER 69-WA/AV-7] 04 p0622 A70-14901
- Rectangular waffle plates minimum-weight design efficiency with multiple rib sizes in stiffening direction compared to honeycomb core sandwich construction 04 p0777 A70-15526
- Airframe production factors involving choice of materials and fabrication methods, emphasizing weight reduction to increase payload 05 p0854 A70-15925
- Minimum weight beams and frames calculation for random loads taking into account material carrying capacity 07 p1400 A70-18821
- Minimum weight reliable beams and frames calculation for random loads, using one degree of freedom system to obtain closed form solution 07 p1401 A70-18825
- Minimum weight design of elastic sandwich beams with deflection constraints using n-dimensional space of discretized bending stiffness 07 p1407 A70-19358
- Hole reinforcement in flat plate under uniaxial load with high stress region at boundary, resulting in weight savings 07 p1414 A70-20174
- Structural composite materials for thermal protection of reusable weight-saving vehicles in space transportation system 07 p1397 A70-20382
- Statistical analysis of model parabolic mirror rigidity on multisupported suspension under symmetrically distributed load represented by mirror weight 08 p1586 A70-21057
- Minimum weight design for two dimensional bodies with given load system determined by variational method 09 p1771 A70-22400
- Weight function minimization of multiweb box beam in pure bending 09 p1777 A70-22769
- Lightweight mirror blanks of titanium silicate for OAO-4 providing thermal and dimensional stability 09 p1678 A70-22952
- Prestressing in minimum weight design of statically indeterminate structures 09 p1781 A70-23231
- Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability 09 p1743 A70-23248
- Minimum weight design for symmetrically stiffened cylindrical shells under compression based on linear orthotropic stability theory 10 p1958 A70-24560
- Optimal traction drive system design for lunar roving vehicle, considering weight, energy consumption, operational flexibility, power supply, motor and power train 11 p2030 A70-25375
- Working pressure effects on size and weight of aircraft hydraulic systems components, allowing for fluid properties change 11 p1982 A70-25865
- Low cost lightweight flight control systems for business aircraft providing equivalent performance to larger equipment [SAE PAPER 700213] 11 p2079 A70-25886
- Computerized tradeoff analysis for planetary landing vehicle entry capsule and lander design optimization, emphasizing weight allocation for Mars 1973 missions 11 p2126 A70-26320
- Limited frequency range analytical model for predicting mass and stiffness changes effect on natural frequencies and normal modes 12 p2317 A70-27121
- Waffle plate structures least weight design under uniaxial, biaxial and multiple combined loading with various stiffening patterns, investigating pyramiding concept 12 p2318 A70-27133
- Aircraft all-movable stabilator computer aided design for optimized structural weight and performance 12 p2319 A70-27137
- Stiffened fiber composite cylindrical shells minimum weight design, discussing configuration and material parameters 12 p2319 A70-27139
- Aerojet engine minimum weight design, suggesting use of welding and brazing instead of nut-and-bolt joints in component fabrication [SAE PAPER 700319] 12 p2243 A70-27457
- Bendix design approach for lunar vehicle using operating mockup, noting trend towards lighter machines 12 p2208 A70-27945
- Aluminum-boron composite material applications to structural components of F-106 aircraft, noting weight saving and mechanical properties [AIAA PAPER 68-975] 12 p2257 A70-28082
- Radioisotope fueled organic Rankine power system with weight dependence on operations depth [AIAA PAPER 70-520] 13 p2349 A70-29037
- Minimum weight design for complex structures subject to frequency constraint using finite element method and computer program 13 p2517 A70-29965
- Short haul Mercure airliner weight saving design and manufacture 14 p2593 A70-31371
- Mercure passenger aircraft development schedule, cost, delivery and features, emphasizing weight balance and convenience 15 p2676 A70-32365
- Solar thermoelectric generator /STEG/ with two stage converter, discussing weight factors and efficiency 15 p2678 A70-32425
- Multistage rocket weight optimization for payload and velocity at burnout, considering specific impulse, drag, etc 15 p2813 A70-32519
- Homopolar Inductor Alternators of minimum weight and maximum efficiency for aerospace power supplies 15 p2710 A70-32587
- Joint design for fiberglass reinforced plastic aircraft composites regarding minimum weight and reliability [ASME PAPER 70-DE-56] 16 p2989 A70-33516
- Unmanned electric propulsion spacecraft with external fuel and flashlight thermionic reactors, discussing thruster arrays, weight and performance for reference Jupiter orbiter mission [AIAA PAPER 70-644] 16 p2966 A70-33547
- Throttleable thruster system for Mars soft landing, selecting catalytic decomposition engine from system weight and performance studies [AIAA PAPER 70-652] 16 p2966 A70-33549
- Weight-dimensions correlation for gas turbine engine/airplane optimization analyses, determining tradeoffs among performance, noise, drag characteristics, etc [AIAA PAPER 70-669] 16 p2967 A70-33575
- Minimum weight springs design, discussing load deflection curves, materials resilience, etc 16 p2924 A70-34171
- Ti alloy forgings for aircraft industry, utilizing high strength/weight ratio 17 p3097 A70-34357
- Ti alloys use in Olympus 593 engine for Concorde SST, discussing weight saving, mechanical properties and manipulation characteristics 17 p3146 A70-34449
- Optimum fiber orientation for minimum weight boron/epoxy shear panel design 17 p3182 A70-34562
- Helicopter structural weight statistical prediction and evaluation, discussing comparable fixed wing experience 17 p3015 A70-34728
- Packable near weightless nylon cloth wings without rigid members for improved aeronautical efficiency in cargo delivery, powered flight and rocket and spacecraft recovery [AIAA PAPER 70-880] 17 p3017 A70-34815
- Structural weight reduction and increased aerodynamic efficiency in aircraft design by including flight control technology early in configuration development phase [AIAA PAPER 70-874] 17 p3017 A70-34817
- Static weight tare compensation for V/STOL wind tunnel models, using accelerometer outputs 17 p3062 A70-35500
- Subsonic aircraft size effect in conventional design, discussing increased weight increments and economic gain rate [AIAA PAPER 70-940] 17 p3021 A70-35849
- Postbuckled integrally stiffened wide column weight optimization, developing stress equation 18 p3339 A70-36447
- Minimum weight design for structures with stability constraint by nonlinear programming 18 p3344 A70-37068
- Space shuttle development, discussing weight and lateral separation distance 19 p3531 A70-37378
- Minimum weight thermoelastic design of sandwich beam for given deflection, using potential energy principle 19 p3541 A70-38044
- Composite technology effects on engineering design, emphasizing carbon-carbon materials for aircraft structural weight reduction, performance improvement and high temperature applications 20 p3653 A70-39202
- RF plasma thrusters for synchronous satellites, estimating weights and efficiencies of various types 20 p3689 A70-40124
- Shape factors for weight prediction and design optimization of structural members requiring given area moment of inertia [SAWE PAPER 828] 20 p3732 A70-40354
- Structural weight design optimization by computer aided geometrical programming technique [SAWE PAPER 822] 20 p3733 A70-40357
- Material thickness tolerances control for weight minimization of aerospace vehicles by abrasive metal grinding, improving surface quality [SAWE PAPER 827] 20 p3638 A70-40358

- Landing gear weight analytical estimation, discussing ground loads, member cross sectional area, parametric variations, etc
[SAWE PAPER 829] 20 p3563 A70-40366
- Fuselage frames minimum weight analysis by automatic iterative method
[SAWE PAPER 826] 20 p3733 A70-40370
- Structural mass properties solution using programmable printing desk computer for fast data point plotting
[SAWE PAPER 856] 20 p3595 A70-40372
- Computerized assembly of production space vehicle with controlled mass properties, discussing automated system of data collection, storage and retrieval
[SAWE PAPER 851] 20 p3639 A70-40375
- Space shuttle with reusable launch system, discussing payload sensitivities regarding orbiter and booster weight and engine reliability
[SAWE PAPER 849] 20 p3716 A70-40377
- Fighter aircraft configuration design balancing, comparing weight penalties
[SAWE PAPER 840] 20 p3563 A70-40380
- Parachute flexibility as performance parameter, discussing stiffness-weight index, inflation process, squidding, etc
[AIAA PAPER 70-1166] 21 p3755 A70-41845
- Optimal weight design of axisymmetric rotating elastic disks for specific edge radial displacement
22 p4112 A70-42463
- Weight-optimal sandwich beam design for given static deflection, using energy approach
22 p4113 A70-42535
- Concorde downstream thrust reversal nozzle, noting weight saving by use of welded stainless steel honeycomb construction
22 p4092 A70-43213
- V/STOL aircraft landing performance, discussing relationships between approach speeds, rates of descent, structural criteria and weight penalties
[ICAS PAPER 70-53] 23 p4139 A70-44149
- Minimum weight structural design within given stress limits due to different loads or natural frequency vibrations, using finite element method for structural analysis
23 p4268 A70-44226
- Optimal design of minimum weight bar and beam structures under static loads, comparing computer time with nonlinear programming methods
23 p4271 A70-44702
- Materials design and development for engineering applications, discussing relationships and importance of strength, stiffness, weight, toughness and work of fracture
24 p4419 A70-45174
- Elastic circular sandwich beams optimal design for minimum compliance and given weight, considering rings and semicircular arches
24 p4420 A70-45276
- Aircraft design for low weight, discussing structural failures
[AIAA PAPER 70-1232] 24 p4425 A70-45917
- STRUTS**
- Structural support strut design for cryogenic propellant tanks to optimize load carrying capability and heat transfer characteristics
02 p0306 A70-11942
- Dynamic stress concentration factor in strut containing symmetrically located elliptical discontinuity, using photoelastic technique with modulated ruby laser light source
02 p0388 A70-12495
- Wide strut analysis for determining weight minimizing cross sectional dimensions of panels having unflanged integral stiffeners
03 p0596 A70-14145
- Differential equations solution in terms of elementary functions applied to evaluate critical buckling loads for struts of variable cross sections
03 p0602 A70-14328
- Stresses in dynamically loaded struts with one or three holes by photoelasticity, using Fastax camera
12 p2315 A70-26878
- Semiclamped strut supported rectangular plate deflection determined holographically, mechanically and analytically
[SESA PAPER 1650] 15 p2740 A70-32331
- STUDS [STRUCTURAL MEMBERS]**
- Stress distribution along stud hole threads in Al case, investigating stud design effect using strain gauge on models
03 p0585 A70-12962
- Mechanical methods locking studs, discussing chemical locking based on hardening of resins by polymerization
06 p1076 A70-17437
- STURM-LIOUVILLE OPERATOR**
- U STURM-LIOUVILLE THEORY**
- STURM-LIOUVILLE THEORY**
- Linear physical chains with Sturm-Liouville characteristic polynomials used for natural frequency determination of coupled harmonic oscillators or electrical analog
01 p0142 A70-10520
- Sturm-Liouville problem associated with Falkner-Skan equation, obtaining asymptotic solutions
03 p0520 A70-14080
- Book on some methods of solving boundary value problems of mathematical physics covering linear operators, boundary conditions, perturbation and Monte Carlo methods
07 p1326 A70-19696
- Transient thermal stresses in spherical shell with distributed source and general Sturm-Liouville boundary conditions
19 p3539 A70-37800
- Whole operator with infinite defective numbers for Sturm-Liouville differential equation, describing spectral functions
23 p4210 A70-43977
- STYRENES**
- NT POLYSTYRENE**
- Flame-resistant trichloromethyl-containing polyester-styrene system, describing curing characteristics at room and higher temperatures
10 p1907 A70-24066
- Styrene-oxygen copolymer preparation methods, discussing burning rates for rocket solid propellants mixtures with ammonium perchlorate
11 p2100 A70-26146
- SUBCARRIER WAVES**
- U CARRIER WAVES**
- SUBCIRCUITS**
- U CIRCUITS**
- SUBCOOLING**
- U SUPERCOOLING**
- SUBCRITICAL FLOW**
- Dynamic behavior of subcritical fluid flow past airfoils, expanding flow potential to obtain formulas for velocities, local Mach numbers and pressure
08 p1433 A70-21173
- Plane diffuser grid profiles for subcritical velocities of oncoming flow, using wind tunnel test data
18 p3205 A70-36129
- Subcritical and supercritical boundary layer problems, reviewing various momentum integral solution methods
18 p3242 A70-36705
- Subcritical viscous flow around arbitrary airfoils, calculating boundary layer effect on pressure distribution from inviscid flow approximation
21 p3744 A70-40924
- Stationary elliptic cylinders in subcritical flow, determining Strouhal number, pressure fluctuations and wake geometry as functions of angle of attack
[AIAA PAPER 69-745] 23 p4134 A70-44564
- SUBDIVISIONS**
- Subdivisional method for linear systems vibration and buckling problems, reducing governing equation to ordinary differential equation with variable coefficients
12 p2320 A70-27145
- SUBGRAVITY**
- U REDUCED GRAVITY**
- SUBHARMONIC GENERATORS**
- Tunnel diode parametric phase locked oscillators as memory elements, considering optimum subharmonic pumping frequencies determination
08 p1477 A70-21642
- SUBLATTICES**
- U LATTICES [MATHEMATICS]**
- SUBLAYERS**
- U SUBSTRATES**
- SUBLIMATION**
- Equilibrium existing at gaseous-condensed phases interface inferred as mechanism for dissociative sublimation of ammonium perchlorate
05 p0894 A70-17079
- Caloric data determining saturated vapor pressure of nitrogen tetroxide and heat of sublimation for sublimation curve
07 p1358 A70-19206
- Ammonium perchlorate decomposition, deflagration, sublimation, crystal growth and surface properties, using scanning electron microscope
07 p1358 A70-19576
- Surface erosion of sublimating graphite and naphthalene due to nonequilibrium mass transfer in gas flows
13 p2437 A70-28580
- Vaporization characteristics of solids for relationship between chemical bonding and sublimation mechanism emphasizing NaCl, CdS and GaAs
14 p2545 A70-30906
- Teflon and polymethyl methacrylate sublimation breakdown in plasma jets, using electric arc heated argon, nitrogen, air and oxygen
15 p2765 A70-32103
- Martian soil thermal conditions at south pole, considering solar cap annual variations and carbon dioxide sublimation
15 p2802 A70-32492
- Radiative energy loss and wall sublimation effects on gas flow parameters behind reflected strong plane shock wave, taking into account small disturbances
18 p3348 A70-36673
- Plane wall surface sublimation under radiation from shock wave heated gas
18 p3348 A70-36721
- Aerospace coldness and vacuum simulation, discussing uses of cryogenic, titanium sublimation, ion and molecular pumps
19 p3396 A70-37462
- Porous matrix explosions during sublimation of dusty ice with nonvolatile particles
19 p3471 A70-37659
- Knudsen effusion measurements of stoichiometric MnTe sublimation at high temperature and low pressure
21 p3773 A70-41273
- Surface ablation patterns in sublimating materials tested in high temperature structures tunnel
21 p3951 A70-41755
- Martian soil thermal conditions, considering polar cap annual variations and carbon dioxide sublimation
23 p4240 A70-43914
- SUBMARINE CABLES**
- Wideband transmission media for global communication networks, comparing submarine cables and satellites based on economic tradeoff in terms of circuit density and distance
[AIAA PAPER 70-444] 11 p2001 A70-25475
- SUBMARINES**
- Aerospace technology contributions to oceanography, discussing lightweight structures, electronics, automatic systems and submarine laboratory application
07 p1263 A70-19135
- Ben Franklin submarine life support systems tested during Gulf Stream Drift Mission, discussing atmosphere control, water, waste and food management
[ASME PAPER 70-DE-60] 16 p2852 A70-33515
- SUBMERGED BODIES**
- NT DIVING [UNDERWATER]**
- Spatial correlation effect of unsteady sectional loads in axial direction on average or apparent loads over finite region of circular cylinder immersed in moving fluid
11 p2036 A70-26148
- Heat exchange during flat plate transverse vibrations in water, discussing frequency and amplitude effects and natural convection role
23 p4282 A70-44728
- SUBMERGING**
- Water immersion for weightlessness simulation, presenting annotated bibliography covering physiological responses, human performance and simulation techniques and facilities
01 p0038 A70-10965
- Control measurements to determine changes in lung volumes, intrapulmonary and intragastric pressure and breathing during submersion in water up to xiphoid process level
01 p0038 A70-10980
- Effect of immersion in thermoindifferent water on circulatory control and work capacity in trained and untrained subjects
02 p0241 A70-12770
- Magnetic field self induction in static fluid-submerged intersecting jet system, calculating required magnetic Reynolds numbers
04 p0726 A70-14541
- Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion
07 p1209 A70-19517
- Human peripheral blood circulation during prolonged underwater activity, showing compensation for high humidity, noise levels, low water temperatures, isolation and confinement
10 p1822 A70-25178
- Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion
11 p1988 A70-26116
- Nonself similar problem of plane submerged fluid jet expelled from annular nozzle, obtaining asymptotic expansion for stream function
15 p2719 A70-31485
- Book on survival in cold water covering physiology and treatment of immersion hypothermia and drowning, thermoregulation, etc
19 p3360 A70-37977
- Preliminary physical training for human water immersion resistance improvement
20 p3576 A70-40196
- High speed radiographic observation of electric arc movement and metal transfer during submerged arc welding
24 p4322 A70-45724
- SUBMILLIMETER WAVES**
- Astronomical studies at millimeter wavelengths, describing radiometer and Fabry-Perot interferometer design for submillimeter range
01 p0185 A70-10975
- Extra-atmospheric submillimeter astronomy, discussing emission observations between IR and RF region and astrophysical-cosmological applications
07 p1387 A70-19643
- Submillimeter wave applications in measurement and communication, developing submillimeter gas maser sources
09 p1676 A70-22784

- Frequency measurement in millimeter and submillimeter ranges, using high quality Fabry-Perot resonator
09 p1680 A70-23141
- Digital wavemeter description using interferometer with parallel plates and automatic frequency readout for submillimeter band
09 p1652 A70-23658
- Cyanide gas lasers design for submillimeter region of electromagnetic spectra
11 p2062 A70-25735
- Germanium, silicon and gallium arsenide point contact and Schottky barrier diodes as submillimeter wavelength detectors and mixers
11 p2017 A70-25736
- Brightness temperature of earth atmospheric emission in submillimeter band at 35 km, describing airborne radiometer
12 p2265 A70-28171
- Submillimeter range HCN gas laser design and characteristics, noting single mode, linear polarization and output power
12 p2250 A70-28180
- Submillimeter astronomy, discussing atmospheric absorption difficulties and principal areas of application
12 p2311 A70-28271
- Millimeter and submillimeter radio waves propagation, outlining molecular and aerosol attenuation in real atmosphere together with transmitters and receivers
13 p2366 A70-29401
- Book on millimeter and submillimeter waves covering generation, transmission, components and detection
14 p2548 A70-30426
- Millimeter and submillimeter waves applications, discussing klystron oscillators for spectral purity and coherence
14 p2548 A70-30427
- Megavolt prebunched electron beam systems for electronic sources in millimeter and submillimeter region, describing microwave accelerators and bunchers
14 p2555 A70-30431
- Submillimeter wave devices with prebunched megavolt electron beams in coupling structures, describing electromagnetic beam couplers
14 p2555 A70-30432
- Pulsed molecular and atomic gas laser sources design for submillimeter region
14 p2593 A70-30433
- Millimeter and submillimeter waves generation as difference frequencies of mixed laser beams
14 p2593 A70-30434
- Millimeter and submillimeter wave receivers, describing detectors, mixers, low noise amplifiers and radiometers
14 p2549 A70-30448
- Submillimeter lasers radiation measurement with n-InSb detectors at liquid He temperature
17 p3107 A70-35109
- Submillimeter wavelength night sky radiation background, observing effects on various cosmic ray phenomena
18 p3308 A70-36330
- Communication network approach to submillimeter wave applications in nondestructive testing, deriving transport equations for EM wave propagation
22 p4028 A70-42591
- ### SUBMINIATURIZATION
- Subminiature three directional cantilever beam accelerometer using semiconductor strain gages
21 p3824 A70-40861
- Subminiature transistor photosensor for direct measurements of capillary blood cell motion
24 p4309 A70-46119
- ### SUBORBITAL FLIGHT
- Legal aspects of suborbital space transports based on air transportation concepts
18 p3350 A70-36661
- Suborbital space transports problem solution by recoverable jet orbital or jet assisted aircraft, discussing implications of Concorde supersonic flight
18 p3350 A70-36663
- ### SUBREFLECTORS
- Shaped-reflector Cassegrainian antenna characteristics calculation, using current distribution method to derive subreflector radiation pattern
02 p0270 A70-12617
- Phase center position of field scattered from hyperboloid subreflector in asymmetric Cassegrain antenna feed system
06 p1019 A70-17557
- Spherical reflector antenna with Gregorian correctors, calculating gain, far field radiation pattern and efficiency as functions of subreflector and feed positions
12 p2200 A70-28052
- ### SUBROUTINES
- Fourth generation systems architecture in microprogramming in terms of control logic, describing inner computer as subroutine processor for controlling interstation communication
08 p1465 A70-20816
- Microstrip circuit design, obtaining dimensions by computer programs incorporating subroutine sets
14 p2561 A70-30922
- NTWO Fortran IV family of subroutines for thermodynamic and transport properties of nitrogen
17 p3195 A70-34746
- ### SUBSETS (MATHEMATICS)
- #### U SET THEORY
- #### SUBSIDENCE
- CAT at subsidence inversion in presence of strong wind shear, noting radar echo pattern as Kelvin-Helmholtz instability indicator
17 p3133 A70-35933
- ### SUBSONIC AIRCRAFT
- Man-computer graphic systems utilization for wing/body aerodynamic design and analysis concept for subsonic vehicles
[AIAA PAPER 69-1130] 01 p0002 A70-10610
- Atmospheric turbulence effects on accelerations experienced by passengers in supersonic and subsonic transport aircraft compared
02 p0325 A70-12219
- Rigid wing subsonic and supersonic civil and military aircraft utilizing aerodynamic lift at takeoff and landing
13 p2344 A70-28543
- Aircraft turbulence penetration performance numerical rating, applying concept to large subsonic jet transports
[AIAA PAPER 70-543] 13 p2347 A70-29074
- Subsonic and supersonic aircraft dynamic loads under conditions of variable atmospheric density
17 p3013 A70-34685
- Subsonic aircraft size effect in conventional design, discussing increased weight increments and economic gain rate
[AIAA PAPER 70-940] 17 p3021 A70-35849
- Subsonic and supersonic transport aircraft design, discussing supercritical wing concept, fuel consumption reduction, composite aircraft structures, short haul transports, etc
17 p3022 A70-35854
- Noise reduction regulations effects on subsonic transport design and configuration
[SAE PAPER 700806] 24 p4290 A70-45876
- ### SUBSONIC FLOW
- Sound generation in axial-flow subsonic turbomachinery, using two dimensional model
[ASME PAPER 69-WA/FE-4] 04 p0735 A70-14785
- Unsteady pressure distributions on elastic swept wing upper and lower sides at high subsonic to transonic flow, investigating torsional and bending vibrations
[DGLR-69-31] 04 p0615 A70-15151
- Inviscid flow problems solution by partial differential equations, considering propagation processes, stratified media, potential, subsonic and three dimensional flows
[DGLR-69-2] 04 p0672 A70-15170
- Fundamental matrix asymptotic forms obtained for supersonic and subsonic three dimensional steady flows past body in uniform stream of viscous thermally conducting fluid
04 p0673 A70-15320
- Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] 04 p0619 A70-15387
- IR crossed beam system for direct density turbulence measurements in mixing region of subsonic air jet
[AIAA PAPER 70-235] 06 p1065 A70-18091
- Lifting surface theory for calculation of steady subsonic and supersonic flow over various wing and airplane configurations, emphasizing finite element load prediction method
[AIAA PAPER 70-192] 06 p0971 A70-18114
- Roshko model cavity solution based on Falkovich method application to two dimensional permanent irrotational flow of subsonic gas jet
07 p1258 A70-19571
- Interference kernel discontinuities in integral equations relating amplitude of angle of attack and pressure distribution on T tail harmonically oscillating in subsonic flow
07 p1416 A70-20210
- Pressure distribution on flat plate resulting from potential incompressible flow interaction between secondary jet and subsonic mainstream
07 p1190 A70-20415
- Aerodynamic characteristics of rotating transverse cylinder in subsonic normal flow from analysis of cylinder vortex system, discussing friction drag coefficient
08 p1431 A70-20720
- Mean flow and turbulent velocity over noise-producing regions of subsonic jet nozzle with and without delta wings
09 p1610 A70-22239
- Axisymmetric nozzles flow regimes with subsonic ejection velocities analyzed by stabilization method, noting role of pressure in nozzle exit section
09 p1660 A70-22440
- Subsonic compressible or incompressible inviscid flow field through turbomachine blade row determined by matrix and streamline curvature methods
09 p1608 A70-23745
- Combustible gas /hydrogen-air/ subsonic and transonic flow past sphere, approximating combustion zone structure by model
10 p1801 A70-24142
- Chaplygin function approximation in subsonic steady gas flow analysis
10 p1909 A70-24293
- NASA-Lewis closed loop MHD low temperature power generator, describing systems performances during subsonic tests
11 p1982 A70-25614
- Annulus wall boundary layer effect on spatial flow in subsonic axial compressors by shearing stresses concept between stream surfaces
11 p1974 A70-25777
- Secondary peripheral air injection effects on subsonic airflow through slotted tube, discussing primary flow, flow separation, static and stagnation pressures and temperature changes
11 p2036 A70-26140
- Plasmapause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow
11 p2047 A70-26796
- Aerodynamic loadings on planar wings in oscillatory subsonic flow determined by collocation for performing Gaussian quadrature integration of pressure and kernel functions
12 p2155 A70-27102
- Subsonic, transonic and supersonic laminar boundary layers acceleration and cooling effects, discussing heat transfer and gas enthalpy
12 p2211 A70-27830
- Specific heat ratio and configuration effects on flow in subsonic, transonic and supersonic sections of Laval nozzle
12 p2159 A70-28233
- Plane, steady, irrotational flow of gaseous subsonic stream bounded by two infinite parallel walls, discussing application to incompressible fluids
13 p2389 A70-29631
- Pressure field due to control surface oscillation in subsonic flow, presenting numerical results for rectangular wing
14 p2528 A70-30295
- Subsonic and transonic gas flow in wake behind finite thickness plate based on Navier-Stokes equations
15 p2719 A70-31484
- Deformable and rigid wings aerodynamic characteristics with subsonic leading and trailing edges, calculating action of gust
15 p2671 A70-31486
- Aerothermopressor experiment in subsonic and supersonic gas flow compared with numerical solutions of equations
15 p2720 A70-31900
- Laminar to turbulent transitions determination in sub-/supersonic flows, reviewing methods based on hot-wire anemometer output signal
[ONERA-TP-841] 15 p2720 A70-31918
- Aerodynamic forces exerted by compressible fluid on airfoil cascade in subsonic potential flow
16 p2833 A70-33075
- Integral model for combustion of metal particle laden jet mixing with subsonic secondary stream in duct, considering air breathing engine design
[AIAA PAPER 70-736] 16 p2964 A70-33490
- Subsonic turbulent boundary layer with mass addition and combustion for combustion effects on velocity profiles in constant pressure and accelerating flows
[AIAA PAPER 70-724] 16 p2997 A70-33498
- Forces on two dimensional oscillating airfoil in subsonic compressible wind tunnel flow, solving partial differential equation for pressure potential by integral transform technique
16 p2839 A70-34248
- Aerodynamic and acoustic characteristics of subsonic and supersonic jets from convergent nozzles with room temperature air supply
17 p3005 A70-34460
- Blunt based right circular cylindrical body at subsonic speed, investigating turbulent near wake in wind tunnel
17 p3006 A70-34463
- Convective heat transfer at solid boundaries in separated and reattached subsonic and supersonic flows, considering booster base heating
17 p3007 A70-34484
- Velocity pulsation spectra in subsonic wakes behind circular disks and sphere, using thermoanemometer with constant filament temperature
18 p3207 A70-36279
- Subsonic flow visualization, using steam and cold nitrogen gas mixture and normal tunnel lighting
18 p3237 A70-36460
- Steady sub and supersonic flow calculations behind receding shock wave, using finite difference scheme
20 p3611 A70-39803

Subsonic air flow around airfoil in wind tunnel, detecting density gradients by pulsed ruby laser holographic visualization

21 p3822 A70-40809

Subsonic channel incompressible gas flow past semiinfinite flat plate base, using flow pattern for cavitation flow

21 p3748 A70-42213

Perfect gas acyclic and cyclic, steady and irrotational motions in subsonic regime around convex profile with constant curvature variation by Chaplygin method

21 p3846 A70-42259

Perfect gas circular subsonic flow around convex obstacle, using hodographic method for boundary problem

22 p3958 A70-42608

Harmonically oscillating wing linearized motion in subsonic flow, calculating generalized aerodynamic forces

22 p4105 A70-43118

Subsonic jet engine intake duct radar cross section calculation using waveguide model

22 p3992 A70-43584

Similarity rules for sinusoidal gust loads on thin two dimensional wing in nonstationary subsonic flows

23 p4131 A70-43970

Aerodynamic problems due to mixed subsonic and supersonic/ transonic flows on swept wings, nacelle lips and helicopter rotor blades [ICAS PAPER 70-14]

23 p4132 A70-44125

Subsonic Ludwig/simple expansion/tube as shock tube for aerodynamic testing, examining flow characteristics

23 p4182 A70-44578

High subsonic and transonic effects on pressure distributions for swept wing with oscillating control surface

23 p4274 A70-44763

Aerodynamic interferences of lifting surfaces harmonically vibrating in subsonic flow

23 p4136 A70-44765

Ducted propeller subsonic rotational flow with free boundaries, presenting second-order partial differential equation solution without linearizing assumptions

24 p4287 A70-45269

Stationary aeroelastic cases studied in subsonic flow range, providing criteria for aircraft design with required flight characteristics

24 p4422 A70-45443

Subsonic flow around bodies of revolution in axial direction, using ALGOL program for numerical calculations

24 p4289 A70-46237

SUBSONIC FLUTTER

Parallel isotropic flat plates vibration and flutter in supersonic/subsonic flow over one surface, observing plane loadings and elastic medium stiffness effects

12 p2316 A70-27104

Low aspect ratio plates flutter analysis for subsonic and supersonic models

16 p2991 A70-33888

SUBSONIC SPEED

Numerical method for calculating gust effect on wing of complex planform at subsonic speeds by converting continuous to discrete processes

04 p0618 A70-15242

Subsonic circular jet noise radiation intensity and directional distribution, based on effects of refraction and Lighthill quadrupole model for aerodynamic noise

05 p0834 A70-16780

Aerodynamic flight characteristics of lifting reentry bodies in subsonic to hypersonic range in wind tunnel tests

06 p1154 A70-17249

Stability derivatives for bodies of revolution at subsonic and transonic speeds [AIAA PAPER 70-190]

06 p0976 A70-18239

Strap-on ferry package for reusable spacecraft and launch vehicles subsonic lift/drag increase

07 p1397 A70-20390

Air compressibility effects on aerodynamic characteristics of slender rectangular wings moving at subsonic speed near earth surface approximated by lifting surface theory

10 p1801 A70-24276

Lift and drag characteristics of flexible parawings at subsonic speeds, predicting angle of attack for trailing edge flutter commencement

12 p2157 A70-28079

Subsonic kernel function applicability limited to surfaces with small inclinations to freestream, considering wing with deflected control surface

12 p2212 A70-28089

Vortex- and Doublet-Lattice methods for calculating aerodynamic lift distributions on surfaces in steady and oscillatory motion at subsonic speeds

13 p2339 A70-29006

Slender wings leading edge vortex flow effect on roll damping at subsonic speeds [AIAA PAPER 70-540]

13 p2339 A70-29007

Intermittent blowdown supersonic wind tunnel as economic test facility covering subsonic test velocity range, discussing data quality [AIAA PAPER 70-581]

13 p2342 A70-29889

Single and twin jet afterbody configuration models, describing drag and interference characteristics at subsonic speeds

14 p2528 A70-30862

Exhaust nozzle model tests at high subsonic Mach numbers, investigating differences in nozzle drag in contrast to engine conditions [AIAA PAPER 70-668]

16 p2967 A70-33573

Subsonic wing theory calculation method, obtaining close solutions for integral expression constants for downward air currents

19 p3352 A70-38164

Reentry bodies of revolution subsonic and supersonic aerodynamic characteristics

20 p3558 A70-39704

Streamers /drag devices/ tests at subsonic speeds, measuring drag dependence on size, weight, shape and velocity

20 p3559 A70-40282

Strap-on ferry package for reusable spacecraft and launch vehicles subsonic lift/drag increase [AIAA PAPER 70-259]

21 p3931 A70-41867

Subsonic high lift cruise wing optimal design using kernel function method of planar lifting surface theory

22 p3959 A70-42709

Downwash angle behind straight wing for unsteady aperiodic flight at subsonic speeds, using vorticity model

22 p3959 A70-42802

Drag estimation for circular cylinders at subcritical Reynolds numbers and subsonic speeds, using Kármán vortex street theory for wake

23 p4131 A70-43894

SUBSONIC WIND TUNNELS

60 cm intermittent blowdown type trisonic wind tunnel, discussing main parts basic dimensions and characteristics determination method, detailing design and construction

01 p0055 A70-10148

Heat transfer in turbulent boundary layer of airflow injected on smooth plate from nozzle in subsonic stepwise heated wind tunnel

01 p0216 A70-11001

Airfoil research in S-10 French wind tunnel for two dimensional flow, noting Reynolds and Mach number ranges [ONERA-TP-766]

08 p1433 A70-21843

Aerodynamic subsonic and supersonic wind tunnels parameter measurement methods including static and total pressure, current direction, velocity, density, etc

09 p1674 A70-22314

Missile aerodynamic characteristics investigation in subsonic low turbulence wind tunnel with three degrees of freedom angular motions [AIAA PAPER 70-578]

13 p2342 A70-29891

Subsonic boundary lift interference in wind tunnels with perforated walls, using point matching method

14 p2563 A70-30869

SUBSTRATES

Thickness measurement of nonmagnetic coatings on magnetic substrates taking into account surface roughness effect

02 p0302 A70-12672

Beam-lead substrate package for six stage TTL shift register, discussing metallization systems for interconnections and beams

02 p0271 A70-12846

Organic substrates effects on Hydrogenomonas eutropha autotrophic and heterotrophic metabolism

10 p1817 A70-24700

Adhesive bonds strength parameters, discussing substrate type, surface preparation, etc [ASME PAPER 70-DE-33]

16 p2939 A70-33504

MIS structures with silicon nitride film deposited by RF glow discharge, observing doping increase in epitaxial substrate

17 p3055 A70-35873

Ni base alloys sulfidation kinetics, examining roles of sodium/sulfur compounds-substrate interactions in accelerated oxidation

20 p3651 A70-40072

Acoustic surface waves phase velocity on lithium niobate with gold layer for propagation modes, predicting LF cut-off by substrate anisotropy

21 p3863 A70-42001

Nb-Zr thin films superconducting properties dependence on deposition temperature and rate and substrate material

22 p4085 A70-42623

SUBSTRUCTURES

Matrix decomposition and full release methods for substructure analysis

09 p1770 A70-22258

Complex redundant structures matrix analysis by substructure approach, obtaining elastic properties of system by subdivision and synthesis [SAE PAPER 700217]

11 p2134 A70-25889

Apollo 11 lunar rock clinopyroxene, plagioclase and ilmenite internal substructure, using high voltage transmission electron microscopy

21 p3901 A70-41544

SUBTRACTION

Small digital computer arithmetic unit design, discussing number representation, addition and subtraction methods for performance and cost

21 p3793 A70-40757

SUBTROPICAL REGIONS

U TEMPERATE REGIONS

U TROPICAL REGIONS

SUCTION

Boundary layer processes under unsteady suction allowing for compressibility, relating suction value to external velocity and wall temperature

03 p0465 A70-13275

Asymptotic expansion method to analyze laminar boundary layers with zero wall shear, large suction and adverse pressure gradients

04 p0674 A70-15563

Suction influence on skin friction fluctuations of MHD flow along infinite flat wall using Navier-Stokes equations

05 p0886 A70-15787

Axial flow pump impellers suction performance and cavitation conditions

06 p1075 A70-17137

Upper surface suction effect on thin plate aerodynamic characteristics, considering relations for lift and pitching moment coefficients

06 p0968 A70-17851

Unsteady boundary layer flow with suction, deriving equations for circular cylinder impulsive motion

07 p1253 A70-18862

Steady turbulent boundary layer of compressible perfect gas on heat insulated surface with suction and longitudinal pressure gradient

07 p1254 A70-19081

Turbulent incompressible boundary layer on porous heat insulated plate with uniform suction, calculating ratio of friction drag coefficients

07 p1254 A70-19082

Boundary layers calculation for nonporous surface extended to porous with suction by replacing velocity distribution with longitudinal pressure gradient

07 p1254 A70-19083

Flow properties and heat transfer of wall jet spreading over permeable surface with suction and blowing

07 p1258 A70-19720

Incompressible conducting fluid MHD flow at infinite plane wall forward stagnation point, considering suction or injection effects

07 p1354 A70-20237

Suction effect on thin film laminar flow past vertical wall, obtaining approximate solution for small porosity in accelerated region

08 p1484 A70-21309

MHD flow between two parallel plates, noting pressure gradient and skin friction coefficient

08 p1554 A70-21774

Laminar boundary layer separation noting effect of mass slot suction

09 p1662 A70-23236

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles [ASME PAPER 69-HT-4]

09 p1790 A70-23558

Motion and continuity equations for unsteady two dimensional flow of incompressible viscous fluid along infinite flat plate with time dependent suction

10 p1862 A70-23877

Suction force increase resulting from turbulent jet interaction with transverse flow

10 p1868 A70-24166

Casing and suction cone effects on fans with cambered forward curved blading

11 p1975 A70-25796

Pressure recovery and energy loss efficiencies of two dimensional diffusers with suction at entrance

11 p1977 A70-26418

Pressure fluctuations in acoustic field of boundary layer under slot suction, considering vortex formation and separation on edges

12 p2209 A70-27298

Wing tip trailing vortices hazard reduction on closely spaced parallel runways by suction application, discussing power requirements

12 p2207 A70-27631

Oscillatory flow in porous channel with suction and injection, using Laplace transform technique

13 p2389 A70-29538

Inflow and pressure difference for mean flow in straight suction duct with porous walls, using elementary momentum analysis

13 p2392 A70-30020

Inducer tip clearance effect on centrifugal pump suction performance with velocity and total head distributions at outlet

14 p2592 A70-31332

Boundary layer retarded flow past porous surface with suction, using Runge-Kutta computerized integration of Falkner-Scan equation

15 p2720 A70-31586

Liquid hydrogen axial flow pump inducer, describing suction pressure measurements, fluid conditions and flow rate [AIAA PAPER 70-627]

16 p2919 A70-33592

SUD AVIATION AIRCRAFT

Conical shock wave-turbulent boundary layer interaction data obtained for adiabatic wall conditions at supersonic free stream Mach numbers, including suction effects

18 p3241 A70-36448

Suction velocity effects on Rayleigh problem in MHD of flat nonmagnetic nonconducting plate, solving for velocity distribution and skin friction

19 p3481 A70-38448

Two dimensional MHD couette flow in slip regime, considering constant suction on stationary plate to determine transverse magnetic effects

20 p3677 A70-39047

Divergent channel with porous walls, calculating effect of suction on laminar incompressible boundary layer by Runge-Kutta method

20 p3609 A70-39671

Unsteady incompressible flow in laminar boundary layer with homogeneous suction during longitudinal flow past flat plates, investigating boundary layer stability

20 p3614 A70-40391

Flat plate boundary layer flow with surface blowing and suction /mass transfer/, investigating stability by numerical techniques

20 p3615 A70-40507

Two dimensional incompressible flow, calculating strong suction effects on laminar boundary layer separation by linear model

22 p4010 A70-42630

Steady incompressible turbulent boundary layer form on permeable curvilinear surface with uniform suction, assuming small pressure gradients

22 p4011 A70-42803

Turbulent boundary layer control by uniform fluid injection and suction, discussing velocity profiles, wall and wake laws, skin friction and shear stress transport equation [ICAS PAPER 70-10]

23 p4180 A70-44121

Two dimensional boundary layer growth with suction for oscillating circular cylinder, considering stream functions and phase angles

24 p4326 A70-46002

SUD AVIATION AIRCRAFT

NT CONCORDE AIRCRAFT

NT SA-330 HELICOPTER

SUD AVIATION SA-330 HELICOPTER

U SA-330 HELICOPTER

SUDDEN ENHANCEMENT OF ATMOSPHERICS

Diurnal variations of sudden enhancements and decreases of ELF atmospherics, using mode theory

21 p3814 A70-40939

SUDDEN IONOSPHERIC DISTURBANCES

Meter wave type 3 solar radio waves associated with solar X ray flares, discussing sudden enhancements of L.F. field strength due to D layer ionization enhancement

01 p0168 A70-10257

Solar X-ray bursts observations correlation with sudden phase anomalies measured at long VHF propagation paths in lower ionosphere

03 p0558 A70-13601

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions

05 p0841 A70-16737

Extreme UV flashes of solar flare observed by sudden ionospheric frequency deviations compared with energetic X rays observations

05 p0905 A70-16981

SID effects during recording of long wave transmitter field strength, indicating relation between solar X-ray flares and field anomalies

10 p1932 A70-24485

Blanketing type sporadic E layer associated with equatorial electrojet as thin layer of enhanced ionization

10 p1880 A70-24801

SID observed as VLF phase anomalies correlated with solar microwave radio bursts

10 p1933 A70-24816

Scintillation sudden inception in Faraday rotation in Sodankyl and Oulu, noting diurnal north-south frontier movements in polar ionosphere

10 p1884 A70-25262

Sudden phase anomaly /SPA/ in VLF radio wave propagation during Proton Flare Project, noting corresponding solar X-ray flux intensity enhancement

15 p2794 A70-32294

Negative sudden phase anomaly /SPA/ in VLF radio transmission, noting solar X ray flux intensity and zenith angle effects

15 p2699 A70-32297

Whistler VLF radio observations of sudden magnetic impulses in plasmasphere during storms, using ground based magnetometers

20 p3620 A70-39330

Electron precipitation at geomagnetic storm sudden commencement in auroral zone from X ray balloon observations

21 p3814 A70-40937

SUGARS

NT GALACTOSE

NT GLUCOSE

NT LACTOSE

NT MONOSACCHARIDES

Fructose metabolism in liver and extrahepatic tissues of sea level and high altitude natives, noting lactate and pyruvate accumulation in blood

02 p0233 A70-11722

Formose sugars production from formaldehyde, discussing economic conversion by catalytic reactions

16 p2855 A70-33063

3-O-methyl-mannose neutral sugar identification as constituent of fungal polysaccharide

20 p3572 A70-39625

SUITS

NT PRESSURE SUITS

NT SPACE SUITS

SULFATES

Beryllium sulfate effect on rabbits vascular plasma volumes, using albumin method for blood groups

15 p2681 A70-31884

Thermal decomposition of fine-dispersion iron sulfate powders under continuous heating during ferites manufacture

23 p4205 A70-44041

Microgram 2-nitro-1-butyl pyridinium sulfate /NBPS/ inhibition of growth of *Bacillus subtilis* by blocking thymidylate synthetase

23 p4158 A70-44998

SULFATION

Oxidation and sulfidation resistant diffusion coatings for superalloys, discussing processing methods, composition, properties and application [SAE PAPER 690479]

03 p0509 A70-13266

SULFIDES

NT CADMIUM SULFIDES

NT CARBON DISULFIDE

NT COPPER SULFIDES

NT DISULFIDES

NT HYDROGEN SULFIDE

NT MOLYBDENUM DISULFIDES

NT MOLYBDENUM SULFIDES

NT POLYSULFIDES

NT PYRRHOTITE

NT TROILITE

NT ZINC SULFIDES

Alloying elements preventing hot cracking in weld metal by converting iron sulfides into higher melting point sulfides

07 p1293 A70-18979

Ferromagnetic cubic sulfide of Fe easy axis by electron diffraction pattern, aligning sulfide particles along magnetic field

13 p2472 A70-29712

Sulfidation kinetics and scale morphology of Cr and Cr-Mo alloys at high temperatures in hydrogen/hydrogen sulfide atmosphere

19 p3452 A70-37827

SULFONES

Aromatic polysulfone thermomechanical behavior by torsional braid analysis, discussing structure, synthesis, thermal stability, radiation effects, etc

21 p3783 A70-42134

SULFUR

Reply to Swings comments on validity of forbidden S I lines in solar spectrum communicated by Swenson

01 p0175 A70-10240

Hot corrosion reactions in Ni, Co and NiAl-base alloys exposed to salt-sulfur containing simulated gas turbine combustion atmospheres

01 p0118 A70-10728

Manganese and sulfur content effects on martensitic stainless steels machinability, describing effects on mechanical properties, cold formability and corrosion resistance

03 p0507 A70-13135

Earth oxygen atmosphere age estimated from sulfur isotope composition of geological phlogopite and lazurite deposits from South Baikal region

06 p1056 A70-17798

Sulfur beam foil spectrum in 600-4000 Å range, identifying transitions in S I-S VI

11 p1994 A70-25362

Carbon and sulfur reactions with solar hydrogen atoms in Apollo 11 lunar samples accounting for isotopic composition of fine-grained basaltic rocks

14 p2545 A70-30791

Inverted coexistence possibility of spherical and deformed states in Si 28 and S 32 nuclei

17 p3137 A70-34518

Ni-S melts thermodynamic properties in 700-1100 C range by continuous thermal balance method, calculating S vapor pressure

18 p3271 A70-36029

Sulphur in earth core composition, considering volatile element abundances and iron melt in thermal models

18 p3256 A70-37078

Helium-like resonance, intercombination and forbidden transitions of Ca, Si and S lines during 3b solar flare decay

20 p3700 A70-40420

Clean iron /011/ surfaces, determining sulfur, oxygen and hydrogen sulfide films effects on adhesion behavior

21 p3831 A70-40748

Carbon and sulfur concentration and isotopic variations in Apollo 11 fines, breccias and fine-grained basalts

21 p3775 A70-41586

Phase relations in system Ag-Fe-S in 700-1200 C range at various vapor pressures by quenching and differential thermal analysis, observing liquid-immiscibility fields

22 p4053 A70-42732

SULFUR CHLORIDES

Sulfur trichloride-Al tetrachloride complex ionic structure from Raman spectra and nuclear quadrupole resonance data

21 p3772 A70-40912

SULFUR COMPOUNDS

NT CADMIUM SULFIDES

NT CARBON DISULFIDE

NT COPPER SULFIDES

NT CYSTEINE

NT DISULFIDES

NT HYDROGEN SULFIDE

NT SULFIDES

NT SULFONES

NT SULFUR CHLORIDES

NT SULFUR FLUORIDES

NT SULFUR OXIDES

NT SULFURIC ACID

NT THIOLS

NT TROILITE

NT ZINC SULFIDES

Sulfur compound effects on carbon monoxide-nitrogen laser emission stability, obtaining continuous operation independently of tube quality

01 p0111 A70-10660

Phase equilibria in Mn-S, Mn-Se and MnS-MnSe systems by X ray diffraction after preparation by annealing

02 p0249 A70-11652

Ni base alloys sulfidation kinetics, examining roles of sodium/sulfur compounds-substrate interactions in accelerated oxidation

20 p3651 A70-40072

Thermally stable arylsulfimide polymers incorporating 1, 2-disulfonimide group

21 p3782 A70-42130

SULFUR FLUORIDES

Tunable diode laser for high resolution IR spectroscopy of sulfur hexafluoride absorption near carbon dioxide laser lines

13 p2430 A70-29832

Electron attachment rate to sulfur hexafluoride in He buffered flowing afterglow

21 p3853 A70-41394

Supersonic convective electric arcs with magnetic stabilization in sulfur hexafluoride, examining aerodynamic drag and plasma column slanting

23 p4227 A70-44554

SULFUR OXIDES

Satellite monitoring of air pollution, discussing sulfur dioxide measurement in UV, optical correlation techniques, IR and visible spectra, stratospheric balloon tests, etc

09 p1668 A70-22875

Dual photon emission from chemiluminescent SO-O reaction, proposing two step emission mechanism

09 p1630 A70-23001

Methyl methacrylate and other vinyl monomers polymerization activation by low sulfur dioxide concentrations, noting inert solvents effect

14 p2544 A70-30246

Spectroscopic detection of sulfur dioxide and carbon dioxide molecules and concentrations in polluted atmosphere by laser-Raman radar technique

20 p3640 A70-39389

Air polluting sulfur dioxide and nitrogen dioxide remote sensing based on radiation molecular absorption using long line correlation spectrometer

20 p3633 A70-39793

SULFURIC ACID

Alpha- and beta-styryl azides catalyzed reactions in ethanolic sulfuric acid

05 p0810 A70-16053

Radiation effects on dihydrothymine in frozen sulfuric acid solutions, detecting thymine after melting via low temperature UV absorption measurements

20 p3583 A70-40454

Ni/sulfuric acid AC voltage polarization curves for anodic dissolution region

24 p4364 A70-46220

SUM RULES

Limiting theorems for sums of random variables linked in Markovian chain, applying probabilistic and analytical methods

19 p3456 A70-37235

SUMMARIES

NT ABSTRACTS

SUMMER

Cosmic ray latitude survey in North America in summer using neutron and muon monitors operating near sea level and on mountains

01 p0167 A70-10226

Summertime midnight airglow enhancement of 6300 Å line by sensitive continuum compensating photometer, suggesting F 2 region electron density increase for emission

12 p2225 A70-27895

F 1 region unsteady model, examining vertical distribution profile of electron concentration on summer day

19 p3409 A70-37323

Synoptic processes in troposphere and stratosphere with large air temperature anomalies during early summer in U.S.S.R.

20 p3663 A70-39272

SUMS

Generalized Watson sums evaluation without series expansions or extensive computer summations, calculating magnetization of anisotropic Heisenberg ferromagnet for cubic, bcc and fcc lattices

04 p0730 A70-14689

Bessel generalized polynomial series convergence and summability on contour of convergence region

11 p2071 A70-25521

Cyclic codes for error correction noting connection with exponential sum theorems

11 p2074 A70-26312

Markov renewal processes sums convergence to multidimensional Poisson process, discussing convergence conditions

12 p2260 A70-26884

ALGOL algorithms for solving sum and bottleneck assignment problems

12 p2192 A70-27767

Cesaro Fourier series summation method for boundary value problems in electrostatics

14 p2600 A70-31419

Limit theorems for sums of multidimensional stochastic step processes, giving necessary and sufficient conditions for convergence to Poisson measures

16 p2942 A70-33700

Kaban Babuska summation method variant in Triplex-ALGOL 60 for reducing roundoff errors in finite series calculation

19 p3385 A70-38678

SUN

Simultaneous filtergrams of velocity and intensity field of central solar disk obtained in blue and red wings of Fraunhofer line

01 p0175 A70-10242

Sun-planet systems capture and catapult capacity for interstellar bodies under close flyby conditions

04 p0753 A70-15144

Solar structure models for neutrino flux prediction compared with solar structure, suggesting modification in solar and stellar evolution calculations

05 p0906 A70-15895

Nonlinear effects in spiral galaxies with emphasis on solar neighborhood region, discussing radial motion, stationary state with excited waves and vertex deviation

05 p0917 A70-16905

Solar photographs taken with motion picture cameras in integral light

05 p0920 A70-16974

Resonance in restricted three body problem applied to asteroidal motion in asteroid-Jupiter-sun system

06 p1152 A70-18492

Plasmas role in emission mechanisms active in celestial sources of radiation, discussing sun and quasars

10 p1948 A70-25027

Thermonuclear reactions in interior of sun, discussing models for He isotope concentration and flow to interpret solar neutrino generation

13 p2494 A70-29573

Sudden disappearance of large quiescent prominence on solar disk with subsequent brightenings, using photospheric and gravitational model

13 p2497 A70-29850

Metal to hydrogen ratio for sun, Hyades and F-G stars based on photoelectric measurements of weak metal lines

14 p2652 A70-31388

Solar Ga abundance from spectral synthesis of region around 4172 Å line

18 p3316 A70-36894

Solar core opacity, investigating individual heavy elements influence and effect of changes in abundances

18 p3317 A70-37005

Mercury transit across sun on 9 May 1970, discussing observation, equipment and photographs

18 p3319 A70-37050

Galactic spiral structure relation to local stellar distribution, discussing OB associations, galactic cluster, WR stars, cepheids, and common stars in sun neighborhood

18 p3329 A70-37176

Solar disk dimensions and RF emission characteristics from eclipse observation and flux recordings, considering brightness temperature distribution and lunar edge diffraction effects

19 p3521 A70-38551

Sun photographs with violet interference filter, determining photospheric magnetic fields position by copatial network

20 p3634 A70-40410

Statistical estimates of precessional corrections, solar motion and galactic rotation from proper motions

23 p4246 A70-44752

SUN SENSORS

U SCLAR SENSORS

SUNLIGHT

Solar brightness variations observed photometrically, discussing periodicity, sunspot locations, photosphere and subsurface rotations, etc

01 p0186 A70-11273

Scattering functions from sky light spectra measurements on high mountain for various sun altitudes, obtaining color value functions

02 p0359 A70-12776

Atmospheric absorption anomalies of UV sunlight near 50 km altitude in rocket-borne radiometer determination of ozone distribution

03 p0478 A70-14197

Electron temperature anisotropy in ionospheric plasma for case of ionizing sunlight propagating along geomagnetic field

03 p0479 A70-14376

Sea surface sunglint pattern irregularities in earth orbiting satellite photographs, observing dark patches

05 p0838 A70-16152

Mercury arc injection lamp as radiation source for testing sunlight biological effects

10 p1888 A70-24388

Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation

10 p1890 A70-24639

Manual spectrograph for distant objects spectrophotometry under natural conditions and solar illumination

14 p2583 A70-30415

Night airglow space and time variations from jet aircraft observations, measuring conjugate enhancements

14 p2580 A70-31266

Electric space charge pulse density measurements near ground in sunny weather related to free convection

15 p2726 A70-31868

Anomalous dark areas in sunglint patterns from ATS photographs, considering water temperature effect on ocean surface conditions

16 p2897 A70-33725

Directional solar thermal field /sunglint/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

20 p3720 A70-39676

Solar optical and radio activity observation in 1968, noting optical-radio data correlation

22 p4095 A70-43259

Linear polarization of sunlight scattered by Venus atmosphere, giving data for integrated disk and equatorial region

23 p4246 A70-44756

Ashen light origin, considering atmospheric refraction of sunlight illuminating dark side of planet

24 p4399 A70-45113

SUNRISE

VLF wave propagation across sunrise line analysis based on idealized model for earth-ionosphere waveguide

01 p0042 A70-10048

Predawn O I 6300 Å airglow enhancement, observing time variations and suggesting mechanism

02 p0289 A70-12120

Transequatorial multisite VLF records establishing solar zenith angle for midpoint of sunrise ionospheric height discontinuity, recomputing magnetic latitude dependent parameters

06 p1054 A70-17590

Sunrise effects in lower ionosphere at midlatitude, discussing long wave absorption measurements, summer electron concentration profile and consistency of aeronomic model

07 p1235 A70-19436

Seasonal measurements of ionospheric absorption during sunrise in D region at medium sunspot numbers, noting disagreement with rocket observation

13 p2392 A70-28574

Ozone content effect on presunrise fall in LF radio waves amplitude from Radio Tashkent to Delhi, noting UV light role

17 p3077 A70-34947

Sunrise effects in lower ionosphere at midlatitude, discussing long wave absorption measurements, summer electron concentration profile and consistency of aeronomic model

18 p3249 A70-36910

SUNSET

Grating spectrometer with Ge-Cu detector used on balloon flights for studying variations of IR solar spectrum with altitude, emphasizing sunspot features

06 p1152 A70-18523

Lunar postsunset horizon afterglow observed by Surveyor 7, discussing small particle diffraction on surface

20 p3708 A70-39960

SUNSPOT CYCLE

Spread F echoes occurrence variations over solar cycle, observing range and frequency splitting type during maximum and minimum sunspot years

01 p0080 A70-11222

Solar corona at sunspot maximum observed during 22 September 1968 total solar eclipse, noting coronal streams unpredicted by magnetostatic model

06 p1138 A70-12728

F 2 field-aligned ion velocity measurement compared with theoretical results, discussing difference at sunspot minimum and daytime ion velocity-plasma loss relation

10 p1881 A70-24815

Sunspot cycle and ionospheric D and E layers daily radio wave absorption correlation, observing seasonal variation effect

10 p1885 A70-25267

Solar activity forecasting using normalized sunspot curves deduced from 200 years of observations, discussing parameters of running 11 year cycle

10 p1949 A70-25287

Wolf numbers monthly fluctuations, giving histogram of fluctuation amplitude distribution

18 p3323 A70-37137

Sunspot number prediction from solar cycles statistical analysis

23 p4254 A70-44902

SUNSPOTS

Chromospheric average velocity field near sunspots determined from M alpha line absorption elements wavelength shifts

01 p0176 A70-10247

Penumbra forms and magnetic polarity distribution relationship in sunspot groups

01 p0184 A70-10955

Correlation between sunspot number index and solar radio noise index relative to ionospheric propagation, noting computer analysis program and hysteresis effect

02 p0289 A70-12107

Radiative energy transport in sunspot region via model computations, obtaining reduced subphotospheric flux estimates for given magnetic field

02 p0372 A70-12254

Joule dissipation model for sunspot magnetic field, discussing field fine structure and lifetime

02 p0373 A70-12374

Magnetic flux trapping experiment with Al conductor, showing decay time constant connection with sunspot theory

02 p0299 A70-12393

Hydrostatic models of sunspot penumbra and umbra, analyzing spot transparency influence on Wilson effect

03 p0571 A70-13596

Sunspot motion statistics for 1965-1967 from observational data, complementing electron-corona differential rotation and spectroscopic measurements

03 p0571 A70-13597

Absorption line identification in sunspot spectra by calculating Zeeman patterns, using Zeeman splitting for magnetic field measurement

03 p0574 A70-13934

Secular variation in F region ionization response to sunspot number, noting dominant component as cosine term equal to four sunspot cycles

04 p0678 A70-14972

HF molecular vibration rotation band observed in sunspot spectra, carrying out model calculations for spots differing in temperature for fluorine abundance

04 p0751 A70-15048

Solar atmospheric structure near sunspots by spectrophotometry, presenting observational and theoretical sunspot magnetic and velocity field data

04 p0754 A70-15351

Magnetic vector directions over sunspot near central meridian passage measured, showing axisymmetric arrangement

04 p0758 A70-15697

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots

04 p0742 A70-15718

Gas pressure and pressure stratification in sunspot, using curve of growth analysis

05 p0911 A70-16432

Diatomic carbon swan band violet line absence from sunspot suggested in accordance with molecular equilibrium predictions

05 p0911 A70-16433

Photospheric magnetic flux quantization away from sunspots, studying nonsunspot field strength distribution

06 p1142 A70-17992

Sunspot temperature and pressure gradients from blue, red and IR photographs, deriving umbral depression and density scale height 06 p1143 A70-18000

Wilson effect in sunspot structure as penumbra foreshortening and disappearance or penumbra occultation by photosphere, analyzing intensity profiles on disk passage photographs 06 p1143 A70-18001

Magnetic and velocity fields in unipolar sunspot, discussing fluctuations associated with penumbral and umbral fine structures 06 p1144 A70-18002

Sunspot umbral dot models characteristics based on three dimensional radiative transfer analysis 06 p1144 A70-18003

Sunspot magnetic field structure, determining vector field from longitudinal component perspective effect observations 06 p1149 A70-18457

LOF observations of long distance transequatorial step frequency radio circuits in Pacific Area during sunspot minimum period 07 p1232 A70-19174

Effective LUF fade-out and fade-in times seasonal and diurnal variations for oblique ionospheric propagation paths, noting sunspot number effects 07 p1233 A70-19180

Electromagnetic acceleration and energy losses of charged chromospheric-coronal plasma electrons and protons in unsteady magnetic fields of sunspots 07 p1384 A70-19417

H alpha brightening areas related to sunspot magnetic fields configuration and solar proton flares 07 p1369 A70-20072

Rapid scanning high resolution photoelectric spectrometer for sunspot spectra study 07 p1289 A70-20291

Sunspot group of July 1966, studying umbrae structures relation to magnetic field 08 p1569 A70-20835

Darkening and brightening of disturbed spot on sun surface determined by abnormal stress in seen layers due to magnetic and velocity fields 08 p1570 A70-20903

Magnesium hydride absorption lines in sunspot spectrograms indicating heavy Mg enhancement in sun relative to earth 08 p1571 A70-20904

Localized high energy flaring of active center monitored with time-associated radio bursts in spot umbrae 08 p1561 A70-20905

Sunspots narrow and double K lines probable emission by quiescent type prominences 08 p1575 A70-21372

Critical sunspot dependence of F 2 region noon bite-out phenomenon at various equatorial latitudes, observing magnetic dip 08 p1492 A70-21837

Solar continually changing features /brightenings, darkenings, condensations and groupings/ associated with solar activity, emphasizing sunspot number formulas 09 p1751 A70-22197

Solar activity analysis emphasizing sunspots, magnetic disturbances and bursts data 09 p1752 A70-22199

Sunspots photospheric layers magnetic field structure, analyzing anomalous Zeeman pi- components in umbra 09 p1757 A70-22685

Solar activity /1967/ catalog containing tabulated spot area, Wolf numbers, 1966 spot groups, etc 10 p1935 A70-23838

Solar boron abundance from BH, BN and BO absorption bands in sunspot spectra, noting no traces in solar atmosphere 11 p2108 A70-25738

Solar active centers interaction effects on spot growth and proper motion 11 p2109 A70-25743

Statistical analysis of latitude distribution of magnetically classified sunspot groups and associated flares 11 p2106 A70-26646

Solar flare relation to local magnetic field in active regions, discussing sunspot and weak field measures 12 p2297 A70-26986

Molecular line identification in sunspot spectrum of CN, diatomic carbon, TiO, MgH, CaH, NiH and water vapor 12 p2302 A70-27590

Seasonal measurements of ionospheric absorption during sunrise in D region at medium sunspot numbers, noting disagreement with rocket observation 13 p2392 A70-28574

Solar flares number decrease near central meridian noting no sunspot decrease 13 p2477 A70-29047

Sunspots butterfly diagram shape relation to solar differential rotation 13 p2491 A70-29048

Low latitude scintillations from satellite transmission scintillations correlation with solar activity spread F, electron content and ionospheric irregularities 13 p2397 A70-29189

Magnetic field spatial structure in sunspot with photospheric bridge, using photographic observations of solar spectrum lines 13 p2493 A70-29391

Sunspot minimum intensity dependence on area, including correction for blurring or image motion, scattered light and line absorption 13 p2496 A70-29846

HOH lines existence in sunspot umbral spectrum 13 p2496 A70-29847

Sunspot electric current density accounting for magnetic field abrupt reversal 13 p2496 A70-29848

Lunar tide in ionospheric D region absorption near magnetic equator, noting annual variation relationship to sunspots 14 p2574 A70-30747

Water vapor in sunspots, taking into account red shift between telluric and intrinsic sunspot HOH lines 14 p2641 A70-30790

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots 14 p2632 A70-30802

Electron and ion temperature and electron density relationship in F region during sunspot maximum, using incoherent scatter experiment 14 p2581 A70-31271

Sun Lyman alpha emission line monitoring, describing intensity variations correlation with Zurich number 15 p2798 A70-31654

Lunar tidal diurnal and semidiurnal variations in equatorial sporadic E layer related to H geomagnetic field and sunspot period 15 p2726 A70-31862

Daytime seasonal anomaly in electron density of topside F 2 region near sunspot minimum, using Alouette 1 data 15 p2726 A70-31863

X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups 15 p2794 A70-32486

LF oscillatory convection characteristics in polytropic atmosphere in strong magnetic field based on sunspot theory 15 p2802 A70-32487

Wolf numbers Zurich time series monthly values, evaluating mathematical expectation with probability smoothing by Whittaker operator 15 p2802 A70-32489

Sunspot electric current evaluation from analyzing transverse component of magnetic field, discussing difficulties and errors in data reduction 15 p2804 A70-32615

Overlapping sunspots on photographs from Manila observatory during 10-12 December 1968 16 p2973 A70-33114

F 1 layer occurrence probability as function of mean monthly Wolf numbers at midlatitudes, noting solar activity effect 18 p3254 A70-37032

Sunspots surface layers azimuthal electric current density, assuming specific magnetic force distribution 18 p3322 A70-37135

Sunspot spectrograms analysis, observing wavelength shift in Zeeman triplet circular components and magnetic splitting inequality under different circular polarizations 18 p3322 A70-37136

Solar flare of 30 October 1968, describing sunspot development 19 p3497 A70-37973

Primary cosmic rays energy spectra in interstellar space in relation to sunspot group number 19 p3506 A70-38121

Solar radio emission slowly varying component, analyzing random aspects, correlation functions and relationship to spot groups 19 p3521 A70-38552

Solar radio emission and optical features correlation, considering integral RF flux, spot groups, main spots and flocculi areas 19 p3521 A70-38553

Primary cosmic ray intensity variation during solar activity half cycle, expressing diffusion coefficient as function of sunspot group number 20 p3696 A70-39279

Modified McNish-Lincoln method for Zurich sunspot numbers prediction, adapting for computer operation 20 p3704 A70-39410

Spot groups longitude distribution in 11 year solar activity cycle in Northern and Southern Hemispheres based on correlation functions, observing period variation 20 p3704 A70-39466

Butterfly diagram showing time dependent distribution of sunspots across heliographic latitudes 20 p3704 A70-39473

Auroral physics, discussing visibility, relations to geomagnetism and sunspots spectrum, morphology, optical emissions and particles in magnetosphere 20 p3623 A70-39929

Photospheric pore magnetic field model, investigating pore-sunspot distinctions 20 p3711 A70-40411

Photoelectric spectra of photosphere and sunspot umbra and penumbra ranging from 3900 to 8000 A 20 p3712 A70-40412

Photoelectric polarimetry of dark unipolar type H sunspot in terms of value and direction of magnetic field vector 20 p3712 A70-40413

Large sunspot umbra continuum intensity, examining visible spectra 21 p3885 A70-40956

Sunspot intensity profiles near solar limb, observing center side penumbra photosphere border 21 p3885 A70-40957

Solar flare relation to radio emission at 3.3 mm, discussing sunspots, temperature gradients and magnetic fields 21 p3879 A70-40962

H alpha flares occurrence in plages with little or no spots 21 p3880 A70-40964

Sunspot umbras and penumbras magnetically nonsplit lines measured photographically by spot contrast discriminator 21 p3887 A70-41115

Butterfly diagram for describing latitude distribution of sunspots during solar cycle, considering representation methods 22 p4106 A70-43264

Soft solar X rays cyclic variation from satellite observation, noting relation to sunspot group magnetic field complexity 22 p4096 A70-43301

X ray and microwave emissions relationship to sources on sun, discussing development and structure of sunspot groups 23 p4236 A70-43910

High resolution upper photosphere images obtained by slow raster scanning device and germanium bolometer, noting points around sunspots 24 p4400 A70-45307

MgH molecular lines Zeeman splitting in sunspot spectra confirmed by photoelectric observations 24 p4400 A70-45308

Li doublet in 21 March 1969 sunspot, examining fine structure caused by self reversal in line core 24 p4400 A70-45309

Sunspot penumbra velocity field spatial structure by filament spectrum analysis, plotting radial velocities relative to undisturbed photosphere 24 p4400 A70-45310

Electrical conductivity in inhomogeneous photosphere and sunspots, suggesting sunspot plasma instabilities 24 p4400 A70-45311

Zonal spot activity duration dependence on daily angle of solar rotation 24 p4401 A70-45316

SUPERALLOYS

U HEAT RESISTANT ALLOYS

SUPERCAVITATING FLOW

Plane supercavitating flow past symmetric wedge via open cavity model and application of conformal mapping theory and Riemann-Hilbert techniques 01 p0002 A70-10544

Inverse boundary value problems for supercavitating bodies, deriving singular integral equations using Prandtl acceleration potential method 07 p1254 A70-19076

Direct boundary value problem for supercavitating profile with finite cavity, deriving singular integral equations by Prandtl acceleration potential method 07 p1254 A70-19077

Unsteady hydrodynamic coefficients of supercavitating hydrofoil in harmonic oscillation in Helmholtz flow with free surface, investigating frequency, angle of attack and submergence depth 07 p1255 A70-19134

Direct and inverse problems of hydrodynamics of supercavitating lattices with leading and trailing edge cavities extending over upper surface of profile 08 p1482 A70-20534

Aerodynamic characteristics of supercavitating airfoil, investigating effect of free surface of unsteady fluid flow with stream separation, solving boundary value problem 13 p2391 A70-29650

Off-design performance characteristics of supercavitating hydrofoils in cascade for various arrangements, flap angles and flap chord ratios [ASME PAPER 70-FE-24] 16 p2892 A70-33633

SUPERCAVITATING FLOW

U SUPERCHARGERS

Impeller elastic and elastoplastic strength of centrifugal supercharger with curved disks and radial blades, using variational method 01 p0211 A70-11417

Machine-plotted pseudo three dimensional turbocharger rotor whirl display, discussing amplitude and frequency 08 p1496 A70-21300

Optimum manifold and injector hole area of pulsed exhaust systems of two cycle engine with turbocharger
22 p4091 A70-42809

SUPERCHARGING

U SUPERCHARGERS

SUPERCONDUCTING MAGNETS

Cryogenically cooled superconducting electromagnets design, construction and properties for research in plasma and solid state physics, considering coil systems
01 p0143 A70-10970

Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213
04 p0685 A70-14443

Helium properties and utilization in NASA projects, discussing pressurization of fuel tanks cooling of superconducting magnets
04 p0720 A70-15633

Magnetic suspension and guidance of high speed vehicles realized via magnetic field interaction of vehicle-mounted superconducting magnets with eddy currents
08 p1543 A70-20576

Multiple maser-magnet units packaging in single cryostat for maximum tunability
08 p1513 A70-21599

Strong magnetic field effects on squirrel monkeys electrical and mechanical cardiac functions determined from vectorcardiogram and aortic blood flow characteristics
09 p1617 A70-22524

Three channel traveling wave maser with cryogenic superconducting magnet for C-band monopause radar system, describing construction and electrical characteristics
10 p1900 A70-24894

Superconductive materials and magnet design, discussing stabilization methods
11 p2097 A70-25613

Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213
13 p2403 A70-28468

Cryogenics and nuclear physics, discussing particle beam handling magnets, superconducting accelerators, detectors, moderators, low temperature irradiation facilities, etc
14 p2616 A70-31014

Superconducting resistive critical field H_c of bcc region of Ti-Nb-V ternary system
15 p2782 A70-31754

Doubly pumped ruby maser operating in conjunction with superconducting magnet
18 p3265 A70-35953

Superconducting magnet system design, operation and module tests, noting large and small coil systems performance data relationship
23 p4218 A70-44354

Superconductive magnets with different windings and modular construction for magnetic mirror apparatus, discussing performance tests
23 p4218 A70-44355

Force-reduced superconducting toroidal magnet coils built with Cu plated Nb-Zr wire, investigating current enhancement characteristics
23 p4230 A70-44356

SUPERCONDUCTIVITY

Airborne aeromagnetic gradiometer theory and design, using superconducting thin film tunneling junctions
01 p0085 A70-10289

Superconducting transition temperature variation in bcc region of Ti-Nb-V ternary alloys measured as function of valence electrons and composition
03 p0538 A70-13154

Superfluid states of matter in interior of neutron stars, discussing strong interaction forces role
03 p0578 A70-14219

Quarkian substance properties noting possibility of superconducting state at high densities
04 p0753 A70-15074

Plastic deformation effects on superconductivity of wire specimens of high purity Pb, In and Tl cold worked at liquid He and annealed
06 p1127 A70-18614

Possible pairing without superconductivity at low carrier concentrations in bulk and thin film superconducting semiconductors
06 p1127 A70-18641

Transverse and longitudinal resistive critical fields of Nb wires, discussing superconductivity in dislocation cell walls created by drawing or swaging
09 p1704 A70-22802

GeTe, SnTe and strontium titanate transition into superconducting state including induced superconductivity
10 p1928 A70-25028

Superconducting ellipsoid of revolution in alternating magnetic field, computing disturbed field components using boundary value problem
10 p1917 A70-25201

Superconducting thin films of beta-tungsten structure Nb-Al-Ge compound, discussing high purity sputtering preparation techniques and properties in magnetic fields
12 p2285 A70-27259

Upper critical field dependence on s- and p-wave scattering of Frenkel effects in electron irradiated niobium
13 p2471 A70-29535

Superconducting bolometer operating temperature stabilization
13 p2412 A70-29868

Superconducting lead shell shielding properties in small ambient magnetic fields
13 p2454 A70-30030

Calorimetric measurements for Re specific heat in normal and superconducting states, comparing to theoretical calculation
14 p2626 A70-30478

Current stability and coil tests of force cooled superconducting systems
14 p2617 A70-31017

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, neutron stars, white dwarfs, etc
15 p2795 A70-31454

Superconductivity in noble metal rich hexagonal close packed phases and fcc solid solutions ascribed to Fermi surface-Brillouin zone interaction
15 p2785 A70-32398

Anisotropic superconducting energy gap of pure Zn from microwave absorption measurements
16 p2961 A70-33776

Teflon bucket and Be-Cu cap seal against hydrostatic pressure, discussing applications for high pressure superconductivity measurements
18 p3262 A70-37097

Substrate and thickness dependence of electrical and superconductivity properties of rhenium and molybdenum films prepared by electron beam evaporation
19 p3485 A70-37684

RF communication signal to noise improvement by time variant tracking filter with high Q superconductive resonant cavity
19 p3391 A70-38892

Nb-Zr thin films superconducting properties dependence on deposition temperature and rate and substrate material
22 p4085 A70-42623

Superconductivity and crystalline structure of laminar solid solutions of niobium-selenide- niobium-telluride single crystals
22 p4088 A70-43464

Current and vector potential in thin superconducting film in HF field, considering high and low temperatures
22 p4088 A70-43467

Rare earth metals-ruthenium Laves phases solid solutions superconducting transition temperature measurement
23 p4231 A70-44885

Superconductive memory type chalcogenide tellurium germanium arsenide, measuring AC magnetic susceptibility and DC electrical resistivity
23 p4231 A70-44892

Vanadium carbide single crystals superconductivity from upper limit on electron phonon interactions at 30 mK
24 p4391 A70-46252

Radiation detectors with superconducting weak links response to single photons, considering Mercereau ring interferometer
24 p4391 A70-46256

SUPERCONDUCTORS

Superconducting properties of polycrystalline disordered cold worked Nb-Ti-V alloys showing unexpected sensitivity to fast neutron irradiation
03 p0508 A70-13144

Thin superconducting films nonlinear microwave properties including impedance-amplitude relation, superconducting current threshold decrease, mode production, frequency mixing, etc
03 p0539 A70-13409

Josephson effect in superconductors emphasizing Josephson junction electrical properties and applications to devices and measuring techniques
03 p0542 A70-14190

Superconducting properties of Nb-Ti-N thin films prepared by reactive sputtering process, obtaining transition temperature maximums
04 p0732 A70-15689

Composite conductors involving conventional conductors and superconductors to obtain satisfactory electrical performance for application to electromagnets
05 p0870 A70-16582

Surface nucleation critical field for pure superconductors at temperatures outside Landau- Ginzburg region
06 p1125 A70-17218

Superconductor tubes experiment, observing flux jump initiation and propagation characteristics
09 p1738 A70-22293

Far IR radiation transmission through bismuth and gallium normal and superconducting thin films, considering transition temperature role
09 p1739 A70-22323

Electromagnetic single-coil suspension for cryogenic gyroscope with superconducting sphere rotor, calculating suspension force characteristics
12 p234 A70-27565

Tantalum RF sputtered superconducting films structure and properties at various substrate temperatures, observing bcc, fcc and amorphous phases by electron microscopy
12 p2288 A70-27876

Liquid He temperature fluctuation effects on cryogenic superconducting bolometer noise spectrum, deriving transfer functions
12 p2237 A70-28156

Light absorption coefficient of two band superconductor with nonmagnetic impurity, observing electron pairs removal from condensate and transition into excited states
13 p2472 A70-29723

Superconducting magnetometers and cryogenic refrigeration techniques, discussing liquid helium refill systems, Joule-Thompson expansion, etc
13 p2414 A70-30027

Superconducting analog and digital magnetometers, discussing instrument principles and operational limitations
13 p2414 A70-30028

Magnetometers based on flux entry into superconducting rings, discussing sensitivity and noise sources
13 p2414 A70-30029

Book on materials for conductive and resistive functions covering superconductive and contacting functions and applications
14 p2557 A70-30951

Nonlinear effects in microwave resonators containing thin superconducting films and low values of microwave power
15 p2782 A70-31525

Superconducting magnetic flux detector magnetic susceptibilities or field measurements
15 p2740 A70-32431

Anisotropic energy gap model in superconducting Zn to describe microwave absorption measurements
16 p2961 A70-33777

Superconducting Nb-Ti-Zr alloy, investigating structure and decomposition at high temperatures by X ray and electron microscopy
18 p3276 A70-36310

Nb-Sn superconductors multiphase structure with three intermetallic phase, constructing diagram based on phase stability and composition
18 p3299 A70-37221

High magnetic fields applications, emphasizing metal forming and superconducting rings levitation
19 p3471 A70-37948

Superconductor thin films, discussing transition temperature, critical field and current, solid state applications, etc
19 p3488 A70-38198

Energy release during flux jump in Nb-Ti single core wires and multifilament composite superconductors
21 p3863 A70-42011

Superconducting Sn bolometer under isothermal and nonisothermal conditions, measuring noise spectra dependence on displacement current and resistance
22 p4026 A70-42397

Thin film granular aluminum superconductors as sensitive thermometers
22 p4031 A70-43009

Ti and Zr based superconducting alloys with Nb content, measuring longitudinal critical currents in wire and ribbon samples
22 p4087 A70-43462

Superconductors resonance and oscillation phenomena, discussing particle motion, energy spectrum, magnetic and temperature effects, etc
22 p4088 A70-43476

Electromagnetic-surface elastic waves conversion in superconductors, considering thin plate forced vibrations and standing waves excitation
24 p4389 A70-45205

Current-phase relationship in short superconducting weak links, using one dimensional model
24 p4389 A70-45224

SUPERCOOLING

Real plasma isotherms using three component atoms, electrons, positive ions/ model in search for supercooled dense plasma
07 p1349 A70-19651

Artificial crystallization theory for supercooled dry ice seeded stratus clouds, taking into account condensation growth and turbulent diffusion of crystals
08 p1538 A70-21108

Vapor bubble separation diameter and flow in channel boiling applied to supercooled boiling zone determination
09 p1789 A70-23379

Undried atmospheric air humidity effect on pressure and water vapor supercooling in supersonic wind tunnel nozzles
09 p1606 A70-23613

Pressure, subcooling and diameter effects on liquid nitrogen film boiling on thin horizontal wires, using high speed movies

17 p3194 A70-34742

Contoured nozzle shock tunnel condensation point, determining flow supercooling over specified pressure range

23 p4182 A70-44588

SUPERCRITICAL FLOW

Torque and flow patterns in supercritical Taylor instability regime of circular Couette flow

03 p0470 A70-14235

Steady supercritical planar inviscid transonic flows over lifting airfoils, generating unsteady flow by impulsively imposing airfoil boundary condition [AIAA PAPER 70-47]

06 p0972 A70-18130

Subcritical and supercritical boundary layer problems, reviewing various momentum integral solution methods

18 p3242 A70-36705

Lifting quasi-elliptical airfoils with supercritical shock free flow, discussing Nieuwland hodograph theory to compute profile number [ICAS PAPER 70-15]

23 p4132 A70-44126

SUPERCRITICAL PRESSURES

N-heptane and Freon-13 droplets vaporizing size and temperature at supercritical pressures in heated air stream

06 p1182 A70-18204

Supercritical pressure system heat transfer characteristics for cryogenic space oxygen storage and supply

14 p2667 A70-31342

Metal vapors electrical conductivity and density measurement at high temperatures and supercritical pressures

20 p3648 A70-39637

Free and forced convection of supercritical carbon dioxide normal to heated cylinder at constant temperature, measuring heat transfer rates

21 p3945 A70-41034

SUPERFLUID FLOW

U SUPERFLUIDITY

SUPERFLUIDITY

Superfluid states of matter in interior of neutron stars, discussing strong interaction forces role

03 p0578 A70-14219

Thermodynamic equilibrium of rotating liquid He II on basis of Landau theory, noting stability and dissipative effects

04 p0785 A70-14986

Hartree model to study superfluid He film bound to uniform substrate

05 p0883 A70-16469

Heat transport by internal convection through He 2 in two fluid hydrodynamics model noting roles of thermal flux, superfluid component vorticity, normal component turbulence, etc

12 p2329 A70-27022

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, neutron stars, white dwarfs, etc

15 p2795 A70-31454

Energy flow between two superfluid helium baths at different temperatures and separated by thin plate

19 p3471 A70-37648

Critique of Ruderman theory of Crab pulsar LF wobble as long wavelength oscillation of superfluid vortex lattice

19 p3522 A70-38604

Neutron star superfluid turbulent state, applying dynamic model to conditions in pulsars

20 p3713 A70-40429

SUPERGIANT STARS

IR colors and optical and IR spectra of irregular M variable star and bright OH source VY CMa indicating supergiant classification

04 p0749 A70-14592

Models constructed for advanced evolution phases in massive convective red supergiants, considering carbon, Ne and oxygen burning in stellar core

05 p0919 A70-16935

Red giants and supergiants intrinsic radiation polarization characteristics

08 p1569 A70-20826

Statistical analysis of rotation and macroturbulence in early type Ia and Iab supergiants, discussing evolutionary effects

08 p1571 A70-20908

Canopus energy curve derived from UV spectrophotometry on Gemini 11 flight, noting agreement with model atmosphere

10 p1946 A70-24983

Radial velocities of supergiant distant stars in southern Milky Way regions of I Sco Association

11 p2113 A70-26465

OB supergiants atmospheric expansion indicated by medium-dispersion spectra, noting mass loss rate increase with luminosity and effective temperature

11 p2117 A70-26657

Quasar model based on supermassive stars relaxation oscillations, considering energy requirements

12 p2300 A70-27380

A-type supergiants microturbulence, determining atmospheric small scale velocity fields

14 p2641 A70-30885

H gamma profiles of B type supergiants, discussing electron density levels, Stark effect, Balmer and Paschen series breaks, etc

14 p2652 A70-31385

Massive hydrogen burning stars evolution with pulsational mass loss based on minimizing pulsational instability degree to specify mass loss rate

15 p2803 A70-32612

Supergiant alpha Car UV spectrophotometry from Gemini 11, comparing with model atmosphere

17 p3161 A70-34888

IR star types T-Tauri, B-emission and M supergiants observations using UVBRI photometry

21 p3890 A70-41163

Stellar population of young clusters containing red supergiants, determining spectral types and luminosity classes

22 p4102 A70-42979

Single normal main sequence stars rotational velocities compared with giant, supergiant, Be, A and metallic line stars and Population II objects

23 p4248 A70-44802

Early type Ia and Iab supergiant stars macroturbulence and rotation, investigating spectral line broadening, mass loss and angular momentum

23 p4250 A70-44813

Red supergiants location in H-R diagram, discussing significance of mass loss, rotational mixing and neutrino emission as stellar model mechanisms

24 p4403 A70-45393

High luminosity M type star photometry, determining supergiant intrinsic properties, interstellar extinction mean law and galactic evolution

24 p4410 A70-45764

Hercules 89 supergiant abnormal IR radiation flux originating in circumstellar shell of solid particles radiating at observed long wavelengths

24 p4410 A70-45772

SUPERHARMONICS

Steady state ultraharmonic oscillations of first and third order in yielding systems with linear work hardening law

19 p3542 A70-38059

SUPERHEATING

Extended chain crystals of hexagonal Se temporary superheating before final melting, presenting melting equation

01 p0126 A70-10222

Entropy fall in superheated liquid related to vapor bubble growth from finite so-called zero radius to critical radius, noting pressure effects

07 p1418 A70-18645

Phase growth of free vapor bubbles in water, ethanol and isopropanol at uniform superheats under normal and zero gravity

07 p1418 A70-18646

Extended chain polymer crystals temporary superheating before final melting, discussing hexagonal selenium crystals data

11 p2069 A70-25803

Metallic shell with passive thermal protection coating, solving boundary value problem for high temperature heating with simplified mathematical model

20 p3739 A70-40296

SUPERHETERODYNE RECEIVERS

Functionally integrated superheterodyne receivers design by applying microwave IC technology, providing weight reduction, interconnecting cables elimination and circuit interface problems minimization

02 p0267 A70-12055

Laser transmitter and optical superheterodyne receiver performance tests at 6328 A, demonstrating aperture size effect and noncoherent operation superiority

03 p0450 A70-13675

Integrated X band superheterodyne receiver design using planar transmission lines as components

16 p2874 A70-33388

Radio wave holography with unequal reference to signal frequency, recording linear object with superheterodyne receiver

19 p3420 A70-37290

Amplitude modulated optical band signal detection, comparing optimal direct photodetection and superheterodyne receivers sensitivities

21 p3785 A70-40633

Dynamic noise performance equivalence of phase locked or double superheterodyne tracking loops, using noise free external generator

21 p3793 A70-42180

SUPERHIGH FREQUENCIES

Airborne SHF communication system for operation with passive satellites installed in C-121 aircraft

01 p0045 A70-11122

X band electron paramagnetic resonance spectrometer with ruby maser preamplifier, correcting misinterpretation and noise figure analysis

01 p0114 A70-11196

Transient Faraday rotation of S-band telemetry carrier observed during Pioneer 6 occultation by solar corona, correlating with decametric solar radio bursts

02 p0369 A70-12059

X band radar with horizontally and vertically polarized antennas to compare sea clutter suppression by decorrelation and constant alarm rate receivers

03 p0451 A70-13935

Low loss low sidelobe N-way microwave optical power divider for single plane electronically steerable Ku band phased array antenna

04 p0655 A70-14624

S-band omnidirectional antenna patterns measurement procedure and results for Apollo spacecraft configurations, tabulating measure gains

06 p1019 A70-17507

Radiometers with low noise parametric amplifiers at centimeter wavelengths for radio telescope, discussing design, performance and Venus observations

08 p1495 A70-21065

Gunn diode parallel combinations fabricated for X band with n-type GaAs crystals, discussing output power at CW operation

08 p1477 A70-21296

Radio sources linear polarization measurements at 6 cm wavelength, noting intensity changes with polarized flux and position angle

08 p1578 A70-21535

SHF avalanche transit time oscillator with FM noise reduction by injection phase locking

08 p1462 A70-21594

X band Gunn oscillators amplitude modulation by pulse signals from another Gunn diode

09 p1646 A70-22707

Solid state multistage high power avalanche amplifier at X band

10 p1847 A70-23890

Italian SIRIO SHF experiment for study of atmospheric effects on satellite link, discussing system design and performance [AIAA PAPER 70-502]

11 p1999 A70-25442

X band mechanically despun antenna system with RF and motor drive assembly developed for earth coverage communications satellite [AIAA PAPER 70-422]

11 p2001 A70-25481

Microwave acoustic delay lines design and fabrication for UHF to X band frequency ranges

11 p2005 A70-26163

SHF tactical satellite communications ground terminals, discussing system concepts, relationship to satellites and design problems

11 p2031 A70-26259

Italian Sirio project, describing SHF propagation and communication, cosmic ray and confined plasma experiments

11 p2011 A70-26604

Power ferrite modulator and switch for SHF band based on Faraday rotation principle

12 p2199 A70-28000

X band Gunn oscillators for binary FSK regenerator operation employing signal injection triggering

12 p2199 A70-28015

High speed linear phase and amplitude modulation of X band Gunn oscillators

12 p2199 A70-28016

High power L- and S-band transferred-electron oscillators from epitaxial GaAs

13 p2377 A70-28978

Galactic continuum surveys at 8000 MHz by radio telescope, noting North American nebula and Cyg X region

13 p2491 A70-29096

Fabry resonator X band model with step or slope rimmed mirrors, noting periodical trend of power losses

14 p2558 A70-31320

S band transmitters frequency deviations optimization enabling designer to determine optimum value within constraints of associated receiving equipment

14 p2559 A70-31373

SHF radio telescope for solar radio wave observation, describing design and performance

15 p2717 A70-31897

Atmospheric humidity determination from satellite radio emission measurements at SHF

15 p2771 A70-32071

S band telemetric signals reception transmitted by Apollo 12 during occultation behind lunar disk, discussing lunar surface reflectivity

15 p2699 A70-32290

Point to point and radar return attenuation measurements at SHF through clear air and rain

16 p2858 A70-32928

Radio source 3C279 position during October 1969 occultation by sun, determining SHF deflection in solar gravitational field

16 p2972 A70-33049

Integrated X band superheterodyne receiver design using planar transmission lines as components

16 p2874 A70-33388

X band acoustic delay lines using thin film piezoelectric transducers

16 p2874 A70-33391

High power microwave pulse generation in SHF region, discussing use of boat-grown and epitaxial GaAs diodes

16 p2875 A70-33396

Microwave oscillator by transposing principle of spin oscillator at low frequencies in nuclear magnetic resonance in X band

16 p2877 A70-33413

S band GaAs FET fabrication technology and frequency response

16 p2877 A70-33414

- Terminal negative resistance of X band Gunn diodes, discussing frequency conditions for modulation and parametric amplification 16 p2877 A70-33417
- RFI measurements at X band on LES-7 prototype pulsed plasma thruster 17 p3149 A70-35669
- External SHF signal effects on multifrequency spectrum of reflex klystron coupled with long waveguide 17 p3055 A70-35682
- Transmit only solid state radar module built with microstrip techniques for phased array systems operating at L and S dual bands 17 p3056 A70-35899
- Radiation polarization measurements of natural underlying surfaces in centimeter range, noting dependence on sighting angle 18 p3250 A70-36967
- Electro-optical SHF modulator characteristics calculation from light wave interaction with traveling wave 19 p3443 A70-37291
- Magnetization oscillation in single crystal yttrium-iron garnet under fluctuating SHF magnetic field 19 p3484 A70-37625
- Breakdown electric field strength in S band microwave cavity for dry air, water vapor and mixture 19 p3423 A70-37757
- S band telemetry antenna with electronic tracking and polarity diversity for remote location missile testing 19 p3388 A70-37901
- InSb semiconductor, measuring small signal microwave conductivity for hot electron region at 9.4 GHz in high electric DC fields 19 p3488 A70-38747
- Centimeter wave transmitting and receiving equipment for studying nanosecond pulse propagation 20 p3632 A70-39627
- Multifrequency oscillator system with reflex klystron loaded by waveguide line, confirming spectrum conversion under action of SHF signal 20 p3598 A70-40299
- SHF and EHF waves simultaneous propagation over slant line-of-sight overwater path, comparing phase variations and fading for signal coherence 20 p3588 A70-40301
- Rainfall effects on EM wave propagation at centimeter and millimeter wavelengths 20 p3588 A70-40310
- X band electromagnet horn antennas, measuring triangular shape dielectrics effects on radiation pattern 20 p3599 A70-40312
- SHF-EHF region uses, discussing microwave radiometry and applications to radio astronomy and meteorology 21 p3799 A70-41421
- CW silicon SHF TRAPATT diode oscillator, discussing double sided design and fabrication 21 p3800 A70-42118
- Italian Sirio satellite with local and foreign ground stations network measuring SHF wave propagation variables 23 p4158 A70-43753
- Optimum junction area for maximum microwave output power of silicon IMPATT diodes for X band operation 23 p4167 A70-43775
- X band horn antennas precision phase center measurement technique for high resolution system applications 23 p4176 A70-44966
- P-n junction conductance at superhigh frequencies in breakdown region with simultaneous tunneling and impact ionization 23 p4232 A70-45064
- SUPERIMPOSITION [MATHEMATICS]**
- U SUPERPOSITION [MATHEMATICS]**
- SUPERMAGNETS**
- U HIGH FIELD MAGNETS**
- SUPERNOVAE**
- White dwarf mass changes during cooling, describing white dwarf collapse-type I supernova outbursts relationship 01 p0174 A70-10197
- Heavy nuclei survival in cosmic rays Colgate supernova acceleration model, assuming plasma wave instability in shock wave 02 p0357 A70-11788
- Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation 03 p0564 A70-13221
- Physical conditions of stars in presupernova stage for type II supernovae with outburst expected due to Fe-He transition in core, confirming lower mass limit 03 p0566 A70-13314
- Supernova light emitted from surrounding gas layer, describing gas density role in type I and type II events 04 p0748 A70-14590
- Pulsars pulse duration and shape as key to neutron stars linkage with supernova explosions 04 p0750 A70-14749
- Radio emission distribution from supernova remnants and galactic magnetic field 06 p1139 A70-17323
- Polarized and unpolarized emission measurements of W 44 supernova remnant with radio telescope, showing results for eastern portion of source 07 p1383 A70-19405
- Supernova pulsars parameters prediction based on Crab and Vela observations, discussing dispersion, period, flux density, etc 07 p1389 A70-20218
- Cosmic rays origin, discussing galactic theory of supernovae and formation mechanisms for energy spectra and composition of sources 07 p1371 A70-20327
- Relativistic particles formation associated with supernovae outbursts estimated to determine relativistic electrons mechanism in Crab Nebula 08 p1564 A70-20552
- Supernova remnant luminosity dependence on central star rotation period, deriving parameters for pulsars in Cas A 08 p1570 A70-20897
- Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation 08 p1580 A70-21654
- Supernovae and remnants - Conference, New York, November 1967 09 p1748 A70-21987
- International search for supernovae, considering future projects 09 p1748 A70-21988
- Supernovae and remnants, data concerning radio brightness distribution of Tycho supernova remnant and Cassiopeia and Crab Nebula origin 09 p1748 A70-21989
- Supernovae remnants evolution, properties and galactic distribution, discussing criteria for catalog listing and remnants as X ray sources 09 p1749 A70-21990
- Relativistic gravitational stellar collapse calculations for stars exceeding neutron star limit, discussing results in terms of supernovae or neutrinos 09 p1749 A70-21991
- Supernovae hydrodynamics, discussing early light curves energy requirements and shock wave dynamics in terms of neutrino diffusion 09 p1749 A70-21992
- Late stage stellar evolution association with supernovae in terms of gravitational collapse and exploding light emission using evolutionary model 09 p1749 A70-21993
- Iron peak nuclei synthesis by charged particles under supernova mechanism conditions predicted by hydrodynamic conditions 09 p1749 A70-21994
- Gravitational radiation detection from pulsating neutron star, considering asymmetries in gravitational collapse of massive stars as origin 09 p1749 A70-21996
- Supernova fluorescent light excited by radiation impingement on material surrounding explosion site, assuming explosion time and UV energy 09 p1749 A70-21997
- Supernovae remnants X ray emission associated with explosion process generating relativistic particles, indicating Crab Nebula as X ray object 09 p1749 A70-21998
- Crab Nebula continuing energetic activity study indicating origin in nebula center and association with supernova remnant 09 p1750 A70-22000
- Neutrino emission effect on collapse of supermassive stars, estimating energy radiated, discussing envelope explosion 10 p1938 A70-24022
- Pulsars in supernova remnants emitting X rays 10 p1933 A70-24627
- Pulsars nature based on hypothesis for main energy of novae and supernovae bursts equaling gravitational energy of collapse 11 p2117 A70-26708
- State equations of matter at high density and zero temperature, considering neutron stars relationship to supernova explosions and collapse 12 p2298 A70-27059
- Gravitational forces accompanying radiation bursts of metric outside collapsing supernova core 12 p2300 A70-27393
- Red dwarfs and supernovae determination in stellar clusters, outlining statistical probability technique for total number of flare stars 12 p2308 A70-27872
- Polarization of extragalactic radio sources and supernova remnants emphasizing instrumental effects 12 p2309 A70-27894
- Planetary orbit after central star supernova explosion, discussing effect on pulsar period 14 p2640 A70-30787
- Runaway stars and pulsars near Crab Nebula, discussing binary system explosion and remnant motion 14 p2642 A70-30894
- Absolute photovisual magnitude and classification of supernova in NGC 3389 spiral galaxy, using UVB measurements and comparison stars 15 p2797 A70-31611
- Galactic cosmic rays origin in terms of statistical mechanical model of supernova explosions 15 p2799 A70-31793
- Relativistic particles formation associated with supernovae outbursts estimated to determine relativistic electrons mechanism in Crab Nebula 15 p2805 A70-32707
- Sounding rocket X ray survey of Cassiopeia region for supernova remnants and galactic source distribution 17 p3153 A70-34528
- Nucleosynthesis in supernova models based on neutrino energy transport 17 p3153 A70-34529
- X ray spectrum analysis for Crab, Cas A and SN 1572 supernova remnants 17 p3156 A70-34830
- Central pulsars effects on supernova envelopes, examining luminosity, energy input, shape and light curve 18 p3314 A70-36333
- Soft X ray extended source in Cygnus Loop, indicating supernova remnant 18 p3310 A70-37022
- Atmospheric fluorescence observation of supernova energetic photon short pulse burst, using photomultiplier 19 p3500 A70-38079
- Cosmic rays shock from small mass supernovae explosions 19 p3507 A70-38128
- Pulsars postulated as supernova remnants sources of local cosmic rays 19 p3511 A70-38159
- Supernova remnants catalog based on radio surface brightness, deriving galactic distribution and testing theories for nonthermal radio sources evolution 20 p3709 A70-40077
- X ray sources location, distribution and spectral characteristics, investigating emission from supernova remnants 21 p3872 A70-40662
- Cas A and SN 1572 supernova remnant radio sources X ray spectra, investigating absorption by interstellar medium 21 p3873 A70-40666
- Low energy cosmic ray positrons arising from Co decay in Ni 56-Co 56-Fe 56 reaction chain in supernova Si burning shells 21 p3879 A70-40927

Linearized potential theory application in aerodynamic design and analysis of supersonic aircraft emphasizing far field viewpoint [AIAA PAPER 69-1132] 01 p0002 A70-10608
Fuel requirements for supersonic aircraft, discussing operational conditions and fuel quality problems 03 p0544 A70-14032

Energy state approximation for supersonic aircraft performance optimization with extension to maximum range problems, noting comparison with complex dynamic models [AIAA PAPER 68-877] 04 p0623 A70-13376

Aerodynamic characteristics, stability and controllability of swept wing and delta wing supersonic aircraft at subsonic velocities 05 p0796 A70-16966

Supersonic aircraft control and stability at low speeds, discussing sweepback angle, low aspect ratio, lift, etc 05 p0797 A70-17088

Acoustic power output from supersonic jets, considering aerodynamic and acoustic characteristics for supersonic exhaust velocities [AIAA PAPER 70-237] 06 p1132 A70-18115

Supersonic aircraft aerodynamic properties and control systems performance, considering piloting of delta wing fighters 07 p1194 A70-19640

Concorde aerodynamic design compromise between high and low speed requirements, kinetic heat problems and materials selection [AIAA PAPER 69-759] 07 p1195 A70-20399

Trisonic high pressure wind tunnel simulating flow conditions on large transonic aircraft, noting high Reynolds number capability 09 p1655 A70-22023

Pathogenic mechanisms of fatal injuries during supersonic ejection determinable by radiography 09 p1627 A70-23114

Swept and delta wing supersonic military aircraft stability and controllability, discussing variation in maximum lift coefficient as function of Mach number 09 p1611 A70-23129

Supersonic booms occurrence and propagation, discussing aircraft operating conditions for prevention of effect on ground 10 p0000 A70-24130

Clear air turbulence effect on supersonic aircraft safety and comfort, noting shallow zones and effects of topography and thunderstorms 10 p1912 A70-24506

Rigid wing subsonic and supersonic civil and military aircraft utilizing aerodynamic lift at takeoff and landing 13 p2344 A70-28543

Transonic aircraft testing capabilities and limitations, considering tunnel wall interference and Reynolds number effects [AIAA PAPER 70-580] 13 p2348 A70-29876

Rocket and supersonic aircraft weapon systems, discussing missile delivery and interception 13 p2507 A70-30000

Supersonic aircraft lateral stability and controllability design, discussing directional and weathercock stabilities 15 p2673 A70-31625

Supersonic aircraft stability and controllability during turns about longitudinal and vertical axes 16 p2840 A70-33204

SST inlet steady state pressure defects and random pressure fluctuations determining TF30 engine/inlet compatibility [AIAA PAPER 70-632] 16 p2834 A70-33530

Subsonic and supersonic aircraft dynamic loads under conditions of variable atmospheric density 17 p3013 A70-34685

Airframe-inlet integration for supersonic tactical fighters, testing wind tunnel models [AIAA PAPER 70-933] 17 p3149 A70-35843

Subsonic and supersonic transport aircraft design, discussing supercritical wing concept, fuel consumption reduction, composite aircraft structures, short haul transports, etc 17 p3022 A70-35854

Unsteady aerodynamics prediction of supersonic elastic aircraft, discussing aerodynamics influence coefficients/AIC/ method refinement [AIAA PAPER 70-944] 20 p3558 A70-39583

Supersonic aerodynamic design tools, discussing technological application of high speed computer and limitations [AIAA PAPER 68-1018] 22 p3958 A70-42701

Exhaust nozzle/airframe interference test evaluation for twin engine supersonic fighter [AIAA PAPER 69-430] 22 p3958 A70-42702

Two stream ejector type propelling nozzles for supersonic aircraft, investigating various configuration effects over range of secondary/primary air flow ratios [ICAS PAPER 70-48] 23 p4133 A70-44145

SUPERSONIC AIRFOILS

Quasi-conical supersonic wings with curved subsonic leading edges, discussing perturbation potential, boundary conditions, homogeneous flow and gothic and ogee planforms 21 p3747 A70-42108

Two dimensional flow about supersonic airfoil, considering trailing Taylor columns behavior like sonic booms 22 p4009 A70-42629

SUPERSONIC BOUNDARY LAYERS

Radiation from and panel response to supersonic turbulent boundary layer, emphasizing panel mode coupling to acoustic field 04 p0615 A70-15081

Analytical model for jet interaction induced separation of supersonic turbulent boundary layers, conducting flat plate tests at Mach 4 [AIAA PAPER 70-765] 17 p3007 A70-34486

Temperature and Mach number distributions measurements on supersonic turbulent boundary layers for reanalyzing heat transport [AIAA PAPER 70-744] 17 p3066 A70-34499

Probstein-Gold model for ablated materials crosshatching patterns, using interaction between inelastic deformable surface and supersonic turbulent boundary layer [AIAA PAPER 70-768] 17 p3009 A70-34504

Roughness effects on heat transfer to surfaces in supersonic compressible turbulent boundary layer [AIAA PAPER 70-742] 17 p3066 A70-34505

Acoustic measurement of surface pressure fluctuations in supersonic transitional boundary layers 17 p3092 A70-35482

Supersonic boundary layer interaction with shock wave produced by wedge slope 20 p3557 A70-39139

SUPERSONIC COMBUSTION

Compression wave mechanism of supersonic combustion controlled by mixing, discussing multiple injector design, thermal compression and geometry effect 02 p0399 A70-12041

Supersonic diffusion flames produced by subsonic and supersonic free jet injection of hydrogen into high enthalpy airstream 02 p0399 A70-12042

Combustor geometry and heat release effects on supersonic combustor thrust efficiency, considering shock-free, normal and oblique shock situations 02 p0354 A70-12043

Turbulent mixing and supersonic combustion theories applied to internal flow, comparing various mixers and relating mixing intensity to kinetic energy of turbulence 02 p0399 A70-12045

Optimum performance for Mach 3 to 7 fixed geometry ramjet with successive subsonic and supersonic combustion, noting lifting wing conjunction 02 p0355 A70-12365

Flow field of jet spoilers downstream from nozzle, accounting for main stream and secondary jet mixing and fuel injection problems during supersonic combustion 03 p0608 A70-14098

Energy supply for supersonic flight air suction propellant systems using external supersonic combustion, discussing Caret wing and pressure effect 04 p0785 A70-15160

Combustion and flow characteristics associated with direct injection of liquid hydrocarbons into high speed air stream [AIAA PAPER 70-88] 06 p1182 A70-18198

Combustion kinetics in supersonic gas flows past various bodies, assuming exothermal and inverse recombination reactions behind adiabatic shock wave after induction period 08 p1596 A70-20855

Supersonic turbojet propulsion systems and components - NATO/AGARD Conference, Varenna, Italy, May 1967 [AGARDOGRAPH-120] 08 p1559 A70-21926

Hydrogen-air reaction by singular perturbation methods for temperature and pressure values of supersonic combustion, changing reaction velocity by initial stoichiometry 11 p1995 A70-26624

Large scale hydrogen fueled supersonic combustor test at simulated Mach 8 flight, describing fuel injector design [AIAA PAPER 70-715] 16 p2965 A70-33539

SUPERSONIC COMBUSTION RAMJET ENGINES
Fuel injection and mixing and piloted ignition in supersonic flow design principles for scramjet engine, evaluating eddy viscosity model for parallel injection 02 p0354 A70-12047

Premixed compression initiated supersonic combustion, noting sensitivity to small perturbations in inlet flow variables [AIAA PAPER 68-995] 07 p1421 A70-19318

Supersonic burning ramjet /scramjet/ performances, discussing vehicle engine integration, superiority to ordinary ramjets at hypersonic speeds, combustion process-flow field interaction, etc [AGARDOGRAPH-120] 08 p1600 A70-21930

Scramjets for recoverable booster transporting payloads into earth orbits 15 p2811 A70-32258

Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc [AIAA PAPER 69-827] 21 p3867 A70-41752

SUPERSONIC COMBUSTION RAMJET MISSILE U RAMJET MISSILES U SUPERSONIC COMBUSTION RAMJET ENGINES

SUPERSONIC COMMERCIAL AIR TRANSPORT NT BOEING 2707 AIRCRAFT

SUPERSONIC COMPRESSORS
Supersonic compressor applications for airborne vehicles propulsion systems, discussing axial flow compressors, three dimensional design methods, supersonic radial machines, etc [AGARDOGRAPH-120] 08 p1434 A70-21929

Supersonic axial flow compressors, studying shocks shared by rotor and stator to obtain high efficiency 11 p2101 A70-25819

Rotor wakes intrastator transport effects on high Mach number axial flow compressors performance, considering stagnation temperature profile and rotor blade loss factor [ASME PAPER 70-GT-39] 18 p3209 A70-36869

Cascade tunnel testing role in designing supersonic compressor rotor blading for lower jet engine weight and fuel consumption [ASME PAPER 70-GT-79] 18 p3305 A70-36885

Low drag supersonic compressors for aircraft engines, calculating start and cruise conditions of quasi-isentropic flow cascades 21 p3745 A70-41405

SUPERSONIC DIFFUSERS
Reattachment of supersonic jet with turbulent shear boundary layer abruptly expanding into axisymmetric parallel diffuser, using surface flow technique 04 p0619 A70-15323

Isentropic inlet diffusers of short design length at supersonic velocities 06 p0963 A70-17233

Flow distribution for short isentropic supersonic inlet diffusers, using method of characteristics and Oswatich and Connors procedures 06 p0963 A70-17234

Circular blade cascade design for supersonic vane diffuser of radial flow centrifugal compressor 16 p2837 A70-33764

SUPERSONIC DRAG
Slender bodies optimum aerodynamic shape for supersonic velocities, discussing minimum wave drag and total drag two step analysis using calculus of variations 03 p0408 A70-13801

Slender wings and fuselages resistance at zero lift in supersonic flow, using Karman and Moore linear theory [DGLR-69-28] 04 p0616 A70-15154

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique [AIAA PAPER 69-140] 09 p1605 A70-23221

Maximum thrust and drag reduction for supersonic missiles by base burning, showing dependence on chemical reaction and Mach number 12 p2158 A70-28208

Supersonic skin friction measurements in grit type boundary layer transition trips with zero heat transfer 13 p2343 A70-29969

Blunt nose effects on drag of flared conical body in supersonic flow, considering pressure loss through shock wave and vorticity 17 p3196 A70-35237

Drag prediction for Ballute and parachute trailing decelerators at supersonic speed and zero angle of attack, using flow field computations [AIAA PAPER 70-1177] 21 p3746 A70-41836

Cylindrical afterbodies base pressure drag under powered supersonic flight, modifying Korst flow model recompression criterion 22 p3959 A70-42713

Minimum-drag boattail configurations optimization for supersonic flow, determining wave drag coefficients

22 p3961 A70-42714

Vane type vortex generators to prevent turbulent compressible boundary layer separation, measuring drag in supersonic flow

23 p4133 A70-44527

Supersonic convective electric arcs with magnetic stabilization in sulfur hexafluoride, examining aerodynamic drag and plasma column slanting

23 p4227 A70-44554

SUPERSONIC FLIGHT

Combustion effects on base pressure of two dimensional body in supersonic flight, considering air-fuel ratio, combustion length and free stream Mach number

02 p0354 A70-12046

Dynamic stability of flexible aircraft fuselage in controlled supersonic flight at zero angle of attack, basing analysis on elastic oscillation equations

03 p0579 A70-13418

Sonic boom overpressures generated by aircraft level rectilinear flight at supersonic speed in temperature and wind stratified atmosphere, calculating atmospheric correction factor

05 p0794 A70-16411

Second order wave structure theory for shock wave system from body in supersonic flight analyzed for planar flows

05 p0790 A70-16797

Normal force component distribution and aerodynamic pressure position on rocket bodies at supersonic and hypersonic velocities

06 p0964 A70-17238

Opening distance and inflation time prediction for parachutes deployed supersonically based on subsonic performance

07 p1394 A70-19725

Supersonic flight vehicle plasma sheath effect on effective range of onboard radar installation, discussing SNR

08 p1461 A70-20869

Flow past yawed delta wing at supersonic flight velocities, obtaining real velocity near singular surface and replacing Mach number by perturbed parameter

10 p1799 A70-24126

Supersonic aerial target wing synthesis using sandwich construction with graphite-epoxy laminate skins bonded to Al honeycomb, achieving significant weight reduction

12 p2160 A70-27118

Supersonic flight simulation in hypersonic wind tunnels for developing hypersonic air breathing propulsion, describing ceramic storage heaters

13 p2384 A70-28666

Climatology of safe threshold Mach number and air-plane ground speed for boomless supersonic cruise, considering San Francisco-New York route

14 p2530 A70-30606

Overpressure, rise time and wave period of sonic boom signatures at ground level from unaccelerated supersonic overflights

14 p2530 A70-30608

Sonic boom causes and nature, considering aircraft configuration and attitude and minimizing effects

15 p2673 A70-31852

Sympathoadrenals activity in pilots during supersonic flight, investigating urinary catecholamine output

15 p2690 A70-31891

Suborbital space transports problem solution by recoverable jet orbital or jet assisted aircraft, discussing implications of Concorde supersonic flight

18 p3350 A70-36663

Liability for damages due to supersonic flight sonic booms, discussing pertinent provisions in Dutch and international law

19 p3553 A70-37561

Reentry bodies of revolution subsonic and supersonic aerodynamic characteristics

20 p3558 A70-39704

Aerodynamic forces on flexible launch vehicles and missiles in supersonic flight based on first order method, solving boundary value problem for surface velocities

21 p3746 A70-41853

Supersonic flight altitude stability, studying effects of velocity, lift-drag ratio, thrust law, wind direction, engine unstarts, etc

22 p3961 A70-42712

Airframe installation effects at transonic speeds on underwing supersonic cruise exhaust nozzles, using flight and wind tunnel tests

22 p3960 A70-43274

Elastic fuselage flight vehicle dynamic stability at supersonic speeds, using automatic pilot stabilization

23 p4139 A70-44157

SUPERSONIC FLOW

Flow and pressure distribution for large normal injection along surface in supersonic stream solved numerically for two dimensional or axisymmetric body and wedge

01 p0001 A70-10336

Supersonic flow around thin warped delta wing, taking into account current separation at subsonic leading edges for pressure distribution and aerodynamic characteristics

01 p0002 A70-10546

Two velocity hydrodynamic scheme for describing dynamic behavior of two phase supersonic flow past slender body

01 p0003 A70-10995

Characteristics method for calculating steady supersonic flow of burning gas mixture past wedge and rotating cones

01 p0218 A70-11018

Topological properties of plane flow in subsonic region behind smooth shock wave in uniform supersonic flow, discussing shock wave convexity

01 p0608 A70-11580

Fuel injections into supersonic air stream through isolated normal ports and porous wall, using interferometry, schlieren and high speed photography

02 p0354 A70-12044

Fuel injection and mixing and piloted ignition in supersonic flow design principles for scramjet engine, evaluating eddy viscosity model for parallel injection

02 p0354 A70-12047

Water vapor condensation by homogeneous nucleation measured for cluster number using laser light scattering compared with theory in condensing supersonic flow

02 p0279 A70-12048

Wing design optimization for steady and unsteady supersonic flow through computerized simulation and study of leading and trailing edge shape

02 p0223 A70-12208

Magnetically balanced arcs in supersonic external flows, indicating central core with differential Lorentz forces analogous to Grashof number in free convection phenomena

02 p0347 A70-12233

Supersonic flow separation at antisymmetrical delta wing edges, noting eddy layer and vertical velocity fields effects on aerodynamic characteristics

02 p0224 A70-12625

Supersonic plasma jets studied spectroscopically, determining atomic levels populations, population inversion conditions, electron temperature and concentration distributions, etc

03 p0531 A70-13254

Supersonic flow in dihedral angle between intersecting wings and in space between parallel wings, using integrating wave equation by Volterra method

03 p0407 A70-13492

Boundary layer separation in divergent portion of conical ducts in overrelaxed supersonic regime in air and water, showing influence of medium, pressure and thrust

03 p0467 A70-13682

Carbon dioxide supersonic flows, describing numerical integration procedure for chemical and vibrational relaxation

03 p0440 A70-13743

Two dimensional and axisymmetric bodies shapes providing minimum wave drag to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves

03 p0409 A70-13863

Supersonic unsteady state three dimensional flow around blunt bodies with detached shock wave

03 p0409 A70-13864

Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave

03 p0409 A70-13865

Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations

03 p0468 A70-13867

Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air

03 p0409 A70-13874

Reaction of three dimensional shock wave with turbulent boundary layer in supersonic flow around plate

03 p0409 A70-13876

Integral method for studying wall heat transfer influence on compressible boundary layer on cone at angle of attack in supersonic flow

03 p0409 A70-13953

Similarity properties of laminar or turbulent boundary layer separation in uniform supersonic flow, discussing wall cooling, pressure evolution, etc

03 p0469 A70-14234

Numerical analysis of near equilibrium flow regions in chemically relaxing gas mixtures past blunt bodies at supersonic speeds

04 p0666 A70-14603

Viscous ideal gas supersonic flow past spheres, using integral relations based on Navier-Stokes equations

04 p0613 A70-14606

Supersonic fluid amplifier performance and design for use as power amplifier and high outlet leg differentials in vacuum environments

04 p0626 A70-14846

Difference methods application to supersonic gas flow past blunt body and unsteady axisymmetric flow past body of unspecified configuration, analyzing stability

04 p0670 A70-14957

Schlieren system converted into Kraushaar diffraction grating interferometer with isolated optical platform, considering applications to supersonic flow over airfoil shapes

04 p0689 A70-15016

Monograph on weak interactions on cones in supersonic and hypersonic flows, discussing flow divergence, measurement errors and data reliability

04 p0615 A70-15141

Piston theory application to plates and shells stability in supersonic gas flows, considering critical velocities determination for asymmetric flows and oscillations

04 p0617 A70-15196

Supersonic nonequilibrium two phase flow in Laval nozzle from numerical solution of quasi-linear hyperbolic equations

04 p0617 A70-15229

Heat fluxes, shear stresses and pressures distribution at spike on body in supersonic flow from asymptotic solutions of Navier-Stokes equations

04 p0673 A70-15232

Structural characteristics of supersonic twisting underexpanded air jet, using filming and schlieren photography

04 p0618 A70-15246

Fundamental matrix asymptotic forms obtained for supersonic and subsonic three dimensional steady flows past body in uniform stream of viscous thermally conducting fluid

04 p0673 A70-15320

Fluid mechanical problems with pressure distribution determined by interaction between external supersonic inviscid flow and inner laminar viscous layer

04 p0674 A70-15529

Supersonic wake flow visualization, obtaining direct photographs of various smoke streamlines

04 p0621 A70-15595

Ideal equivalent gas method for studying thermodynamic properties in supersonic gas flows behind shock wave

05 p0831 A70-15872

Supersonic flow past elliptic cone of small eccentricity treated as axisymmetric conical flow perturbation

05 p0790 A70-16506

Inviscid gas injection through flat plate in supersonic flow, obtaining self similar solution by integrating differential equation for stream function

05 p0791 A70-16963

Steady and frictionless supersonic flow of ideal gas of constant heat capacity around slightly deformed cone, calculating force exerted by gas

06 p0964 A70-17240

Three dimensional supersonic flow around delta wings, considering lifting and thickness problems, leading edge characteristics, separated and non-separated shock waves, etc

06 p0964 A70-17241

Supersonic mixing CU chemical lasers, discussing lasing action time duration

06 p1083 A70-17945

Isoenergetic mixing and reattachment processes of two dimensional supersonic turbulent separated flow, modeling mixing process by constant pressure theory

06 p1037 A70-18039

Residence time of foreign gas injected into recirculation region of wake behind slender body in axisymmetric supersonic flow

06 p0968 A70-18040

Cold ducted supersonic flow of premixed ethylene and air ignition by hot turbulent jet

06 p1131 A70-18057

Transpiration and film cooling systems comparison for high speed flows with foreign gas injection effects

06 p1179 A70-18073

Liquid sheet and jet breakup in supersonic gas stream, characterizing breakup mechanism by gross jet fracture

06 p1039 A70-18109

Integral moment method for interactions between laminar boundary layer and external supersonic flow applied to hypersonic laminar boundary layer near sharp expansion corner

06 p1039 A70-18111

Lifting surface theory for calculation of steady subsonic and supersonic flow over various wing and airplane configurations, emphasizing finite element load prediction method

06 p0971 A70-18114

Explosive blast wave effects on flight vehicle in supersonic flow, using conical blast generator and short duration supersonic wind tunnel

06 p0972 A70-18127

Supersonic flow separation over rearward facing step, measuring upstream boundary layer, lip shock and shear layer formation by pitot probe and surface pressure survey

06 p0973 A70-18153

Laminar boundary layer on cone at incidence in supersonic flow evaluated by pressure distribution technique, comparing heat transfer, pitot probe measurements, etc [AIAA PAPER 70-48] 06 p0974 A70-18189

Water droplets and air supersonic mixing, determining droplets size and optical properties [AIAA PAPER 70-90] 06 p0975 A70-18199

Unified model for transverse gaseous jet penetration into supersonic stream agreeing with measured flow field properties [AIAA PAPER 70-93] 06 p0976 A70-18201

Time of flight spectroscopic measurements in arc heated supersonic molecular beam using algebraic relations, sensing modulated beam by Orbitron type detector 06 p1111 A70-18266

Kinetic theory of rarefied supersonic flow over finite plate, calculating molecular velocity distribution functions for flowfield 06 p0981 A70-18356

Drag coefficients of sharp and blunt cones in rarefied supersonic flow for bluntness ratios and angles of attack 06 p0981 A70-18360

Sphere drag in near free supersonic molecular flow 06 p0983 A70-18377

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method 06 p1053 A70-18562

Uniform supersonic flow with receding shock wave past smooth profile 07 p1187 A70-18674

Two phase supersonic continuum flow of dispersed equal gas-liquid volume ratio in shock tunnel using continuum theory, considering sound propagation 07 p1256 A70-19311

Infinitely wide plate bending at small angle of attack in supersonic gas flow, obtaining critical flow rate equal to divergence rate 08 p1588 A70-21175

Relaxational oscillations produced by interaction between rarefaction wave in external two dimensional supersonic flow and turbulent near wake 09 p1603 A70-22426

Shock layer thickness in supersonic inviscid gas flow past blunt bodies, calculating boundary layer near stagnation point 09 p1603 A70-22442

Shock wavefront configurations before inclined obstacles in supersonic flow, studying inclination angle role 09 p1604 A70-22443

Massive blowing from porous cone with embedded shock wave in supersonic flow, assuming inviscid and conical injected flow field 09 p1662 A70-23216

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary gas injection into supersonic stream [AIAA PAPER 69-1] 09 p1733 A70-23217

Cross hatching on surface of ablating bodies exposed to supersonic turbulent boundary layer flow using mathematical model 09 p1605 A70-23232

Interaction shock shape prediction for gaseous and liquid injection in supersonic flow, using solid body and complementary models 09 p1662 A70-23244

Friction drag on thin pyramidal lobed bodies in supersonic flow, analyzing detached shock region and body geometry function 09 p1606 A70-23612

Supersonic flow behind cone, studying bottom pressure and stagnation zone dependence on incident flow parameters and static pressure distribution 09 p1663 A70-23623

Supersonic leading edge problem solved by ellipsoidal model using discrete ordinate method compared with BGK model solution 10 p1797 A70-23957

Hodograph or Riemann invariants method generalization for nonelliptic systems, discussing three dimensional potential supersonic flows 10 p1863 A70-24087

Perturbed equations solutions for plane supersonic steady and nonsteady gas flows, considering propagation of perturbations in initially nonstationary main flow 10 p1866 A70-24107

Three dimensional supersonic gas flow solution by numerical method of characteristics, discussing direct and inverse tetrahedral and semicharacteristic schemes 10 p1798 A70-24117

Nonautonomous boundary value problems for plates in plane and three dimensional supersonic flows, obtaining eigenfunctions of vibration by Laplace transform 10 p1956 A70-24118

Wing in supersonic flow analyzed for surface pressure taking into account nonlinear effects of vibrations 10 p1798 A70-24119

Supersonic flows over flaps and backward facing steps, using steady state heat transfer measurement technique involving uniform heat flux dissipation at model surface 10 p1798 A70-24120

Triangular conical wing with supersonic leading edges analyzed for aerodynamic forces in supersonic flow 10 p1798 A70-24121

Heat sources effect on pressure and velocity of supersonic flow, discussing iteration procedure and asymptotic expansion 10 p1799 A70-24125

Wind tunnel study of entropy extremum upon critical streamline in supersonic three dimensional flow past blunt bodies at zero angle of attack 10 p1800 A70-24131

Vibrational and dissociation relaxation effects on plane shock wave structure and supersonic flow around blunt bodies 10 p1801 A70-24150

Supersonic gas flow past sphere investigated for characteristics using Fabry-Perot etalon 10 p1888 A70-24258

External supersonic potential flow effects on turbojet engine ring and needle nozzle performance, considering gas overexpansion operation 10 p1930 A70-24286

Numerical analysis of forced parametrically excited plate vibration in plane supersonic flow, using digital computer 10 p1958 A70-24527

Analog computation in supersonic steady flow and digital technique for wing-fuselage and wing-tail interactions [ONERA-TP-804] 10 p1802 A70-24544

Model testing gas flow calculation in system emitting electron beam into atmosphere through supersonic gas seal 10 p1895 A70-24590

Polygonal wings oscillatory motions in unsteady supersonic flow 10 p1803 A70-24778

Head wave distance from body determined for slender pointed profile in subsonic region of transonic flow 10 p1803 A70-24780

Unsteady supersonic flow past tail-body system with harmonic oscillatory motions 10 p1803 A70-24789

Supersonic flow around slender polygonal wings with nonsymmetrically distributed incidence using method for conical flow around angular wings 10 p1805 A70-24797

Nonuniform partitioning of flowfield in three dimensional laminar boundary layer in supersonic conical flow at zero angle of attack, using numerical integration 10 p1804 A70-25192

Gasdynamic functions of supersonic flow past spherically and ellipsoidally blunted inverted cones 11 p1973 A70-25522

Boundary layer transition detection at supersonic speeds using thin film gages to infer local laminar and turbulent supersonic skin friction 11 p2035 A70-25970

CW chemical laser performance using molecular hydrogen diffused into supersonic fluorine atoms streams 11 p2063 A70-26067

Lambda type pseudoshock /shock during supersonic flow deceleration to subsonic in duct/, investigating mechanism by schlieren photography 11 p2037 A70-26408

Monograph on axially symmetric tandem grids for supersonic flow deceleration to subsonic speeds, using schlieren optical tests and pressure measurements 11 p1977 A70-26525

Computer applications in aerospace research involving flutter, supersonic flow, unsteady wing flow, etc 12 p2191 A70-27025

Insulator wall temperature effect on supersonic two temperature MHD generator channel flow at open and short circuit conditions 12 p2163 A70-27067

Numerical solution for steady supersonic inviscid flow around smooth conical bodies by solving elliptic partial differential equations for conical flow 12 p2155 A70-27202

Hall MHD generator with supersonic flow instability to magnetoacoustic waves propagating antiparallel to steady electric current in dense weakly ionized gas 12 p2281 A70-27805

Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow [AIAA PAPER 69-137] 12 p2211 A70-27826

Subsonic, transonic and supersonic laminar boundary layers acceleration and cooling effects, discussing heat transfer and gas enthalpy 12 p2211 A70-27830

Perfect gas supersonic flow with constant velocity, pressure and density around finite nonaxisymmetric body at small angles of attack 12 p2158 A70-28197

Three dimensional laminar boundary layer equations for body of revolution at angle of attack in supersonic gas flow derived for equations 12 p2158 A70-28198

Perturbation theory of supersonic steady anisotropic flow with radiative heat transfer using hyperbolic characteristic coordinates 12 p2334 A70-28203

Supersonic flow in inner and outer regions of annular flow by method of singularities, obtaining Abel type integral equations for every step [DFVLR-SONDDER-37] 12 p2158 A70-28207

Supersonic and hypersonic motion past circular cone at angle of attack, analyzing for velocity and pressure distributions by linearizing conical motion equations 12 p2158 A70-28213

Turbulent boundary layer and base pressure profiles of supersonic flow past conical models in wind tunnel 12 p2159 A70-28229

Vortex layer and entropy of supersonic gas flow past circular cones at incidence using surface velocity corrections 12 p2159 A70-28230

Vibrational relaxation effect on supersonic flow past nose section of blunted body 12 p2159 A70-28231

Specific heat ratio and configuration effects on flow in subsonic, transonic and supersonic sections of Laval nozzle 12 p2159 A70-28233

Monge equation in small perturbation method of characteristics applied to propagation phenomena in three dimensional supersonic gas flow 13 p2386 A70-28490

Steady expansion flows at three dimensional supersonic edges with small corner angles using analytical method of characteristics 13 p2338 A70-28491

Pressure distributions and heat transfer at wall calculated to investigate supersonic laminar reattachment 13 p2338 A70-28953

Gaseous injection into supersonic flow, investigating secondary Mach number and injection angle effects on flowfield in supersonic wind tunnel [AIAA PAPER 70-552] 13 p2339 A70-29017

Turbulent base pressure on conical afterbodies in supersonic axisymmetric flow, including initial direction effect [AIAA PAPER 70-555] 13 p2340 A70-29020

Sting diameter and cylindrical protuberance length effects on axisymmetric body base pressure in turbulent supersonic flow [AIAA PAPER 70-585] 13 p2342 A70-29885

Supersonic rarefied flow over sharp flat plate with merged shock layer and free molecular-continuum transition, using electron beam fluorescence 14 p2529 A70-31028

Uniform supersonic flow with receding shock wave past smooth profile 15 p2671 A70-31466

Supersonic nonequilibrium gas mixture flow past segmental bodies nose areas to simulate Venusian atmosphere, determining temperature, pressure and concentration distributions 15 p2796 A70-31483

Finite difference algorithm for supersonic three dimensional steady flow past blunt bodies with generating line bends, allowing for gas equilibrium and frozen states 15 p2671 A70-31495

Nonequilibrium dissociation effect on supersonic oxygen flow past inverted blunted cones at angle of attack, considering thermal fluxes and aerodynamic forces 15 p2671 A70-31496

Convective heat transfer in Cu spherical shell and plate in supersonic rarefied gas flow at zero angle of attack from wind tunnel experiments 15 p2824 A70-31497

Aerothermopressor experiment in subsonic and supersonic gas flow compared with numerical solutions of equations 15 p2720 A70-31900

Thin cylindrical shells flutter analysis in supersonic flow, using linearized potential theory 15 p2815 A70-31916

Laminar to turbulent transitions determination in sub/supersonic flows, reviewing methods based on hot-wire anemometer output signal [ONERA-TP-841] 15 p2720 A70-31918

Linear model of edge effect in supersonic gas flow past dihedral angle of intersecting wings, using Abel equations 15 p2672 A70-32127

Microwave probe for measuring electron density profile in supersonic arc jet plasma 15 p2741 A70-32433

Schlieren optical method for measuring He jet penetration into supersonic flow 15 p2741 A70-32520

High temperature combustion wind tunnels for investigating gas and liquid fuel combustion stabilized by shock waves in supersonic flow

16 p2996 A70-32991

Supersonic and hypersonic gas flow past blunt bodies, using finite difference and integral relation methods

16 p2890 A70-33244

Supersonic flows past two dimensional blunt bodies, using method of ascertainment

16 p2833 A70-33248

Ignition and combustion in ducted turbulent supersonic flow, discussing premixed and unpremixed ethylene

[AIAA PAPER 70-720]

16 p2997 A70-33488

Boron particles ignition and combustion in supersonic air stream, emphasizing axial and lateral two phase flow injection

[AIAA PAPER 70-737]

16 p2856 A70-33496

Two dimensional sonic secondary fluid jet interaction with uniform primary supersonic stream in wind tunnel

[ASME PAPER 70-FE-33]

16 p2835 A70-33638

Blockage ratio effect on supersonic zone with shock layer interaction on nonlifting circular arc airfoils at transonic speeds in wind tunnels

16 p2835 A70-33674

Equations of supersonic and hypersonic motion past circular cone by linearized method based on small perturbations with respect to nearly incompressible flow

16 p2835 A70-33746

Ackeret theory for infinite aspect ratio, rectangular and trapezoidal constant cord wings with arbitrary spanwise variation of profile in supersonic flow

16 p2836 A70-33748

Combined internal pressure and axial loading influence on aeroelastic stability of thin walled cylindrical shell in supersonic flow field

16 p2991 A70-33851

Supersonic plasma flows charge density levels and spatial and temporal variation, discussing theory and use of electrostatic probes

16 p2912 A70-33862

Reaction jets for control force generation in supersonic environment, analyzing downstream pressure distributions for two dimensional jet interactions

16 p2838 A70-33890

Steady isentropic weakly perturbed supersonic flows past arbitrary slender tapered wings with subsonic leading edges

16 p2838 A70-33971

German monograph on supersonic flows calculation past slender bodies of revolution using perturbation approach based on Poincare-Lighthill-Kuo method

16 p2839 A70-34082

Interface stability of thin liquid film adjacent to supersonic air flow, using sphere-cone and blunt wedge test configurations

[AIAA PAPER 70-801]

17 p3005 A70-34461

Convective heat transfer at solid boundaries in separated and reattached subsonic and supersonic flows, considering booster base heating

17 p3007 A70-34484

Supersonic air flow control by electrostatic discharges tested by Mach 3 wind tunnels, using schlieren system for bow shock wave

[AIAA PAPER 70-759]

17 p3008 A70-34492

Atmospheric reentry nosetip shape changes supersonic flow, considering rough surface effects on heat transfer

[AIAA PAPER 70-827]

17 p3196 A70-35193

Supersonic electrically conducting gas flow in flat channel with dielectric walls in inhomogeneous magnetic field

17 p3141 A70-35334

Supersonic axisymmetric flows past bell-shaped bodies of varying bluntness, using Godunov finite difference method

17 p3012 A70-35887

Steady supersonic flow past conical bodies at yaw, adapting Telenin numerical method

17 p3012 A70-35889

Shock layer and combustion in supersonic flows about conical bodies at various angles of attack

17 p3012 A70-35894

Plane nonconducting elastic plate with one side impinged upon by supersonic conducting gas flow, determining magnetic field effect on flutter vibrations

18 p3336 A70-36135

Supersonic conductive gas recombination fronts for arbitrarily oriented magnetic field, allowing for dissipative coefficients

18 p3294 A70-36255

Plane stationary supersonic flows with laminar separation zones at large subcritical Reynolds numbers

18 p3206 A70-36257

Drag optimal stern section of plane body at supersonic flow, allowing for friction forces

18 p3206 A70-36261

Flow velocity and pressure on thin wing of small span width near sonic speed, using parabolic type linear equation

18 p3207 A70-36374

Compression and expansion characteristics of steady supersonic flow passing along yawing slender body of rotation, linearizing differential equations

18 p3207 A70-36382

Pressure distribution shock pattern and impact wave resistance in frictionless plane parallel and source shaped supersonic flow

18 p3207 A70-36385

Equivalent bodies of revolution method extension for use in semicircular approximation technique, calculating pressure distribution of nonaxisymmetric blunt bodies

18 p3208 A70-36569

Viscous supersonic flow near sharp convex corner, discussing visual observation and quantitative surveys of velocity and pressure profiles

18 p3208 A70-36659

Finite plate length effect on two dimensional supersonic turbulent boundary layer with large distributed surface injection

18 p3242 A70-36688

Favorable pressure gradient effect on compressible two dimensional supersonic turbulent boundary, using temperature and pressure probes and shear balance

18 p3242 A70-36690

Skin friction measurement in supersonic flows by thin film heated element method, describing thermal boundary layer properties

18 p3243 A70-36710

Quasi-two dimensional supersonic cascade flow, taking into account transverse stream contraction effect

18 p3210 A70-37206

Method of characteristics for two dimensional steady supersonic gas flows with foreign particles in plane and axisymmetric nozzles

18 p3210 A70-37228

Perfect and dissociating gas nonstationary supersonic flow around sharp profile of finite thickness analyzed by linearization and method of characteristics

19 p3351 A70-37242

Supersonic flow of rarefied plasma around plane bodies, allowing for electric field effect on ion motion

19 p3351 A70-37302

Ionized argon supersonic flow velocity and local electron density by optical methods

19 p3480 A70-38173

Shock wave radiation from supersonic ducted rotor, determining sound power at blade passing harmonic frequency

19 p3353 A70-38614

Steady compressible supersonic planar flow of viscous heat conducting fluid under linearization freestream conditions, describing slip flow past finite flat plate

20 p3557 A70-39228

Combustion of decomposition products of Mg based pyrotechnic fuel in supersonic flow, obtaining heating device characteristics

20 p3736 A70-39266

Two phase flows and atomization jet during fluid injection into supersonic flow, determining vaporization range

20 p3736 A70-39268

Three dimensional supersonic and hypersonic gas flow by Oseen equations, obtaining asymptotic flow field

20 p3609 A70-39656

Supersonic flow past slender bodies in presence of strong blowing, extending solution by expansion at leading edge of thin plate

20 p3559 A70-39771

Steady sub and supersonic flow calculations behind receding shock wave, using finite difference scheme

20 p3611 A70-39803

Turbulent boundary layer on cone in supersonic flow in presence of inflowing foreign substance, considering local surface friction coefficient

20 p3559 A70-39814

Wedge angle large amplitude slow oscillations in hypersonic and supersonic flows, examining attached bow shock

20 p3559 A70-40288

Transport model for flow field and convective heat transport in planar turbulent supersonic base flow

21 p3744 A70-41030

Flow field, heat transfer rates and reattachment surface wall temperature of planar supersonic turbulent flow

21 p3744 A70-41036

Supersonic flows with imbedded separated regions, emphasizing cavities with recompression against solid boundary layer

21 p3745 A70-41372

Aerodynamic parameters of ionized Ar supersonic steady one dimensional nonviscous flow in thermodynamic equilibrium and subjected to Laplace accelerating forces

21 p3858 A70-41444

Nonuniform free stream supersonic flow past aerodynamic decelerators, calculating inviscid flow fields by method of characteristics

21 p3746 A70-41837

Surface pressure coefficient dependence on specific heat ratio for yawed conical lifting bodies in supersonic streams

21 p3747 A70-41877

Upstream mass injection effects on downstream heat transfer of supersonic reacting boundary layer

21 p3952 A70-42079

Decelerated channel flow dynamics of ideal gas with supersonic velocity closed by compression shock, using finite difference method

21 p3747 A70-42203

Supersonic air flow interaction with transverse gas jet from plate orifice

21 p3749 A70-42222

One dimensional supersonic flow of ideal conducting gas in linear channel under transverse magnetic field

21 p3861 A70-42228

Unsteady supersonic flow around oscillating cross-shaped wing-fuselage system, determining perturbation velocities and pressure distributions

22 p3958 A70-42609

Two dimensional flow about supersonic airfoil, considering trailing Taylor columns behavior like sonic booms

22 p4009 A70-42629

Conducting fluid supersonic flow past slender body of revolution in circular wind tunnel under inclined magnetic field, investigating MHD interference problem

22 p3958 A70-42669

Liquid jet breakup in supersonic airstream, using high speed photographic techniques

[SMPT PREPRINT 90]

22 p4036 A70-43063

Heat transfer in heated wire in supersonic flow near molecular transition zone, estimating anemometer sensitivity to motion fluctuations

22 p3959 A70-43240

Perfect gas supersonic flow with constant velocity, pressure and density around finite nonaxisymmetric body at small angles of attack

22 p3960 A70-43322

Three dimensional laminar boundary layer equations for body of revolution at angle of attack in supersonic gas flow derived for equations

22 p3960 A70-43323

Nickel surface layer fine structure changes in supersonic air flows at various temperatures and times

22 p4056 A70-43341

Potential flow around oscillating shell-plate structure subjected to supersonic gas flow at zero angle of attack, solving nonlinear aerodynamicity problem

22 p4117 A70-43362

Curved shock waves regular and Mach reflection in steady supersonic flow at plane wall

[ICAS PAPER 70-11]

23 p4180 A70-44122

Aerodynamic problems due to mixed subsonic and supersonic/transonic flows on swept wings, nacelle lips and helicopter rotor blades

[ICAS PAPER 70-14]

23 p4132 A70-44125

Steady irrotational gas flow characteristics calculation from finite difference scheme for three dimensional method of characteristics, considering supersonic nozzle flow

23 p4133 A70-44308

Heat transfer from turbulent boundary layer interacting with shock and expansion waves in supersonic flow

23 p4134 A70-44573

Reacting gas supersonic flow over two dimensional base, examining reaction rate effects on base pressure

23 p4135 A70-44626

Inviscid rotational supersonic flow near three dimensional stagnation point, examining solutions for compatibility with vortical shock layer boundary conditions

23 p4183 A70-44692

Two dimensional laminar near wake of slender body in supersonic flow at high Reynolds number

23 p4135 A70-44693

Thin liquid film/melt layer on body in supersonic flow, examining crosshatched wave patterns stability

23 p4183 A70-44979

Pointed ogival body of revolution in supersonic flow field, investigating local pressure distributed by variational methods

23 p4136 A70-44992

German monograph on supersonic strongly deflecting retardation cascades covering flow geometry and application to axial flow compressor stage

24 p4287 A70-45095

Kinematically unsteady aerodynamic coefficients consistent with stiffness and inertia properties of lifting surface in supersonic flow by finite element method

24 p4287 A70-45154

Thin cylindrical shell flutter in linearized supersonic potential theory, considering Mach number, aspect ratio and pressure effects on critical wave number

24 p4420 A70-45263

Numerical analysis of fuel combustion in supersonic stationary flows of hydrogen air mixture past bodies by two-component reaction kinetics model

24 p4428 A70-45500

Oscillatory motion of triangular wing with conical body of arbitrary cross section in supersonic flow, considering wing-body interference effects
24 p4288 A70-45592

SUPERSONIC FLOW INLETS

U SUPERSONIC INLETS

SUPERSONIC FLUTTER

Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc
03 p0600 A70-14301

Liapunov second method extension to dynamical systems stability, illustrating wing torsional divergence and panel supersonic flutter
05 p0941 A70-16564

Nonlinear flutter of three dimensional simply supported curved plates, employing quasi-steady supersonic aerodynamic theory
09 p1780 A70-23212

Flutter suppression in elastic finned beams in supersonic flow controlled automatically by rudder deflection according to flexural strain
09 p1785 A70-23615

Cylindrical shell segments supersonic flutter boundaries engineering estimates related to Saturn 5 booster, obtaining thickness requirement as function of panel geometry
[AIAA PAPER 68-284] 11 p2134 A70-25959

Wind tunnel interference effect on fluttering airfoils and panels supersonic speeds, studying pressure distributions for various tunnel aspect ratios and roof conditions
12 p2155 A70-27103

Parallel isotropic flat plates vibration and flutter in supersonic/subsonic flow over one surface, observing plane loadings and elastic medium stiffness effects
12 p2316 A70-27104

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc
12 p2327 A70-27823

Low aspect ratio plates flutter analysis for subsonic and supersonic models
16 p2991 A70-33888

Circular cylindrical shells with clamped ends, investigating supersonic panel flutter by two mode approach and Galerkin method
17 p3184 A70-34695

Supersonic panel flutter of circular cylindrical shells at critical dynamic pressure
17 p3188 A70-35227

Plane nonconducting elastic plate with one side impinged upon by supersonic conducting gas flow, determining magnetic field effect on flutter vibrations
18 p3336 A70-36135

Homogeneous orthotropic cantilevered rectangular plate with reinforcing ribs, calculating flutter in supersonic gas flow
18 p3336 A70-36140

Skew panels supersonic flutter and vibration calculated by matrix displacement method
21 p3933 A70-40586

Circular cylindrical shell supersonic panel flutter nonlinear analysis, using averaging and numerical integration methods
22 p4112 A70-42275

Low aspect ratio cantilever plate wings supersonic bending torsion flutter speed calculation, using spanwise and chordwise variables and potential energy principle
22 p4112 A70-42276

Thin circular cylindrical panels in supersonic gas current parallel to generatrices, calculating heterogeneity effect on flutter
22 p4113 A70-42603

Laminar circular cylindrical shells supersonic flutter characteristics determination by dynamic equilibrium boundary value problem eigenvalues analysis, obtaining critical flutter speeds
24 p4424 A70-45588

SUPERSONIC HEAT TRANSFER

Combustor geometry and heat release effects on supersonic combustor thrust efficiency, considering shock-free, normal and oblique shock situations
02 p0354 A70-12043

Performance analysis for electrothermal thruster using lithium propellant with supersonic heat addition
[AIAA PAPER 69-286] 06 p1129 A70-17159

Heat transfer on supersonic sweptback wing for case of laminar boundary layer with vortex distribution
07 p1187 A70-18921

Blunt base heat transfer in axisymmetric supersonic separated flow in axisymmetric near wake tunnel, comparing to previous data
13 p2523 A70-29989

Roughness effects on heat transfer to surfaces in supersonic compressible turbulent boundary layer
[AIAA PAPER 70-742] 17 p3066 A70-34505

SUPERSONIC INLETS

Diffused diaphragm pressure sensors in impact probes used in wind tunnel tests of dynamic response of supersonic air induction systems
06 p1074 A70-18605

Supersonic inlet role and nature in air breathing propulsion system, discussing inlet-engine matching by variable geometry
[AGARDOGRAPH-120] 08 p1434 A70-21928

Stable operating range of supersonic mixed compression inlet increase by air flow removal via throat bleed system
[AIAA PAPER 70-686] 16 p2967 A70-33585

Supersonic air intake unsteady buzz phenomenon, examining shear layer under cowl and boundary layer detachment at shock wave base for design improvement
21 p3744 A70-41262

M 3.5 two dimensional mixed compression inlet system with self restart using flexible variable ramp system
[AIAA PAPER 69-447] 22 p3959 A70-42707

SUPERSONIC JET FLOW

Particle velocity distributions in low density supersonic jets measured by molecular beam sampling technique and multidisk velocity analyzer
02 p0276 A70-11849

Turbulent reattachment of supersonic axisymmetric jet on cylindrical wall in air, investigating wall temperature effect on cavity pressure and heat flux
[ONERA-TP-758] 03 p0467 A70-13643

Thermal recovery factors at hemispheric probe stagnation point in low density supersonic jets of He-Ar and H-N mixtures
[ASME PAPER 69-WA/HT-27] 04 p0782 A70-14810

Supersonic jet flow from diverging nozzle into space with given pressure or into supersonic slipstream, noting barrel shock formation inside jet
04 p0617 A70-15235

Discrete components in noise spectrum of heated and unheated supersonic air jets, using axisymmetric and conical nozzles
04 p0618 A70-15247

Reattachment of supersonic jet with turbulent shear boundary layer abruptly expanding into axisymmetric parallel diffuser, using surface flow technique
04 p0619 A70-15323

Vorticity effects on drag friction and heat transfer near stagnation point of supersonic jet impinging on obstacle
05 p0833 A70-16290

Acoustic radiation from underexpanded supersonic main jet flow from nozzle impinged upon by annular jet
05 p0835 A70-16784

Interacting coaxial supersonic jet flows noise reduction based on noise distribution characteristics measurement in anechoic chamber
[AIAA PAPER 70-236] 06 p1040 A70-18112

Supersonic exhaust plume/boundary layer interactions, developing integral method and extending to turbulent interactions
[AIAA PAPER 70-230] 06 p1040 A70-18117

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements
[AIAA PAPER 70-92] 06 p0975 A70-18200

Species spatial distribution measured for He-Ar gas mixtures expanding in supersonic jets, compared to measurements with skimmer-nozzle arrangement
06 p1066 A70-18256

Translational relaxation in low density axisymmetric hypersonic free gas jet, describing transition from isentropic to free molecular flow
06 p1043 A70-18277

Supersonic free jets condensation, examining kinetics of reactions in mono- or diatomic gases
06 p1044 A70-18282

Supersonic molecular free jets using electron diffraction technique, discussing vibrational and condensation states
06 p1044 A70-18301

Stable flow distribution of sonic jet exhausting counter to low density supersonic airstream
07 p1189 A70-19982

Supersonic molecular beam source operation, discussing dominant degradation factors and nozzle beam generation intensities and energies improvement
07 p1341 A70-20104

Helium and argon atoms number densities radial profiles in supersonic free jets of binary gas mixtures by molecular beam sampling
07 p1341 A70-20105

Radicals in low pressure supersonic free jets, investigating production by flash photolysis
07 p1343 A70-20126

Supersonic gas jets applicability as vacuum locks for molecular fluxes at thermal velocity in magnetic trap
08 p1549 A70-20509

Heat exchange at stagnation point of subsonic and supersonic axisymmetric jets interacting with perpendicular plane partition, allowing for turbulence
08 p1482 A70-20919

Diffusive separation of Ar 36 and 40 and He in axisymmetric supersonic jet taking into account pressure diffusion
08 p1431 A70-21027

Supersonic air jet structure in central shock wave region affected by both Mach number and flow rarefaction
09 p1734 A70-22185

Supersonic jet force acting on target investigated for air and argon using dimensional analysis
10 p1804 A70-25122

Tapered resonance tubes matching supersonic air jet geometries considered for explosion hazards created by pneumatic system seals failure
11 p2035 A70-25981

Supersonic jet spoilers flow fields with various nozzle shapes to determine secondary jets penetration depth and mixing in wake
13 p2338 A70-28480

Apparent mass measurements of supersonic jet in incalculable flow regimes, determining dependence on Mach number at nozzle and on distance from exit
13 p2387 A70-28859

Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures
16 p2998 A70-33860

Nonequilibrium vibrational energy and relaxation equation for carbon dioxide-nitrogen molecular gas mixtures in supersonic free jet exhausting into vacuum
[AIAA PAPER 70-867] 16 p2895 A70-33910

Aerodynamic and acoustic characteristics of subsonic and supersonic jets from convergent nozzles with room temperature air supply
17 p3005 A70-34460

Mach disk structure in free low density expanding supersonic jet from static pressure probe measurements
17 p3068 A70-34696

Turbulent mixing of axisymmetrical supersonic air jet into hot air, investigating Mach number and temperature difference effects on axial decay of velocity
17 p3072 A70-35546

Base flow component of total drag for axisymmetric supersonic afterbody with single exhaust jet, considering turbulent mixing
17 p3011 A70-35656

Retrorocket jet size and structure for scientific instruments soft Mars landing, estimating off-optimum supersonic jet interaction with quiescent atmosphere
17 p3011 A70-35660

Viscosity effect on turbulent supersonic underexpanded jet flow into submerged region
18 p3206 A70-36262

Knudsen effusion in free molecular flows in supersonic jet during expansion through circular orifice, discussing power and heat transmission
18 p3346 A70-36379

Low temperature underexpanded supersonic gas plasma jets behind shock wave, analyzing rarefaction and viscosity effects on parameters distribution
19 p3352 A70-38185

Supersonic air jet noise spectrum analysis at various pressures
19 p3354 A70-38659

Supersonic jets noise spectra, using linear equations of moving medium acoustics
19 p3354 A70-38660

Discrete components of noise frequency spectrum of free supersonic jet
19 p3354 A70-38661

Multilayered and multiple supersonic jets, deriving dispersion equations for boundaries stability
19 p3354 A70-38663

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements
20 p3558 A70-39690

Supersonic weakly ionized plasma jet in argon, investigating axial and radial temperature profiles by electrical probe techniques and spectroscopic and photographic methods
20 p3685 A70-40463

Supersonic jet force acting on target investigated for air and argon using dimensional analysis
20 p3560 A70-40515

Solar chromosphere spicules acceleration via supersonic jet formed by magnetic field under gravity and Melon seed effect
21 p3925 A70-42192

Acoustic waves generation from decay region of pulsating supersonic jet expelled from nozzle
21 p3748 A70-42211

High speed plasma jet propagation, obtaining time of arrival measurements, brightness temperature, pressure and impact data
22 p4012 A70-43014

SUPERSONIC NOZZLES

Nonequilibrium effect of expanding water vapor condensation on supersonic nozzle flows with or without inert carrier gas
01 p0063 A70-10806

- Air flow density measurements with interferometer in supersonic square Laval nozzle, showing flow core motion and wave structure 01 p0064 A70-11000
- Supersaturated vapor condensation in supersonic nozzles, obtaining flow and droplet growth equations for local equilibrium condition 02 p0279 A70-12049
- Analytical method for design of supersonic flow and maximum thrust nozzles for chemically reacting gases, noting surface geometry [AIAA PAPER 70-129] 06 p0971 A70-18108
- Exhaust plume from underexpanded sonic and supersonic nozzles including boundary mixing analyzed by approximate model to predict Mach disk location [AIAA PAPER 70-229] 06 p0972 A70-18135
- Electronic-vibrational coupling in nonequilibrium MHD generator with molecular gas to suppress electrode layer shorting and recombination in supersonic nozzles [AIAA PAPER 70-41] 06 p0988 A70-18222
- Three dimensional supersonic nozzle geometry optimization using Lagrange multipliers and iteration for solving variational problem 10 p1798 A70-24115
- Adiabatic flow coefficient in supersonic nozzle with choked flow conducted over throat Reynolds number range 11 p1976 A70-25999
- Central shock and target displacement of underexpanded supersonic jets with obstacle at nozzle exit, using Toepler schlieren photographs 12 p2156 A70-27293
- Carrier gas effect on homogeneous condensation in supersonic nozzle using liquid drop theory 12 p2211 A70-27829
- Numerical method of characteristics for three dimensional supersonic nozzle flow field calculations 13 p2338 A70-28512
- Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump [AIAA PAPER 69-653] 13 p2386 A70-28513
- Flow disturbances and side forces in supersonic rocket nozzle due to gaseous secondary injection analyzed by semiempirical models 14 p2629 A70-30756
- Auxiliary inlet ejector and plug nozzle flight performance, describing design variation effects for high supersonic speeds [AIAA PAPER 70-701] 16 p2841 A70-33563
- Supersonic cylindrical ejectors without induced flow for rocket engine studies 16 p2837 A70-33763
- Shock waves in supersonic conical nozzle flow due to secondary gas injection, using conical lens for flow visualization 17 p3011 A70-35236
- Nonequilibrium recombination in supersonic nozzle of dissociated combustion products of hydrogen in air, investigating initial system and rate constants effect 20 p3582 A70-39269
- Supersonic nozzle damping, replacing parameters discontinuities across shocks by continuous variations 21 p3745 A70-41442
- Two layer gas flows in supersonic axisymmetric nozzles, using method of characteristics 21 p3748 A70-42210
- SUPERSONIC PRESSURE DISTRIBUTION**
U PRESSURE DISTRIBUTION
U SUPERSONIC FLOW
- SUPERSONIC SPEEDS**
 Surface shape determination for thin delta wing with variable geometry to minimize drag for given open and closed configurations and cruising supersonic speeds 01 p0002 A70-10547
- Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow 03 p0406 A70-13333
- Magnus effects on Apache sounding rocket at supersonic speeds, discussing spinning model and static tests [AIAA PAPER 70-207] 06 p1157 A70-18103
- Molecule spatial and velocity distributions of supersonic molecular beams, measuring scattering cross sections of He and Ar on noncondensable gases 06 p1043 A70-18252
- Generatrix shape determined for body of revolution moving at supersonic speed with minimum wave drag 09 p1603 A70-22434
- Initial blast wave axisymmetric shock-on-shock interaction for blunt bodies moving supersonically at zero angle of attack solved in Taylor series 10 p1797 A70-23954
- Gas stream velocity field produced by shock wave impinging against wing moving at supersonic speed 10 p1799 A70-24124
- Plane shock wave interaction with supersonic blunt body, considering pressure-time studies for stagnation point of flow 10 p1801 A70-24145
- Sphere supersonic motion in combustible gas mixture of given temperature and pressure, discussing constant density two front detonation wave model 12 p2334 A70-28242
- Stagnation point position and entropy at surfaces of supersonic paraboloids in perfect gas 12 p2160 A70-28250
- Correction to Smyrl results for perturbation pressure in interaction field behind plane shock diffracted by supersonically moving thin yawed wedge 13 p2338 A70-28822
- Infrasonic waves generation by supersonic translation of auroral electrojet currents 13 p2399 A70-29237
- Supersonic rigid cone motion in elastic medium, obtaining partial solutions to motion equation yielding boundary problem solution 13 p2341 A70-29508
- Simultaneous equations for motion location, speed and direction in acoustic tracking of supersonic objects, recording shock wave times of arrival with microphone system 13 p2450 A70-29988
- Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow 14 p2528 A70-30712
- Aerodynamic characteristics of transonic and supersonic blunt vehicles, reviewing numerical methods 17 p3012 A70-35895
- Supersonic boom intensity calculation on ground, assuming isobaric inhomogeneous atmosphere and weak shock wave 18 p3213 A70-36380
- Continuous surface of revolution parachute for supersonic/hypersonic speeds, performing wind tunnel tests [AIAA PAPER 70-1173] 21 p3754 A70-41840
- Crack propagation at supersonic velocities in K Cl crystals, noting plasma induction within specimen by laser pulse 21 p3940 A70-42033
- Accelerated supersonic motion of plate with attached shock wave at finite angle of attack in ideal gas, using perturbed nonstationary motion equations 21 p3748 A70-42209
- Aerodynamic lift, drag and momentum coefficients in supersonic regime for rectangular and trapezoidal wings with spanwise variable profile 22 p3958 A70-42615
- Wave-riders aerodynamics and heat transfer, investigating lift to drag ratios for supersonic and hypersonic vehicles [ICAS PAPER 70-18] 23 p4276 A70-44129
- SUPERSONIC STRIKE AIRCRAFT**
U ATTACK AIRCRAFT
U SUPERSONIC AIRCRAFT
SUPERSONIC TEST APPARATUS
 Wall thickness measurement by supersonic testing method based on resonance 24 p4336 A70-45681
- SUPERSONIC TRANSPORTS**
NT CONCORDE AIRCRAFT
 Sonic boom pressure signatures for uniform and maneuvering flight conditions determined for fighter and SST aircraft [AIAA PAPER 69-1134] 01 p0005 A70-10606
- SST Ti body frame optimum design for high temperature environment and economical and fatigue resistance requirements 02 p0386 A70-11937
- Atmospheric effects on SST, discussing turbulence, temperature, wind, cloud cover, hail, toxic gases, etc 02 p0325 A70-12218
- Atmospheric turbulence effects on accelerations experienced by passengers in supersonic and subsonic transport aircraft compared 02 p0325 A70-12219
- Atmospheric environment features bearing on supersonic transport aircraft operations and forecasting, discussing wind and temperature effects 02 p0325 A70-12220
- Meteorological data provision for supersonic civil transport operations, considering various flight phases 02 p0325 A70-12221
- Liquefied natural gas or liquefied methane as burning propulsion system for SST, examining storage volume, fuel-tank insulation and implosion danger 03 p0543 A70-12998
- Modified tailed delta configuration selection for U.S. SST, discussing power plant installation choice [RAES PAPER 17] 03 p0411 A70-13544
- FAA engineering approach to SST certification involving airworthiness standards development and coordination with industry and foreign governments 03 p0437 A70-14060
- Methane fuel systems for high Mach number supersonic transport aircraft on basis of minimum weight [SAE PAPER 69068] 05 p0894 A70-15835
- Aircraft configurations designed for eliminating sonic boom due to lift 05 p0791 A70-16798
- Orbit-shuttle and SST craft hypersonic flight vehicles design, discussing aerodynamic heating, shock stresses and propulsion system requirements 05 p0797 A70-17087
- Meteorological conditions effects on SST aircraft flight safety and economics, emphasizing stratospheric information for forecasting 06 p1095 A70-17193
- Aeronautical satellites application to supersonic air transportation economy, discussing navigational information relay between aircraft and control center 07 p1191 A70-18988
- Particle properties and solar flare radiation hazards for passengers in supersonic flight 08 p1435 A70-20632
- Air breathing engines for long range Mach 4 transport, discussing airplane mission profile- engine configuration interface [AGARDOGRAPH-120] 08 p1560 A70-21934
- ATC and SST operations in terminal area simulation study involving airline crews and controllers in real time traffic situation 09 p1721 A70-22946
- Aircraft certification of supersonic and jumbo jet transports assuring acceptable safety level 09 p1610 A70-22948
- Certification process for supersonic transports taking into account safety and economic considerations 09 p1610 A70-22949
- Primary long range navigation system for SST, considering operational goals, Doppler radar systems, navigation aids, inertial systems, etc 09 p1722 A70-23029
- Supersonic transports bow and rear shock pressure jump lower bounds for various physical constraints 10 p1805 A70-24558
- Design mean stress and ground-air cycles minimum stress effect on fatigue behavior of titanium alloy in supersonic transport operating environment [SAE PAPER 700033] 11 p2128 A70-25370
- Supersonic transport airworthiness criteria tentatively applied to road characteristics of automobiles 11 p1979 A70-25816
- Water vapor pollution of stratosphere by supersonic transports, considering effects on temperature, cloudiness, albedo, etc 11 p2077 A70-26618
- Air transport and European cooperation involving supersonic transports, jumbo jets and STOL aircraft 12 p2334 A70-26966
- Titanium structural element allowances requirements and test programs for SST design 12 p2318 A70-27132
- International safety standards for SST airworthiness 12 p2161 A70-27599
- SST feasibility for U.S., considering program costs, financing, investment return and airport and community noise aspects 12 p2162 A70-27991
- Temperature prediction accuracy over 24-hr period for supersonic transport flight operations 13 p2443 A70-28549
- Elastomeric seals and sealants selection for SST, describing tests in air, fuel vapors and hydraulic fluids at elevated temperatures 13 p2418 A70-28668
- Weather forecasting for SST operations, discussing wind, temperature, turbulence, clouds, etc 13 p2445 A70-29494
- SST aircraft fuels and lubricants, discussing fire hazard and pollution minimization 13 p2473 A70-29999
- CAT and small scale atmospheric motions in relation to supersonic transport and space shuttle design and operation 14 p2609 A70-30602
- Mesoscale slope limits in constant pressure surfaces relation to g-forces on aircraft at SST altitude, using radiosonde measurements 14 p2530 A70-30607
- Northern Hemisphere temperature atlas for SST cruise altitudes, estimating probabilities of enroute temperatures and risk increase 14 p2609 A70-30609
- Meteorological effects on air and noise pollution at U.S. airports 14 p2530 A70-30610
- SST system safety program, discussing federal office structure, planning and control, design support, integration and evaluation, requirement analysis and failure recurrence control 15 p2675 A70-32214
- Aircraft accidents during descent, approach and landing, discussing B 747, CSA and SST 15 p2675 A70-32216
- Bypass door control system for SST axisymmetric intake operation in external compression mode, obtaining dynamic performance [AIAA PAPER 70-695] 16 p2966 A70-33558
- Supersonic transport sonic boom theory and effect reduction, discussing Whitham rule, bow shock, overpressure, engine and aircraft design and shock wave control 16 p2843 A70-34263

Alloy applications to Boeing supersonic transport airframe and components, discussing materials characteristics and manufacturing processes 17 p3099 A70-34451

SST flight efficiency trends, discussing breakthrough and development method and Concorde aerodynamic, propulsion and structural history [AIAA PAPER 70-871] 17 p3016 A70-34811

Bora-Sond atmospheric probe providing two stage minimum cost high altitude sounding for supersonic transport /SST/, discussing hot water propulsion system 17 p3178 A70-35257

SST electrohydraulic primary and standby brake control systems, discussing design and advantages [AIAA PAPER 70-913] 17 p3024 A70-35825

Boeing 2707 SST horizontal tail multiple channel actuation system features 17 p3020 A70-35827

Jet A kerosene deposit accumulation problem and proposed SST fuel tank design [SAE PAPER 700256] 18 p3214 A70-36825

Electronic attitude director indicator /EADI/ for supersonic transport, employing CRT display, head down TV and microvision sensors 19 p3463 A70-37911

ATC integration of SST, discussing en route and terminal projects of national airspace system, modular automation, instrument flight rules, etc 19 p3467 A70-38633

Supersonic transport radiation hazards to flight crew, passengers and population, discussing dosages, probabilities, solar cosmic ray encounters, warning systems, etc 20 p3700 A70-39923

Human disturbance from SST overflight sonic booms, discussing overpressure, rise times and durations 23 p4137 A70-44016

SST configurations minimizing sonic booms obtainable for given length and weight [ICAS PAPER 70-23] 23 p4138 A70-44110

U.S. SST flight deck instrumentation and cockpit displays during flight, discussing economic analysis of operations [ICAS PAPER 70-59] 23 p4139 A70-44155

Boeing 2707 SST design for low community noise, discussing engine-airframe matching effect [SAE PAPER 700808] 24 p4290 A70-45906

Atmospheric pressure surface sharp slopes at SST altitudes producing vertical acceleration based on temperature gradients inspection 24 p4372 A70-46050

Automatic control system for Boeing SST engine air intakes, optimizing engine performance and controlling noise propagation 24 p4396 A70-46214

SUPERSONIC TURBINES

Supersonic fluid turbomachine components and systems innovations and performance trends [AGARDOGRAPH-120] 08 p1434 A70-21927

Supersonic turbine blade rows design, discussing boundary layer interaction around leading edges and flow around trailing edges 19 p3490 A70-38223

SUPERSONIC WAKES

Nonisothermal plasma perturbed by supersonic body, studying plasma rarefaction and condensation cones, particle density, etc, in wake 03 p0407 A70-13413

Supersonic missile drag reduction through wake heating assuming conical shaped missile tail and flow nonseparation [DFVLR-SONDDR-36] 04 p0616 A70-15165

Flowfield and chemical kinetics model to calculate nitrogen dioxide chemiluminescence wake emission [AIAA PAPER 68-702] 04 p0620 A70-15335

Supersonic wake flow visualization, obtaining direct photographs of various smoke streamlines [AIAA PAPER 69-346] 04 p0621 A70-15395

Free recirculation areas in wake of flame holders used for flame stabilization at bluff bodies in supersonic flow 06 p0965 A70-17244

Residence time of foreign gas injected into recirculation region of wake behind slender body in axisymmetric supersonic flow [AIAA PAPER 70-111] 06 p0968 A70-18040

Base mass injection effects of various gases on slender body supersonic near wake stability, diffusion and cooling [AIAA PAPER 70-110] 06 p0970 A70-18075

Two dimensional supersonic turbulent near wake saddle point singularity during recompression analyzed by including transverse momentum integral equation [AIAA PAPER 70-228] 06 p1039 A70-18106

Two dimensional supersonic wake transition characteristics noting effect of heat transfer from vehicle or model body 09 p1605 A70-23184

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347] 11 p2051 A70-25987

Blunt base heat transfer in axisymmetric supersonic separated flow in axisymmetric near wake tunnel, comparing to previous data 13 p2523 A70-29989

Wedge and cylinder high supersonic wakes stability and transition at various Reynolds numbers 17 p3006 A70-34465

Two dimensional supersonic wake behind heated slender flat plate, considering flow properties in transition zone 17 p3006 A70-34466

Steady state laminar flow model for near wake of slender body in supersonic flow 17 p3006 A70-34467

Turbulence in supersonic wake behind flat plate at zero incidence and heat transfer rate, using hot-wire anemometer 19 p3403 A70-37528

Turbulent mixing in supersonic cone near wake, using laser planogram technique for flow visualization 19 p3351 A70-37529

Base pressure behind supersonic vehicle, examining Crocco-Lees mixing theory critical point in laminar near wake 21 p3747 A70-42109

Low pressure supersonic wake measurement by differential interferometer in double pass polarized light [SMPTE PREPRINT 95] 22 p4036 A70-43060

Supersonic wakes visualization and photographic measurement by schlieren techniques, using amplitude subtraction and He-Ne laser [SMPTE PREPRINT 94] 22 p4036 A70-43061

SUPERSONIC WIND TUNNELS

60 cm intermittent blowdown type trisonic wind tunnel, discussing main parts basic dimensions and characteristics determination method, detailing design and construction 01 p0055 A70-10148

Holographic interferometry with pulsed ruby laser holocamera for examining flow distribution in supersonic free jet wind tunnel 03 p0480 A70-12948

Thermal protective device for models exposed to flow buildup in intermittent wind tunnel, offering straightforward design, easy applicability, low cost and favorable experimental conditions [ONERA-TP-755] 03 p0463 A70-13627

Pre-set Mach number control in supersonic wind tunnel, evaluating effects of nozzle installation, stagnation temperature drop and pressure errors 06 p1028 A70-17912

Explosive blast wave effects on flight vehicle in supersonic flow, using conical blast generator and short duration supersonic wind tunnel [AIAA PAPER 70-221] 06 p0972 A70-18127

Supersonic wind tunnel flow discontinuities effect on oscillatory pressures 07 p1257 A70-19338

Aerodynamic subsonic and supersonic wind tunnels parameter measurement methods including static and total pressure, current direction, velocity, density, etc 09 p1674 A70-22314

Undried atmospheric air humidity effect on pressure and water vapor supercooling in supersonic wind tunnel nozzles 09 p1606 A70-23613

Condensation start dependence on air humidity at inlet and nozzle geometry applied to supersonic wind tunnel using undried atmospheric air 09 p1606 A70-23614

C-4 supersonic free jet test cell, discussing Concorde development contribution and model tests on full scale cell nozzle 11 p2031 A70-25853

Free jet test facility for supersonic engine/ intake combination testing, discussing benefits to aircraft flying hours, development costs and safety 11 p2101 A70-25854

Wind tunnel interference effect on fluttering airfoils and panels supersonic speeds, studying pressure distributions for various tunnel aspect ratios and roof conditions 12 p2155 A70-27103

Vacuum supersonic wind tunnel air continuous dehumidification by using multistage centrifugal blower with/without heat exchanger 12 p2206 A70-27153

Boundary layer transition at high Mach numbers on adiabatic wall, showing effects of wind tunnel size, surface roughness and freestream disturbances [AIAA PAPER 70-586] 13 p2342 A70-29884

Intermittent blowdown supersonic wind tunnel as economic test facility covering subsonic test velocity range, discussing data quality [AIAA PAPER 70-581] 13 p2342 A70-29889

Laminar boundary layer transition on sharp cone at zero yaw in supersonic wind tunnels, correlating aerodynamic noise disturbances with transition Reynolds numbers [AIAA PAPER 70-799] 17 p3006 A70-34462

Supersonic air flow control by electrostatic discharges tested by Mach 3 wind tunnels, using schlieren system for bow shock wave [AIAA PAPER 70-759] 17 p3008 A70-34492

Supersonic cascade wind tunnel performance evaluation, using compressor blades of simple geometric shapes [ASME PAPER 70-GT-110] 18 p3238 A70-36848

Short duration tube wind tunnel supersonic testing, noting Saturn S-IC base heating and solid propellant rocket base burning tests 20 p3606 A70-39698

SUPINE POSITION

Human nostril airflow resistance during supported sitting and lateral recumbency and crutch pressure, discussing ipsilateral nasal congestion mechanisms 08 p1448 A70-21874

Blood flow redistribution during sustained high skin temperatures of men in supine position 12 p2169 A70-27654

Energy consumption in male subjects during walking and running in erect and supine position under simulated gravity 13 p2351 A70-29335

Human acceleration resistance and psychomotor behavior under emergency flight conditions, including high temperature exposure and remaining in clinostatic position 17 p3037 A70-35135

Body position effect on oxygen saturation of regional pulmonary venous blood and arterial-venous shunts in intact dogs 21 p3766 A70-42153

Age determined hemodynamic reactions in men and women performing walking motions in lying position 22 p3970 A70-42908

SUPPORT SYSTEMS

NT GROUND OPERATIONAL SUPPORT SYSTEM

NT GROUND SUPPORT SYSTEMS
Performance characteristics analysis of large area roll-up solar arrays based on support structure size and weight [ASME PAPER 69-WA/ENER-11] 04 p0770 A70-14898

Integrated logistic support economics considered in selecting support system for generating quantitative data for cost optimization [SAE PAPER 690632] 05 p0959 A70-15846

Support facilities requirements and goals for manned and unmanned solar and stellar orbital astronomy [MDAC-WD-1258] 05 p0847 A70-16074

Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1969 08 p1468 A70-20651

Computer controlled automatic test system /NARF 5500/ for naval avionics systems support, discussing system hardware and applications and programming cost reductions 08 p1469 A70-20652

General purpose support system /GPSS/ simulation for carrier operations and avionics maintenance, considering attack aircraft operations, spare parts, personnel requirements, etc 08 p1470 A70-20661

Versatile avionics shop test /VAST/ Implementation Study recommendations on project management for automatic test equipment support system aboard attack aircraft carriers 08 p1601 A70-20663

Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture [AIAA PAPER 69-305] 14 p2563 A70-30857

SUPPORTS

Apollo/Saturn 5 space vehicle supporting and restraining mechanisms design and operation, discussing holddown assemblies 01 p0055 A70-10468

Elastic support effect on bending of clamped circular, elliptical, rectangular and skewed plates, using variational method and small perturbation technique 01 p0205 A70-11144

Multisupported radially symmetrical suspension systems designs for parabolic antennas, assessing performance in terms of maximum rigidities 08 p1586 A70-21058

Support vibration effect on zero shift of damped vertical pendulum, using equivalent linearization with perturbation scheme 10 p1917 A70-25205

Free wave propagation constants in periodically supported infinite beams determined for rigid and flexible supports 11 p2132 A70-25727

Euler-Bernoulli and Timoshenko beam impact models compared for case of finite beam resting on spring supports 12 p2327 A70-27843

Static and dynamic stability of wind tunnel models with flexible support, considering binary rigid body freedoms 14 p2564 A70-31398

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models [AIAA PAPER 69-350] 17 p3063 A70-35657

Sliding friction effects of nonlinear asymmetric supports on turbine engine rotor-shaft stability [SAE PAPER 700320] 18 p3301 A70-36799

Support elasticity role in axisymmetric plates bending, discussing Rayleigh-Ritz solution 21 p3937 A70-41739

SUPPRESSORS

NT ECHO SUPPRESSORS

Artificial hypobiosis state maintenance in animals exposed to cooling after administering lytic mixtures for suppressing oxidation 01 p0029 A70-11464

Zener diodes as voltage transient suppressors for ground vehicle and aircraft power supplies 16 p2879 A70-34060

SURFACE CHEMISTRY

U SURFACE REACTIONS

SURFACE COATINGS

U COATING

SURFACE COOLING

Anomalous temperature-time cooling data for surface material of Tycho, Copernicus and Aristarchus craters, suggesting relation to magnetic phase transitions during lunar nights 01 p0183 A70-10825

Angular distribution measurements of visible and near IR radiation reflected from carbon dioxide cryodeposits formed on liquid nitrogen cooled surface in vacuum [AIAA PAPER 69-63] 04 p0720 A70-15538

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects [ASME PAPER 69-HT-44] 09 p1789 A70-23551

Local heat sink thermal processes on convectively cooled solid surface, noting applications to temperature measurement errors 12 p2333 A70-28112

Supersonic slot cooling for surface protection at hypersonic speeds using contoured axisymmetric nozzle with streamlined body 14 p2663 A70-30257

Wall cooling effects on turbulent boundary layer in low speed air flow, using smooth tube and thermocouple measurements 18 p3347 A70-36505

Kinetic heating of spacecraft surfaces, emphasizing materials and fluid circulation cooling devices 18 p3333 A70-36654

Body surface cooling level and rate effects on psychomotor performance tested at various levels of mean weighted skin temperature /MWST/ 20 p3573 A70-39675

SURFACE CRACKS

Eddy current inspection method for detecting fatigue cracks location and depth in fastener holes 01 p0097 A70-10008

Inconel 718 and Al 2219 alloys surface flawed specimens fracture toughness and flaw growth comparison for high pressure hydrogen vessel 01 p0114 A70-10029

Fracture surface topography variation with specimen thickness, studying fatigue crack propagation in Al 02 p0317 A70-12317

Optimum prism angles and ultrasonic frequencies for detecting fatigue cracks 02 p0301 A70-12487

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera 04 p0730 A70-14458

Ti-Al-Zr-W-Si alloy fracture surface concentric markings number related to loading cycles after crack formation 10 p1904 A70-28437

Microtopography of fracture surfaces by stereo electron fractography, using large angle tilting of specimens 13 p2431 A70-28605

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera 13 p2510 A70-28655

Transverse bending of isotropic rectangular plate with symmetric crack under uniformly distributed load, considering corrections for stress-strain state near cracks 13 p2516 A70-29516

Yield criteria for plastic deformation on glassy high polymers induced by stress field, noting crazing and shear yielding dependence on first stress invariant 15 p2764 A70-31787

Elastic half plane with crack perpendicular to free surface and under arbitrary pressure distribution, obtaining exact solution for stress and displacement fields 15 p2767 A70-31854

Elastic equilibrium of unbounded body with central hole and concentric cracks under symmetric load 15 p2819 A70-32188

Fatigue and surface crack detection using holographic techniques 17 p3086 A70-35015

Metal surface through and part through cracks, investigating dimensions and material properties effects on fracture stresses 18 p3278 A70-36565

Butt joined epoxy Al plates tensile strength, observing fracture strength dependence on stress concentration at bond edges below characteristic crack length 21 p3939 A70-42032

SURFACE DEFECTS

Metal surface microscopic defects detection and display using diffused radioactive Kr-85 gaseous penetrant for anodized flaws, bearing porosity and turbine blade cracks 01 p0096 A70-10006

Machined surface evaluation of fabricated components by electron microscopy to identify defects 01 p0097 A70-10012

Laser processing applied to optical nondestructive materials tests for surface flaws 01 p0086 A70-10416

Direct solar radiation concentration by paraboloid mirrors, analyzing energy transport and distribution functions, based on statistically distributed imperfections of reflecting surfaces 01 p0010 A70-10762

Friction and surface damage between clean metal hemispheres and flats at low sliding speeds and 25 K room temperature range 01 p0105 A70-11353

Equations of motion, conservation of mass, momentum and energy for elastic bodies with lattice-type surface defects 01 p0209 A70-11400

Optical surface degradation during measurements with high power laser, considering atmospheric dust and cleaning solvents 05 p0861 A70-16848

Mo mechanical properties dependence on surface defects and Ti films 08 p1515 A70-20937

Eddy currents magnetic field structure over surface defects in conducting objects, noting NDT applications 13 p2404 A70-28661

Electrochemical machining /ECM/ effects on components surface integrity, discussing jet engine materials [ASME PAPER 70-GT-111] 18 p3264 A70-36849

Surface damage of GaAs crystals by mechanical handling and polishing with hard abrasive lapping materials 20 p3686 A70-39119

Surface adsorbed and absorbed radioactive Kr 85 gas for displaying surface microdefects in materials 20 p3638 A70-39950

Reflection echelon and Fabry-Perot interferometer with surface imperfections, comparing spectral resolution limit with Rayleigh limit 22 p4040 A70-43612

Reflector materials flaw size and orientation using ultrasonic spectral frequency analysis 24 p4335 A70-45573

Nondestructive testing technology, emphasizing component designer role in facilitating inspection of surface defects 24 p4342 A70-45679

Eddy current nondestructive tests for surface defects detection, determining optimum test parameters based on calculation 24 p4344 A70-45697

SURFACE DIFFUSION

Finite element method applied to finite dimensional state variable formulation of transient heat conduction with surface diffusion of thin circular rotating disk [ASME PAPER 69-DE-B] 04 p0785 A70-14874

Two step B vacuum diffusion from boron oxide into Si surface using evacuated tube and N atmosphere 05 p0891 A70-15791

Surface diffusion slip velocity in binary gas mixture above solid surface, basing calculation on distribution functions determined from Boltzmann equation 06 p1049 A70-18333

Knudsen effusion cells high temperature uses, discussing binary alloys phase boundary determination and volume and surface diffusion studies 07 p1424 A70-19900

Protective diffusion coatings for jet engine gas path parts, discussing repair procedures [SAE PAPER 700332] 12 p2254 A70-27463

Graphite-carbon dioxide interaction at high temperatures in presence of solid phase diffusion from bulk to reacting surface 13 p2520 A70-28581

Structure and chemical composition of high Cr diffusion coating on Cr-Ni austenitic steels 15 p2756 A70-31634

Oxygen interlayer diffusion effects on wear change during gliding friction of normalized steel samples 15 p2743 A70-31636

Al effects on B and Cr diffusion in protective coating on Cr-Ni heat resistance alloy, noting thermodynamic kinetics for homogeneous layers 17 p3125 A70-35405

Heat resistance evaluation of Zh S6-K alloy subjected to multicomponents surface diffusion 17 p3125 A70-35407

Fcc metals surface self diffusion temperature dependence, using model based on complex defects contribution to diffusion flux at high temperatures 19 p3483 A70-37545

Heat resistant surface diffusion alloying of Ni alloys with Cr, Ti and Si saturation 24 p4361 A70-45834

Steel surface diffusive saturation with elements of chlorides, noting role of iron chloride phase in promoting coating uniformity 24 p4350 A70-46332

Diffusing element deposition on metal surface during saturation from gas phase based on calculation of equilibrium composition of reaction mixture 24 p4364 A70-46333

Diffusive carbon redistribution in Mo during interaction with Ni and Cr protective coatings 24 p4364 A70-46334

Carbon steel diffusion saturation with Ti and B, investigating layer depth, weight gain and microhardness dependence on powdered mixture composition 24 p4364 A70-46336

Aluminized Armco iron and steel diffusion layers phase composition and microstructure 24 p4350 A70-46337

Heat resistant alloys with metal coatings applied by diffusion in vacuum, investigating structure and fatigue strength at high temperatures 24 p4364 A70-46342

SURFACE DISTORTION

Normal and tangential displacements distribution at surface and along cross section of bar with free boundaries computed for symmetric and antisymmetric oscillations 02 p0301 A70-12484

Nonlinear thin shell theory kinematics generalized in terms of physical strain and surface deformation and geometry 04 p0766 A70-14450

Static and dynamic solutions for isothermal deformation of elastic cylindrical and spherical Cosserat surfaces with holohedral isotropy 05 p0932 A70-16140

Shell shear strain determined by expanding displacement vectors into covariant power series of distance from middle surface [DFVLR-SONDDR-23] 05 p0955 A70-17078

Surface mean deformation state under sheet peening found equal to deformation under single indentation 07 p1292 A70-18835

Telescopic paraboloid mirrors optical distortion from surface deformation due to gravity loads 07 p1281 A70-19254

Modal expansion method applied to thin deformable primary mirror surface control for orbiting astronomical observatory 13 p2403 A70-28427

Deflection surface and edge moment prediction for uniformly edge loaded point-supported circular plates, comparing with optical method 13 p2509 A70-28534

Die surface composition effects on lubricant efficiency in metal working judged by friction coefficient and surface damage 13 p2418 A70-28830

Displacement component in chosen direction on deformed object surface, using hologram interferometry with double illumination 13 p2409 A70-29475

Essa 7, Surveyor 7 and Mariner 4 space TV systems geometric distortions analysis and potentials in analytic photogrammetry and topographical mapping 14 p2586 A70-30982

Twinned lamella formation in Nb single crystals, examining slip and shear roles in surface tilt formation 15 p2761 A70-32382

Asymmetric phase error in antenna circular apertures, emphasizing beam squint resulting from distortion of paraboloidal reflector 16 p2859 A70-32942

Hologram interferometry for measuring surface deformation under force and anisotropy in transparent objects 17 p3085 A70-35009

Experimental model for random phase errors caused by surface irregularities in paraboloid reflector antennas 19 p3792 A70-37927

Spiral grooved gas lubricated thrust bearings, calculating self heating induced thermal distortion effects on load capacity [ASME PAPER 70-LUBS-14] 22 p4044 A70-42447

SURFACE ENERGY

Semiempirical potential energy surface generation for triatomic hydrogen from London equation by evaluating Coulomb and exchange integrals taking into account effective orbital overlap 01 p0147 A70-10469

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain 01 p0212 A70-11562

Surface energy data calculated for bcc and hcp metals and high melting point compounds
06 p1090 A70-17845

Metal surface adhesion to materials, examining structure and energy with allowance for environmental effect
08 p1503 A70-20878

Forces at boundary surface in solid phase in solids and adhesive film interactions, considering boundary surface energy
08 p1503 A70-20879

Solid Mo, Ni, Ta and W surface energies determined by multiphase equilibration technique
08 p1522 A70-21749

Semiconductors surface energy levels based on conductivity, metal-dielectric-semiconductor capacity and optics
15 p2785 A70-32765

Semiconductor surfaces electrical equilibrium, considering statistical occupation of surface energy and Fermi levels for given doping of bulk material
15 p2786 A70-32766

MOS structure, measuring ionizing radiation effects on interface barrier energies by internal photoemission techniques
17 p3144 A70-35901

Liquid nitrogen boil off calorimeter for surface energy measurements, describing construction, calibration and instrument errors
18 p3261 A70-37089

Surface atom bonding configuration energy in two-center theory of large surface unit cells on semiconductors
19 p3483 A70-37544

Script-F radiative interchange matrix for enclosures with arbitrary surface emission and reflection characteristics
21 p3944 A70-41020

Radiative transfer among surfaces forming long cavity exposed to collimated incident energy
21 p3944 A70-41022

Fracture toughness and surface energy of fibrous reinforced composites as function of fiber content, strength, diameter, modulus and matrix flow stress
21 p3843 A70-41890

Solid phase energy role in flame spreading over solid fuel bed surface in oxidant-containing environment
23 p4281 A70-44424

SURFACE EROSION

U EROSION

SURFACE FINISHING

Friction and surface damage between clean metal hemispheres and flats at low sliding speeds and 25 K room temperature range
01 p0105 A70-11393

Free carrier light absorption in n-type GaAs, InAs and Ge semiconductors with mechanically polished surfaces as function of thickness and crystal structure
03 p0538 A70-13057

Surface treatment effects on stainless steels corrosion resistance, relating resistance changes to surface composition, integrity, stability and roughness
03 p0507 A70-13136

Airline aircraft finishes for protection against corrosion, air pollution, discussing paint application and polyurethane technology
03 p0497 A70-14053

Surface work hardening effects on steels resistance to low cycle fatigue with stress concentration, applying results to aircraft parts
06 p1085 A70-17403

Solar installations optical properties selectivity increase by light-collecting surfaces mechanical treatment, describing plate grinding with abrasive powders
07 p1196 A70-19625

Specific radiant heat flow and spectral blackness degree of tungsten with surface finish
07 p1309 A70-19662

Roller bearings convex conical surfaces grinding using centerless grinder
08 p1506 A70-21192

Burnishing load and time effect on deposition, endurance limit of lubrication and wear-in characteristics of molybdenum disulfide powder films
08 p1508 A70-21516

Strain measurement over large steel plate surface ground to reasonable flatness and in welded joints by applying moiré method
11 p2061 A70-26836

Electrochemical machining effects on surface integrity and fatigue properties of steel, Ti and Al alloys [ASTM PAPER MR-69-110]
12 p2241 A70-27081

Al pressure-welded joints strength, investigating surface treatment role
16 p2924 A70-34340

Al-Si welding rods tests with various surface finishes, considering oxide coatings effect on gas tungsten arc weld quality
18 p3264 A70-37113

Surface damage of GaAs crystals by mechanical handling and polishing with hard abrasive lapping materials
20 p3686 A70-39119

Asymmetric closed and cylindrical shells variable surface machining for desired wall thickness profile by chemical milling with digital computer numerical control
20 p3637 A70-39942

Polyvinyl chloride sheet steel manufacture, properties and welding methods
22 p4045 A70-42479

SURFACE GEOMETRY

Goertler vortices effect on boundary layer transition on concave surface, discussing instability oscillations breakdown leading to turbulent motion
01 p0061 A70-10539

Surface shape determination for thin delta wing with variable geometry to minimize drag for given open and closed configurations and cruising supersonic speeds
01 p0002 A70-10547

Measured heat flux conversion into average radiation incident on convex satellite surfaces in test chambers
03 p0606 A70-13536

Turbine blade designs considered for increasing load capacity covering tandem, jet-blade and base plain blade configurations and test results [ASME PAPER 69-WA/GT-1]
04 p0734 A70-14894

Pseudocylindrical concave polyhedral shells proposed from postbuckling configurations analysis, considering rigidity and structural applications
05 p0928 A70-16039

Martian topographical radar ranging data correlated with surface features, discussing deserts, canals and maria topography
05 p0909 A70-16388

Geometry of limiting surface characterizing strength of isotropic body, discussing material breakdown
05 p0947 A70-16964

Surface inhomogeneities effect on sound radiated by nearby turbulence near flexible boundary, using converted Lighthill wave equation to obtain far field radiation
07 p1256 A70-19262

Second order correction to Glaupert wall jet flow around arbitrarily curved surface, discussing initial profiles
07 p1257 A70-19344

Body surface curvature effect on surrounding laminar flow field, investigating oblate spheroids of various thicknesses
07 p1259 A70-19977

Spread F echoes due to total reflection from large tilted ionized surfaces, using ionograms and airglow observations to study surface geometry
07 p1271 A70-20158

Metal surface adhesion to materials, examining structure and energy with allowance for environmental effect
08 p1503 A70-20878

Wedges calculated for lift-drag ratios at hypersonic speeds to find optimum surface geometry
09 p1606 A70-23282

Drag measurement for star-shaped body at hypersonic speeds, comparing results with cone-shaped model
10 p1799 A70-24122

Computerized design of aircraft contours, determining three dimensional surface by second degree equation [SAE PAPER 700202]
11 p2013 A70-25876

Flat-top airfoil determined for lower surface shape to maximize lift drag ratio at hypersonic speeds using calculus of variations
11 p1977 A70-26397

Surface contours generation by Moiré patterns
12 p2235 A70-27753

Flow equations for curvilinear boundary layer based on laminar incompressible boundary layer in streamwise corner
13 p2386 A70-28541

Steady diabatic complex lamellar gas flow, obtaining parameters by extending geometric theory of surfaces and curves in fluid flow theory
13 p2387 A70-29122

Optical transformation of field ion micrographs providing orthographic, gnomonic projections and perspective images of hemispheric metal surface
14 p2584 A70-30506

Plane wave scattering by strip of elliptical cylinder, considering geometrical diffraction theory
15 p2700 A70-32405

Wave diffraction by wedge, using Heaviside step function and Sommerfeld contours
15 p2700 A70-32407

Wave diffraction by half plane limit of parabolic cylinder and wedge, using Fresnel integral and Heaviside step function
15 p2700 A70-32409

Reflector antennas analysis, design principles and uses, with emphasis on paraboloidal and spherical reflecting surface types
17 p3052 A70-35068

Hydromagnetic wave propagation compared in magnetospheres of plane and cylindrical geometries
18 p3311 A70-36011

Supersonic cascade wind tunnel performance evaluation, using compressor blades of simple geometric shapes
18 p3238 A70-36848

Plane wave diffraction by serrated surface, examining wave transformation matrix coefficients
19 p3377 A70-37715

Geometrical appearances at relativistic speeds for celestial sphere with multiple constellations, spherical surface features at observer proximity and rectangular box train
19 p3520 A70-38273

Diffraction-limited scalar image formation with large angle point reference hologram arrangement of arbitrary surface shape, point reference source and object
20 p3628 A70-39131

Nonequilibrium processes and body geometry as stagnation point conditions in blunt body inviscid flow
20 p3557 A70-39355

Weak stratification and geometry effect on steady mechanically driven motion of contained rotating viscous fluid
20 p3608 A70-39357

Distribution functions of errors in earth and moon horizon sighting due to planetary surface unevenness
21 p3884 A70-40840

Compressible boundary layer equations with second order surface curvature and displacement effects
21 p3809 A70-41751

Hypersonic viscous interaction between laminar boundary layer growing over flat plate and external flow field extended to curved surfaces
22 p3958 A70-42688

Electrochemical shaping by stationary plane electrodes and by constant velocity electrodes, comparing shaped surface accuracy
22 p4047 A70-43534

Simplified Sanders-Koiter linear thin shell equations with uncoupled stress-strain relations for arbitrary, nonzero Gaussian curvature, catenoidal and helicoidal midsurface geometries
23 p4269 A70-44399

Two dimensional electromagnetic scattering body geometry reconstruction from given incident and scattered far field distributions
23 p4165 A70-44958

SURFACE INTERACTIONS

U SURFACE REACTIONS

SURFACE IONIZATION

Spread F echoes due to total reflection from large tilted ionized surfaces, using ionograms and airglow observations to study surface geometry
07 p1271 A70-20158

Electron concentration profiles in blunt nose vehicle shock layer during atmospheric near orbital entry at high altitudes, using finite rate chemistry
16 p2837 A70-33865

Metal surface ionization measurements for upper atmosphere and interplanetary space energetic neutral hydrogen analyzer design
17 p3138 A70-35309

Thermo-electret surface charge and dielectric constant time variation measurements, considering hole-electron pairs production hypothesis
21 p3797 A70-40890

Field-ion microscope image formation, determining periodic surface potential variation effects on high field tunneling
21 p3862 A70-40974

Surface potential and electron work function of single crystal plane W/110 under zero-field and strong-field conditions
23 p4230 A70-44797

SURFACE LAYERS

NT MONOMOLECULAR FILMS

Oxide layers on metal substrate noting emittance dependence on thickness in aluminum-aluminum oxide and Cu-CuO systems [ASME PAPER 69-WA/HT-4]
04 p0705 A70-14825

Tractive behavior in elastohydrodynamic lubrication contact noting role of surface degradation layer
05 p0854 A70-15888

Friction on fuselage surface layer under static and instantaneous loads without allowance for oscillation
05 p0856 A70-17015

Structure, phase composition and heat resistance of diffusion layers obtained by surface alloying of Nb alloy with Cr, Ti and Si
06 p1089 A70-17744

Planetary boundary layer thickness estimation, considering geostrophic wind speed and potential temperature average vertical gradient
07 p1377 A70-18922

Inhomogeneous model of upper lunar surface layer assuming temperature dependent heat conductivity and capacity, showing agreement with IR measurements
08 p1564 A70-20559

Graphite molds compaction pressure effect on Ti castings nonporosity and surface layers carburization
08 p1506 A70-21143

Burnishing load and time effect on deposition, endurance limit of lubrication and wear-in characteristics of molybdenum disulfide powder films 08 p1508 A70-21516

Diabatic mean profile forms in atmospheric surface layer, establishing profile relationships based on logarithmic analysis 08 p1540 A70-21973

Turbulent transfer mechanism in atmospheric surface layer, analyzing micrometeorological data for flux-gradient relationships, relating turbulent scale to eddy diffusivities 09 p1712 A70-22051

Gas saturation and inhomogeneity in surface layer of Ti alloys with alpha and beta stabilizers after high temperature heating 09 p1700 A70-22078

Seasonal measurements of atmospheric transmittance spectra for horizontal near-earth paths in IR region under haze and clear weather 09 p1666 A70-22179

Heat and mass transfer in binary turbulent boundary layer during natural convection on vertical surface, allowing for diffusional heat conduction 09 p1787 A70-22267

Al alloys fatigue properties dependence on surface oxide cracking in moist and dry air, investigating oxidation and kerosene processing 09 p1707 A70-23206

Metal plates vibration under viscoelastic damping layers using electromagnetic transducer and impact excitation 11 p2145 A70-26702

Low resistivity films synthesized on seminsulating GaAs by xenon, krypton, selenium and zinc ions bombardment 12 p2286 A70-27364

Electroacoustic conversion in low resistivity GaAs crystal surface layer, applying external magnetic field to tune converter in wide frequency range 12 p2287 A70-27483

Radiation defects in Ge single crystals surface layers caused by low energy bombardment with He ions 12 p2287 A70-27486

Diffuse coatings effect on strength characteristics and corrosion resistance of steels, analyzing structure, thickness and purity of surface layers 13 p2433 A70-28888

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects 13 p2423 A70-29766

High winds simultaneous occurrence and duration to 150 meter height, showing coherence tendencies 14 p2607 A70-30583

ZnO epitaxial layers deposition by chemical vapor transport on sapphire single crystal substrates 15 p2784 A70-31982

Surface layer dislocations concentration role in metal fatigue, using variable diffusion coefficient 15 p2822 A70-32352

Inhomogeneous model of upper lunar surface layer assuming temperature dependent heat conductivity and capacity, showing agreement with IR measurements 15 p2805 A70-32714

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph 16 p2945 A70-33219

Liquid He surface layer thickness as function of temperature, considering capillary waves effect due to gravity 16 p2952 A70-33288

Solid film lubricants deposited by DC and RF sputtering on metal and glass surfaces, determining friction characteristics by electron microscopy 17 p3099 A70-34516

Surface growth morphology and crystallographic orientation of beta-SiC films formed by chemical conversion and heating 17 p3142 A70-34678

Combustion rates acceleration of ammonium perchlorate mixtures with polystyrene and polymethyl methacrylate by KCl and LiF additions, forming molten layer on charge surface 18 p3299 A70-36248

Depth measurement of gas-saturated surface layer in Ti alloys, using microhardness method 18 p3277 A70-36472

Air surface layer stationary electric field, considering ionization balance equation, turbulent diffusion coefficient, ion concentration vertical distribution, etc 18 p3247 A70-36520

Sunspots surface layers azimuthal electric current density, assuming specific magnetic force distribution 18 p3322 A70-37135

Titanizing Armco iron and carbon steels, examining diffusion layer structure and phase composition 19 p3451 A70-37460

Constrained viscoelastic layer optimal length for vibration damping of metallic structures 19 p3536 A70-37696

Magnetic surface loading of Gunn oscillators domain state for use as logic gates, pulse function generator, etc 19 p3387 A70-37819

Surface layer heating of solid body by dense gas discharge plasma radiation, comparing vaporization and reversible opacity onset times in quartz 19 p3482 A70-38733

Transverse impedance in semiconductor surface layer, taking into account charge in diffusion region 20 p3686 A70-39594

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects 20 p3638 A70-40099

Surface films effect on thermal contact resistance of microscopically sized contacts 21 p3944 A70-41023

Surface films effect on thermal contact conductance of aluminum surfaces contacting in high vacuum environment 21 p3944 A70-41024

Surface tension role in microfluidic layer formation on solid surface with growing bubble in nucleate boiling, using optical method 21 p3953 A70-42089

Optical devices contaminated mirror surfaces restoration with atomic oxygen from RF plasma by noncontaminating nondestructive oxidation of polymer film 22 p4029 A70-42622

Iteration method for calculating self consistent fields in semiconductor surface inversion layers 22 p4085 A70-42745

Ultrasonic detection of tooth surface layer demineralization, noting surface and subsurface enamel structural differences 22 p3978 A70-42955

Nickel surface layer fine structure changes in super-sonic air flows at various temperatures and times 22 p4056 A70-43341

Friction-originated ageostrophic mass flux in ground friction layer at nonaccelerated geotriptic boundary layer flow 24 p4370 A70-45133

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph 24 p4371 A70-45194

Rheology and structure formation in three dimensional and two dimensional bulk phase and pigmented systems in surface layers and films, including paints and varnishes 24 p4368 A70-46141

SURFACE NAVIGATION

Omega position location experiment applied to ship navigation, air traffic control and moving vehicle surveillance, noting daytime and night fixing accuracy 01 p0136 A70-10307

Moving map displays applications in marine and air navigation, discussing human factors and impact on ATC 01 p0139 A70-11284

Navy Shipboard Navigation Satellite System for worldwide all-weather navigation system, discussing shipboard system, receiver, stable oscillator and antenna 03 p0522 A70-13609

Range positioning system as automatic indicator in oceanography, aboard land vehicles and aircraft 08 p1541 A70-21360

Aircraft and ship position surveillance by satellites system with independent capability and undelayed voice and digital communication 09 p1723 A70-23043

Dead reckoning navigation of manned lunar roving vehicle /MLRV/, describing hardware and coordinate system 12 p2266 A70-27414

Aircraft and ship navigation using precision time measurement signals transmitted between vehicles and earth satellites 13 p2448 A70-28748

Astronomical navigation on lunar surface with equations for selenographic latitude and longitude 13 p2449 A70-29272

Manned lunar surface navigation requirements emphasizing dead reckoning system 14 p2613 A70-30458

Synchronous navigation satellite system for ships and aircraft applicable to earth orbital and lunar operations 14 p2614 A70-30463

Surface navigation for unmanned Martian surface roving vehicle 14 p2615 A70-30469

Aircraft/ship navigation system using three synchronous satellites positioned over equator for Pacific applications 17 p3134 A70-35302

Manned lunar roving vehicle /MLRV/ navigation scheme based on dead reckoning concept, discussing instruments effectiveness for vehicle velocity and orientation measurements 19 p3396 A70-37849

Gyrocompassing for self contained lunar surface vehicles navigation, proposing local vertical determination method [AIAA PAPER 70-1003] 20 p3667 A70-39528

Sea and air navigation in U.S. with satellites, considering cost estimates 21 p3848 A70-41130

Discusses satellite navigation system for aircraft and ships, discussing coverage, radio links, project costs, etc 22 p4067 A70-42657

Radio navigation system using multiple satellite beacons /NAVSTAR/ for large area air and sea coverage 22 p4067 A70-42662

Automatic ship navigation system using Transit satellites and onboard digital computer for routine tasks of dead reckoning 22 p4068 A70-42666

Position fixing by distance measuring to geostationary satellites, discussing ATS-3 and ship experiment accuracy and orbit interference 23 p4215 A70-44232

Worldwide common satellite network for sea and air navigation, discussing cost estimate and economics 23 p4216 A70-44608

Stability solution of nonlinear differential equations in position determination on earth by inertial navigation 24 p4374 A70-46202

Icarus surface reflectivity estimated from reflected light polarization, combining estimate with inferred absolute magnitude to obtain radius 01 p0180 A70-10537

IR reflectance studies of lunar surface composition, showing absorption spectra suggestive of ferrous iron, olivines and orthopyroxenes 01 p0182 A70-10721

Si cleaved crystal nature on basis of Auger spectra, discussing impurity stabilization 01 p0159 A70-11175

Microwave propagation in materials and measurement methods for inspection based on reflecting surface movement and scattering method for porosity detection 01 p0094 A70-11395

Stability conditions for helical motions of body bounded by multiply connected surface in fluid 01 p0145 A70-11439

Turbulent boundary layer response to sudden changes in surface conditions or pressure gradients, considering equilibrium attainment 02 p0287 A70-12360

Molybdenum disulfide surface and bulk properties, comparing endurance of fractions and grades with synthetic chalcogenides at same layer thickness in dry atmospheres [ASLE PREPRINT 69-LC-7] 02 p0322 A70-12538

Electron surface states bands in insulators induced by image potential, determining lower limits for liquid and solid gases 02 p0345 A70-12823

Spectral polarization characteristics phase variations used for classifying lunar surface features 03 p0565 A70-13234

Infinitesimal deflections of piecewise-regular unfolding scanning surfaces fixed along edge with respect to one point, discussing rigidity 03 p0591 A70-13414

Rolling, pickling and annealing influence on composition of steel sheet surface 03 p0497 A70-13775

Potential energy surface shapes for lowest states of temporary negative ions of nitrous oxide and carbon dioxide 03 p0441 A70-14008

Elastokinetic three dimensional boundary value vibration problem, involving rectangular area on surface of elastic half space under periodic normal stress 03 p0601 A70-14319

Plane two body contact creep problem in presence of adhesive forces reduced to solving coupled integral equations with complex valued kernels 04 p0766 A70-14421

Helmholtz integral for radio waves scattering from surfaces expanded for reflection from terrain or atmospheric layers 04 p0648 A70-14964

Numerical solution of transient heat conduction with radiating surface, imposing Runge-Kutta type integration on surface

04 p0787 A70-15613

Axial compression of elastic circular cylinder in contact with identical elastic half spaces, determining interfacial surface stresses for frictionless and adhesive contacts

05 p0930 A70-16082

Surface stress distribution to maintain Griffith crack in prescribed shape, using theories of Fourier transforms and dual integral equations

05 p0930 A70-16086

Ternary Ti-Ta-Nb solidus surface determination by simplex lattices and cubic approximation, statistically evaluating equation derived

05 p0864 A70-16547

Single crystal Ge surface etching characteristics using laser beam reflection pattern

05 p0860 A70-16656

Time to crack formation determined in cylindrical and flat Al and steel specimens having various surface properties under cyclic loads

06 p1084 A70-17392

Ni-Cr alloys effects of grain size and surface deformation on oxidation properties at high temperature

06 p1088 A70-17610

Surface thermal factors influencing ignition delay time of composite solid propellants, using double wavelength optical detector

06 p1128 A70-18043

IR region spectral hemispherical emittance of surfaces measured by bihemispherical reflectometer [AIAA PAPER 70-65]

06 p1107 A70-18205

Modified Maxwellian models for particle reflection in free molecular flow, correlating model parameters with gas-surface properties

06 p1110 A70-18259

Lunar surface reflectivity determined by measuring reflected cosmic noise, determining dielectric constant and surface material properties

06 p1151 A70-18488

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases

06 p1083 A70-18563

Three dimensional hypersonic flow past body solved assuming developable surface head shock wave

07 p1187 A70-18767

Fcc metals surface changes following adhesion using low energy electron diffraction (LEED), relating intersurface metal transfer to applied adhesive force

07 p1305 A70-18920

Radiative heat transfer in radiant energy flux incident on plane surface of nonisothermal absorbing and dissipating layer

07 p1423 A70-19814

Steady temperature field of two dimensional periodic contact surface in vacuum, using conjugate harmonic functions for thermal flux lines, isotherms and thermal resistance

07 p1423 A70-19820

Caustic surface of spherical resonator with external mirrors used to calculate light angular divergence and spectral properties

07 p1299 A70-19859

Metal adhesive joints permanence under various environmental conditions, considering surface properties effect

08 p1504 A70-20890

Ti alloy band polished surfaces properties, obtaining required residual stresses by process control

08 p1507 A70-21198

Astatic equilibrium in Saint Venant principle applied to surface of linear elastic body, discussing stress field produced by boundary loading

08 p1591 A70-21463

Potential vortex flow interaction with stationary surface calculation extended to Volterra equations by transforming boundary value problem, improving critical Reynolds number bounds

08 p1484 A70-21472

Carbon dioxide adsorption and desorption in Martian bright areas, discussing assumptions relative to temperature, pressure and dust adsorption

08 p1579 A70-21566

Radiative heat transfer in lunar and Mercurian surfaces, discussing radiative heat transfer in powders

08 p1579 A70-21569

Ni-Mo surface alloys investigated by low energy electron diffraction, using tabulated symmetry and extinction properties of space groups and phase diagrams

08 p1557 A70-21603

Spectral polarization characteristics phase variations used for classifying lunar surface features

08 p1580 A70-21667

Thin metal plate surface impedance during excitation by HF electromagnetic field as function of magnetic field, calculating line shapes

08 p1557 A70-21754

Friction, wear and surface evaluation of alloys as bearing materials in prosthetic devices

09 p1690 A70-22044

Blasius flow stability on deformable surface of membrane using Orr-Sommerfeld equation to calculate amplitude of function for perturbation flow

09 p1658 A70-22182

Thin resistive layers located in rectangular waveguide assuming constant and surface variable conductivity and permittivity

09 p1644 A70-22279

Rhenium single crystals basal plane surface properties using LEED and Auger electron spectroscopy, describing gas adsorption studies

09 p1739 A70-22526

Temperature and stress fields in orthotropic plate with partial surface insulation, examining boundary conditions

09 p1777 A70-23078

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

09 p1662 A70-23223

Capillary grooves effect on surface wetting and evaporation using heat transfer coefficients for grooves with triangular, semicircular and square cross sections

09 p1790 A70-23559

Nongray surfaces radiative interchange calculation, considering surface radiation properties

09 p1790 A70-23561

Crack widening in infinite plane field with wedge in absence of slip, based on elasticity theory, plotting contact forces and stresses on crack boundary

09 p1785 A70-23624

Integral equation for radiation patterns from vertical antenna over variable impedance surface

09 p1639 A70-23670

Lennard-Jones atom interaction potential, calculating adsorption energy of atom onto surface structure of fcc substrate, tabulating adsorption and surface diffusion activation energies

10 p1927 A70-24078

Radio wave reflection spectra from plane surfaces, determining physical properties and composition

10 p1843 A70-25154

Contact stresses in elastic half plane with boundary connected to rod and moment applied at arbitrary point

10 p1965 A70-25324

Mars surface, discussing craters, slump terraces, dry chutes, crater pair abundance, ballistic cratering theory, etc

11 p2109 A70-25838

Bidirectional reflectance of three dimensional surfaces described by diffuse triangular subareas network for spacecraft thermal design, giving numerical technique

11 p2084 A70-26354

Epitaxial surface morphology layer electrical properties and autodoping at GaAs-Ge heterojunctions as function of substrate temperature, orientation and HCl concentration

11 p2098 A70-26392

Distance separating shock wave front of contact surface between motor and target gases in electromagnetic shock tube, discussing surface instabilities

11 p1977 A70-26467

Microwave radiometer as passive satellite sensor for observing ocean surface properties

12 p2228 A70-26902

Lunar rolling stones anomalous surfaces goniphotometric properties, considering bearing strength as rock density function

12 p2296 A70-26925

Aerospace materials machining processes guidelines to minimize structural failures caused by lack of surface integrity

12 p2239 A70-26988

Slow electrons interaction with periodic and non-periodic solid surfaces, investigating elastic scattering

12 p2725 A70-27252

Reflected light directional diagram effects on scintillating surface luminescence yield, considering scattering function gradient

12 p2231 A70-27310

Die surface composition effects on lubricant efficiency in metal working judged by friction coefficient and surface damage

13 p2418 A70-28830

Laser beam photography utilization in engineering for optical pointers, interferometers and holographic visualization of surface strain and vibration

13 p2406 A70-28914

Laminar MHD boundary layer equations at nonconducting surface, determining flow core parameters influence on boundary characteristics

13 p2462 A70-28967

Weld quality relationship to aluminum surface contamination by hydrogen-containing compounds

13 p2407 A70-29108

Surface emissivity effects on combined conduction, convection and radiation heat transfer in nonisothermal hydrogen plasma, discussing optically thin and thick solutions

13 p2521 A70-29134

Surface field effect, contact potential and photoconductivity measurements on p- and n-type heteroepitaxial single crystal silicon films on sapphire

13 p2470 A70-29372

Acoustic conductivity of burning solid propellant surface, discussing critical conditions and variable surface measurement methods

13 p2522 A70-29421

Nonaggressive liquid media effect on residual strains and phase transformations initiation and development in polyurethane parts operating in lubricants, discussing wear resistance

13 p2439 A70-29431

Hologram interferometry using moiré method to determine bending moments of object surface

13 p2409 A70-29474

Electromagnetic plane wave oblique reflection from flat surface with spatially modulated surface impedance, computing wave spectrum

13 p2367 A70-29527

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells

13 p2517 A70-29758

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile

13 p2473 A70-29956

Polarization effect on radiant heat transfer between simply arranged smooth plate surfaces

13 p2523 A70-29993

Surface wind speed durations statistical analysis, discussing meteorological, orographic and physiographic features

14 p2607 A70-30582

Lubricant ingredients and additives properties effect on surface quality of cold rolled semifinished Al products

14 p2590 A70-30837

Composite solid propellants surface structure and profile characteristics burning with various oxidizers and polyurethane binder by scanning electron microscopy

14 p2628 A70-30948

Lunar surface mechanical properties from Surveyor spacecraft interactions with soil /exclusive of surface sampler/

14 p2644 A70-31055

Lunar IR radiation measurements for estimating thermophysical properties and small scale surface nature

14 p2645 A70-31057

Topographic variations in lunar surface from bistatic radar observations on Explorer 35

14 p2645 A70-31061

Mars surface, environment and electrical, thermal and mechanical properties

14 p2647 A70-31080

Mars surface material properties from radio emission observations, considering daily temperature variations distribution

14 p2648 A70-31083

Oxide film and liquid effects on friction coefficient, surface relief and dislocation density along depth related to plastic deformation

15 p2743 A70-31638

Friction theory, discussing surface mechanics, wear and erosion control

15 p2743 A70-31699

Vibration modes real time observation of complex surfaces with matt finish using changes in laser speckle

15 p2750 A70-31762

Total solar radiation calculation for inclined and horizontal surfaces, noting application to solar heating

15 p2774 A70-31803

Surface photovoltage regeneration mechanism in GaAs dependent on free carrier concentration, space charge density and minority carriers

15 p2783 A70-31951

Graphite surface Debye temperature calculation based on crystal lattice dynamics

15 p2765 A70-32024

Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer

15 p2802 A70-32491

Molecular interactions, surface pressures and potentials of mixed monolayers of stearic acid and stearyl alcohol with inorganic substructures

15 p2695 A70-32547

Elevation and ground conductivity effects on horizontal dipole excitation of earth-ionosphere waveguide, considering east-west propagation

16 p2858 A70-32932

Sonic boom variation with aircraft geometry, volume, weight, weather and environment conditions, noting effects on structures and people

16 p2840 A70-32947

Nonlinear two dimensional free boundary problem of axisymmetric heat conduction in tubes with internal surface solidification by variational technique

16 p2996 A70-33002

Water structure role in membrane systems, considering phase transitions and thermal anomalies in surface properties

16 p2847 A70-33027

Boron, silicon carbide and graphite fibers surface properties

16 p2937 A70-33376

Space collector ring systems surface physics, discussing dry thin film lubricants, smoothness, service life, etc

16 p2917 A70-33485

Adhesive bonds strength parameters, discussing substrate type, surface preparation, etc [ASME PAPER 70-DE-33]

16 p2939 A70-33504

Monochromatic radiation angular distribution surface reflectance measurement using photographic reflectometer

[AIAA PAPER 70-859] 16 p2912 A70-33904

Surface recombination centers protecting against discoloration of thermal control coatings due to chemical changes induced by photoproduced holes and electrons in oxide pigments

[AIAA PAPER 70-830] 16 p2940 A70-33935

Solid state laser active element lateral surface microprofile effect on heat endurance

16 p2929 A70-34220

Oxidation dependence on physical nature of Ti surfaces obtained by thin film techniques under ultrahigh vacuum conditions

17 p3098 A70-34364

Probstein-Gold model for ablated materials crosshatching patterns, using interaction between inelastic deformable surface and supersonic turbulent boundary layer

[AIAA PAPER 70-768] 17 p3009 A70-34504

Elasticity theory two dimensional contact problems, examining cohesion or friction in contact area

17 p3192 A70-35693

Nb-based Ti-Zr alloy surface phase recrystallization characteristics, using field emission microscope

18 p3276 A70-36309

Energy zone bending near surface of n-type semiconductor, discussing surface plasma level

18 p3298 A70-36619

Contaminated optical surface investigation technique in near UV, visible and near IR range, investigating property changes of systems in transmission and reflection

18 p3292 A70-36786

Surface alterations by machining processes for gas turbine engine materials, emphasizing effects of milling on Ti and grinding on high strength steels [ASME PAPER 70-GT-100]

18 p3264 A70-36888

Radiation polarization measurements of natural underlying surfaces in centimeter range, noting dependence on sighting angle

18 p3250 A70-36967

Underlying surface inhomogeneity effect on radiation in presence of solid cloud cover

18 p3287 A70-36975

Ge and Si surface electrical properties, discussing conductivity, field effect, work function, current carriers, photoconductivity, photocurrent carrier capture, etc

19 p3483 A70-37297

Mars surface smoothness from photometric and space probe data for atmospheric optical thickness and surface barometric pressure

19 p3512 A70-37300

Clean Ru/0001/ and Rh/111/ surface properties by LEED and Auger electron spectroscopy, discussing gas adsorption

19 p3483 A70-37546

Electrical conduction and surface properties of beta-SiC films obtained by heating Si wafer in presence of hydrocarbon

19 p3485 A70-37685

Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells

19 p3547 A70-38396

Radiation heat transfer from parallel plates with grooved surfaces for direction dependent radiation properties

21 p3944 A70-41021

Surface films effect on thermal contact resistance of microscopically sized contacts

21 p3944 A70-41023

Al yield surfaces in stress space at elevated temperatures for virgin and prestressed material in torsion

21 p3840 A70-41436

Multichannel monitor for repetitive short scan Auger electron spectroscopy for surface composition changes, using low energy electron diffraction

21 p3827 A70-41467

Apollo 11 lunar soil volcanic rock samples, mineralogical and petrological description and surface features

21 p3896 A70-41514

Apollo 11 lunar dust and breccia micromorphology and surface characteristics implying weathering processes

21 p3910 A70-41622

Surfaces separated by radiatively nonparticipating medium, determining absorptivities and heat transfer boundary conditions in gray surface problems by irradiation factor method

21 p3953 A70-42085

Ultrasonic Rayleigh critical angle reflectivity of liquid-solid interface energy, detecting near-surface properties changes

22 p4027 A70-42585

Stepwise linear regressions method for estimating black body surface radiances from model atmospheres and corresponding simulated Nimbus 2 window-channel radiances

22 p4013 A70-42617

Steady incompressible turbulent boundary layer form on permeable curvilinear surface with uniform suction, assuming small pressure gradients

22 p4011 A70-42803

Surface density, charge and field effect mobilities for electrons and holes on MIS insulator-semiconductor structure on narrow bandgap HgCdTe

22 p4086 A70-43018

High speed camera rotating mirror dynamic surface deformations, discussing reflected waves, astigmatism, gas turbulence and pressure effects [SMPTE PREPRINT 34]

22 p4033 A70-43043

Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer

23 p4240 A70-43913

Precious metals, measuring tension, grinding and polishing induced surface plastic deformation effects on electron work function and exoemission

23 p4204 A70-43927

Titanium diboride particles contact surface increase during sintering in vacuum as function of temperature

23 p4205 A70-44042

Apollo 11 and 12 lunar landing sites surface properties from returned rocks chemical, physical and mineralogical analysis

23 p4241 A70-44221

Ta spectral emissivity, using ratio of specimen surface and black body spectral radiant intensities

23 p4207 A70-44447

Surface field model of rotating magnetic stars involving uniformity and Eddington-Sweet circulation suppression

23 p4251 A70-44826

Hawaiian basalt melted in simulated lunar environment, investigating surface characteristics, internal structure and bearing strength

23 p4254 A70-44883

Jupiter red spot darkness parameter and solar activity as clue to Jupiter-solar relationship

24 p4402 A70-45391

Einstein-Rosen matter concept given by space-time with isomeric domains, discussing hypersurface derivatives

24 p4379 A70-45486

Refractory materials surface behavior under friction, discussing microscopic nature of wear and surface deterioration due to thermal fatigue, fusion and material transfer, etc

24 p4342 A70-45595

Light reflectance from optically inhomogeneous medium due to space charge near semiconductor surface

24 p4390 A70-45661

Food-water deprivation influence on alveolar surface activity of rat lungs

24 p4303 A70-46115

Apollo 11 deployed solar cells, investigating degradation of surface properties and thermal control due to lunar module ascent effects

24 p4295 A70-46262

SURFACE REACTIONS

Oleic acid concentration effects on electron work function during surface-active agent deposition on Fe, Ni, Cu, Al and steel surfaces

01 p0099 A70-10074

Lubricating oil chemical composition changes influence on combustion engine internal friction, considering surface active Zn, armo-iron and Al

01 p0099 A70-10077

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies [AIAA PAPER 69-270]

01 p0166 A70-10836

Surface catalysis and variable transport properties effects on chemically frozen dissociated hypersonic air flow boundary layers enveloping flat plates and slender wedges

01 p0067 A70-11179

Mg vapor and oxygen surface reactions in MgO deposits, using atomic absorption spectrophotometry

02 p0250 A70-12006

Flame spreading mechanism over surface of igniting condensed phase materials in quiescent gaseous environment with chemically reacting component

02 p0396 A70-12014

Flame spreading theory for plastic fuels surfaces in nitrogen-oxygen mixtures, considering initial fuel temperature, pressure and mixture composition effects

02 p0396 A70-12015

Reactor surface and propylene role during vapor phase partial oxidation of propane in continuous flow tubular reactors

02 p0250 A70-12017

Low energy electron diffraction structures due to Re crystal surface interaction with CO and molecular oxygen at high temperatures

03 p0440 A70-13098

Hybrid propellant combustion mechanisms, connecting surface reactions to melting mechanism and subsequent liquid flow [ONERA-TP-736]

03 p0543 A70-13632

Charged particle distribution in heterogeneous medium using dispersion model to describe quasi-charged particles interaction with internal surfaces

03 p0536 A70-14370

Surface interactions in incompressible dynamics and stability of ferrofluid with nonlinear magnetization properties

04 p0665 A70-14451

Surface recession of low density phenolic nylon in arc heated air using stagnation point models, noting char removal processes

04 p0787 A70-15602

Q spoiled laser bombardment to obtain atomically clean surfaces in vacuum, noting damages

05 p0861 A70-16990

Quasi-equilibrium treatment of heterogeneous reactions applied to flash desorption data for oxygen reaction with tungsten surface, discussing species desorption dependence on adsorption temperature

06 p1004 A70-17331

Electrically discharged O effect on N first positive band emission in surface catalyzed excitation

06 p1109 A70-17489

Nitrous oxide molecular beam reflection and dissociation on tungsten surface at high temperatures from angular distribution measurements

06 p1004 A70-17493

Mathematical models for progressing waves diffracted by smooth surfaces

06 p1105 A70-17533

Mathematical models describing interactions between rarefied gas atoms and solid surfaces

06 p1036 A70-17759

Laser induced alloys erosion under various focusing conditions, determining optimal conditions for spectral studies

06 p1089 A70-17762

Flame spreading velocity characteristics over solid fuel surfaces, discussing environmental pressure, chemical reactivity, pyrolysis, forced convection, etc [WSCI PAPER 69-33]

06 p1178 A70-17979

Cold molecular beam of helium impinging on LiF or Si crystals investigated for gas-surface interactions, using time of flight method

06 p1043 A70-18255

Nitrogen molecule-tungsten surface interactions, computing trajectories and accommodation coefficients for various temperatures by equations of motion

06 p1110 A70-18262

Velocity distributions of incident and reflected Ar beams, determining partial energy accommodation coefficients for reflection from copper and carbon dioxide deposited surfaces

06 p1111 A70-18264

Molecular He and Ar nozzle-type beams scattering from room temperature LiF crystal surfaces, measuring particles flux and speed distributions

06 p1111 A70-18267

Metastable diatomic N beam scattering from Teflon and Cu surfaces measured for velocity and angular distributions

06 p1112 A70-18273

Surface-particle interaction and atmospheric parameters measurements by paddlewheel satellites, discussing angular distribution of re-emitted molecules and accommodation coefficients

06 p1067 A70-18287

Liquid metal alloys surface composition and electronic structure roles in electrocatalysis evaluated by studying hydrogen-ion discharge reaction and electrical double layer

06 p1005 A70-18392

Pressure effects in predicting ablation velocities for gas-solid systems, assuming reactions and gaseous products reversible adsorption on solid surfaces

07 p1422 A70-19373

Low and moderate energy gas molecule-solid surface interactions using molecular beams

07 p1328 A70-20116

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals

07 p1342 A70-20117

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions

07 p1342 A70-20118

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction

07 p1343 A70-20124

Thermal accommodation coefficients of Ar atomic beams scattered from nominal plane of Ag crystal measured by time of flight techniques

07 p1343 A70-20125

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites

07 p1344 A70-20128

Molecular beams and particle adsorbing surfaces interactions in state of relaxation, determining reflection parameters as function of gas characteristics

08 p1547 A70-21078

Molecular beams and particle adsorbing surfaces interaction with allowance for deposited atoms relaxation, determining reflected flux

08 p1547 A70-21079

Molecular beam and pure surface interactions on background of external forces field

08 p1547 A70-21080

Acoustic conductivity of burning solid propellant surface calculated, showing positive values or possible amplification at L.F.

09 p1741 A70-22113

LEED pattern and germanium surface conductivity during oxidation indicating electron states annihilation

09 p1738 A70-22215

Free radicals role in high temperature surface reactions of solid metal oxide particles interacting with unburned flame gases

09 p1629 A70-22320

Burning solid ammonium perchlorate composite propellants surface structure observation to assess heterogeneous or subsurface reactions, using scanning electron microscope

09 p1742 A70-23234

Rocket exhaust plume flow fields studied for vehicle effects taking into account nozzle boundary layer, coalescence shock and nonisotropic flow [AIAA PAPER 69-569]

09 p1743 A70-23246

Laser beam interaction with metals on basis of energy balance measurements, obtaining time dependent radiation reflectance

10 p1898 A70-23982

Oxygen-hydrazine interactions on partially immersed metal electrodes, studying conjugated electrochemical reactions

10 p1830 A70-24457

Electrodes oxidation processes involving fuel cell molecules or derived adsorbed intermediates reacting with anodically generated surface oxide, considering Pt electrochemical reduction

10 p1830 A70-24465

Helium ion bombardment activated tungsten crystal surface migration using field emission microscopy

11 p2097 A70-25378

Pyrolytic graphite oxidation kinetics as function of temperature, air velocity and surface area

11 p2070 A70-25809

Statistical properties of random intensity field during coherent laser radiation scattering by moving diffuse surface

11 p2064 A70-26812

Surface sliding friction interactions in aluminum alloys friction welding

12 p2239 A70-26855

Slow electrons interaction with periodic and non-periodic solid surfaces, investigating elastic scattering

12 p2275 A70-27252

Neutral molecule-solid surface interactions mass spectrometric techniques for measuring molecular flux and mean thermal energy after interaction

12 p2181 A70-27257

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

12 p2331 A70-27323

Surface oxidation effects on thermionic work functions of Be determined by visual observation and X ray diffraction patterns analysis

12 p2288 A70-28004

Artificial carbographites surface combustion processes using mercury porosimetry analysis

13 p2519 A70-28578

Surface erosion of sublimating graphite and naphthalene due to inequilibrium mass transfer in gas flows

13 p2437 A70-28580

Polarization effect on radiant heat transfer between simply arranged smooth plate surfaces

13 p2523 A70-29993

Reinforced plastics adhesion to hydrophilic mineral surfaces by using silane coupling agents

16 p2937 A70-33374

Interfacial chemistry of glass fiber reinforced thermoplastics, discussing matrix resin-reinforcement bond

16 p2937 A70-33378

Ammonium perchlorate pyrolysis, investigating exothermic surface reactions and gasification rates

16 p2963 A70-33873

Graphite oxidation on exposure to high temperature flow field based on surface coupled model [AIAA PAPER 70-823]

16 p2940 A70-33941

Surface interaction between Al single crystals in ultrahigh vacuum, investigating galling, distortion and adhesion

16 p2924 A70-34168

Radiative heat transfer between opaque interacting surfaces for equal temperature adjoint plates with one dimensional surface roughness profile

16 p3002 A70-34196

Hypersonic viscous interaction on curved surfaces, extending Cheng inclined flat plate analysis [AIAA PAPER 70-782]

17 p3007 A70-34474

Phenolic nylon thermal decomposition, considering surface reradiation and physical parameters effects

17 p3196 A70-35242

Surface alloying of high melting points in Al melts, noting prior oxidation enhancement and simplifying of calorizing techniques

17 p3102 A70-35406

Friction coefficient dependence on hardness of softer element of friction pair determined at constant values of shear strength, using external friction concepts

17 p3102 A70-35672

Surface destruction of glass dielectric by pulsed laser beam, considering plasma clouds, shock waves, ablation and crack formation

18 p3266 A70-36153

Light gas atoms adsorption on solid surfaces, calculating wave function, energy, mobility, sticking coefficient, etc

18 p3225 A70-36186

Atomic oxygen beams interaction with various surfaces at low pressure, discussing reflection probability and recombination reactions

18 p3225 A70-36187

Ti, Nb and Mo solubility during surface doping in Al melts containing various metals, discussing melt lattice structure effects

18 p3276 A70-36208

Heat transfer at flat melting surface under forced convection and laminar boundary layer solved by Karman-Pohlhausen method

18 p3347 A70-36502

Refractory metals interaction with boron during vacuum boronizing, investigating kinetics and optimal process conditions

19 p3434 A70-37452

Surface atom bonding configuration energy in two-center theory of large surface unit cells on semiconductors

19 p3483 A70-37544

Monoatomic inert gas molecules interaction with continuous elastic solid of alkaline and nonalkaline metals, calculating energy exchange

19 p3373 A70-37816

Laminar vortex flow interaction with stationary surface, considering flow field, velocity, Reynolds number, etc

19 p3405 A70-38348

Postmechanical interface separation in elastically supported rotary face seals under input excitation [ASLE PREPRINT 70AM 3C-3]

19 p3439 A70-38808

Optimum conditions and methods for vacuum diffusion welding of heat resistant alloys, removing thermodynamically stable surface oxide films by gaseous reaction products

20 p3636 A70-39197

Surface contaminated Langmuir probe measurements in glow discharge plasmas, discussing errors

20 p3633 A70-40161

Temperature measurements in gaseous reaction zone near surface of burning composite solid propellant, using modified line reversal pyrometer

20 p3694 A70-40273

Solid rocket propellants linear and nonlinear pressure coupled combustion instability behavior relationship to exothermic surface processes

20 p3694 A70-40274

Eroding surface transient heat conduction problem, considering temperature dependent surface properties, ablation, convective heating, etc

20 p3738 A70-40279

Thermally induced mirror deformations and wavefront distortions under radially nonuniform heating

21 p3942 A70-40806

Surface roughness effects on thermal radiant energy interchange between opaque interacting surfaces formulated for unequal temperature adjoint plates

21 p3944 A70-41018

Thermal processes during electron beam metal working, deriving relations for temperature field

21 p3833 A70-41123

Lunar rocks primordial accretion, examining ablation and transport of solids, liquid and vapor on surfaces

21 p3913 A70-41641

Surface ablation patterns in sublimating materials tested in high temperature structures tunnel

21 p3951 A70-41755

Interface interaction of colliding plates of different materials, reducing flow problem to differential equation via hodograph transformation

21 p3747 A70-41962

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

21 p3952 A70-42064

Ablative heat transfer to nonstagnation surfaces of high speed rocket vehicle in continuum atmosphere, using finite difference theory

22 p4125 A70-43433

Oxidized Si surface recombination rate measurement by electric field effect, noting electron bombardment effects on electrical properties

22 p3998 A70-43443

Surface degradation by oxidation, temperature fluctuations and hot corrosion of Ni- and Co-base superalloys in gas turbine engines

22 p4057 A70-43574

Satellite drag and lift from spatial impulsive surface interaction model [ICAS PAPER 70-05]

23 p4132 A70-44116

Solid surface interaction between surface with normal molecular beam, generalizing model by energy parameter simulating dissipative forces

23 p4223 A70-44994

Current oscillations in external circuits of semiconductor with low surface recombination in parallel electromagnetic field

23 p4231 A70-45062

Statistical properties of random intensity field during coherent laser radiation scattering by moving diffuse surface

24 p4351 A70-45184

SURFACE ROUGHNESS

Machined surface evaluation of fabricated components by electron microscopy to identify defects

01 p0097 A70-10012

Icarus radar and optical observations indicating surface smoothness differences between central and higher latitudes, radius size and radar reflectivity

01 p0180 A70-10534

Flow patterns in circular ducts with circumferential roughness variation, determining axial turbulence, Reynolds number effect and applications as two phase flow analog

01 p0066 A70-11132

Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films [ASLE FICES PREPRINT 21]

02 p0308 A70-12174

Aerodynamic roughness length estimation and site roughness increase due to micrometeorological equipment

03 p0483 A70-13166

Similarity laws in hypersonic flow of real gas around slender blunted bodies, particularly bodies with rough lateral surface

03 p0409 A70-13866

Surface roughness measurements by coherent optics and interferometry, including theory and experimental verification

04 p0689 A70-15015

Metallic adhesion produced by surfaces compression, discussing asperities plastic deformation and macrodeformation caused by contact area growth

07 p1292 A70-18939

Upper surface roughness of internal st-sc clouds as function of vertical temperature and moisture in overlying inversion layers

08 p1537 A70-21106

Cross hatching on surface of ablating bodies exposed to supersonic turbulent boundary layer flow using mathematical model

09 p1605 A70-23232

Airborne laser profilometer terrain roughness measurement and recording, considering error sources

12 p2244 A70-26938

Plane stationary nonlinear problem of air flow over earth surface roughnesses, using three layer atmospheric model

14 p2602 A70-30160

Attenuation, resistivity and surface roughness measurements in rectangular waveguides

14 p2555 A70-30440

Mars surface topography and roughness from radar measurements

14 p2648 A70-31081

Rough surface radiative properties, determining electromagnetic wave scattering by Maxwell equation solution [AIAA PAPER 70-862]

17 p3135 A70-34508

Dielectric models of interstellar grains from calculations for smooth particles of homogeneous materials

17 p3159 A70-34879

Planetary surface smoothness factor by disk brightness, Mars red light and phase curves methods, indicating superiority of visual observation

18 p3315 A70-36602

Ocean roughness determination from satellite photographs sunglint patterns, indicating surface wind speeds

22 p4014 A70-42770

Free and supported curvilinear holes with random roughness, investigating stress concentration by conformal mapping

23 p4265 A70-43984

Sliding bodies contact surfaces stable roughness magnitude by molecular-mechanical friction and wear fatigue theories

24 p4341 A70-45489

SURFACE ROUGHNESS EFFECTS

Plastic deformation of wedge shaped model asperities influencing gas leakage between contacting surfaces, discussing critical contact pressure

01 p0060 A70-10267

Surface roughness effects on dry friction between two metals, considering conical asperities and friction coefficients

[ASME PAPER 69-LUB-10] 01 p0102 A70-10394

Flow stability criterion in rough pipes, deriving laminar to turbulent flow transition characteristics and drag as function of Reynolds number

01 p0064 A70-10998

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness

[ASLE FICFS PREPRINT 15B]

02 p0308 A70-12176

Circumferential wave propagation around cylinder, demonstrating dependence on incident frequency and surface roughness, noting target surface microscale roughness measurement technique

02 p0339 A70-12184

Electromagnetic scattering from randomly rough surface with finite conductivity, using Kirchhoff approximation

02 p0261 A70-12587

Electromagnetic wave backscattering from composite rough surfaces, using Stratton-Chu integral

02 p0261 A70-12589

Thickness measurement of nonmagnetic coatings on magnetic substrates taking into account surface roughness effect

02 p0302 A70-12672

Pumping energy distribution over cross section of active ruby laser elements in relation to smoothly polished, roughly polished and dull lateral cylindrical surfaces

04 p0700 A70-14607

Critical load and instability of smooth and mesh surface mechanical systems subjected to impinging fluid jet, noting static buckling and flutter effects

[ASME PAPER 69-WA/APM-10]

04 p0772 A70-14917

Wind velocity longitudinal profile measurements in atmospheric boundary layer over rough sea surface using floating beacon and statistical analysis of airflow perturbations

04 p0715 A70-15253

Elliptically polarized microwave scattering at electrically conducting rough surface, considering probability distribution of profile angles and random reflection coefficients

04 p0650 A70-15286

Radar signal amplitude fluctuations reflected from disturbed sea water surface, noting wind induced waving stochastic nature influence

05 p0812 A70-16246

Kirchhoff wave scattering geometric optics theory accuracy, using multifrequency acoustic wave backscatter data obtained from rough surfaces

05 p0814 A70-16401

Ocean surface roughness time variation effect on incident laser beam, analyzing motion picture data by computer program

05 p0860 A70-16687

Air leakage between contacting surfaces assuming surface irregularities as microscopic truncated cones with ideally plastic or elastic mechanical properties

06 p1031 A70-17133

Core length of water jet from circular tube, considering wall roughness, tube diameter and water viscosity and surface tension

06 p1031 A70-17135

Surface roughness effects on radiant heat transfer rate of isolated plane surface with uniform temperature illuminated by collimated solar flux

06 p1172 A70-17178

Turbulent boundary layers and wall jets development investigated for effect of mass injection through porous smooth and rough surfaces

06 p1034 A70-17679

Laminar sublayer resistance to momentum and heat transfer, noting effects of Prandtl number and surface roughness using mathematical model and experiments

06 p1034 A70-17680

Liquid nucleation in vapor condensation on wettable, unwettable, smooth, rough and cavitated surfaces, showing positive effect of roughness elements

06 p1177 A70-17838

Wall roughness effects on model heat transfer in high Reynolds number shock tunnel milliseconds flow using thick film fast response calorimeter

06 p1070 A70-18446

Rough metal surfaces thermal convection resistance for total heat flow through microcontacts

07 p1418 A70-18648

Gas detonation in rough walled pipe, calculating Chapman-Jouguet detonation velocity, deriving existence criterion

07 p1419 A70-18752

Streamwise directed vortices and crosshatched surface roles in heat transfer and ablation processes of reentry vehicles

07 p1394 A70-19729

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle

07 p1343 A70-20121

Crystalline structure effect on molecular beam reflection from rough polycrystalline Au surfaces

07 p1343 A70-20123

Polarization structure of electromagnetic wave scattered by slanted two dimensional statistically rough surface of finite conductivity

08 p1456 A70-20573

Scattered field from rough ionospheric irregularities or earth surface for arbitrary polarization of incident wave

08 p1456 A70-20574

Heat transfer augmentation in tubes by surface roughness and twisted tape generated swirl flow

08 p1600 A70-21830

Correlation functions for resistance to heat and momentum transfer in viscous sublayer at rough walls defined for varied geometry flows

[ASME PAPER 69-HT-2] 08 p1486 A70-21833

Surface roughness effects on measured cross spectral density of wall pressure fluctuations beneath turbulent boundary layer

08 p1486 A70-21859

Laser radiation diffuse reflection from rough surfaces, considering surface specularly and reflected waves polarization and spatial structure

09 p1696 A70-22630

Backscattering from rough surface of nuclear fireball measured by two way directive radar antenna on reentry vehicle

09 p1634 A70-22703

Atmospheric condensation nuclei activity with rough surface with decreasing spherical hollows

09 p1718 A70-23172

Laminar-turbulent boundary layer transition in incompressible fluid under surface roughness action, developing theory by generalizing Taylor hypothesis

09 p1664 A70-23713

Volcanic terrain by high precision photogrammetry for studying planetary surface roughness traversability by three wheeled vehicle

10 p1882 A70-25047

Externally pressurized porous journal gas bearings with solid sleeve parts for reducing porous media waviness and roughness effects

10 p1896 A70-25097

Interfacial thermal conductivity model based on statistical features of two faces in contact, discussing surface roughness and heat flow

11 p2083 A70-25763

Metal surfaces contact with cones and pyramids asperities, analyzing surface roughness effects on dry friction

11 p2060 A70-26412

First order scattering formulae for s- and p-light reflected and transmitted by rough plane surface using perturbation theory

11 p2086 A70-26840

Sea roughness effect on bandwidth of radar backscatter, analyzing Doppler signals of eight millimeter aircraft navigation system

12 p2228 A70-26906

Radar cross section sea clutter model based on slightly rough surface superposition on swell structure

13 p2366 A70-29215

Boundary layer transition at high Mach numbers on adiabatic wall, showing effects of wind tunnel size, surface roughness and freestream disturbances

[AIAA PAPER 70-586] 13 p2342 A70-29884

Atmospheric airflow model above changes in surface roughness, temperature and heat flux, using boundary layer approximations and Businger-Dyer and mixing length hypotheses

14 p2602 A70-30368

Vertical flux densities of momentum and sensible heat dependence on displacement height and surface roughness

14 p2602 A70-30371

Cutting speed, feed parameters and tool tip curvature effects on machined surface roughness of turned fiberglass reinforced epoxy laminates

14 p2590 A70-30873

Lunar surface roughness effects on thermal radiation, using model surface with parallel troughs

14 p2649 A70-31212

Autocorrelation of coherence characteristics of polarized components of light scattered at curved rough surface, showing nonadequate Kirchhoff approximation

15 p2749 A70-31555

Erroneous height correlation coefficients in physical optics formulation of rough surface scatter

16 p2859 A70-32938

Turbulent boundary layer response in flow field downstream of upstanding step change in surface roughness

[ASME PAPER 70-FE-17] 16 p2891 A70-33630

Diffuse specular rough surface measure for imperfect reflections in thermal radiation transfer through slot passages

[AIAA PAPER 70-860] 16 p2999 A70-33905

Super and subspecular maxima in angular distribution of polarized radiation reflected from roughened dielectric surfaces

[AIAA PAPER 70-861] 16 p2999 A70-33906

Monte Carlo model of V groove surface roughness effects on directional reflections in plane of incidence, employing energy localization circle

[AIAA PAPER 70-820] 16 p3002 A70-33944

Radiatively interacting adjacent plates in presence of collimated solar flux, considering surface roughness effects on equilibrium temperature distribution

[AIAA PAPER 70-817] 16 p3002 A70-33946

Radiative heat transfer between opaque interacting surfaces for equal temperature adjacent plates with one dimensional surface roughness profile

16 p3002 A70-34196

Solid state laser active element lateral surface microprofile effect on heat endurance

16 p2929 A70-34220

Roughness effects on heat transfer to surfaces in supersonic compressible turbulent boundary layer

[AIAA PAPER 70-742] 17 p3066 A70-34505

Atmospheric reentry nosetip shape changes supersonic flow, considering rough surface effects on heat transfer

[AIAA PAPER 70-827] 17 p3196 A70-35193

Lunar millimeter wavelength thermal radiation measurement noting surface roughness effect on polarization

17 p3171 A70-35559

Point source electric field over different sections of impedance piecewise inhomogeneous surface, calculating attenuation function near boundaries

19 p3381 A70-38570

Radio wave propagation over inhomogeneous terrains, determining perturbing effects of details on wave characteristics

19 p3381 A70-38573

Rod surface roughness effect on eddyling sound frequency and intensity and on aerodynamic resistance

19 p3353 A70-38654

Thick film thermocouple gages for roughened model surface heat flux measurements in high Reynolds number shock tunnel

21 p3824 A70-40860

Surface roughness effects on thermal radiant energy interchange between opaque interacting surfaces formulated for unequal temperature adjacent plates

21 p3944 A70-41018

Spectral bidirectional reflectance measurements of rough metallic surfaces for reflected energy spatial distribution determination in radiative heat transfer problems

23 p4281 A70-44446

SURFACE STABILITY

Infinitesimal deflections of piecewise-regular unfolding scanning surfaces fixed along edge with respect to one point, discussing rigidity

03 p0591 A70-13414

Computerized calculations for cylindrical tank bottoms with outlet based on strength analysis, using zero moment theory for surface stability under uniform pressure

05 p0946 A70-16957

Holographic interferometry applied to amplitude measurement of periodic mechanical surface vibration

06 p1069 A70-18436

Iron cyanide additive for surface stabilization of ZnO irradiated with UV in vacuum

12 p2181 A70-27258

Bubbles, steady streaming and surface instability in vibrated liquid columns

14 p2663 A70-30255

Interfacial instability effect on heat transfer to liquid nitrogen drops undergoing film boiling on flat Al surface, obtaining vaporization rates and times

21 p3948 A70-41203

Elastic stability theory Cosserat surface subjected to conservative nongyroscopic surface and edge loading

21 p3939 A70-42027

Sliding bodies contact surfaces stable roughness magnitude by molecular-mechanical friction and wear fatigue theories

24 p4341 A70-45489

Surface alloying of alloy with three elements /Al, Si and Cr or Zr/, investigating coating stability in weight, microstructure and microhardness

24 p4364 A70-46340

SURFACE TEMPERATURE

NT SKIN TEMPERATURE [NON-BIOLOGICAL]

NT WALL TEMPERATURE

Nuclear reactor surface temperatures probability calculations allowing for some uncertainties and MTR type test reactor application

03 p0523 A70-12997

Ground temperature effect on thermal resolution in IR line scan imagery, discussing equipment and

operating procedures for temperature gradient detection 04 p0686 A70-14617

Transient one dimensional heat transfer analysis demonstrating infiltrant melting effect on self heat-retarding porous metal composite during surface melt layer formation 04 p0709 A70-15414

Photographic pyrometry for surface temperature measurements on ablation models, discussing technique accuracy and limitations 04 p0694 A70-15536

Heat source temperature distribution on surface of infinite cylinder with zero temperature, presenting solution to boundary value problem 05 p0957 A70-16296

Temperature of contact surface between two homogeneous isotropic solid bodies determined by calculating plane heat source of steady three dimensional temperature field 05 p0958 A70-17014

Satellite IR measurements of surface horizontal temperature structure of Gulf Stream compared with ship and aircraft data 05 p0844 A70-17104

Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows 06 p1061 A70-17205

Noontime ground surface temperature relationship to exposure and slope angle for meadows and woodland, using airborne IR pyrliometer 06 p1054 A70-17415

Heat transfer from constant temperature and heat flux surfaces to viscous fluids with high Prandtl numbers, considering transient and steady state flow 06 p1176 A70-17687

Heterogeneous ignition mechanism of solid fuels, deriving surface temperature history for time and nature of transition from weak to strong combustion mode [ALAA PAPER 70-119] 06 p1128 A70-18041

Passive microwave observation from space of sea surface degraded by atmosphere 06 p1010 A70-18087

Surface temperature effects on low Reynolds number hypersonic shock layer development over flat plate sharp leading edge 06 p0982 A70-18364

Convective and radiative heat fluxes measurement on charring ablative materials surface in rocket nozzle environment 06 p1070 A70-18444

Natural convection flow interactions from individual surfaces in closely spaced array of heated elements, discussing effect on heat transfer, induced flow and temperature field 07 p1418 A70-18644

Temperature stress distribution in cylinder or sphere with variable surface temperature and heated by external sources 07 p1411 A70-19819

Optimal atmospheric transmittance windows for underlying surface and cloud temperature determination from satellites 08 p1538 A70-21426

Venus surface temperature calculations with non-gray radiation balance model and Mariner 5 and Venera 4 vertical temperature profile data 08 p1579 A70-21568

Tungsten emissivity and radiance properties obtained at high surface temperatures 09 p1725 A70-22068

Local heat transfer coefficients determination for unilaterally heated rectangular coolant duct by approximation and experiment applicable to circular tubes 09 p1787 A70-22170

Temperature distribution in infinite and finite circular hollow cylinders, considering surface heat flux and linear heat transfer 09 p1788 A70-22595

Electronic radio equipment with encapsulated structure and natural ventilation, calculating heated zone and casing mean surface temperatures 09 p1648 A70-23147

Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation [ALAA PAPER 69-1024] 09 p1657 A70-23259

Boundary function of unsteady temperature field in bodies with moving surface at constant temperature calculated by least squares method 09 p1791 A70-23620

Heat and mass transfer during liquid surface evaporation in vacuum, calculating temperature field on basis of heat balance level 09 p1791 A70-23717

Aircraft surface temperature measured with airborne IR TV system 09 p1686 A70-23754

Sea surface temperature measurement over large areas using IR remote sensing system mounted on airborne platform 09 p1686 A70-23756

Ni-Cr austenitic steel bending, surface temperature variations, crack development and propagation under double fatigue tests 10 p1902 A70-23819

Thermal radiation shield influence on stationary radiative heat transfer in closed arbitrarily shaped two gray surface system 10 p1966 A70-23865

Mixed thermoelastic problem in elastic layer with arbitrarily prescribed temperature in upper free surface 10 p1954 A70-23878

Air flow turbulence intensity and plug effect influence on local heat exchange on cylinder surface 10 p1797 A70-24028

Eclipsing binary beta Aurigae effective temperature and surface gravity determination from photoelectric spectrum and abundance analyses 10 p1938 A70-24100

Transient thermal stresses in restrained-in-bending slab with surfaces heated and cooled with finite heat transfer coefficients 10 p1964 A70-25095

Quasi-steady analysis of material under ablation-erosion heat transfer for hypersonic vehicles 11 p2149 A70-26144

Radiation heat transfer around interior of long cylinder as function of surface emissivity 11 p2149 A70-26152

Temperature distribution in shadowed lunar craters formulated in Fredholm integral equations, showing constant temperature and correction for soil thermal inertia [ALAA PAPER 69-595] 11 p2112 A70-26155

Steady state surface temperature measurement errors by thermistors, thinistors and thermocouples, discussing sources 11 p2052 A70-26361

Apollo 13 lunar surface heat flow experiment to measure vertical temperature gradients as function of time and soil thermal conductivity 11 p2118 A70-26747

Microwave radiometric temperature measurements generating curves relating sea state and surface temperature 12 p2215 A70-26903

Laminar boundary layer transition to quasi-cellular flow in natural convection above horizontal heated plates and disks 12 p2155 A70-27197

Radiative heat transfer in spherical space bounded by perpendicular annular rib system with gray diffuse and absolutely black body surfaces 12 p2331 A70-27554

Lunar surface brightness temperatures from IR observations, determining thermal emission directional characteristics to infer surface temperatures from Surveyor data [ALAA PAPER 69-593] 13 p2486 A70-28501

Mechanical seals ringing sound relationship with heat transfer and interfacial conditions, noting sliding surfaces temperature effect 13 p2417 A70-28611

Wind velocity components on nonuniformly heated plane slope with linear periodic temperature function 14 p2602 A70-30165

Lunar horizontal and inclined surfaces net radiation and components, discussing surface temperature, thermal emission and absorbed solar radiation 14 p2634 A70-30194

Surface temperature fluctuations during dropwise condensation at various heat fluxes 14 p2663 A70-30256

Vaporization of small meteor particles with identical surface temperature, considering radio communication based on reflection from ionized trails 14 p2636 A70-30323

Venus surface temperature poleward variation from radio interferometry measurements 14 p2646 A70-31068

Mariner 6 radio signals frequency changes analysis during occultation measurement for determining Mars surface pressure and temperature 14 p2646 A70-31071

Heat transfer coefficient from circular cylinder subjected to uniform surface heat flux and cooled by ring of holes 14 p2667 A70-31427

Rarefied gas slip flow coefficients calculations at nonuniformly heated surface, demonstrating relationship between temperature and isothermal slip coefficients 15 p2776 A70-31478

Surface, volume and body center temperature of convex polyhedrons under steady heat transfer 15 p2825 A70-31624

Mariner 6/7 S band radio occultation probe of Mars atmosphere concerning surface pressure, temperature and existence of ionosphere 15 p2798 A70-31681

Laminar natural convective heat transfer along outer surface of vertical cylinder, giving coefficients nondimensionally by approximate formulas 15 p2826 A70-31821

Sea surface temperature and atmospheric moisture determination from satellite measurements of atmospheric thermal radio emission on quiet and cloudy windy days 15 p2770 A70-32069

Earth surface temperature, emissivity and dielectric constant from satellite measurements of SHF radiation 15 p2771 A70-32072

Photothermometer response to thermal shock, considering rapidly varying surface temperature measurement 16 p2901 A70-33104

Surface temperature color contour maps of objects undergoing aerodynamic testing, utilizing electro-optical and computer techniques 16 p2905 A70-33169

Surface temperature measurement with airborne IR scanning imager for terrain analysis 16 p2905 A70-33170

Optimal distributed feedback surface temperature control of inertial grade floated rate integrating gyroscope, minimizing instrument degradation 16 p2908 A70-33347

Surface temperature changes measurement with thermovision camera, discussing calibration and recording 16 p2911 A70-33775

Surface temperature or heat flux density estimation for nonlinear inverse heat conduction problem involving temperature dependent thermal properties 16 p3002 A70-34195

Aerial IR surveys of surface temperature patterns of Hudson Bay during ice free seasons 17 p3079 A70-35621

Tiros satellites window radiation applied to day and night surface temperature measurements on land and sea 17 p3081 A70-35932

Surface temperature fluctuations during steady state boiling from tube, using fast response thermocouple 18 p3347 A70-36504

Autoignition, ignition and surface temperatures of M-2 double base propellant at low pressure, correcting thermocouple measurements by theoretical model 18 p3299 A70-36697

Heat transfer rates in short flow duration facilities /shock tubes/ from surface temperature measurement of solid exposed to flow 18 p3348 A70-36715

Pulsed laser holographic nondestructive testing optimization technique, monitoring honeycomb panel surface temperature during thermal stressing 18 p3259 A70-36754

Surface temperature distribution over rotating nucleus of comet deficient in volatiles 18 p3319 A70-37058

Atmospheric temperature profiles from terrestrial IR spectral radiances measured by balloon-borne grating spectrometer, discussing surface temperature variations 21 p3813 A70-40905

Aeolian regime of Venus surface resulting from high surface temperature and pressure, discussing spurious radar echoes, dust and sand transport and deposition 21 p3885 A70-40929

Gravity darkening of tidally and nonuniformly rotating Roche components of close binary systems, calculating surface temperature and spectral distributions 21 p3888 A70-41120

Site activation in saturated nucleate boiling tests involving various fluids boiled on transparent oxide coated glass surface, correlating site density data with surface temperature 21 p3948 A70-41202

Heated surface orientation and reduced gravity effects on Freon 113 nucleate 21 p3948 A70-41204

Sea surface temperature determination from satellite high resolution IR window radiation measurements by statistical histogram inference method 21 p3820 A70-42122

Dynamic nonstationary thermal convection in closed region with heat input from lateral surface for high Rayleigh and Fourier numbers 21 p3954 A70-42214

Sea surface temperature relationship with ocean currents, using bathythermograph data 22 p4014 A70-42768

Star flare HD 160202 in M6, discussing luminosity, time duration, magnitude and temperature 22 p4102 A70-42971

Heat exchange coefficients on side surfaces of constant thickness gas turbine disk, using temperature distribution method and integral transformations 22 p4125 A70-43367

Spectral brightness temperature, directional emissivity and surface temperature of earth from remote

radiance observations by balloon-borne multidetector grating spectrometer 23 p4194 A70-44035

Ground temperature effects on thermal gradients resolution in IR line scan imagery 24 p4334 A70-45363

Al alloy sheets with multicolor protective coatings, measuring surface temperature under solar radiation 24 p4428 A70-45434

Metal and nonmetal thermal nondestructive tests based on surface temperature distribution produced by heat treatment 24 p4348 A70-45744

Surface constitutive assumptions restrictions for rigid heat conductor, accounting for radiative heat supply 24 p4429 A70-46032

Surface temperature distribution of heat generating solid body in contact with parallel viscous fluid flow 24 p4430 A70-46368

Ocean currents and sea surface temperature remote sensing by Nimbus 2 High Resolution IR Radiometer 24 p4332 A70-46400

SURFACE TENSION

U INTERFACIAL TENSION

SURFACE TO AIR MISSILES

NT HAWK MISSILE

Missile tracer mixture performance control facility noting chamber for pressure measurement during operation 03 p0544 A70-13758

Electromagnetic interference (EMI) effects on TALOS missile guidance receiver by expanding computer simulation test results 14 p2655 A70-31345

SURFACE TO SURFACE MISSILES

NT CRUISE MISSILES

NT MINUTEMAN ICBM

Fluidic attitude control for boost phase of tactical surface to surface missile 16 p2844 A70-33447

Otomat surface to surface missile with turbojet engine for extended range subsonic cruise and two solid propellant rocket engines for launch 22 p4110 A70-43211

NASA research studies supporting tracked air cushion vehicle (TACV) program illustrating aerospace technology application to ground transportation [AAS PAPER 69-565] 04 p0622 A70-14639

One dimensional compressible flow analysis for near field aerodynamics of tube-vehicles, showing drag coefficient dependence [AIAA PAPER 70-140] 06 p1038 A70-18077

Ram wing vehicles aerodynamics application to high speed ground transportation, studying effect on passenger ride quality [AIAA PAPER 70-142] 06 p0973 A70-18145

Slender body theory for steady state aerodynamic characteristics of high speed ground vehicles with arbitrary cross sections, discussing side wind [AIAA PAPER 70-139] 06 p0973 A70-18155

Magnetic suspension and guidance of high speed vehicles realized via magnetic field interaction of vehicle-mounted superconducting magnets with eddy currents 08 p1543 A70-20576

Unmanned Mars roving vehicle navigation subsystem feasibility study covering inertial and gyrocompass-odometer systems 11 p2080 A70-26211

Satellite navigation method for locating Mars landmark or target point for exploration by roving vehicle located as center of coordinate system 11 p2080 A70-26213

Routing algorithm for computer controlled unmanned autonomous roving vehicle on Martian surface 11 p2081 A70-26317

Unmanned vehicles for planet surface exploration, discussing design and control using self adjusting and logic circuits 13 p2384 A70-28418

Surface navigation for unmanned Martian surface roving vehicle 14 p2615 A70-30469

Dual mode algorithm for routing unmanned autonomous roving vehicle around obstacles on planets, using dynamic programming and terrain information [JPL-TR-32-1484] 14 p2655 A70-31183

High speed ground tube vehicle transportation system aerodynamics, presenting drag coefficients and static wall pressure measurements 16 p2839 A70-34264

Roving vehicle self contained automatic control systems, discussing terrain scanning technique, stereo TV and electronic coordinate measuring and data processing equipment 23 p4260 A70-44628

SURFACE WAVES

NT BAROCLINIC WAVES

NT CAPILLARY WAVES

NT GRAVITY WAVES

NT SOMMERFELD WAVES

Circumferential wave propagation around cylinder, demonstrating dependence on incident frequency and surface roughness, noting target surface microscale roughness measurement technique 02 p0339 A70-12184

Free oscillations and surface wave dispersions from lunar models based on Orbiter data and corresponding pressure region of earth crust 02 p0379 A70-12777

Axial emission impedance antenna converting strongly delayed surface wave into weakly delayed wave forming cophased front at antenna end 03 p0456 A70-13199

Surface wave attenuation in homogeneous plasma cylinder caused by resonance in transition layer between plasma and vacuum 03 p0447 A70-13286

Magnetoelastic surface wave propagation properties in ferrites at UHF wavelengths, using numerical calculations for gallium-YIG 03 p0540 A70-13700

Surface function and impedance distribution for unilateral surface wave antenna excitation by slot emitter above surface impedance segment 04 p0655 A70-14403

Surface waves excited by horn above dielectric disk backed by metallic disk, formulating characteristic wave equations and solving for attenuation and propagation constants 04 p0659 A70-15305

Interaction of infinite shallow draft cylinder oscillating at free surface with train of oblique waves 04 p0618 A70-15321

Surface wave spectrum and propagation in non-homogeneous bounded elastic solid, considering existence and eigenvalues approximation 05 p0925 A70-15789

Characteristic equation for phase velocity of surface wave propagating on helix for forbidden zone, suggesting current distribution function 05 p0815 A70-16775

Surface acoustic wave components for performing transduction, amplification and coupling functions, considering compatible component configurations 06 p1018 A70-17477

Immittance, transfer and scattering characteristics for interdigital acoustic surface wave transducers, using linear equivalent circuit model 06 p1062 A70-17478

Materials fatigue failure ultrasonic early detection by continuous surface wave irradiation 06 p1077 A70-17920

Ultrasonic surface waves detection of transverse fatigue crack initiation in rails under load, applying results to fatigue life determination 06 p1168 A70-17924

Surface wave propagation and amplification by electron beam-plasma interaction, inapplicability of coupled mode theory and use for microwave amplifier 06 p1125 A70-18616

Propagation pattern of surface acoustic wave visualized in piezoelectric and nonpiezoelectric materials by dusting delay line with fine particles 07 p1336 A70-20283

Gas flow influence on wave characteristics of thin viscous liquid layers pulled by gravity vertical surface compared with water layer experiments 08 p1482 A70-20917

Modal excitation and scattering in retinal receptors of human and insect visual systems investigated with dielectric rod uniform wave and irregularities 08 p1452 A70-21289

Upper frontal waves behind quasi-stationary surface cold front using mathematical model 08 p1540 A70-21924

Surface wave reflection during propagation along transversely magnetized ferrite plate on metal backing, using perturbation theory to find cylindrical wave field 10 p1844 A70-25163

Surface waves stability in cold bounded plasma against background of steady state electron oscillations, using nonlinear approximation 11 p2089 A70-25716

Surface waves excited by oscillating current in cold plasma surrounded by metallic sheath of infinite conductivity, deriving frequencies and growth rates 11 p2089 A70-25717

Microwave surface acoustic delay lines properties, advantages, electron beam fabrication, optical probing for propagation loss measurement, etc 11 p2005 A70-26166

Excitation of surface waves on impedance plane in collisionless cold anisotropic plasma with external magnetic field coinciding with source direction 12 p2278 A70-27538

Surface wave transmission lines used at millimeter wavelengths 14 p2549 A70-30443

Surface wave excitation including PM and dipole modes and Sommerfeld waves 14 p2549 A70-30444

Surface wave radiation from plane dielectric waveguide, considering phase constants, directional properties and optimal distance location 15 p2696 A70-31503

Feed and terminal radiation patterns of surface wave antennas measured separately 16 p2861 A70-32973

Acoustic and magnetic surface waves technologies for radar signal processing 16 p2874 A70-33390

Observational errors effects on surface waves resolution, describing shear velocity determination in crust and mantle from observed waves 16 p2897 A70-33647

Elastic waves on isotropic and anisotropic surfaces, discussing excitation methods, surface probing, propagation characteristics, etc 17 p3136 A70-34650

Surface wave antennas, operated on guided wave mode parallel to interface and with radiation at discontinuities, calculating excitation and radiation characteristics 17 p3052 A70-35072

Nonlinear theory for surface waves propagating in bounded magnetoactive plasma 18 p3295 A70-36412

Elastic Cosserat half plane, analyzing wave propagation of small amplitude thermoelastic disturbances and uniform motion of concentrated line load along surface 18 p3338 A70-36434

Nonlinear effects of harmonic generation and mixing in lithium niobate microwave acoustic surface wave delay lines measured using laser light deflection 19 p3485 A70-37698

Numerical model of piezoelectric surface wave propagation on free and metallized cubic and hexagonal crystals 19 p3486 A70-37754

Surface waves free period partial derivative correlation and relation to resolution of gross earth data 19 p3414 A70-38374

Ultrasonic surface waves amplification in piezoelectric crystal-Si semiconductor system, observing dependence on permittivity 19 p3488 A70-38675

Wave propagation in linear elastic surfaces, calculating wave speeds, shapes and strength decay 19 p3473 A70-38943

Frequency shifted diffraction of monochromatic Gaussian light beam by reflection off ultrasonic surface wave 21 p3850 A70-41907

Acoustic surface waves phase velocity on lithium niobate with gold layer for propagation modes, predicting LF cut-off by substrate anisotropy 21 p3863 A70-42001

Surface elastic waves, considering propagation, electromagnetic transduction, amplification, guiding, focusing, reflection and applications 21 p3830 A70-42115

Slow wave propagation on conducting surface separated from plasma by ion sheath, observing resonances on cylindrical antenna 22 p4082 A70-43238

Far field diffraction spreading of surface acoustic waves on cut Li-niobate in two directions 23 p4230 A70-44199

EM wave backscattering from lossless dielectric sphere, examining diffracted field surface waves role 23 p4165 A70-44960

Thin liquid film /melt layer/ on body in supersonic flow, examining crosshatched wave patterns stability 23 p4183 A70-44979

Electromagnetic-surface elastic waves conversion in superconductors, considering thin plate forced vibrations and standing waves excitation 24 p4389 A70-45205

Single crystal piezoelectric materials growth characteristics and wave propagation properties for surface acoustic wave applications 24 p4367 A70-45399

SURFACES

Large-tilt-angle lifting surface theory for V/STOL aircraft based on inclined actuator disk analysis 04 p0619 A70-15377

Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties [AIAA PAPER 69-37] 04 p0619 A70-15387

Gaussian quadrature integration technique developed for collocation approach for integral equation of steady subsonic lifting surface theory [AIAA PAPER 70-191] 06 p0970 A70-18097

Lifting surface problem for finite span wing in ground effect using matched asymptotic expansions method 14 p2527 A70-30280

- Sears function and lifting surface theory for harmonic gust fields in incompressible flow, modifying function for accurate interpolation of large numbers
14 p2528 A70-30860
- Dynamic stability derivatives calculation using steady and oscillatory lifting surface theory with allowance for Bryan limitations
14 p2529 A70-30864
- Stiffness matrix correction for curved element deficient in rigid body motion
18 p3342 A70-36687
- Frequency dependent effects of applied acoustic fields on attached jet flows for Reynolds numbers over curved surfaces
[ASME PAPER 70-FLCS-1] 22 p4008 A70-42430
- Subsonic high lift cruise wing optimal design using kernel function method of planar lifting surface theory
22 p3959 A70-42709
- SURGEONS**
NT FLIGHT SURGEONS
SURGERY
NT LABYRINTHECTOMY
Lasers for surgical applications, cancerous tissue treatment, ophthalmology and comparison with RF diathermy
24 p4308 A70-45569
- SURGES**
Stage matching under local stall conditions for multistage axial flow compressor off-design and surge initiation characteristics
09 p1608 A70-23741
- Statistical classifier for analyzing tape recorded transients
11 p2056 A70-26457
- F-11A airplane in-flight inlet pressure fluctuations for engine compressor surge, discussing average turbulence factor
[AIAA PAPER 70-624] 16 p2840 A70-33543
- Aircraft propulsion control system accommodating transients and yielding higher steady state performance
16 p2966 A70-33557
- Zener diodes as voltage transient suppressors for ground vehicle and aircraft power supplies
16 p2879 A70-34060
- Temporal sequence correlation between surges and associated flares during solar cycle
22 p4095 A70-43265
- SURGICAL INSTRUMENTS**
Laser radiation effects on eye, quantifying light necessary for coagulation for retinal detachment surgery, discussing risks in laser surgery
01 p0037 A70-10859
- SURVEILLANCE**
Space systems for communications, surveillance and navigation needs of international aviation, discussing service requirements, spectrum utilization, technology limitations and terminal design
07 p1330 A70-19290
- One dimensional Poisson production process under costly surveillance, considering maximum attainable income rate approximation
09 p1653 A70-22347
- Land and airspace demands in navigation, surveillance and traffic control, discussing application of current techniques
14 p2611 A70-30105
- Computer controlled frequency surveillance system design and operation
16 p2871 A70-34052
- Satellite technology applications to ATC, including communications, navigation, surveillance over water and data acquisition
[AIAA PAPER 70-1301] 24 p4373 A70-45922
- SURVEILLANCE RADAR**
Secondary surveillance radar to operate autonomously with digital techniques and digital handling systems, discussing design and ATC applications
02 p0266 A70-11957
- ATC surveillance radar for high density traffic, discussing optimum electronic scanning rates, 3D radar and MTI
02 p0330 A70-11958
- Secondary surveillance radar (SSR) automatic plot extractors and display processors for providing information on aircraft height and identity for air traffic control
02 p0256 A70-11963
- Secondary surveillance radar and interferometry techniques to determine aircraft positions in real time and all weathers for air terminal approach control
02 p0331 A70-11965
- Automatic aircraft tracking by returns from secondary surveillance radars, noting correlation of plots with track
02 p0332 A70-11966
- Airborne secondary surveillance radar transponders performance and system optimization for automatic altitude reporting, separation standards maintenance and automatic plot extraction
02 p0267 A70-11990
- Deleterious suppressing nonsynchronous responses (fruits) in secondary surveillance radar systems, discussing effects on target detection probability
02 p0263 A70-12786

Control program debugging for experimental automatic surveillance and tracking radar, noting use for on-line systems
04 p0654 A70-15449

Ground based radar surveillance for SST to avoid convective clouds and thunderstorm activity during transonic acceleration phase ensuring minimum demands on maneuverability
09 p1610 A70-22242

Synthetic aperture radar in earth resource monitoring by satellite, determining topography and surface nature from spatial patterns
09 p1635 A70-22872

Stable moored ocean platforms providing reliable VHF communications and secondary surveillance radar facilities for civil aviation operations over North Atlantic
09 p1723 A70-23035

Digital range tracking, Doppler filtration and moving target selection in multichannel automatic surveillance radars
13 p2380 A70-29735

Passive and cooperative active hologram radar extended from stationary coherent radar, considering use in airport surveillance of aircraft
21 p3792 A70-42119

SURVEYING

U SURVEYS

SURVEYOR LUNAR PROBES

NT SURVEYOR 5 LUNAR PROBE

NT SURVEYOR 7 LUNAR PROBE

Lunar origin theories, considering lunar surface data from Surveyor spacecraft and Lunar Orbiter
01 p0178 A70-10453

Bioscience for recovered lunar samples, discussing Surveyor analyses, Lunar Receiving Laboratory methods and life detection using biological markers
01 p0042 A70-11637

Surveyor TV camera conversion from qualitative viewing device into quantitative measuring instrument by calibration coupled with data processing program
[JPL-TR-32-1374] 03 p0490 A70-13662

Surveyor 5, 6, 7 missions alpha-scattering experiments, lunar rocks chemical composition compared with earth rocks and chondritic meteorites
04 p0752 A70-15062

Prelaunch photometric calibration of Surveyor TV system for reconstruction of lunar terrain televised pictures permitting system lunar performance prediction
[AIAA PAPER 68-1138] 04 p0692 A70-15405

Surveyor spacecraft vernier propulsion system survival in lunar environment, suggesting temperature resistant seal and valve seat material for fluid loss prevention
06 p1129 A70-17170

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position
[SMPT PAPER 105-71] 10 p1890 A70-24601

Lunar surface alpha radioactivity at Surveyor 5, 6 and 7 landing sites
11 p2104 A70-25658

Unmanned exploration of planetary surfaces in preparation for manned landings, describing Surveyor lunar probes
11 p2112 A70-26056

Lunar surface mechanical properties from Surveyor spacecraft interactions with soil/exclusive of surface sampler/
14 p2644 A70-31055

Stepper motor for pointing Surveyor spacecraft TV transmitting antenna and solar panel at earth and sun
16 p2845 A70-34110

Surveyor spacecraft landing shock absorbers design and performance assessment by digital computer simulation
16 p2922 A70-34123

Surveyor thermal switch for temperature control to assure spacecraft components performance during temperature extremes on lunar surface
16 p2845 A70-34127

Surveyor TV mechanisms, discussing camera, mirror, zoom lens, filter wheel, focal plane shutter and lubrication
16 p2914 A70-34147

Surveyor camera double acting rotary solenoid actuated focal plane shutter utilizing two blades in parallelogram linkage
16 p2914 A70-34148

Surveyor spacecraft characteristics and operation, discussing scientific payloads, landing sites, etc
20 p3716 A70-39951

Lunar surface physical conditions from Surveyor landings, discussing fine cohesive rock powder
20 p3708 A70-39959

SURVEYOR PROJECT

Surveyor project as basis for technology transfer management exemplified by planning and organization problems
02 p0403 A70-12639

Surveyor spacecraft testing at Environmental Test Laboratory, describing facilities and innovations designed for temperature extremes
19 p3532 A70-37960

Surveyor program results, discussing lunar craters, rock fragments, particle size optical, thermal and radar characteristics and chemical composition
20 p3707 A70-39952

Lunar topographical and geological features examined by Surveyor program
20 p3707 A70-39953

Lunar crater size and shape characteristics from Surveyor missions, discussing rimless shallow and cup shaped craters
20 p3707 A70-39954

Lunar fragmental debris layer observations from Surveyor project, examining size, shape, texture, structure, etc
20 p3707 A70-39955

Lunar fragmental debris physics from Surveyor observations, examining size-frequency distribution
20 p3707 A70-39956

Lunar elemental abundances examined by Surveyor project, discussing albedo contrasts, surface rock density, bulk composition, thermal regime and chondritic meteorites
20 p3707 A70-39957

SURVEYOR 5 LUNAR PROBE

Surveyor 5 lunar rock data from Mare Tranquillitatis compared with pyroxene gabbros, indicating gabbro or gabbroic anorthosite classification
01 p0181 A70-10575

Lunar surface material composition examination by Surveyor 5, discussing formation of surface
20 p3708 A70-39958

SURVEYOR 7 LUNAR PROBE

Surveyor 7 alpha scattering experiment and TV image data revealing lunar surface chemical composition, rocks and fragments, etc
04 p0752 A70-15060

Lunar regolith and polarized component of earthlight observations by Surveyor 7 TV camera
04 p0752 A70-15061

Surveyor 7 highland landing soil mechanical properties and rock diameter similar to previous sites
04 p0752 A70-15063

Surveyor 7 lunar surface sampler, obtaining soil and rock data
04 p0752 A70-15064

Microbiological assay procedures for spacecraft sterilization and tabulation of microorganisms found on Surveyor 7
05 p0808 A70-16705

Surveyor 7 lunar mission landing site, equipment, operations, etc
05 p0915 A70-16830

Radio astronomical observations of lunar surface material EM properties compared with Surveyor 7 chemical analysis
14 p2645 A70-31059

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations
[SMPT PAPER 105-72] 17 p3095 A70-35635

SURVEYS

NT GEODETIC SURVEYS

One way radio range measurements for surveying and navigation emphasizing McDonnell collision avoidance and geophysical surveying systems, using Rb atomic clocks
01 p0136 A70-10306

UHF telescopic survey of southern sky for studying galactic plane in absorption
08 p1578 A70-21536

One way radio range measurements for surveying and navigation emphasizing McDonnell collision avoidance and geophysical surveying systems, using Rb atomic clocks
13 p2449 A70-29620

SURVIVAL

Physiological research on humans in hypothermia resulting from confinement to life raft on open sea, analyzing thermal conditions, thermoregulation and survival
01 p0013 A70-10233

Soviet book on survival in space covering astronauts training, behavior, impressions, performance, etc, with historical considerations
01 p0033 A70-10493

Space flight emergencies causes and consequences, underlying life threats and crew survival times, considering equipment failures, personnel errors, etc
04 p0761 A70-14926

Survival rates of continuously cultivated *Chlorella* plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique
05 p0803 A70-17113

Rat survival rate after prolonged gradually decreased body temperature without motion restraint or kept in fixed position
05 p0804 A70-17115

Survival training for safety promotion in emergency, discussing psychological factors, communication, living off land and shelter
07 p1218 A70-19007

Crash control for reduction of operational hazards and flight accidents to survivable level, discussing pilot training for emergencies

07 p1191 A70-19008

Physical discomfort and miseries contribution to psychological deterioration during water survival tests on life raft

07 p1218 A70-19009

Survival psychology for civil aviation, discussing irrational behavior after forced landings resulting from exhaustion of mental resources and inappropriate activity

07 p1204 A70-19018

Microorganisms survivability in agar subjected to simulated Martian freeze-thaw cycles, discussing soil samples collection and composition

09 p1618 A70-22767

Human survival problems of transport aircraft in various airport ground-air situations and environmental conditions

15 p2676 A70-32224

Book on survival in cold water covering physiology and treatment of immersion hypothermia and drowning, thermoregulation, etc

19 p3360 A70-37977

Escape and survivability rates in various aircraft flight envelope regimes, using existing escape statistics and mission profiles

23 p4141 A70-44492

Near fatal crash in T-33 aircraft, discussing protective clothing, seat harnesses, bodily position and mental attitude

23 p4153 A70-44497

SURVIVAL EQUIPMENT

Aircrew escape/rescue capability /AERCAB/ flying ejection seat design and test programs, noting rotary wing, fixed wing and parawing feasibility

01 p0035 A70-10714

Space rescue techniques and equipment in NASA recovery programs, considering low earth orbit and water landing

01 p0035 A70-10717

Electronic search and rescue system developed for West German Air Force, consisting of personal transceiver and automatic distress signal transmitter unit, etc

05 p0793 A70-15904

Aircraft life support systems and equipment evaluated in Vietnam combat environment, discussing combat ejection conditions, injuries cause and severity, fatalities, etc

05 p0806 A70-16298

Flight safety, survival and personal equipment - Conference, Las Vegas, October 1969, Volume 1

06 p1001 A70-17702

Life support and survival gear design, testing, manufacture, supply and maintenance for combat ejections over rugged enemy terrain, discussing pilot injuries

06 p1002 A70-17706

Physiological training programs and equipment for life support in transports, discussing changes in protective helmet and quick donning harness

06 p1002 A70-17708

Fleet evaluation program of AOH-1 helmet for replacement of standard flight helmet, oxygen mask retainer kit and oxygen regulator

06 p1002 A70-17709

YANKEE escape system adapted for helicopters using tractor rocket, noting modular concept advantages

06 p0986 A70-17712

Physiological and environmental factors influencing oxygen breathing system design and use for passengers and aircrews of high flying aircraft

06 p1003 A70-17716

Emergency ejection from lunar landing training vehicles, describing working sequence and experimental results on astronaut and test pilot

06 p1003 A70-17717

RAPIDJET escape, recovery and survival system providing rapid escape for large aircrew complement by manual bailout system utilizing semiautomatic escape slide

06 p0986 A70-17719

Solid propellant cool gas generating systems applications to inflating emergency escape slides, rafts, pontoons and flotation bags

06 p0986 A70-17720

Cool gas inflation systems for evacuation equipment on large aircraft with size and weight fitting into aircraft doors

06 p0986 A70-17721

Design concept and operation of electronically lobed homing system providing commands to pilot for flying aircraft directly to transmitting emergency beacon

06 p0987 A70-17725

Flight safety, survival and personal equipment - Conference, Las Vegas, October 1969, Volume 2

07 p1217 A70-19003

Flotation dummy to simulate unconscious survivors characteristics analyzed for life jacket design

07 p1218 A70-19004

Aircrew parachute with low speed-low altitude capability, considering static on-the-deck recovery, pack volume, weight, escape envelope spectrum, etc

07 p1191 A70-19014

Pilot Airborne Recovery Device /PARD/ using hot air ballute, noting capability to ascend or descend by flow control valve controlling butane burner

07 p1192 A70-19019

Lithium-cadmium fluoride battery for aircrew survival beacon radio receivers, considering voltage loss elimination by doping

08 p1439 A70-20708

Survival on sea following air accident, based on medical and technical considerations, emphasizing life jackets

09 p1625 A70-23008

Life support systems general inspection procedures, personal and survival equipment and accessories

11 p1990 A70-25673

Aircrew equipment assemblies taking into account altitude, flight acceleration, environment, escape and survival

13 p2345 A70-28971

Emergency evacuation on land of passengers and crew of airliners, discussing training, equipment, standardization, communication and protective fabrics

15 p2675 A70-32220

Concorde aircraft design for emergency passenger evacuation, emphasizing overwing inflatable escape slides and kinetic heating effects

15 p2675 A70-32222

Passenger survival and evacuation of civil jet transport aircraft after ditching at sea

15 p2676 A70-32223

F-111 crew escape module, describing main parachute and pyrotechnics severance improvements, parachute deployment and inflation, etc

21 p3751 A70-41807

SIHS-3 ejection seat escape system design, considering minimum weight, cost and maximum performance

21 p3751 A70-41808

Survival and flight equipment - Conference, Las Vegas, September-October 1970, Volume 1

23 p4151 A70-44453

Aircraft crash protection with preinflated air bag added to conventional seat/lap belt tested with human sled subjects

23 p4140 A70-44456

In-flight escape systems and survival equipment reliability in U.S. Navy ejections

23 p4143 A70-44460

Survival training program preparing physicians as advisors regarding survival equipment and medicine

23 p4152 A70-44463

High energy emergency exit systems for passenger survival in aircraft accidents

23 p4140 A70-44466

Survival and flight equipment - Conference, Las Vegas, September-October 1970, Volume 2

23 p4152 A70-44479

Flotation device for infants and small children incorporating life support and survival capabilities for aviation and marine applications

23 p4153 A70-44480

Operational requirements for NASA space shuttle Survival and Flight Equipment, discussing protection during launch and ascent

23 p4258 A70-44484

Photochromic paint nondestructive testing for survival equipment, detecting bond defects and sandwich water

23 p4197 A70-44490

F-111 aircraft crew cockpit escape module design for maximum efficiency, including survival equipment after ejection

23 p4141 A70-44491

Civilian survival in emergency situations, discussing basic requirements, environments, vehicles and equipment for survival kits

23 p4153 A70-44495

Over water aircraft accident investigation aids for greater survival, improved location searches and faster recovery of essential parts

23 p4153 A70-44498

Space vehicle personnel escape/rescue/ survivability capabilities, considering on board, prepositioned aid and earth launched concepts

23 p4260 A70-44620

SUSCEPTIBILITY [MAGNETISM]

U MAGNETIC PERMEABILITY

SUSPENDING [HANGING]

NT MAGNETIC SUSPENSION

Transit instrument suspension improvement by isolating unloading mechanism from horizontal axis, reducing external observation errors

04 p0693 A70-15483

North seeking declination gyrocompass design and operation with directing moment induced through bifilar suspension

05 p0844 A70-15775

Dynamic stability of pendulum-weight system during vertical HF small amplitude vibration of suspension point by averaging method

08 p1543 A70-20494

Time optimal control synthesis of fast acting gyrocompass mounted on fixed foundation and with hydraulic damper and torsional suspension of sensor

12 p2233 A70-27564

Rolamite low friction suspension system, describing components, force generation and applications

16 p2923 A70-34165

Torsion, filar, flexure and coil type mechanical suspensions for space applications, considering instability due to temperature changes and magnetic, electric and force fields

16 p2924 A70-34169

Gyroscope in gimbal suspension on free base of four solid bodies connected by flat hinges

18 p3259 A70-36593

Parachute opening load amplification due to suspension line elasticity, using two-body spring-mass model

23 p4142 A70-44531

SUSPENDING [MIXING]

Laminar flow of suspension over flat plate, analyzing particulate velocity and concentration profiles relationships to drag and lift forces

14 p2565 A70-30270

Erythrocyte suspension subjected to gas bubble ultrasonic oscillation, investigating hemolysis mechanism

20 p3573 A70-39981

SUSPENSION SYSTEMS [VEHICLES]

Javelin research rocket payload suspension ensuring limited vibrational accelerations, using viscoelastic materials for damping

04 p0774 A70-15147

Pneumatic suspension systems for air cushion skirts

16 p2841 A70-33759

Two-point suspension system with longitudinally displaced cargo hooks for handling helicopter loads, discussing wind tunnel and flight tests

17 p3014 A70-34714

Rotating flexible cable-connected space station dynamic scale model, describing suspension system and artificial gravity generation

23 p4258 A70-44528

SUSPENSIONS

Weak shock waves relaxation time and amplitude and acoustic velocity as functions of thermorelaxing media

01 p0068 A70-11588

Viscosity anisotropy in fluid matrix suspensions of parallel rigid flakes as function of flake content and width-to-thickness ratio

03 p0515 A70-13122

Heat transfer coefficient in turbulent dust flow of fine particles suspension, using coupled similar equations

03 p0608 A70-14382

Air-glass particle suspensions flows in shock tubes, deriving effective drag coefficients from simultaneous particle concentration and pressure measurements

04 p0667 A70-14778

Flow formation in Couette motion of viscous fluids containing suspended rigid spherical particles using theory of fluids with microstructure

11 p2037 A70-26169

Sphere slow motion in viscous fluid with solid particle suspension, considering Stokes flow pattern small relaxation time perturbation

16 p2896 A70-34272

MHD channel flow of suspension for prescribed wall heat flux and temperature, determining flow and heat transfer characteristics

22 p4080 A70-42670

SWALLOWING

Esophageal swallowing pattern of longitudinal and circular muscular layer contraction, using intraluminal pressure recordings

24 p4300 A70-45844

SWAN BANDS

Diatom carbon swan band violet line absence from sunspot suggested in accordance with molecular equilibrium predictions

05 p0911 A70-16433

Ikeya-Seki /1967n/, Thomas /1968b/ and Honda /1968c/ comet photoelectric spectrum, examining swan bands, continuum and reflected scattered light

20 p3703 A70-39024

SWEAT

Evaporative weight losses by sweating in man exposed to warm environment as function of time, including graphical method for heat storage prediction

03 p0430 A70-14164

Heat of evaporation of sweat measured in human calorimeter at various air and dew-point temperatures, finding value 7 percent above water

17 p3031 A70-35423

Desoxycorticosterone action on human kidneys and sweat glands as function of temperature tested with various DOCA and NaCl doses

24 p4301 A70-45988

SWEAT COOLING

Heat transfer coefficients in transpiration cooled gas turbine blades, using two dimensional theory covering porous wall and internal cooling passages

01 p0166 A70-11392

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation

04 p0630 A70-14581

Transpiration-cooled electric arcs for high temperature high density plasma generation, considering uncertainties in plasma transport properties and temperature distributions

04 p0729 A70-15591

Unheated solid starting length effect on skin friction and heat transfer characteristics in incompressible transpired laminar boundary layer on flat plate

06 p1035 A70-17691

Heat and mass transfer in passive transpiration cooling system with two moving boundaries, observing porosities and radius of curvature effects

06 p1176 A70-17692

Transpiration and film cooling systems comparison for high speed flows with foreign gas injection effects [AIAA PAPER 70-153]

06 p1179 A70-18073

Stable two phase water flow system for transpiration cooling in thermal protection of SST noise suppressor situated in afterburning engine exhaust gas stream

[AIAA PAPER 70-151] 06 p1181 A70-18146

Wall temperature variation of transpiration cooled tube surrounding plasma arc calculated from gas mass flow and wall properties

07 p1420 A70-19214

Transpiration-cooled constricted arc for plasma generation, considering transport properties, LTE assumptions and porous tube flow characteristics

07 p1351 A70-19898

Mode transition characteristics of free burning argon electric arc with transpiration cooled anode, noting current blowing parameter

[AIAA PAPER 69-696] 12 p2281 A70-27806

Transpiration-cooled systems design with porous materials, considering mechanical and flow control/permeability/properties requirements

12 p2256 A70-27822

Transpiration and film cooling effects on aerodynamic characteristics of slender cone in hypersonic flow tested in hypervelocity wind tunnel using mass injection

16 p2837 A70-33857

Unsteady laminar boundary layers on infinite porous plate, considering radiative heat transfer and transpiration cooling

17 p3067 A70-34632

Transpiration cooling for high temperature gas turbines, investigating effects on aerodynamic and thermodynamic performance

[ASME PAPER 70-GT-56] 18 p3303 A70-36839

Transpiration cooling of porous constrictor walls of high intensity electric arc in plasma

[ASME PAPER 70-HT-35] 22 p4122 A70-42432

SWEATING

U PERSPIRATION

SWEDEN

Swedish VIGGEN program for aircraft weapons system development emphasizing management methods

05 p0960 A70-16717

Report to COSPAR on Swedish space research (1969) including rocket-borne auroral particle experiments, plasma physics, atmospheric, solar, cosmic radiation, etc

15 p2830 A70-31722

SWEAP ANGLE

NT LEADING EDGE SWEAP

Sweep angle relationship to cavitation inception on hydrofoils and to hydrofoil performance deterioration due to cavitation

06 p1032 A70-17211

Electronic narrow sweep antenna array active element number reduction, discussing optical considerations

16 p2866 A70-34266

SWEAP CIRCUITS

Multidegrees of freedom electronic cabinets dynamic response to AM fast sine sweep

[SAE PAPER 700846] 24 p4380 A70-45884

SWEAP FREQUENCY

Frequency sweep/chirp and pulse width in externally mode locked laser with host dispersion obtained analytically using circulation pulse method

01 p0111 A70-10572

Precise sweep calibrations and simultaneous spectrum recording for high resolution nuclear magnetic resonance spectroscopy

11 p2052 A70-26375

Ionospheric electron density measurements with high altitude rocket swept frequency RF impedance probe

13 p2400 A70-29906

Picosecond pulse frequency sweep measurement using time resolved spectroscopy

17 p3108 A70-35904

Electrodynamic and electrohydraulic vibrators for frequency sweep, wideband random and sweep random vibration test methods

23 p4195 A70-44333

Nonmetallic nonconductive composite materials physical properties by swept microwave frequency nondestructive testing

24 p4345 A70-45705

SWEAPBACK

NT LEADING EDGE SWEAP

SWELLING

Fiber reinforced solid material, determining swelling or temperature change induced dilatation by micromechanics and physical chemistry

19 p3540 A70-37943

Polyurethane swelling in liquid media, measuring surface orientation effects during chemical machining on stress strain state

20 p3654 A70-39249

Isothermal kinetic rates of polymer swelling and dissolution, using thermomechanical analyzer

22 p4059 A70-43078

SWEPT FORWARD WINGS

NT TRAPEZOIDAL WINGS

SWEPT WINGS

NT DELTA WINGS

NT SWEPTBACK WINGS

NT TRAPEZOIDAL WINGS

Three dimensional turbulent boundary layers on high aspect ratio bodies (swept wings), discussing shear stress direction determination

02 p0286 A70-12354

Unsteady pressure distributions on elastic swept wing upper and lower sides at high subsonic to transonic flow, investigating torsional and bending vibrations

[DGLR-69-31] 04 p0615 A70-15151

Swept wings aerodynamic center and span load distributions with respect to quarter-chord line

04 p0619 A70-15393

Aerodynamic characteristics, stability and controllability of swept wing and delta wing supersonic aircraft at subsonic velocities

05 p0796 A70-16966

Hansa 330 fan jet design for executive and commuter market, discussing forward-swept wing concept and standardized structures and systems

07 p1194 A70-19619

Swept and delta wing supersonic military aircraft stability and controllability, discussing variation in maximum lift coefficient as function of Mach number

09 p1190 A70-23129

Three dimensional turbulent boundary layer development on rear of swept wing, comparing measurements with calculations

13 p2344 A70-30021

Swept tip rotor blade design, discussing wind tunnel-whirl stand correlations

17 p3015 A70-34736

Flow field about leading edges of tapered wings set at different angle of attack, using gas dynamic and Monge equations

18 p3207 A70-36376

High angle of attack aerodynamic characteristics of swept wing navy aircraft designs improved via leading edge modifications

[AIAA PAPER 70-904] 19 p3355 A70-37392

Aerodynamic problems due to /mixed subsonic and supersonic/ transonic flows on swept wings, nacelle lips and helicopter rotor blades

[ICAS PAPER 70-14] 23 p4132 A70-44125

High subsonic and transonic effects on pressure distributions for swept wing with oscillating control surface

23 p4274 A70-44763

SWEPTBACK WINGS

NT DELTA WINGS

NT TRAPEZOIDAL WINGS

Research program to improve performance of high lift devices on wings having small sweepback and high aspect ratio

01 p0001 A70-10047

Lift and vortex drag due to flaps on thin sweptback tapered wings in inviscid incompressible flow, obtaining spanwise loadings

06 p0967 A70-17256

Heat transfer on supersonic sweptback wing for case of laminar boundary layer with vortex distribution

07 p1187 A70-18921

Sweptback thin cantilever wing transonic flutter characteristics, investigating concentrated mass spanwise location effects

22 p4112 A70-42274

Pressure measurements on harmonically vibrating sweptback wing with two control surfaces in incompressible flow

23 p4274 A70-44768

SWIMMING

Swimming activity effect on dysbarism in rats in simulated free ascent from deep water

15 p2681 A70-31877

SWINE

Physicochemical properties of hypothalamic secretions responsible for coronary dilatation in rats, cattle and pigs, using analytical techniques

03 p0417 A70-13215

Gamma-neutron irradiation effect on miniature pig, observing incapacitation with severe convulsions and performance decrement

09 p1622 A70-23461

SWING TAIL ASSEMBLIES

Swing tail cargo aircraft fuselage section stress analysis by finite element method, discussing displacement models, deformation modes and economics

21 p3935 A70-41260

SWINGBY TECHNIQUE

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting, with emphasis on singular points

06 p1142 A70-17877

Outer solar system exploration, discussing swingby and junction missions, Jovian satellite grand tours, mission energy requirements, etc

[AIAA PAPER 70-58] 06 p1147 A70-18229

Lunar swingby trajectory analysis with atmospheric reentry, characteristics of geocentric portions of earth-moon and moon-earth transfers

10 p1940 A70-24306

Low thrust interplanetary swingby trajectories optimization, considering thrusting and coasting within sphere of influence

[AIAA PAPER 70-1041] 19 p3527 A70-38856

Jupiter swingbys and multiplanet Jupiter swingby trajectory modes for outer planet missions, comparing in terms of passage conditions

[AIAA PAPER 70-1071] 19 p3530 A70-38884

Jupiter swingby trajectory analysis for comet flyby and rendezvous missions, discussing approach velocity and payloads

[AIAA PAPER 70-1074] 19 p3530 A70-38886

Manned Mars lander launch-to-rendezvous analysis, using subsequent Venus swingby for mission velocity requirement reduction

[AIAA PAPER 70-1075] 19 p3530 A70-38887

Interplanetary solar electric spacecraft performance improvement by mission mode including earth swingby maneuver in solar orbit inclined to ecliptic

[AIAA PAPER 70-1177] 20 p3710 A70-40226

Pluto space probe using swingby technique with Jupiter, Saturn and Uranus gravitation fields for acceleration

21 p3886 A70-41073

Interplanetary mission propellant reduction by using earth-moon-sun gravity field properties, discussing swingby techniques, low energy trajectories, etc

23 p4244 A70-44607

SWIRLING

Turbulence intensity and fluctuation rates in isothermal swirling free jets, using constant temperature hot wire anemometer method

01 p0059 A70-10031

Compressible swirling inviscid nozzle flows approximate solution showing changed choking at throat, axial velocity distributions and reversing in subsonic region

01 p0003 A70-11128

Boundary layer equations describing flow field in turbulent swirling jet diffusion flame solved in von Mises plane

03 p0603 A70-12911

Turbulent boundary layer of incompressible fluid flow in axisymmetric channels with swirl at inlet, considering components interaction, velocity, circulation profiles and resistance

03 p0466 A70-13389

Viscous core of incompressible swirling flow through nozzle using momentum-integral equations

[AIAA PAPER 70-51] 06 p1038 A70-18079

Tape-generated swirl flow of single phase water investigated for heat transfer and pressure drop characteristics

[ASME PAPER 68-WA/HT-3] 08 p1600 A70-21829

Heat transfer augmentation in tubes by surface roughness and twisted tape generated swirl flow

08 p1600 A70-21830

Steady laminar gas flow on duct wall boundary layer considering external swirling flow and wall heat transfer

09 p1659 A70-22428

Injection induced swirl effect on thrust and mass flow through nozzle in spinning rocket, discussing internal and exhaust flow measurements and visualization

09 p1606 A70-23247

Swirling and meridional flow induced by steady rotation of gravitating sphere in compressible monatomic gas, considering compressibility effects and surface layer

[ASTME PAPER MR-69-714] 11 p1978 A70-26690

Swirling flow between concentric cylinders, studying helical instability modes

13 p2386 A70-28805

Residence times distribution in confined round swirling jet, considering mass conservation of hypothetical tracer substance in combustion efficiency prediction

[WSCI PAPER 70-7] 13 p2522 A70-29609

Swirling flow in unbounded space, investigating swirl intensity effect on heat transfer

15 p2828 A70-32857

Round laminar jet with swirl, reducing Navier-Stokes equations to ordinary differential equations by similarity transformations

19 p3405 A70-38349

Viscous flow field in pneumatic vortex rate sensor, discussing boundary layer parameters, velocity profiles and swirling flow theory [ASME PAPER 70-FLCS-16]

22 p4007 A70-42411

Existence theorem for boundary layer problems, including swirling flow between coaxial rotating disks

22 p4009 A70-42484

Jet engine compressor noise analysis, noting inlet swirl role

22 p4090 A70-42725

Wave drag due to swirling flow through convergent-divergent nozzle, deriving approximate solution for specified nozzle shape at various swirl ratios

23 p4179 A70-43971

Incompressible laminar swirling jet flow, obtaining similarity solution for Navier-Stokes equations

23 p4184 A70-44982

SWIRLING WAKES

U TURBULENT WAKES

SWITCHES

NT ELECTRIC RELAYS

NT ELECTRIC SWITCHES

NT FLUID SWITCHING ELEMENTS

NT PRESSURE SWITCHES

NT SWITCHING CIRCUITS

NT THERMOSTATS

Transmitting-receiving latching ferrite switch with 180 degree differential phase shift toroids for temperature stability and receiver protection in case of driver failure

03 p0458 A70-14036

Test method for inertial impact sensor switches subjected to multiple and varied shock inputs, using high energy detonators

03 p0494 A70-14128

Multiple access PCM satellite communication system with minimum interference to earth radio links, using programmable switch for improved traffic handling and frequency coordination

10 p1837 A70-24346

Electro-thermal-mechanical switches based on shape-memory effect in Ti-Ni alloys

22 p3965 A70-43330

SWITCHING

NT BEAM SWITCHING

NT MAGNETIC SWITCHING

NT MICROWAVE SWITCHING

Domestic telecommunication via satellite to reduce terrestrial switching to two levels, discussing system parameters, operation, hardware and cost estimate

06 p1006 A70-17344

Electron mobility transition in infinite system of random hard core scatterers relation to switching effect in semiconductors

08 p1549 A70-21840

Narrow Curie point switching transfer in Mn-Bi films by controlling magnetization direction within preselected areas

11 p2098 A70-26069

Demand assigned domestic satellite communications system with capability of single hierarchy switching and serving terrestrial common carriers and direct users

14 p2552 A70-31351

Band model of switching effects between conducting and high resistance states of amorphous semiconductors

18 p3297 A70-35952

Subnanosecond jitter spark gap obtained with YAG-Nd pulsed laser triggered switching at moderate repetition rates

19 p3444 A70-37666

Low jitter multiple high voltage spark gaps switching at 50 pps by Q spoiled YAG laser triggering

19 p3444 A70-37667

Optimum switching in minimum fuel, time-free impulsive planar transfer problem by primer vector concept

20 p3709 A70-40074

SWITCHING CIRCUITS

NT FLUID SWITCHING ELEMENTS

Nonlinear distortion in switching transistor mixer predicted by modifying analysis used for diode modulator and mixer circuitry

02 p0268 A70-12423

Switching-type dekatrons use in automatic control, electronic measuring and computing systems, discussing advantages

04 p0660 A70-15436

Phenomenology theory on conduction and switching behavior of amorphous semiconductor diodes

05 p0891 A70-16021

Adjustable pulse delay circuit design utilizing slow switching action of storage diodes emphasizing thermal stability

05 p0820 A70-16343

Broadband two way switch obtained by p-i-n diodes deposited on alumina substrate

05 p0821 A70-16526

Linear circuit output waveform calculation without first resolving transfer functions on complex frequency plane, applied to current switching circuit analysis

06 p1018 A70-17460

Mechanical latching crossbar switches for space division electronic switching, discussing structure, performance, reliability, etc

06 p1023 A70-18413

GaAs diode amplifiers and switching devices behavior, describing optical coupling between two GaAs lasers

07 p1241 A70-19399

Integrated switching circuits design optimization by ALGOL program, analyzing circuits transient behavior

07 p1242 A70-19752

DC to DC switching power processor design considerations for avoiding system failures

08 p1439 A70-20705

Switching and memory phenomena in semiconducting glasses, thin films and variable threshold metal-oxide-nitride-semiconductor MNOS transistor

08 p1556 A70-21304

Threshold switching and thermal filaments in thick specimen of amorphous semiconductors using IR spectrum viewer

08 p1477 A70-21540

Precision frequency analog converter using crystal oscillator and transistor switch reducing errors

09 p1653 A70-23698

DICAP system to analyze digital sequential switching circuits, studying simulation technique range and limitations of applicability

10 p1845 A70-24236

Demand assignment signaling and switching subsystems /DASSS/ design for communication satellite, examining voice channels modulation

10 p1837 A70-24348

DASSS operational parameters and performance in SPADE satellite voice communication system

10 p1837 A70-24350

Demand assignment techniques applicability to TDMA satellite communication systems, discussing operational modes and optimum mode selection

10 p1837 A70-24351

Integrated TDMA switching/transmission system implementation into existing network

10 p1837 A70-24354

Pattern recognition with time interval modulation information coding /TIMIC/, considering channel capacity of switching device, similarity with nervous system, etc

11 p2010 A70-26267

Free-running parallel inverters limitations by critical characteristics of networks, transformers and switching elements

11 p1983 A70-26628

Broadband transhorizon radio relay system transmission improvement by applying switching equipment designed for protective channel

11 p2034 A70-26822

Cassegrain antenna with parabolic mirror and switch designed for broadband transhorizon radio relays, using antenna scale model to determine parameters and electrical properties

11 p2020 A70-26823

Solid state proximity switches, sensors, logic and self test circuits for aircraft electrical applications to improve reliability and maintainability over mechanical switches

[SAE PAPER 700305]

12 p2195 A70-27449

Semiconductor power controllers for switching aircraft electrical power supplies

[SAE PAPER 700308]

12 p2195 A70-27451

Thyristor tetrode silicon controlled switches /SCS/, considering unijunction transistors and pulse generator circuits

13 p2377 A70-29115

Integrated logic circuits, considering switching properties and medium and large scale integration

13 p2372 A70-29116

Ovshinsky switching effect, considering electrothermal initiation and field dependent conductivity at elevated temperatures

14 p2626 A70-30336

Switch controlled resonant current pulse modulation for power converters, noting integration with spacecraft ion propulsion engine

14 p2535 A70-31324

Solid state subnanosecond electro-optic light switch for mode locked laser controller or light shutter

15 p2753 A70-32815

Packaging and grounding for electrical noise control in nanosecond switching circuits using transmission line design

16 p2879 A70-33960

Thyristor tetrodes application to current and voltage stabilization, frequency division and lighting control

16 p2880 A70-34099

Interference free high speed monolithic digital integrated gate, determining current swing, lead inductances and switching times

17 p3048 A70-34587

Switching circuit with Se diode, comparing I-V characteristics with Se rectifiers

17 p3054 A70-35411

Solid state switching effect on aerospace electric power conditioning equipment

[SAE PAPER 700306]

18 p3302 A70-36802

Differential time division multiplexing system, discussing errors due to imperfections of field effect transistor as multiplexer switch

19 p3388 A70-37906

Frequency dependent reversible switching characteristics of glass semiconductors, assuming current control

19 p3389 A70-38070

Flip-flops switching time reduction, using equivalent amplifier circuit with positive feedback

19 p3390 A70-38580

Dual mode optimum minimum time control of high order systems with negative roots and step displacement inputs, using simplified computer switching

21 p3801 A70-40756

Integrated directly coupled gyrator operating mode via comparison with switching elements, considering behavior under capacitance load and high pass filter application

21 p3797 A70-40793

Stress tolerant thyristor and transistor switching electronic converter for ion propulsion engine

21 p3866 A70-40901

Solid state switching effect on aerospace electric power conditioning equipment

21 p3758 A70-41210

Solid state switches for operating ion thrusters directly from high voltage solar cells, noting satellite weight saving

21 p3798 A70-41215

Modular Dc to Dc switching mode converter for space power system

21 p3758 A70-41217

Automatic and command multiple sequencer for spacecraft solar cell battery charger, providing switching logic by integrated circuits design

21 p3758 A70-41218

Book on pulse and switching circuits covering remote control, TV, computers, radar, telemetry and automation devices

21 p3798 A70-41324

Radar transmitters modulating circuits protection with microsec rapidly by power elimination, discussing electronic switches

21 p3792 A70-41987

Double tunneling electrothermal initiation of threshold electronic switching in semiconducting glasses, discussing temperature profile and current density saturation effects

21 p3864 A70-42019

One dimensional cellular logic arrays fault circumvention by bypass switching out defective cells in cascade

22 p4004 A70-43073

Lissajous figures for phase response of N-path signal filter transfer functions, using switched modulators

22 p3998 A70-43256

Solid state IF or baseband switching elements design for high capacity multichannel microwave systems

23 p4172 A70-44014

Two-bulb switchable pulsed spectral lamp with Cs and Xe for optical pumping studies

23 p4197 A70-44478

Electronic equipment automatic testing systems signal routing and switching trees and matrices design, emphasizing modular approach

23 p4173 A70-44540

Wideband wattmeter for measurement and analysis of power dissipation in semiconductor switching devices, considering occurrence of peaks, frequency dependency of average dissipation, etc

23 p4174 A70-44597

Computer hardware and software technology for complex problems, discussing switching speeds and parallel and pipeline designs

23 p4167 A70-44716

SWITCHING ELEMENTS

U SWITCHING CIRCUITS

SWITCHING FUNCTIONS

U BOOLEAN FUNCTIONS

U SWITCHING

SWITCHING THEORY

Message switching techniques in digital telecommunication networks, discussing automatic routing, operational and control facilities, etc

02 p0256 A70-11973

Parasitic transient process in automatic control system during switching to mode stabilized with respect to certain coordinates

04 p0662 A70-15433

Critical comments on teaching switching theory concerning mathematics role, logic functions, Boolean equations, etc

06 p1026 A70-18423

Optimal guaranteeing control for single switching representable in form of two different successive

stages in time, ensuring invariance with respect to motion perturbations

07 p1332 A70-18664

Linear and quadratic programming techniques for large scale continuous time optimal control problems with accurate switching times

07 p1325 A70-19268

Linear steady and unsteady systems time optimal control switching points determination by introducing parameterization to reduce number of transcendental equations

11 p2021 A70-25339

Switched self balancing comparison radiometer with coupling between channels, showing measurement errors due to coupling correctable by phase switching

11 p2018 A70-26269

State estimation in linear discrete time systems operating in Markov dependent switching environments, using Bayes theorem for filtering

13 p2381 A70-29062

Switching initiation in Ovonic, discussing temperature profile in semiconducting sandwiches as function of time and thermally forced double tunneling

14 p2626 A70-30333

Glass switching /Ovshinsky effect/, discussing various theoretical explanations

18 p3298 A70-36956

Internal Q switching deviation in gallium aluminum arsenides-GaAs single heterojunction lasers attributed to loss reduction at current pulse end

24 p4354 A70-45815

SYMBIOSIS

Hypotheses for symbiotic stars nature, emphasizing binary with late type giant and hot small star components

03 p0568 A70-13325

SYMBOLIC PROGRAMMING

Riemann tensor symbolic computation by compact method using differential forms, discussing advantages due to antisymmetry

05 p0818 A70-16681

Computerized FORTRAN equations simulation of linear and nonlinear circuits for symbolic analysis and transient response

06 p1026 A70-18424

Topological symbolic analysis of circuits defined by topological constraints, utilizing digital computers

11 p2029 A70-26330

SYMBOLS

Symbols design for machine displays based on Gestalt pattern perception theory, considering symbol learning, perceptibility, detail, boundaries, etc

10 p1827 A70-24771

Optimum symbol sequence interleavers realization taking into account storage capacity and encoding delay

11 p2014 A70-26246

Optimal spatial discretization and brightness quantization of graphical symbols for pattern recognition, considering illumination and reflection coefficient

14 p2553 A70-30423

Optimum interleavers realization procedure for reordering contiguous symbols sequence to satisfy minimum distance requirement for improving communication system performance

14 p2554 A70-31121

CRT symbol generators design for high speed computer data display as function of electro-optical and human operator constraints

16 p2850 A70-33133

SYMMETRICAL BODIES

NT AXISYMMETRIC BODIES

NT BODIES OF REVOLUTION

NT CELESTIAL SPHERE

NT CONICAL BODIES

NT CYLINDRICAL BODIES

NT ELLIPSOIDS

NT PARABOLIC BODIES

NT POINCARÉ SPHERES

NT ROTATING CYLINDERS

NT ROTATING SPHERES

NT SLENDER CONES

NT SPHERES

NT STREAMLINED BODIES

NT TORUSES

Buckling, postbuckling and limit analysis of symmetric elastic structure subjected to increasing loads

13 p2511 A70-28737

Spinning symmetric satellite attitude stability in hyperbolic orbit on flyby mission, examining by numerical integrations of equations of motion

17 p3181 A70-35753

Transport equation relation between irreducible tensorial sets, examining geometrical symmetry influence and thermomagnetic and galvanomagnetic effects

24 p4428 A70-45520

SYMMETRY

Symmetry energy of infinite nuclear matter calculated for cases of constant density and minimum saturation energy by density variation, considering finite compressibility effects

01 p0148 A70-11105

Nonequilibrium and equilibrium schemes studies of nuclear symmetry energy of finite nuclei, discussing binding energy of nuclei with neutron excess

01 p0148 A70-11106

Symmetric Boolean function detection by method using potential concept, determining alpha numbers with potential values for canonical terms

02 p0324 A70-12188

Chaplygin equation algebraic classification with respect to ring admitted by equation, extending results to include lambda function tolerating second order symmetry operators

04 p0613 A70-14412

Stress distribution in vicinity of arbitrarily shaped slender notches as function of notch symmetry using photoelastic analysis

07 p1404 A70-19240

Linear representations of symmetry groups and use in discrete automatic control systems

18 p3290 A70-36070

Symmetric functions of second rank tensors with symgonies in elastic anisotropic media

18 p3340 A70-36576

Periodic solutions of nonlinear second order differential systems containing symmetries, noting Marlin criteria

19 p3458 A70-38064

Radiative gas dynamic equations similarity representation with spherical symmetry, constructing numerical examples for strong explosions and implosions

20 p3609 A70-39657

Hermitian symmetry in Einstein unified field theory in terms of pseudotensor

24 p4380 A70-45819

SYMPATHETIC NERVOUS SYSTEM

Norepinephrine release associated with vasoconstrictor response during selective activation of arterial and venous sympathetic nerves in dog hindpaw

03 p0416 A70-13012

Vagotomy and carbon dioxide concentration effect on quiet and forced respiration rate, pleural pressure, tidal volume and lung ventilation in cats

03 p0422 A70-13694

Melatonin biosynthesis, discussing regulation by light and sympathetic nerves, daily pineal rhythms, estrous rhythms and ovarian hormones

03 p0424 A70-13809

Nervous control of unconditioned cardiovascular reflexes during ontogenesis in children, observing sympathetic and vagal tonicity

08 p1446 A70-21449

Hypothalamus stimulus effects on sympathetic nerve activity to heart, spleen, kidney and leg skeletal muscle in anesthetized cats

09 p1614 A70-22001

Mammalian pineal organ control experiments involving light and sympathetic nerve stimulation

10 p1812 A70-24396

Vegetative nervous system reactions of patients with diencephalic syndromes, investigating hypothalamo-hypophyseal-adrenal system role

13 p2352 A70-29353

Sleep intensity and stages from EEG studies concerning rapid eye movements, vegetative nervous system, heart/respiration rate, blood pressure, body temperature and stomach motility

15 p2680 A70-31743

Heart rate elicitation and blood pressure increase, considering parasympathetic and sympathetic nervous outflows adjustments of initial cardiovascular response to muscular contraction

15 p2684 A70-32535

Pressor response to epinephrine in hyperbaric atmospheres measured in cats under change of sympathetic tone

17 p3032 A70-35566

Blood flow antagonistic changes in various vascular beds following spinal cord central thermal stimulation attributed to sympathetic vasoconstrictor activity

22 p3971 A70-43405

Spinal cord thermal stimulation effects on regional sympathetic activity in rabbits and cats determined from integrated sympathetic efferents discharges

22 p3971 A70-43406

Pulmonary arterial and venous response to cooling, discussing role of sympathetic nervous system alpha receptors in hypothermia induced pulmonary constrictions in dogs

23 p4148 A70-44788

Norepinephrine synthesis inhibition effect on arousal triggering and maintenance in hibernating golden hamsters, examining sympathetic activity

23 p4148 A70-44874

Sympathetic transmission model, discussing transmitter liberation capacity under various stresses by mobilization of stores, acceleration of synthesis, etc

24 p4299 A70-45804

Sympathetic-adrenal system activity of trained organism during muscular work and emotional excitation

24 p4300 A70-45841

SYMPATHOMIMETICS

U ADRENERGICS

SYMPTOMOLOGY

Quantification of subjective estimates of well-being during onset and remission of motion sickness symptomatology in slow rotation room

08 p1448 A70-21941

Acute mountain sickness symptomatology and cognitive performance, using standardized General High Altitude Questionnaire

20 p3581 A70-40025

Student pilot case diagnosis of hysterical neurosis with syncopal and epileptiform symptoms

21 p3771 A70-41493

Sea sickness symptoms in relation to reduced minute blood volumes in human after Coriolis acceleration

23 p4149 A70-45079

SYMPTOMS

U SIGNS AND SYMPTOMS

SYNAPSES

Fatigue phenomena at spinal motor synapses, investigating role of accompanying vegetative phenomena as source of fatigue

15 p2680 A70-31740

Pathways of short latency reticulo-cortical responses to thalamic nuclei and hypothalamus destruction in cats

24 p4299 A70-45837

Bilateral oligosynaptic interaction between posterior lateral thalamic nucleus and afferent systems in visual and acoustic cortical areas in cats

24 p4300 A70-45840

Neurophysiology of membrane and synaptic mechanisms of prolonged trace changes in neuron activity concerning memory and cellular learning analogs

24 p4305 A70-46393

SYNCHROCYCLOTRONS

Gamma ray background near proton synchrotron beam degrader at NASA-LRC Space Radiation Effects Laboratory

02 p0275 A70-12268

SYNCHRONISM

NT BIT SYNCHRONIZATION

NT FREQUENCY SYNCHRONIZATION

Satellite tracking at several stations at synchronized time to obtain satellite positions, station coordinates and to improve orbital elements accuracy

02 p0254 A70-11760

Light synchronization of deep body temperature rhythms in Macaca nemestrina, investigating efficiency

03 p0416 A70-13013

Synchronization of ground stations clocks by time scale comparison with overflying aircraft [ONERA-TP-759]

03 p0487 A70-13642

Development and characteristics of inexpensive and reliable detonator for precise synchronization with high speed photographic or electronic experiments

03 p0547 A70-14110

Detonator insensitive to highest level of electrostatic voltage on human body for precise synchronization

03 p0547 A70-14111

High speed camera synchronization by frame reference pulses for strobe triggering

06 p1060 A70-17147

Clock synchronization system design and test results for PCM time division multiple access satellite communication system

06 p1011 A70-18411

Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius

08 p1545 A70-21406

Loran in range-range mode for computing user position based on remote clock synchronization, evaluating accuracy

09 p1719 A70-22192

Clock synchronization system using lunar radar reflections for Deep Space Network needs, discussing remote clock receiver and antenna

09 p1656 A70-23037

Tracking station clock synchronization error measurement using Deep Space Network Mark I ranging system, discussing system theory, design, operation, economy and versatility

09 p1656 A70-23038

Velocity synchronized Fourier transform hologram camera system for recording hypervelocity particles

09 p1688 A70-23775

Carrier recovery circuits synchronization for PSK demodulators used in TDMA satellite communication

10 p1835 A70-24338

Equipment design for burst synchronization control in TDMA experiment system

10 p1836 A70-24339

Synchronous harmonics generation of sinusoidal signal with given frequency for vibration analysis of linear and nonlinear structures

10 p1860 A70-24550

Self-synchronization of forced frictional mechanical vibrators assuming simple harmonic combination

11 p2139 A70-26417

Ultrasonic effects on synchronization of ruby laser radiation, investigating emission pulse structure and peak sequence 12 p2245 A70-27297

Heterochronism of coordinated cophasal flexor and extensor movements during acrobatic leap in human subjects 12 p2168 A70-27344

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface 12 p2272 A70-27357

TDMA applicability to military satellites, describing synchronization process 12 p2187 A70-27916

Carrier synchronization system for PSK signals, using direct regenerative repeater and phase locked loop/JDR-PLL/ 15 p2697 A70-31826

Beat and synchronization modes of opposed waves in rotating gas ring laser, examining frequency response asymptotic behavior 17 p3108 A70-35683

Time-synchronized approach control, combining aircraft precision navigation and guidance with ATC equipment 19 p3466 A70-38237

Prototype synchronizing valves for maintaining identical flow velocities of two hydraulic actuating elements, noting unbalanced hydrodynamic forces and orifices asymmetry effects 20 p3564 A70-39717

Ruby and Nd glass solid state lasers modes partial self synchronization investigated by spectral time resolution method 22 p4051 A70-43463

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface 22 p4075 A70-43598

Close binary star components axial rotation, considering synchronism, angular velocity and mass exchange 23 p4250 A70-44814

SYNCHRONIZATION

U SYNCHRONISM

SYNCHRONIZED OSCILLATORS

N-GaAs pulsed Gunn effect oscillators for decimeter band, discussing synchronization by external sinusoidal current 03 p0499 A70-13204

SHF avalanche transit time oscillator with FM noise reduction by injection phase locking 08 p1462 A70-21594

Steady state analysis of harmonic oscillations in HF synchronized transistor autooscillators, considering transistor inertial properties 09 p1649 A70-23341

Circuitry for phase modulated synchronized electronic oscillators for measuring minor reactance changes during remote sensing 11 p2052 A70-26373

Unrestrained oscillator under action of external synchronous signal, deriving differential synchronization equation 17 p3051 A70-34614

Synchronous oscillators of radio astronomical interferometer, discussing dephasing and servocoupling 17 p3090 A70-35415

Nonlinear differential solutions for free isochronous oscillations of conservative one degree of freedom oscillators 18 p3283 A70-36386

Optimum stabilized variable frequency multiple input phase locked oscillator in mutually synchronized systems 19 p3389 A70-37969

Mutual synchronization of oscillators at multiple frequencies, analyzing effect of tuning on frequency and phase 20 p3597 A70-39252

Digital frequency and phase flip-flop comparator for slave oscillators fine control by master frequency 22 p3996 A70-42819

SYNCHRONIZERS

Synchronizing and desynchronizing systems for cerebral electrical activity, noting roles in sleep and wakefulness mechanisms 03 p0417 A70-13073

Transistorized differed synchronizer for delaying photoflash initiation in scientific photography 12 p2228 A70-26879

Digital transition tracking symbol synchronizer improving SNR without lowering loop bandwidth [JPL-TR-32-1488] 13 p2367 A70-29591

Hydraulic synchronizers for motors and actuators speed equalization, describing operation and technical specifications 21 p3756 A70-40800

SYNCHRONOUS COMMUNICATION SATELLITES

U SYNCOM SATELLITES

SYNCHRONOUS COMMUNICATIONS SATELLITE PROJ

U.S. and European space program costs and resources with particular reference to telecommunication satellites 22 p4126 A70-43247

SYNCHRONOUS DETECTORS

U CORRELATORS

SYNCHRONOUS MOTORS

Combined gyromotors optimal starting and operating conditions, considering size and weight characteristics 09 p1680 A70-23146

Electromechanical start-up time, inertia and synchronous electromagnetic moment of wave-type electric servomotor calculated by energy method 10 p1809 A70-25202

Standard units and assembling of electrical driving mechanism for telescope, using audio reference oscillator, electronic power amplifier and synchronous motor 18 p3259 A70-36609

Start-up characteristics for three-phase synchronous reactive motors with various starting unit designs 24 p4293 A70-45471

SYNCHRONOUS SATELLITES

NT AEROS SATELLITE

NT EARLY BIRD SATELLITES

NT SYNCOM SATELLITES

Delta boosted electrically raised high power synchronous satellite for communication tasks [AIAA PAPER 69-1104] 01 p0194 A70-10617

Space programs to monitor earth resources from synchronous orbit of 19,400 nautical miles, discussing geostationary systems characteristics related to optics and telemetry 01 p0093 A70-11280

Satellite mounted mm wave parabolic dish antenna for tracking communication satellite in synchronous orbit 02 p0392 A70-11933

Solar phenomena effect on VHF communications between synchronous satellite relay and earth ground stations 02 p0259 A70-12566

Canary Bird synchronous satellite radio signal transmissions scintillations from recordings, noting diurnal scintillation pattern 02 p0260 A70-12573

Synchronous satellite attitude measurement during early flight and operating conditions, describing PAS satellite attitude sensor configurations 03 p0581 A70-13844

Geostationary satellite payload-optimal injection trajectory from nonequatorial firing range, describing dog-legging maneuvers 03 p0573 A70-13845

Orbit determination program for launching and stationkeeping of 24 hr geostationary satellites, using azimuth and elevation of single autotrack antenna 03 p0578 A70-14339

Electrostatic charged particle acceleration and ion thruster function in geostationary satellite stationkeeping and attitude control, orbital transfer and drag compensation [ONERA-TP-764] 04 p0735 A70-14934

German developments in electric propulsion and energy supply systems for commercial satellites in geostationary orbits [DGLR-69-20] 04 p0735 A70-15169

Hybrid system for allocating domestic synchronous communication satellites in concentric circles within inclined elliptical synchronous orbits 05 p0906 A70-15801

Multiple access channel control system operating in variable destination multiple access mode for application in PCM-TDMA satellite communication system 06 p1011 A70-18412

Microwave radio refraction analysis for controlling interference between radio relay antenna and geostationary satellites 07 p1235 A70-19363

Stationary satellite perturbed motion calculations, assuming small initial orbital eccentricity and inclination and revolution period close to that of earth 07 p1386 A70-19485

Omega Position Location Experiment with synchronous satellite /ATS-3/ as radio relay for merchant shipping, air traffic control and moving vehicle location and communication 09 p1720 A70-22193

Ammonia micropropulsion for geostationary satellites stabilization, discussing principle and working mode of thrusters 09 p1743 A70-22660

Navigation satellite system with 10-meter accuracy, continuous coverage, rapid position determination, simultaneous service and interference immunity achieved by synchronous satellites 09 p1723 A70-23042

Hyperbolic position finding with synchronous satellites having frequency conversion unit for operations at higher frequency satellite signals 09 p1724 A70-23044

Digital record message communication satellite network system involving synchronous satellites and small earth terminals 10 p1834 A70-24327

Synchronous satellite communication system clock synchronization loop design taking into account delay time 10 p1835 A70-24335

Geostationary orbit capacity based on multichannel telephony, comparing digital and analog modulation techniques 10 p1836 A70-24343

Optimal longitude rendezvous for geostationary satellite by using inertially fixed orientation thrust for performing final positioning [ONERA-TP-801] 10 p1941 A70-25451

Orbital stability of geostationary vehicle at arbitrary latitude, considering nonlinear equations and deducing stability conditions by Liapunov method 10 p1950 A70-24783

Canadian geostationary satellite communication system design and performance, discussing transponder with six RF channels [AIAA PAPER 70-429] 11 p1996 A70-25402

Geostationary satellite communication bandwidth increase by reusing same frequency band in multiple independent earthward beams, discussing modulation and interference noise allocation effects [AIAA PAPER 70-442] 11 p1996 A70-25405

Radiation environmental model of synchronous communication satellite solar cell degradation by particle fluxes [AIAA PAPER 70-481] 11 p2103 A70-25411

Communication satellites geostationary orbit sharing problem, considering system design and utilization criteria [AIAA PAPER 70-441] 11 p1998 A70-25419

Attitude stabilization of synchronous communications satellites employing multiple narrow beam antennas [AIAA PAPER 70-457] 11 p2119 A70-25422

Solar cell degradation by proton damage in synchronous orbit studied on LES-6 satellite [AIAA PAPER 70-600] 11 p2119 A70-25430

Three axis attitude control of earth oriented non-spinning synchronous communications satellite, using gimbal-mounted momentum wheel and pulsed plasma thrusters [AIAA PAPER 70-456] 11 p2119 A70-25431

Multiple feed waveguide lens in variable coverage communications antenna for geostationary LES-7 satellite [AIAA PAPER 70-423] 11 p2016 A70-25461

Satellite stationkeeping by ground command, self contained or combined methods compared for networks of synchronous satellites [AIAA PAPER 70-479] 11 p2121 A70-25463

Instructional communication system for U.S. using synchronous satellites over 15 regions [AIAA PAPER 70-450] 11 p2000 A70-25465

Horizon sensor design with null operating capabilities for synchronous orbit 3-axis stabilized communication satellites, discussing operation and testing [AIAA PAPER 70-476] 11 p2121 A70-25484

Ammonia micropropulsion operation modes and performance for stabilizing synchronous communication satellite, noting advantages over chemical and ion propulsions 11 p2122 A70-25817

Roll and pitch attitude control for long range stationkeeping mission of synchronous flywheel stabilized communication satellite, discussing constraints on on-board equipment and technology 11 p2126 A70-26279

Quasi-sinusoidal fluctuations of magnetic field during geomagnetic storms measured by ATS 1 in synchronous equatorial orbit 12 p2223 A70-27192

Air traffic control surveillance and data system using synchronous satellites in inclined elliptical orbits for communications and aircraft position determination 12 p2268 A70-27644

Position location and aircraft communication equipment concept and Experimental PLACE System providing ATC two-way voice and digital data communications via geostationary satellites 12 p2269 A70-27921

Navigation systems using 24-hour orbit satellites, discussing system concept options for U.S., Western Hemisphere and global coverage 12 p2270 A70-27924

Atmospheric refractivity role in range errors from ground station to stationary satellite and in range rate measurement 12 p2189 A70-28058

Hard wired modular multipurpose global navigation system using cluster noncoplanar synchronous satellites 13 p2446 A70-28385

Synchronous satellite attitude acquisition and keeping, proposing roll and pitch control law for simulation 13 p2500 A70-28409

Range of ground station to stationary satellite and range rate measurement errors induced by atmospheric refractive index fluctuation

13 p2365 A70-29095

Space traffic control, discussing special problems of synchronous orbiting communications satellites

13 p2449 A70-29268

Synchronous navigation satellite system for ships and aircraft applicable to earth orbital and lunar operations

14 p2614 A70-30463

System design for IR imaging radiometer from synchronous altitude satellite, considering spacecraft dynamics, detectors and cooling

14 p2586 A70-30974

Geostationary tracking and data relay satellites /tdrs/, discussing system design and advantages

14 p2615 A70-31182

Synchronous satellite orbits determination using mathematical model for simulating gravitational perturbations induced by terrestrial globe and foreign bodies

14 p2651 A70-31279

Europa 3 configurations for launching payloads into geostationary orbit using various rocket stage combinations

15 p2789 A70-32254

Microthrusters for geostationary satellites attitude and position control

15 p2791 A70-32279

Counterrotating antenna onboard Italian satellite in synchronous equatorial orbit for microwave propagation experiment

15 p2709 A70-32287

Stationary satellite perturbed motion calculations, assuming small initial orbital eccentricity and inclination and revolution period close to that of earth

15 p2805 A70-32730

Ionospheric electron content measurement during solar eclipse of 7 March 1970, using VHF radio waves from geostationary satellites

16 p2897 A70-33830

Two stage yo-yo with nutation damper for despinning ATS synchronous satellites, describing mechanical and thermal design, lubrication, assembly, testing, etc

16 p2985 A70-34115

Torsion wire libration damper for satellite gravity-gradient stabilization at near synchronous altitudes

16 p2985 A70-34134

Controlled leakage sealing of hydrodynamic bearing lubrication systems for space vehicles in synchronous orbit

16 p2923 A70-34158

Conical passive radiation coolers for quantum IR detectors on equatorial synchronous earth satellites, determining temperature excursions

16 p2915 A70-34314

Orbit determination accuracy in synchronous satellite tracking analysis, using weighted least squares method

19 p3529 A70-38881

Earth continental drift and polar wandering measurements by laser ranging to two synchronous satellites

19 p3529 A70-38882

RF plasma thrusters for synchronous satellites, estimating weights and efficiencies of various types

20 p3689 A70-40124

SERT 2 solar array power system in sun synchronous orbit, considering power conditioning and deployment technique

20 p3567 A70-40202

One millipound cesium ion thruster for synchronous ATS-F satellite, describing power conditioning and control logic subsystems

20 p3690 A70-40205

Spinning satellites stationkeeping at synchronous altitude, using solid propellant pulsed plasma microthrusters

20 p3690 A70-40206

Communication satellites low thrust transfer to synchronous orbit by two-stage operation using hydrogen resistojets and Hg ion motors

20 p3691 A70-40227

Secondary propulsion subsystem earth synchronous orbital mission requirements, discussing thrust vector alignment and control, colloidal propellants and pulsing

[ASME PAPER 70-AV/SPT-31]

Low latitude observations of spread F echoes and stationary satellite scintillations, correlating with ionospheric disturbances and geomagnetic activity

21 p3818 A70-41097

Dioscures project for ATC over Atlantic Ocean, describing distance measurement by simultaneous use of two geostationary satellites

21 p3848 A70-41258

Synchronous satellites VHF signal fading attributed to high latitude scintillations, noting intensity at night and during magnetic storms

21 p3790 A70-41362

Synchronous satellites characteristics and applications to radio connection, light signals, positioning, telecommunications, manned space stations and space shuttles

22 p4109 A70-42467

Satellite technology application to aeronautics, predicting synchronous satellites communication for transoceanic and overland ATC

22 p4111 A70-43512

VHF geostationary satellite ranging and range correction systems, calculating second-order ionospheric delay effects on position error

22 p4068 A70-43590

Structure and systems design of large gravity gradient stabilized orbiting tethered satellites structure for radio astronomy

23 p4259 A70-44603

Tracking and data relay satellite system in low altitude synchronous orbit

[AIAA PAPER 70-1305]

24 p4311 A70-45085

Error analysis of satellite orbits obtained by synchronous satellites range and range rate measurements

24 p4407 A70-45539

SYNCHROTRON NOISE

U ELECTROMAGNETIC NOISE

U SYNCHROTRON RADIATION

SYNCHROTRON RADIATION

Pulsar synchrotron emission model, discussing elliptic polarization, pulse shape, duration and negative absorption /wave amplification/

01 p0183 A70-10897

Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature

03 p0557 A70-13220

Circularly polarized synchrotron radiation from distribution of electrically charged particle in magnetic dipole calculated for estimating Jupiter magnetic field

04 p0746 A70-14511

Intensity, spectrum and polarization of gyrosynchrotron radiation from magnetoactive plasma electrons distribution

04 p0749 A70-14594

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field

[AIAA PAPER 69-18]

04 p0742 A70-15543

Galactic synchrotron emission and diffuse X ray background, noting correspondence between spectral indices of radio and X ray emissions in polar directions

05 p0913 A70-16472

Secular variations in small quasar components, discussing compatibility with theory of expanding synchrotron sources

05 p0913 A70-16474

Particle acceleration during 1966-1967 radio burst of 3C 273, indicating breaking down of model of expanding source emitting synchrotron radiation

05 p0918 A70-16927

Synchrotron radiation rate from deexcitation of electrons in magnetic orbits of low quantum numbers, stressing electrons radiation in intense magnetic fields

06 p1108 A70-17183

Coherent synchrotron emission in Crab Nebula associated with electron gyromotion, discussing models for high energy particle acceleration

07 p1375 A70-18848

Synchrotron radiation negative reabsorption possibility for relativistic electrons dipped into and in absence of unrelativistic plasma

07 p1348 A70-19413

Compton scattering of synchrotron radiation from parent electrons in pulsars, calculating Compton-synchrotron radiation from NP 0532 leads to lower limit for magnetic field

07 p1369 A70-20221

Contraction and expansion in solar region producing synchrotron emission of relativistic electrons to explain solar burst behavior

08 p1560 A70-20841

Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature

08 p1563 A70-21653

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics

08 p1554 A70-21812

Synchrotron emission of relativistic particle in magnetic field with radiative reaction force comparable to Lorentz force, emphasizing pulsar cosmic ray electron acceleration

09 p1731 A70-22273

Pulsar NP 0532 synchrotron emission reinterpretation related to relativistic particles injection into Crab Nebula

09 p1756 A70-22516

Gyrosynchrotron emission from nonthermal electrons trapped in magnetic dipole field to interpret center-to-limb spectrum and polarization variations of microwave impulsive bursts

12 p2294 A70-27709

Extragalactic objects polarization due to synchrotron radiation superimposed on stellar radiation, discussing Seyfert galaxies nuclei

12 p2307 A70-27869

Pulsar radiation emission by electrons and protons in close orbit taking into account density, energy and correlation in plasma

14 p2638 A70-30617

Synchrotron model involving electron trapping in dipolar magnetic field for Jupiter decimetric radiation

14 p2649 A70-31089

Gyrosynchrotron from accelerated electron, discussing effects of cold and collisionless magnetoplasma on far field and frequency spectra

15 p2728 A70-31989

Local system interstellar medium thermal electron distribution, synchrotron radiation emissivity, cosmic ray electron flux and spectrum

17 p3152 A70-35583

Crab Nebula pulsar NP 0532 optical and X ray synchrotron radiation, explaining ratio of pulsar energy flux to nebula

17 p3152 A70-35747

Pulsar radio pulses structure and emission source theory based on synchrotron radiation and relativistic effect calculations

18 p3321 A70-37119

Synchrotron radiation emissivity function contained in dispersion equation for plane wave propagation in magnetoactive plasma

19 p3480 A70-38017

Cosmic ray electron and proton interaction discussing hydromagnetic waves, synchrotron radiation, magnetic field effects and wave propagation

20 p3695 A70-39012

Virgo XR-1 rocket observations, discussing X rays due to synchrotron emission of relativistic electrons

21 p3872 A70-40658

Sco X-1 star high energy radiation production, discussing relativistic electron synchrotron emission and magnetic fluctuations spectrum

21 p3878 A70-40709

Jupiter RF spectrum in 80 to 10,000 MHz range for dipolar model, noting independent synchrotron component

21 p3891 A70-41185

Extreme UV spectroscopy with synchrotron radiation storage ring light sources in 40-400 Å range, including thin film photoabsorption measurements

21 p3826 A70-41451

Alfven waves synchrotron emission in incompressible medium, investigating generation by rotating DC current carrying circuit

21 p3861 A70-42227

Plasma inhomogeneity and drift effects on synchrotron radiation from relativistic charged particles in magnetoplasma

22 p4082 A70-43254

Synchrotron source spectra natural frequency cut-off in absence of self absorption and electron energy cut-offs, discussing pulsar NP 0532

24 p4410 A70-45774

Excess galactic X rays, discussing synchrotron emission of high energy cosmic ray electrons

24 p4398 A70-46161

SYNCHROTRONS

Synchrotron model limitation for nonthermal spectra, demonstrating restriction to small pitch angles and strong fields

18 p3318 A70-37024

SYNCOM SATELLITES

NT EARLY BIRD SATELLITES

Unidirectional heat pipe system design to control temperature of high power traveling wave tubes in synchronous orbit communication satellite, dissipating waste heat

11 p2127 A70-26362

Syncom and Early Bird systems development, launch procedure and operation, discussing common components

14 p2654 A70-31144

SYNCOPE

NT BLACKOUT PREVENTION

Syncope occurrence among flight crews

01 p0033 A70-10371

Syncope proneness correlation with episodes of impaired consciousness in pilots during flight using physiological tests

07 p1223 A70-19944

Aeromedical significance and pathophysiological mechanisms of clinical entities mimicking vasovagal syncope

08 p1454 A70-21946

Cardio-respiratory functions preceding syncope induced by combined lower body negative pressure and head-up tilt

11 p1988 A70-26510

Respiratory syncope with cardiac ineffectiveness and numerous complications during and after flight at high altitude clinically observed for causes

12 p2171 A70-28040

Student pilot case diagnosis of hysterical neurosis with syncope and epileptiform symptoms

21 p3771 A70-41493

SYNDROMES

U SIGNS AND SYMPTOMS
SYNOPTIC MEASUREMENT

Synoptic ionospheric observations during IQSY, discussing electron density profiles, absorption, drifts, etc

01 p0073 A70-10584
Ground observations synoptic distribution importance in studying magnetosphere, emphasizing polar caps

03 p0475 A70-13849
Dynamics dominant on different scales in atmosphere by spectral analysis, showing marked gap under most synoptic conditions

09 p1717 A70-22376
Asian zone solar daily and storm time ionospheric disturbance variations synoptic study during IGY-IGC period

10 p1872 A70-23822
D region synoptic ionization changes investigated by radio waves partial reflection from lower ionosphere, relating wave amplitudes to height

12 p2224 A70-27732
Oceanographic potential of spacecraft, discussing synoptic scanning, International Decade of Ocean Exploration, etc

12 p2225 A70-27746
Venus photographs analysis during synoptic periods, noting inconclusive results on cloud layer and planetary surface structures

12 p2311 A70-28311
Geopotential fields seasonal statistical analysis over first natural synoptic region, using expansion into orthogonal eigenfunctions

13 p2446 A70-29674
Proton Flare Project 1969, reporting synoptic observations of sun and solar terrestrial effects

15 p2794 A70-32291
Global geomagnetic field fluctuations of internal and external origins, analyzing HF spectrum based on monthly mean plots

23 p4187 A70-43861
Laser light pulse reflection by atmospheric boundary layer calculated on computer by Monte Carlo method, comparing results with full scale measurement

SYNOPTIC METEOROLOGY

Clear air turbulence and mesoscale structure subsynoptic air motion experiments for numerical weather prediction

04 p0714 A70-14394
Primitive and balance hydrodynamics equations of meteorological fields noting computational viscosity

06 p1097 A70-17826
Nonlinear planetary long range weather forecasting problems analytical solutions, describing quasi-geostrophic atmospheric motions model

07 p1328 A70-18649
Incipient tropical storm location and synoptic weather pattern analysis from environmental satellite system data utilization

07 p1329 A70-19196
Statistical testing role in synoptic meteorological analysis, discussing pressure and temperature patterns, front identification, computer applications, etc

07 p1329 A70-19574
Meteorological Rocket Network for limited synoptic inspection of stratospheric circulation

07 p1273 A70-20252
Skua meteorological rocket system for synoptic stratospheric sounding, describing system, launch preparation, firing and flight characteristics

07 p1395 A70-20253
PWN-8B meteorological rocket system for synoptic investigation of stratospheric circulation, describing sensor system deployment for descent measurements of wind and temperature

07 p1395 A70-20255
Rocket-borne radar chaff wind sensor synoptic application above 65 km, describing low fall velocity

07 p1237 A70-20258
Synoptic changes associated with midwinter 1967-1968 major stratospheric warming, including pressure and wind distributions and temperature maps

07 p1275 A70-20277
Meteorological guns for synoptic sounding of stratospheric circulation, discussing system characteristics and operations

07 p1250 A70-20280
Combined statistical synoptic methods for mesometeorological forecasts

10 p1913 A70-24947
Maximum wind velocity regions in tropospheric jet streams under synoptic conditions concerning troughs, ridge sections and cyclonic-anticyclonic curvatures

11 p2075 A70-25919
Automated Weather Network and Environmental Survey Satellite /ESSA 9/ global weather sensing systems

11 p2033 A70-26505

Synoptic processes and meteorological fields computerized automatic classification for weather forecasting applications

12 p2265 A70-28332
CAT relationship to cyclogenesis and anticyclogenesis, considering synoptic situation and Jacobian values for forecasts

14 p2609 A70-30604
Synoptic meteorological prediction by statistical and dynamical theory based on statistical mechanics

17 p1331 A70-35926
Global scale atmospheric circulation processes numerical simulation leading to long range weather forecasts for Northern Hemisphere

19 p3462 A70-38753
Soviet papers on macroprocesses in seasonal weather forecasts, discussing tropospheric and stratospheric temperature and circulation, geomagnetic field, etc

20 p3663 A70-39270
H sub 500 field features during natural synoptic seasons in Northern Hemisphere, including circulation characteristics

20 p3663 A70-39271
Synoptic processes in troposphere and stratosphere with large air temperature anomalies during early summer in U.S.S.R.

20 p3663 A70-39272
Troposphere and lower stratosphere circulation during natural synoptic autumn seasons in Northern Hemisphere, noting temperature role

20 p3663 A70-39273
F region synoptic electron densities and electron and ion temperatures from Thomson scatter radar data

21 p3816 A70-41065
Synoptic surface and upper air analysis and APT mosaics of meridional circulation over Mediterranean by remote satellite images

21 p3846 A70-41399
January climatology simulation experiment based on two layer version of global circulation model, comparing computed and observed results

21 p3847 A70-42120
Global solar radiation climatology of earth including direct and diffusive radiation

22 p4013 A70-42600
Temperature and height data for synoptic stratospheric evaluation, using Nimbus 3 satellite IR spectrometer

22 p4064 A70-42618
Global thunderstorm activity location found by measuring differences between time of arrival of electromagnetic energy at three satellites

22 p4016 A70-42779

SYNTAX

NT SENTENCES
NT WORDS (LANGUAGE)

SYNTHESIS

Optimum systems synthesis in computation of programmed movements including dynamical programming methods, control under uncertainty and division problem

07 p1325 A70-19270
Optimal synthesis of linear steady multidimensional systems with common output ensuring minimum rms error in reproducing control action

08 p1480 A70-21497
Temperature, solvent, catalyst and formaldehyde concentration effects on monosaccharide synthesis from formaldehyde condensation

13 p2362 A70-29327
Optimum synthesis of complex signals, using autocorrelation function side peak level effect on false alarm probability

13 p2369 A70-29733
Pulsed signal synthesis from three dimensional function of indeterminacy, incorporating source distance, velocity and acceleration

22 p3988 A70-42562
Stereochemical course of sterically controlled syntheses of dipeptides, using optically active amino acids

22 p3983 A70-43095

SYNTHESIZERS

U CHEMICAL REACTORS

SYNTHETIC ARRAYS

Target velocity effects on resolution of synthetic aperture side-looking radar

02 p0268 A70-12582
Book on synthetic aperture radar imaging systems theory and design covering SNR, optical data processing, phase and motion errors, ambiguity function, etc

13 p2368 A70-29603
Synthetic array radar flying past flat plate, analyzing image relationship to flight path

14 p2552 A70-31193
Signal processing antennas, discussing synthetic and multiplicative arrays for coherent radar airborne mapping

17 p3052 A70-35078

SYNTHETIC FIBERS

NT DACRON (TRADEMARK)
NT GLASS FIBERS

NT RAYON

Boron and other high performance reinforcements made by vapor plating process, discussing boron filament atomic structure and morphology

05 p0873 A70-16609
Graphite yarn, cloth and fiber composites physical properties tabulated, discussing multiply laminates for graphite-epoxy composites

05 p0873 A70-16610
Carbon fabrics and filaments, resin carbonizing and carbon-carbon composites, discussing processing parameters, initial carbonizing resin binder and reinforcement effects on laminate properties

07 p1316 A70-18932
Microphotometric spectral reflectivity correlation to static Young moduli of carbon and graphite yarn filaments as optical testing method

08 p1497 A70-21350
Lattice resolution of layer planes in polyacrylonitrile based carbon fibers ground and dispersed by ultrasonic irradiation

14 p2598 A70-30793
High strength and modulus continuous graphite fibers from pitch, describing production process from asphalt and specifications

21 p3842 A70-40732

SYNTHETIC RESINS

NT ACRYLIC RESINS
NT EPOXY RESINS
NT PHENOLIC RESINS
NT POLYAMIDE RESINS
NT POLYESTER RESINS
NT POLYETHER RESINS
NT POLYMETHYL METHACRYLATE
NT THERMOPLASTIC RESINS
NT THERMOSETTING RESINS

Combustion rates and temperature distribution in condensed and gaseous phases of ammonium perchlorate sandwich with synthetic resin middle layer

09 p1741 A70-22105
Synthetic resin adhesives for aircraft components fabrication

20 p3657 A70-40532

SYNTHETIC RUBBERS

NT CHLOROPRENE RESINS
NT ELASTOMERS

Vibrating system response to damping insert introduced between two distinct coordinates, discussing Butyl rubber and vibration amplitude reduction

01 p0199 A70-10265
Polyurethane rubber time- and temperature- dependent visco- and photoviscoelastic coefficients using two dimensional strain and stress wave propagation photoviscoelastic analysis

03 p0599 A70-14243
Viscoelastic behavior of styrene-butadiene rubber under finite uniaxial and equal biaxial deformations for nonisothermal case

05 p0929 A70-16068
Viscoelastic materials fracture strength as function of cut length, defect size and temperature

17 p3146 A70-35221

SYSTEM EFFECTIVENESS

Complex automatic systems effectiveness synthesis based on invariance principles

20 p3603 A70-39835
Aircraft stretch efficiency factor as function of productivity and payload growth [SAWE PAPER 838]

20 p3563 A70-40369

SYSTEM FAILURES

Comparator design for triplicated attitude indicator instrumentation system in aircraft to achieve reliability, discussing system failure characteristics

02 p0224 A70-11844
Project management systems failure analysis, discussing cost, products quality and project objectives

03 p0610 A70-13963
Automatic control algorithms for subsystem malfunction identification in multisubsystem plants, analyzing conditions for diagnostic tests existence

04 p0661 A70-14554
Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling

04 p0628 A70-15333
Pilot response to stability augmentation system failures and design implications

[AIAA PAPER 68-819] 04 p0624 A70-15379
Monograph on models of failure covering mathematical system reliability determination and relationship to physical nature of failures

06 p1171 A70-18394
Amplifier design effects on device reliability, considering sudden and gradual system failures

07 p1246 A70-19635
Onboard automatic test equipment design, evaluating failure detection and reporting ability

08 p1470 A70-20667
DC to DC switching power processor design considerations for avoiding system failures

08 p1439 A70-20705
Thin oxide film resistors reliability test based on measurement of resistance nonlinearity by third harmonic voltage

09 p1689 A70-22005

Fault finding strategy optimization in systems with single defective element

09 p1693 A70-22974

Soviet book on control and search for defects in complex systems, presenting statistical optimization methods, programmings for assumed Markov processes, etc

09 p1693 A70-23540

Tolerance limits for equipment periodic field checkout, considering performance failure effects on system accuracy, costs and availability

[AIAA PAPER 70-394] 10 p1896 A70-24911

Time-optimal testing sequence for system failure detection, considering maintenance and reliability data

10 p1896 A70-25048

Interplanetary space systems, analyzing failure factors to assure reliability

11 p2112 A70-26051

Redundancy optimization based on partial failure modes effect on system reliability to reduce cost

12 p2243 A70-28010

Random reversible failures effect on linear automatic control systems precision treated as randomly varying structure, proposing statistical characteristics calculation

13 p2382 A70-29279

Automatic Failure Rate Assessment Machine (FRAM) for subjecting guided weapons electronic modules to cyclic stresses inducing failure of inherent weakness

13 p2379 A70-29686

Autodiagnosis of logic module failure in complex electronic systems, examining fault simulation methods and Safe system program and apparatus

14 p2561 A70-30669

Approximating hazard rate function parameters estimation from failure data, using computer program

14 p2592 A70-31113

Availability assurance using computerized spare allocation model for optimal selection of sufficient spares to achieve required protection against system failures

14 p2592 A70-31114

Decreasing failure rate (DFR) with time in electronic systems operating in avionics applications

15 p2712 A70-32646

Computer system maintainability demonstration test in accordance with MIL-STD-471, discussing techniques for failure indication and repair crew qualifications and training

15 p2706 A70-32657

System failure rate estimation as function of age using incomplete field reliability data

15 p2748 A70-32660

Mathematical reliability model for quasi-redundant electronic system with two failure modes for each component

15 p2769 A70-32827

Electrical, electronic, electromechanical, pneumatic and hydraulic subsystems failure pattern determination, discussing sensing techniques in signature analysis

[ASME PAPER 70-DE-34] 16 p2917 A70-33505

Reliability-cost model to determine optimum failure rate for minimization of systems total life cycle cost

[ASME PAPER 70-DE-43] 16 p3004 A70-33507

Hazard plotting methods for analyzing service life data with different failure modes

16 p2921 A70-34024

Systems subject to failure and repair cycles, describing performance and reliability by stochastic processes in terms of excess time

17 p3099 A70-34580

Large complex system with standby components, approximating reliability by simple model substitution

17 p3099 A70-34582

Combined environments testing to reveal potential flight failure modes

17 p3059 A70-35165

Optimal filters design predicting electronic systems parameters, preventing equipment failure due to wear and aging

17 p3055 A70-35744

ATC lag due to air transport growth and associated aircraft design and operations advances, discussing automation, noise abatement effects, etc

17 p3135 A70-35857

Soviet book on space electronics fundamentals covering equipment problems, energy requirements, communication, features, radio remote control and correction, radio astronomy, etc

19 p3375 A70-37400

System with N independently failing subsystems minimum cost solution mathematical model based on opportunistic preventive replacement policy

19 p3437 A70-38400

Redundant systems reliability under wearout conditions for active and standby units, including failure rates of sensing and switching devices

19 p3438 A70-38597

Reliability analysis based on Bayesian subjective probability implemented by stored time sharing computer programs for engineering computations and operation analyses

19 p3441 A70-38818

Optimal burn-in testing of repairable equipment, improving reliability by decreasing failure rate with age under operating conditions

23 p4199 A70-43923

Aircraft longitudinal motion during takeoff and landing due to loss of lift after boundary layer control system failure

24 p4372 A70-45448

Stochastic behavior of failed standby redundant electronic equipment with imperfect switching and opportunistic repairs

24 p4319 A70-46016

SYSTEM LIFE

U RELIABILITY

SYSTEMIZATION

U SYSTEMS ENGINEERING

SYSTEMS ANALYSIS

Missile miss distance evaluation model with emphasis on statistical nature, noting application to systems analysis

01 p0193 A70-10118

Data analysis of inertial systems for commercial aircraft overseas operations, classifying systems error propagation as linear time drift or Foucault period oscillation

01 p0137 A70-10314

Book on dynamics of complex systems represented by control and human operators and animals behavioral activities models

01 p0034 A70-10501

Manned space station system analysis for identifying control subsystem functions/weight penalties/and system characteristics to minimize penalties

[AIAA PAPER 69-1078] 01 p0194 A70-10628

Tracking systems synthesis and performance analysis based on continuous Markov processes theory, particularly Fokker-Planck equation

01 p0043 A70-10776

Nonlinear vibrations in mechanical systems of elastic components having equivalent circuits represented by finite number of discrete masses interconnected by weightless infinite rod

01 p0143 A70-11027

System analysis and synthesis processes applied to educational requirements identification and programs implementation, emphasizing use of functional model with man machine interface

01 p0221 A70-11283

Availability model for system with exponential reliability function and constant repair time, determining start-up costs, cost-optimal mean up and down time, etc

01 p0221 A70-11382

Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems

01 p0146 A70-11561

Cost effectiveness analysis applicable to DOD military system selection and acquisition, using model to study airborne electronics subsystem

02 p0401 A70-11673

Least squares adjustment of observation equations for hybrid systems solved by regarding constraints as observations with zero variances

02 p0289 A70-11798

Dynamical systems with two degrees of freedom reduced to numerical investigation of quadratic area-preserving mapping

02 p0289 A70-11993

Automatic control nonlinear systems with random inputs, determining phase coordinates probability densities

02 p0272 A70-12414

Incremental profit and total airline profit model programs for air cargo systems

[SAE PAPER 690415] 03 p0411 A70-12899

Aircraft ground support system analysis from airplane designers viewpoint

03 p0463 A70-13265

Optimal selection of subsystems, minimizing mathematical expectation of output losses considering malfunctions

03 p0460 A70-13429

Nonlinear feedback control system analysis and synthesis by parametric plane method, investigating frequency response by describing functions

03 p0460 A70-13970

Experiment selection in orbital program planning based on broad system synthesis, discussing identification and grouping of objectives, critical issues and experimental equipment requirements

[AAS PAPER 69-580] 04 p0749 A70-14652

Performance characteristics analysis of large area roll-up solar arrays based on support structure size and weight

[ASME PAPER 69-WA/ENER-11] 04 p0770 A70-14898

Centralized maintenance system organization, describing centralized system used by Spanish Air Force units

06 p1184 A70-17274

Antenna noise temperature of large aperture reflectors from feed system RF characteristics, discussing spillover and blockage factors

06 p1008 A70-17506

Nonlinear differential equations solution behavior near zero point of phase space examined in material system perturbed motion

07 p1333 A70-18772

Collection of papers on control systems theory and applications, Volume 7, covering dynamical systems, nonlinear filtering, optimal control, feedback control, etc

07 p1244 A70-19090

Optimal control of dynamical systems with transport lag determined using differential-integral equations

07 p1245 A70-19094

Entropy analysis of feedback control systems leading to separation theorem and feedback process information interpretation

07 p1245 A70-19095

Radio propagation characteristics and communication system performance, discussing concepts of MUF, LUF, error rate, communication system modeling, prediction techniques, etc

07 p1229 A70-19157

Efficiency of terminal state control systems defined, relating efficiency, random parameters and reliability

07 p1246 A70-19528

Inductance distribution in magnetic systems of different configuration and air gaps

07 p1282 A70-19530

Reduction method for order of transfer function describing automatic control system, determining coefficients of reduced order transfer functions

07 p1247 A70-19842

Inertial navigation system design principles, deriving error equations and equations of ideal operation

07 p1332 A70-20177

Analytical mechanics of discrete and continuous systems covering systems with limited degrees of freedom, statistical and continuum mechanics

08 p1543 A70-20526

Deterministic and stochastic simulation models for obtaining optimal solution in operations research by trial and error

08 p1464 A70-20579

Carrier-based attack aircraft avionics, describing optimal large scale analysis procedure for flight control, communications and radar subsystems

08 p1470 A70-20660

Transfer functions representing continuous dynamic systems, identifying parameters by obtaining coefficients of discrete system transfer function relating input and output sampled sequences

08 p1478 A70-20777

Saturn 5 Prelaunch Systems Simulation Model for launch opportunity containing multiple launch windows, considering last 26 hours of countdown

08 p1543 A70-20933

Model characteristics selection for dynamic system behavior simulation, studying characteristics variability extent without changing trajectory behavior dependence on parameter space

08 p1544 A70-20953

PWM-PAM and PTM-PAM systems analysis, deriving formulas for output signal shape determination

08 p1480 A70-21226

Multidiscipline systems analysis of satellite assisted information system improving earth resource management, developing User Decision Models

[AIAA PAPER 70-335] 09 p1792 A70-22855

TIROS Operation Satellite (TOS) system for daily observation of meteorological phenomena analyzed for problems of general data gathering satellite system

[AIAA PAPER 70-283] 09 p1766 A70-22874

Long range navigational aids requirements for airlines, discussing self contained navigation systems capabilities

09 p1722 A70-23028

Numerical analysis of magnetic frequency divider operation

09 p1649 A70-23338

Steady state analysis of harmonic oscillations in HF synchronized transistor autocooscillators, considering transistor inertial properties

09 p1649 A70-23341

Technology or Research Quantitative Utility Evaluation (TORQUE) system genesis and operation, with implications affecting R and D

09 p1795 A70-23418

Demand assignment techniques applicability to TDMA satellite communication systems, discussing operational modes and optimum mode selection

10 p1837 A70-24351

Intermeshed TDMA systems efficiency in interconnecting ground stations in communications satellite systems, discussing rigid and variable burst lengths

10 p1839 A70-24363

Data display systems parameters and functional elements, considering resolution, brightness, contrast, command and control, storage, etc

10 p1889 A70-24576

Combined discrete event and continuous systems simulation language, discussing mathematical modeling and various applications

10 p1860 A70-24652

Linear time-varying systems transient responses prediction, using Krylov-Bogoliubov method and parameter plane analysis

10 p1855 A70-24704

System with recovery consisting of n elements, discussing reliability and solution to steady state problem

10 p1855 A70-24798

Reliability model for analyzing operational phase test programs developed from R and D phase models, processing data according to test scope [AIAA PAPER 70-389]

10 p1896 A70-24916

VHF aerosol antenna design and system interactions, analyzing impact of spacecraft dynamics, control system, power supply and propulsion [AIAA PAPER 70-486]

11 p2120 A70-25439

Soviet papers on complex control systems covering hierarchical structures, accuracy and stability analysis, optimal and self adjusting control, etc

11 p2022 A70-25601

Multidimensionality in complex control systems, discussing circuit and oscillation theory, decomposition, variational problems, finite automata and group theory

11 p2023 A70-25602

Control theory, Volume 2, Analysis and design of space vehicle flight control systems

11 p2122 A70-25772

Coupled nonlinear systems analysis based on reducing coupled differential equations to equivalent uncoupled equations amenable to existing techniques

11 p2072 A70-25956

Decoupling and pole assignments in linear multivariable control systems using geometric method

11 p2072 A70-26160

System sciences - Conference, University of Hawaii, January 1970, Part 2

11 p2026 A70-26226

Systems identification in parameter estimation to acquire stability properties using integral transforms

11 p2028 A70-26311

Multidegree of freedom linear vibrating system analysis by dividing differential equation method

11 p2139 A70-26414

Continuous and discrete minimum time problems relationships and state space portraits during application of optimal strategies to system

11 p2029 A70-26749

Earth resources satellite systems synthesis, describing analytical techniques in R and D preceding operational status

12 p2334 A70-26942

Continental air traffic control design, discussing systems analysis approach advantages in terms of capacity

12 p2267 A70-27598

ATC radar beacon system, discussing interacting factors lowering reply reliability from transponder

12 p2267 A70-27639

Upper bound on system errors caused by quantization in multirate digital control system

12 p2204 A70-27841

Algorithm based on component reliability used to determine complex systems reliability

12 p2192 A70-28009

Space information systems effectiveness evaluation based on generalized homomorphous model

13 p2372 A70-28377

Planetary trajectory handbooks for mission and system analysis covering opportunities for Mercury, outer planets and Mars, contour charts, etc

13 p2486 A70-28525

Soviet book on theory of oscillations of linear and nonlinear time lag systems

13 p2450 A70-28699

Book on linear time varying systems analysis and synthesis covering multivariable systems, operational algebra, controllability, observability, canonical structures, minimal realization, etc

13 p2381 A70-28975

Book on probabilistic systems analysis covering models, decision making, random processes, distribution functions, mass and density functions, etc

13 p2441 A70-29455

Multimode system analysis, using automated technique to calculate effectiveness and cost down to component level

13 p2525 A70-29837

Soviet book on multivariable automatic control systems analysis and synthesis covering equations of motion, nonlinearities, pulse control, transient responses, etc

14 p2561 A70-30954

System effectiveness apportionment for constraints existing on accountable factors using Lagrange multiple method

14 p2669 A70-31111

Systems effectiveness equated to function of performance, availability, reliability, maintainability, quality control and manufacturing, emphasizing optimization

14 p2592 A70-31112

Aerospace technology and system analysis application possibilities to urban social and economic planning problems

14 p2670 A70-31191

Ground controlled remote manipulator spacecraft system through wideband radio link for satellite maintenance and repair

15 p2810 A70-31780

Complex systems effectiveness analysis by computer simulation technique

15 p2706 A70-32633

Computerized optimal redundancy analysis, considering cost, size, weight, volume, etc

15 p2712 A70-32642

Computer program /SORCBE/ for systems unavailability tradeoff vs added cost for various versions

15 p2706 A70-32658

Parameter plane method of stability analysis applied to spacecraft attitude control system with two nonlinearities related by nonlinear differential equation

16 p2881 A70-33032

Modulation transfer function /MTF/ systems analysis with emphasis on target acquisition, relating image contrast characteristics of target and background

16 p2907 A70-33185

Oscillatory and wave processes in nonlinear distributed systems by asymptotic method analogous to Bogoliubov concentrated systems

16 p2951 A70-33252

Parameter identification in distributed systems by method of characteristics, discussing noisy measurements and limited available transducers

16 p2942 A70-33338

Systems consisting of redundant and different modules, deriving vector and matrix expressions for effectiveness

17 p3099 A70-34581

Subsystem selection integration and technology for space base and planetary mission module /PMM/ of space station program [AAS PAPER 70-021]

17 p3023 A70-34801

First order difference equations for dynamical systems from Hamilton canonical equations

17 p3129 A70-34959

Multiple head shaker systems theory as application of linear algebra, noting open loop control system with computer control of frequency, amplitude and phase

17 p3059 A70-35167

Systems analysis approach to problem solving, discussing application to sociological and educational considerations

17 p3130 A70-35297

Parameter analysis of dynamical systems by matrix approach, using n -dimensional parameter space

17 p3130 A70-35300

German monograph on heavy space probes for solar system investigation covering systems analysis, mission success, flight programs, Saturn 5 launch vehicle, etc

17 p3168 A70-35378

Systems operation hybrid simulator for computer checkout of Saturn S-1C stage

17 p3061 A70-35489

Successful application development and implementation of data processing system, noting sequence, magnitude, manpower and time required

17 p3200 A70-35507

Stochastic approximation for identification of distributed parameter system solutions described by linear partial differential equations

17 p3131 A70-35557

System analysis to determine orbital parameters influence on mission scientific objectives under engineering constraints, using value function [AIAA PAPER 68-1052]

17 p3172 A70-35648

Digital computer simulation and analysis of control loops for ion thruster control [AIAA PAPER 69-239]

17 p3149 A70-35654

Iterative determination of time optimal controls, considering dynamic system transition from initial to quiescent state with constraints on control vector

18 p3282 A70-36355

Statistical properties of civil ATC system based on central processor, discussing system informational congestion

18 p3288 A70-36394

Geometrical interpretation of controlled evolution of optimal systems with mixed state constraints, using Pontryagin and variational methods

19 p3542 A70-38056

Optimal control systems sensitivity analysis, discussing trajectory tracking

19 p3394 A70-38716

Long life reliability measurement for reentry and recovery systems, noting applicability to program monitoring, optimum resources allocation, etc

19 p3442 A70-38832

Weapon systems effective reliability analysis, using degraded mode evaluation and deterministic computer program

19 p3442 A70-38833

Avionics hardware operational effectiveness assessment method, considering inertial navigation system LN-12D

19 p3442 A70-38837

Prior distributions computer aided selection for generating Monte Carlo confidence bounds on system reliability

20 p3658 A70-39641

Self adaptive system with standard model, using direct loop amplification factor as controlled parameter

20 p3603 A70-39832

Multidimensional control for turbojet engine, relating system characteristics to invariance conditions during startup and ascent

20 p3689 A70-39847

Controlled systems characteristics multistep statistical evaluation by extrapolation, analyzing prediction errors

20 p3593 A70-39904

Uncontrolled plant dynamic characteristics analysis based on signal recordings, using black box without input method

20 p3705 A70-39909

Computer program for systems reliability approximation, giving algorithm for cut and tie sets identification

20 p3594 A70-40060

Regulated spacecraft solar array mathematical model for high voltage power supply regulator analysis

21 p3757 A70-41208

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena, analyzing problems of general data gathering satellite system [AIAA PAPER 70-283]

21 p3931 A70-41868

Self oscillations and dead zones of automatic control systems with variable structures, using harmonic linearization

22 p4001 A70-42837

Linear distributed parameter systems state estimation from noisy measurements, developing sequential algorithms for prediction, filtering and smoothing

22 p4063 A70-43026

Nonlinear control systems described by linear equations, discussing quasi and local controllability as functions of time and stationary state

22 p4063 A70-43427

In-flight escape systems and survival equipment reliability in U.S. Navy ejections

23 p4143 A70-44460

Bayesian identification of system parameters for observable and nonobservable input signals

24 p4316 A70-45474

Closed loop synthesis algorithm and comparison to sensitivity of open loop system, noting applicability to optimal control

24 p4322 A70-46013

Functional systems in biology, discussing inter-scientific demarcation, research strategy, physiological experiment, operational architectonics, etc

24 p4305 A70-46391

SYSTEMS DESIGN

U SYSTEMS ENGINEERING

SYSTEMS ENGINEERING

Global meteorological sounding network requirements, restraints and sensors, considering gun launched meteorological probe role

01 p0054 A70-10082

Failure mode evaluation techniques application to system design and product assurance activities, with examples of performance evaluation of components, circuits and systems

01 p0049 A70-10116

Microwave ILS for difficult sites or conditions, detailing capabilities and operation principles

01 p0136 A70-10301

Aerospace digital computer design development, proposing data processing system with improved flexibility by making subassemblies more independent with multiplexed interface

01 p0047 A70-10305

Medico-engineering experiment in partially closed ecological system for long term manned space missions

01 p0032 A70-10363

Apollo/Saturn 5 space vehicle supporting and restraining mechanisms design and operation, discussing holddown assemblies

01 p0055 A70-10468

Systems design experience derived from Mercury, Gemini and Apollo projects, discussing thermal protection, launch propulsion, life support, etc [AIAA PAPER 69-1077]

01 p0193 A70-10604

Systems engineering applied to airborne, airport and community socioeconomic structure in determining air freight and passenger demand impact on airport location and configuration

[AIAA PAPER 69-1091]

01 p0055 A70-10605

Delta boosted electrically raised high power synchronous satellite for communication tasks

[AIAA PAPER 69-1104]

01 p0194 A70-10617

Manned space station power systems design and selection problems, discussing requirements based on impacts on space station design and operations [AIAA PAPER 69-1081]

01 p0008 A70-10625

Manned space station system analysis for identifying control subsystem functions /weight penalties/ and system characteristics to minimize penalties
[AIAA PAPER 69-1078] 01 p0194 A70-10628

Air traffic control system automation, anticipated benefits to users and operators and potential pitfalls associated with implementation
[AIAA PAPER 69-1057] 01 p0137 A70-10638

V/STOL air traffic control and equipment considerations for increased demand, suggesting time/velocity separation system using direct routing, positive and automated control
[AIAA PAPER 69-1055] 01 p0137 A70-10639

Holographic spectroscopy design and development, discussing components and recording yellow Na doublet
01 p0087 A70-10659

Design parameter importance in centrifugal axial flow particle separator tubes performance from separator tube development program data
01 p0163 A70-10680

Factors in icing mechanism and principal features of various ice detectors for aircraft and helicopters
01 p0056 A70-10692

Aircraft seat ejection systems using SCID /small column insulated delay/ distribution system taking advantage of standard end devices
01 p0035 A70-10718

Intelsat 4 communication system design and international cooperation, considering satellite design, TV and telephone channels capacity, etc
01 p0196 A70-10883

Langley integrated life support system design, discussing manned test results including system engineering, atmospheric and water chemical analyses and microbial measurements
01 p0038 A70-10973

Control system main and self adaptive loops structural synthesis
01 p0053 A70-11043

Rockwell hardness tester attachment design for studying temperature dependence in various multiphase alloys at high temperature
01 p0121 A70-11110

Automatic landing systems mission and design, discussing pilot-system task coordination, equipment characteristics and reliability, etc
01 p0138 A70-11257

Operational planning system for Strategic Air Command for data accessing, generating, displaying and editing using computer complex
01 p0048 A70-11282

System analysis and synthesis processes applied to educational requirements identification and programs implementation, emphasizing use of functional model with man machine interface
01 p0221 A70-11283

Turbine engine starting system design requirements, outlining lifetime improvement of hot section parts
01 p0167 A70-11460

Project ABLE stabilized platform, discussing logistics support requirement effects on system design and acquisition, reliability, maintainability and costs
02 p0401 A70-11670

Slow scan TV systems for planetary exploration, discussing sampled vidicon operation, digital encoding, data storage, signal to noise ratio, future design trends, etc
[SMPT PREPRINT 106-3] 02 p0294 A70-11682

Optimal dynamic design of system consisting of elastic cantilever rod with two concentrated masses subjected to harmonic vibrations under force at free end
02 p0384 A70-11739

Avionic units automatic testing to increase speed and reliability, discussing system configuration, parts, economics and computer language use
02 p0295 A70-11838

In-flight data acquisition systems to overcome manual methods limitations, discussing applications and system configuration
02 p0224 A70-11839

Grille spectrometer design for thermal IR measurements, discussing requirements to achieve optimum performance
02 p0296 A70-11917

Cost effective phased buildup of computerized ATC systems
02 p0401 A70-11961

Aircraft landing measurement system /ALMS/ designed to provide computer analysis of all traffic landing at airport
02 p0331 A70-11964

Three dimensional radar system for automatic tracking all aircraft in terminal area to increase air traffic control system safety and capacity
02 p0332 A70-11967

Navigation system with twin gyro platform and Doppler sensor, discussing performance and cost advantage over inertial systems
02 p0334 A70-11987

Hardware-software integrated time sharing computer system for testing transmission control units and associated terminals on line
02 p0275 A70-12189

Popov type nonlinear control systems from synthesis is viewpoint, using state variable feedback results to insure absolute stability
02 p0271 A70-12194

IBM System/360 Operating System submodel simulator for multiprogramming, discussing language and structure
02 p0266 A70-12281

Optimization potential selection in control system design by analytical method
02 p0272 A70-12412

Manned space station system design requirements, discussing logistics interaction and station autonomy
[AIAA PAPER 69-1063] 02 p0382 A70-12528

Book on radar design principles-signal processing and environment covering target detection in presence of noise, atmospheric effects, pulse techniques, etc
02 p0270 A70-12662

Low turbulence wind tunnel axisymmetric contraction designed from reformulated Thwaites solution
03 p0462 A70-12935

Drum-type, high-speed, frame or streak photographic camera, discussing film mounting and operating specifications
03 p0485 A70-13531

Logic methods of efficient organization of satellite integration, considering project, physical components and program elements
03 p0609 A70-13842

Linear separation systems for aerospace applications covering mild detonating fuse and cord flexible linear shaped charge, SUPER ZIP concepts, etc
03 p0546 A70-14103

Design, performance and manufacturing information on various microcircuit bridges in conjunction with production of squibs, detonators and pressure cartridges
03 p0547 A70-14112

Structure theorem for time invariant multivariable linear systems proof and formulation for use in controller design and synthesis
03 p0461 A70-14166

Millimeter wave fields systems application to radar guidance, radiometry, communications, radio astronomy and satellite experiments
04 p0647 A70-14621

Radiation hardening of electronic systems for nuclear weapons using shielding, circuit design techniques and hardened components
04 p0657 A70-14738

Crew requirements influence on systems design and operations criteria for long duration biomedical and behavioral measurement program in earth orbiting space laboratory
[ASME PAPER 69-WA/BHF-17] 04 p0643 A70-14858

Thermionic diode development for nuclear reactor systems
[ASME PAPER 69-WA/ENER-5] 04 p0717 A70-14900

Integral-criterion optimization of transient processes in mechanical systems synthesis with favorable dynamic and damping characteristics
04 p0720 A70-15218

Public health services problems analyzed by statistical simulation method, using Markov process
04 p0644 A70-15356

Pilot response to stability augmentation system failures and design implications
[AIAA PAPER 68-819] 04 p0624 A70-15379

Pulsed MPD arc jet electric propulsion system requirements, examining physical constraints, pulse duration, duty cycle, power network structural details, etc
[AIAA PAPER 69-269] 04 p0737 A70-15424

SAO thermal subsystem design to provide temperature control for experiments and spacecraft electronic devices
04 p0765 A70-15668

Integrated logistic support economics considered in selecting support system for generating quantitative data for cost optimization
[SAE PAPER 690632] 05 p0959 A70-15846

V/STOL Flight Profile Indicator display system development to present pilot situation information in vertical plane
[SAE PAPER 690694] 05 p0792 A70-15861

Human performance evaluation and data acquisition as requirements for heuristic analytical models in systems engineering
05 p0805 A70-16008

Flexible blades cascade design compared with various correlation criteria, describing cascade and profiles geometry and loss coefficient
05 p0790 A70-16029

Sealed Ni-Cd aerospace battery design, discussing recombination of gases produced during prolonged overcharging at low temperature, separator material, plate balance, etc
05 p0798 A70-16096

Thermal stress and thermal fatigue data for utilization in design problems
05 p0932 A70-16161

Systems concepts in design of computer operated display systems in air defense and air traffic control systems, discussing alphanumeric display, panoramic display, etc
05 p0827 A70-16183

Computer generated displays and USAF equipment design for operational command and control systems, discussing Ag halide film technique
05 p0847 A70-16185

Systems engineering management process for satisfying MIL-STD-499 requirements, detailing functional analysis, tradeoffs and resulting design analysis data
05 p0959 A70-16462

Magnetosensitive quartz element with suspended magnet and two mirrors for recording magnetic variations
05 p0851 A70-16770

Airport fog attenuation systems design and operation consisting of power and communication cables linking diffusers to central control and command
05 p0830 A70-17092

Synchronous and asynchronous electrostatic motors based on action of electric fields charges, discussing design and construction
06 p0988 A70-17150

Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect
[AIAA PAPER 69-325] 06 p1027 A70-17174

Systems engineering aspects of Apollo Telescope Mount spacecraft, considering design and manned space flight role
06 p1061 A70-17312

Instruments and systems - Conference, San Francisco, August 1969
06 p1017 A70-17351

Avionic and space electronic equipment converging design, considering chip computer
06 p1017 A70-17354

Systematization of thermodynamic cycles from elementary reversible evolutions concerning exchange of work, heat and combined relations
06 p1173 A70-17470

Personnel/cargo lowering and retrieval system requirements, design approach and effects on performance for CH-47 helicopter, discussing fabrication and testing on mockup
06 p0985 A70-17711

Physiological and environmental factors influencing oxygen breathing system design and use for passengers and aircrews of high flying aircraft
06 p1003 A70-17716

Launch vehicle control system synthesis based on mode control theory state variable formulations
06 p1156 A70-17958

Optimal feedback controls design for linear systems relative to time-multiplied performance indices
06 p1025 A70-17960

Material Acquisition Division of Naval Air Systems Command, discussing engineering and testing functions in providing air weapons systems to operating forces
06 p1185 A70-17973

Hybrid coordinate formulation for flexible space vehicle attitude control system design
[AIAA PAPER 70-20] 06 p1158 A70-18180

Solar plasma wind simulator design and performance, discussing ion source, mass separator, beam mass analyzer and Faraday cup
[AIAA PAPER 70-31] 06 p1030 A70-18223

Fluidic devices for systems engineering, discussing design and applications of logic simulator, element tester and three mode controller
06 p1015 A70-18428

Soviet monograph on theory and calculations of impact systems covering solid body collisions, elasticity, wave mechanics and nonflat rod applications
07 p1400 A70-18732

Integrated circuit technology impact on electronic equipment designers and organization relationships within industry
07 p1239 A70-18800

Aerospace ground air conditioning design, discussing ground support equipment, manuals, manufacturer catalogs, etc
[SAE-AIR-992] 07 p1248 A70-18808

Advanced concept ejection seat /ACES/ system design and performance, considering gyro-controlled vernier rocket motor and electronic time delays
07 p1192 A70-19016

Aeros satellite active magnetic position control system of axis and spin noting design and operation
[DGLR-69-056] 07 p1393 A70-19148

Apollo 7 and 8 command modules TV camera systems design, considering additional function of public information
07 p1280 A70-19229

Quartz magnetometer design to measure horizontal component of geomagnetic field, observing stability of H/zero/ constant
07 p1281 A70-19467

Communication satellite transponders design, cost, reliability, manufacturing, testing and future developments

07 p1241 A70-19620

Book on control engineering for systems analysis and design, discussing feedback, nonlinear, discrete time and physical systems

07 p1246 A70-19669

Relay control design for model-tracking system with parameter uncertainties and disturbances using semidefinite Liapunov function

07 p1247 A70-20026

Automatic control system identification with respect to optimality criteria, mathematical models, computing techniques and input signals

07 p1247 A70-20029

Matched filter rectangular pulse compression nonlinear FM waveform design with low time sidelobes and zero mismatch loss due to spectral weighting

07 p1242 A70-20065

Digital cross correlator design for impulse response determination in linear systems, noting real time operation without software and storage problems

07 p1236 A70-20068

Integrated electronics system for space shuttles including propulsion, electrical power, life support and flight control

[AIAA PAPER 70-257] 07 p1398 A70-20392

Space transportation system objectives including design, operations and economics

[AIAA PAPER 70-263] 07 p1398 A70-20393

Adaptive control function technique for lateral stability augmentation system design for manned lifting body entry vehicle

07 p1247 A70-20404

Strain gages design and development for small loads

08 p1493 A70-20586

Civil avionics systems engineering for safety, regularity, weather independence, flight patterns and airport utilization

08 p1468 A70-20649

Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1969

08 p1468 A70-20651

Computer controlled automatic test system /NARF 5500/ for naval avionics systems support, discussing system hardware and applications and programming cost reductions

08 p1469 A70-20652

Automatic test equipment from fourth generation computer viewpoint, considering cost and size reduction trends in avionics

08 p1469 A70-20654

Automatic multiple station test system for manufacturing plants, considering centrally controlled vs free standing and intelligent vs nonintelligent remote stations

08 p1470 A70-20655

General purpose automatic test system /GPATS/ for electronic equipment fault location, discussing software and hardware for integrating programmable oscilloscope

08 p1470 A70-20656

General purpose support system /GPSS/ simulation for carrier operations and avionic maintenance, considering attack aircraft operations, spare parts, personnel requirements, etc

08 p1470 A70-20661

Integrated man machine shipboard maintenance systems design, describing computerized model based on information flow network

08 p1465 A70-20665

DC to DC switching power processor design considerations for avoiding system failures

08 p1439 A70-20705

Electrochemical cells with lithium anode and nonaqueous electrolyte, discussing research role in designing high specific energy primary batteries

08 p1440 A70-20709

Flexible nickel cadmium secondary battery as nocturnal power supply for meteorological balloons transceiver and measuring instruments

08 p1440 A70-20711

Lead-acid and vented nickel cadmium batteries compared in redesign of military aircraft battery for cells reduction, low current density, etc

08 p1440 A70-20712

Soviet book on pneumatic actuators theory and design, using digital computers to solve dynamic equations and to obtain diagrams and nomograms

08 p1440 A70-20752

Soviet book on control systems for single rotor helicopters covering automatic stabilization system design, autopilots, pilot operation within closed control circuit, etc

08 p1435 A70-20769

Optimal control systems design involving time delays as functions of time and system state, considering stability constraints

08 p1478 A70-20779

Laser and quasi-laser systems modulation for wide spectrum communications, discussing global potentials and application as low cost satellite links

08 p1459 A70-20802

Optimal satellite communication system design concerning station spectrum and interference limits

08 p1459 A70-20805

Coupling relations in product and systems development linking ideas to finished products

08 p1601 A70-20824

Operational figure of merit of high performance antennas in communication satellite earth stations as function of design

08 p1471 A70-20825

Multisupported radially symmetrical suspension systems designs for parabolic antennas, assessing performance in terms of maximum rigidities

08 p1586 A70-21058

Relaying interferometer design consisting of heterodyne frequency diversity antennas with coherent mixer, relaying transmitter and receiver

08 p1495 A70-21071

Civil engineering research needs in air transportation, discussing information sources and processing and industry estimates of manpower, facilities and funding

08 p1481 A70-21305

Electroluminescent displays design capable of generating all primary colors in single compact element

08 p1499 A70-21689

Narrow width pulse-position modulated optical communication system design, determining performance in terms of error probability and information rates

08 p1463 A70-21778

Supersonic compressor applications for airborne vehicles propulsion systems, discussing axial flow compressors, three dimensional design methods, supersonic radial machines, etc

[AGARDOGRAPH-120] 08 p1434 A70-21929

Electronic equipment optimal design variant selection method, based on relative characteristics of feasible versions, widening weighting coefficients determination basis

09 p1643 A70-22129

Reliability engineering for complex systems of multiple repairable parts based on analysis involving signal flow graphs and Markov renewal processes

09 p1691 A70-22574

Harrier engine nozzle actuation system role in short ground takeoff run facility, discussing pneumatic system, air motor servo unit and pilot control

09 p1610 A70-22606

Flashtube photostimulators for examining human physiological response, discussing design and calibration

09 p1624 A70-22673

Rapid guiding system for high resolution astronomical observations using thermal expansion of electrically conducting wires

09 p1721 A70-22741

Linear high order aircraft and missile control systems design using Horowitz frequency response method

09 p1654 A70-22835

Large scale aerospace data acquisition, processing, handling and dissemination systems analysis and design

[AIAA PAPER 70-322] 09 p1641 A70-22865

Fighter flight control design criteria for providing maximum combat effectiveness, safety and survivability without excessive cost or risk

[AIAA PAPER 70-515] 09 p1611 A70-23021

Control system design for maximum weapon delivery missions effectiveness, discussing analysis and simulation methods

09 p1611 A70-23022

Primary long range navigation system for SST, considering operational goals, Doppler radar systems, navigation aids, inertial systems, etc

09 p1722 A70-23029

Sensors design for studying temperature fields and stressed state of structures

09 p1680 A70-23106

Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability

09 p1743 A70-23248

Structural and material design of contactless photopotentiometers operating in forward and reverse modes with given output characteristics

09 p1681 A70-23357

Soviet book on aircraft control systems design covering optimal functional or function parameters, circuits controlling pitch, roll, yaw motions, human operator systems, etc

09 p1725 A70-23472

Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results

09 p1614 A70-23686

Optimizing control system design using fluidic digital circuitry and FM type transducers

09 p1614 A70-23690

Apollo project hardware design and evaluation principles coupling simple design practice with stringent technical and administrative discipline

09 p1768 A70-23704

Transonic two stage compressor design and performance, discussing interblade row traverse data

09 p1608 A70-23742

Solar observatory at San Fernando Valley, describing evacuated aperture reflecting telescope function and design, data recording cameras, etc

09 p1688 A70-23772

Alphanumeric solid state displays with vertically stacked character rows for text format reading, using injection electroluminescence technology

10 p1846 A70-23882

Airborne pyrotechnic cloud seeding system development, testing and application, comparing rainfall from test and control clouds

10 p1886 A70-23931

Synchronous satellite communication system clock synchronization loop design taking into account delay time

10 p1835 A70-24335

Signaling system for communication satellites demand assignment, considering error control, unit negative acknowledgement, system parameters selection, control signals, etc

10 p1837 A70-24347

Bit clock synchronous system for communications satellites TDMA

10 p1839 A70-24368

Soviet book on automatic scanning information systems, discussing equipment, system parameters, scanning methods, etc

10 p1840 A70-24376

Soviet book on satellite communication systems for telephone and TV transmission covering orbit selection, signal level calculation, channel characteristics for frequency bands, etc

10 p1840 A70-24378

Closed loop control system design with preassigned eigenvalues based on multipoint linear stationary system synthesis with dynamic feedback

10 p1855 A70-24394

Control synthesis method using optimization technique to design controllers making closed loop system behave as ideal system or model

10 p1855 A70-24450

Semiconductor laser junction construction for increased gain making possible laser voice communication, optical intrusion alarms, laser pumping lamps and portable range finders

10 p1900 A70-24529

Large optical telescopes design, discussing field correction at prime focus, low expansion materials, drive and control systems, on-line computers, etc

10 p1860 A70-24554

Cost and deadline planning for system development, suggesting theoretical methods tests regarding applicability

10 p1971 A70-24597

Hybrid computer applications in systems approach to engineering design, discussing design process and computer description

10 p1861 A70-24658

Controllability and observability of discrete composite systems in tandem with Jordan canonical form representation noting similarity to continuous systems

10 p1856 A70-24873

Computer and system design automation, considering language problems, microproms, optimization on subsystem suboptimal basis, etc

10 p1845 A70-24874

Coherent instrumentation radar for White Sands Missile Range, discussing system design emphasizing pulse Doppler capability

10 p1842 A70-24881

Complex microwave solid state subsystems designs for specialized systems

10 p1852 A70-24889

Nonavionic Aircraft Integrated Data System configurations evaluation by computer model, showing cost effectiveness data in terms of aircraft maintenance and availability

[AIAA PAPER 70-396] 10 p1808 A70-24909

Hardware and system testing mathematical model assuming stochastic design and manufacturing defects detection and nondetection probability equations analogous to reliability function

[AIAA PAPER 70-390] 10 p1896 A70-24915

Systems engineering approach to test planning with emphasis on risk reduction for spacecraft

[AIAA PAPER 70-367] 10 p1952 A70-24933

Commercial thermoelectric generator design, applications and economics compared to batteries and small MG sets

10 p1808 A70-25033

Book on aircraft environmental control covering design, construction and operation of various systems

10 p1809 A70-25203

Scalar measure of system sensitivity to plant parameter variations applied to design of linear lumped stationary multivariable feedback control systems

10 p1856 A70-25233

Slowly varying parameters as engineering problem in nonlinear lumped systems 10 p1856 A70-25239

Transfer functions application to optical system specification, design and evaluation, calculating diffraction limited MTF 11 p2082 A70-25354

Canadian geostationary satellite communication system design and performance, discussing transponder with six RF channels [AIAA PAPER 70-429] 11 p1996 A70-25402

Terrestrial interface at SPADE terminals for converting international telephone exchange differences into common signaling format [AIAA PAPER 70-413] 11 p1997 A70-25407

Communication satellites geostationary orbit sharing problem, considering system design and utilization criteria [AIAA PAPER 70-441] 11 p1998 A70-25419

Communication satellite repeater design requirements to achieve adequate SNR for varying rain and cloud attenuation [AIAA PAPER 70-498] 11 p1998 A70-25425

Power sources, transfer and conditioning subsystems design, fabrication and testing for high power communication satellites [AIAA PAPER 70-433] 11 p2120 A70-25438

Satellite TV broadcast requirements impact on high power transmitter design, permitting low cost terrestrial receiving systems [AIAA PAPER 70-434] 11 p1999 A70-25450

Report on Spectrum Utilization and System Constraints session of Intelsat/IEE International Conference on Digital Satellite Communication, London, November 1969 [AIAA PAPER 70-465] 11 p2002 A70-25486

Book on engineering aspects of MHD power generation, discussing working gas ionization and electrical conductivity, incompressible conducting fluid motion in magnetic field, etc 11 p1982 A70-25525

Automatic control systems synthesis for plants described by incomplete differential equations, measuring controlled value and input derivatives 11 p2023 A70-25610

Structural synthesis of automatic control systems for body motion along trajectory, using inverse method and nonlinear coordinate transformations 11 p2077 A70-25611

Superconductive materials and magnet design, discussing stabilization methods 11 p2097 A70-25613

Control theory, Volume 2, Analysis and design of space vehicle flight control systems 11 p2122 A70-25772

Design criteria for minimizing EMC problems confronting engineers of aircraft electrical and electronic equipment [SAE PAPER 700215] 11 p1980 A70-25887

Air conditioning systems design for turboprop computer and business aircraft [SAE PAPER 700224] 11 p1980 A70-25895

Multidimensional determined automatic control system structure and parameter synthesis by root method 11 p2023 A70-25926

System sciences - Conference, University of Hawaii, January 1970, Part 1 11 p2024 A70-26201

System sciences - Conference, University of Hawaii, January 1970, Part 2 11 p2026 A70-26226

Optimal fixed digital control for handling wide range plant parameters uncertainty involving random disturbances and measurement errors 11 p2026 A70-26248

Concept engineering, individuals and corporations consider aspects and disciplines concerned with public utility, taste and convenience 11 p2153 A70-26257

Systems sciences - Conference, University of Hawaii, January 1969 11 p2027 A70-26301

Optimal linear estimation and control theory application to high precision optical spacecraft tracking systems design 11 p2028 A70-26302

Stochastic control system design methodology noting applications to ASW, law enforcement, document retrieval and autopilots 11 p2029 A70-26336

Automatic test and checkout system difficulties in space vehicles 11 p2032 A70-26338

Thermal control design for diffraction limited large diameter Cassegrainian telescope systems in orbital conditions, using computer and scale model testing 11 p2052 A70-26356

Passive thermal control system design of SERT II nonspinning satellite based on 534-node analytical model calibrated against test data 11 p2127 A70-26358

Biosatellite environmental control coolant loop system design for 30-day mission program, discussing fuel cell power source, cryogenic subsystem, etc 11 p2127 A70-26360

Thick superinsulation system design for long term cryogenic storage using superfloc, radiation shield and spacer material 11 p2150 A70-26367

Processing system for tape recorded signals with nonelectrical varying parameters 11 p2056 A70-26456

Systems engineering study of sensors in fighter aircraft avionics 11 p2081 A70-26501

Soviet book on aircraft AC and DC relay pulse generators, emphasizing controllable frequencies and duty factors and neutral and polarized electromagnetic relays 12 p2194 A70-26874

Multipurpose domestic satellite system design for TV distribution, discussing frequency sharing, synchronous orbit and system model 12 p2183 A70-26998

Quasi-isothermal heat transfer pipe design and operation 12 p2330 A70-27275

Systems theory - Conference, Gainesville, Florida, March 1970 12 p2203 A70-27408

Suboptimal control of discrete input system with bounded state and control variables, developing algorithm for on-line computation 12 p2203 A70-27409

Nonlinear time-varying multivariable adaptive control system design using signal synthesis technique 12 p2203 A70-27415

Computational methods for multiinput linear control systems applied to designing lateral and longitudinal autopilots for jet transports subject to gust loads 12 p2203 A70-27417

Avionics technology cost effectiveness effect on airlines and industry, considering systems engineering and specifications [SAE PAPER 700299] 12 p2335 A70-27447

Continental air traffic control design, discussing systems analysis approach advantages in terms of capacity 12 p2267 A70-27598

Aircraft separation standards in air traffic control system design regarding collision hazards, noting beacon system role 12 p2267 A70-27635

Short distance VHF omirange navigation and distance measuring equipment considered for performance improvements feasibility to meet civil air traffic demands through 1980 12 p2268 A70-27643

Exothermic bimetallic ignition systems /EBIS/ design for solid propellant rocket motors of tactical missiles to reduce shock loadings 12 p2289 A70-27694

Space station design for long duration operation, considering optimum mix of redundancy, maintainability and checkout 12 p2313 A70-27743

Flexible vehicle control, using cybernetic model for system design and response [AIAA PAPER 69-115] 12 p2314 A70-27811

Transpiration-cooled systems design with porous materials, considering mechanical and flow control /permeability/ properties requirements 12 p2256 A70-27822

Second generation radar beacon system for ATC using discrete address roll call 12 p2268 A70-27911

Bendix design approach for lunar vehicle using operating mockup, noting trend towards lighter machines 12 p2208 A70-27945

Statistical design of density tapered planar circular and elliptical arrays for radiation patterns with good sidelobe behavior 12 p2199 A70-27987

Mission oriented or time dependent systems reliability measures definitions in terms of probability 12 p2336 A70-28008

On-line optimization of maintenance and verification schedules for complex system safety insurance 12 p2244 A70-28013

Spaceborne information processing for manned missions, describing layered system with fault tolerance and onboard checkout 13 p2372 A70-28415

Lunar surface mobility systems designs based on terrestrial transporters or mission requirements consideration, comparing capabilities 13 p2384 A70-28416

Equipment specifications and design for creep testing at variable load and temperature under uniaxial tension, emphasizing test environment control 13 p2509 A70-28537

Soviet book on discrete system for measuring multivariable probability distributions, covering automatic acquisition and reduction of statistical data 13 p2381 A70-28700

Wind load aerodynamics effects on launch vehicle flight control systems design [AGARDOGRAPH-115] 13 p2504 A70-28753

Wind effects on rigid launch vehicle guidance and control system design, using model incorporating structural bending and fuel sloshing [AGARDOGRAPH-115] 13 p2448 A70-28755

Azur satellite ground control, describing system organization to measure scientific and data information for entire satellite lifetime 13 p2384 A70-28976

Radioisotope fueled organic Rankine power system with weight dependence on operations depth [AIAA PAPER 70-520] 13 p2349 A70-29037

Optimal control of systems with time transitions described by finite state stationary Markov chain, noting resetting control 13 p2382 A70-29065

Newton-Raphson method analog accelerating convergence of multidimensional stochastic approximation algorithm to local minimum for attitude controller design 13 p2382 A70-29069

Design requirements for solar cells and arrays as function of illumination, orbit, geometry and type of stabilization, space environment, etc 13 p2349 A70-29554

Pattern recognition systems design and applications in medical and photographic data classification 13 p2374 A70-29580

Training algorithms in designing multilevel quasi-optimal controllers for dynamic processes, using pattern recognition methods 13 p2383 A70-29581

Stochastic reinforcement learning model synthesizing control and pattern recognition systems with learning attributes 13 p2374 A70-29584

Multifunctional multimode avionics design integrating communications, navigations and identification subsystems /ICNI/ 13 p2368 A70-29619

MELVIN compact inexpensive multipurpose automatic test system, utilizing MSI single printed circuits to work optimally with computer 13 p2374 A70-29683

Test Equipment for Rapid Automatic Checkout and Evaluation /TRACE/ system, describing method for interfacing computer with peripherals 13 p2374 A70-29685

Asymptotically optimal signal detection algorithms for statistical systems synthesis 13 p2369 A70-29726

Centrifugal pump design optimization, assuming one dimensional throughflow of viscous fluid as driving force 13 p2391 A70-29748

Low density Hall ion thruster with application to Van Allen probe and orbit-to-orbit transfer [AIAA PAPER 69-281] 13 p2475 A70-29957

Meteor observation station design and operation, describing calibration difficulties and reflecting points coordinates determination 14 p2583 A70-30331

Saturn 5 launch vehicle navigation system design, discussing configurations, implementation schemes, system tradeoffs and performance 14 p2613 A70-30453

Operational and environmental factors constraining onboard navigation system design for outer planet flyby missions 14 p2614 A70-30467

Permittivity cell and encapsulation for liquids subjected to high pressures and temperature extremes 14 p2533 A70-30502

He-Cd laser construction with quartz tube manufactured separately, describing flow-through processing 14 p2594 A70-30509

Meteorological parameters measuring instruments optimal design, presenting formalized procedure flow chart and examples 14 p2607 A70-30568

Wind profiles derivation for environmental influence upon missile systems design, limiting bulky input into computer programs 14 p2608 A70-30586

Launch vehicle design, considering tradeoffs between wind effects and analysis time 14 p2653 A70-30589

Multivariable feedback control system, minimizing mean squared error and error sensitivity to random perturbations 14 p2560 A70-30622

Book on automation of mathematical description of controlled plants covering signal generation, information acquisition, statistical disturbance, self adaptive systems, etc 14 p2560 A70-30629

Electronic systems automatic design problems including man machine communication and data organization 14 p2554 A70-30663

Orbital refueling techniques, discussing vapor-liquid interface stability, pressurant requirements, transfer line chilldown, propellant transfer dynamics, dielectrophoresis, suction speed estimating and system tradeoffs [AIAA PAPER 69-564] 14 p2653 A70-30752

Minimum cost systems engineering in aviation equipment maintenance and reliability

14 p2669 A70-30943

Soviet book on multivariable automatic control systems analysis and synthesis covering equations of motion, nonlinearities, pulse control, transient responses, etc

14 p2561 A70-30954

System design for IR imaging radiometer from synchronous altitude satellite, considering spacecraft dynamics, detectors and cooling

14 p2586 A70-30974

Si solar cell configurations for balloons and satellites, discussing critical design constraints for weather balloon power systems

14 p2670 A70-31139

Microwaves in integrated military avionics systems, discussing CNI, ECM, component reliability, etc

14 p2551 A70-31177

High speed dynamic systems synthesis with optimal damping of elastic vibrations, using gradient method

14 p2617 A70-31354

Thermionic diode development for nuclear reactor systems

[ASME PAPER 69-WA/ENER-5]

15 p2773 A70-31959

Nationwide automated ground based air traffic control system for increased flight operations

15 p2772 A70-31962

Mariner spacecraft electro-optically controlled star sensors design and performance, discussing star simulation and stray light test techniques

15 p2736 A70-32033

Ionospheric probe designs and measurement errors due to perturbations by satellite carriers

15 p2731 A70-32094

State transitions and couplings in reliability of complex systems, using logic algebra suitable for computer

15 p2709 A70-32132

Systems approach to flight accident prevention and inquiry management

15 p2674 A70-32207

Learning control systems design, deriving general learning algorithms

15 p2705 A70-32448

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation

15 p2791 A70-32511

Mission analysis in system evolution, determining subtasks sequence to accomplish performance goals

15 p2804 A70-32627

Human element in system development to achieve optimum tradeoffs among reliability, cost and other system criteria

15 p2693 A70-32629

Optimum reliability programs, suggesting simulation to provide cost effectiveness basis for systems design configurations evaluation as alternative to demonstration testing

15 p2831 A70-32631

Reliability factors in design and development staging systems /DDSS/ for military and space exploration programs

15 p2747 A70-32639

Circuits and systems - Conference, Pacific Grove, California, December 1969

16 p2881 A70-33031

Imaging type electro-optical detection systems design for passive night surveillance, building camera system and testing in helicopters and fixed wing aircraft

16 p2903 A70-33127

Airborne electro-optical array system design and performance for particle size measurement

16 p2906 A70-33175

Army missile command /AMICOM/ plasma jet wind tunnel automatic control system design

16 p2888 A70-33303

Desensitized linear servo model following feedback control systems design using specific optimal control concepts

16 p2884 A70-33315

Linear multivariable feedback control systems design method based on transfer matrix, testing decoupling desirability

16 p2884 A70-33318

Output feedback control systems design, considering closed loop system sensitivity to plant parameters based on linear optimal control problem

16 p2885 A70-33324

Aircraft stability augmentation systems design by parameter optimization techniques and feedback selection

16 p2840 A70-33342

Nonlinear digital programming techniques for airplane stability augmentation systems design

16 p2840 A70-33343

Real time recording systems design for increased writing speeds on photochromic films

16 p2910 A70-33435

Target signature concept of spectral, spatial, temporal, and polarization effects to develop electromag-

netic signatures against background, considering remote sensor system design

16 p2910 A70-33437

Fluid power systems computer aided design and optimization, describing modeling and simulation, parameter sensitivity, systems stability, etc

[ASME PAPER 70-DE-44] 16 p2869 A70-33508

Aircraft design, development and production illustrating systems engineering functions, discussing control process model

16 p3004 A70-33676

Lunar Module landing radar system design, discussing antenna and electronics assembly

16 p2865 A70-33681

GaAs injection lasers for optical communication, synthesizing high bit rate data link between synchronous relay satellites

16 p2865 A70-33710

Systems design and instrumentation for chemical/biochemical space manufacturing at zero g, developing scaling laws for transition to larger production units

16 p2919 A70-33719

Design and reliability of digital systems for hard cores of fault tolerant computers /hybrid- redundant systems/, discussing advantages over multiplexed systems

[JPL-TR-32-1490] 16 p2887 A70-33734

Raman spectrochemical system design based on laser radiation as parent source, discussing relay optics and photon counting detector system

16 p2913 A70-33979

Ball in tube nutation damper for spinning satellite, describing design, testing and fabrication techniques for achieving low friction level

16 p2985 A70-34136

SNAP reactor control system mechanisms development for operation in space environment

16 p2951 A70-34163

Coherent digital communication systems optimal design based on unified theory, discussing tradeoffs between error rates, Doppler tracking capability and time and frequency division multiplexing

16 p2866 A70-34258

Nonlinear lumped system synthesis by inverse delta method

16 p2943 A70-34278

Computerized metropolitan air transit system, discussing system redundancy for safety level maintenance and all-weather dependability

17 p3199 A70-34730

Apollo docking system for CSM-LM connection and disconnection during lunar landing mission, discussing flight hardware

17 p3175 A70-34768

Manned planetary flight systems engineering, discussing feasibility, objectives, propulsion, transplanet injection via geospace shuttle station, energy requirements for various synodic modes

[AAS PAPER 70-037] 17 p3155 A70-34778

Cost reduction in designing space shuttle system using reusable winged vehicles, suggesting airlines operations method

[AAS PAPER 70-043] 17 p3175 A70-34785

SST flight efficiency trends, discussing breakthrough and development method and Concorde aerodynamic, propulsion and structural history

[AIAA PAPER 70-871] 17 p3016 A70-34811

Airplane performance improvement by flight control system design, discussing ride quality, flutter margin, maneuver load, etc

[AIAA PAPER 70-875] 17 p3017 A70-34816

Structural weight reduction and increased aerodynamic efficiency in aircraft design by including flight control technology early in configuration development phase

[AIAA PAPER 70-874] 17 p3017 A70-34817

Digital computer technology impact on advanced aircraft design, discussing airborne computers, distributed and lumped computer systems, outer loop control, engine control and system integrity

17 p3049 A70-34993

Spatial filter properties of antennas, discussing system performance optimization and incoherent source transfer functions

17 p3045 A70-35077

Optical and electronic components design for ruby lasers generating giant pulses

17 p3107 A70-35121

Control systems synthesis with parametric invariance for spacecraft boosters

17 p3177 A70-35219

Apollo docking system design considerations and preliminary models evaluation for best choice to meet requirements

17 p3179 A70-35262

Feedback control systems synthesis by three parameter space, using two dimensional graphic techniques

17 p3130 A70-35296

Systems engineering approach to comparison by emphasis for employee performance evaluation

17 p3130 A70-35298

Vibration transducer systems design, using active filter networks to tailor phase and frequency responses

17 p3095 A70-35527

Single input control system design for specified roots using output feedback

17 p3057 A70-35554

Slow scan TV systems for planetary exploration, discussing sampled vidicon operation, digital encoding, data storage, signal to noise ratio, future design trends, etc

[SMPE PREPRINT 106-3] 17 p3095 A70-35634

Systems design experience derived from Mercury Gemini and Apollo projects, discussing thermal protection, launch propulsion, life support, etc

[AIAA PAPER 69-1077] 17 p3180 A70-35644

System engineering process for survival enhancement of military aircraft to meet stringent requirements of general nuclear war

[AIAA PAPER 70-893] 17 p3019 A70-35810

SST electrohydraulic primary and standby brake control systems, discussing design and advantages

[AIAA PAPER 70-913] 17 p3024 A70-35825

Flying qualities criterion for fighter flight control systems design

[AIAA PAPER 70-927] 17 p3020 A70-35837

Engineering systems construction with behavioral elements of biological objects, describing gyromat

18 p3223 A70-36078

Multistage rockets terminal control synthesis based on linear functionals

18 p3333 A70-36163

Flight data recorders and system integration, discussing data replay system backing flight recording

18 p3258 A70-36340

Flight data recording systems for accident investigation and operational purposes, discussing U.S., British and French regulations

18 p3258 A70-36341

Underwater recovery requirements for flight data recorders, suggesting compressed air instead of explosive charges for ejection force

18 p3258 A70-36343

Multiple remote control systems design, emphasizing transmitter and receiver characteristics matching to overall network parameters

18 p3235 A70-36426

Multiple remote control systems effectiveness increased via controlled rectifier as even voltage harmonics generator

18 p3235 A70-36427

Avalanche transit time diode and transferred electron oscillators in microwave systems, discussing design, performance and applications

18 p3232 A70-36675

LSI packaging effects on systems design, discussing physical integration

18 p3232 A70-36761

National air transportation systems approach, emphasizing data acquisition, methodology, planning and policy making

[SAE PAPER 700337] 18 p3237 A70-36796

Aircraft electrical system multiplexing, discussing design features and advantages over conventional hard wired systems

[SAE PAPER 700303] 18 p3216 A70-36811

V/STOL attitude control system as integral propulsion system part, analyzing design and weight tradeoffs

[ASME PAPER 70-GT-31] 18 p3214 A70-36832

Plane and annular cascade facilities data application to aerodynamic design of axial flow compressors

[ASME PAPER 70-GT-106] 18 p3303 A70-36845

Radial compressor diffusers design and technology

[ASME PAPER 70-GT-116] 18 p3304 A70-36850

Control system considerations for small shaft-type aircraft gas turbines providing torque, temperature, load sharing and overspeed limiting functions

[ASME PAPER 70-GT-132] 18 p3304 A70-36858

Fire and overheat detection system design for turbine powered vehicles

[ASME PAPER 70-GT-125] 18 p3260 A70-36891

Quartz magnetometer design to measure horizontal component of geomagnetic field, observing stability of H/zero/ constant

18 p3260 A70-36941

Soviet book on statistical calculation methods for linear and nonlinear automatic aircraft control systems design, using correlation theory of stochastic processes

19 p3463 A70-37403

Merlons amplitude optimal value for open loop part characteristics in control systems design, obtaining global extremum of stipulation numbers

19 p3392 A70-37448

Multiparameter systems with dominant complex roots constrained by degrees of freedom to construct reduced characteristic equation

19 p3392 A70-37824

LSI technology effect on digital circuits and systems designs

19 p3387 A70-37847

Optimization model for evaluating information management systems for handling control functions of long duration space station missions
19 p3532 A70-37851

Management information systems based on Apollo program experience, considering improvements in data accuracy, display, feedback, etc
19 p3553 A70-37862

Simultaneous generation of sensitivity functions for linear automatic control system with known characteristic differential equation
19 p3394 A70-37867

Book on optimization and probability in systems engineering covering mathematical models for reliability, repair, availability, Markov techniques and queueing
19 p3553 A70-37928

Systems reliability numerical prediction
19 p3389 A70-38205

ATC systems safety, capacity and delay, discussing terminal operations, runway capacity and aircraft spacing
19 p3465 A70-38228

Vacuum pump systems properties for space environment simulation installations
19 p3358 A70-38280

Environmental tests and checkout procedures for Azur satellite subsystems and subassemblies integration into flight readiness
19 p3533 A70-38289

Redundant systems reliability under wearout conditions for active and standby units, including failure rates of sensing and switching devices
19 p3438 A70-38597

System design and development of EUROCONTROL Center for optimum upper airspace in Benelux-FRG region
19 p3468 A70-38639

Reliability analysis based on Bayesian subjective probability implemented by stored time sharing computer programs for engineering computations and operation analyses
19 p3441 A70-38818

Thermoelectric generators design for space and remote terrestrial sites, discussing fuel source, conversion section, heat rejection, etc
20 p3563 A70-39225

Helicopter stabilization systems design, synthesizing controllers by modal control theory
[AIAA PAPER 70-1036] 20 p3560 A70-39501

Inertial platform with integral dynamic self test and fault monitoring scheme, describing design and operation
[AIAA PAPER 70-1013] 20 p3667 A70-39520

Sensitivity optimization for linear optimal control systems design, describing aircraft lateral-directional control case study
[AIAA PAPER 70-962] 20 p3600 A70-39567

Nonlinear programming for minimizing inertial guidance systems costs via optimal subsystem selection
20 p3740 A70-39645

Army Missile Command 8000 kw plasma facility automatic control system design
20 p3606 A70-39689

Multidimensional control systems synthesized in accord with polynvariance and coordinating couplings principles
20 p3604 A70-39837

Invariant systems structural synthesis for automatic control of plant motion, deriving control laws for thrust and angle of attack
20 p3670 A70-39844

MHD induction generator design, considering electrical and friction loss measurement and control
20 p3565 A70-39988

Design management by critical element objectives, correlating various engineering functions in production process
[SAWE PAPER 868] 20 p3741 A70-40352

Weight/cost systems engineering, discussing techniques for using historical data banks and standardized reporting procedures
[SAWE PAPER 866] 20 p3741 A70-40368

Monograph on communicating by satellite covering INTELSAT system design, pricing, procurement, broadcasting, international community responsibilities, etc
21 p3955 A70-40739

Digital systems reliability improvement by redundancy at circuit and system levels
21 p3797 A70-40762

Optimal and conventional good control systems relationships, considering open and closed loop characteristics, cost functions, etc
21 p3926 A70-40781

Italian automated ATC system (ATCAS), discussing subsystem functions, display devices, data acquisition, information distribution, etc
21 p3847 A70-40911

Lunar module systems design, describing R and D program and landing mission
21 p3928 A70-40977

Apollo J mission hardware modification for lunar exploration, describing systems engineering role
21 p3928 A70-40979

Reusable space shuttle technology, discussing vehicle configurations, system growth capability, thermal protection, cryogenics, integrated avionics, etc
21 p3929 A70-40985

Life support systems oxygen generation mode selection based on mission parameters, including duration, crew size, resupply, vehicle leakage, etc
21 p3768 A70-40991

Life support water electrolysis system design, discussing alkaline or acid electrolyte selection
21 p3768 A70-40993

Space compatible flight prototype ion engine power conditioning system design for Hg thruster using oxide cathode
21 p3867 A70-41006

Water and alkali metal boilers, predicting helical-flow-promoting inserts effect on pressure drop penalties by constant slip model
21 p3949 A70-41308

Adaptive pattern recognition systems design based on notions of convergence and feedforward interconnection of two systems
21 p3794 A70-41499

Aerospace digital computers impact on aerospace systems design
21 p3794 A70-41685

Aerospace system design, considering use of microprogram-controlled digital computers
21 p3795 A70-41690

SIIS-3 ejection seat escape system design, considering minimum weight, cost and maximum performance
[AIAA PAPER 70-1211] 21 p3751 A70-41808

Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources
[AIAA PAPER 69-848] 21 p3849 A70-41859

Circular and nearly rectangular irises for resonant cavities in transmission line for microwave band stop filters, discussing design based on merit factor
21 p3792 A70-41992

Thermal design of high altitude balloons and instrument packages, analyzing vertical motion dependence on heat transfer and radiation environment
21 p3755 A70-42077

Optimal binary and ternary signal system synthesis by information divergence procedure for communication channels with colored Gaussian noise
22 p3985 A70-42491

Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan power plants
[AIAA PAPER 69-492] 22 p4090 A70-42708

Soviet papers on harmonic linearization method in design of nonlinear automatic control systems
22 p3999 A70-42826

Statistically optimal nonlinear automatic control systems synthesis in presence of random perturbations, using gradient or steepest descent methods
22 p4003 A70-42889

Soviet cybernetics research, emphasizing discrete and continuous control devices and systems synthesis
22 p4004 A70-43449

MIL-STD-882 systems and subsystems and equipment safety requirements related to program management activities
22 p4048 A70-43730

Technology relevance to organizational structure, discussing planning models based on problem solving and performance
23 p4284 A70-43995

Discrete systems with and without time lags, deriving necessary conditions for singular optimal control
23 p4176 A70-44301

Avionics system for fighter aircraft, discussing weapons design, navigation-attack systems integration, etc
23 p4173 A70-44413

Failure reporting, analysis and correcting system for effective management
23 p4200 A70-44745

General Optimization Software Package for Electrical network and system design, noting application to engineering problems and education
23 p4177 A70-44750

Manned space flight regenerative life support systems requirements, considering weight, volume, power, cost effectiveness and integration problems
23 p4156 A70-45023

Image forming performance in photographic system design, considering Cobb chart resolution as figure of merit
24 p4334 A70-45449

Signal flow graphs for selectively invariant autonomous multichannel control systems design
24 p4321 A70-45641

Spacecraft fluid mechanical system design, considering environments, materials, lubrication, zero gravity and inflight maintenance
[SAE PAPER 700781] 24 p4295 A70-45862

Cost/design performance management system, noting cost reduction and avoidance needs during design definition
[SAE PAPER 700772] 24 p4430 A70-45866

Short haul metropolitan air transportation, considering systems engineering as unifying technology
[AIAA PAPER 70-1281] 24 p4373 A70-45927

Gas turbine controller design by inverse Nyquist method compared to conventional multivariable design methods
24 p4396 A70-46157

Papers on plastics, volume 1 covering materials, design, fabrication, applications, etc
24 p4368 A70-46223

SYSTEMS FOR NUCLEAR AUXILIARY POWER

U SNAP

SYSTEMS STABILITY

Algebraic criteria for absolute stability and equilibrium position in nonlinear continuous automatic control systems, using complex gain amplifier substitution
01 p0053 A70-11041

Autonomous functional differential equations with finite time lag using Liapunov functionals, discussing stability and instability
01 p0132 A70-11070

Redundant components optimal quantity determination for maximizing reliability of series system subject to multiple resource restrictions
01 p0104 A70-11383

Periodic motions and integral stability for systems with quasi-cyclic coordinates applied to current carrying conductor oscillations and linear case of Routh equations
01 p0212 A70-11573

Electrical domain instability in homogenous hot electron semiconductors, discussing boundary conditions application to fluctuations
02 p0350 A70-11697

Randomly sampled linear systems stability with linear or nonlinear feedback loops, using stochastic Liapunov function method
02 p0272 A70-12727

Unconditional stability criterion of active two port in scattering and admittance matrix notation equivalent to conjugate matching for maximum power gain with part impedances
02 p0271 A70-12820

Liquid film stability relation to angle of attack oscillations during reentry body deceleration
03 p0406 A70-12939

Optimal redundancy for maximizing systems reliability of mixed series and parallel network consisting of N modules including I module with specified reliability cost function
03 p0585 A70-12995

Cauchy problem of differential equation describing asymptotic nature of conservative system motion resulting from nonperiodic perturbing force
03 p0524 A70-13342

Dead zone initial disturbance of sensitive element dynamic coordinate in two rotor gyrocompass determined using method of averages
03 p0484 A70-13419

Liapunov function for automatic control systems, deriving theorem to ensure stability
03 p0460 A70-13434

Harmonic equilibrium method applied in dynamic properties analysis of autopilot electrohydraulic servomechanisms stability
03 p0415 A70-13930

Energetic stability theorems of dynamical feedback system, removing assumption concerning local square integrability
03 p0460 A70-13971

Hilbert space stability theory over locally compact Abelian groups developed to obtain spectral theory and positivity conditions
03 p0461 A70-14169

Distributed parameter systems with arbitrarily many degrees of freedom, studying conditions for destabilization absence
04 p0767 A70-14483

Resonance oscillations onset by initial conditions in dynamic system described by hyperbolic equation containing independent time lag variable
04 p0718 A70-14485

Natural vibrations damping of holonomic mechanical systems with feedbacks not explicit function of time reduced to optimal stabilization problem
04 p0718 A70-14494

Soviet book on nonsearching gradient self adjusting system for determining error function gradient, using Liapunov method to study stability
04 p0661 A70-14677

Critical load and instability of smooth and mesh surface mechanical systems subjected to impinging fluid jet, noting static buckling and flutter effects
[ASME PAPER 69-WA/APM-10] 04 p0772 A70-14917

Mode patterns and losses for laser resonator with identically tilted spherical rectangular reflectors in stable and unstable configurations
04 p0701 A70-15021

Control system asymptotic stability stabilized by variable structural component applied to critical cases described by multiple zero root equations and imaginary roots
04 p0720 A70-15197

Periodic vibrations of quasi-linear autonomous systems with retardation, deriving sufficient conditions for asymptotic stability

05 p0925 A70-15822

Conjugation principle for control system stabilization based on relation between controlled plant and stabilizing element stability

05 p0824 A70-16851

Stability of conical hydraulic poppet valve with elastic support and inlet and outlet piping

06 p1075 A70-17138

Absolute stability of automatic control systems with multiple rigid and tachometer feedbacks

06 p1024 A70-17812

Space-sampled feedback control of amplifying wave on infinite continuum, discussing system stability

06 p1025 A70-17963

Hyperstability conditions of model reference adaptive control systems, noting applications

06 p1026 A70-17966

Signal stabilization and performance of nonlinear sampled data systems, suggesting oscillations injection at input

06 p1026 A70-17970

Nonlinear control systems stability with stochastic coefficients, applying Liapunov function

06 p1026 A70-17971

Linear optimal stochastic control systems described by covariance matrix correlating errors and estimates of state variables, analyzing instability under parameter variations

[AIAA PAPER 70-36] 06 p1095 A70-18054

Homogenous monoenergetic cylindrical electron beam interaction with homogeneous cold plasma, investigating system stability

06 p1125 A70-18615

Absolute stability ranges of forced motions and damping in nonlinear systems determined by Sturm theorem

07 p1243 A70-18688

Stochastic differential equations for approximate continuous nonlinear minimal variance filtering, discussing existence and uniqueness conditions

07 p1245 A70-19092

Invariance and stability of subsets in metric state-dynamical polysystems

07 p1324 A70-19200

Convergent power series solution for holonomous mechanical systems stability described by ordinary and partial differential equations

07 p1334 A70-19545

Elastic stability theory applied to equilibrium and stability of discrete continuous structural systems, detailing discrete critical points

07 p1408 A70-19560

Stability of three axis indicator gyrostabilizer system consisting of stabilized platform mounted in three degree of freedom Cardan suspension

07 p1288 A70-20179

Adaptive control function technique for lateral stability augmentation system design for manned lifting body entry vehicle

07 p1247 A70-20404

Stability in systems finite over given time interval under permanent perturbations bounded in mean

08 p1543 A70-20490

Quasi-stable linear differential equations systems with nearly periodic coefficients, noting application to equations with zero real portions of matrix characteristic roots

08 p1533 A70-20492

Dynamic discrete systems unsteady motions stability, formulating theorem for finite characteristic numbers existence

08 p1543 A70-20493

Dynamic stability of pendulum-weight system during vertical HF small amplitude vibration of suspension point by averaging method

08 p1543 A70-20494

Optimal control systems design involving time delays as functions of time and system state, considering stability constraints

08 p1478 A70-20779

Automatic control system stability with restricted nonlinearity, investigating lumped and distributed parameter systems and unique and nonunique equilibrium positions

08 p1479 A70-20996

Liapunov vector functions for asymptotically stable omega-periodic solution existence in case of finite dimensional system

08 p1534 A70-21002

Thermomechanical coupling effect on stability of elastic continuous systems subjected to nonconservative forces, reducing flutter load by thermal damping

08 p1589 A70-21245

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions

08 p1546 A70-21629

Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization

08 p1480 A70-21637

Nonlinear stability theory for applying perturbed equations to dynamical system based on Liapunov stability theorem

09 p1727 A70-22612

Double axis gyrostabilizer with auxiliary tracking system of subtracking ring, analyzing system stability and operation

09 p1676 A70-22629

Aeroelasticity problems, discussing unrestrained flexible structures design, nonconservative systems stability, biomechanics, etc

09 p1777 A70-22972

Ordinary differential and algebraic equations correct analog model, noting residual system stability role

09 p1642 A70-22973

Microwave sources power stabilization, control and noise reduction using feedback techniques

09 p1649 A70-23275

Elastic chain systems stability and natural vibrations using parameter coupling method permitting integral equation construction

09 p1784 A70-23596

Stability region of hydraulic system containing centrifugal pump calculated from pressure head dependence on pump inlet pressure

09 p1607 A70-23622

Computer simulation of six degree of freedom motion system and actual system test, substantiating simulation accuracy

[AIAA PAPER 70-358] 10 p1859 A70-24218

Coupled systems stability and oscillatory behavior analysis using Liapunov theory

10 p1855 A70-24763

Thrust follower force stability in pod mounted jet engine and nacelle whirl using multiple degrees of freedom model

10 p1930 A70-25070

Systems instabilities classification criterion determination, showing absolute instability conversion into convective by introducing damping

10 p1969 A70-25104

Stationary regime stability of one dimensional model of optical quantum traveling wave amplifier, determining trapping band of traveling wave laser

10 p1901 A70-25158

Algorithm developed for constructing first approximation system from Cauchy matrix for Liapunov stability problem solution

10 p1917 A70-25302

Nonlinear system with piecewise linear spring characteristic response to stochastic excitation of white noise type process, discussing technical stability

10 p1918 A70-25323

Necessary and sufficient conditions for absolute stability of nonstationary nonlinear system, showing equivalency to asymptotic instability in small position equilibrium piecewise linear systems

11 p2021 A70-25337

Stability of multiconnected nonlinear controlled systems with nonsingle equilibrium position, representing lumped parameter system with characteristic equation having complex roots

11 p2021 A70-25338

Readjustment algorithm for auto-oscillatory adaptive control system with variable structure, using harmonic linearization

11 p2022 A70-25343

Asymptotic stability of multivariable autonomous control systems used Liapunov vector function method

11 p2083 A70-25606

Asymptotic stabilization of multivariable dynamic systems, using subsystem decomposition and Liapunov second method

11 p2023 A70-25607

Scanned beam holography reducing system stability time for hologram production with CW gas laser

11 p2050 A70-25639

Systems identification in parameter estimation to acquire stability properties using integral transforms

11 p2028 A70-26311

Maximum principle least squares (MPLS)/nonlinear filter scheme simplified, using digital simulation for stability and tracking performance

11 p2028 A70-26315

Elastic system stability with two degrees of freedom under action of retarded follower forces

11 p2142 A70-26631

Proportional fluid amplifiers noise and instability sources related to geometry and power jet flow, considering noise reduction methods

12 p2164 A70-27071

Data sampling system compensation based on bending frequency filtering through information obtained by varying sample rate, using saturn 5 launch vehicle simulation

12 p2192 A70-27411

Dynamic systems absolute stability, optimality and passivity algebraic criterion in terms of real even polynomial coefficients

12 p2261 A70-27412

Dynamic stability of multipoint servocontrol system actuating thin deformable primary mirror of orbiting telescope

12 p2203 A70-27413

Lunar roving vehicle stability and agility design approach by Grumman, using articulated steering and conical wheels

12 p2208 A70-27946

Quasi-linear autonomous systems of second order equations, considering periodic solutions asymptotic stability

12 p2273 A70-28193

Admissible controls synthesis for closed loop system/satellite/stability

13 p2500 A70-28410

Nonlinear servo system stability criteria based on plus or minus controlled data theory

13 p2381 A70-28939

Finite time stability of differential equations system using Liapunov functions

13 p2442 A70-29488

Free and forced motion characteristics in absolutely stable nonstationary nonlinear system analysis by variational approach

13 p2453 A70-29716

Material system equations of motion, determining programmed motion variable mass systems stability

13 p2453 A70-29717

Adaptive extremal control systems operational stability, defining optimal convergence coefficient values for identifier and perceptron

14 p2559 A70-30175

Multivariable feedback control system, minimizing mean squared error and error sensitivity to random perturbations

14 p2560 A70-30622

Limit cycle and stability analysis of multivariable nonlinear systems using function decomposition

14 p2560 A70-30624

Popov criterion generalization for asymptotic stability of nonlinear feedback systems

14 p2658 A70-30849

Nonlinear systems absolute stability by graphic methods, noting use of Nichol chart and analog computer

15 p2715 A70-31974

Optimal control theory of asymptotically stable closed systems synthesis regarding product requirements

15 p2716 A70-32473

Stability loss of dynamic two dimensional mechanical elastic system with single degree of freedom under trajectory bifurcation

15 p2775 A70-32474

Nonlinear feedback control systems forced asymptotic stability, using linear transformation of circle criterion

15 p2716 A70-32554

Asymptotic motion stability bound for non-holonomic nonlinear electrodynamic systems, using energy metric algorithm for Liapunov functions generation

15 p2768 A70-32556

Long term storage effects on systems reliability, emphasizing tradeoffs regarding availability, reliability and costs

15 p2712 A70-32637

Parameter plane method of stability analysis applied to spacecraft attitude control system with two nonlinearities related by nonlinear differential equation

16 p2881 A70-33032

Nonlinear systems stabilization with linear system estimator output state to provide feedback for asymptotic stability of overall system

16 p2881 A70-33033

Relay control systems stability bound determination in nonphase variable form, assuming unknown system parameters

16 p2881 A70-33034

Stable adaptive control design for linear time-invariant system with same number of inputs as outputs, considering disturbance effect

16 p2881 A70-33035

Digital computer generation of system stability Liapunov functions for ninth order spacecraft attitude control

16 p2867 A70-33043

Nonlinear discrete systems absolute stability exponential property proved by modified frequency condition, applying analog transformation to Szego-Kalman equations

16 p2882 A70-33044

Criteria for estimating errors in quadratic approximations to asymptotic stability involving Popov condition based on existence of quadratic Liapunov functions

16 p2941 A70-33045

Pontryagin stability criterion interpretation for systems with time delay in parameter plane, using computer oriented method

16 p2882 A70-33046

Distributed sampled-data control systems with memoryless nonlinear feedback element, deriving frequency domain stability criterion

16 p2884 A70-33308

Pulse modulated feedback control system, deriving sufficient condition theorem for input-output stability

16 p2884 A70-33309

Conditionally stable feedback control systems with saturation, comparing large signal stabilization methods

16 p2884 A70-33313

Popov and circle criteria for stability of nonlinear feedback control systems, using parameter plane representation

16 p2884 A70-33314

Stable operating range of supersonic mixed compression inlet increase by air flow removal via throat bleed system

[AIAA PAPER 70-686]

16 p2967 A70-33585

Linear dynamic systems under nonconservative and harmonic forces, examining stability conditions

16 p2952 A70-33896

Potential stability theory for linear and nonlinear systems trajectory

16 p2943 A70-34042

Torsion, filar, flexure and coil type mechanical suspensions for space applications, considering instability due to temperature changes and magnetic, electric and force fields

16 p2924 A70-34169

Linear and nonlinear systems natural frequency and stability determination, using theorems for degenerate systems

16 p2944 A70-34284

Stochastic systems technical stability problem solution by Fokker-Planck equation

16 p2944 A70-34294

Stability theorem for mechanical systems with constraint damping subjected to energy dissipation

17 p3176 A70-34956

Tau-decomposition stability analysis method applied to two degrees of freedom system subjected to retarded follower forces

17 p3176 A70-34957

Equilibria stability of linear discrete dynamic systems involving elastic, nonconservative, dissipative and gyroscopic forces, using Liapunov-type energy method

17 p3129 A70-34958

Gyroscopic drifts associated with angular support motions

17 p3133 A70-34960

Sufficient condition for asymptotic stability of ergodic coefficient linear stochastic systems

17 p3129 A70-34982

Automatic control system stability, allowing for position and velocity loads and compressibility of fluid in force cylinder of hydraulic actuating mechanism

17 p3024 A70-35367

Neural pulse frequency modulation system stability, using feedback control model

17 p3056 A70-35553

Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation

17 p3134 A70-35651

Adaptive control systems stability treatment by Liapunov direct method

18 p3279 A70-36060

Stability conditions for control system third-order differential equations with double nonlinearity, using Liapunov function

18 p3280 A70-36157

Computerized Pontryagin stability analysis of nonlinear multiple delay systems

18 p3235 A70-36477

Pontryagin stability for distributed delay or parameter systems, using Brin criterion

18 p3235 A70-36478

Graphical stability for linear systems in parameter plane with time delay

18 p3235 A70-36479

Linear control systems stability range with delay time examined by digital computer, discussing critical loop gain

18 p3235 A70-36501

Linear continuous feedback control system with dead time compensated by proportional plus integral controller, considering stability region variations

18 p3236 A70-36943

Linear feedback control system with dead time compensated by proportional integral derivative action controller, evaluating stability by digital computer

18 p3236 A70-36944

Lumped parameter pipeline and hydraulic systems stability, deriving equations of motion for closed and open cycle control systems

18 p3216 A70-36946

Modified differential equation for stability of oscillating nonlinear system

19 p3458 A70-37823

Mechanical destabilizing model of nonlinear damping in nonconservative systems with follower forces, using Liapunov method

19 p3542 A70-38065

Multivariable nonlinear systems absolute stability criteria, emphasizing nonzero entry functions

19 p3394 A70-38171

Flutter analysis of n degrees of freedom system, basing stability criteria on energy balance considerations

19 p3542 A70-38244

Continuous one dimensional nonconservative elastic systems under complex forces, examining stability theory

19 p3546 A70-38341

Oscillations of nearly nonlinear systems with conditions for main amplitude equations

19 p3472 A70-38726

Liapunov stability analysis of dynamic systems described by simultaneous ordinary and partial differential equations of motion, applying to satellite spin stabilization

[AIAA PAPER 70-1045]

19 p3472 A70-38860

Dynamic systems stability in sense of Poisson, relating motions commutative and stable families

19 p3472 A70-38936

Linear time-invariant system dependent on small parameter epsilon, deriving conditions for bounded-input bounded-state stability

20 p3657 A70-39395

Three axis large angle attitude control system global analysis, determining system stability, responsiveness and sensitivity to disturbances

[AIAA PAPER 70-996]

20 p3668 A70-39534

Automatic control system stability error analysis, discussing sensitivity and statistical dispersion analysis

[AIAA PAPER 70-985]

20 p3668 A70-39544

Spacecraft pulse width modulated attitude control system stability, using state space method

[AIAA PAPER 70-984]

20 p3714 A70-39545

Automatic control system components parameter variation effects on invariance conditions

20 p3602 A70-39830

Small parameter effects on absolutely invariant systems under transient perturbation, analyzing gyrostabilizer performance

20 p3603 A70-39831

Automatic control systems with signal recovery, determining invariance conditions, main operators and reproduction errors

20 p3603 A70-39833

Multidimensional automatic control systems polyinvariance, describing compensating cross couplings realization

20 p3603 A70-39834

Invariance conditions for inertial gyrostabilizer with powered stabilization system in presence of dynamic imbalance, noting improvement via compensating loop

20 p3670 A70-39846

Automatic stabilization of random noise mathematical expectancy and mean square deviation by feedback control system

20 p3593 A70-39916

Algorithmic random process pseudorandom number generator composed of analog computer elements, evaluating stability

20 p3594 A70-39918

Perturbation theory for nonlinear systems of differential equations

20 p3658 A70-40104

Recursive formulas for stability tests and quadratic loss functions evaluation for linear discrete time dynamical systems

20 p3659 A70-40114

Reliability of redundant repairable systems with preventive maintenance, determining mean time between failures

20 p3638 A70-40181

Feedback control systems stability over range of parameter changes, determining criterion satisfied by loop gain of rated system

21 p3801 A70-40795

Energy methods for stability of linear inflatable pouch actuator based on energy change in pouch deflection

21 p3760 A70-41966

Linear dynamic systems stability under various types of forces

22 p4061 A70-42536

Steady vibrations of mechanical system with asymmetrical restoring force, reviewing formulas for mean angular frequency and Fourier expansion coefficients

22 p4113 A70-42544

Periodic solutions to complex nonlinear automatic control systems with initial deviations, considering system stability and self oscillation conditions

22 p4002 A70-42839

Linear discrete feedback systems uniqueness, existence and stability under various input-output conditions

22 p4004 A70-43024

Amplitude instability in vibration testing systems, noting effects of bandpass filters in feedback loop of amplitude servo

22 p4006 A70-43250

Quasi-linear autonomous systems of second order equations, considering periodic solutions asymptotic stability

22 p4075 A70-43318

Criterion for global asymptotic stability of system with power-law nonlinearity, reducing to Nyquist criterion for linear system cases

22 p4063 A70-43428

Input-output stability of feedback systems, using inverse operator model

22 p4004 A70-43490

Automatic control systems small oscillations suppression by nonlinear correcting elements

22 p4005 A70-43564

Nonlinear differential equation systems overall stability, using qualitative methods

23 p4211 A70-44092

Stability theory for approximate solutions and differential approximations for differential equations in Banach space

23 p4212 A70-44345

Linear algebraic system stability and monotony, investigating plane structures by finite element method

23 p4213 A70-44996

Biological life support systems mass exchange processes analysis based on mathematical models, predicting artificial ecological systems stability

23 p4149 A70-45029

Low noise constant temperature hot-wire anemometer design with second order high-cut filter, determining system stability

23 p4199 A70-45050

Hydraulic servomechanism stability and step response, considering unequal oil volume on either side of jack

24 p4292 A70-45159

Continuous structural systems stability under random load excitation from linear partial differential equations of motion

24 p4421 A70-45281

Laser operation instability with nonlinear filter, deriving electrons differential velocity distribution functions on inhomogeneous emitter

24 p4352 A70-45469

Optimal asymptotic stability laws of control systems with unstable plant, using piecewise coordinate functions

24 p4321 A70-45494

Boundedness theorem for nonlinear Mathieu equation describing motion of parametrically excited system

24 p4380 A70-46042

Necessary and sufficient conditions on coefficients of real nonnegative polynomial $p(\omega)$, obtaining algebraic criterion for stability, optimality and passivity of dynamic linear systems

24 p4322 A70-46156

Nonlinear systems subharmonic oscillations under polyharmonic disturbance and viscous damping

24 p4427 A70-46378

Linear stationary systems rms stability under parametric disturbances by white noise random processes

24 p4427 A70-46379

SYSTOLE

On-line electronic integration of aortic flow during systole to provide beat by beat record of stroke volume

01 p0038 A70-11044

Functional and organic systolic murmur differentiation using phonocardiography test

03 p0420 A70-13478

Phonocardiographic and mechanocardiographic features of patients with nonejection clicks and mid- or late-systolic murmurs

03 p0427 A70-13944

Diastolic and systolic pressure measurement in acute and chronic experiments

09 p1627 A70-23302

Shock waves in unsteady aortic blood flow at systole beginning, considering aortic elastic properties and shock formation distances

11 p1992 A70-26479

Periodic high temperature effects on human systolic phase dynamics

12 p2174 A70-28359

Indirect serial determination of left ventricular systolic ejection time changes in human patients with acute transmural and nontransmural myocardial infarctions

23 p4144 A70-43946

Human left ventricle shape and movements during systolic contraction, using cineangiography and cineradiography of epicardial markers

24 p4302 A70-46076

Human atrial systole timing influence on mitral valve closure and on first renewed heart sound following blockage

24 p4302 A70-46077

SYSTOLIC PRESSURE

Frequency and postextrasystolic potentiations in guinea pig isolated auricles and dog heart in vitro and in situ, noting myocardial diagnostic use

02 p0235 A70-12088

Intact femoral artery pressure-diameter relationship in man, discussing noradrenaline infusions effects

18 p3222 A70-37222

Hemodynamic effect of lidocaine given by infusion and bolus injections in myocardial infarction, examining cardiac output, heart rate, systolic left ventricular and aortic pressures

19 p3366 A70-38575

Conscious rat systolic blood pressure measurement, using arterial pulse wave detection to occluding cuff by photoconductive cell

24 p4309 A70-46213

T

T SHAPE

Fatigue strength of T-shaped blade roots of steam turbine regulating stages subjected to combined static tension and cyclic bending

05 p0954 A70-17060

Stainless steel sheet-to-plate tee joint resistance welded by Magnetic Force Upset Welding process, testing performance

21 p3832 A70-40792

T TAIL SURFACES

Flutter investigation on model designed and constructed for tail unit of HFB 320 Hansa jet aircraft, discussing classical and statistical methods

04 p0775 A70-15180

Interference kernel discontinuities in integral equations relating amplitude of angle of attack and pressure distribution on T tail harmonically oscillating in subsonic flow

07 p1416 A70-20210

Empennage loads on T tail transport determined for combined vertical and lateral gust loads using real time analog-digital computer simulation

12 p2160 A70-27113

T TAURI STARS

Free-bound and free-free continuous emission of hydrogen near Balmer jump in T Tauri star AS209

03 p0566 A70-13315

T tauri star mass loss, observing variations in spectral emission line widths

22 p4101 A70-42858

Circumstellar dust cloud model of spectral distribution and anomalous excess emissions in IR T Tauri and red giant stars coincident with photometric measurements

23 p4239 A70-43868

T-33 AIRCRAFT

Kalman filtering and differential correction techniques applied to T-33 flight test data for aircraft system parameters identification

11 p1982 A70-26323

T-56 ENGINE

Structural design of boron/epoxy front housing for T-56 turboprop reduction gear case achieving reduced weight and increased stiffness [SAE PAPER 690666]

05 p0853 A70-15837

T-63 ENGINE

T-63 gas turbine engine air induction system protection for OH-58A light observation helicopter against debris with minimum power loss and intake air distortion

01 p0164 A70-10681

Sand and dust environmental test of T-63 regenerative engine, discussing performance depreciation, recuperator inspection and comparison with non-regenerative t63-a-5a engine

01 p0164 A70-10685

TABLES [DATA]

NT MATHEMATICAL TABLES

Worldwide data inventory of rock features associated with meteorite impact structures, including photomicrographs of petrographic features

01 p0069 A70-10223

Red subluminescent stars and high UV excess stars in region between main sequence and white dwarfs, tabulating observations of stellar color and magnitude

01 p0182 A70-10795

Comet observations analysis, tabulating total head magnitude, photometric parameters, nucleus magnitude, coma diameter, tail type and direction and magnitude correlation with solar activity

01 p0184 A70-10954

Photometric data for white dwarf low luminosity stars listed in color classes and proper motion fields

01 p0187 A70-11331

Quasars radio emission tabulated, showing quasar B264 as member of galactic cluster

02 p0372 A70-12244

Sudden comet brightness changes leading to discovery, tabulating and graphing comet discoveries

02 p0373 A70-12372

Time lag of commencement of PCA effect behind occurrence of Y-shaped phase of solar flares, tabulating data for several flares and particle effects

02 p0358 A70-12373

Venus photographs taken by 82-inch telescope /1950-1956/, tabulating data

02 p0378 A70-12556

Frequency equation for flexural vibration of simply supported beam, considering tabular procedure for cantilever beam

03 p0602 A70-14330

Pencil beam survey of radio sources at 178 MHz, with tabulated flux densities compared to 4C interferometer data

04 p0757 A70-15693

Tabular results of Galaxy mean and angular diameters and smallest/largest ratios measured on Palomar Atlas

05 p0906 A70-15797

Meteor rate data tabulated from controlled parameter radar survey of Southern Hemisphere activity, noting diurnal and annual variations

05 p0907 A70-16001

Natural vibrational frequencies of trapezoidal, triangular, circular and elliptical isotropic flat plates with different edge conditions tabulated

05 p0936 A70-16319

Chrysotile-type asbestos reinforcing fiber properties and applications, tabulating asbestos fiber types for commercial reinforced plastics

05 p0873 A70-16607

Graphite yarn, cloth and fiber composites physical properties tabulated, discussing multiply laminates for graphite-epoxy composites

05 p0873 A70-16610

Tabulated corrections of data concerning reduction of photographs of small planets obtained at Bucharest Astronomical Observatory

06 p1139 A70-17549

Solar X-ray flux from Explorer 33 and 35 observations, presenting catalog of tabular and graphical data

06 p1135 A70-18006

Chemical composition of scale formation in jet engine injectors for various fuel types tabulated, noting buildup levels in transport aircraft and subsonic jets

07 p1362 A70-18651

Perceived aircraft noise level based on objective acoustic measurements related to subjective response, tabulating noys as function of sound pressure

07 p1190 A70-18803

Fluids for aerospace power technology, tabulating properties of hydraulic, damper and heat transfer fluids, fuels, oils, etc

07 p1316 A70-18807

Catalog of lunar features brightness interpreted in terms of photometric function uniformity of lunar surface, considering second order light scattering

07 p1377 A70-18971

Light intensity and polarization in twilight sky atmosphere at solar depressions

07 p1263 A70-19047

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

07 p1268 A70-19460

Group 4A difluorides vaporization thermodynamics and bond dissociation energies, tabulating mass spectra, vapor composition, reaction enthalpies, heats of polymerization and thermodynamic functions

07 p1319 A70-19889

Thermal conductivities and total emittance of Ta, W, Re and alloys at high temperatures compared with NBS values

07 p1313 A70-19894

Radiation Shielding Information Center computer code library for radiation transport or shielding calculations, listing programs available

07 p1239 A70-20364

Moon perigees and apogees for years 1-3000, tabulating parameters for calculations

08 p1568 A70-20635

Ti I spectrum oscillator strengths, determining formula for relative-absolute values transition

08 p1569 A70-20832

Catalog systems orientation based on major and minor planets observation, discussing zero points corrections

08 p1574 A70-21152

Double and multiple stars components magnitude differences tabulated based on visual and photometric observations

08 p1574 A70-21163

Ilyushin 62 aircraft geometry, propulsion, structure, onboard equipment and performance

08 p1436 A70-21365

Soviet helicopter and aircraft engines characteristics covering designer, power, rpm limits, fuel consumption, weight, geometry and applications

08 p1559 A70-21366

Cambridge one mile radio telescope observations of weak sources, extending radio source luminosity function and tabulating, graphing and mapping results

08 p1578 A70-21546

Long baseline interferometer observations of radio sources for size determination, tabulating measured fringe visibility

08 p1578 A70-21547

U.S. cryogenic refrigerators specifications in tabular form

09 p1655 A70-22291

Computer program for generating tables to calculate lunar libration at any epoch

09 p1752 A70-22313

H-function integrals for noncoherent isotropic scattering for two level atom, tabulating numerical values for Lorentz scattering profile

09 p1727 A70-22506

Planet Saturn right ascensions tabulation /1967, 1968/

09 p1756 A70-22651

Integrated lunar disk wavelength dependence of polarization using photoelectric polarimeter, tabulating results

09 p1759 A70-22910

Oxygen pressure, volume and temperature data and derived thermodynamic properties presented in tabular form

09 p1788 A70-22956

Radial velocities tabulated for late B-type north and south of equator listed in Catalog of Bright Stars

09 p1763 A70-23452

Bibliography of literature on bioengineering, biocontrol, medical physics, biotechnology, safety and human factors in technology

09 p1629 A70-23692

Solar radio observations tabulated for radioelectric flux density and behavior for three hour periods, average diurnal results, etc

10 p1940 A70-24414

Monograph on adhesive materials covering selection criteria tables, mechanical properties, specifications, surface preparation and joint strength

10 p1908 A70-25225

Commercial aviation gasolines inspection data tabulated and compared for 1969 and 1964 [SAE PAPER 700228]

11 p2099 A70-25897

Air pressure, air density and gravity tables, including corrections for mercury barometer measurements

12 p2222 A70-27008

Microwaves reflection, absorption and thermal emission at smooth air-water interface, tabulating calculated coefficients

12 p2183 A70-27169

Long period comets energy change due to planetary perturbations tabulated, obtaining orbital major axes before and after passage

13 p2489 A70-28906

Galactic X ray stars and X ray sources positions, appearance frequency and intensities

13 p2495 A70-29818

Table of Fraunhofer solar lines without Zeeman splitting

13 p2496 A70-29843

Earth frequency sounding based on geomagnetic field variations spherical analysis, tabulating nonconducting shell thickness, nucleus resistivity, etc

14 p2572 A70-30243

Gaseous monoxides dissociation energies and free energy functions tabulation for calculating partial pressures

14 p2545 A70-30902

Tabulation of minor planets positions observed by photographic equatorial at Bordeaux observatory

14 p2649 A70-31124

Tabulations of minor planets positions photographed at Besancon observatory

14 p2649 A70-31125

Loaded resonant circular loop radiation field patterns table, determining load impedance for antenna design

16 p2872 A70-32971

Thermal radiation configuration factors tables giving reference sources, discussing historical development of factors

16 p3002 A70-33947

Martian blue clearing during 1967 apparition photographic observational patrol tabulated and summarized

16 p2979 A70-34035

High velocity neutral hydrogen cloud observations, presenting tabulated characteristics and maps

17 p3170 A70-35439

Flux emissivity tables for water vapor, carbon dioxide and ozone based on wavelength dependent absorption coefficients and flux transmissivities

17 p3081 A70-35927

W-3 percent Re-W-25 percent Re thermocouple reliability and stability, describing emf vs temperature table in 0-2400 C range

18 p3257 A70-36200

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

18 p3250 A70-36934

Lunar limb tabular position angles accuracy, discussing Watt charts used for star occultation examination

18 p3321 A70-37124

Apollo 11 and 12 results tabulated for soil packing characteristics, composition and rare gas analysis data

18 p3332 A70-37223

Uranus and Mars satellite relative measures, tabulating observations

19 p3516 A70-37932

Tables on thermal radiative properties of heated air covering absorption coefficients for wide range of photon energies and temperatures

19 p3552 A70-38009

German book on functional theory, Volume 6, tabulating theta and elliptic functions for application to applied physics, potential theory, fluid dynamics and oscillation theory

19 p3459 A70-38600

- Orbital elements of photographic meteors brighter than first magnitude, tabulating dates, solar longitudes, corrected radiants, velocities, major axis, etc
19 p3526 A70-38787
- Wind motions from meteor trails observation during IQSY, tabulating amplitudes and phases of constant, diurnal, semidiurnal and 8-hr components
19 p3526 A70-38788
- Visual binary stars orbits computation catalog from data obtained in 1939-1969 period
19 p3530 A70-38895
- Solar flares catalog with patrol time given on graphs, tabulating principal characteristics
20 p3588 A70-39467
- Be production, development, potential uses and properties
[ASM PAPER GG8-102] 20 p3650 A70-39970
- Supernova remnants catalog based on radio surface brightness, deriving galactic distribution and testing theories for nonthermal radio sources evolution
20 p3709 A70-40077
- Numerical methods, FORTRAN program and table form for complex integrals evaluation along unit circle in positive direction
20 p3605 A70-40120
- Millimeter waves atmospheric attenuation vs frequency and altitude due to oxygen absorption, tabulating for graphical and seasonal model atmospheres
20 p3588 A70-40302
- OSO far UV solar spectroheliograms atlas, describing instrumentation, data acquisition, etc
20 p3713 A70-40540
- Textolite and fiberglass-reinforced plastics relaxation parameters tabulation for viscoelasticity boundary value problems solution
21 p3842 A70-40650
- Oxygen-kerosene fuel combustion products thermodynamic properties, tabulating computed values
21 p3865 A70-41771
- Stellar polarization measurements in Magellanic Clouds, tabulating position, magnitude, spectral type, percentage polarization and electric vector position angle
21 p3922 A70-41979
- Unidimensional composite materials nonstructural applications, tabulating characteristics
21 p3840 A70-42148
- Critical values tables for Wilcoxon rank sum test in randomized blocks
22 p4064 A70-43729
- Lunar craters size-frequency distributions from photographic analysis, tabulating results
23 p4247 A70-44770
- Earth frequency sounding based on geomagnetic field variations spherical analysis, tabulating nonconducting shell thickness, nucleus resistivity, etc
24 p4332 A70-46318
- G8, IV subdwarf 31 Aql spectrum at 4000-6600 Å, discussing Ba II 4554 Å, G and CN bands and spectral lines
24 p4414 A70-46329
- Neutral hydrogen 21 cm line profiles in galactic plane, tabulating terminal positive velocity and brightness temperatures
24 p4414 A70-46381
- TABS [CONTROL SURFACES]**
- Nonlinear balance mass solutions for tab-aileron flutter free operation of jet trainer for arbitrary store configuration
17 p3185 A70-34923
- Hovercraft wind directional stability and control by cam operated fin-tab assembly
19 p3357 A70-38942
- Fin slots and tabs effect on dynamic stability characteristics of low drag bomb, discussing free rolling and pitching tests
21 p3747 A70-41880
- TACAN**
- Self contained and ground referenced radio systems combination for tactical air navigation, including Loran D and hybrid Loran /HYLO/
04 p0716 A70-14628
- Tacan navigation system developments for accuracy and reliability improvements, data transmission, tie-in with airborne computers, etc
07 p1331 A70-19621
- Sector Tactical Air Navigation System to supply on-board information on bearings, slant range and elevation and computer input signals
09 p1720 A70-22491
- Sector-TACAN /SETAC/ system suitable for mobile approach and landing aid due to high accuracy and small dimensions
09 p1721 A70-22663
- Harrier communications and radio navigation aid VLF/UHF and TAC/VHF equipment
10 p1841 A70-24849
- Computerized aircraft navigation utilizing Doppler dead reckoning system and Tacan integration with least square adjustment method
13 p2447 A70-28550
- Pilot landing aids for increasing air traffic, discussing Integrated Communication Navigation Identification
13 p2449 A70-29053

Lx band characteristics and utilization, describing evolutionary systems based on TACAN and IFF
16 p2948 A70-33452

TACHISTOSCOPES

- Rhesus monkeys impaired discrimination in recognizing tachistoscopically presented objects following cortical polarization
05 p0802 A70-16625
- Perceptual tuning in tachistoscopic identification task with alternatives provided after or before and after stimulus
11 p1986 A70-25829

TACHOMETERS

- Multiplying digital device for measuring motor speed, torque and power, discussing optional applications and design
02 p0297 A70-12076
- Magnetic recording in airborne systems, discussing printed motor-optical tachometer design for transport accuracy and ferrite spin-alloy heads
21 p3829 A70-41921
- Multipurpose transistorized tachometer for rotating body speed measurement, control and recording, using electronic integrator and magnet pickup
21 p3831 A70-42245

TACHYCARDIA

- Artificially induced heart rate changes effect on atrial circumference and pressure in anesthetized cats, showing increase with tachycardia and bradycardia
01 p0017 A70-10473
- Dogs coronary vasodilator responses to hypoxia and induced tachycardia before and after lidoflazine and adenosine
02 p0230 A70-11702
- Arrhythmia resembling atrial flutter simulated in dogs by coronary sinus and left atrial pacing and in man by coronary sinus pacing
02 p0240 A70-12696
- Human heart chronotropic reactions during centrifuge acceleration tests up to tolerance limit, establishing sinus tachycardia in various degrees
05 p0804 A70-17120
- Wolff-Parkinson and White syndrome applicability in aeromedical appraisal for aircrew selection, noting effects of paroxysmal tachycardia
17 p3040 A70-35916
- Multifocal atrial tachycardia, discussing arrhythmia progression to atrial fibrillation and association with acute and chronic diseases
21 p3761 A70-41134

TACHYONS

- Faster-than-light particles impossibility in causal loops using nonquantum special relativity framework, considering tachyons
24 p4378 A70-45424

TACTICAL AIR NAVIGATION**U TACAN****TACTICS**

- Harrier aircraft operation in Marine Corps for fast reaction close support based near maneuver units
[SAE PAPER 700835] 24 p4290 A70-45887
- TACTILE DISCRIMINATION**
- Tactile control in man machine systems using feed-forward loops to provide rate information, noting unmanned aircraft and machine-tool applications
[ASME PAPER 69-WA/BHF-14] 04 p0642 A70-14855

Cortical induction phases estimated by retinal mobility index concerning activity of acoustic, olfactory and cutaneous analysors
08 p1443 A70-20735

Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on lumen of temporal ordering of sensory events in haptic space
13 p2354 A70-29596

Auditory and cutaneous sound localization acuity
13 p2354 A70-29597

Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements
13 p2354 A70-29598

Compensatory tracking task with tactile displays determining gains and body locations by describing function and error power analyses
13 p2354 A70-29599

TACTILE SENSATION**U TOUCH****TAGGING****U MARKING****TAIL ASSEMBLIES****NT SWING TAIL ASSEMBLIES**

Flutter investigation on model designed and constructed for tail unit of HFB 320 Hansa jet aircraft, discussing classical and statistical methods
04 p0775 A70-15180

Helicopter tail rotors aerodynamic characteristics, using statistical methods for planning experiments and interpreting results
05 p0793 A70-15900

High speed helicopter with fixed wings and longitudinal axis tail rotor
05 p0794 A70-16349

Drag reduction on blunt-based body of revolution with boat-tailed afterbodies in low speed flow
05 p0790 A70-16501

Tail screens and spoiler rings aerodynamic braking effect in hypersonic range, discussing separated boundary layer periodic unsteady flow
06 p0965 A70-17247

Composite tail rotor driveshaft for next generation helicopter, discussing materials, fabrication and tests
[AHS PREPRINT 451] 17 p3100 A70-34703

Boeing 2707 SST horizontal tail multiple channel actuation system features
17 p3020 A70-35827

Aft tail and canard configurations trim drag considerations for maneuvering aircraft
[AIAA PAPER 70-932] 17 p3021 A70-35842

Fenestron shrouded tail rotor for SA 341 Gazelle helicopter eliminating ground contact during approach and landing
23 p4140 A70-44322

Main rotor wake adverse effects on tail rotor directional control in low velocity wind
23 p4140 A70-44323

Tail rotor thrust increase for yaw control via increased blade area, higher tip speeds and cambered airfoils
23 p4140 A70-44324

TAIL MOUNTINGS**U TAIL ASSEMBLIES****TAIL PLANES****U HORIZONTAL TAIL SURFACES****TAIL SURFACES****NT HORIZONTAL TAIL SURFACES****NT T TAIL SURFACES****TAILLESS AIRCRAFT****NT AVRO 707 AIRCRAFT****NT F-106 AIRCRAFT****NT VULCAN AIRCRAFT**

Tailless delta Avro Vulcan aircraft design, hardware and flight results
14 p2532 A70-31391

TAILS [ASSEMBLIES]**U TAIL ASSEMBLIES****TAKEOFF****NT VERTICAL TAKEOFF**

Optimal operational control of aircraft takeoff and landing times using stochastic programming
11 p2077 A70-25608

Longer runways for increased airport safety indicated from data concerning overruns, undershoots and veering, discussing certification testing during takeoff and landing
12 p2208 A70-27994

Pilot disorientation in dark night takeoff accident type, presenting illusory angular displacement of vertical, flight paths and sequential accelerations
13 p2359 A70-29441

Boeing 747 pilot transition training, discussing takeoff, landing, eyelevel, flareout taxi speeds, inertial navigation and electrical, fuel and hydraulic systems
20 p3562 A70-40083

Ground Effect Takeoff and Landing /GETOL/ aircraft, evaluating engine absorption capability of air cushion landing gear in touch-down condition
22 p3961 A70-42282

Aircraft longitudinal motion during takeoff and landing due to loss of lift after boundary layer control system failure
24 p4372 A70-45448

TAKEOFF RUNS

Transport aircraft takeoff length reduction by applying various runway inclinations with respect to takeoff accelerations
02 p0275 A70-12223

Accelerate-stop distance problem in takeoff refusal due to critical engine failure, emphasizing runway limited length hazards
08 p1436 A70-21270

Integrated glide path localizer system for landing, takeoff and enroute guidance through rugged country, minimizing spurious reflection, required information bits, etc
09 p1720 A70-22222

Takeoff noise minimization by prescribing optimum takeoff trajectories, considering aircraft parameters influencing noise intensity at takeoff
11 p1979 A70-25814

Pitch and Coriolis illusions effects on pilot pitch angle adjustment in simulated takeoff
15 p2689 A70-31885

Pilots brake-takeoff decision at critical engine failure speed, discussing operational aspects of accelerate-stop criteria
15 p2675 A70-32219

Aircraft landing and takeoff difficulties and dangers due to mud and water on runways, discussing coping methods
17 p3057 A70-34692

Optimal longitudinal takeoff trajectories, formulating obstacle clearance criterion function based on aircraft design parameters effects
[AIAA PAPER 70-963] 20 p3560 A70-39566

Commercial STOL aircraft takeoff and landing physical parameters relationships based on wind tunnel and flight tests
[AIAA PAPER 70-1238] 24 p4292 A70-45959

TAKEOFF SYSTEMS**U AIRCRAFT LAUNCHING DEVICES**

TALKING
 NT WORDS [LANGUAGE]

TALOS MISSILE
 Electromagnetic interference (EMI) effects on TALOS missile guidance receiver by expanding computer simulation test results 14 p2655 A70-31345

TANDEM ROTOR HELICOPTERS
 NT CH-46 HELICOPTER
 NT CH-47 HELICOPTER

TANDEM WING AIRCRAFT
 NT X-22A AIRCRAFT
 Flexible flight vehicles longitudinal stability with tandem lifting surfaces, studying aerodynamic time delay effects by root locus technique 03 p0408 A70-13802
 German monograph on oscillations of tandem wing without outgoing wake in plane incompressible flow, using numerical computations 17 p3011 A70-35372

TANGENTS
 Aircraft wing ribs tangents plotting procedure using Monge diagram 08 p1507 A70-21197
 Analytical algorithm for tan-chord angle tangent determination, assuming undevelopable ruled wing surface defined by three cross sections 10 p1802 A70-24292
 Spacecraft principal inertial axis orientation estimation, comparing tangent 2 theta method with eigenvalue solution [SAWE PAPER 847] 20 p3660 A70-40361

TANK GEOMETRY
 Computerized calculations for cylindrical tank bottoms with outlet based on strength analysis, using zero moment theory for surface stability under uniform pressure 05 p0946 A70-16957
 Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects [AIAA PAPER 69-1004] 09 p1657 A70-23255
 Spontaneous ignition temperature as function of surface-to-volume ratio in static systems for fuels 11 p2151 A70-26384
 Viscosity and vessel geometry effects on fluids natural and forced oscillation, taking surface tension into account 20 p3614 A70-40438
 Principle pressure vector components for liquid in moving V-shaped and U-shaped cross section tanks 23 p4180 A70-44164

TANKS [CONTAINERS]
 NT CYLINDRICAL TANKS
 NT FUEL TANKS
 NT PROPELLANT TANKS
 NT SPHERICAL TANKS
 NT STORAGE TANKS
 NT WING TANKS
 Computerized calculations for cylindrical tank bottoms with outlet based on strength analysis, using zero moment theory for surface stability under uniform pressure 05 p0946 A70-16957
 Automatic control for filling tanks with stably stratified liquids using analog mixture valve and digital metering pump methods 06 p1062 A70-17617
 Sizing and design of large vessels of fiberglass reinforced composites based on minimum cost 07 p1409 A70-19757
 Electrostatic ignition discharge prevention on fiberglass reinforced depot tanks, noting ground connection safeguard 07 p1295 A70-19763
 Vortex generation in water tank, discussing velocity distribution on free surface and critical depth of air entrainment for various Reynolds numbers 14 p2567 A70-31275

TANTALUM
 Aluminum oxide solid state reaction with Ta at high temperatures using chemical analysis 03 p0511 A70-13487
 High temperature effects on mechanical properties of recrystallized Ta relating strength, hardness and yield point 04 p0707 A70-15267
 Threshold oxygen concentration for corrosion determined for Ta specimens subjected to low pressure contamination in NaK 04 p0709 A70-15628
 Hall voltage measurements on Ta thin films using square wave generator current, discussing parasitic effects and suppression possibilities 05 p0863 A70-16366
 Dislocations and interstitial atoms interactions in Ta, investigating internal friction and deformation resistance and rate dependence on temperature 07 p1309 A70-19637
 Tantalum mechanical properties dependence during deformation on temperature and strain rate irregularities, discussing serrated yielding 10 p1904 A70-24386
 Tantalum RF sputtered superconducting films structure and properties at various substrate temperatures,

observing bcc, fcc and amorphous phases by electron microscopy 12 p2288 A70-27876
 Ta solid solution hardening by nitrogen and oxygen, noting yield stress variation with interstitial gas concentration 13 p2434 A70-29084
 Hydrogen impurities anelastic relaxation effect on internal friction alpha peak in cold worked tantalum and niobium 13 p2435 A70-29350
 Ta thin film integrated circuit technology including resistor and capacitor elements, conductors, crossovers, etc 14 p2625 A70-30284
 Tantalum single crystals elastic constants temperature dependence, considering compressibility and shear properties 14 p2596 A70-30841
 Dislocation distribution in Ta foil following yield point fatigue testing, using thin film electron microscopy 15 p2761 A70-32385
 Ta oxygen concentration effects on corrosion resistance to NaK in SNAP 8 boilers 16 p2932 A70-34202
 Pure Fe and Ta hot hardness using ultrahigh temperature hardness tester 17 p3124 A70-34659
 Adherent Ta films deposition onto Teflon disks by sputtering 18 p3264 A70-37098
 Ta single crystal inherent lattice and interstitial solution hardening, discussing impurity doping effect on flow stress thermal component 21 p3839 A70-40902
 Pure Fe and Ta hot hardness tests by ultrahigh temperature tester involving use of electron microscope 21 p3840 A70-41900
 High speed photoelectric pyrometry of Ta heat capacity at high temperatures induced by pulse heating 23 p4207 A70-44441
 Ta spectral emissivity, using ratio of specimen surface and black body spectral radiant intensities 23 p4207 A70-44447
 Thermal decomposition of freeze dried Ta and mixed lithium-niobium oxalate, using surface area and electron micrographs 24 p4363 A70-46212
 Oxygen and nitrogen adsorption on thin tantalum films, measuring pressure, electrical resistivity and temperature 24 p4363 A70-46219

TANTALUM ALLOYS
 Tantalum base alloy T-111 creep tests in vacuum at elevated temperature suggesting diffusion controlled microcreep mechanism 01 p0120 A70-10738
 Structural design and fabrication of load bearing Ta alloy radiation cooled eleven control surface for high L/D hypersonic flight vehicle 02 p0306 A70-11941
 Stress concentration effect on mechanical properties of Ti-Ta alloys at low temperatures, showing insensitivity to notch and suitability for cryogenics 05 p0864 A70-16869
 Thermal diffusivity measurements for Ta-W, Ta-W-Hf, Hf-Ta-Mo alloys using pulse technique 07 p1305 A70-18960
 Carbide layer formation on Ta and Ta-W alloys, discussing Ta-C phase diagram and phases 07 p1320 A70-19892
 Ordered Ni8Ta phase in nickel-rich binary alloy using electron microscopy and diffraction analysis 09 p1705 A70-22808
 Cleavage fracture of Ta-Mo bcc alloys, investigating short range ordering and size effects by X ray diffraction 09 p1708 A70-23573
 Phase diagram of Ti-Ta-Cr system, plotting isothermal and polythermal sections by microstructural and X ray analysis 09 p1709 A70-23787
 Phase diagram of Ti-Ta-V system, determining solubility of sigma Ta and V in alpha and beta Ti in solid solutions 09 p1709 A70-23788
 Tantalum solubility in alpha titanium and Ti-Ta system physicochemical properties using metallographic, X ray, hardness and resistance analysis 10 p1903 A70-23864
 Ultrahigh vacuum creep rate measurements with continuously increasing loads on Ta-base alloy, relating creep life with temperature and stress rate 17 p3122 A70-34552
 Nb-Ta and Nb-Mo alloys single crystal solid solution strengthening as function of composition, temperature and strain rate 20 p3646 A70-39105
 Annealing temperature effect on creep rupture strength of Ta-W-Hf alloy 22 p4054 A70-42741
 Chemical composition effects on heat resistance, elastic properties and density of Ti-Ta alloys 24 p4360 A70-45830

Solid solution hardening of single crystal Ta base alloys, measuring critical shear stress at various temperatures 24 p4365 A70-46370

TANTALUM CARBIDES
 Strain field association with random TaC precipitate particles in austenitic stainless steel shown by electron microscope 01 p0123 A70-11242

TANTALUM COMPOUNDS
 NT TANTALUM CARBIDES
 NT TANTALUM OXIDES
 Free energies of formation determined for tantalum silicides from EMF measurements on cells with solid thoria-ytria electrolytes 01 p0041 A70-10084
 Optical phonons in mixed sodium potassium tantalate crystals as function of temperature and composition, using IR and Raman spectra 03 p0542 A70-14002

TANTALUM OXIDES
 Tantalum oxide thin films electro-optical effects due to refractivity changes 19 p3488 A70-38203

TAPE MERGING
 U DATA PROCESSING
 U MAGNETIC TAPES

TAPE RECORDERS
 Bit-slippage errors due to onboard tape recording of PCM/FM telemetry data for Apollo Telescope Mount, noting roles of S/N ratio, data characteristics, etc 01 p0044 A70-10940
 On-line system transmitting experimental data from optical spectrometer to central computing facility for magnetic tape recording 05 p0818 A70-16846
 Simultaneous high speed shock tunnel data acquisition system using single tape recorder, analog or digital readout and computerized reduction 06 p1031 A70-18604
 Tape recorder performance characteristics relevant to signal types handled, considering phase response and envelope delay 09 p1679 A70-22975
 Solar radio bursts dynamic spectra by magnetic tape recording of digital signal, obtaining frequency and time profiles and intensity layers 10 p1934 A70-25276
 Processing system for tape recorded signals with nonelectrical varying parameters 11 p2056 A70-26456
 Statistical classifier for analyzing tape recorded transients 11 p2056 A70-26457
 Linear superposition (LSP) of isolated pulses in tape recording, discussing validity for multitbit waveform synthesis 11 p2057 A70-26627
 Airborne data acquisition on high density computer tape for aircraft handling and flight dynamics research 17 p3049 A70-35499
 Magnetic tape recorder for panoramic vertical ionospheric sounding data acquisition in digital form 18 p3261 A70-37041
 Magnetic recording in airborne systems, discussing printed motor-optical tachometer design for transport accuracy and ferrite spin-alloy heads 21 p3829 A70-41921

TAPER
 U TAPERING

TAPERED COLUMNS
 Contour notch position effects on stress concentration in taper section of dumbbell shafts, using photoelastic shaft models and cyclic tests 13 p2517 A70-29750

TAPERED WINGS
 U SWEPT WINGS

TAPERING
 Monograph on buckling and postbuckling behavior of plates tapered in planform, comparing stability of tapered and rectangular plates 03 p0586 A70-13002
 Tapered spherical shell under constant initial pressure calculated for strength, stiffness and durability on digital computer using numerical algorithm 11 p2134 A70-25846
 HE sub 11 mode launching in optical communication system, considering fiber tapering effect on excitation efficiency 16 p2875 A70-33400

TAPES
 Thermal control pressure sensitive adhesive tapes for spacecraft applications, discussing properties degradation due to simulated terrestrial and space environments 11 p2067 A70-26366
 Automatic electronics test equipment, discussing choice between tape or computer controlled interpreter systems based on language, time, versatility and cost 23 p4173 A70-44539

TARE [DATA REDUCTION]
 U DATA REDUCTION

TARGET ACQUISITION

Missile miss distance evaluation model with emphasis on statistical nature, noting application to systems analysis

01 p0193 A70-10118

K factor analysis of target visibility, considering target size contrast, background luminance, glare, atmospheric scattering and optical sight parameters

01 p0142 A70-10420

Airborne sensor simulator using recorded imagery for target detection and recognition problems, discussing closed circuit TV

01 p0088 A70-10810

Transportable telemetry acquisition system (TTAS)/as mobile tracker featuring pseudomonopulse method

01 p0045 A70-11120

Photointerpreters information extraction, studying psychological effects of image contrast and resolution on accuracy of target detection

02 p0300 A70-12459

Algorithm for optimal controls maximizing probability of linear time dependent control processes entering target manifold under random disturbances

03 p0460 A70-13580

Efference role in eye tracking of moving targets, discussing oculomotor system role

03 p0439 A70-14345

Pulsed radar fluctuating echo digital-detection and false alarm probabilities assuming Rice signal distribution with noise

04 p0649 A70-15065

Prediction errors lower bound for accuracy in predicting future position of randomly accelerating target

04 p0652 A70-15342

Computer controlled radar guided tactical missile system using digital techniques in performing target detection, acquisition, tracking and illumination

05 p0814 A70-16328

Policies and controller design for pursuing vehicle developed in terms of pursuit-evasion differential games

06 p1025 A70-17955

Visual tracking of horizontally moving object, noting acuity dependence on target angular velocity and observation time

08 p1444 A70-20745

Display design for improved target detection performance taking into account human attention to display field areas

08 p1452 A70-21301

Fixed target pursuit-evasion differential game based on pursuer-evader proximity as termination condition

11 p2073 A70-26242

Tracking of goal seeking attack vehicles, discussing error improvement and destination estimating by tracking station observer

11 p2080 A70-26243

Binary-coded sequential acquisition spacecraft ranging system operating at weak signals using HF digital logic

11 p2009 A70-26252

Quasi-optimum proportional navigation for attack situations with large missile and target maneuvers, showing advantage over linearized optimization

11 p2081 A70-26316

Azimuth measurement techniques for success-run detectors

11 p2019 A70-26712

Radar beacon target processing system providing ATC information, noting target detecting and locating ability in noisy environment

12 p2268 A70-27640

Aperture field modal decomposition of optical system in terms of integral equation eigenfunctions during detection and estimation of incoherent objects

12 p2273 A70-28121

Pursuit game problems with pursuer and target described by k-dimensional phase vectors, discussing evasion problems

13 p2452 A70-29276

Radar target optimal detection algorithms in cloud of passive reflectors, noting space surveillance regularities

15 p2696 A70-31516

Antenna array system for surface target detection in receiver noise and heavy clutter by space-time decision theory

16 p2860 A70-32954

Laser ranging and tracking for high velocity targets, discussing SNR considerations, ambiguity resolution, error analysis, measurement centroid and target acquisition

16 p2862 A70-33165

Modulation transfer function (MTF)/systems analysis with emphasis on target acquisition, relating image contrast characteristics of target and background

16 p2907 A70-33185

Optimal interceptor-target allocation and guidance for linear interception and rendezvous using real time and storage computer

16 p2947 A70-33311

Displayed cursor velocity effect on radar target acquisition time for subjects in simulated air defense environment

16 p2853 A70-33670

Optimal Kalman tracking filter performance estimation for manned maneuvering targets

16 p2949 A70-34057

Quasi-optimal feedback control method for minimum time intercept of target in central force field

19 p3393 A70-37865

Air to air missile launch range maximization for plane trajectories and nonmaneuvering targets, discussing optimal fuel burning rate

[ALAA PAPER 70-980] 20 p3668 A70-39549

Deorbiting target intercept energy optimization by game theory approach

[ALAA PAPER 70-1019] 21 p3848 A70-41778

Target velocity estimation by lidar, examining range measurements with time response and cross correlation technique

22 p3988 A70-42567

Visual target tracking with active head rotation, indicating independent eye response due to vestibulo-ocular reflex

22 p3979 A70-43492

TARGET DRONE AIRCRAFT

Supersonic aerial target wing synthesis using sandwich construction with graphite-epoxy laminate skins bonded to Al honeycomb, achieving significant weight reduction

12 p2160 A70-27118

TARGET PENETRATION

U TERMINAL BALLISTICS

TARGET RECOGNITION

Moving targets automatic identification by radar signals digital processing, describing radar echoes properties, moving window detector system and circuits design

01 p0137 A70-10358

Airborne sensor simulator using recorded imagery for target detection and recognition problems, discussing closed circuit TV

01 p0088 A70-10810

Target-field luminance or duration effect on target susceptibility to masking demonstrated in visual backward masking study

01 p0039 A70-11163

Atmospheric water vapor effect on contrast between natural target and sky via spectrophotometric method, exploring target visibility and contrast relations

02 p0325 A70-11873

Terrain computerized mathematical model for determining unobstructed line of sight between observer and target

03 p0455 A70-14172

Analog computer schemes for solving dynamic plants identification reducible to optimizing parametric problem of many variables function

04 p0654 A70-15435

Time delay between ocular movement and retinal input by yoking visual target to eye movement using real time computer systems

05 p0805 A70-16094

Wideband transversal coaxial cable delay lines used for improving radar systems target recognition by eliminating misleading signals and distortion

05 p0822 A70-16723

Classification analysis methods application to plant identification for case with incomplete initial statistical information

06 p1014 A70-17632

Optimal colors for target and rescue markers, discussing influence on signal detection, response and identification

06 p1002 A70-17713

Bounded approximations to average multitrial detection probabilities over slowly fading radar target

06 p1013 A70-18627

Visual backward masking facilitation dependence on target duration as opposed to interstimulus interval or target-onset/mask-onset interval durations

07 p1221 A70-19850

Nonlinearity of human eye movement control system in two dimensional tracking tasks, explaining visual axis lags as time delays dependent on target motion

08 p1447 A70-21724

Harrier navigation/attack system to provide successful single pass attack for close support and strike roles, noting target finding optimization

10 p1914 A70-24847

Optimum binary digital detector of radar targets, using confidence ratio as criterion of target presence

12 p2182 A70-26890

All-or-none hypothesis of selective sensory attention, discussing simple stimuli, target detectability and switching time

15 p2681 A70-31790

Low light level TV systems performance relationship to visual acuity requirements, considering interfering noise characteristics effect on target recognition

16 p2903 A70-33130

Real time video data display at visual and thermal IR wavelengths, demonstrating performance improvement for target recognition

16 p2910 A70-33436

Target signature concept of spectral, spatial, temporal, and polarization effects to develop electromag-

netic signatures against background, considering remote sensor system design

16 p2910 A70-33437

Attack helicopter fire control system with day and night detection, recognition and kill capabilities, discussing system components, operation and reliability

17 p3043 A70-34732

Visual air-to-ground target recognition simulation, comparing predictions from Autonetics Detection Model in low altitude flight

24 p4308 A70-45507

TARGET THICKNESS

Hypervelocity impact computerized calculations, considering material response, laminated meteor bumpers, hollowed projectiles and thick target cratering

15 p2823 A70-32787

Hypervelocity impact of spheres on thin targets using numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model

16 p2991 A70-33853

Angular distribution of thick target bremsstrahlung produced by electron bombardment of Be, Sn and Au surfaces

21 p3854 A70-42020

TARGETS

NT RADAR TARGETS

NT TARGET DRONE AIRCRAFT

Two step optimal motion of target and pursuer with thrust vector control in vacuum under arbitrary gravitational field, determining distance strategy

02 p0272 A70-12405

Supersonic jet force acting on target investigated for air and argon using dimensional analysis

10 p1804 A70-25122

Central shock and target displacement of under-expanded supersonic jets with obstacle at nozzle exit, using Toepler schlieren photographs

12 p2156 A70-27293

Supersonic jet force acting on target investigated for air and argon using dimensional analysis

20 p3560 A70-40515

TARS

Solid tar deposits from hydrocarbon fuels oxidation during prolonged storage

12 p2289 A70-27494

TASK COMPLEXITY

Image quality effects on human performance in simulation, discussing time sharing strategies and task difficulty factors

01 p0036 A70-10809

Heart rate and skin conductance measurements during attention-direction tasks involving proprioceptive stimuli position on environmental acceptance and rejection continuum

01 p0026 A70-11166

Task interference model for interference among two or more continuous manual control tasks, suggesting metric for pilot mental work load

02 p0244 A70-12139

Information storage and retrieval system development and operation for diversified crew/equipment task data, using general purpose digital computer

02 p0265 A70-12143

Experienced and naive subject evaluation of probabilistic data, data source determination and prediction of subsequent data in complex decision task

02 p0247 A70-12379

Event probability and cost effects on performance in continuous motor task

03 p0436 A70-13771

Cost/schedule planning and control system (C/SPCS) providing early exposure of inadequacies in work execution and initial planning

05 p0959 A70-16461

Pilot and copilot task distribution schedules adopted by European civil aviation for landing approaches under poor weather conditions

08 p1542 A70-21850

Drug-alcohol and hypoxia effects on multiple task operator performance tested at altitude and pressure chamber treatments

08 p1448 A70-21939

Speed-accuracy interrelationship in human performance as operating characteristic for reaction time under variety of task conditions

10 p1826 A70-24712

Three phase code transformation task for human subjects, determining memory aid role in problem solving phase from factor analysis

13 p2361 A70-30019

Optimum attention allocation, discussing distraction resistance and multiple task performance

19 p3362 A70-38316

Enhanced evoked potentials sited by auditory stimuli in complex task, considering EEG and neurophysiological basis of selective attention

19 p3363 A70-38318

Human monitoring behavior, discussing display, task and organismic variables effects

19 p3363 A70-38323

Avionics digital computer system using associative memory for executive control functions implementation to mechanize task assignment algorithm 22 p3994 A70-43105

Expert judgments validity of human task performance time against empirical measures for use in analytical modeling 24 p4308 A70-45515

TASK SEQUENCERS
 U CONTROL EQUIPMENT
 U SEQUENTIAL CONTROL

TASKS
 NT AUDITORY TASKS
 NT VISUAL TASKS
 Classical human reaction time as function of high and low auditory signal rates in vigilance setting, supporting inhibition theory of vigilance decrement 04 p0640 A70-15646

TASTE
 Flavor sweetening preference in high protein and high fat diets, basing human subjects experimental range on choice of formulas 07 p1216 A70-18948

TAURUS CONSTELLATION
 IR spectra of M stars and alpha Tau obtained with Michelson interferometer, observing molecular features and water vapor absorption 04 p0747 A70-14548
 RW Aur-type variables in Taurus, studying temporal variations from photographic and photometric observations and B, B-V diagram 07 p1376 A70-18906
 Sun effect on anomalous frequency shift in 21 cm absorption spectrum in Taurus A 11 p2108 A70-25659
 Scorpio X-1 and Taurus X-1 /Crab/ X ray flux effects on nighttime ionospheric radio transmission, discussing ion production and resulting electron density 14 p2631 A70-30541
 Galactic structure of Milky Way towards Taurus based on two dimensional classification and three color photography of star group 15 p2797 A70-31621
 Taurus X-1 X ray emission polarization, using rocket-borne polarimeter 17 p3150 A70-34845
 Cold neutral atomic hydrogen in Taurus dust clouds from 21 cm line dips in radiotelescope observations 21 p3887 A70-41108
 Be star HD 37202 zeta Tauri II envelope instability, discussing radial velocities, profiles, line width and electron density in layers 21 p3888 A70-41119
 IR star types T-Tauri, B-emission and M supergiants observations using UBVRI photometry 21 p3890 A70-41163

TAXIING
 Airport surface traffic system analysis, discussing control and guidance isolation, information acquisition/processing and response actions [ALAA PAPER 69-1086] 01 p0137 A70-10630
 Forced vibration in taxiing aircraft interaction with ground structure 14 p2563 A70-30699
 Visual display and automatic taxi guidance system testing for improved aircraft docking accuracy [ALAA PAPER 70-916] 17 p3064 A70-35828
 Boeing 747 pilot transition training, discussing takeoff, landing, eyelevel, flareout taxi speeds, inertial navigation and electrical, fuel and hydraulic systems 20 p3562 A70-40083

TAXONOMY
 Preliminary taxonomy for errors in serial, self-paced choice reaction time experiments, discussing speed-error tradeoff 19 p3362 A70-38313

TAYLOR INSTABILITY
 Torque and flow patterns in supercritical Taylor instability regime of circular Couette flow 03 p0470 A70-14235
 Taylor instability of vertically accelerated horizontal two dimensional interface between liquid and air solved by method of strained coordinates 09 p1661 A70-23071
 Taylor-Goertler vortex formation effect on heat transfer through boundary layer on concave wall [ASME PAPER 69-HT-3] 09 p1790 A70-23556
 Convective flow stability in rotating fluid layer under rigid boundary conditions, calculating critical Taylor number as function of Prandtl number 16 p2893 A70-33686
 Stability conditions for relativistic stars, discussing mass-energy density distribution, Taylor instability, Schwarzschild criterion, Newtonian stellar model, gravitational red shift, etc 22 p4104 A70-42999

TAYLOR SERIES
 NT MACLAURIN SERIES
 Second vertical derivative of gravity field, using formulas based on Taylor series expansion method 06 p1055 A70-17604

Solar system planetary mean motions calculation from characteristic equations roots at equilibrium points of restricted three body problem, using Taylor series solution 09 p1760 A70-22915

Earth shape formulas reduction to Taylor series, considering Molodenskii solution method for simple layer density integral equation 09 p1670 A70-23343

Time-convergent approximations to statistical turbulence functions constructed starting with functions expansion as Taylor series in time 11 p2074 A70-26534

Multiterminal electronic networks computerized fault detection based on linearized Taylor expansion algorithm 12 p2197 A70-27932

Asymptotic turbulent boundary layer semiempirical Taylor formula, investigating average motion formed in mixing jet region and surrounding liquid 20 p3611 A70-39809

TAYLOR THEOREM
 U TAYLOR SERIES

TD-1 SATELLITE
 TD-1 satellite design and scientific payload [DGLR-69-11] 04 p0762 A70-15142
 TD-1 satellite design and scientific payload 09 p1767 A70-23429
 Digital orbital clock and telemetry adapter for TD1A satellite attitude stabilization, describing mechanical structure 21 p3798 A70-41272
 ESRO satellite projects IRIS/ESRO 2, Aurorae/ESRO 1, HEOS-A1 and future TD-1 and HEOS-A2 23 p4264 A70-45004

TEACHING
 U EDUCATION

TEACHING MACHINES
 Learning scheme with probabilistic teacher for unclassified samples, establishing convergence, comparing with linear estimator 17 p3128 A70-34851
 Computer users functions to determine preparation level for effective dialog with computer, discussing teaching stages 18 p3223 A70-36077
 Heat transfer and viscous flow pedagogy, discussing classroom use of remote time sharing computer terminals 23 p4166 A70-44642

TEAMS
 Team hiring of research scientists by industrial and academic organizations, discussing causes and influence on R and D organizations management and design 07 p1427 A70-19002

TEARING
 Drop-weight tear test evaluation taking into account operator, test machine, specimen thickness, notch type and strength level effects 15 p2759 A70-32241
 Impact test machines, specimen design and energy measurement in dynamic tear test method for steel fracture strength 15 p2759 A70-32242
 Plasma tearing instabilities involving topological changes in magnetosphere field configuration 19 p3411 A70-37491

TECHNICAL WRITING
 Automated Readability Index for technical materials weighting word and sentence length in multiple regression equation 24 p4308 A70-45510

TECHNIQUES
 U METHODOLOGY

TECHNOLOGIES
 NT BIOTECHNOLOGY
 NT MILITARY TECHNOLOGY

TECHNOLOGIES
 NT MARINE TECHNOLOGY
 Book on technological forecasting covering philosophical basis, Federal Government activity, R and D management resource allocation, correlation and regression analysis, etc 01 p0221 A70-11307
 Technological forecasting for management planning, discussing structuring, prediction techniques, personnel selection, quantification, etc 09 p1794 A70-23413
 Technological forecasting for R and D planning including project selection and resource allocation decision making 09 p1794 A70-23416
 Bibliography of literature on bioengineering, biocontrol, medical physics, biotechnology, safety and human factors in technology 09 p1629 A70-23692
 Vacuum science and technology - Conference, Seattle, October 1969 12 p2284 A70-27251
 Technology - Conference, Cocoa Beach, Florida, April 1970, Volume I 16 p2975 A70-33701

Space technology and science - Conference, Tokyo, August 1969 17 p3164 A70-35201

TECHNOLOGY TRANSFER
 Tension-torsion machine developed from aircraft carrier catapult principle, producing radial loading paths 22 p4117 A70-43453
 Space and astronomic methods applied to solid earth and ocean physics 22 p4025 A70-43669
 NASA safety related research programs based on technology transfer involving information summarizing, indexing and storage from global aerospace research and development 23 p4285 A70-44457

TECHNOLOGY UTILIZATION
 NASA Technology Utilization Program extending space exploration and upper atmosphere R and D to X ray pictures, safer highways, TV cameras, etc 01 p0220 A70-10282
 Military inertial navigation technology applied to civil air transport aircraft 01 p0137 A70-10311
 Manned reusable space transportation system technology requirements and vehicle types [ALAA PAPER 69-1116] 01 p0194 A70-10613
 Military aeronautical R and D contributions to civil aviation since 1905, discussing jet engine and supersonic aircraft introduction, air traffic control, etc [ALAA PAPER 69-1114] 01 p0005 A70-10614
 Earth resources satellites use in agriculture, considering materials reflectance and emittance, electromagnetic spectrum wavelengths identification and data accuracy standards [ALAA PAPER 69-1083] 01 p0220 A70-10624
 Communication satellite system proposed for small users, assessing viability based on market saturation points estimation [ALAA PAPER 69-1073] 01 p0043 A70-10629
 Ultrasonics for industry - Conference, London, October 1969 01 p0089 A70-10877
 Aerospace technology application to biomedical problems in astronautics 01 p0027 A70-11256
 Book on technical acoustics physics covering propagation, dissipation, reflection, field perturbation in real solids, liquids and gases, lumped constants, resonators, etc 01 p0144 A70-11328
 Technology transfer techniques within business firm, including specific examples used by successful companies 02 p0403 A70-12635
 Technology transfer between large company aerospace group and commercial products group 02 p0403 A70-12636
 Optimum balance between program and functional organizations to promote technology transfer 02 p0403 A70-12637
 Technology transfer experience in terms of aerospace company policies and technical management mechanics 02 p0389 A70-12638
 Surveyor project as basis for technology transfer management exemplified by planning and organization problems 02 p0403 A70-12639
 Laser applications for diagnostic and interaction studies, discussing fog removal, droplet shattering, clear air turbulence, reaction rates, spectroscopy, etc 02 p0314 A70-12780
 Soviet book on assembly, control and testing of aeronautical devices covering theory, technology, quality control, accuracy, industrial cleanliness, vacuum and gas filling, etc 03 p0479 A70-12870
 Carbon materials manufacture, properties and applications in space technology, discussing carbon fibers, textiles, graphite, pyrolytic carbon, composites and vitreous carbon 03 p0516 A70-13618
 Earth resources applications of Apollo 6 photography, describing camera system and photographic coverage 03 p0474 A70-13672
 Earth exploration and service by satellites - Conference, Rome, March 1969 03 p0572 A70-13826
 NASA research studies supporting tracked air cushion vehicle /TACV/ program illustrating aerospace technology application to ground transportation [AAS PAPER 69-565] 04 p0622 A70-14639
 Holographic wavefront reconstruction variants and applications to instrumentation, process engineering and information techniques 04 p0688 A70-14717
 Meghdoot program for satellite network communications technology applications to national goals in India 04 p0757 A70-15670

Soviet aerospace manufacturing technologies development, considering forging, extrusion, metal working and joining, etc
[SAE PAPER 690701] 05 p0853 A70-15826

Solid rocket engine components technologies, studying effects of cost consciousness
[SAE PAPER 690702] 05 p0922 A70-15828

Operational/technical system improving air traffic control services efficiency by increased utilization of automation, displaying radar information and synthetic air situation presentations
05 p0827 A70-16179

Plastics applications in aircraft, missile systems, satellites, sounding rockets and manned spacecraft, discussing reinforced plastics and structural laminates
05 p0874 A70-16623

Microwave low power electron tube oscillators and solid state technology
05 p0823 A70-16882

U.S. space research and technology applications in aviation, astronomy, weather information, intercontinental communication and space shuttle design
05 p0921 A70-17091

Apollo suit features applicable to operational or research program requiring pressure suits, discussing low torque constant volume joints
06 p1002 A70-17704

Lasers industrial application to distance and flow rate measurement, automated machining and tunneling, inspection, die hole punching, welding, etc
06 p1078 A70-18431

Integrated circuit technology impact on electronic equipment designers and organization relationships within industry
07 p1239 A70-18800

Aerospace technology contributions to oceanography, discussing lightweight structures, electronics, automatic systems and submarine laboratory application
07 p1263 A70-19135

Incipient tropical storm location and synoptic weather pattern analysis from environmental satellite system data utilization
07 p1329 A70-19196

Laser characteristics and applications in high temperature research including metal heating, welding, machining, surface particle emission and plasma production
07 p1301 A70-19881

Large scale integration (LSI) in electronics, discussing high density microelectronic, memory and logic circuits, fabrication and computer aided design
08 p1468 A70-20468

Metal cutting by gas jet lasers, discussing single and multimode lasers, carbon dioxide lasers, power and power density requirements, etc
08 p1501 A70-20470

Microstrip integrated circuit technology in development of microwave components, discussing fabrication, design, performance and applications
08 p1471 A70-20787

Computer graphics applications to three dimensional vibration analysis, changing mass, stiffness, exciting load or load frequency at any point with light pen
08 p1467 A70-21050

Collection of patent papers on liquid crystals applications including radiation detection, polarizing, thermal imaging, etc
08 p1556 A70-21346

Carbon fiber composite materials production technology, physical properties and potential applications in aerospace
08 p1527 A70-21520

Engineering use of filament reinforced metal matrix composites dependent on fabrication cost reduction, consistent properties and form flexibility
08 p1509 A70-21851

Hybrid microwave integrated circuits technology and design, discussing distributed and lumped-element structures and component properties
09 p1644 A70-22225

Laser technology, discussing activation types, applications and commercial development for data processing, voice communication, medical equipment, etc
09 p1695 A70-22338

Powder metallurgy all-inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc
09 p1701 A70-22553

Satellite applications to TV broadcasting for developed and developing areas, considering national and international telecommunications policies
09 p1633 A70-22634

Solid state and gas lasers industrial applications in machining and nonmachining areas, discussing limiting factors
09 p1692 A70-22706

Satellite TV transmission economic, technical and practical feasibility, describing direct transmission system
09 p1634 A70-22766

Submillimeter wave applications in measurement and communication, developing submillimeter gas maser sources
09 p1676 A70-22784

Earth resources data exploitation, describing potential organizational structures for data handling and various political, economic and technological problems
[AIAA PAPER 70-344] 09 p1793 A70-22859

Earth Resources Satellite Information Systems, discussing NASA Space Application Program relation to national goals, federal spending, cost effectiveness analysis, information sales, etc
[AIAA PAPER 70-333] 09 p1793 A70-22860

Earth resources observation satellite (EROS) program, describing remote sensor data acquisition, processing, dissemination and utilization
[AIAA PAPER 70-332] 09 p1667 A70-22861

ERTS satellite role in resource policy, management and remote sensing
[AIAA PAPER 70-304] 09 p1668 A70-22881

Multidiscipline applications for Earth Resources Satellite data, including data simulation and interpretation techniques
09 p1669 A70-22886

Technology transfer or coupling from corporate viewpoint, discussing organizational responses to literature mushrooming, time compression of technological advance, etc
09 p1794 A70-23411

R and D resources allocation model based on correlated Navy technological forecast (NTF) and exploratory development goals (EDG)
09 p1794 A70-23412

Photointerpretation applications to kaolin deposit detection, railway tunnel collapse analysis and highway drainage
10 p1873 A70-24075

Ground and flight tests in aeronautical system development process as transfer of basic technology into cost effective operational systems
[AIAA PAPER 70-381] 10 p1857 A70-24172

Management systems growth in relation to computer applications development, noting second industrial revolution
10 p1971 A70-24661

TRW space program to 1978, discussing lunar optical observatory, orbital radio astronomical observatory, satellite applications, planetary exploration spacecraft, etc
10 p1951 A70-24875

Civil aviation satellites for aircraft communication, navigation and traffic control, discussing technical, political and administrative problems
10 p1842 A70-24974

Direct broadcast voice satellite for educational system improvement, discussing lesson formatting, ground receiver/programmer, multichannel capacity, etc
[AIAA PAPER 70-449] 11 p1998 A70-25423

Communication satellite technology impacts on potential socio-economic developments of emerging nations of Asia, Africa and South America
[AIAA PAPER 70-473] 11 p1512 A70-25426

Educational satellite TV for developing countries, giving model relating economic development to education and applied technology
[AIAA PAPER 70-514] 11 p1512 A70-25429

Navigational satellite communication experimental design emphasizing mobile, ship or aircraft station technical characteristics
[AIAA PAPER 70-407] 11 p2001 A70-25469

ATC ground hardware technology implementation, considering national air space system, airports, cost estimates and capacity increase
11 p2078 A70-25722

Technological feasibility, economical and operational compatibility of subsonic aircraft nuclear propulsion (ANP) compared with conventional propulsion systems
11 p2081 A70-26050

Space technology exploitation, describing applications of multimission information transfer satellites
11 p2005 A70-26058

Concept engineering, individuals and corporations consider aspects and disciplines concerned with public utility, taste and convenience
11 p2153 A70-26257

Computerized automation of R and D engineering, discussing critical effects of generalization and oversimplification
12 p2334 A70-27006

Avionics technology cost effectiveness effect on airlines and industry, considering systems engineering and specifications
[SAE PAPER 700299] 12 p2335 A70-27447

Liquid rocket technology for chemical engineers, discussing propellant tanks, lines and valves, tank pressurization, turbopumps and combustion chamber problems
12 p2291 A70-27664

Turbine technology application to high speed roller bearing design, considering reduction of roller skidding and skewing
13 p2419 A70-28918

Pattern recognition systems design and applications in medical and photographic data classification
13 p2374 A70-29580

Holography patents, books, conference reports and articles, discussing applications to interferometry, portraits, Cassette tv, computer storage, etc
13 p2411 A70-29782

Avionics technology application to air traffic, discussing airborne computers use in navigation and control, secondary radar and correlation protected ILS
14 p2611 A70-30107

Ground and air based avionics for traffic control
14 p2612 A70-30109

Space shuttle automatic landing system based on aircraft low visibility landing, considering economy and safety
14 p2614 A70-30466

Earth atmosphere model for weather forecasting using space technology, noting Global Atmospheric Research Project (GARP)
14 p2576 A70-30973

Aerospace technology and system analysis application possibilities to urban social and economic planning problems
14 p2670 A70-31191

Airborne equipment microelectronics technology application to interrogators, transponders and UHF/VHF transceivers
14 p2558 A70-31294

Spacecraft tracking methods applied to solid earth and ocean physics
15 p2809 A70-31685

Report to COSPAR on Australian space research /1969/ including tracking stations, sounding rockets, technology utilization, etc
15 p2829 A70-31706

Astronautics utility in astronomy, physics, earth observation, communication, commercial, military, navigational, meteorological, social applications, considering present and future possibilities
15 p2831 A70-32062

Air transport safety, applying experience from space programs
15 p2692 A70-32227

Computer applications in radar and air traffic control, large steerable aerials, systems design and graphical displays
15 p2832 A70-32704

Smooth surface polyester premix and sheet molding compound technology applied to reinforced plastics industry
16 p2917 A70-33364

Fluidic technology for avionics systems, considering potential cost reduction and reliability improvement
16 p2843 A70-33445

Fluidic technology applications to space and oceanography, discussing control, monitoring, sequencing and signal processing
16 p2845 A70-33714

Technology - Conference, Cocoa Beach, Florida, April 1970, Supplement
16 p2982 A70-33801

Astronautics enhancement of technical progress, discussing agricultural, geological, oceanographical, meteorological, communication, electronics, materials and medical applications
16 p3004 A70-34345

Space shuttle safety program for low risk passenger transportation, combining large aircraft experience with spacecraft technology
[AAS PAPER 70-055] 17 p3176 A70-34793

Digital computer technology impact on advanced aircraft design, discussing airborne computers, distributed and lumped computer systems, outer loop control, engine control and system integrity
17 p3049 A70-34993

Engineering uses of holography - Conference, University of Strathclyde, Glasgow, September 1968
17 p3083 A70-35001

Aerospace technology applications to air pollution problems, including turbojet aircraft sources, rocket emissions, etc
[AIAA PAPER 70-815] 17 p3200 A70-35194

NASA program for international cooperation in space involving developing and advanced nations, discussing television instruction for India, resource surveys, etc
18 p3349 A70-36514

Laser and electron beam removal of material in manufacturing technology
19 p3447 A70-38451

Carbon dioxide IR laser applications to manufacturing technology, discussing absorption, reflection and heat conduction characteristics of materials
19 p3447 A70-38452

Space technology spin-off benefits to mankind, considering medical and industrial applications
19 p3554 A70-38609

Explosive metal bonding in electronics, noting explosive strength and initial surface angle effects on bond physical and chemical properties
19 p3438 A70-38752

- Hydrofoil and hovering craft design by fiber technology, discussing composite materials, whisker mechanical properties, polycrystalline fibers, matrix materials, etc
19 p3456 A70-38941
- ERTS programs status and prospects from international utility viewpoint
20 p3739 A70-39064
- Glass drainline development and marketing, describing technology transfer role
20 p3740 A70-39100
- Small ground stations in communication satellite systems involving regional telecommunication, TV distribution, air traffic and maritime applications, data exchange, weather and education service
21 p3785 A70-40764
- Holography application to high capacity permanent memory systems
21 p3825 A70-41125
- Inertial guidance technology applications for space navigation, considering instrument design tradeoff between accuracy and cost for performance and reliability improvements
21 p3848 A70-41128
- Mariner 1969 communication system modified for thermoelectric outer planet spacecraft (TOPS), noting X band addition to S band and associated problems
21 p3791 A70-41797
- Synchronous satellites characteristics and applications to radio connection, light signals, positioning, telecommunications, manned space stations and space shuttles
22 p4109 A70-42467
- Supersonic aerodynamic design tools, discussing technological application of high speed computer and limitations
22 p3958 A70-42701
- Satellite technology application to aeronautics, predicting synchronous satellites communication for transoceanic and overland ATC
22 p4111 A70-43512
- Apollo project technology for future space missions, discussing space shuttles, management, material procurement, test programs and computer utilization
22 p4128 A70-43513
- Space station development and missions, discussing general design philosophy, successive project lineage and applications programs
22 p4108 A70-43653
- Technology relevance to organizational structure, discussing planning models based on problem solving and performance
23 p4284 A70-43995
- NASA information fall-out, discussing Technology Utilization Program providing aerospace related data to civilian economy
23 p4285 A70-44500
- Space technology applications to earth survey, discussing use of automatic satellites and manned space laboratories for meteorological, geophysical and related purposes
23 p4191 A70-44634
- TV broadcast satellites program distribution direct to home by network and by community
23 p4164 A70-44646
- Orbital space station utilization planning as international laboratory, discussing industry role, experiment program goals, etc
23 p4260 A70-44650
- Computer hardware and software technology for complex problems, discussing switching speeds and parallel and pipeline designs
23 p4167 A70-44716
- Experimental astronomy and role of space technology, discussing artificial satellites, extraterrestrial life, moon, Mars and Venus exploration, etc
23 p4247 A70-44775
- Industrial laser technology applications, considering high accuracy distance, flow and stress measurements, die hole punching, integrated circuit component welding, etc
24 p4351 A70-45382
- Lasers biomedical applications based on thermal and ionization effects on biological targets, considering eye surgery, tumor treatment, etc
24 p4308 A70-45568
- Satellite technology applications to ATC, including communications, navigation, surveillance over water and data acquisition
24 p4373 A70-45922
- NERVA reactor technology applied to closed Brayton cycle MHD power system
24 p4377 A70-45956
- Air traffic control, future national airspace system improvements in view of air transportation growth, computerized automation technology, etc
24 p4374 A70-45969
- Spacecraft sensor trends from space station research and technology requirements regarding astronomy, biomedicine and biology, earth resources, etc
24 p4418 A70-45974
- [AIAA PAPER 70-1291]
- TECTONIC MOVEMENT**
U TECTONICS
- TECTONICS**
Earth photographs for geotectonic research from manned orbiting spacecraft, describing Apollo and Gemini belts
04 p0677 A70-14663
- [AAS PAPER 69-579]
Earth deviations from isostatic equilibrium, showing irregularities dependence on distance from surface for various tectonic zones
08 p1487 A70-20715
- Lunar sinuous rilles as volcano-tectonic fracture traces of sites of gas emission
09 p1758 A70-22743
- Lunar geomorphological charts of Theophilus and Ptolemaeus walled plains, investigating central region tectonics
19 p3517 A70-37985
- Soviet collection of lunar geological and morphological maps and relief tracings, showing tectonic features, craters and surface characteristics
19 p3518 A70-38011
- Earth upper mantle phase change instability, discussing temperature gradient, transformation influence on fluid, olivine-spinel phase flow patterns and tectonics
21 p3820 A70-41895
- Ocean floor-spreading tectonic effects, considering Arabian Shield separation from African continent
24 p4332 A70-46408
- TEE**
U T SHAPE
- TEFLON (TRADEMARK)**
Fluorocarbon polymer coatings, discussing role of fluorine content and carbon bond in chemical inertness, degradation resistance, thermal stability and low surface friction
05 p0868 A70-15842
- [SAE PAPER 690645]
LES-6 satellite solid Teflon pulsed plasma thruster performance, determining energy balance, thrust and circuit parameters
06 p1132 A70-18206
- [AIAA PAPER 70-179]
Atomic hydrogen maser wall shift determined by measurements on FEP Teflon coated storage bulbs, suggesting Teflon properties change as basis
07 p1301 A70-19973
- Teflon-bonded gas diffusion electrode flooded agglomerate model, determining porosity, surface area, IR drop, etc
10 p1829 A70-24455
- Carbon oxyfluoride IR radiation from boundary layer formed by arc-heated air passing over Teflon surface
10 p1968 A70-24475
- Teflon and fluropolymers relative toxicity due to thermal degradation at 370 C, testing carboxy nitroso rubber, Kapton polyimide film, perfluorated polymers, etc
13 p2439 A70-29260
- Teflon and polymethyl methacrylate sublimation breakdown in plasma jets, using electric arc heated argon, nitrogen, air and oxygen
15 p2765 A70-32103
- Gas formation by sliding friction of self lubricating Teflon with carbon black on steel in ultrahigh vacuum, using mass spectrometry
15 p2745 A70-32446
- Teflon crosshatched ablation patterns elimination by grooving or glass filler addition
17 p3193 A70-34483
- [AIAA PAPER 70-769]
Rocket engine with Teflon lined combustion chamber, considering design criteria and tests
18 p3301 A70-36662
- Teflon bucket and Be-Cu cap seal against hydrostatic pressure, discussing applications for high pressure superconductivity measurements
18 p3262 A70-37097
- Adherent Ta films deposition onto Teflon disks by sputtering
18 p3264 A70-37098
- TEKTITE PROJECT**
Underwater saturation habitats application as behavioral workshops for mission planning and human engineering of manned space flight, discussing Project Tektite
01 p0034 A70-10611
- [AIAA PAPER 69-1120]
Tektite I marine laboratory underwater mission in marine biology and geology
17 p3168 A70-35306
- TEKTITES**
NT AUSTRALITES
Reworking of deep-sea sediments as indicated by vertical dispersion of Australasian and Ivory Coast microtektite horizons, implying years of deposition
01 p0178 A70-10474
- Age data on high sodium tektites from Australia showing distinct fall
03 p0576 A70-14089
- Neutron activation analysis for U and Th in various tektites, discussing evolution and extraterrestrial origin
03 p0576 A70-14090
- Tektites origin, comparing chemical composition with lunar soil from Apollo mission materials
03 p0577 A70-14096
- Tektite size restricted by thermal stress limit on diameter and aerodynamic load limit on length
05 p0916 A70-16831
- Tektite damage caused by micrometeoroid impact, projectile firing at glass spheres and survival time estimation
05 p0916 A70-16834
- Microtektites chemical analysis data providing appraisal of strewn field boundaries, implying lunar origin
05 p0916 A70-16835
- Magnetic susceptibility of synthetic australite and philippinite-like tektites measured in 77-560 K range, discussing origin
05 p0916 A70-16836
- Ni-Cr content and variability in Ivory Coast tektites using atomic absorption and X ray emission techniques
05 p0916 A70-16837
- Normal and bottle-green microtektite glass measured for magnetic susceptibility, magnetization and Curie constants
05 p0916 A70-16839
- Correlation between O isotope ratios and composition of tektites investigated for origin of tektites
05 p0917 A70-16840
- Fe diffusion coefficients measured at various temperatures above 1150 C to calculate homogenization times of Thailand tektite source
05 p0917 A70-16841
- Tektite field studies in China concerning stratigraphic occurrence and chemistry
06 p1148 A70-18393
- Nonlunar origin of tektites indicated from molten glass dispersion generated by terrestrial crater-forming meteorite impact
12 p2302 A70-27584
- Australasian and Ivory Coast deep sea microtektites fission track ages compared to deposition ages from paleomagnetic data
12 p2310 A70-28021
- U and Th abundances correlation in tektites and achondrites based on oxygen isotopic composition of lunar rock specimens
13 p2488 A70-28720
- Tektites age from fission track method, discussing elimination technique for strain caused spurious tracks
13 p2488 A70-28721
- Tektite glass in lunar sample from Apollo 12, discussing chemical composition and possible volcanic origin
14 p2642 A70-30983
- Erasure fission tracks in soda-lime glass, tektite, biotite and apatite by shock loading, determining dynamic pressure and associated temperature effects
19 p3414 A70-38035
- Chromite, zircon and quartz crystals in Muong Nong type tektites by X ray diffraction, discussing possible impact origin
20 p3709 A70-40088
- Lake Toba, Sumatra as possible tektite source region based on surrounding welded tuffs composition
21 p3923 A70-41996
- Tektite glass absence in Apollo 12 lunar sample
23 p4238 A70-43806

Integrated logistic support for cost effectiveness of ground communication system
01 p0220 A70-10114
- Intelsat 4 communication system design and international cooperation, considering satellite design, TV and telephone channels capacity, etc
01 p0196 A70-10883
- Book on communication and information theories application to fading dispersive communication channels, discussing tropospheric scatter, HF ionospheric links, moon bounds, etc
02 p0253 A70-11700

- Optimal selection of centralized communication network of combined radial and linear structures minimizing disconnected peripheral points
03 p0446 A70-13238
- Low noise amplification equipment for telecommunications, considering France-Portugal link parametric amplifiers
05 p0819 A70-15983
- U.S. space research and technology applications in aviation, astronomy, weather information, intercontinental communication and space shuttle design
05 p0921 A70-17091
- Communications and displays - Conference, North Hollywood, August 1969
06 p1005 A70-17342
- Domestic telecommunication via satellite to reduce terrestrial switching to two levels, discussing system parameters, operation, hardware and cost estimate
06 p1006 A70-17344
- LUF/lowest useful frequency/ prediction for HF sky wave communication, emphasizing prediction methods using computers
07 p1229 A70-19156
- Lowest useful frequency /LUF/ prediction on long distance quasi-antipodal circuit, considering E layer blanketing
07 p1232 A70-19178
- High attenuation quantum communication channel capacity based on mathematical model
07 p1335 A70-19864
- Tandem link multichannel LOS FDM-FM communication system cost optimization by computer-aided design
08 p1459 A70-20798
- Millimeter guided wave communication systems information transmission capacity increase, using quaternary and higher order modulation techniques
08 p1462 A70-21506
- Crosstalk in multiple-beam waveguides due to scattering and distortion caused by surface irregularities of focusers, discussing power profile of Gaussian beam
08 p1462 A70-21507
- Canadian domestic satellite communications policy, discussing Telesat Canada for commercial telecommunications services
11 p2152 A70-25416
- [AIAA PAPER 70-428] Visible light sensors application in LES control system for circular near equatorial orbits
11 p2107 A70-25432
- [AIAA PAPER 70-477] Satellite communications subsystem performance testing from initial integration through launch under all environmental exposure
11 p2030 A70-25445
- [AIAA PAPER 70-448] Plumeur-Bodou satellite telecommunications center, discussing antennas
11 p2031 A70-26009
- Automatic base communication system /ABCS/ to handle USAF worldwide base record communications centered on electronic store and forward message switch, utilizing stored programs
11 p2009 A70-26266
- Performance characteristics of quadriphase PSK communication system with noisy reference signal, formulating error probability
12 p2187 A70-27907
- Self organization and adaptive routing communication system for military network, describing routing algorithm and entropy organization measure based on stochastic switching matrices
12 p2187 A70-27934
- Radar meteorology in electromagnetic communications to provide storm systems data, noting clear air radar echoes
13 p2445 A70-28791
- Millimeter wave applications, considering waveguide and plasma communications, ground surveillance radars, vibration analysis equipment, decoders, etc
14 p2549 A70-30449
- Field amplitude distribution parameter in long distance tropospheric communications based on fading depth
15 p2696 A70-31512
- Frame synchronization in biorthogonal coded multiplex communication system, describing PCM, pattern insertion and double encoding methods
17 p3045 A70-35266
- Legal problems of space telecommunications, discussing world juridical regime, United Nations work and satellite systems broadcasting
17 p3201 A70-35777
- Legal questions of satellites telecommunications at Washington Intelsat Conference
17 p3201 A70-35778
- Legal aspects of telecommunications by satellite systems, discussing international organization, Intelsat integration and direct broadcasting
17 p3202 A70-35781
- Juridical structure, risks and control of satellite telecommunication ensuring equality of nations
17 p3202 A70-35782
- Communication modulation systems unified description by conversion and indication matrices
18 p3229 A70-36942
- Group delay times criterion of multibeam propagation of ionospheric radio echoes for communications systems
19 p3375 A70-37332
- Global integrated communications satellite system, discussing International Telecommunication Union regulatory functions, etc
21 p3955 A70-40625

- [DFVLR-SONDDR-52] Time correlation telemetering systems design, describing structural scheme
11 p2004 A70-25929
- Telemetry decommutation algorithm for applying Bayesian decisions to demodulated received bits data
11 p2008 A70-26238
- Mariner-type spacecraft telemetry system optimization, considering channel capacity
11 p2008 A70-26239
- FM/FM telemetry threshold carrier SNR and receiver IF bandwidth optimization through computer program
11 p2014 A70-26272
- Noise threshold performance of suboptimum PPM telemetry receivers using slicer for detector
11 p2010 A70-26273
- Data compression for telemetry transmission with sample choice based on time-varying stream slope thresholds illustrated for Ranger photograph
11 p2010 A70-26305
- Delta reprocessing operating system /DEPOS/ for high speed telemetry format-independent decommutation and data compression
11 p2010 A70-26307
- Sensor selection and telemetry measurement of physical parameters
11 p2011 A70-26453
- ECG telemetry system within small irregular metal chamber
11 p1992 A70-26514
- Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-IC stage, using IR radiation data
12 p2196 A70-27725
- Analog information transmission device using He-Ne laser radiation, discussing optical telemetric channel transfer characteristics for pulsed nanosecond analog signals
12 p2250 A70-28184
- Artificial earth satellites orientation determined by onboard telemetric measurements, constructing model for rotational motion around center of mass
12 p2314 A70-28255
- Skylark sounding rocket telemetry data reduction system providing attitude analysis
13 p2363 A70-28680
- Altimeter-telemetry system for small sounding rockets, discussing ground and flight test results
13 p2363 A70-28688
- Transducers for bioimplantable telemetry systems self used by nonhospitalized patients
13 p2357 A70-28816
- Frequency selection in telemetry taking into account systems for minimum interference and crosstalk
13 p2366 A70-29216
- Antenna research, discussing efficiency and design considerations in phased and strip line arrays and conical scan telemetry antennas
14 p2559 A70-31375
- Report to COSPAR on Czechoslovakian space research /1969/ covering satellite telemetry and tracking, proton flares, aeronomy, etc
15 p2829 A70-31710

Earth resources technology satellite /ERTS-A/ for Eros program, producing telemetric imagery spatially correlated to earth surface

16 p2898 A70-34046

Telemetry instrumentation for free flight wind tunnel models, discussing system component characteristics

17 p3047 A70-35495

Digital computer controlled positioning of telemetry antennas for tracking spacecraft

17 p3062 A70-35508

First luminous lunar echoes obtained by laser telemetry of Pic Du Midi observatory

18 p3310 A70-35948

Logic, arithmetic, control and instruction capacities of dedicated onboard telemetry preprocessor

19 p3383 A70-37904

Integrated circuits for control and telemetry functions in oxide cathode ion thruster power conditioning system operating from solar panel

21 p3798 A70-41216

Digital orbital clock and telemetry adapter for TD1A satellite attitude stabilization, describing mechanical structure

21 p3798 A70-41272

TELEMETRY AUTO REDUCTION SYSTEM

U DATA REDUCTION

U TELEMETRY

TELEOPERATORS

Free flight remote controlled teleoperator system applications in manned orbital space station/space shuttle program

23 p4260 A70-44644

TELEPHONES

FM transmission of multiplex telephone signals by communication satellites, deriving impulse noise due to adjacent channel interference

21 p3787 A70-41330

Directional microwave transmitter for 300 frequency division multiplexed telephone channels, discussing transmission quality, reliability, design and operation

23 p4172 A70-44298

TELEPHONY

Intelsat satellite telecommunications system application for future long distance telephone communications

03 p0451 A70-13836

Worldwide telephone network optimum interoperation including communication satellites complementation

10 p1834 A70-24328

Satellite communication system using delta modulation for telephone service to large number single channel earth stations

10 p1834 A70-24329

Traffic simulation in telephone network via communication satellite with presassigned and demand assigned circuits

10 p1838 A70-24356

Message traffic problems in satellite telephone network, considering traffic distribution characteristics, interarrival mean time, bidirectional traffic, etc

10 p1839 A70-24367

Time allocation with sampling interpolation /ATIC/ for TDMA satellite telephone communications, considering auxiliary circuits, transmission quality, bit rates, demand assignment, etc

10 p1840 A70-24370

Soviet book on satellite communication systems for telephone and TV transmission covering orbit selection, signal level calculation, channel characteristics for frequency bands, etc

10 p1840 A70-24378

Terrestrial interface at SPADE terminals for converting international telephone exchange differences into common signaling format

[AIAA PAPER 70-413]

11 p1997 A70-25407

Satellite video-telephone systems promoting economic growth in developing nations through link-up with developed nations advanced centers

[AIAA PAPER 70-474]

11 p2000 A70-25455

Transmission delay and echo effects in long distance satellite relay telephony links, describing echo suppression and speech quality

12 p2183 A70-27004

TELEPHOTOMETERS

U TELEPHOTOMETRY

TELEPHOTOMETRY

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth

01 p0095 A70-11612

TELESCOPES

NT APOLLO TELESCOPE MOUNT

NT ASTRONOMICAL TELESCOPES

NT CELESCOPES

NT HELIOMETERS

NT MANNED ORBITAL TELESCOPES

NT PARTICLE TELESCOPES

NT PYROHELIOMETERS

NT RADIO TELESCOPES

NT REFLECTING TELESCOPES

NT REFRACTING TELESCOPES

NT SCHMIDT CAMERAS

NT SPECTROSCOPIC TELESCOPES

NT X RAY TELESCOPES

Geostationary mode application to earth sensing, examining resolution requirements for earth scanning tracking telescope

06 p1154 A70-17152

Balloon flights for remote sensor systems tests, describing return-beam vidicon and tracking telescope experiments

06 p1061 A70-17153

Thermal and dynamic considerations of materials choice for satellite mounted telescope mirrors noting Be and silica properties

06 p1064 A70-17781

Telescope resolution limit dependence on refractive index mean square fluctuation and effective aperture in turbulent medium

06 p1067 A70-18396

Mirror material for satellite-borne telescopes, considering Be and CER-VIT or ULE silica thermal and mechanical properties

07 p1279 A70-19000

NASA three meter orbital telescope discussing configuration, optical geometry, launching, power supply, etc

07 p1280 A70-19150

Remote control telescope for deployment in hazardous locations, discussing design criteria, operation and test results

09 p1640 A70-23777

Laser mode matching to obscured circular aperture of optical telescope system in terms of antenna gain

16 p2929 A70-33982

Standard units and assembling of electrical driving mechanism for telescope, using audio reference oscillator, electronic power amplifier and synchronous motor

18 p3259 A70-36609

Lens systems configuration and aberration, determining suitability for wide angle oculars of Galilean telescopes

19 p3420 A70-37262

Optical system mtf measurement by photographic technique for comparing telescopic sight with simulator, discussing performance

19 p3428 A70-38511

Teleradiometer calibration in background radiation absence, using distant and finite point source method and collimator means

20 p3633 A70-39798

TELEVISION CAMERAS

Light valve projectors and TV cameras, showing disparity between video information generation and large screen real time high brightness image presentation

01 p0088 A70-10811

Simulation technique to evaluate TV contrast trackers standard scan performance using video tape recording

01 p0058 A70-10812

Surveyor TV camera conversion from qualitative viewing device into quantitative measuring instrument by calibration coupled with data processing program

[JPL-TR-32-1374]

03 p0490 A70-13662

Meteorological satellite TV cameras development, discussing image sensors and tabulating characteristics

03 p0491 A70-13665

Secondary electron conduction TV camera tube with three color filter wheel for Apollo missions

03 p0493 A70-14025

Black and white and color Apollo 11 secondary electron conduction TV cameras, discussing characteristics and mission requirements

04 p0688 A70-14692

Apollo 7 and 8 command modules TV camera systems design, considering additional function of public information

07 p1280 A70-19229

Earth resources satellite TV cameras operating on different spectral bands, discussing data preprocessing for correlation with topographic maps

09 p1674 A70-22259

TV camera with diffraction limited pinhole lens for visual simulation, solving depth of field and extending field of view without distortion

10 p1887 A70-24217

Real time 2000 line TV camera with 40 MHz bandwidth, 1600 line vertical resolution and 1000 line horizontal resolution

[SMPT PAPER 105-73]

12 p2235 A70-27663

Electronic zoom for low light level TV sensor employing electrostatic image intensifier coupled optically to SEC camera tube

16 p2903 A70-33128

Low light level TV /LLLTV/ tube, camera and sensor development for military and space applications

16 p2903 A70-33129

Apollo 10 color TV camera for real time scenes, describing configuration performance and total system operation

16 p2907 A70-33187

Surveyor TV mechanisms, discussing camera, mirror, zoom lens, filter wheel, focal plane shutter and lubrication

16 p2914 A70-34147

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations

[SMPT PAPER 105-72]

17 p3095 A70-35635

High resolution electron return beam vidicon cameras, comparing transfer functions and SNR with photographic films

20 p3630 A70-39496

Meteorological TV imaging systems development in last decade, including low and synchronous altitude camera, sensors, orthicons, etc

23 p4193 A70-43963

Apollo TV cameras, detailing general characteristics, principal features, optical systems and operational requirements

23 p4195 A70-44382

TELEVISION EQUIPMENT

NT MONOSCOPES

NT TELEVISION CAMERAS

NT TELEVISION RECEIVERS

Spatial and amplitude modulators for laser-photochromic display system producing real time TV pictures or images

11 p2062 A70-25734

X ray inspection with direct TV viewing, discussing specimen geometry effects, equipment, applications, etc

15 p2742 A70-32778

Dual raster high brightness-high resolution TV display using time sharing with conventional CRT

16 p2903 A70-33131

TELEVISION RECEIVERS

Satellite international system chain consisting of down path, receiving earth station and domestic receiver for Europe, North Africa and Middle East TV distribution

02 p0258 A70-12420

Ground frequency converters for reception of NTSC color TV transmission from synchronous communication satellites, tabulating cost estimates

[AIAA PAPER 70-440]

11 p2002 A70-25490

Microwave converter system for ETV satellite reception, discussing characteristics and costs for mass production

[AIAA PAPER 70-439]

11 p2017 A70-25493

Low cost microwave receiver and antenna for instructional satellite TV broadcasting in developing nations

21 p3789 A70-41355

TELEVISION RECEPTION

Direct domestic reception of TV signals from satellites, discussing microwave components, economics and reliability

10 p1840 A70-24448

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position

[SMPT PAPER 105-71]

10 p1890 A70-24601

Geometric distortions in ESSA 7, Surveyor 7 and Mariner 4 TV systems caused by scale distortion, discussing stability of systematic component in magnitude and shape

10 p1890 A70-24727

Low cost earth station and antenna for Canadian domestic satellite, bringing color TV to northern territories

[AIAA PAPER 70-432]

11 p2000 A70-25458

TV photograph image instability of stars, developing discontinuity and variability criteria as elementary approximate method for comparing nonuniformities

16 p2979 A70-34177

TELEVISION SYSTEMS

High power TV broadcast satellite subsystems technologies requirements, considering transmitters, power conditioners, solar arrays and component reliability

[AIAA PAPER 69-1069]

01 p0194 A70-10632

TV system for controlling QF-9 drone aircraft landing, takeoff and BQM-34A target drone in-flight test operations

01 p0058 A70-10815

TV raster scan display using CRT and beam steering scan systems, comparing alphanumeric capability for airport information and control problems

02 p0274 A70-11976

Satellite international system chain consisting of down path, receiving earth station and domestic receiver for Europe, North Africa and Middle East TV distribution

02 p0258 A70-12420

Visual imaging systems for Mars orbiter compared for performance and interactions with mission and spacecraft design

07 p1280 A70-19230

Satellite applications to TV broadcasting for developed and developing areas, considering national and international telecommunications policies

09 p1633 A70-22634

TV instruments for Mariners 6 and 7 providing analog and digital data, comparing resolutions and accuracies to earth based telescopes and Mariner 4 photographs

09 p1682 A70-23506

Aircraft surface temperature measured with airborne IR TV system

09 p1686 A70-23754

Video role in air transport safety, describing runway visual range /RVR/ measurement using TV camera and spaced lights

10 p1889 A70-24507

Vidicon camera tubes applications in TV systems, noting excellence for live pickups and film reproduction

10 p1852 A70-24952

Dual conversion receiver for remote frequency control in satellite TV distribution system

[AIAA PAPER 70-414] 11 p2002 A70-25482

Digital signals conversion into command and control TV displays in multiconsole systems

13 p2411 A70-29789

Open loop TV image motion compensation by image transducer with gyro demodulator analyzing errors in rate and rate-integrating gyros and AC pick-offs

14 p2588 A70-31190

Low light level TV systems performance relationship to visual acuity requirements, considering interfering noise characteristics effect on target recognition

16 p2903 A70-33130

Earth resources satellite /ERS/ TV camera configurations, return beam vidicon camera characteristics and devices for TV picture reproduction on film

16 p2915 A70-34312

Mariner 6 and 7 TV camera pictures of Mars during approach and encounter, discussing IR spectroscopy, celestial mechanics experiment and Martian terrain

17 p3158 A70-34875

Spaceborne narrow band TV system with image memory tube and electronic shutter, noting variable exposure time, motion compensation and multimode scanning

17 p3089 A70-35267

Satellite-borne UV TV system for photometric investigations of UV stars

19 p3428 A70-38456

TV display simulation of instrument and visual aircraft landing approaches, investigating color, collimation and resolution effects on pilot evaluations

20 p3578 A70-39172

OA0 2 satellite Telescope astronomical TV system, describing various developmental problems for future guidelines

24 p4415 A70-45824

TELEVISION TRANSMISSION

Future phase of satellite TV programs distribution in Europe

02 p0403 A70-12645

TV data transmitted by Iantars series automatic ionospheric laboratories released by geophysical rockets at 100-400 km, discussing plasma-ion propulsion system performance

04 p0735 A70-14936

Group delay characteristics curvature in radio relay systems, analyzing crosstalk in picture- sound and beamed multiplex signal transmission by nonlinear distortion method

05 p0815 A70-16774

Wideband transmission of photographic reconnaissance information over long distances using Initial Defense Communication Satellite Program satellites

06 p1006 A70-17346

Geometrical and electrical characteristics of two mirror parabolic antenna for tropospheric radio relay communications lines in centimeter band, analyzing radiation patterns

07 p1240 A70-19125

Apollo 7 and 8 command modules TV camera systems design, considering additional function of public information

07 p1280 A70-19229

Satellite TV transmission economic, technical and practical feasibility, describing direct transmission system

09 p1634 A70-22766

Earth resources data transmission, describing picture reception and reproduction equipment

[AIAA PAPER 70-328] 09 p1634 A70-22856

Soviet book on satellite communication systems for telephone and TV transmission covering orbit selection, signal level calculation, channel characteristics for frequency bands, etc

10 p1840 A70-24378

Satellite distribution of TV signal over earth surface as alternative to terrestrial linkups, overcoming rain attenuation by high power spot beam

[AIAA PAPER 70-454] 11 p1997 A70-25410

TV network distribution in Canada by communications satellite and terrestrial microwave links, discussing signal to noise ratios and picture quality

[AIAA PAPER 70-430] 11 p1998 A70-25417

ACME hybrid airborne satellite TV and communications system for India, using airborne TV transmitters

[AIAA PAPER 70-472] 11 p1998 A70-25418

Satellite ET/TV broadcast system, discussing frequency, receiver population, channel number, beam number, minimum cost solutions, etc

[AIAA PAPER 70-452] 11 p1999 A70-25437

Satellite TV broadcast requirements impact on high power transmitter design, permitting low cost terrestrial receiving systems

[AIAA PAPER 70-434] 11 p1999 A70-25450

High power transmitters for satellites, discussing optimum configurations, supporting power subsystems, breakdown problems in space environments, etc

[AIAA PAPER 70-436] 11 p2000 A70-25459

Frequency sharing between satellite-transmitted FM TV signals and terrestrially transmitted AM-VSB TV signals

[AIAA PAPER 70-438] 11 p2001 A70-25467

Multipurpose domestic satellite system design for TV distribution, discussing frequency sharing, synchronous orbit and system model

12 p2183 A70-26998

Noise effect on modulation transfer function of visual channel by threshold measurements

15 p2698 A70-32013

Two inch high resolution vidicon for TV line processing of printed documents

16 p2906 A70-33173

Nonbinary redundant error correcting codes for improving TV transmission speed and fidelity

22 p3985 A70-42493

SECAM video and audio color TV transmission over Molniya satellite relay path

23 p4162 A70-44091

TV broadcast satellites program distribution direct to home by network and by community

23 p4164 A70-44646

Integrated data processor-operation controller for stellar TV photometer systems in spaceborne observatory, considering limited channel transmission capacity

23 p4167 A70-44649

TELLURIC CURRENTS

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials

07 p1266 A70-19442

Terrestrial electrical conductivity measurement from electromagnetic field variations determination by geomagnetic sounding

07 p1277 A70-20458

Equatorial geomagnetic micropulsations using earth current technique, discussing night and diurnal variations

10 p1875 A70-24435

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials

18 p3249 A70-36916

TELLURIC FIELDS

U ELECTRIC FIELDS

U TELLURIC CURRENTS

TELLURIC LINES

Telluric lines seasonal variations, discussing oxygen and water vapor photoelectric recordings in solar spectrum

16 p0000 A70-34185

TELLURIDES

NT CADMIUM TELLURIDES

NT INDIUM TELLURIDES

NT LEAD TELLURIDES

NT MERCURY TELLURIDES

NT TIN TELLURIDES

NT ZINC TELLURIDES

GeTe thermoelectric power, electrical/thermal conductivity and expansion coefficient measured at 20-600 C, determining suitability as thermoelectric material

01 p0158 A70-10755

Niobium ditelluride single crystals production with purity dependent on initial materials, discussing X ray structural and chemical analysis and electrical properties

03 p0542 A70-13753

Knudsen effusion measurements of stoichiometric MnTe sublimation at high temperature and low pressure

21 p3773 A70-41273

Surface density, charge and field effect mobilities for electrons and holes on MIS insulator-semiconductor structure on narrow bandgap HgCdTe

22 p4086 A70-43018

TELLURIUM

NT TELLURIUM ISOTOPES

N-type Te-doped gallium antimonide conversion to p-type by electron irradiation, noting thermal conductivity variations

13 p2470 A70-29167

TELLURIUM ALLOYS

Cd-Se and Cd-Te systems phase diagrams based on regular solutions theory, discussing molecular interaction energy dependence on composition

22 p4085 A70-42678

TELLURIUM COMPOUNDS

NT CADMIUM TELLURIDES

NT INDIUM TELLURIDES

NT LEAD TELLURIDES

NT MERCURY TELLURIDES

NT TELLURIDES

NT TIN TELLURIDES

NT ZINC TELLURIDES

Nonstoichiometric GeTe defects nature from band structure analysis based on two carrier model

02 p0350 A70-11698

TELLURIUM ISOTOPES

Te nuclear magnetic resonance in amorphous semiconducting sample cycled between conducting and nonconducting states

08 p1557 A70-21697

TELLURIUM 119

U TELLURIUM ISOTOPES

TELLUROMETERS

Distance measurements by microwave tellurometers, discussing accuracy factors

22 p4039 A70-43426

TEMPERATE REGIONS

Adrenocortical responses of military recruits to subtropical climate, making serum and urinary 17-OHCS measurements on subjects fasting, inactive and at thermoneutrality

01 p0032 A70-10359

Seasonal variations of sporadic E virtual height at middle latitudes attributed to hemispheric expansion depending on ozone amount

03 p0476 A70-13907

Electron temperature and density data obtained during Alouette satellite passage over middle latitude red arc, noting influence of intersecting magnetic field lines

03 p0476 A70-13911

HF oblique ionospheric soundings over long temperate latitude path, discussing measured angles of elevation and multipath time dispersion

05 p0847 A70-15998

Sunrise effects in lower ionosphere at midlatitude, discussing long wave absorption measurements, summer electron concentration profile and consistency of aeronomic model

07 p1235 A70-19436

Geomagnetic pulsations with intensity maximum at midlatitudes, noting north to south decreasing trend

07 p1278 A70-20459

Photometric and interferometric observations of midlatitude stable auroral red arc, determining structure, intensity and position

11 p2047 A70-26570

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption

11 p2106 A70-26797

Ionospheric electron content at temperate latitudes during solar cycle increasing phase by radio beacon satellite, discussing diurnal, seasonal and latitudinal variations

12 p2225 A70-27892

Statistical properties of subtropical jet stream maxima over U.S. from Nimbus II IR radiometry

17 p1333 A70-35931

Sunrise effects in lower ionosphere at midlatitude, discussing long wave absorption measurements, summer electron concentration profile and consistency of aeronomic model

18 p3249 A70-36910

F1 layer occurrence probability as function of mean monthly Wolf numbers at midlatitudes, noting solar activity effect

18 p3254 A70-37032

Pc1 pulsations occurrence frequency diurnal annual and 11 year variations at midlatitudes, relating distribution with carrier frequencies of perturbation

19 p3408 A70-37316

Temperate equatorial and auroral zones sporadic E observations and formation theories survey for prediction

19 p3416 A70-38441

Auroras and noctilucent clouds simultaneous occurrence in middle latitudes, discussing mesopause temperature variations and mesosphere heating

20 p3621 A70-39402

Ionospheric electron density response to geomagnetic storms at midlatitudes, noting diurnal variations detected by ATS 3 VHF signals

20 p3623 A70-40479

Total ionospheric electron content nocturnal and latitudinal variations in winter at midlatitudes

20 p3624 A70-40480

Pc1 geomagnetic micropulsation statistics for middle latitudes, discussing solar cycle and annual variations in occurrence rates

21 p3817 A70-41088

Nighttime and daytime midlatitude magnetic bays statistical correlations with riometer-auroral absorption, suggesting precipitating particles role

22 p4018 A70-43107

Winter predawn enhancement of 6300 A airglow at higher midlatitudes, considering roles of oxygen dis-

sociative recombination and photoelectrons production at magnetically conjugate point

22 p4019 A70-43110

Lunar tidal effects on horizontal magnetic field compared at equatorial and midlatitude stations

22 p4021 A70-43279

TEMPERATURE COMPENSATION

One piece KDP and ADP reflector shutters used as laser Q switches, discussing compensation for working surfaces temperature displacement

01 p1016 A70-10060

Silicon strain gage transducer for measurement of pressure between tongue and teeth, developing two types of temperature compensated strain gages

02 p0242 A70-12054

Low temperature high sensitivity temperature compensated heat flux transducers to measure conductive, convective and radiative heat transfer

02 p3033 A70-12740

Gages for static strain measurements at high temperatures, discussing resistivity temperature coefficient compensation

09 p1680 A70-23109

Thermocompensated wire loop microtensensors for machine part stress concentration measurements, including parameter selection nomograms

13 p2409 A70-29519

TEMPERATURE CONTROL

Thermal preconditioning using radioisotope heat source to eliminate inertial sensor warmup time by maintaining aircraft navigation system at constant temperature

01 p0140 A70-10310

Optimal steady state thermal design for fin-tube single and double surface space radiators, including meteoroid protection and pumping power weight penalties

01 p0215 A70-10829

Automatic temperature controller consisting of single element of closed loop feedback system with adjustable transfer characteristics

02 p0296 A70-11874

Radiation pyrometers development for in-flight measuring and controlling aircraft engine compressor blades temperature

[SAE PAPER 690432]

03 p0480 A70-12900

Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties

03 p0608 A70-14304

Spacecraft thermal control during reentry, considering heat absorption, cooling by gas injection, radiant heat removal and shielding

04 p0780 A70-14407

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation

04 p0630 A70-14581

Apollo extravehicular mobility unit (EMU) system developed from Gemini EVA system with improved thermal control and mobility to support contingency extravehicular transfer in emergency

04 p0645 A70-15665

OAO thermal subsystem design to provide temperature control for experiments and spacecraft electronic devices

04 p0765 A70-15668

Temperature distribution causes in earth orbiting satellite, outlining thermal control and temperature calculation methods and prelaunch ground tests

05 p0956 A70-15813

Si fluid thermal actuator as temperature sensor and prime mover for active thermal controller in spacecraft

05 p0806 A70-16124

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion

[AIAA PAPER 69-979]

06 p1172 A70-17180

Automatic temperature stabilizer with high order amplification due to direct heater sensing, noting applicability for synthetic fiber plants and thermophysical laboratories

06 p1064 A70-17783

Series emittance thermal control coatings of polymeric dielectric films overlaying reflectors vacuum exposed to UV, X ray and proton radiation

[AIAA PAPER 70-64]

06 p1106 A70-18069

Multilayer insulation blankets with slits normal to energy transfer direction for thermal control of spacecraft and cryogenic tankage

[AIAA PAPER 70-15]

06 p1156 A70-18076

Thermal control of spacecraft via solid-liquid phase change materials

[AIAA PAPER 70-12]

06 p1092 A70-18137

Screening devices to control heat supplied to spacecraft, discussing mathematical model to determine effective emission

[DGLR-69-060]

07 p1392 A70-18816

Turbine blade and vane air cooling need established by advantages of operating aircraft turbines at high turbine entry temperatures

[AGARDOGRAPH-120]

08 p1559 A70-21931

Thermal controls for spacecraft in space and planetary atmospheres, including heat inputs by solar radiation and planetary albedos

09 p1789 A70-23130

Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation

[AIAA PAPER 69-1024]

09 p1657 A70-23259

Water cooled space suits automatic control based on physiological changes in astronaut during hard work

09 p1627 A70-23458

Silicon oxide films coated satellite aluminum surfaces solar absorptivity and thermal emissivity, noting suitability as temperature control coatings

09 p1613 A70-23514

Insulation foils and surface coatings thermal properties effect on radiation properties for spacecraft thermal control systems

10 p1951 A70-24863

Temperature control of USAF tactical communications satellite (TACSAT) by passive techniques

[AIAA PAPER 70-461]

11 p2120 A70-25441

Thermal control design for diffraction limited large diameter Cassegrainian telescope systems in orbital conditions, using computer and scale model testing

11 p2052 A70-26356

Passive thermal control system design of SERT II nonspinning satellite based on 534-node analytical model calibrated against test data

11 p2127 A70-26358

Biosatellite environmental control coolant loop system design for 30-day mission program, discussing fuel cell power source, cryogenic subsystem, etc

11 p2127 A70-26360

Unidirectional heat pipe system design to control temperature of high power traveling wave tubes in synchronous orbit communication satellite, dissipating waste heat

11 p2127 A70-26362

Radiation stable refractory oxides in white spacecraft thermal control coatings, discussing photocatalysis application to degradation analysis

11 p2067 A70-26364

Thermal control pressure sensitive adhesive tapes for spacecraft applications, discussing properties degradation due to simulated terrestrial and space environments

11 p2067 A70-26366

Mercury bombardment ion thruster life test in space environment onboard space electric rocket test (SERT) satellite, describing passive satellite thermal control system design

11 p2127 A70-26606

Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions

13 p2357 A70-28526

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions

[AIAA PAPER 69-1023]

13 p2384 A70-28530

Shutter thermal control for Helios solar observation satellite, considering closed and open conditions

13 p2505 A70-28769

Oxygen 18 concentration in Greenland ice core correlation to solar activity index, indicating earth temperature control by solar activity

13 p2489 A70-28909

Temperature rate flight control system (TRFCS) for lifting reentry vehicles control and guidance

14 p2614 A70-30464

Constant temperature hot split film anemometer sensors based on velocity and heat flux distribution about probe, measuring flow rates

15 p2734 A70-31691

OGO spacecraft structures, thermal control systems, attitude control, weight and power supplies

15 p2810 A70-31782

Optimal distributed feedback surface temperature control of inertial grade floated rate integrating gyroscope, minimizing instrument degradation

16 p2908 A70-33347

Monopropellant hydrazine RCS rocket engine module, discussing operating conditions, development, thermal control and valve internal leakage

[AIAA PAPER 70-654]

16 p2965 A70-33544

Integrating influence of mediocrstral hypothalamic structures upon temperature regulation of juvenile rat based on Area praoptica medialis stimulation

16 p2849 A70-33697

Model relating spectral reflectance to thermal control materials properties and environment induced changes

[AIAA PAPER 70-831]

16 p2940 A70-33934

Surface recombination centers protecting against discoloration of thermal control coatings due to chemical changes induced by photoproducts holes and electrons in oxide pigments

[AIAA PAPER 70-830]

16 p2940 A70-33935

Metal oxides thermal control coatings, investigating mechanisms of interaction between constituents by luminescent technique

[AIAA PAPER 70-832]

16 p2940 A70-33936

Correction techniques for thermal network lumped parameter inaccuracies with conduction and radiation coupling, considering temperature control system

[AIAA PAPER 70-821]

16 p3002 A70-33943

ZnO coating pigment for spacecraft thermal control, examining UV irradiation effects on electrical properties

16 p2961 A70-34056

Surveyor thermal switch for temperature control to assure spacecraft components performance during temperature extremes on lunar surface

16 p2845 A70-34127

Fluid thermal actuator for temperature control of ITOS /Improved Tiros Operational System/ meteorological satellite, discussing design and performance

16 p2846 A70-34129

Aerospace thermophysics considerations in spacecraft and hypervelocity vehicles systems thermal design, discussing thermal control and control coatings optical and radiative properties

[AIAA PAPER 70-812]

17 p3194 A70-34509

Lightweight spiral wound bimetallic actuators for active spacecraft thermal control systems

17 p3022 A70-34755

Thermally powered reciprocating piston pump for temperature control fluid transport on Thermoelectric Outer Planet Spacecraft (TOPS)

17 p3101 A70-34757

Flexible thermostat for specific temperature range with liquid nitrogen coolant and gas transfer medium

17 p3096 A70-35850

Thermal control through fusible materials for missile S band transmitter package, using computer analysis

18 p2331 A70-36349

British X 3 satellite for investigating thermal control surface finishes stability, ultrathin solar cells, electronic systems reliability and micrometeoroid flux measurement

18 p3333 A70-36511

Mathematical simulation of human thermoregulatory system, considering automatic control theory

18 p2224 A70-36530

Aircraft air conditioning, discussing temperature and humidity control, cooling systems, etc

19 p3358 A70-37975

Thermal space simulation tests on Azur research satellite relating to temperature control subsystems and qualification and acceptance procedures

19 p3399 A70-38288

Space environment simulation chamber for testing of equipment temperature and satellite thermal model

19 p3402 A70-38897

Pyranometer with additional external glass cupola to eliminate temperature differences and heat exchange, discussing laboratory and field test results

20 p3626 A70-39034

Semiconductors, ferrites and segnetoelectrics automatic temperature stabilization problem based on heat source energy conversion

20 p3597 A70-39255

Thermal preconditioning unit using radioactive isotope heat source for temperature control of inertial navigation system

20 p3671 A70-40059

Integrated temperature and humidity control and water recovery subsystem for manned test in space station simulator

21 p3769 A70-40998

Solar arrays for Venus-Mercury flyby, evaluating temperature and power performance

21 p3756 A70-41010

Heat pipes in OAO 3 spacecraft for minimizing structural temperature gradients and validating thermal control approach

21 p3946 A70-41045

Spacecraft thermal control coatings scale models, discussing temperature errors due to energy transport along surfaces

21 p3951 A70-41874

Thyristor-servomotor temperature control unit, describing circuit and applications

22 p3996 A70-42850

Universal proportional high accuracy temperature controller using current regulating circuit consisting of light beam galvanometer, photoconductor, photodiodes and thyristors

23 p4194 A70-43999

Semifluidic proportional control systems for industrial controls involving oven temperature, remote hydraulic pressure regulation, drill bit pressure

24 p4293 A70-45432

Optimal temperature control for confined spaces and life support systems, using mathematical models of environmental control systems

24 p4295 A70-46373

TEMPERATURE DIFFERENCES

U TEMPERATURE GRADIENTS

TEMPERATURE DISTRIBUTION

Dynamic unbalance effects in rigid body rotors, discussing lubricant temperature changes and instability hysteresis

[ASME PAPER 69-LUB-14] 01 p0101 A70-10391

Upper atmosphere structure and energy budget based on IGY/IQSY spectroscopic observations of temperature distribution and stratosphere-mesosphere composition

01 p0072 A70-10578

Stratospheric temperature changes connection with winter D region absorption changes

01 p0073 A70-10583

Nonlinear stress relation in elastic media incompatible deformations, eliminating elastic distortions for known temperature distribution and thermal distortion

01 p0201 A70-10890

Circular plate nonlinear analysis under load and uniform midplane temperatures, using stationary potential energy principle

01 p0205 A70-11145

Transient temperature profiles and thermal stress distribution in circular plates and cylinders with eccentric hole determined by conformal mapping

01 p0207 A70-11153

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe

01 p0192 A70-11506

Turbulence and temperature fluctuations spectral characteristics in thermally stratified atmosphere determined for various wave numbers, using energy and mass transfer functions

01 p0136 A70-11610

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity

01 p0069 A70-11623

Radiative transfer in nongray gas between parallel walls, solving heat flux and temperature distribution

02 p0392 A70-11907

Temperature fields and universal motions in homogeneous isotropic thermoelastic body in absence of body forces and external heat supply

02 p0387 A70-12000

Thunderstorm downdraft trajectories and temperatures, discussing evaluation of cooling due to evaporation

02 p0325 A70-12256

Boundary conditions of heat conduction in systems of vessels connected by rods with given heat capacity and unknown temperature

02 p0400 A70-12674

Measurement techniques for determining density and temperature distributions along radius of plasma cylinder by electron cyclotron resonance, microwave refraction and acoustic resonance

02 p0349 A70-12758

Reinforced plastics models for determining internal stress, temperature and electromagnetic fields of multicomponent reinforced plastics

02 p0323 A70-12806

Heat equation prediction, considering insulated uniform rod with unknown temperature distribution

03 p0604 A70-12993

Superconducting transition temperature variation in bcc region of Ti-Nb-V ternary alloys measured as function of valence electrons and composition

03 p0538 A70-13154

Liquid heating in thin walled porous shells under various boundary conditions, deriving formulas for temperature fields

03 p0604 A70-13208

Circulation gas lens temperature distribution, considering effects of gravity, wall thermal conductivity, glass interlayer, etc

03 p0604 A70-13387

Critical thermal regimes in Couette flow, investigating temperature and velocity profiles of nonisothermal steady state Newtonian flow between two parallel plates

03 p0466 A70-13388

Temperature field in thermally stressed electric machine rotor obtained by solving Poisson and Laplace equations with digital computer, using network method

03 p0414 A70-13517

Solar photosphere temperature fluctuations from model consistent with convection hypothesis agreeing with limb darkening data

03 p0570 A70-13591

Turbulent fluctuation rates of temperature and velocity on basis of measurements in boundary layer with wall heat transfer

03 p0470 A70-14237

Optimal temperature for sintering of compact titanium carbide in Ar atmosphere

04 p0697 A70-14468

Transient temperature distribution, thermal stresses and deformations in thin finite circular disk due to continuous point heat source, using linear thermoelasticity

[ASME PAPER 69-WA/PVP-6] 04 p0768 A70-14789

Transient temperature distribution in inhomogeneous material, using finite difference representation for temperature time derivative

[ASME PAPER 69-WA/HT-33] 04 p0782 A70-14807

Matrix analysis of steady state temperature field and heat flux through multilayer, plane, cylindrical or spherical partitions with internal heat sources

04 p0785 A70-14924

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation

04 p0785 A70-15012

Axissymmetric structures under load and temperature distribution analyzed by matrix displacement method

[DGLR-69-62] 04 p0774 A70-15167

Thermoplastic behavior of bodies under variable loads obtainable as function of time variable external temperature field

04 p0775 A70-15200

Excitation temperature functions calculated in rare gases spectrum lines to determine radial plasma temperature distribution

05 p0886 A70-15798

Temperature distribution causes in earth orbiting satellite, outlining thermal control and temperature calculation methods and prelaunch ground tests

05 p0956 A70-15813

Steady temperature field and stressed state of elastic plane containing heat resistant arc shaped cracks produced by uniform thermal flux

05 p0935 A70-16231

Unsteady heat conduction numerical approximation for infinite cylinder with variable heating and boundary conditions of third kind

05 p0936 A70-16294

Heat source temperature distribution on surface of infinite cylinder with zero temperature, presenting solution to boundary value problem

05 p0957 A70-16296

Spectroscopic determination of radial temperature distribution at various currents in negative glow of hollow cathode discharge, analyzing influence of gas pressure

05 p0888 A70-16358

Unsteady laminar free convection caused by heating semiinfinite flat vertical plate, obtaining velocity and temperature distributions

05 p0957 A70-16370

Martian surface temperature distributions based on IR scans of disk compared with predictions of thermal properties

05 p0909 A70-16389

IR imagery by InSb detectors applied to mapping earth surface thermal distribution

05 p0840 A70-16498

Thermal conductivity and aperiodic temperature distribution in microstructure of composite materials reinforced with solid and hollow fibers

05 p0958 A70-16952

Unsteady temperature field of uniformly thick disk for inhomogeneous boundary conditions and small Fourier numbers solved by Laplace operation

05 p0958 A70-17013

Temperature of contact surface between two homogeneous isotropic solid bodies determined by calculating plane heat source of steady three dimensional temperature field

05 p0958 A70-17014

Temperature field in internally cooled gas turbine blades determined, using integrator combined with coordinating device

05 p0954 A70-17057

Tensile tests facility design for wide temperature ranges with loading system to maintain constant strain rate up to failure

05 p0830 A70-17072

Satellite IR measurements of surface horizontal temperature structure of Gulf Stream compared with ship and aircraft data

05 p0844 A70-17104

Surface roughness effects on radiant heat transfer rate of isolated plane surface with uniform temperature illuminated by collimated solar flux

06 p1172 A70-17178

Natural convection heat transfer from vertical plate immersed in thermally stratified fluid

06 p1175 A70-17685

Atmospheric temperature vertical profile reconstruction from ascending radiation observations using data regularization

06 p1097 A70-17793

Temperature distribution law for semiinfinite and infinite solid bodies under steady heat conduction in presence of concentrated heat source

05 p1178 A70-17872

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data

06 p1057 A70-17887

Static pressure, temperature profiles, heat transfer and optical data for turbulent boundary layer-shock interaction with/without injection

[AIAA PAPER 70-91] 06 p1042 A70-18210

Shock wave structure in He-Ar mixture velocity and temperature profiles based on kinetic model equations

06 p1051 A70-18346

Local heat transfer coefficients determined from temperature distribution on porous walls, deriving mathematical expressions for various surface geometries and transfer modes

06 p1184 A70-18555

Vertical motion and temperature structure of severe thunderstorms from jet aircraft penetration

06 p1102 A70-18585

Natural convection flow interactions from individual surfaces in closely spaced array of heated elements, discussing effect on heat transfer, induced flow and temperature field

07 p1418 A70-18644

Temperature distribution in heated horizontal layer of high Prandtl number silicone fluids at high Rayleigh numbers confined between rigid parallel conducting plates

07 p1418 A70-18647

Workpiece temperature during asymmetrical plane polishing by wheel face, deriving temperature distribution formulas for maximum heat source intensity

07 p1291 A70-18828

Wall temperature variation of transpiration cooled tube surrounding plasma arc calculated from gas mass flow and wall properties

07 p1420 A70-19214

Real gas behavior effect on shock tube temperature and pressure flow nonuniformity for range of Mach numbers

07 p1257 A70-19337

Circumsolar plasma structural inhomogeneity origin

07 p1384 A70-19418

Vertical temperature profile diurnal variations of Mars atmosphere using models, noting aerosol influence

07 p1385 A70-19422

Optimal localized heat treatment of welded products, analyzing temperature fields and stresses during heating and cooling of ferromagnetic materials

07 p1294 A70-19477

Unsteady temperature field and thermal stresses in reinforced anisotropic plate strengthened at rim by thin isotropic rod

07 p1408 A70-19543

Toupin and Knowles elasticity theory applied to spatial decay estimate for parabolic heat equation used in diffusive temperature field

07 p1409 A70-19565

Temperature fields and hydrodynamics in laminar flow of vertical liquid layers during free convection

07 p1422 A70-19655

Linear kinetic theory for condensation and evaporation at small Knudsen numbers, considering extrapolated temperature jump determination

07 p1422 A70-19656

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution allowing for initial unheated plate segment

07 p1423 A70-19657

Temperature stress distribution in cylinder or sphere with variable surface temperature and heated by external sources

07 p1411 A70-19819

Steady temperature field of two dimensional periodic contact surface in vacuum, using conjugate harmonic functions for thermal flux lines, isotherms and thermal resistance

07 p1423 A70-19820

Functions describing spatial-temporal temperature distribution in hyperbolic partial differential equations for nonstationary heat exchange between fluid flow and boundary wall

07 p1423 A70-19839

Temperature distribution in active elements of explosion proof asynchronous electric motors with multichannel bilateral axial flow ventilation systems
07 p1196 A70-19841

Temperature renormalization for improving velocity distribution function representation in solving nonlinear Vlasov equation, transforming Hermite polynomials
07 p1328 A70-20201

Wave disturbances in tropical lower troposphere, discussing cross spectrum analysis of wind, temperature, relative humidity and surface pressure
07 p1275 A70-20304

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region
07 p1391 A70-20420

Temperature fields creation in infinite or finite regions by moving surfaces with given time dependence of temperature studied by subjecting diffusion equation to transformations
08 p1597 A70-20959

Damped isotropic turbulence kinetic and temperature fluctuation energy spectra, neglecting viscosity and molecular heat conduction
08 p1483 A70-20961

Cloud layer vertical displacement effects on upper boundary and temperature changes in st-sc using aircraft sounding data
08 p1537 A70-21107

Turbulence coefficient and profile in atmospheric boundary layer from wind and temperature distribution, obtaining formulas from model approximating coefficient by altitude function
08 p1538 A70-21112

Thermal interaction between casting and mold at beginning of cooling using mathematical model for temperature field
08 p1506 A70-21139

Solidification thermal conditions during Ti casting by melting out patterns in graphite molds, investigating heat accumulation coefficients in molds
08 p1506 A70-21142

Steady temperature field and stresses produced by thermal sources in infinite elastic plane containing insulated rectilinear crack, determining thermoelastic state of half plane
08 p1587 A70-21172

Cooled turbine blades temperature field calculated considering variations at turbine inlet, over blade length, material temperature dependence and heat transfer boundary conditions
08 p1597 A70-21185

Hot-wire anemometry equation suitable for wide regions of velocity and temperature derived by computing thermal losses by supports
08 p1496 A70-21236

Transient heat conduction and stationary temperature distribution calculation in curvilinear coordinates using finite element method
08 p1590 A70-21362

Transient radial temperature distributions in cylindrical shells via Carslaw and Jaeger procedure involving binomial theorem and asymptotic expansions of Bessel function
08 p1599 A70-21588

Transient temperature distribution in flow through channel with arbitrary cross section, taking into account internal heat generation and viscous dissipation
08 p1599 A70-21767

Combustion rates and temperature distribution in condensed and gaseous phases of ammonium perchlorate sandwich with synthetic resin middle layer
09 p1741 A70-22105

Three dimensional RC network simulating temperature fields in IC at different heat source power dissipation laws, discussing harmonic heat source field
09 p1643 A70-22128

Electron temperature distribution in thermal boundary layer about probe electrodes calculated by successive approximations allowing for electron heating by arc
09 p1734 A70-22167

Atmospheric temperature spectra at low elevation showing consistency with Monin-Obukhov scaling
09 p1715 A70-22358

Boundary point least squares technique extended to thermal and thermal stress problems in similar regions, deriving temperature and stress functions
09 p1774 A70-22580

Axisymmetric or plane bodies temperature distribution from heat conduction analysis using computer program based on finite element method
09 p1788 A70-22581

Elastic solution and finite element method applied to heat conduction and thermal stress in temperature field determination
09 p1774 A70-22587

Temperature distribution in infinite and finite circular hollow cylinders, considering surface heat flux and linear heat transfer
09 p1788 A70-22595

Temperature distributions in multidimensional transient conduction heat transfer, using variational method and Laplace transformation
09 p1788 A70-22705

Laser measurements of permittivity fluctuations spectrum of turbulent atmosphere, noting proportionality to temperature spectra at optical frequencies
09 p1635 A70-22962

Temperature and stress fields in orthotropic plate with partial surface insulation, examining boundary conditions
09 p1777 A70-23078

Temperature fields and thermoelastic stresses in doubly connected structural elements solved in curvilinear coordinates system corresponding to conformal mapping of annulus
09 p1777 A70-23080

Temperature fields in cylindrical shell under axisymmetric heating, ensuring optimal stressed state
09 p1778 A70-23081

Temperature field in infinite plate with disk shaped inclusion and stationary point heat source determined, allowing for heat transfer conditions
09 p1778 A70-23082

Temperature fields and stress-strain state in elastic bodies with thin walled cylindrical shell inclusions during uniform heat flow at infinity
09 p1778 A70-23083

Thermoelastic stresses in plates and shells in random temperature fields, studying influence on service life
09 p1778 A70-23084

Structural elements reliability determination simulated by microinhomogeneous polycrystalline medium under thermal stresses and in stationary nonuniform temperature fields
09 p1778 A70-23085

Transversely isotropic body of revolution under combined surface loads and stationary axisymmetric temperature field, obtaining displacement vector and stress tensor in analytic functions
09 p1778 A70-23086

Algorithm for stress-strain state calculation of nonuniformly heated cylinder weakened by star-shaped cavity
09 p1779 A70-23094

Rectangular plate in unsteady temperature field, analyzing thermoplasticity problem by reducing solution to linear system with variable coefficients
09 p1779 A70-23098

Layered conical shell creep under axisymmetric load and time dependent temperature field by iterating boundary integral equation
09 p1779 A70-23099

Sensors design for studying temperature fields and stressed state of structures
09 p1680 A70-23106

Wave dispersion relations in uniform magnetized plasma represented in single integral form, discussing model loss-cone and temperature anisotropy distributions
09 p1736 A70-23188

Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods
09 p1613 A70-23238

Strain and temperature fields interrelation effect on longitudinal wave propagation in viscoelastic cylinder, determining phase velocities and attenuation coefficients
09 p1781 A70-23285

Metal probes friction coefficient and impact temperature distribution during impingement onto rotating chromium steel disk related to speed under various atmospheres
09 p1708 A70-23425

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces
09 p1790 A70-23555

Solid radiating sphere cooling in space, determining transient temperature distribution by finite difference computing techniques
09 p1790 A70-23562

Centrifugal forces and nonuniform heating effect on natural vibration frequencies of circular plates using lumped parameter method
09 p1784 A70-23588

Boundary function of unsteady temperature field in bodies with moving surface at constant temperature calculated by least squares method
09 p1791 A70-23620

Fluid boiling heated nonuniformly in pipe, deriving formulas for unsteady temperature field by integrating energy equation
09 p1791 A70-23716

Heat and mass transfer during liquid surface evaporation in vacuum, calculating temperature field on basis of heat balance level
09 p1791 A70-23717

Temperature field distribution in long thin narrow plate composed of materials differing in thermophysical characteristics, creating field by moving heat source on plate
09 p1791 A70-23723

Temperature fields and thermal stresses in FN fiberglass reinforced textile under nonstationary unilateral heating, determining stress as function of time and heating rate
09 p1710 A70-23724

Temperature field and combined radiative-conductive heat flux in weakly absorbing cylindrical layer bounded by nonblack surfaces
10 p1966 A70-23866

Temperature field and heat conduction equation for two layer polymer cylinder multiply heated from within, considering material decomposition
10 p1966 A70-23870

Velocity and temperature distribution behind shock waves in hydrogen plasma measured to determine factors responsible for discrepancies in Rankine-Hugoniot conditions
10 p1867 A70-24149

Temperature field in work piece generated by grinding wheel face investigated for cylindrical and surface grinding
10 p1894 A70-24291

Integrated circuits involving long-strip heat source surrounded by multiple layers, expressing temperature distribution by Fourier transformation obtained integrals
10 p1850 A70-24620

Atmospheric temperature vertical profile reconstruction from ascending radiation observations using data regularization
10 p1913 A70-25024

Convective-radiative heating of multilayer plate approximating temperature field by iteration
10 p1969 A70-25143

Thermoelasticity problem for plane with rectilinear cut with constant temperature at initial moment of time, using approximating kernel of integral equation
10 p1965 A70-25296

Temperature and heat flux in plane, cylindrical and spherical multilayer diaphragms with boundary conditions, assuming harmonic temperature variation
10 p1970 A70-25321

Energy equations solved for step change of wall temperature and heat flux, determining turbulent heat transfer in tube, discussing asymptotic solutions validity
11 p2146 A70-25334

Ambiguities during brightness temperature distributions reconstruction from intensity interferograms
11 p2048 A70-25335

Air ventilated cassette-type electronic equipment steady thermal regime, measuring local excess temperatures relative to ambient temperature
11 p2017 A70-25583

Nonisothermal dielectric coating on conductor surface, analyzing temperature distribution effect on thermal emission characteristics
11 p2148 A70-25975

Temperature, stresses and deformations in melting plates of elastic perfectly plastic material, using penetration depth concept with heat balance approach
11 p2138 A70-26134

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits
11 p2149 A70-26153

Temperature distribution in shadowed lunar craters formulated in Fredholm integral equations, showing constant temperature and correction for soil thermal inertia
11 p2112 A70-26155

Temperature distribution in opposed jet diffusion flames, discussing mass fluxes and fuel and oxygen concentrations effect
11 p2151 A70-26385

Seminfinite elastic body with instantaneous heat source on surface, analyzing temperature and thermal stress distributions
11 p2139 A70-26406

Hollow homogeneous polymer cylinder thermoelastic stressed state, analyzing radial temperature and Poisson Coefficient variations
12 p2325 A70-27532

Turbulent Prandtl number values for air with injection and suction obtained from velocity and temperature profile data
12 p2210 A70-27699

CAT parameters sensitivity to horizontal wind and temperature distribution
13 p2444 A70-28587

Clouds upper height boundary relation with radiation temperature field from satellite data, noting cirrus clouds influence
13 p2444 A70-28589

Radiative energy transport effect on temperature distribution in conduction heated plane layer applied to solar chromosphere
13 p2488 A70-28716

Linearized Fredholm equation solution, describing temperature field for energy transport by radiation and heat conduction
13 p2521 A70-28860

Heat transfer mechanism in foil-vacuum insulations, analyzing factors responsible for point of inflection on experimental temperature field curves 13 p2521 A70-28861

Thermal stresses in solid nonhomogeneous sphere in high periodic temperature field, assuming temperature dependent Young modulus and linear thermal expansion coefficient 13 p2512 A70-28979

Band or line shape effect on radiative transfer in nongray medium between parallel walls, discussing temperature distribution and radiative flux 13 p2521 A70-29136

Thermal stresses dependence on temperature field during axisymmetric heating of rigid cylindrical shells 13 p2421 A70-29426

Thermoelastic equations for circular sandwich plates bending due to asymmetric temperature distribution 13 p2518 A70-29976

Surface temperature fluctuations during dropwise condensation at various heat fluxes 14 p2663 A70-30256

Flat plate and cylinder with periodic Joulian heating from time dependent heat source, analyzing transient temperature distribution 14 p2664 A70-30269

Radiant heat flux for standard model, dry and humid atmosphere, calculating temperature variations with altitude for entire IR spectrum 14 p2603 A70-30401

Northern Hemisphere temperature atlas for SST cruise altitudes, estimating probabilities of enroute temperatures and risk increase 14 p2609 A70-30609

Coupled temperature and electric potential distribution in finite rotational symmetric hydrogen arc column in axial magnetic field 14 p2621 A70-30656

Soviet monograph on thermal conductivity of plates and bodies of revolution covering temperature and stress distributions, multilayer shells, etc 14 p2666 A70-30952

Stress, strain, temperature, electric and magnetic field distributions resulting from magneto-thermoelastic interactions in infinite elastic solid subjected to transient heat source 14 p2661 A70-31229

Rarefied gas slip flow coefficients calculations at nonuniformly heated surface, demonstrating relationship between temperature and isothermal slip coefficients 15 p2776 A70-31478

Thermal convection formation in viscous fluid plane horizontal layer from measurements of unsteady temperature field 15 p2824 A70-31591

Natural convection wake from heated horizontal line source in liquids and in air, determining temperature field in plume above wires 15 p2825 A70-31817

Chorioretinal damage thresholds spectral dependence of intense light sources, describing temporal, axial and radial temperature distributions 15 p2682 A70-32014

Longitudinal velocity and temperature fluctuation spectra in turbulent boundary layer, showing highest spectral densities at internal zone 15 p2826 A70-32021

Heat transfer between incompressible fluid flow and insulated walls with time varying temperature at channel inlet, applying Laplace transforms 15 p2827 A70-32175

Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer 15 p2802 A70-32491

Linear kinetic theory for condensation and evaporation at small Knudsen numbers, considering extrapolated temperature jump determination 15 p2828 A70-32693

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution taking into account initial unheated plate segment 15 p2828 A70-32694

X ray differential drift scans of moon, measuring cold limb brightness temperature and temperature distribution 16 p2974 A70-33646

Temperature distributions and heat flux for gray gas in radiative equilibrium bounded by walls with different temperatures, using differential approximation [AIAA PAPER 70-834] 16 p3001 A70-33929

Radiatively interacting adjoin plates in presence of collimated solar flux, considering surface roughness effects on equilibrium temperature distribution [AIAA PAPER 70-817] 16 p3002 A70-33946

German monograph on temperature distribution and motion of free burning arcs in transversal magnetic fields and gas flows, covering aerodynamic model concept 16 p2959 A70-34077

Thermorheologically simple model for viscoelastic materials stochastic behavior in random temperature fields, introducing reduced time scale 16 p3003 A70-34238

Transverse magnetic field effects on Ar cross flow arc temperature distribution, cross section shape and profile, discussing forced convection effects [AIAA PAPER 70-777] 17 p3138 A70-34477

Temperature and Mach number distributions measurements on supersonic turbulent boundary layers for reanalyzing heat transport [AIAA PAPER 70-744] 17 p3066 A70-34499

Lunar rilles temperature distribution analysis, examining contour shape, aspect ratio and solar elevation angles effects 17 p3152 A70-34507

Rarefied binary gas mixture transient Couette flow, considering nonlinear case of plate with equal temperature accelerated impulsively 17 p3067 A70-34546

Thermal response of passive heliotrope solar array orientation device using rotating bimetallic helix, performing energy balance analysis for helix temperature distribution 17 p3082 A70-34761

Satellite temperature distribution prediction from digital simulation 17 p3177 A70-35250

Nonstationary temperature fields and stresses in wedge shaped strip and thin plates with heat transfer for discontinuous boundary conditions 17 p3189 A70-35342

Temperature distribution of solar atmosphere, discussing solar models 17 p3169 A70-35382

Heat conduction from sliding solids, discussing restrictions effect on temperature field near interface 17 p3197 A70-35543

Aerial IR surveys of surface temperature patterns of Hudson Bay during ice free seasons 17 p3079 A70-35621

Detonation in nonuniformly heated gas capable of chemical reaction, obtaining numerical solution 17 p3198 A70-35737

Free convection in air and water above horizontal wire heated by DC current, measuring flame temperature distribution by diffraction interferometer 17 p3198 A70-35743

Laminar free convection near two dimensional and axisymmetric nonisothermal bodies, examining surface temperature distribution and heat flux 18 p3345 A70-35999

Temperature changes minimization techniques in specimens during microplasticity tests, describing gage assembly for plastic strain measurement 18 p3272 A70-36030

Stationary heat conduction model of two cylinders abutting at ends with internal nonuniform temperature distribution 18 p3345 A70-36128

Spatial-temporal distribution of laser spark plasma electron density and temperature based on holographic interferometry 18 p3265 A70-36152

Optical observation of laminar convective flow caused by combined action of concentration and temperature fields 18 p3346 A70-36276

Slab melting under hot spots, obtaining starting solutions 18 p3346 A70-36491

Two dimensional turbulent film cooling, predicting initial region temperature distribution by solving finite difference form of thermal energy equation 18 p3346 A70-36497

Surface temperature fluctuations during steady state boiling from tube, using fast response thermocouple 18 p3347 A70-36504

Unsteady temperature fields in heat conduction problems associated with high temperature effects on abutted cylinders 18 p3348 A70-36572

Half space nonstationary temperature field with mobile heating at edges, using integral transformations 18 p3348 A70-36725

Surface temperature distribution over rotating nucleus of comet deficient in volatiles 18 p3319 A70-37058

Milky way galactic plane corrugation, discussing maximum hydrogen brightness temperature oscillating in sinusoidal pattern 18 p3328 A70-37167

Air-mechanical fuel injection effect on gas turbine engine combustion chamber working process, investigating heat generation coefficient, temperature field nonuniformity and combustion efficiency 19 p3489 A70-37248

Shadow method for temperature field in potentiometer winding 19 p3420 A70-37264

Friction and temperature fields in lubricant film of journal bearings, discussing friction torque and heat dissipation [ASME PAPER 69-LUB-24] 19 p3434 A70-37601

Dynamic unbalance effects in rigid body rotors, discussing lubricant temperature changes and instability hysteresis [ASME PAPER 69-LUB-14] 19 p3435 A70-37606

Thermoelastic stresses in infinite anisotropic slab due to temperature field variations along thickness and length 19 p3539 A70-37872

Ultrasonic measurement of temperature distribution in solid, liquid and gaseous media, using reflection and transmission techniques 19 p3427 A70-37963

Annual temperature variation in low stratosphere based on harmonic analyses at 100 mb 19 p3462 A70-38263

Heat transfer in boiling liquid from temperature field and temporal changes in liquid above heating surface, determining isotherms by laser interferometry 19 p3447 A70-38455

Temperature and radio brightness distributions in active regions and upper chromosphere during minimum activity periods 19 p3522 A70-38557

Solar wind velocity variations showing relationship with electron density excess and localized region temperature of corona 19 p3512 A70-38693

Hydromagnetic flow past infinite impulsive motion plate, determining velocity and temperature fields distribution 19 p3482 A70-38934

Main sequence stars faint end IR observations for luminosities and temperatures 20 p3702 A70-39014

Non-LTE line blanketed solar model atmospheres with various temperature distributions 20 p3703 A70-39020

Pressure and temperature distribution in constant volume viscous Poiseuille gas flow velocity profile 20 p3608 A70-39121

Fretting corrosion zone steel, measuring transient temperature distribution during contact friction 20 p3647 A70-39243

Damped isotropic turbulence kinetic and temperature fluctuation energy spectra, neglecting viscosity and molecular heat conduction 20 p3608 A70-39383

Heat exchange and temperature distribution between two liquids divided by plate, discussing possible errors 20 p3737 A70-39634

Plate temperature field and stress distribution under thermal pulses, evaluating critical heat load for damage 20 p3737 A70-39635

Unsteady temperature field in cylinder surrounded by thin shell under uniformly distributed heat sources 20 p3737 A70-39640

Steady turbulent flow heat exchange in near wall region at large Prandtl numbers, plotting temperature distribution curves 20 p3612 A70-39811

Elastic bodies collision, determining temperature field variations and contact pressure 20 p3725 A70-39869

Laminar flow of liquid in duct with zero heat resistance of walls, calculating temperature distribution during radiative convective heating 20 p3613 A70-40297

Supersonic weakly ionized plasma jet in argon, investigating axial and radial temperature profiles by electrical probe techniques and spectroscopic and photographic methods 20 p3685 A70-40463

Transient and steady state free convection heat transfer with mercury in vertical rectangular channel, measuring temperature distributions 21 p3941 A70-40773

Fusion welding cooling rates, peak temperatures and heating duration relationships to distance from fusion line predicted by theory for comparison with experiment 21 p3832 A70-40791

Steady one dimensional temperature field of cylindrical shell spacecraft, allowing for heat conduction and convective and radiative heat transfer within shell 21 p3942 A70-40841

Mars lower atmosphere vertical temperature distributions from Mariner 6 and 7 radio occultation data, using improved trajectory estimates 21 p3884 A70-40908

Gaseous film cooling effect on adiabatic wall temperature distribution in rocket nozzle with gas injection 21 p3867 A70-41028

Natural convection boundary layer stability on isothermal flat vertical wall or subjected to linear temperature distribution 21 p3950 A70-41443

Numerical procedure for second order nonlinear differential equations, discussing temperature distribution in semiinfinite solid homogeneous medium 21 p3950 A70-41449

Apollo 11 fines gas evolution and physical changes via heat treatment, discussing Ar 40 anomaly, lava structure origin and oxidation rate

21 p3907 A70-41577

Internally cooled turbine blade with longitudinal cooling channels, calculating temperature field by combined analytical and analog method

21 p3868 A70-41772

Temperature distribution in rotating thin cylindrical shell with line conduction discontinuity under solar heating, evaluating tubular elements thermal bending on spinning spacecraft

21 p3951 A70-41875

Cellular convection in fluid layers with parabolic temperature distribution, calculating stability effects of gravity and surface tension gradients

21 p3952 A70-42078

Nonuniform radiation heat transfer between two coaxial cylinders, obtaining temperature distribution by Fourier series expansion

21 p3952 A70-42082

Wave number spectral correlation of temperature and longitudinal velocity fluctuations in fully developed pipe flow

21 p3811 A70-42090

Temperature distribution measurement inside solid samples by Mossbauer effect, considering application to turbine blades

21 p3830 A70-42165

Turbulent incompressible conducting fluid jets velocity and temperature characteristics in presence of longitudinal and transverse magnetic fields

21 p3860 A70-42226

Temperature, metal vapor density and energy balance in Ar shielded welding arc with Fe electrodes

22 p4043 A70-42381

Buoyant hot two dimensional laminar vertical jet in quiescent colder fluid, calculating temperature and velocity distributions by integral method

22 p4010 A70-42639

Heat conduction into semiinfinite homogeneous solid with thermal conductivity dependence on temperature, noting temperature profile asymptotic behavior for similarity solution

22 p4123 A70-42641

Nonlinear heat transport in structural elements due to radiative transfer, analyzing temperature field dynamics

22 p4125 A70-43360

Tube heat exchangers operation at low transfer coefficient, calculating unsteady temperature field in wall and heat transfer agent

22 p4125 A70-43364

Temperature distribution and thermal convection resistance due to steady heat flow in laminated composite

22 p4126 A70-43689

Nonsteady temperature and thermal stress distribution in gas turbine blades, using plastic model and photothermoelastic method

22 p4093 A70-43743

Tropical cyclone development model for axisymmetric vortex and quasi-balanced conditions, considering vertical heat distribution, rate of intensification and energy budget

23 p4213 A70-43896

Electromagnetic absorption of Martian matter based on vertical temperature variations in planet surface layer

23 p4240 A70-43913

Thin plates two dimensional dynamic thermoelastic problem, determining hyperbolic type heat conduction for temperature field

23 p4265 A70-43985

Sandwich multilayer structures temperature fields and heat transfer characteristics at high temperature [ICAS PAPER 70-38-BIS]

23 p4276 A70-44136

Spherical multilayer shell unsteady temperature fields, assuming mixed convective and radiative transfer at inner surface due to hot gas flow

23 p4276 A70-44165

Thermal convection formation in viscous fluid plane horizontal layer from measurements of unsteady temperature field

23 p4277 A70-44278

Time optimal problems involving parabolic equations in heating of rod with piecewise continuous thermophysical characteristics and temperature distribution constraints, deriving iterative solution

23 p4277 A70-44306

Temperature distribution and thermal conductivity determination in Ar plasma cascade arc

23 p4276 A70-44438

Temperature distribution in cylinders of aircraft internal combustion rotary piston engine under air cooling

23 p4234 A70-44742

Thermal flux surface distribution lifting bodies, discussing aerodynamic efficiency dependence on drag and zero angle of attack Mach number

23 p4136 A70-45019

Pulsed ruby laser radiation energy characteristics relation to crystal temperature distribution, thermal deformation and compensating lens focal length

24 p4352 A70-45460

Subsolidus state multicomponent eutectics systems temperature range based on number and melting points ratios of individual components

24 p4367 A70-45476

Metal and nonmetal thermal nondestructive tests based on surface temperature distribution produced by heat treatment

24 p4348 A70-45744

Spacecraft astronomical instrument structural design, examining aging, vibration and temperature distribution deformations and optical surface contamination

24 p4339 A70-45823

Plate temperature jump and heat flux in Knudsen layer using Bhatnagar-Gross-Krook model

24 p4429 A70-45997

Nonlinear distributed sources induced diffusion, calculating relationship between source intensity and maximum temperature or mass concentration field

24 p4380 A70-46034

One-phase Stefan problem of heat conduction with melting, proving existence and uniqueness theorems for solid and free boundary temperature determination

24 p4429 A70-46036

Stratosphere radiation measurements by Nimbus 3 infrared spectrometer for 15 micron frequency, considering temperature variations

24 p4330 A70-46074

Surface temperature distribution of heat generating solid body in contact with parallel viscous fluid flow

24 p4430 A70-46368

TEMPERATURE EFFECTS

Reversible cold induced deactivation of cat neocortex bioelectric activity in chronic experiment, noting cooling system

01 p0031 A70-10056

Current carrier mobility in n-InSb calculated by Schwinger variational method over temperature range

01 p0154 A70-10098

Natural absorption band absorption coefficient frequency and temperature dependences in doped n-InSb

01 p0154 A70-10100

Ferroelectric sodium nitrite single crystals LF linear electro-optical coefficients as function of temperature

01 p0154 A70-10104

Temperature effect on work function minimum of cesiated W surfaces

01 p0154 A70-10108

Output voltage stabilizers for thermal compensation in semiconductor power generating circuits, using stabiltron reference source

01 p0049 A70-10139

Heat resistant alloys for gas turbine blades observed for long term heating effects on changes of hardness, tensile, impact and stress-rupture properties and microstructure

01 p0116 A70-10149

GaAs and Si photocell batteries powered by solar radiation, investigating temperature dependence of efficiency I-V characteristics and optimal power

01 p0007 A70-10177

Hydrogen-oxygen variable length combustor longitudinal instability, studying hydrogen injection temperature effects on pressure interaction index and pressure sensitive time lag

01 p0214 A70-10324

Re 187 to Os 187 nuclear decay rate variability, discussing earth age, temperature and ionization effects

01 p0178 A70-10349

Negative ion reactions relevant to D region measured in ESSA flowing afterglow system as function of temperature

01 p0070 A70-10406

Gas laser beams short time constant and thermal self defocusing following small spot focusing on thin dye sample

01 p0109 A70-10431

Microstructural interfacial stability and property retention after elevated temperature exposure of eutectic composites, discussing coarsening rate relationship to interfacial area and energy

01 p0117 A70-10485

Semiconductors as optical limiters for Q switched lasers, reporting temperature values for nonlinear absorption coefficients of Si, CdSe, CdTe and GaAs

01 p0158 A70-10563

Creep deformation modes of Ni-base austenitic superrefractory alloy as function of test temperature

01 p0118 A70-10704

Thermomechanical processing of high strength low alloy steels to evaluate effects of composition, coiling temperature and cooling rate on mechanical properties and microstructures

01 p0118 A70-10726

Strain rate, temperature and alloy content effects on plastic flow in binary substitutional alloys of bcc iron

01 p0119 A70-10735

Tantalum base alloy T-111 creep tests in vacuum at elevated temperature suggesting diffusion controlled microcreep mechanism

01 p0120 A70-10738

Martensite start depressed temperatures vs pressure for steels, discussing hardness effects and microstructure

01 p0120 A70-10740

Hot junctions nonuniform heating influence on thermoelectric generator efficiency, taking into account temperature dependence of thermoelement materials properties

01 p0009 A70-10753

Carbon dioxide refractivity measured under simulated Martian conditions and standard temperature and pressure, comparing results with radio occultation methods

01 p0186 A70-11085

Plasma injection occurrence as function of temperature in n-InSb subjected to low electric field strengths and fitted with Ohmic contacts

01 p0159 A70-11176

Vapor pressures of cobalt over pure cobalt and over Ni-Co alloys determined as function of temperature by isotope exchange method

01 p0121 A70-11233

High temperature internal friction measurements on miniature torsional pendulum specimens from TD nickel bar, showing damping differences due to microstructural anisotropy

01 p0122 A70-11237

FeCo V plastic deformation and fracture, noting temperature and grain size effects on yield and flow stresses, ductile to brittle transition, etc

01 p0123 A70-11244

Vibrational relaxation times in carbon dioxide and carbon dioxide-argon mixtures at 360-3000 K, using shock tube and laser schlieren method

01 p0148 A70-11355

Ternary Al-Zn-Mg alloys stress corrosion cracking properties, showing effects of aging temperature and prestrain

01 p0123 A70-11387

Unsteady heat transfer from porous flat plate with impulsive motion and rising temperature, analyzing compressible boundary layer equations using Laplace transform

01 p0067 A70-11390

Elastic ring reinforced annular plate of uniform thickness, heated nonuniformly along radius, discussing axisymmetric and asymmetric stability losses

01 p0210 A70-11415

Bauschinger effects in repeated tensile and compressive strains in inelastic media under variable temperatures as function of load vector, using plastic yield

01 p0211 A70-11422

Beryllium properties and processing including magnetothermal reduction, power purity, oxygen content, grain size and temperature effects on mechanical properties

01 p0124 A70-11618

Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium

01 p0124 A70-11620

Comfort and thermal sensations and associated physiological responses during exercise at various ambient temperatures, noting effects on sensory estimates

01 p0031 A70-11648

Current-voltage and current-temperature characteristics of alloyed p Ge-n Si heterojunctions, discussing current flow process complexity

02 p0350 A70-11667

Temperature effects on tensile deformation mechanism of Mo single crystals, investigating stress-strain characteristics and slip geometry

02 p0316 A70-11699

Ambient temperature effects on rats excretion of epinephrine, norepinephrine and major metabolites

02 p0232 A70-11714

Constitutive equations and thermally activated dislocation processes in metals, noting temperature and strain rate relationship

02 p0316 A70-11737

Mutual diffusion coefficient of hydrogen atoms and molecules in upper atmospheres of major planets calculated as function of temperature, using Chapman-Enskog theory

02 p0342 A70-11817

Decay times for thermal disturbances near cloud tops in Jupiter atmosphere, discussing hydrogen absorption

02 p0368 A70-11827

Thermal resonator effects on YAG-Nd laser rods with dielectric covered ends, using resonant model to study continuous or half wave operation

02 p0311 A70-11850

Temperature measuring devices design for ultrahigh/ultralow temperatures, examining heat effects on gases, liquids and solids

02 p0295 A70-11864

Temperature limit of efficiency threshold for ground based liquid propane sprayer for supercooled fog dispersal at Orly airport

02 p0324 A70-11872

Hydrogen reactions with nitrogen dioxide, oxygen and mixtures of oxygen and nitric oxide in adiabatic flow reactor measured as function of temperature and pressure

02 p0250 A70-12020

Spinal cord and skin temperature effects on tension-extension diagrams in cats red and pale muscles

02 p0236 A70-12092

Lubrication problem for centrally pivoted tilting-pad sector thrust bearings with temperature and elasticity effects, noting iterative solution for coupled equations

[ASME PAPER 68-LUB-4] 02 p0307 A70-12166

High temperature effects on evolution of Venus upper lithosphere, considering magnetic differentiation, isostatic adjustments, surface relief, mountain building time and distance scales, etc

02 p0371 A70-12207

Atmospheric effects on SST, discussing turbulence, temperature, wind, cloud cover, hail, toxic gases, etc

02 p0325 A70-12218

Atmospheric environment features bearing on supersonic transport aircraft operations and forecasting, discussing wind and temperature effects

02 p0325 A70-12220

Temperature dependence of magnetic susceptibility in liquid and solid states of binary Al-Mn alloys with additions of Cr, V and Ti

02 p0316 A70-12300

Titanium thin films prepared in ultrahigh vacuum to determine low temperature/pressure oxidation kinetics, using electron microscopy and X ray diffraction

02 p0317 A70-12316

Ruby laser light wavelength temperature dependence measurement using Fabry-Perot etalon

02 p0313 A70-12440

Ruby laser emission wavelength temperature dependence measured spectrographically

02 p0313 A70-12441

Spectrophotometric facility for measuring spectral characteristics of color filters, photomultipliers and photographic plates as function of temperature

02 p0301 A70-12494

Resistance strain gauge performance prediction, investigating response during temperature change for preattachment mounting

02 p0302 A70-12498

Temperature dependence of diffusion coefficient for carbon dioxide filled rigid polyurethane foam, using Fick law

02 p0321 A70-12524

Newtonian liquid lubricated spiral groove bearing load capacity and power loss dependence on viscosity variations with temperature

[ASLE PREPRINT 69-IC-21] 02 p0309 A70-12533

Release-recovery and dynamic stiffness phenomenon in frog heart muscle at various Ca ion concentrations and temperatures

02 p0241 A70-12771

Integral formulas of thermoelasticity theory for calculating displacements and rotations caused by temperature field action in micropolar Cosserat and Hooke media

02 p0391 A70-12817

Coupled diffusion of heat and vorticity in gaseous vortex caused by radial mass convection and temperature dependence of gas properties

02 p0400 A70-12858

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation

03 p0480 A70-12882

Boron combustion in air augmented rockets, examining mixing and burning between subsonic air and supersonic fuel rich exhaust

[AIAA PAPER 68-634] 03 p0603 A70-12910

Shells of revolution having arbitrary stiffness distribution and subjected to arbitrary loads and temperatures

03 p0583 A70-12916

Fiber composites dimensional changes, stresses and plastic flow during component allotropic transformation, studying temperature variations effects

03 p0585 A70-12973

Human blood platelets volume measured in Coulter counter, noting relation to temperature

03 p0416 A70-13008

Polycrystalline Ni steady state creep characteristics measurement emphasizing temperature dependence of creep rate

03 p0504 A70-13022

Temperature dependence of luminescence quantum yields and lifetimes in transitions during excitation of ruby crystal atoms

03 p0538 A70-13059

Neutron bombardment effect on ordering and disordering state of alloys phase diagrams, noting temperature dependence

03 p0506 A70-13107

Embrittlement in martensitic and semiaustenitic precipitation hardening stainless steels upon exposure

to high temperatures to determine causation and controlling means

03 p0506 A70-13132

Gray hypersthene Ramsdorf chondrite with thermal and mechanical alterations, discussing shock heating, metal plus troilite melt redistribution, collision and rapid cooling effects

03 p0563 A70-13147

Polycrystalline material tensile failure at high temperature, discussing intergranular cracking, shearing, etc

03 p0508 A70-13155

Transparent bodies photon thermal conductivity temperature dependence

03 p0515 A70-13206

Monograph on elevated temperature strength data for wrought austenitic stainless steels, considering yield, tensile, creep and rupture strengths for allowable stresses

03 p0510 A70-13300

Polycrystalline Co strength and plastic properties tested at various temperatures and strain rates

03 p0510 A70-13352

Prolonged temperature exposures with applied tensile stress found to increase tensile strength and yield point of aluminum alloy subjected to artificial agings

03 p0511 A70-13354

Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation

03 p0569 A70-13357

Steel crystal lattice fine structure and mechanical properties during annealing using X rays as function of temperature

03 p0511 A70-13422

Soil characteristics influence on soil thermal regime related to thermal IR imagery and subsurface soil conditions

03 p0474 A70-13555

Electrical conductivity of GaSe thin films developed in vacuum by electron bombardment as function of temperature

03 p0540 A70-13686

Onset conditions for galvanothermal current instability of Ge semiconductors as function of electric field oscillations, carrier concentration and carrier-lattice temperature

03 p0541 A70-13724

Electrical properties of Cu-diffused GaAs, studying temperature effects on acceptor concentration and electron population growth

03 p0541 A70-13730

Air plasma pulsed discharge jets erosive effects on metals, semiconductors and dielectrics, noting role of thermal effect

03 p0532 A70-13742

Electrical properties thermally induced irreversibly changes in CdSb single crystals measured as function of current intensity and flow

03 p0542 A70-13751

Raman spectra of lead titanate, sodium tantalate/potassium tantalate and potassium tantalate/potassium niobate solid solutions at various temperatures

03 p0542 A70-13824

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

03 p0512 A70-13855

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties emphasizing effect of primary structure

03 p0497 A70-13856

Optical phonons in mixed sodium potassium tantalate crystals as function of temperature and composition, using IR and Raman spectra

03 p0542 A70-14002

Optical rotatory power measurement for compensated cholesteric liquid crystal helical structure to observe thermally induced inversion and electric field perturbations

03 p0542 A70-14003

Dissociative attachment of low energy electrons in nitrous oxide as function of gas temperature

03 p0441 A70-14006

Temperature and hemoglobin concentration effect on oxygen solubility in blood, constructing table for Bunsen solubility coefficients

03 p0428 A70-14156

Thermal comfort in disparate environments, discussing human subjects skin mean temperature and body water loss

03 p0429 A70-14158

Small angle X ray scattering pattern of polypropylene drawn at various temperatures in closely spaced draw ratio values through neck region

03 p0517 A70-14202

Polyurethane rubber time- and temperature-dependent visco- and photoviscoelastic coefficients using two dimensional strain and stress wave propagation photoviscoelastic analysis

03 p0599 A70-14243

Transient thermal stresses in photoelastic models of various shapes under various steady state or transient temperature conditions, describing instrumentation and experimental methods

03 p0600 A70-14308

Low body temperature effects on convulsive activity elicited by hyperbaric oxygen in unrestrained unanesthetized rats

04 p0629 A70-14448

Titanium carbide sintering under continuous heating in Ar atmosphere, studying ultrasonic waves effects on compaction process

04 p0696 A70-14463

Ground temperature effect on thermal resolution in IR line scan imagery, discussing equipment and operating procedures for temperature gradient detection

04 p0686 A70-14617

Dissociative recombination coefficients temperature dependence in molecular neon and argon ions measured under equal gas, ion and electron temperature

04 p0722 A70-14668

Temperature dependence of reaction rate for dissociative recombination in vibrationally excited gases, using electronic threshold law for diatomic ions

04 p0722 A70-14669

Adiabatic calorimeter for exothermic chemical reactions determining heats of polymerization, curing rate and thermal decomposition rates as temperature function for high energy propellants

04 p0688 A70-14711

Electron plasma frequency exchange corrections temperature dependence at high densities, using equation of motion for coupled particle-hole pair operators

04 p0727 A70-14714

Cylindrical compression spring relaxation at high temperatures, presenting design data for time-temperature initial stress relationships

[ASME PAPER 69-WA/MET-10]

04 p0697 A70-14758

Finite element method applied to heat conduction in solids with temperature dependent thermal conductivity, using nonlinear constitutive equation for heat flux

[ASME PAPER 69-WA/HT-34] 04 p0782 A70-14806

Pressure and temperature sensitivity tests of fluoric oscillator for timer application, testing fluid relaxation oscillators using R-C-R feedback loops

[ASME PAPER 69-WA/FLCS-9]

04 p0626 A70-14844

Time-to-rupture dependence on temperature and stress related to chemical reaction rate equation in creep testing

[ASME PAPER 69-MET-B] 04 p0770 A70-14877

Adiabatic elastic stiffness constants of single crystal forsterite measured as function of hydrostatic pressure and temperature, using pulse superposition technique

04 p0678 A70-15055

Interstellar gas instability, discussing thermal, magnetic and cosmic ray effects

04 p0753 A70-15072

Polystyrene and polyamide stress relaxation graphs, considering tensile stresses and temperature effects

04 p0712 A70-15101

Tensile tests on alpha Ti containing oxygen and hydrogen at various temperatures and strain rates to determine deformation and fracture

04 p0706 A70-15133

Bond quality and strength of high temperature adhesive films for titanium

[DGLR-69-56] 04 p0699 A70-15158

Intermediate aging influence on Bauschinger effect in low carbon steel at 270 C and 2 hr holding time

04 p0776 A70-15266

High temperature effects on mechanical properties of recrystallized Ta relating strength, hardness and yield point

04 p0707 A70-15267

Initial oxide film on Cr-Ni steel at high temperatures observed by electron microscope, noting Ni role

04 p0708 A70-15311

Ti-Al-V alloys after annealing investigated for equilibrium diagram at high temperatures

04 p0708 A70-15313

Heat treatment produced semicoherent and incoherent precipitations diminished susceptibility to stress corrosion cracking of aluminum binary and ternary alloys

04 p0708 A70-15370

Spacecraft components temperature response predicted in nonstandard solar orientation

04 p0786 A70-15432

Temperature-synchronized semicontinuous culture and monitoring system for autotrophically growing Euglenas

04 p0633 A70-15453

Wall and total temperature variations effects on transition Reynolds number in hypersonic He tunnel, noting sound mode dominance

04 p0620 A70-15560

Surface recession of low density phenolic nylon in arc heated air using stagnation point models, noting char removal processes

04 p0787 A70-15602

Classical Couette flow for emitting and conducting gas media, discussing velocity distribution and temperature effects at LTE and non-LTE

04 p0787 A70-15675

Chromaluminizing process protecting alloys for gas turbines against oxidation at high temperatures by diffusion mechanism 04 p0711 A70-15683

High temperature properties mechanisms in alumina-coated vacuum cast nickel base superalloys 04 p0711 A70-15705

Load capacity and power loss of spiral groove bearings lubricated by incompressible liquid with temperature-dependent viscosity, using momentum and energy equations 05 p0853 A70-15778

Ductile-brittle transition temperature relation with grain size in polycrystalline Mo as function of annealing temperature 05 p0862 A70-15907

Isothermal atmospheric temperature effects on extensive air shower characteristics and muon numbers computed at various temperature and observation levels 05 p0898 A70-15945

Proton-proton cycle in star interior, calculating isotope concentrations, reaction duration and energy release as function of temperature and chemical composition 05 p0900 A70-15972

Diffusion rates in refractory metal alloys for thermionic emitters as function of time and temperature [GA-9495] 05 p0892 A70-16075

Axisymmetric elasticity problem for straight fiber imbedded into infinite matrix, noting homogeneous temperature changes causing residual stresses, tractions at infinity and fiber pulling 05 p0931 A70-16088

Mercury shape estimated with isostatic form of equilibrium controlled by situation near perihelion passage at 3-2 resonance spin rate, discussing solidification thermal effects 05 p0908 A70-16332

Solar cell for improved performance during extreme temperature fluctuations, discussing wraparound contact 05 p0799 A70-16724

Cryogenic temperature effect on short life torsional fatigue properties of Ni-Cr-Mo steel, discussing cyclic strain range effects 05 p0864 A70-16807

Time-temperature relation necessary to fine Libyan desert glass and remove gas bubbles calculated by viscosity determination at various temperatures 05 p0843 A70-16833

Magnetic susceptibility of synthetic australite and philippinite-like tektites measured in 77-560 K range, discussing origin 05 p0916 A70-16836

Thermal conductivity temperature dependence measured in greases bulk and thin layers at liquid helium temperature 05 p0874 A70-16842

Maraging steel mechanical properties as function of aging temperature and time 05 p0865 A70-16873

Thermoelectric power /TEP/ of transition metals, detecting empirical regularities in TEP, nonlinear temperature dependence, etc 05 p0893 A70-16949

Combustion model for temperature inhomogeneities effect on stability of solid fuels steady combustion 05 p0958 A70-16960

Structure and interstitial impurities effects on Nb modulus of elasticity at normal and high temperatures, noting rolling 05 p0866 A70-17040

Vibration damping properties of steels and Ti- and Al-based alloys at various temperatures under tensile and compression loads 05 p0868 A70-17048

Heating influence on circular bending fatigue strength of refractory steel and alloys, using radiative and HF inductive heating 05 p0868 A70-17059

Error resulting from elasticity modulus and linear thermal field coefficient removal from integral in Burger formula for turbine blade thermal stresses 05 p0954 A70-17061

Refractory metal structural elements stress rupture strength in vacuum and inert gas tested up to 2000 K 05 p0829 A70-17071

Ammonium chlorate thermal decomposition products as function of temperature using mass spectrometry 05 p0895 A70-17082

Cold reduction effects on press formability of pure Al sheet with allowance for tensile properties and crystallographic orientation 06 p1075 A70-17145

High purity Ni fatigue in reversed bending as function of oxygen pressure and temperature 06 p1086 A70-17454

Creep deformation resistance decrease in pure Al tubular specimens at high temperatures under multiple stress reversals 06 p1087 A70-17456

Ni-Cr alloys oxidation dependence on temperature and Cr concentration 06 p1087 A70-17609

Deformation pattern, interstitial impurities and alloying elements effects on temperature dependence of elasticity modulus of Nb and alloys 06 p1088 A70-17659

Microhardness measurements of carbides, borides and nitrides in wide temperature range, considering indentation load selection 06 p1089 A70-17661

Viscosity, thermal conductivity, specific heat and Prandtl number of hydrogen, methane and hydrogen-methane mixtures calculated for variation with temperature neglecting dissociation effects 06 p1177 A70-17700

Mo-nitrogen interaction, studying nitriding influence at various temperatures on Mo alloys properties 06 p1089 A70-17741

Unbranched chain reaction in hydrogen bromide for studying laminar one dimensional flame propagation, determining temperature dependence, velocity and concentrations at fixed time 06 p1177 A70-17797

Ion exchange entropy and enthalpy functions calculated from experimental constants and temperature dependence data 06 p1177 A70-17837

Fabrication technique effect on tensile and plastic properties of semifinished sintered Al powder products at room temperature and 600 C 06 p1076 A70-17848

Laminar ablation testing under turbulent boundary layer heating conditions, obtaining recession rate and heat of ablation for turbulent ablation of Teflon [AIAA PAPER 70-226] 06 p1179 A70-18071

Temperature and pressure effects as function of time in spectral and total normal emittance of metal coated refractory metals 06 p1092 A70-18136

Calorimetric measurements determining total hemispheric emittance of thin gold films as function of temperature, demonstrating film thickness effect [AIAA PAPER 70-63] 06 p1180 A70-18140

Thermal isolation characteristics of interstitial materials in vacuum environment, inserting materials between contacting metal surfaces at various pressures and temperatures 06 p1181 A70-18143

Surface temperature effects on low Reynolds number hypersonic shock layer development over flat plate sharp leading edge 06 p0982 A70-18364

Dynamic elastic modulus of graphites and composites measured as function of temperature using thin rod resonance method 06 p1070 A70-18447

Brazing time and temperature effect on depth of Ag based brazing alloys penetration into thin Ti-Al-V sheet substantiated by microprobe analysis 06 p1078 A70-18513

One dimensional cumulus convection model modified by incorporating rain evaporation rate and temperature changes from downdrafts 06 p1099 A70-18568

Surface tension plotted against density and temperature of hydrocarbon jet fuels, determining critical temperature 07 p1357 A70-18653

Chromium stainless steels nitrided cases formation and phase composition, studying temperature effects 07 p1304 A70-18744

Chemical reaction rates corresponding to initial molecules fixed internal energy levels determinable for multitemperature Maxwell-Boltzmann distribution as function of reagent temperatures 07 p1224 A70-18769

Z axis acceleration and high temperature effects on guinea pig carbohydrate metabolism, discussing blood and muscle tissues composition 07 p1202 A70-18798

Stainless steels case hardening in hydrogen, nitrogen, propane and butane mixture, showing temperature and process duration effects 07 p1291 A70-18831

Mechanical and electrochemical polishing effect on turbine blade alloy fatigue strength, discussing surface strain hardening as function of temperature in mechanical polishing 07 p1304 A70-18838

Fatigue strength of sintered aluminum powder at room and elevated temperatures, discussing sensitivity to tensile loads misalignment 07 p1304 A70-18840

Tensile and shear properties of blind fixed, blind floating and through types of bonded sandwich inserts, noting geometry and temperature effects 07 p1401 A70-18934

Solution treating temperature and microstructure effects on hot rolled Ni base alloy properties 07 p1306 A70-18995

Crack behavior of Al alloy as cryogenic tankage material, establishing relationship of temperature effects and basic crack size to failure stress 07 p1279 A70-18997

Heat transfer effects during solidification on mechanical properties of Al alloy castings compared with sand castings 07 p1293 A70-18998

[ASM PAPER W9-7.2] 07 p1293 A70-18998

W oxidation kinetics as function of ribbon temperature and absorption time using flash technique with sweep pulse mass spectrometer 07 p1306 A70-19275

Gas phase ignition theory of evaporating fuel in stagnant hot oxidizing gas as function of temperature 07 p1421 A70-19317

Thermally induced convective mixing motion in rotating cylindrical cryogen space storage tank model under heat flux, calculating critical Rayleigh number 07 p1257 A70-19320

Inelastic behavior of solids strained at high temperature emphasizing hot creep phenomena in aviation materials 07 p1406 A70-19346

Anodic dissolution initial stages of Ti alloys in neutral salt solutions from viewpoint of electrochemical dimensional processing, noting temperature effect on anodic activation potential 07 p1294 A70-19352

Chemical composition and heat treatment effects on deformation resistance of nonaging aluminum alloys during hot working, noting quenching effect on recrystallization 07 p1294 A70-19388

GaAs p-n junction lasers operating properties under ideal and thermal conditions 07 p1298 A70-19396

Dislocations and interstitial atoms interactions in Ta, investigating internal friction and deformation resistance and rate dependence on temperature 07 p1309 A70-19637

Thermoelectric characteristics of graphite and titanium carbide compared with platinum after prolonged annealing at 2300 C 07 p1316 A70-19661

Active and compensating sensors resistances, strain sensitivities, temperature gradients and lead resistances differences effect on accuracy of resistance strain gage measurements 07 p1283 A70-19747

Intermetallic precipitates development and mechanical properties of maraging steel as function of composition, tempering time and temperature using electron microscopy 07 p1310 A70-19748

Electron density dependence on electron temperature during self and mutual interaction of electromagnetic waves in magnetoplasma, tabulating numerical results 07 p1351 A70-19968

Temperature dependence of viscosity coefficient determined for hydrogen, helium, argon and nitrogen at atmospheric pressure using capillary viscometry 07 p1424 A70-19980

Molecular N rotational temperature effect on rare gases scattering cross section 07 p1344 A70-20134

Stress relaxation in polytetrafluoroethylene /PTFE/ at various compression deformations and temperatures, considering residual stresses degree 07 p1321 A70-20228

AlN deposition rate from gaseous phase on Mo substrate as function of temperature 07 p1357 A70-20311

Transient phenomena accompanying heating of fluid situated between heat conducting plane horizontal plates, using interferometry and streak photography 08 p1596 A70-20592

Soviet book on mechanical properties of heat resistant steels and alloys at room and elevated temperatures 08 p1515 A70-20691

Organic adhesives preparation and application to metal surface for bonding, examining time, pressure and temperature effects on curing 08 p1503 A70-20881

Adhesive metal bonding, considering methods for application of pressure and heat 08 p1503 A70-20882

Adhesive bonds strength in metal joints under stress cycling, examining effects of temperature and cycles frequency 08 p1504 A70-20888

Steel strength under prolonged preliminary loading at elevated temperatures 08 p1515 A70-20934

Steel structure and mechanical properties under preliminary loading at elevated temperature and liquid Li at various exposure times 08 p1515 A70-20935

Temperature dependence of Vickers pyramid hardness for Ti, Zr and Hf carbides at wide temperature range in vacuum 08 p1516 A70-20986

TEMPERATURE EFFECTS

- Monochromatic radiation emissivity temperature dependence of monocarbides of Ti, Nb and alloys in homogeneity region 08 p1516 A70-20994
- Chromium films obtained on tungsten by sputtering, studying structure and work function at various temperatures 08 p1516 A70-21123
- Molten Al alloys flow rate and behavior in various casting systems, considering gate geometry and casting temperature effects 08 p1505 A70-21133
- Mutual thermal influence zone between parts of die casting during solidification established as function of time 08 p1506 A70-21138
- Thermal interaction between casting and mold at beginning of cooling using mathematical model for temperature field 08 p1506 A70-21139
- Reduction temperature effects on molybdenum powders sinterability noting dispersion role 08 p1517 A70-21145
- Zr, Ti, Nb and Ta carbides deposition from metal chloride, methane, hydrogen and argon mixture, studying gas concentration and temperature effects on deposition rate 08 p1517 A70-21147
- Thermoelastic characteristics of glass fiber reinforced plastic materials, determining temperature dependent deformation of composite plate 08 p1526 A70-21164
- Quadratic precipitate transformation into orthorhombic phase with conservation of maximal atomic density planes in Ni-Cr-Nb and Ni-Cr-Ta alloys during prolonged reheating 08 p1518 A70-21240
- Membrane stress in thin circular viscoelastic ring under impulsive loads and internal heat, using stress-strain relation for linear Maxwell material model 08 p1589 A70-21311
- Tensile properties of yarns at high strain rates and subambient temperatures determined for nylon, Dacron, Nomex, Beta Fiberglass and Karma metal 08 p1527 A70-21330
- Stress-strain behavior of Al and Ti alloys, beryllium and nonmetallic structural materials based on constitutive equations describing strain rate and temperature effects 08 p1518 A70-21331
- Aluminum nitride morphology in structural Cr-Ni-Mo steel, discussing dependence on austenitization temperature and cooling conditions 08 p1519 A70-21435
- Dissipative heating effects on loss factor of viscoelastically damped beam, discussing stiffness effects [ASME PAPER 69-VIBR-37] 08 p1592 A70-21478
- Flute instabilities of cold magnetoactive plasma with radially dependent density and strong azimuthal particle streams, discussing nonzero perpendicular temperature effects on oscillations 08 p1552 A70-21504
- Waspaloy gamma prime solvus temperature relationships as function of solution treatment and precipitation strengthening additives, discussing microstructure and tensile properties 08 p1520 A70-21555
- Thermal and athermal components of flow stress and deformation dynamics in Ti-Al alloy 08 p1521 A70-21578
- Solid layer effect on laminar heat transfer and pressure drop in medium surrounding pipe with liquid flows below freezing point, discussing wall temperature effects 08 p1485 A70-21589
- Temperature increase effects on fully turbulent boundary layers at low Reynolds number in air investigated in wind tunnel 08 p1485 A70-21606
- Temperature dependence of microplastic yield and flow stress and transient creep responses of gamma prime phase 08 p1522 A70-21709
- Magnetothermal oscillations in pressure-annealed pyrolytic graphite, relating period with angle between magnetic field and crystal c axis 08 p1557 A70-21839
- Cobalt modified Ti-6Al-4V plate and billet, testing effects on heat treatment response, microstructure, tensile and fatigue properties, fracture toughness, etc. 08 p1523 A70-21852
- Silicon containing alpha matrix Ti alloy with high creep strength and stability at elevated temperatures, studying processing and heat treatment effects on properties 08 p1509 A70-21853
- Creep and rupture of graphite-epoxy composites under unidirectional state of stress and controlled temperature environment, extrapolating long term loading behavior 08 p1531 A70-21897
- De Laval nozzle behavior in vacuo, discussing flow rate parameters, viscosity and real gas effects, thermal effects, turbulent jet separation and reattachment, etc [AGARDOGRAPH-120] 08 p1434 A70-21932
- Temperature, transformation and strain rate effects on tensile ductility properties of stable and metastable compositions of austenitic stainless steels 08 p1524 A70-21956
- Temperature effect on plastic flow in Ti-scavenged Fe, attributing microyielding to edge dislocations motion 08 p1525 A70-21959
- Strengthening mechanisms in dispersion hardened Nichrome /TDNiC/ analyzed in 70-2000 F range, discussing solid solution, dislocation substructure and grain refinement 08 p1525 A70-21961
- Altitude influence on forced ventilation of cooled electronic apparatus, analyzing flow change and temperature roles 08 p1643 A70-22040
- Natural heat convection in vertical annular space taking into account variations of volumetric mass, viscosity and thermal conductivity of air with temperature 08 p1786 A70-22047
- Retinal temperature increases produced by intense light absorption described by heat conduction equation 08 p1614 A70-22075
- Brittle failure mechanics application to steels sensitivity to rupture at low temperatures, discussing crack propagation resistance and heat treatment effect on impact toughness 08 p1768 A70-22076
- Plane shock wave stability propagating in external magnetic field determined by temperature dependence of medium electrical conductivity 08 p1658 A70-22168
- Local heat transfer to gas mixed with graphite particles described for variable temperature differences and wall temperatures 08 p1787 A70-22174
- Temperature effects on IR absorption by water and carbon dioxide vapors measured in narrow spectral intervals 08 p1666 A70-22180
- Chromosome of temperature-sensitive mutant of bacillus subtilis 168, observing multiforked replication at normal temperature and transfer of DNA 08 p1615 A70-22206
- Simple molecules viscosity as function of temperature and density using empirical equation 08 p1731 A70-22292
- Magnon energy theory for temperature dependence of ferrous and magnesium fluorides antiferromagnetic- resonance frequency, sublattice magnetization and magnetic specific heat 08 p1739 A70-22324
- Mild temperature and dehydration effects on toxicity of caffeine and dextroamphetamine in mice 08 p1616 A70-22329
- Gas turbine blades design and exploitation processes, discussing long time fatigue strength, static durability and heating effects at elevated temperatures 08 p1772 A70-22469
- Crystal growth of 2H silicon carbide showing temperature profile along susceptor as affecting factor 08 p1739 A70-22498
- High-strain fatigue life temperature dependence of austenitic and ferritic power plant materials compared to creep-rupture life 08 p1773 A70-22577
- Thermal stresses in gas turbine blade calculated, showing role of initial temperature increase of blade cooling air 08 p1775 A70-22596
- Heat treatment effects on hardened steels acoustic constants, calculating sound velocity in liquid metals 08 p1692 A70-22643
- Creep behavior transition analysis, considering activation energies and creep rate dependence on temperature, stress and grain size 08 p1704 A70-22720
- Time, temperature and composition dependent regularities in Ni-Al and Ni-Nb alloys oxidation processes, discussing Oxygen ion migration and Ni ion diffusion 08 p1704 A70-22752
- Ionized potassium plasma three body recombination coefficient measurements showing inverse temperature dependence 08 p1735 A70-22778
- Temperature and strain dependence of strain anisotropy in Ti tested on longitudinal and transverse tensile specimens 08 p1705 A70-22807
- Thermal properties associated with temperature gradients in He-K plasma, studying mass motions initiated by cold wall contact 08 p1735 A70-22844
- Evanoform alloy resistance wire for applications in magnetic field, illustrating percentage change at 4.2 K 08 p1679 A70-22998
- Dynamic stresses during abrupt temperature changes of medium, showing internal stress waves amplitude increaseability by suitable internal stress source selection 08 p1778 A70-23089
- Elastoplastic stressed state of variable thickness disk under combined effects of nonuniform heating, repeated centrifugal and surface tensile loads 08 p1778 A70-23091
- Elastoplastic stress state of variable thickness disk under combined effect of nonuniform heating and centrifugal forces, applying flow theory to stress component determination 08 p1779 A70-23095
- Ferromagnetic crystal weakly coupled spin Green and correlation functions calculated for wide temperature range 08 p1740 A70-23193
- Electrical resistivity of TiNi and TiCo compounds and alloys measured at various temperatures after quenching or annealing 08 p1707 A70-23194
- Order-disorder transition temperatures for Ni-Cr alloys determined by neutron diffraction, discussing homogeneous ordering of atoms 08 p1707 A70-23196
- Materials static tested for compatibility with pure and moisture contaminated chlorine pentafluoride at 160 F and ambient temperatures 08 p1742 A70-23250
- Mo single crystals creep behavior temperature and stress dependences using X ray analysis 08 p1708 A70-23543
- Nb-W single crystal low temperature thermally activated deformation, observing slope change in temperature dependence curves of flow stress and strain rate sensitivity 08 p1708 A70-23572
- Plane disks and turbine disks of complex profile made of heat resistant Cr-Ni alloys studied for rupture strength under various temperature conditions 08 p1785 A70-23599
- Pulse-shaping transistor circuit analysis, considering circuit elements roles and temperature, pulse duration and leading and trailing edges durations effects 08 p1650 A70-23628
- Turbojet engines departure from equilibrium performance during thermal soak transient attributed to heat absorption in turbine and compressor metals, observing thrust loss 08 p1744 A70-23739
- Temperature limitation on CRT tube performance in high brightness displays imposed by glass breakage danger, discussing liquid cooling of phosphor substrate 08 p1686 A70-23759
- Titanium sponge secondary structure obtained by magnetothermal reduction of concentrated Ti-containing chloride melts, discussing temperature effect on porosity 08 p1709 A70-23783
- Artificial satellites MHD drag, noting altitude and temperature effects 10 p1921 A70-23834
- Chromium structural dislocation and cell formation during deformation as function of temperature, impurities and strain rate 10 p1902 A70-23861
- Mixed thermoelastic problem in elastic layer with arbitrarily prescribed temperature in upper free surface 10 p1954 A70-23878
- Amorphous polymers thermal conductivity measured at 0.4-4 K, observing similar temperature dependences 10 p1906 A70-23979
- Thermal lens effect produced by photocurrent in CdS, using focused laser beam to generate photocurrent causing local heating changes of refractivity 10 p1898 A70-23980
- Solutions existence for nonlinear partial differential equations describing orthotropic and nonlinear shallow shells under loads and temperature effects 10 p1954 A70-24019
- Transformation kinetics of Ti alloy under isothermal conditions in solution treatment as function of temperature 10 p1903 A70-24025
- Microwave radiation thermal and nonthermal biological effects, considering exposure limits 10 p1824 A70-24061
- Heat sources effect on pressure and velocity of supersonic flow, discussing iteration procedure and asymptotic expansion 10 p1799 A70-24125
- Gas viscosity high temperature measurement method in shock tube using boundary layer equations for velocity and static temperature distributions 10 p1867 A70-24151
- Temperature effects on energy dissipation during vibration in ferromagnetic and nonferromagnetic metals, comparing damping capabilities for homologous temperatures 10 p1903 A70-24245

IR light dispersion filters of compressed mixed powdered crystals, discussing optimal preparation procedures, passbands temperature dependence and stability

10 p1915 A70-24256

Graphite IR radiator for radiative capacity and flame temperature measurements investigated for life time dependence on ambient pressure and temperature

10 p1888 A70-24257

Kinematic viscosity of molten steel containing corundum inclusions as function of temperature

10 p1904 A70-24271

Tantalum mechanical properties dependence during deformation on temperature and strain rate irregularities, discussing serrated yielding

10 p1904 A70-24386

Shock pressure and impulse caused by Q switched laser light absorption, considering temperature dependence of EM radiation penetration depth

10 p1900 A70-24422

CO electrochemical oxidation at porous solid electrolyte fuel cell anodes under high temperature, noting current density role

10 p1830 A70-24462

Environmental thermal stress effect on human performance under high mental and low physical workload

10 p1812 A70-24505

Horizontal fluid layer heated from above or below analyzed for gravitational field sinusoidal modulation effects on stability

10 p1968 A70-24523

Processing temperature effects on breaking strength-modulus relation for carbonized acrylic fibers

10 p1907 A70-24533

Carbon composition resistors investigated for cause of resistance dependence on thermal pulses, suggesting application as stabilization process

10 p1849 A70-24617

Avalanche diodes properties, establishing equivalent circuit accounting for static electricity, carriers transit time and thermal effects

10 p1850 A70-24625

Black body radiation properties with temperature important only in rest frame, using transformation formulas for coherence and spectral parameters

10 p1968 A70-24631

Body temperature effect on pulmonary ventilation response to exercise

10 p1819 A70-24773

Heat transfer influence on three dimensional boundary layer separation on walled ellipsoid of revolution

10 p1870 A70-24781

Thermal imbalance effect on stellar pulsational stability using linear quasi-adiabatic pulsation theory

10 p1946 A70-24980

Temperature effect on plate damping by constrained viscoelastic layers, emphasizing transition and operating temperature compatibility

10 p1962 A70-25063

Nitrogen content effect on proportional limit and work hardening rate of austenitic stainless steel at 302 F

10 p1905 A70-25169

Binary Ni-Cr alloys tensile mechanical properties at 25 C after water quenching and heat treatments

10 p1905 A70-25172

Strain tempering effects on upper and lower bainite, discussing strengthening and fracture toughness as function of temperature

10 p1905 A70-25173

Pressure loss in tubulature of oil-hydraulic drive mechanism, allowing for viscosity changes associated with oil temperature and pressure increases

10 p1809 A70-25209

Temperature and hydrogen concentration effect on microhardness of polycrystalline beta-vanadium hydride, obtaining photomicrographs of indentations

10 p1906 A70-25227

Yield point temperature dependence in heat resistant austenitic alloys, showing tendency to brittle failure under short term overloads

10 p1906 A70-25291

Precipitation hardened nickel-base alloy microcracking during gas tungsten arc and electron beam welding, studying heat affected zone hardness, phases and grain size

10 p1897 A70-25311

EPR line width angle and temperature dependences assuming line widening due to electric field of lattice defects, dipole-dipole interactions and spin-lattice relaxation

11 p2097 A70-25382

Nonlinear spin wave theory for anisotropic antiferromagnetism, solving sublattice magnetization by thermodynamic Green function for temperature dependence

11 p2097 A70-25617

Thermal conductivity coefficients of argon in 25-700 C range and up to 1200 bars pressure, using vertical concentric cylinder apparatus

11 p2147 A70-25754

Thermal conductivity of nitrogen in 350-1500 K range using hot-wire diffusion columns

11 p2147 A70-25756

Thermal diffusivity of elements over wide temperature ranges based on TPRC recommended thermal conductivity and specific heat

11 p2065 A70-25770

Thermal Analysis - Conference Worcester, Mass., August 1968, Volume 1, Instrumentation, organic materials and polymers

11 p2069 A70-25801

Differential thermal analysis-effluent gas analysis /DTA-EGA/ experiment for lightweight Martian landed capsule

11 p2050 A70-25802

Polymer structure and cross-link density effects on thermal analysis of phenol-formaldehyde polymers pyrolysis products

11 p2069 A70-25804

Thermal analysis - Conference, Holy Cross College, August 1968, Volume 2, Inorganic materials and physical chemistry

11 p2070 A70-25808

Pyrolytic graphite oxidation kinetics as function of temperature, air velocity and surface area

11 p2070 A70-25809

Differential thermal analysis capabilities in mineralogy for determining present/past planetary environmental parameters having significance for biological experiment

11 p1994 A70-25811

Phase equilibria and maximum melting compositions determinations for compound semiconductors by differential thermal analysis compared with vapor and high pressure techniques

11 p2098 A70-25812

Vestibular adaptation to heat and rotary stimulation in animals and men

11 p1986 A70-25822

Temperature and ion effect on refractive index of VLF radio waves in quiet and disturbed ionospheric conditions

11 p2004 A70-25842

Nonisothermal dielectric coating on conductor surface, analyzing temperature distribution effect on thermal emission characteristics

11 p2148 A70-25975

Bidirectional reflectance of three dimensional surfaces described by diffuse triangular subareas network for spacecraft thermal design, giving numerical technique

11 p2084 A70-26354

Spacecraft temperature prediction and heat conduction problems with nonlinear radiation boundary conditions by perturbation theory, applying to heat shield analysis

11 p2150 A70-26355

Saturn IB Orbital Workshop solar array thermal and performance analysis for various vehicle orientations and orbital conditions, emphasizing modeling and data handling

11 p2127 A70-26357

Thermal analysis of deployable parabolic antenna for Outer Planetary Explorer program, discussing spacecraft spin and radioisotope thermoelectric generators effect

11 p2127 A70-26359

Saturation of self induced thermal lens resulting from thermal distortion of carbon dioxide laser radiation in wind

11 p2063 A70-26401

Low cycle fatigue tests on stainless steel, discussing crack behavior dependence on temperature and plastic strain range

11 p2139 A70-26405

Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation

11 p2118 A70-26722

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators

11 p2020 A70-26819

Temperature effects on base and surface currents of plane bipolar transistors, testing validity of surface recombination process model

11 p2021 A70-26832

Electrical conductivity hypothesis based on concept of transition temperature being inversely proportional to ionic mass square root

12 p2282 A70-26880

Nomographic Richardson-Dushman equation solutions for thermionic electron emission devices, giving current density for various work functions and electrode temperatures

12 p2271 A70-26894

Thermal stress /high ambient and body temperatures/ effect on human performance in high mental and low physical activities

12 p2177 A70-27043

Insulator wall temperature effect on supersonic two temperature MHD generator channel flow at open and short circuit conditions

12 p2163 A70-27067

Translational spectral bands of compressed rare gas binary mixtures, considering mass and temperature effects

12 p2275 A70-27172

Thermal stresses in temperature dependent multilayered cylindrically anisotropic hollow cylinders

12 p2321 A70-27203

Spontaneous ignition dependence on transient temperature variations accompanying gas entry to evacuated vessel

12 p2330 A70-27222

Chromium doped GaAs photoconductivity spectral distribution at various temperatures, determining temperature dependence of impurity maximum

12 p2286 A70-27366

Electric field heating effect on edge photoluminescence of n-type GaAs, noting increase in electron energy

12 p2286 A70-27368

Iron impurity energy level behavior in seminsulating GaAs from determining temperature dependences of Hall coefficient, resistivity, optical absorption and steady spectral photoconductivity

12 p2286 A70-27370

Electron-hole transitions in GaAs obtained by sulfur diffusion, noting capacitance dependence on voltage at 293 and 77 K at various frequencies

12 p2287 A70-27481

Temperature effects on injection semiconductor lasers optical gain and threshold current using energy spectrum model

12 p2247 A70-27485

Fe and Ni doped GaAs photoconductivity at various temperatures, determining activation energy level

12 p2287 A70-27489

Temperature and metallic contact effects on composition and structure of solid phase deposits during reactive fuel oxidation

12 p2289 A70-27493

Stress relaxation in alpha titanium during plastic strain, measuring temperature and strain rate dependence

12 p2255 A70-27608

Blood flow redistribution during sustained high skin temperatures of men in supine position

12 p2169 A70-27654

Oxygen interaction on rhenium filament, considering sticking probability as function of temperature

12 p2181 A70-27677

Nitrous oxide chemisorption by rhenium filament at low pressures at various temperatures, determining sticking probability

12 p2181 A70-27678

Contaminated Ni crystal /100/ surface photoelectric yield as function of temperature, considering effects of Ar ion bombardment and annealing

12 p2288 A70-27680

Thermal feedback theory of flicker noise generation in transistors and temperature fluctuations effect in vicinity of recombination centers

12 p2196 A70-27687

Thermal boundary layer equations solved for compressible gas at rotating axisymmetric surface with viscosity as linear function of temperature

12 p2331 A70-27698

Magnetically sensitive Fe lines usefulness to solar polarimetry, observing absorption coefficient dependence on temperature variations

12 p2303 A70-27706

Recrystallization effect on 3-D graphite orientation in carbon fibers under high temperature heat treatment

12 p2259 A70-27720

Low pressure burning rate of double base propellants at various initial temperatures in argon and in air

12 p2332 A70-27844

Nitrogen oxide ions mobility in air calculated at high plasma temperatures

12 p2276 A70-27845

Tantalum RF sputtered superconducting films structure and properties at various substrate temperatures, observing bcc, fcc and amorphous phases by electron microscopy

12 p2288 A70-27876

Liquid He temperature fluctuation effects on cryogenic superconducting bolometer noise spectrum, deriving transfer functions

12 p2237 A70-28156

Temperature dependence of electrical conductivity and optical properties of strontium titanate semiconductor single crystals doped with Ce and Nb

12 p2288 A70-28328

N-type GaAs carrier mobility and concentrations increased slow cooling after heat treatment

12 p2289 A70-28343

Periodic high temperature effects on human systolic phase dynamics

12 p2174 A70-28359

Ablation and temperature effects in hollow viscoelastic cylinder

13 p2508 A70-28487

Transient heat transfer considered for thermal boundary layer over rotating disk following temperature change

13 p2519 A70-28493

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation

[AIAA PAPER 69-1033] 13 p2384 A70-28518

Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry
[AIAA PAPER 69-600] 13 p2404 A70-28524

Reaction rates temperature dependence for artificial carbographites of various densities in oxidizing gas media 13 p2519 A70-28577

Gas temperature effects on aerodynamic drag of carbon particles burning during nonisothermal motion 13 p2520 A70-28582

RF method for recording temperature dependence of electrical conductivity of solids, liquids and multicomponent plasma mixtures 13 p2459 A70-28583

Mechanical seals ringing sound relationship with heat transfer and interfacial conditions, noting sliding surfaces temperature effect 13 p2417 A70-28611

Geogravity-geomagnetic fields correlation due to lateral temperature variations in upper mantle 13 p2393 A70-28620

Electron beam interaction with Maxwellian plasma, investigating temperature effects on instabilities 13 p2460 A70-28639

Fracture kinetics model for polymers emphasizing quantum effects even at room temperature 13 p2510 A70-28670

Cavity and storage temperature effects on hydrogen maser oscillation in 77-293 K range 13 p2425 A70-28713

Temperature-dependent physical properties effects on turbulent heat transfer, determining corrective factor for semiempirical equations 13 p2520 A70-28847

Phase transformations of molybdenum carbide under elevated temperature in vacuum, using X ray and differential thermographic analysis 13 p2433 A70-28852

Temperature dependence of electrical properties and permittivity of barium titanate solid solutions containing Nb, Ta, Sb and La, using bridge-circuit of resonance techniques 13 p2469 A70-28853

Emission field and Fermi quasi-levels distribution in injection laser with n-p heterojunction, determining frequency and threshold current temperature dependence 13 p2426 A70-28876

Thermal stresses in solid nonhomogeneous sphere in high periodic temperature field, assuming temperature dependent Young modulus and linear thermal expansion coefficient 13 p2512 A70-28979

Gas turbine blade materials investigated for effect of prolonged heating on mechanical properties and thermal fatigue strength 13 p2434 A70-28994

Rotational and vibrational temperature effects on neutral gas and electron temperature and density in high pressure discharge plasma diagnostics 13 p2462 A70-29129

Versamid cured epoxies time-dependent mechanical properties, determining loading mode, strain level and reinforcing agent effects on time-temperature shift factors 13 p2438 A70-29205

Gas and environmental temperatures, flow rate and sample geometry effects on limiting oxygen index in acrylonitril-butadiene-styrene copolymer, polystyrene and polyester 13 p2439 A70-29261

Temperature, solvent, catalyst and formaldehyde concentration effects on monosaccharide synthesis from formaldehyde condensation 13 p2362 A70-29327

Irreversible yield stress component of aluminum, Armco iron and tantalum with fcc lattice, showing temperature dependence 13 p2436 A70-29500

Blood coagulation process, investigating thermal effects by microcalorimetry and correlating with thromboelastographic indices 13 p2353 A70-29502

Free convection flow and heat transfer from semiinfinite horizontal flat plate with time-oscillating temperature, using successive approximations process 13 p2522 A70-29537

P-type GaAs laser diodes spontaneous emission power temperature dependence, considering radiative recombination mechanism 13 p2378 A70-29545

First order statistical model for temperature dependence of carbon activity in austenite 13 p2436 A70-29605

Radiative heat transfer in channel with unsteady radiating medium temperature, assuming absolutely black walls with zero temperature 13 p2522 A70-29725

Evidence against electron impact induced alkyl shifts in mass spectra of alpha-hydroxy-ketones, showing thermal rearrangements 13 p2363 A70-29803

Hardened steel embrittlement in low pressure hydrogen caused by crack growth as function of temperature 13 p2436 A70-29804

Electron beam-pumped ZnO laser emission wavelength at various temperatures 13 p2430 A70-29833

Middle stratospheric circulation in Southern Hemisphere, associating temperature changes and ozone content with planetary wave passage in Antarctic polar vortex 14 p2568 A70-30123

Quartz floating component design, discussing magnetic sensitivity temperature dependence and microseismic noise rejection properties 14 p2582 A70-30245

Switching initiation in Ovonic, discussing temperature profile in semiconducting sandwiches as function of time and thermally forced double tunneling 14 p2626 A70-30333

Ovshinsky switching effect, considering electrothermal initiation and field dependent conductivity at elevated temperatures 14 p2626 A70-30336

Evaporography at room temperature, showing necessity of recording images on color films 14 p2583 A70-30362

Mossbauer temperature dependent isomer shift, proposing electron density change at resonant nucleus site by lattice phonons 14 p2626 A70-30483

Temperature dependence of short wavelength magnon energies correlated with heat capacity 14 p2619 A70-30487

Faraday type MHD generators, investigating gas velocity and temperature profiles effect on electrical performance by equivalent circuits simulation 14 p2534 A70-30537

Heat treatment induced shape distortions measurements in maraging steel bars, plates and sheets, noting dependence on number of anneals and product form 14 p2595 A70-30544

Stratospheric warmings effect on atmospheric density field variations 14 p2608 A70-30592

Book on thermal and gravitational atmospheric tides covering solar oscillations, lunar air tides, upper air data, ozone radiation absorption, etc 14 p2573 A70-30633

Chilled emulsion photography for astronomy and spectrography, reducing long exposures with chilled plates 14 p2585 A70-30649

Thermal tidal friction and gravitation effects on Mercury libration after solidification, noting equilibrium with orbital and rotational periods locked in 3/2 resonant state 14 p2638 A70-30701

Longitudinal temperature gradients effects on stress analysis in solid propellants, using viscoelastic data 14 p2627 A70-30755

Solid rocket motors potential hazards explosive reactions and temperature and blast effects 14 p2629 A70-30782

Tantalum single crystals elastic constants temperature dependence, considering compressibility and shear properties 14 p2596 A70-30841

Austenization temperature, cooling rate and tempering conditions effect on steel castings structure, strength and impact properties 14 p2596 A70-30875

Optimum diffusion welding temperature for Ti-6Al-4V alloy determined from tensile and creep tests 14 p2591 A70-30934

Marginal fluid flow stability in porous media taking into account inhomogeneity created by temperature 14 p2577 A70-31000

Adiabatic relation between initial plasma density perturbations and radiation temperature fluctuations during galaxies formation, discussing relic radiation fluctuations 14 p2632 A70-31286

Electronic components environmental testing, examining temperature, humidity and vibration effects 14 p2558 A70-31295

Laminar velocity distribution from temperature profiles developed under steady flow through tube, constructing numerical temperature grid 15 p2718 A70-31449

Gas ionization with hydrogen atoms in gravitational equilibrium at constant temperature in upper half space by instantaneous radiation burst in lower space 15 p2775 A70-31477

Heating rate effect on parameters of resistance wire strain gages subjected to temperature gradients 15 p2733 A70-31536

Temperature influence on luminosity centers and line darkening in synthetic ruby powder with chromium concentration 15 p2782 A70-31558

Hydrogen embrittlement of martensitic Fe-Ni alloys as function of temperature via slow strain rate tensile tests 15 p2755 A70-31559

Artificial B-doped semiconductor diamond crystals resistance temperature dependence, determining conductivity and luminescence spectra 15 p2782 A70-31630

B, In or Ga doped Si photosensitivity dependence on sample temperature, supply voltage and illumination intensity, determining optimal operating conditions 15 p2782 A70-31631

Acceptor level formation kinetics from measuring Hall constant as function of temperature after diffusion of copper into n-type GaAs 15 p2782 A70-31633

Solid state device inductance by thermal effects, describing characteristics and applications in resonant circuits 15 p2783 A70-31839

Soviet monograph on gas laws in aviation medicine for reduced oxygen pressure pathology, discussing kinetic theory, temperature effects, solubility, diffusion, etc 15 p2682 A70-31925

Linear power scaling-mass flow relationship in multi-Joule pulsed carbon dioxide-nitrogen-helium laser, noting thermal effects role 15 p2751 A70-31977

Fe 57 contaminant in Ni, studying Mossbauer effect as function of temperature 15 p2784 A70-32023

Ge and Si hemispherical emittance, showing doping and temperature effects 15 p2784 A70-32055

Temperature dependence of laser emission line self broadened half widths in spectral band of carbon dioxide at constant pressure 15 p2752 A70-32056

Cavitation in centrifugal pumps, predicting breakdown and inception points variation with temperature and speed 15 p2744 A70-32097

Steady state temperature dependence of heat conduction coefficient using arc approximation 15 p2826 A70-32106

Anodic temperature effect on Cs thermionic converter operation under arc regime, obtaining potential jump electron temperature relation near anode 15 p2677 A70-32119

Polygonized and cellular Be structures formation, examining temperature, strain, annealing and material purity effects 15 p2758 A70-32122

Carbon-graphite porous materials thermal conductivity at various temperatures 15 p2765 A70-32141

Stability characteristics of elastic shallow shells of revolution in temperature field and under compression, reducing variational equation of bending by Ritz method 15 p2817 A70-32169

Induced strain plane state in elastic micropolar medium by temperature effect, discussing thermoelastic problem stress functions 15 p2821 A70-32341

Elastic micropolar body thermal stresses induced by discontinuous temperature field, using differential equations of thermoelasticity 15 p2822 A70-32353

Thermal-mechanically treated stainless steels structure and properties, discussing stress relief aging effects 15 p2761 A70-32380

Inconel 600 high temperature high strain rate fracture process by hot torsion tester, noting temperature effects 15 p2762 A70-32389

Atmospheric ground layer temperature variations effect on astronomical telescope observations, discussing image motion character and origin 15 p2772 A70-32462

Stellar associations formation theory including effects of radiation, Rayleigh-Taylor instability and interstellar gas cold regions 15 p2801 A70-32478

Junction and MOSFET transistors thermal noise characteristics at cryogenic temperatures 15 p2710 A70-32585

Gravitational atmosphere thermally driven motions, noting expansion towards lower density regions in solar chromosphere 15 p2804 A70-32619

Monograph on temperature dependent material properties effect on elastic stress distribution in thin rotating disks of arbitrary profile 15 p2823 A70-32700

Yield strength of Nb-O single crystal solid solutions as function of temperature 15 p2763 A70-32808

Phenomenological theory of transient high temperature creep, considering internal back stress 15 p2763 A70-32809

Steady state high temperature creep theory, including internal back stress and temperature dependencies 15 p2763 A70-32810

- Book on flow separation covering steady/unsteady, turbulent and incompressible flows, base pressure, thermal effects, etc
16 p2833 A70-32913
- Electron paramagnetic resonance of viscous nematic liquid crystal, investigating order as function of temperature
16 p2960 A70-33058
- Flow stress and dislocation density dependence on temperature in polycrystalline molybdenum
16 p2930 A70-33085
- Iodine concentrations, temperature gradients and transport ampules etching effects on mass transport rate and crystal growth of MnS-MnSe-iodine system
16 p2960 A70-33088
- Cryobiotic potentialities on earth, investigating life forms physiological response to temperature, cryotolerance mechanisms, etc
16 p2848 A70-33093
- Optical properties of electropolished cubic Nb-Ti alloys at cryogenic and room temperatures in visible and near IR spectral range
16 p2930 A70-33205
- Gamma phase particle distribution changes in homogeneous segregation in Co-Ti alloy attributed to elastic interaction during aging temperature changes
16 p2931 A70-33208
- Spinel lithium ferrite magnetic and crystallographic properties, considering effects of Li and oxygen losses, sintering temperature and cooling rate
16 p2961 A70-33272
- Liquid He surface layer thickness as function of temperature, considering capillary waves effect due to gravity
16 p2952 A70-33288
- Thermal design factors in electronic components packaging, considering equipment failure types and rates, fabrication processes, etc
[ASME PAPER 70-DE-17] 16 p2877 A70-33422
- Turbofan engine compressor system performance dependence on circumferential extent, magnitude and rate of change of inlet temperature in altitude test facility
[AIAA PAPER 70-625] 16 p2968 A70-33590
- Thermal conductivity of multilayer and mixed powder high temperature insulation systems over wide temperature range and vacuum conditions
[AIAA PAPER 70-637] 16 p2997 A70-33596
- Composite solid propellants burning rate and initial temperature relationship, investigating granular diffusion flame model
[AIAA PAPER 70-656] 16 p2963 A70-33618
- Laminar compressible flat plate boundary layer dependence on Prandtl number and viscosity-temperature relations
16 p2893 A70-33673
- Magnetic phase diagram of hydrated cesium-copper carbide at 1.625 Neel temperature in external magnetic fields, giving equation for spin flop field temperature dependence
16 p2961 A70-33688
- Avalanche diode transient temperature response, measuring thermal impedance under pulse bias conditions
16 p2878 A70-33695
- Anomalous dark areas in sunglint patterns from ATS photographs, considering water temperature effect on ocean surface conditions
16 p2897 A70-33725
- Deformation formulas for simply connected micropolar isotropic homogeneous centrosymmetric elastic body under external forces and heating
16 p2990 A70-33742
- Activation energy for creep at intermediate temperatures, allowing for elastic modulus change
16 p2991 A70-33790
- Maraging nickel steel martensitic transformation temperature reduction after interruption by nonisothermal or isothermal tempering below 460 C
16 p2932 A70-33850
- Effective thermal conductivity parallel to laminations of multilayer insulation as function of temperature, layer density and length
[AIAA PAPER 70-846] 16 p2999 A70-33913
- Extinction parameters of submicron carbon, tungsten and Si particles in hydrogen measured at various temperatures, discussing scattering amplitude functions and Monte Carlo calculations
[AIAA PAPER 70-838] 16 p3001 A70-33933
- Unnatural environment behavior of leeches for long term biosatellite experiment, determining temperature, humidity, oxygen pressure, carbon dioxide concentration, calcium hydroxide limits, etc
16 p2854 A70-33994
- Surface temperature or heat flux density estimation for nonlinear inverse heat conduction problem involving temperature dependent thermal properties
16 p3002 A70-34195
- Constant grain size cast Mo ductile-brittle transition temperature dependence on annealing temperature using tensile test
16 p2933 A70-34274
- Heating effect above beta transus at intermediate and final stages of processing on Ti alloys properties
17 p3097 A70-34359
- Ti alloys embrittlement, investigating time temperature dependence of brittle subsurface layer formation during elevated temperature air exposure
17 p3112 A70-34365
- Beta-Ti and Ti-Cr single crystals elastic moduli, determining A ratio temperature dependence
17 p3115 A70-34380
- Commercial purity Ti athermal plastic deformation, showing anomalous behavior with temperature variations
17 p3116 A70-34392
- Alpha Ti-hydrogen alloys, discussing fracture behavior temperature dependence
17 p3117 A70-34396
- Hot plasticity elongation of cast and wrought Ti-Al-V alloy as function of temperature and strain rate
17 p3117 A70-34401
- Solution heat treatment temperature effects on strength and age hardening of Ti alloys
17 p3120 A70-34419
- Ti alloy stability after long term creep exposure at various temperatures
17 p3120 A70-34421
- Thermal exposure effect on room temperature mechanical properties of Ti alloys, noting diffusion bonding, hot forming and heat treatment
17 p3120 A70-34422
- High temperature heating and cooling effects on mechanical properties and structure of Ti welds, using notched bar impact specimens
17 p3098 A70-34423
- Forged alpha/beta Ti alloys, investigating relationship between mechanical properties and microstructures produced by heating
17 p3120 A70-34427
- Ti-Al-Cr-Fe tensile, fatigue and creep properties at various temperatures, considering industrial applications
17 p3121 A70-34428
- Mean electron density profiles and fluctuations in equilibrium high speed turbulent boundary layers, calculating temperature effects
[AIAA PAPER 70-743] 17 p3066 A70-34500
- Oxygen, nitrogen and argon plasma total radiation measurement at various wavelengths and temperatures
17 p3139 A70-34547
- Thermal-chemical damage to carbon particles in egg albumin under ruby laser irradiation, using chemical rate equations for protein denaturation
17 p3035 A70-34577
- Ferroelectric radiation detectors theory and applications, considering polarization changes due to temperature increase from absorbed radiation
17 p3082 A70-34649
- Temperature and strain rate effects on polycrystalline Al strength
17 p3124 A70-34655
- Zonal wind component in lower ionosphere observed for gravity waves partial reflections by temperature discontinuities, using least mean square method for reflection coefficient
17 p3077 A70-34946
- One dimensional elastoplastic wave propagation in rate-sensitive viscoplastic rod with thermal gradient
17 p3185 A70-34966
- Stress wave generation in elastic temperature-dependent absorbing solids by impulsive EM radiation
17 p3185 A70-34967
- Crystal and glass lasers activated by Nd ions, examining stimulated emission temperature dependence by high temperature spectroscopy
17 p3106 A70-35105
- Human acceleration resistance and psychomotor behavior under emergency flight conditions, including high temperature exposure and remaining in clinostatic position
17 p3037 A70-35135
- Temperature dependent absorption, nonsteady beam propagation and laminar-turbulent transition in laser induced convection column, measuring turbulence onset by fine wire resistance thermometer
[AIAA PAPER 70-800] 17 p3107 A70-35197
- Viscoelastic materials cut growth, discussing strain, fracture and modulus of elasticity dependence on temperature variations
17 p3146 A70-35220
- Viscoelastic materials fracture strength as function of cut length, defect size and temperature
17 p3146 A70-35221
- Temperature and constant compressive loading effects on mechanical characteristics of fiberglass reinforced plastics
17 p3127 A70-35341
- Ambient temperature effects on rats and white mice tolerance to hypoxia, asphyxia and hypercapnia in nitrogen-oxygen and He-oxygen atmospheres
17 p3030 A70-35353
- Body temperature-maximum oxygen intake relations in hot humid air
17 p3038 A70-35424
- Ambient temperature effects on venous reactivity to hydrostatic stress, discussing posture changes and lower body negative pressure effects on index of compliance
17 p3031 A70-35426
- Differential fast-acting thermostat for temperature variation effects on elements, systems and subassemblies in gas filled space
17 p3090 A70-35433
- Fatigue crack propagation in solids in terms of nucleation theory, explaining temperature dependence of fatigue strength and size effect
17 p3191 A70-35464
- Thermal contact resistance, discussing behavior at cryogenic temperatures and directional or thermal rectifying effect
17 p3197 A70-35541
- Laminar free convection boundary layer on vertical heated plate near discontinuity in plate temperature, discussing velocity field
17 p3198 A70-35593
- Ni-Fe ferrites resistivity and thermoelectric power as function of temperature, proposing two energy level model for Fe ions
17 p3143 A70-35604
- Low temperature effects on Ti alloys welded joints elasticity
17 p3126 A70-35637
- Temperature dependence of materials with protective coatings, emphasizing mechanical properties of Mo with various diffusive coatings
17 p3126 A70-35716
- Heat transfer and friction drag calculation for turbulent boundary layer of gas with temperature dependent physical properties
17 p3012 A70-35729
- Powder combustion on metal plate, investigating unburned layer thickness dependence on initial temperature
17 p3198 A70-35738
- Cobalt binary alloys allotropic transformation and thermal expansion at various temperatures
18 p3271 A70-35967
- Gas bubbles thermal rejection and formation in Ni electrodeposit during annealing over 200-1000 C range
18 p3272 A70-36039
- Ni-Al-Nb superalloy, determining temperature effect on phase relationships in Ni-rich portion of phase diagram
18 p3273 A70-36041
- Rolled fine grained aluminum-alumina particles composites, determining creep strength dependence on temperature and tensile stress axis orientation
18 p3274 A70-36051
- W-3 percent Re-W-25 percent Re thermocouple reliability and stability, describing emf vs temperature table in 0-2400 C range
18 p3257 A70-36200
- Fe-Co alloys critical points during rapid heating, determining alpha-gamma phase transformations onset from dilatometric curves
18 p3275 A70-36203
- GaAs diodes electroluminescence dependence on temperature and injection current
18 p3297 A70-36234
- Thermophoresis of aerosol particles in nearly free molecular nonuniformly heated gas, using linearized Boltzmann equation
18 p3292 A70-36254
- Superconducting Nb-Ti-Zr alloy, investigating structure and decomposition at high temperatures by X ray and electron microscopy
18 p3276 A70-36310
- Fine grained Be structure and mechanical properties under tensile deformation at temperatures from 20 to 1000 C
18 p3276 A70-36311
- Physisorption isotherms for nitrogen on stainless steel at various temperatures and very low pressures
18 p3226 A70-36322
- Plane strain and stress produced in elastic micropolar medium by action of temperature
18 p3338 A70-36429
- Thermal effects on aircraft elastic vibration mode shapes, recommending investigation to develop analysis and design tools
18 p3213 A70-36459
- Polymers dynamic properties in hyperelastic and vitreous states as function of temperature, using torsion pendulum method
18 p3263 A70-36469
- Graphite modulus of elasticity as function of temperature, considering effects of moisture content in pores
18 p3278 A70-36470
- Gas exchange, body temperature and electrical activity of neck and back muscles of cold-acclimated white rats subjected to various temperatures
18 p3219 A70-36540
- Respiratory gas metabolism of liver, heart, brain and muscle tissues in birds exposed to various ambient temperatures for long periods
18 p3220 A70-36547
- Unsteady temperature fields in heat conduction problems associated with high temperature effects on ablated cylinders
18 p3348 A70-36572
- Thermal self focusing filaments observation in form of tracks in KDP and ADP crystals damaged by radiation from free emission mode laser
18 p3266 A70-36612

Sample dimensions effect on shape of I-V curve caused by overheating in media with ambiguous dependence of electron temperature on field 18 p3298 A70-36621

Time dependence of laser rod focal length, measuring thermal lensing effects 18 p3270 A70-36756

Thermal expansion anisotropy in graphite-epoxy composites causing residual stresses [ASME PAPER 70-GT-129] 18 p3279 A70-36855

Sea water temperature and salinity effects on smooth ocean surface radiation in centimeter range 18 p3250 A70-36968

Stellar atmosphere radiation field quantity vs quality, deriving electron temperature as function of tau 18 p3309 A70-37007

Semiconductor capture level parameter determination, using thermostimulated conductivity 19 p3483 A70-37296

Dispersion hardened Co strength and plasticity temperature dependence, determining Ti and Nb carbides additives effects 19 p3450 A70-37350

HD molecule nuclear relaxation time in liquid state as function of temperature, discussing various mechanisms 19 p3473 A70-37367

Al-Mg alloys recrystallization, investigating heating rate and annealing time effects on sheet grain size 19 p3450 A70-37372

Molybdenum carbide in methane-based plasma glow discharge, considering possible pyrocarbon layer formation and temperature effects 19 p3434 A70-37456

Fcc metals surface self diffusion temperature dependence, using model based on complex defects contribution to diffusion flux at high temperatures 19 p3483 A70-37545

Work hardening maxima of alpha-Ti as function of strain rate and temperature 19 p3451 A70-37568

Temperature dependence of anisotropic reaction kinetics of oxygen with pyrolytic graphite 19 p3373 A70-37709

Dielectric layer and screen heat loss effects on diffraction radiation in resonant waveguide 19 p3377 A70-37725

Elastic constants of ZnTe and ZnSe single crystals over 77-300 K range, using ultrasonic pulse echo method 19 p3486 A70-37761

Maraging steels heat treatment, measuring hardness as function of temperature for various heating rates 19 p3452 A70-37807

Nonuniform emitter current distribution effect on power transistor thermal stability, discussing temperature distribution effects 19 p3387 A70-37821

Age hardening of Nb-Hf-C alloys investigated by metallography and X ray diffraction, discussing tests in various temperature ranges 19 p3452 A70-37826

Fiber reinforced solid material, determining swelling or temperature change induced dilatation by micromechanics and physical chemistry 19 p3540 A70-37943

Periodic thermal forcing role in Venus atmosphere dynamics, investigating momentum transport to support mean shear for channel flow 19 p3519 A70-38251

Ice crystals growth rate in natural clouds over minus 2-minus 32 C range based on characteristic axial ratio 19 p3462 A70-38261

Thermal decomposition of nitrogen tetroxide and nitrogen dioxide induced by shock waves, examining temperature effects 19 p3373 A70-38265

Phase formation and mass transport during iodine-refined Ti reaction with nitrogen at various elevated temperatures 19 p3452 A70-38364

Circadian rhythms in single cell animals, examining cell division, temperature and light effects 19 p3365 A70-38410

Reciprocity theorem for stresses and strains in medium under creep and temperature field 19 p3548 A70-38582

Gas flow velocity measurement by thermal signal emitted from thin wire fed with modulated known frequency current 19 p3406 A70-38673

Oxygen solubility in Nb-Hf alloys at elevated temperatures, using isothermal sections for Nb-rich part 19 p3453 A70-38708

Nb effects on steel susceptibility to brittle fracture at various temperatures, discussing impact strength and nucleation energy of crack formation 19 p3453 A70-38709

Alumina effects on Nb creep activation energy at elevated temperatures, noting independence from chemical composition and creep stresses 19 p3453 A70-38710

Ti-Nb-Zr alloys strength and plasticity at various temperatures, noting compositional effects on tensile and yield strength 19 p3453 A70-38712

W-Mo-Nb-Ta system structure and properties at room and high temperature by microstructural analysis and hardness measurements, discussing Mo addition effects 19 p3453 A70-38713

Binary Nb vapor systems mutual diffusion coefficients concentration and temperature dependences, discussing interatomic bonds and melting point of alloys 19 p3454 A70-38715

Thermotropic quasi-geostrophic atmospheric model, deriving linear and quadratic integral invariants 19 p3463 A70-38754

Comet brightness curves asymmetry with respect to perigee attributed to pre- and post-heating 19 p3526 A70-38781

Microstructure and phase distribution in maraging steels subjected to austenization and subsequent aging in reversible transformation temperature range 20 p3645 A70-39038

Duraluminum dislocation structure dependence on deformation temperature by electron microscopy, discussing subgrain boundaries 20 p3646 A70-39045

Stressed cast Mg-Nd-Zr alloys structural transformations kinetics over temperature range by electron microscopy 20 p3646 A70-39046

Beta Ti-V-Cr-Al phase transformations below 500 C, discussing metastable phase, bcc formation and thermodynamics 20 p3646 A70-39106

Temperature effect on radiation characteristics and cryogenic tensile properties of irradiated Be, Ti and Al alloys 20 p3647 A70-39111

Degenerate p-n diode junction capacitance calculation, taking into account quantum and temperature effects 20 p3596 A70-39117

Natural convection problem solution along nonuniformly heated vertical plate with variable transverse magnetic field 20 p3735 A70-39144

Liquid He 4.2 K in narrow channels with laminar and turbulent flow, measuring boiling heat transfer as function of temperature difference 20 p3735 A70-39155

Sensing device to measure radial stress induced at solid propellant grain-to-case bond interfaces during wide temperature variations, detailing instrumentation and operation 20 p3718 A70-39158

Heat transfer from cylinder in axial air flow with induced turbulence of incident boundary layer, noting temperature effects 20 p3736 A70-39264

Liquid metal MHD conservation cycles, discussing evolution and status of power generation at various temperatures 20 p3563 A70-39325

Emitting plasma probes floating potential, discussing emission rate dependence on probe temperature and surface coverage by seed 20 p3632 A70-39607

Temperature dependence of titanium-zirconium oxide semiconductor compounds growth, using samples arc melted in purified He 20 p3687 A70-39631

Heating conditions effect on microstructure, hardness, transformation temperatures and dimensional anisotropy of maraging steel 20 p3649 A70-39941

Insulator wall temperature effect on supersonic nonequilibrium MHD generator channel under open and short circuit conditions 20 p3681 A70-39994

Performance comparison of diagonal conducting wall MHD generator and Hall generator of equal dimensions, investigating wall temperature effect 20 p3566 A70-40004

Blood vessels constriction in rear limbs, small intestine and spleen of dog with arterial blood heated above rectal temperature 20 p3574 A70-40173

Hypoxia and high ambient temperature effects on altitude tolerance in animals 20 p3575 A70-40186

Ammonium perchlorate composite solid propellant pressure vs burning rate at various temperatures, discussing granular diffusion flame theory 20 p3694 A70-40266

Liquid and solid semiconductors thermal emf and electrical and heat conductivities measurement over wide temperature range 20 p3634 A70-40300

Weak steady shock waves formation in relaxing binary gas mixture, discussing vibrational specific heat temperature dependence 20 p3614 A70-40350

Turbulent gas boundary layer at finite Reynolds numbers, investigating relative changes in friction and heat transfer coefficients and temperature factor 20 p3614 A70-40390

Interplanetary plasma torque due to temperature and pressure anisotropy, considering solar wind angular velocity and sun angular momentum 20 p3712 A70-40423

Deflagration rate measurements by high speed cinematography of ammonium perchlorate single crystals under various ambient temperature and pressure conditions 20 p3688 A70-40468

Strain gages for structural stress analysis in cryogenic environments, discussing correction factors for temperature dependent characteristics 21 p3932 A70-40545

Electron temperature measurements in flowing high density plasma by cooled Langmuir probe, considering probe temperature variations effects in boundary layer 21 p3854 A70-40557

Thermally induced mirror deformations and wavefront distortions under radially nonuniform heating 21 p3942 A70-40806

Temperature dependent anomalous optical absorption of thin yttrium films under static ultrahigh vacuum 21 p3862 A70-40816

Ion concentrations in premixed propane-air two dimensional laminar nozzle burner flames with seeding, discussing dependence on temperature and equivalence ratio 21 p3772 A70-40880

Soft X-ray-enhancement during solar flares due to coronal condensation temperature increase 21 p3880 A70-40969

Human sweating transient state characterized by time constant following abrupt ambient temperature rise 21 p3761 A70-41140

Traveling thermal wave induced channel flow, examining velocity profile thermal boundary conditions and shear stress 21 p3948 A70-41247

Liquid crystal smectic C phase temperature dependent tilt angle, using conoscopic observation and circularly polarized light 21 p3862 A70-41322

Heat transfer measurements based on optical methods with temperature dependence of refractive index making temperature field visible 21 p3826 A70-41373

Piston problem numerical solution by Boltzmann collision integral, considering shock waves and thermal disturbances evolution at gas-solid interfaces 21 p3808 A70-41378

Carburization and grain size of tungsten carbide powder from W powder as function of temperature, using optical and electron micrographs 21 p3839 A70-41412

Creep and stability of microstructural Al elements under varying temperatures, noting grain boundary migration 21 p3839 A70-41429

Apollo 11 fines, breccias and crystalline rocks thermoluminescence, observing temperature dependence of glow curve peaks 21 p3914 A70-41649

Fe 57 nuclear hyperfine splittings in clinopyroxenes from lunar igneous rocks, determining temperature dependent cation distribution 21 p3915 A70-41659

Electron collisional detachment from negative fluorine ions in shock tube following nonequilibrium ion overshoot in CsF dissociation in argon, noting correlation with temperature 21 p3853 A70-41705

Eddy currents in Hall generator with conducting side wall, studying velocity and temperature effects for turbulent boundary layer and laminar flows 21 p3859 A70-41733

Thermal and birefringent effects on output of continuous Nd-YAG laser rod, using 6328 A probe 21 p3837 A70-41906

Heat treatment and photovoltaic properties of copper disulfide-cadmium sulfide heterojunctions, measuring I-V characteristics, capacitance and spectral response 21 p3862 A70-41911

Temperature and bias voltage dependence of zero bias tunneling structure in p-type GaAs-Au Schottky junctions 21 p3863 A70-41917

Transmission electron microscopy observation of thermal annihilation of stacking faults in epitaxial layers of GaAs grown from liquid phase 21 p3863 A70-42004

Electron tunneling through p-type GaAs point contacts on Pb single crystals at liquid He temperatures 21 p3864 A70-42017

Epoxy and polyurethane adhesives stress-strain behavior in lap joints, examining bond thickness and cryogenic temperature effects 21 p3844 A70-42139

Gaseous and liquid fluorine exposure effects on nitroso rubbers at ambient and cryogenic temperatures, using impact tests and IR spectroscopy

21 p3844 A70-42140

Ni-Cu-C solid solutions, measuring temperature dependence of graphite solubility by vapor transport method

21 p3841 A70-42149

Incompressible laminar boundary layers thermal response behavior in wedge flow, obtaining surface response, temperature fields, heat flux and steady state data

21 p3811 A70-42164

Constant property unsteady laminar flow thermal entrance problems, using variational formulation in Laplace transformed domain

21 p3954 A70-42169

Single phase flow problem in heated vertical prismatic channel, using dimensional analysis from conservation equations with boundary layer approximation

21 p3954 A70-42170

Thermal variation of diamagnetism and susceptibility of rhombohedral graphite

21 p3845 A70-42268

Atmospheric inhomogeneity and temperature gradient effects on sonic booms, discussing displacement, growth rate and shock wave radii refraction

22 p3961 A70-42311

Thermally induced oscillations and negative resistance in seminsulating oxygen-doped GaAs double injection devices via heating beyond critical temperature

22 p4084 A70-42326

Thermal blooming of 10.6 micron laser beam in carbon dioxide absorption cell

22 p4049 A70-42335

Molecular vibrational temperature dependence on electron and neutral gas temperatures and degree of ionization for plasma excitation in nitrogen

22 p4078 A70-42358

Uranium plasma diagnostics, measuring emission and absorption coefficients as function of pressure and temperature

22 p4069 A70-42361

Plasma arc welding torches nozzle dimensions and shape dependence on thermal and electrical characteristics, optimizing energy output

22 p4042 A70-42378

Temperature and long term effects on volatility of perfluoroalkyl ether and polysiloxane greases [ASME PAPER 70-HT-31]

22 p4058 A70-42435

Heat generation effects in air hydrostatic journal bearing, including shaft and housing thermal deformation and lubricant viscosity changes [ASME PAPER 70-LUBS-19]

22 p4044 A70-42442

Spiral grooved gas lubricated thrust bearings, calculating self heating induced thermal distortion effects on load capacity [ASME PAPER 70-LUBS-14]

22 p4044 A70-42447

Gas lubricated foil bearing performance as support for turbo rotor simulator, examining heating and thermal gradient effects [ASME PAPER 70-LUBS-12]

22 p4044 A70-42448

Nb-Zr thin films superconducting properties dependence on deposition temperature and rate and substrate material

22 p4085 A70-42623

Heat conduction into semiinfinite homogeneous solid with thermal conductivity dependence on temperature, noting temperature profile asymptotic behavior for similarity solution

22 p4123 A70-42641

Gaseous substances thermodynamic functions and chemical equilibrium constants logarithms dependence on temperature and pressure, deriving internally self consistent formulas

22 p4124 A70-42682

Liquid and solid phases of substance, calculating thermodynamic properties and vapor pressure logarithm dependence on temperature

22 p4124 A70-42683

Pressure and temperature effects on large amplitude acoustic pulses propagating in stratified atmosphere

22 p4010 A70-42689

Oxygen diffusion coefficient of alpha-Ti from oxidation of saturated and unsaturated beta phase in 932-1142 C range

22 p4053 A70-42731

Strain rate change effect on stress-strain diagram shape of polycrystalline alpha-Ti during tensile tests over temperature range

22 p4054 A70-42737

Ti embrittlement by liquid Cd, discussing ductile-brittle transition temperature dependence on strain rate

22 p4054 A70-42738

Hot work effect on properties and microstructure of wrought Waspaloy, observing temperature decrease effect on fracture ductility

22 p4054 A70-42739

Annealing temperature effect on creep rupture strength of Ti-W-Hf alloy

22 p4054 A70-42741

Plunger pump for aircraft hydraulic systems, measuring working fluid temperature effect on cavitation

22 p3965 A70-42817

Rotating magnetic star thermal behavior, discussing central nuclear burning stability, homologous changes, cooling, degeneracy and helium flash

22 p4100 A70-42855

Initial water content on moon implied from hypothetical falling temperature lunar accretion as original earth satellite

22 p4102 A70-42954

Microbial existence limits in hot springs at varying temperature and pH characteristics

22 p3970 A70-42956

Neutron irradiation effect on elevated temperature fracture of various fcc alloys

22 p4054 A70-42957

Inconel short term creep properties measured for various temperature and stress levels, presenting results in polynomial and graph form

22 p4055 A70-43098

Vacuum-melted and deformed Mo alloys tests, showing long term strength decrease under cyclic heating

22 p4055 A70-43123

Mo microstructure changes at high temperatures, noting polygonization, grain migration and crack propagation during failure

22 p4055 A70-43125

Al-Be-Mg alloys under solution treatment, noting aging and prolonged heating effects on mechanical properties from solid solution decomposition diagram

22 p4056 A70-43127

Tubular Al creep resistance increase by temperature jumps during steady phase of creep

22 p4056 A70-43344

Phase diagrams and nonvariant equilibria points of Ti-Si alloys subjected to prior annealing, determining phase transformations, decomposition and other properties as function of temperature

22 p4057 A70-43350

Gas turbine engine combustion chamber starting, discussing effects of temperature, nozzle characteristics and fuel physicochemical properties

22 p4092 A70-43356

Nitrogen transport coefficients as function of high temperature in stationary plasma produced in cascade arc chamber

22 p4082 A70-43373

Blood flow antagonistic changes in various vascular beds following spinal cord central thermal stimulation attributed to sympathetic vasoconstrictor activity

22 p3971 A70-43405

Spinal cord thermal stimulation effects on regional sympathetic activity in rabbits and cats determined from integrated sympathetic efferent discharges

22 p3971 A70-43406

Silver fluorination kinetics, taking temperature and pressure effects into account

22 p3983 A70-43416

In thin film resistance thermometers fabrication by vapor deposition in vacuum, considering electrical properties dependence on temperature

22 p4039 A70-43446

Monograph on MHD, covering fluid layer stability under adverse temperature gradient, geomagnetic field origin, vector relations, etc

22 p4084 A70-43448

Current and vector potential in thin superconducting film in HF field, considering high and low temperatures

22 p4088 A70-43467

Glass-epoxy composites, measuring embedding filaments effect on time-temperature relationship under ultimate stress conditions

22 p4118 A70-43549

Silicon precipitation in nonrefined annealed Al, examining heat treatment effects

22 p4057 A70-43550

Surface degradation by oxidation, temperature fluctuations and hot corrosion of Ni- and Co- base superalloys in gas turbine engines

22 p4057 A70-43574

Annealing response of explosively shock loaded Ni, thorium-Ni, Chromel-A, Inconel 600 and thorium-Chrome, noting activation temperature inverse relation with stacking fault free energy

23 p4204 A70-43883

Stellar associations formation theory including effects of radiation, Rayleigh-Taylor instability and interstellar gas cold regions

23 p4239 A70-43903

Temperature effect on friction coefficient of boron and silicon carbides, using similar wear pairs in vacuum

23 p4205 A70-44044

Fatigue of turbine blade stainless steels and nickel alloys as function of temperature, stress and surface layers [ICAS PAPER 70-38]

23 p4205 A70-44135

Temperature gradient effect on Couette flow heat transfer and stability

23 p4181 A70-44250

High strength Al alloys plate and welds, comparing tear notch tests at cryogenic and room temperatures

23 p4206 A70-44352

Hg vapor thermal conductivity at various temperatures, using fine wire frequency response and kinetic theory

23 p4281 A70-44428

Limit analysis for ionization potential reduction effect on ionized gas atomic composition, considering temperature and electron density

23 p4220 A70-44435

Temperature dependent materials heat flow analysis using perturbation method for nonlinear boundary value problems

23 p4282 A70-44589

Temperature effect on radiation tolerance of mice exposed to low dose rate gamma radiation, noting mortality delay in low temperature environment

23 p4148 A70-44789

Extreme environmental temperature effects on hepatic amino acid catabolism in rats attributed to caloric deficiency

23 p4148 A70-44790

Wrought Nimonic alloy, measuring stress redistribution due to creep under variable load and temperature

23 p4274 A70-44911

Low Reynolds number gas flow past heated circular cylinder, considering Stokes region transport properties

23 p4284 A70-44978

Rarefied binary gas mixture, determining temperature gradient effect under various pressures

23 p4284 A70-44984

High cutoff negative resistance silicon carbide diodes, noting temperature independent current-voltage curve

23 p4176 A70-45067

Antiferromagnetic and ferrimagnetic resonance frequencies, determining temperature dependence by spin wave theory

24 p4388 A70-45132

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators

24 p4318 A70-45191

Thermal fluctuations effect on Josephson tunnel contact binding energy and external magnetic field dependence

24 p4388 A70-45203

Ultrasonic absorption in SbSI semiconducting semiconductor as function of temperature, illumination and constant electric field strength, noting absorption coefficient rise near Curie point

24 p4389 A70-45207

SbSI semiconductor single crystal repolarization parameters temperature dependence, noting anomalies in permittivity, spontaneous polarization and dielectric loss tangent

24 p4389 A70-45208

Impurities and heat treatment effects on W internal friction at high temperatures, considering relaxation processes, recrystallization and microstructure

24 p4357 A70-45227

Ground temperature effects on thermal gradients resolution in IR line scan imagery

24 p4334 A70-45363

Big bang temperature problem, discussing galactic masses determination possibility by gravity-strong interactions interplay in early stages

24 p4403 A70-45402

German monograph on sintered molybdenum silicide recrystallization following high temperature heating in oxidizing atmosphere

24 p4367 A70-45575

Axisymmetric laminar compressible jet flow characteristics, allowing for compressibility effects due to temperature dependent density and viscosity variations

24 p4325 A70-45584

Ion-ion potential for sodium vapor for second virial coefficient as function of temperature at 1200-1700 K

24 p4381 A70-45649

Amorphous semiconductor alloys in As-Se system, measuring DC and AC electrical conductivity dependence on temperature

24 p4390 A70-45657

Solid solution of GaAs with CdSe and CdS compounds, investigating intrinsic absorption edge dependence on temperature

24 p4390 A70-45663

LF plasma waves amplification by beam-plasma interaction, considering electron and ion temperatures effects

24 p4387 A70-45797

Pneumatic actuator rod and piston head seals, examining materials at various temperatures, pressures and speeds [SAE PAPER 700791]

24 p4294 A70-45855

Liquid rocket propellants tankage and components long term storage under extreme relative humidity and temperature conditions [SAE PAPER 700800]

24 p4392 A70-45911

Temperature gradient spectra on complexes of metmyoglobin and methemoglobin with ligands,

- discussing boundary forms equilibria for various electron spin configurations 24 p4301 A70-45985
- Controllable states with prescribed heat flux for incompressible isotropic thermoelastic bodies with temperature dependent response functions 24 p4426 A70-46041
- Cold boundary layer effect on chemical kinetic parameters behind reflected shocks in single-pulse shock tube 24 p4323 A70-46044
- Temperature induced humidity errors in military and Weather Bureau radiosondes carbon humidity element caused by solar irradiation 24 p4372 A70-46073
- UV excited powdery fluorescent products, describing crystal for photo and thermoluminescence at various temperatures 24 p4339 A70-46097
- Si-carbide composites electrical conductivity from temperature and thickness dependence, obtaining volt-ampere characteristics via computer method 24 p4391 A70-46154
- ### TEMPERATURE FIELDS
- #### U TEMPERATURE DISTRIBUTION
- #### TEMPERATURE GRADIENTS
- Shock wave structure in two phase media with temperature and velocity gradients and possible phase transitions 01 p0060 A70-10147
- Polar thermosphere temperature measurements from artificial clouds indicating geophysical-associated variations, nocturnal decrease and annual variations 01 p0077 A70-11201
- Jovian atmosphere convective energy magnitude determination for various atmospheric thicknesses and temperature gradients 02 p0375 A70-12432
- Extrapolation formulas to calculate temperature gradients and heat fluxes in solid heated by variable heat flux, estimating errors 03 p0606 A70-13521
- Temperature sensor location for accurate averaging in fluid flowing through heated or cooled circular duct 03 p0486 A70-13557
- Thermocouples response to rapid temperature rise produced by discharge from low inductance high voltage capacitor bank 03 p0486 A70-13559
- Embedded sheathed thermocouples temperature measurement of cooled jet engine turbine buckets subjected to high heat flux 03 p0486 A70-13560
- Two phase liquid-vapor system specific heat increase at temperatures approaching critical point, using nonanalytic vapor pressure equation with data for nitrogen and oxygen 04 p0780 A70-14584
- Ground temperature effect on thermal resolution in IR line scan imagery, discussing equipment and operating procedures for temperature gradient detection 04 p0686 A70-14617
- Conducting fluid steady convection due to combined effects of thermal gradient and DC electric field predicted by analytical model 04 p0785 A70-14989
- Stimulated thyroid gland temperature variations and oxygen metabolism in decorticated dogs and anesthetized rabbits and rats 04 p0639 A70-15511
- Atmospheric temperature gradients above 30 km near sunrise using earth spectral radiance measurements by balloon 04 p0694 A70-15523
- North Galactic Spur compared for edge, ridge and neck with previous results noting sharp temperature gradients 04 p0758 A70-15699
- Sonic boom propagation in still atmosphere with vertical temperature gradient, using graphical method of determining rays for aircraft motion 05 p0791 A70-15786
- Low Reynolds number flow of variable property gas past infinite heated circular cylinder at large temperature differences, measuring drag on cylinder 05 p0789 A70-16014
- Energy losses in conductors carrying intense currents to cryogenic regions linked with heat transfer due to high temperature gradients 05 p0881 A70-16026
- Thermodynamics of elastic continuum with microstructure, modifying second law to include microtemperatures 05 p0930 A70-16083
- Combustion model for temperature inhomogeneities effect on stability of solid fuels steady combustion 05 p0958 A70-16960
- Ni effect on nitrogen activity in Fe-Ni-N austenite between 600-1200 C using Strohlein analyzer 06 p1088 A70-17612
- Yttrium-iron garnet optical properties at various wavelengths and temperatures, noting absorptivity decrease in IR region 06 p1126 A70-17767
- Sunspot temperature and pressure gradients from blue, red and IR photographs, deriving umbral depression and density scale height 06 p1143 A70-18000
- Thermal slip velocity of gas in infinite temperature gradient tangential to solid wall, basing calculation on linearized Boltzmann kinetic equation 06 p1049 A70-18332
- LF nonacoustic instability of solid propellant rocket motors, using combustion model allowing flame temperature oscillations with chamber pressure [AIAA PAPER 68-179] 07 p1421 A70-19319
- Soviet book on structures design for stability at high temperatures with large gradients, discussing thermoelasticity, thermoplasticity and creep equations for shells, plates, etc 07 p1409 A70-19601
- Temperature gradients, viscosity and conduction measurements in air stream between parallel plates, investigating limiting value of total Prandtl number 07 p1260 A70-19999
- Meteorological rocket sounding data for Eurasia in mean profiles, time and lateral cross sections, discussing temperature and wind variations 07 p1274 A70-20270
- F corona heliocentric dust cloud model to account for temperature variations with particle size and optical properties, computing thermal emission 08 p1571 A70-20907
- Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations 08 p1482 A70-20952
- Temperature increase effects on fully turbulent boundary layers at low Reynolds number in air investigated in wind tunnel 08 p1485 A70-21606
- Simply supported rectangular plate investigated for effect of thermal gradient on transverse vibrational frequencies 08 p1595 A70-21976
- Solar chromosphere-corona transition region properties, discussing temperature increase within very thin layer and inferring temperature-density structure from emission line intensities 09 p1752 A70-22246
- Drop sondes dynamic and aerodynamic design for lower Venus atmosphere based on solution for free fall of body in atmosphere with constant temperature gradient 09 p1766 A70-22935
- Thermal conductivity of arbitrarily inhomogeneous bodies, considering vectorial field isotropy and temperature gradients dispersion 09 p1789 A70-23103
- Circumferential wall temperature gradients in spacecraft radiator tubes as function of tube wall fins 09 p1789 A70-23261
- Time-temperature charts for one dimensional unsteady conduction with uniform internal heat generation 09 p1791 A70-23567
- Temperature gradient method for determining local heat transfer coefficients in variable cross section channel 10 p1968 A70-24290
- Heat resistant alloys low cycle fatigue tests between 20-800 C, establishing residual strain change patterns as function of stress and temperature 10 p1906 A70-25294
- Remote measurement of CAT associated temperature gradients, comparing monochromatic and finite bandpass models 12 p2262 A70-26949
- Atmospheric airflow model above changes in surface roughness, temperature and heat flux, using boundary layer approximations and Businger-Dyer and mixing length hypotheses 14 p2602 A70-30368
- Fine scale temperature variability along flight path during smooth and turbulent conditions 14 p2609 A70-30605
- Venus surface temperature poleward variation from radio interferometry measurements 14 p2646 A70-31068
- Mars surface material properties from radio emission observations, considering daily temperature variations distribution 14 p2648 A70-31083
- Heating rate effect on parameters of resistance wire strain gages subjected to temperature gradients 15 p2733 A70-31536
- Temperature and density extreme variations at various levels in stratosphere and mesosphere, analyzing sounding rocket data 15 p2723 A70-31661
- Elastic micropolar body thermal stresses induced by discontinuous temperature field, using differential equations of thermoelasticity 15 p2822 A70-32353
- Atmospheric temperature fluctuation spectrum determination by energy budget solution, considering spectral density dependence on Richardson number 15 p2732 A70-32542
- Thermoelectric force due to thermocouple inhomogeneities, showing relation to temperature gradient and measurement error 16 p2900 A70-33070
- Surface temperature changes measurement with thermovision camera, discussing calibration and recording 16 p2911 A70-33775
- Argon II line transition probabilities, observing UV spectral region, upper energy levels and temperature differences 16 p2956 A70-34251
- Conical passive radiation coolers for quantum IR detectors on equatorial synchronous earth satellites, determining temperature excursions 16 p2915 A70-34314
- Empirical autocorrelation functions describing statistical properties of vertical temperature gradients in troposphere and lower stratosphere 17 p1332 A70-35337
- Free convection boundary layer on two dimensional or axisymmetric body with sudden temperature increase, determining skin friction and heat transfer coefficients 18 p3346 A70-36487
- Temperature change relation between anterior hypothalamus and concha auricular in rabbits 18 p3218 A70-36532
- Gas exchange adaptation to heat and cold in rats with different ecological backgrounds 18 p3218 A70-36533
- Energy flow between two superfluid helium baths at different temperatures and separated by thin plate 19 p3471 A70-37648
- Nonlinear electromagnetic constitutive equations with coupling to thermal gradients for holohedral and hemihedral materials, extending analysis to orthotropic media 19 p3552 A70-37786
- Thermal error in temperature difference between actual and simulated space environment 19 p3401 A70-38301
- CAT detection by IR radiation, remotely detecting atmospheric horizontal temperature gradients 20 p3626 A70-39080
- Solar activity effects on Northern Hemisphere atmospheric temperature, mapping gradients for 11 year solar cycle 20 p3662 A70-39188
- CAT as mechanism relieving wind and temperature discontinuities, maintaining Richardson number at limiting value by turbulent energy dissipation 20 p3663 A70-39373
- Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations 20 p3608 A70-39377
- Temperature gradient method for determining local heat transfer coefficients in variable cross section channel 20 p3739 A70-40348
- Plane horizontal fluid film convective stability with free boundaries in vertical circular cylinder for periodic modulation of vertical temperature gradient or gravitational field 21 p3941 A70-40608
- Solar flare relation to radio emission at 3.3 mm, discussing sunspots, temperature gradients and magnetic fields 21 p3879 A70-40962
- Heat transfer in cooled turbulent tube flow downstream region at high bulk-to-wall temperature ratios 21 p3945 A70-41037
- Thermocouple transient response characteristics in deflagrating and ablative low conductivity materials with high temperature gradients [ASME PAPER 70-HT-7] 22 p4122 A70-42440
- Large collimator objectives lenses focal lengths measurement in vibrations and temperature gradients 22 p4073 A70-42511
- Finned tube-sheet spacecraft radiator transient response for perturbations caused by power supply and heat sink temperature changes 22 p4123 A70-42519
- Linear coupled thermoelasticity theory for homogeneous isotropic solid with two temperatures 22 p4123 A70-42540
- Stratospheric clear air turbulence probability based on vertical temperature gradients and rawinsonde ascensional rates 22 p4064 A70-42619
- Rarefied gas heat conduction between concentric cylinders in slip regime, obtaining perturbed temperature and density variations 23 p4284 A70-44985
- Cross correlation measurement errors for fluid pipe flow with pseudorandom sequence generated temperature fluctuations, considering transport time, impulse response and laminar flow 24 p4333 A70-45111

Combustion chamber flow visualization, obtaining information on pressure loss, velocity field, flow pattern and temperature gradients 24 p4393 A70-45444

Atmospheric pressure surface sharp slopes at SST altitudes producing vertical acceleration based on temperature gradients inspection 24 p4372 A70-46050

Clear air turbulence detection by IR radiometry of thermal gradients, using staggered receivers for panoramic visualization 24 p4314 A70-46093

TEMPERATURE INDICATORS

U INDICATING INSTRUMENTS
U TEMPERATURE MEASURING INSTRUMENTS

TEMPERATURE INSTRUMENTS

U TEMPERATURE MEASURING INSTRUMENTS

TEMPERATURE INVERSIONS

NT CENTRIFUGING STRESS

Unsteady inverse heat conduction of semibounded body solved by least squares method 06 p1178 A70-17856

Air masses nonadiabatic ascent under elevated temperature inversion in atmosphere, assuming three layer model with linear profiles 12 p2265 A70-28335

Ozone concentration in San Francisco Bay Area, discussing temperature inversion, air pollution, destruction rate and distribution patterns of oxidants 18 p3284 A70-35945

Report on ASA meeting in Pasadena February 1969 covering solar observation program, solar temperature inversion, solar spin-down, etc 19 p3518 A70-38014

Internal gravity wave shape at temperature inversion in lower atmosphere from high resolution vertically pointing FM/CW radar sounding 23 p4162 A70-44038

TEMPERATURE MEASUREMENT

Cardiac activity temperature coefficients in dogs, specifying physical and chemical cardiac functions 01 p0012 A70-10052

Human rectal temperature cooling rate during refrigeration in mortuary, applying Newton law 01 p0017 A70-10471

Polar thermosphere temperature measurements from artificial clouds indicating geophysical-associated variations, nocturnal decrease and annual variations 01 p0077 A70-11201

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics 01 p0197 A70-11495

Light scattering from thermally stable magnesium oxide particles in premixed turbulent flames used for measuring mean and fluctuating temperature values 02 p0398 A70-12039

Satellite measurement of mean temperature in atmospheric layers to determine vertical temperature distribution 02 p0291 A70-12279

Nonequilibrium two phase forced convection flow, describing pressure, temperature and void fraction measurement techniques 02 p0305 A70-12838

Radiation pyrometers development for in-flight measuring and controlling aircraft engine compressor blades temperature [SAE PAPER 690432] 03 p0480 A70-12900

Extrapolation formulas to calculate temperature gradients and heat fluxes in solid heated by variable heat flux, estimating errors 03 p0606 A70-13521

Optimum radiation shield quantity assuring gas temperature measurement accuracy, using radiation transfer equations and shield-to-shield temperature estimations 03 p0486 A70-13556

Temperature sensor location for accurate averaging in fluid flowing through heated or cooled circular duct 03 p0486 A70-13557

Embedded sheathed thermocouples temperature measurement of cooled jet engine turbine buckets subjected to high heat flux 03 p0486 A70-13560

Sky background brightness temperature measurement at 408 MHz by pyramidal horn antenna 03 p0496 A70-14344

Temperature evolution of detonation products of Na seeded propane-oxygen mixtures, observing periodic variation for helicoidal cases 03 p0608 A70-14356

Electron temperature of hydrogen-oxygen flame plasma obtained by floating probe method compared to spectroscopic method results 03 p0608 A70-14380

Pressure-volume-temperature measurements on H₂, calculating fugacity coefficients 04 p0719 A70-15057

Niobium addition effect on alpha-gamma transformation temperature during continuous cooling of low carbon Ni-Cu steel 04 p0706 A70-15134

ESRO 1 thermal behavior, discussing trajectory effects, onboard temperature measurement, data storage, data transmission, telemetered data and data comparison 04 p0762 A70-15164

Temperature and morphological changes of animals adipose tissue under various nutrition conditions, based on measurements by thermocouples implanted in fat deposits 04 p0640 A70-15514

Atmospheric temperature gradients above 30 km near sunrise using earth spectral radiance measurements by balloon 04 p0694 A70-15523

Photographic pyrometry for surface temperature measurements on ablation models, discussing technique accuracy and limitations 04 p0694 A70-15536

High temperature thermal transport and ionization relaxation in Ar from measurements by thin film surface thermometer in high pressure shock tube end wall 04 p0787 A70-15607

Radio/radar antenna temperature measurement by phase principle insensitive to receiver gain fluctuations 05 p0819 A70-15804

Temperature distribution causes in earth orbiting satellite, outlining thermal control and temperature calculation methods and prelaunch ground tests 05 p0956 A70-15813

Solar interior temperature measurement by Cl, Ga and Li isotopic detectors of solar neutrinos, discussing effectiveness and upper temperature bound 05 p0899 A70-15951

Cable involving woven multiconductor arrangement and aromatic polyimide insulations to connect thermal moon probe with transmitter for temperature measurements on lunar surface 05 p0798 A70-16034

Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows 06 p1061 A70-17205

Noontime ground surface temperature relationship to exposure and slope angle for meadows and woodland, using airborne IR pyrliometer 06 p1054 A70-17415

Laser produced plasma temperature measurements using method of X rays selective transmissions through different absorbing films 06 p1081 A70-17596

Temperature at end of admission process and exhaust gas temperature in cylinder of internal combustion engine using reversible adiabatic hypothesis 06 p1173 A70-17629

Satellite temperature determination in earth orbit, testing mathematical thermal model in simulation chamber 06 p1155 A70-17935

Far IR measurement of solar minimum temperature with Michelson interferometer carried on NASA research aircraft 06 p1143 A70-17997

Thermometric convection coefficients used in automatic meteorological data correction program 06 p1183 A70-18288

Rotational and vibrational temperatures measured in hypersonic nonequilibrium rarefied gas flow field of cooled circular cylinder by electron beam technique 06 p1123 A70-18304

Density effects on rotational temperature measurements in nitrogen by electron beam excitation, discussing emission intensity distribution 06 p1067 A70-18306

Miniature temperature and strain telemetry transmitters developed for measurements in areas inaccessible to direct wire connections 06 p1069 A70-18433

Longitudinal spectral line intensity distributions measured for plasma temperature determination 06 p1074 A70-18601

Effective, brilliance, color and gradient temperature measurements in astrophysics, considering observer bond and thermodynamic nonequilibrium of stars 07 p1386 A70-19597

High temperature techniques, measurement and data methodology noting refractory materials 07 p1312 A70-19877

Dynamic pearlite-austenite transformation and melt temperatures measured in laser-irradiated steel, discussing thermal response as function of heating rate 07 p1301 A70-19897

Rotational temperature of molecular beam by electron excited fluorescence method, discussing signal level, background light and scattering effects 07 p1345 A70-20140

PWN-8B meteorological rocket system for synoptic investigation of stratospheric circulation, describing sensor system deployment for descent measurements of wind and temperature 07 p1395 A70-20255

TEMPERATURE MEASUREMENT

Kookaburra meteorological rocket system for sounding stratospheric circulation, describing instrument payload deployment for descending wind and temperature measurements 07 p1395 A70-20257

Measurement physics of resistance wire temperature sensing system used in Skua rocket sounding system 07 p1396 A70-20262

Kinetic temperature estimate for solar corona based on time profile of type 3 bursts 08 p1565 A70-20565

Thermistors used in temperature measurements aboard satellites, discussing results of electrical and mechanical tests 08 p1493 A70-20612

Atmospheric temperature measurement by microwave radiometry, considering instrument design for measurements at various barometric levels 08 p1495 A70-21041

Atmospheric boundary layer wind and temperature analysis according to similarity scheme for mathematical modeling of atmosphere 08 p1540 A70-21974

Cryogenic thermometry operating principles, instrument design, measurement techniques, useful temperature ranges and accuracy 09 p1674 A70-22289

Temperature scales, definition and measurement, discussing scale differences, temperatures below freezing, conversion methods, etc 09 p1675 A70-22325

Electron temperature resonance probe to eliminate effects of geomagnetic field, rocket velocity and random noise 09 p1675 A70-22422

Thermal gradients and associated strains measurement in steam turbogenerator casings, considering strain gage placement and heat transfer calculations 09 p1774 A70-22590

Saturn disk temperature obtained from centimeter wavelength, suggesting possibility of nonthermal radiation 09 p1759 A70-22912

Boltzmann temperature measurement apparatus of oxide coated cathodes in scanning beam tubes 09 p1656 A70-22987

Electronic radio equipment with encapsulated structure and natural ventilation, calculating heated zone and casing mean surface temperatures 09 p1648 A70-23147

Constant temperature /phase transition/ calorimeter errors in measuring laser energy using ice as working medium 09 p1700 A70-23659

Aircraft surface temperature measured with airborne IR TV system 09 p1686 A70-23754

Sea surface temperature measurement over large areas using IR remote sensing system mounted on airborne platform 09 p1686 A70-23756

Ambient temperature measurement by constant level balloon mounted thermistors, discussing errors from differential heating of thermistor support by solar radiation 10 p1886 A70-23935

Temperature, pressure and electron density measurements behind reflected shocks in gas driven diaphragm shock tube compared with Rankine-Hugoniot predictions 10 p1967 A70-23960

Supersonic flows over flaps and backward facing steps, using steady state heat transfer measurement technique involving uniform heat flux dissipation at model surface 10 p1798 A70-24120

Electron beam fluorescence probes for rarefied gas flow, describing local density and temperature measurement methods 10 p1888 A70-24399

Gravity waves structure simultaneous determination from airborne ozone and temperature sensors and satellite observations data 11 p2076 A70-26072

Steady state surface temperature measurement errors by thermistors, thinistors and thermocouples, discussing sources 11 p2052 A70-26361

Microwave radiometric temperature measurements generating curves relating sea state and surface temperature 12 p2215 A70-26903

Remote measurement of CAT associated temperature gradients, comparing monochromatic and finite bandpass models 12 p2262 A70-26949

Atmospheric temperature determination by satellite IR spectrometer /SIRS-A/, describing data analysis and instrument design, calibration and performance 12 p2263 A70-26954

Self heating accompanying exothermic decomposition of gaseous diethyl peroxide in spherical vessel measured positionally by thermocouple 12 p2330 A70-27223

Local heat sink thermal processes on convectively cooled solid surface, noting applications to temperature measurement errors 12 p2333 A70-28112

Flame temperatures simultaneous measurement in two spectral regions, using photoelectric IR pyrometer 12 p2237 A70-28158

Brightness temperature of earth atmospheric emission in submillimeter band at 35 km, describing airborne radiometer 12 p2265 A70-28171

Coronal condensations temperature and electron density measurements at meter wavelengths and in white light 13 p2488 A70-28717

Electron radiation temperature measurements in sealed-off carbon dioxide laser, determining gas mixture effect on discharge properties 13 p2426 A70-28808

Solar far UV continuum photometry illustrating spectral temperature minimum transition, comparing to far IR temperature 13 p2496 A70-29841

Ionic temperature difference from Arecibo data indicated in Injun 3 and Alouette 1 sonograms of proton whistlers propagation time, noting Doppler shift role 13 p2372 A70-29928

Electron beam measurement of rotational and high vibrational temperature in molecular nitrogen 13 p2412 A70-29980

Radial ion temperature distribution in hydrogen arc within axial magnetic field measured spectroscopically by thermal Doppler effect 14 p2621 A70-30657

Mercury disk temperature at 3.75 cm wavelength, showing variation with phase angle and hemographic longitude 14 p2647 A70-31075

Temperature estimation of micro hydrogen-air diffusion flame from hydrogen content of unburned gas mixture 14 p2666 A70-31095

Average rotational temperature of Venus atmosphere above cloud tops from carbon dioxide band spectroscopy 14 p2650 A70-31219

Nomogram for true and apparent radiometric temperatures of remote graybodies in presence of atmosphere 14 p2577 A70-31231

Commercial aircraft brake temperatures under HF landing conditions, using energy input and heat transfer computer programs 14 p2532 A70-31341

Neutral particle temperature, pressure and velocity measurements in argon plasma jet, using refraction index 14 p2625 A70-31350

Temperature measurement of rotating shafts under cyclic loading, using thermistor as thermal radiation sensor 15 p2734 A70-31581

Surface, volume and body center temperature of convex polyhedrons under steady heat transfer 15 p2825 A70-31624

Thermocouples performance during fast varying temperature measurements in solids, considering physical parameters effects on accuracy 15 p2734 A70-31646

Atmospheric vertical temperature sounding from geosynchronous satellite, discussing instrumentation, cloud cover and wind effects, etc 15 p2809 A70-31690

Heat flux measurements in hypersonic rarefied gas flow by thin film surface thermometer 15 p2825 A70-31820

Pyrometer for measuring temperature by ratio of radiation at two different wavelengths, eliminating spectral emissivity effect 15 p2736 A70-31824

Atmospheric temperature vertical distribution measurement using sounding balloon and Skylark rocket 15 p2725 A70-31846

Noise sources and identification in low noise RF amplifiers via noise temperature or factors 15 p2708 A70-31952

Clouds and precipitations radio brightness temperature contrasts taking into account underlying surface humidity 15 p2771 A70-32070

Strength and thickness effects on energy absorption criteria for transition temperatures in Charpy V-notch impact tests 15 p2819 A70-32234

Rocket engine propellants flame temperature measurement by spectral line intensity comparison method 15 p2786 A70-32270

FM/FM radio telemetry system for transmitting strain and temperature data from rotating parts 15 p2739 A70-32330

Temperature measurement of products in solar furnace by IR pyrometers, considering interference filters, reflections parasitic effects, etc 15 p2740 A70-32424

Sampling error origin and magnitude during soil temperature measurements, noting dependence on weather character and season 15 p2731 A70-32459

Spacecraft thermal mathematical model adjustment to fit measured temperatures, using iteration method 15 p2812 A70-32513

Kinetic temperature estimate for solar corona based on time profile of type 3 bursts 15 p2805 A70-32720

Photothermometer response to thermal shock, considering rapidly varying surface temperature measurement 16 p2901 A70-33104

IR optical radiometer for jet engine turbine blade temperature measurement, comparing with junction wire thermocouple 16 p2905 A70-33168

Surface temperature measurement with airborne IR scanning imager for terrain analysis 16 p2905 A70-33170

Turbulent and reacting flows temperature and mixing rates determination, using gaseous HF tracer spectroscopy [AIAA PAPER 70-726] 16 p2856 A70-33497

C-5A turbofan engine thrust determination using pressure and temperature values in exhaust nozzles [AIAA PAPER 70-611] 16 p2969 A70-33606

Optical system measurement of density and rotational temperature in gaseous plume simulating auxiliary propulsion and oxygen hydrogen burner of S-4B 16 p2913 A70-34023

IR Michelson interferometer for Mariner Mars 1971 mission, investigating atmospheric and surface temperatures and atmospheric water vapor content 16 p2978 A70-34029

Low Reynolds number flow inside Delaval nozzle, examining gas density and rotational temperatures by electron beam techniques [AIAA PAPER 70-810] 17 p3065 A70-34454

Cryogenic temperature measurement including metallic and semiconductor resistance thermometers, thermocouples and bibliography 17 p3082 A70-34740

Mercury disk temperature from microwave spectrum analysis, proposing subsurface greenhouse effect 17 p3157 A70-34838

Turbulent boundary layer velocity, temperature and concentration instantaneous measurements, describing automatic circuit procedure 17 p3088 A70-35041

Satellite-borne instruments for thermal sounding of troposphere, noting information limitation due to atmospheric effects 17 p3132 A70-35338

Differential fast-acting thermostat for temperature variation effects on elements, systems and subassemblies in gas filled space 17 p3090 A70-35433

Time resolved measurements of ion and electron temperature in pulsed Ar ion laser discharge, observing heating 17 p3108 A70-35907

Tiros satellites window radiation applied to day and night surface temperature measurements on land and sea 17 p3081 A70-35932

Upper atmosphere neutral component temperature measurement from thermal spread of charged particles beam 18 p3247 A70-36182

High altitude clear air turbulence structure and evolution examined by high power radar and wind and temperature vertical soundings 18 p3228 A70-36483

Heat transfer rates in short flow duration facilities /shock tubes/ from surface temperature measurement of solid exposed to flow 18 p3348 A70-36715

Upper atmospheric neutral components temperature determination by rocket-borne mass spectrometers 18 p3252 A70-36983

Atmospheric temperatures from thin walled ballistic rocket surface measurements with high sensitivity photometer 18 p3261 A70-36997

Solar photosphere temperature constancy in thin CO layer from equivalent spectral line width determination 18 p3322 A70-37134

Interstellar H I gas physical conditions, discussing ionization ratio average values and temperature conditions 18 p3328 A70-37175

Ultrasonic measurement of temperature distribution in solid, liquid and gaseous media, using reflection and transmission techniques 19 p3427 A70-37963

Thermocouples and resistance thermometers comparison for low temperature measurements 19 p3432 A70-38703

Pt resistance thermometers for low temperature measurements, discussing structural and mechanical characteristics 19 p3432 A70-38704

Free air temperature by onboard satellite IR spectrometer /SIRS/, measuring earth spectral radiance in carbon dioxide 15 micrometer band 20 p3660 A70-39077

Fretting corrosion zone steel, measuring transient temperature distribution during contact friction 20 p3647 A70-39243

Two-layer slab under aeroheating, solving bondline temperature graphically 20 p3737 A70-39693

Asymmetric micropolar thermoelasticity, deriving integral expressions for strains, rotations and temperatures in finite body 20 p3726 A70-39878

Temperature measurements in gaseous reaction zone near surface of burning composite solid propellant, using modified line reversal pyrometer 20 p3694 A70-40273

Temperature difference between equator and solar poles from spectral line equivalent width variation 20 p3711 A70-40407

Hyades giant stars epsilon and gamma Tau strong line profile analysis, obtaining effective temperatures 21 p3885 A70-40931

Atomic oxygen density and temperature diurnal variation determination by F region incoherent scatter measurements, using nonlinear regression analysis 21 p3817 A70-41096

F region radar and optical temperature measurements, discussing Doppler and backscatter ion temperature 21 p3818 A70-41103

High resistance thermistor measurements of rapid blood temperature variation, discussing power dissipation effects 21 p3769 A70-41143

Low temperature Ge diode thermometer with computer circuit transforming voltage to temperature readout 21 p3828 A70-41473

IR radiation thermometry, discussing detector types, industrial applications and specialized instruments 21 p3828 A70-41698

Mean density and temperature measurements in hypersonic Ti spheres wakes in nitrogen atmosphere, using electron beam fluorescence probes 21 p3745 A70-41754

Sea surface temperature determination from satellite high resolution IR window radiation measurements by statistical histogram inference method 21 p3820 A70-42122

Temperature distribution measurement inside solid samples by Mossbauer effect, considering application to turbine blades 21 p3830 A70-42165

Carbon dioxide-nitrogen He discharge gas temperature measurements involving plasma refractivity determination by interferometer 22 p4049 A70-42366

Wind temperature measurement, taking Bernoulli effect and kinetic theory into account 22 p4009 A70-42525

Circadian rhythm in human body temperature by Cosinor method, showing inapplicability for narrow time span 22 p3977 A70-42872

Mean skin temperatures of human body by 10 point method, using cold and hot exposure data 22 p3978 A70-42874

Shock wave propagation studies by grating spectrograph with high speed camera, computing equilibrium detonation gases temperature from emitted light [SMPTE PREPRINT 98] 22 p4035 A70-43057

Carbon dioxide laser vibrational temperature measurement, determining ground state vibration level populations in various molecular gases 22 p4051 A70-43391

Ionospheric ion temperature measurements by retarding potential analyzer onOGO-6 satellite 23 p4185 A70-43840

Hypersonic projectile turbulent wake measurements, discussing velocity, mass density and temperature determination [ICAS PAPER 70-07] 23 p4132 A70-44130

Thermal conductivity coefficient calculation by multiple temperature measurements of plate-shaped sample, using iteration process 23 p4276 A70-44166

Carbon dioxide amplification coefficient measurement for lines in laser transition range, determining rotational temperature and upspin levels populations 23 p4201 A70-44204

Semiconductor thermometer for skin temperature differences using resistance bridge, transistor amplifier and thermistors 23 p4150 A70-44317

Digital recording system for body temperature telemetry from small animals, using FM transmitter implanted in peritoneal cavities 23 p4151 A70-44381

- Temperature measurement on thin steel shield subjected to hydrogen peroxide motor exhaust heating at cryogenic temperatures in space 23 p4280 A70-44389
- UBVr colors of A0-K0 main sequence stars, deriving B-V relation to effective temperature 23 p4246 A70-44757
- Rare earth metals-ruthenium Laves phases solid solutions superconducting transition temperature measurement 23 p4231 A70-44885
- Ruby laser in repetitive pulse operation, determining temperature, heat generation and transfer coefficient from spectrum shift measurement 23 p4203 A70-45071
- Effective temperature of star zeta Puppis from combined angular diameter measurement and model atmospheres, comparing hot stars 24 p4404 A70-45414
- Solar X-ray flare temperature and emission measure profiles using OGO 5 satellite detector, interpreting energy dispersion of peak times 24 p4397 A70-45768
- Translational temperature measurement of atoms and ions in plasma based on wavelength reduction by X ray spectroscopy 24 p4388 A70-46208

- High temperature thermometer using pulsed excitation ultrasonic resonance with ruthenium sensor, discussing resonator types, transmission lines and transducer 02 p0300 A70-12468
- Low temperature high sensitivity temperature compensated heat flux transducers to measure conductive, convective and radiative heat transfer 02 p0303 A70-12740
- Temperature sensor location for accurate averaging in fluid flowing through heated or cooled circular duct 03 p0486 A70-13557
- Transient and steady state radiation heat flux sensors calibration by developing and evaluating heat flux source 03 p0606 A70-13558
- Cryogenic temperature sensor calibration with automated data readout for spacecraft accuracy requirements, describing potentiometric system 03 p0486 A70-13561
- Response characteristics of asymptotic or Gordon type thin foil heat flux transducer, discussing heat transfer coefficient effect on response time and curve 04 p0694 A70-15548
- Si fluid thermal actuator as temperature sensor and prime mover for active thermal controller in spacecraft 05 p0806 A70-16124
- Unsteady calorimetric sensor for measurement of heat transfer between gas jets and solid targets 06 p1064 A70-17857
- Measurement error associated with heat conduction in temperature sensor, using mathematical model 06 p1070 A70-18443
- Temperature sensors for Apollo Telescope Mount experiments, comparing quartz, Pt wire and Si resistance sensors, thermistors and thermocouples 06 p1073 A70-18598
- Heat transfer measurement in ionized high temperature gas flows with discharge shock tube and thermal sensors 07 p1283 A70-19663

Measurement physics of resistance wire temperature sensing system used in Skua rocket sounding system

07 p1396 A70-20262

Temperature measurement in stratospheric circulation by meteorological rocket-sound wire sensor, presenting error correction technique

07 p1289 A70-20264

IR remote temperature gradient sensor as clear air turbulence detector, presenting inflight test results

12 p2229 A70-26947

Heat removal influence on dynamic errors of cylindrical temperature sensors using electric models

14 p2662 A70-30183

Balloon flight measurements clarifying Arcasonde sensor bias over radiosonde atmospheric temperature data

14 p2585 A70-30570

Miniature wireless strain and temperature radio telemetry transmitters for measurements in areas inaccessible to direct wire connections

15 p2738 A70-32301

Electric temperature sensors accuracy and stability, considering thermocouples, resistance thermometry, radiation and color pyrometry

15 p2743 A70-32798

High temperature and pressure hot gas source for testing fluidic temperature sensor used in gas turbine engine inlet simulation

17 p3058 A70-35157

Atmospheric turbulence effects on light propagation, measuring refractive index variations by high speed temperature sensors

18 p3285 A70-36961

Error sources in carbon black coating on thin foil heat flux sensors accounting for false altitude effects in vacuum calibration

18 p3262 A70-37100

Air total temperature measurement for jet powered aircraft, discussing subsonic and supersonic wind tunnel data for sensor thermal recovery characteristics

19 p3425 A70-37882

Cryogenic temperature sensor with linear characteristics from 150 to minus 452 F, describing calibration and testing

19 p3425 A70-37883

Cutaneous liquid crystal temperature sensors for thermographic patterns of angina pectoris induced by treadmill exercise

19 p3364 A70-38361

High temperature transducer for engine vibration measurement, discussing piezoelectric accelerometers mechanical design, jet engines material evaluation, crystallographic considerations, etc

19 p3430 A70-38527

Heat conduction errors in immersion thermocouples and resistance temperature sensors, using mathematical model

21 p3823 A70-40856

High resistance thermistor measurements of rapid blood temperature variation, discussing power dissipation effects

21 p3769 A70-41143

Microwave radiometry and applications as material composition and temperature sensors for aircraft navigation, landing aids, pollution surveillance, meteorology and oceanology

23 p4198 A70-44648

TEMPERATURE TRANSDUCERS

U TEMPERATURE MEASURING INSTRUMENTS

U TEMPERATURE SENSORS

TEMPERING

Intermetallic precipitates development and mechanical properties of maraging steel as function of composition, tempering time and temperature using electron microscopy

07 p1310 A70-19748

Strain tempering effects on upper and lower bainite, discussing strengthening and fracture toughness as function of temperature

10 p1905 A70-25173

Phenomenological properties of stress relief embrittlement in nickel steel, noting toughness recovery via retempering

11 p2059 A70-25665

Low temperature tempering effects on steel transformations and axial rigidity of radial thrust ball bearings in aircraft

12 p2243 A70-27568

Work hardening and tempering effects on Al-Mg alloy stress corrosion and mechanical properties

14 p2597 A70-30963

Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering

16 p2931 A70-33256

Orthorhombic martensite tempering behavior in Ti alloys, observing distinct stages for binary and ternary alloys

22 p4054 A70-42742

Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering

23 p4206 A70-44285

Tempering stress in circular plates and cylinders in casting of solid propellants

24 p4427 A70-46147

TENDONS

Normal human postural control system reflex response to tendon jerk disturbance

22 p3979 A70-43495

TENSILE CREEP

Equipment specifications and design for creep testing at variable load and temperature under uniaxial tension, emphasizing test environment control

13 p2509 A70-28537

Stainless steels creep behavior under long term tensile loads at high temperature

15 p2764 A70-32898

Contact shaped fiberglass-reinforced plastic tensile creep tests, showing strain property linearity dependence on direction

21 p3841 A70-40642

Mg high temperature creep mechanism in high and low stress regions, using isothermal tensile creep tests

23 p4204 A70-43885

TENSILE DEFORMATION

Incompressible elastomer viscoelastic response to exponential extension ratio history in simple tension based on constitutive equations

01 p2021 A70-10893

Ti-Al-Sn alloy tensile deformation mechanisms at cryogenic temperature under uniaxial and biaxial stress noting twinning, prismatic slip and dislocation characteristics

03 p0507 A70-13141

Strain energy release rate in terms of propagating crack surface displacements applied to infinite solid loaded in tension

05 p0938 A70-16480

Stress field equations of material in maximum deformation region during inversion of tubular products

06 p1077 A70-17871

Stress-strain analysis for rod-shaped structural elements under combined tensile and bending loads

08 p1588 A70-21191

Yield stress and work hardening properties of tension-deformed vanadium single crystals as function of purity

08 p1522 A70-21750

Rotatory inertia and shear deformation effects on structural vibrations of Timoshenko beams and frameworks using matrix formulation

09 p1770 A70-22257

Fracture toughness and deformation kinetics dependence on compositional, microstructural and textural variations of alpha and alpha-beta Ti alloys at low temperatures

09 p1704 A70-22801

Tensiodie effect in long plate-shaped semiconductor, noting bend direction effects on I-V characteristics

12 p2195 A70-27312

Shear deformation of sandwich plate cross sections with hinged opposite edges, constructing transfer matrix for state variables

13 p2508 A70-28483

Circular cylindrical membrane axially symmetric deformations, determining axial and circumferential stresses

14 p2657 A70-30844

Stress distribution in spirally corrugated shell under torsional deformation, calculating twisting moment for stiffness

14 p2661 A70-31327

Bifurcation stability in geometrically nonlinear shells of revolution under transverse loads, considering tension and compression deformation

15 p2817 A70-32168

Deformation behavior of continuous W and B fibers reinforced Al alloy matrix composites, monitoring stress-strain characteristics by X ray diffraction

18 p3272 A70-36036

Fine grained Be structure and mechanical properties under tensile deformation at temperatures from 20 to 1000 C

18 p3276 A70-36311

Plane waves superposed on solid during steady state isothermal creep deformation subjected to unidirectional constant initial tensile stress

19 p3537 A70-37791

Fatigue crack closure in flat sheet specimens under zero-to-peak tension cyclic loading, analyzing stress distribution from fractographic striation patterns

19 p3549 A70-38625

Recrystallized and nitrided Mo alloy microstructure under plastic deformation by tension at high temperatures

22 p4038 A70-43122

TENSILE PROPERTIES

Fatigue crack propagation in metals exhibiting initial crystallographic shear mode followed by noncrystallographic tensile mode

01 p0198 A70-10101

Fiber composite cylinder tensile performance improvement through mechanical residual stress relief by axial straining

01 p0120 A70-10737

Fabrication technique effect on tensile and plastic properties of semifinished sintered Al powder products at room temperature and 600 C

06 p1076 A70-17848

Tensile and shear properties of blind fixed, blind floating and through types of bonded sandwich inserts, noting geometry and temperature effects

07 p1401 A70-18934

Tensile properties variations of Co whiskers grown by reducing cobaltous bromide in hydrogen-argon mixture

07 p1306 A70-19071

Tensile properties of yarns at high strain rates and subambient temperatures determined for nylon, Dacron, Nomex, Beta Fiberglass and Karma metal

08 p1527 A70-21330

Temperature, transformation and strain rate effects on tensile ductility properties of stable and metastable compositions of austenitic stainless steels

08 p1524 A70-21956

Cold rolling characteristics of unidirectionally reinforced Al-B fiber composites, measuring hardness and tensile properties

08 p1524 A70-21957

Ti alloys tensile properties correlated with microstructure for multiple heat treatment cycle variations for high strength and adequate ductility

12 p2252 A70-27107

Tensile properties of fibrous materials at high rates of strain and subambient temperatures, considering nylon, Dacron, Nomex, Beta Fiberglass and Karma metal yarns

14 p2598 A70-30928

Omega phase embrittlement in aged Ti-V alloys, discussing precipitation effect on tensile properties

15 p2756 A70-31570

Ti-Al-Cr-Fe tensile, fatigue and creep properties at various temperatures, considering industrial applications

17 p3121 A70-34428

Weldability, tensile and fatigue properties of Ti sheet alloys, discussing TIG welds

17 p3121 A70-34431

Low cycle fatigue and short term tensile behavior correlation for irradiated and unirradiated stainless steels

17 p3123 A70-34627

Nuclear irradiation effect on embrittlement of Ti and Ti alloys at cryogenic temperature, determining radiation damage threshold as function of tensile properties changes

18 p3278 A70-36567

Temperature effect on radiation characteristics and cryogenic tensile properties of irradiated Be, Ti and Al alloys

20 p3647 A70-39111

Al alloys and stainless steels tensile properties and application in lightweight cryogenic propellant tank structures, discussing Ti alloys and reinforced composite materials tests

20 p3651 A70-40123

Polyurethane adhesives differential thermal analysis, rebound resilience and tensile properties at cryogenic temperatures

21 p3844 A70-42141

Resilience and tensile properties of polyurethane adhesive at cryogenic temperatures measured by differential thermal analysis

23 p4209 A70-44275

TENSILE STRENGTH

Zinc and resin coated alkaline glass fibers tensile strength, describing test procedure

01 p0126 A70-10220

Flip chip and beam lead methods for microcircuit assembling, discussing heat removal using heat spreader and temperature cycling effects on tensile strength

01 p0050 A70-10330

Fiber-polymer matrix interfacial tensile and shear strengths evaluation methods, including data correlation from various tests

01 p0087 A70-10478

Tensile strength of flat specimens of Ni reinforced by W wire gauze

02 p0315 A70-11661

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads

02 p0315 A70-11662

Al alloys strips weakened by holes, analyzing limiting tensile load-carrying capacity

02 p0384 A70-11741

Bolted and bonded joints design in composite materials loaded in tension, presenting methods for strength prediction, testing and analysis

02 p0306 A70-11952

Polymeric materials properties, discussing tensile stress disadvantage and compensation by reinforcement and polymer chain directional alignment

02 p0321 A70-12305

Axial and traction loaded boron epoxy laminates tensile and compressive elastic properties and strengths compared from test data including strain gauge measurements

03 p0586 A70-13115

Failure mechanisms in notched or damaged fiber reinforced composite materials determined from analysis of axial tensile strength and broken fibers

03 p0515 A70-13124

Prolonged temperature exposures with applied tensile stress found to increase tensile strength and yield point of aluminum alloy subjected to artificial agings

03 p0511 A70-13354

Cr alloys applications in high temperature environments, describing alloying elements effects on strength and ductility

03 p0511 A70-13566

Al and Sn composites reinforced by E glass and silicon dioxide glass fibers compared for tensile strength, noting difference due to resistivity

03 p0514 A70-14314

Brittle composites /including fiber reinforced material/ deformability and plastic deformation effect on tensile strength, discussing pressure induction of sound flow
[ASME PAPER 69-WA/PROD-28]

04 p0705 A70-14834

Prealloyed powders of Ni base alloys, made by inert gas atomization for improved strength and ductility

04 p0706 A70-14951

Silicon effect on stress corrosion resistance of low alloy high strength steels in NaCl solution for different tensile strength ranges

04 p0707 A70-15272

Continuous metal fiber composites tensile strength and ductility in terms of plastic instability

05 p0946 A70-16924

Creep, ductility and short term tensile and compression strength test facility for graphite in 300-3500 K temperature range

05 p0875 A70-17068

Ti alloy tensile strength under cyclic loads at room and high temperatures, noting plastic deformation and damage accumulation effects

06 p1085 A70-17406

Reverse-bend and tension-tension fatigue properties of high strength Cr-Mn-N stainless steel sheet in notched and unnotched conditions

07 p1305 A70-18993

Ni maraging steel sheets tensile strength and elongation anisotropy, studying effects of directional cold work, aging and annealing

07 p1306 A70-19072

Creep rupture and residual tensile strength tests to evaluate long time properties and structural stability of Inconel 718 alloy, performing phase analysis

07 p1310 A70-19731

Tensile and compressive stress cycles effect on short term strength of glass fiber plastic laminates

07 p1411 A70-19769

Tensile strength test and clamping of epoxy impregnated fiber strands

07 p1250 A70-19959

Metal adhesive joints strength under tensile and torsional stresses, considering effects of dimensions, metal type and surface finishing

08 p1504 A70-20886

Metal adhesive joints behavior under prolonged static stresses, showing time dependence of tensile strength

08 p1504 A70-20887

Strength, corrosion resistance and fabricating qualities future improvements in metals and alloys, discussing chemical composition approach, dispersion hardening, superplasticity, etc

08 p1518 A70-21267

Dynamic tensile properties of monolithic and pyrolytic graphite compared with static tensile strength

08 p1527 A70-21334

Cr-Mo steel strength and structural stability during tubular stress-rupture testing with high pressure hydrogen, discussing welding effect on strengths

08 p1519 A70-21455

Matrix stiffened nickel-chromium welding products featuring high tensile strength at room and elevated temperatures and high impact strength at cryogenic temperatures

08 p1508 A70-21488

Waspaloy gamma prime solvus temperature relationships as function of solution treatment and precipitation strengthening additives, discussing microstructure and tensile properties

08 p1520 A70-21555

Fatigue testing and thermal mechanical treatment effects on uni- and biaxial Al alloy-B composites tensile strength at room and elevated temperatures

08 p1523 A70-21893

Tensile, fatigue, creep and stress-rupture behavior of unidirectional, unidirectional off-axis and cross-ply composites of B filaments in Al alloy matrix

08 p1531 A70-21896

Glass fiber reinforced epoxy laminate specimens tests in tension and flexure at various strain rates to determine geometry effect on strength

08 p1532 A70-21898

Fiber composites-Ti alloy adhesive, rivet and combined joints for aircraft applications, noting fiber orientation role in joint tensile strength

08 p1509 A70-21905

Filament tensile strengths and pressure strain characteristics of high modulus boron filament wound/resin composite pressure vessels for cryogenic applications

08 p1509 A70-21909

Composite material tensile strength, discussing statistical scatter in fiber strength and local fiber overstress caused by fiber discontinuities

08 p1532 A70-21914

Strengthening mechanisms in dispersion hardened Nichrome /TDNiC/ analyzed in 70-2000 F range, discussing solid solution, dislocation substructure and grain refinement

08 p1525 A70-21961

Al-B composites mechanical properties, using heat treatments and transverse steel wires to increase matrix shear and transverse tensile strengths

09 p1701 A70-22551

Tungsten fiber reinforced aluminum composites tensile strength aspect ratio using foil metallurgy technique

09 p1703 A70-22627

Microstructure and ductility of air- and vacuum-melted heats of corrosion resistant steels, investigating tensile and yield strengths for all grain directions

10 p1905 A70-25170

Binary Ni-Cr alloys tensile mechanical properties at 25 C after water quenching and heat treatments

10 p1905 A70-25172

Tensile strength of nitrided boron-aluminum alloy composite modules, noting effect of Ti cladding on panel surfaces

11 p2066 A70-26085

Stress-strain state effects on Cu and Ni tubular samples plasticity and strength using polarization-optical technique

12 p2323 A70-27341

Short time tensile properties of thermomechanically treated astrolloy showing improvement due to refined gamma precipitate and grain boundary carbides

12 p2256 A70-27610

Iron sample shape determination for studying relationship between tensile strength and rate from stress wave propagation during high speed tensile tests

15 p2814 A70-31547

Eutectic NiAl-Cr structure and high temperature tensile strength as function of solidification rate

15 p2755 A70-31560

Cycloaliphatic epoxy resins tensile and impact strength improvement by modification with elastomeric materials, considering heat distortion temperature

16 p2936 A70-33359

Shear and tensile joint strength measurements at fiber-polymer matrix interface, using pull-out test and debonding methods

16 p2937 A70-33372

Ti alloys beta forging effect on physical properties and tensile ductility

17 p3097 A70-34358

Cr-Ni stainless steels room temperature yield and tensile strengths improvement by nitrogen addition

17 p3122 A70-34553

Longitudinal and transverse tensile strengths of Al sheet reinforced with continuous oriented steel wire of various cross sectional shapes

19 p3541 A70-38047

Tensile strength of flat specimens of Ni reinforced by W wire gauze

19 p3452 A70-38435

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads

19 p3453 A70-38436

Ti-Nb-Zr alloys strength and plasticity at various temperatures, noting compositional effects on tensile and yield strength

19 p3453 A70-38712

High modulus graphite fiber tensile strength and structure, using X ray diffraction

20 p3653 A70-39205

Composite material engineering problems, discussing tensile, compressive and shear strengths, design approaches, unidirectional properties and substance characterizations

20 p3651 A70-40027

Uniaxial fiber composites tensile strength models, including failure analysis

20 p3731 A70-40046

Butt joined epoxy Al plates tensile strength, observing fracture strength dependence on stress concentration at bond edges below characteristic crack length

21 p3939 A70-42032

Stress-strain diagrams for oriented fiberglass-reinforced plastic under tension taking into account temperature and anisotropy effects

23 p4209 A70-43938

Aluminum, duraluminum and stainless steel tensile strength tests at cryogenic temperatures

23 p4206 A70-44353

Unidirectionally solidified carbide reinforced Co-Cr eutectic alloy, examining tensile strength and creep behavior

24 p4358 A70-45236

Composite materials tensile strength dependence on reinforced fibers with dispersed tensile strength, using model to predict crack propagation from fiber rupture

24 p4427 A70-46270

Refractory metal alloys tensile and creep rupture properties for reactor fuel jackets

24 p4364 A70-46347

TENSILE STRESS

Stressed state of circular notched plane in tension under creep conditions

01 p0210 A70-11410

Temperature effects on tensile deformation mechanism of Mo single crystals, investigating stress-strain characteristics and slip geometry

02 p0316 A70-11699

Bolted and bonded joints design in composite materials loaded in tension, presenting methods for strength prediction, testing and analysis

02 p0306 A70-11952

Load and strain trajectory vectors components determined for tension followed by transverse compression in five dimensional space

02 p0390 A70-12803

Complex stress functions and stress intensity factors at tips of star-shaped contour hole in infinite tensile sheet, including crack forking with arbitrary angle

03 p0585 A70-12974

Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads

03 p0587 A70-13241

Prolonged temperature exposures with applied tensile stress found to increase tensile strength and yield point of aluminum alloy subjected to artificial agings

03 p0511 A70-13354

Equivalent rigidity of doubly periodic symmetrically perforated infinite plate strengthened by elastic ring under isotropic tension

03 p0595 A70-13754

Polyethylene and polypropylene mechanical behavior under tensile and compressive loads and subject to hydrostatic pressure, obtaining tensile nominal stress-strain curves for various pressures

03 p0517 A70-14201

Tension field theory describing buckling of membranes or thin plates with boundaries subjected to excessive planar displacements

03 p0599 A70-14246

Metals and alloys creep under tension and compression at elevated temperatures, considering plastic deformation equation applicability

04 p0707 A70-15265

Plane circular crack in homogeneous and isotropic elastic body under uniform uniaxial tension using linearized couple-stress theory

05 p0931 A70-16089

Crack stability under tension and thermal stresses caused by uniform disturbed heat flow, using Barenblatt fracture criterion

05 p0939 A70-16483

Three dimensional brittle body limiting axisymmetric stability under tensile stresses and weakened by ring shaped cracks, determining critical tensile loads

05 p0945 A70-16855

Stress-strain state of plates weakened by reinforced hole and under tensile and bending loads, including boundary conditions

05 p0945 A70-16856

Stress-strain state of drawn and bent circular plate made of rigid viscoplastic work hardened material

05 p0946 A70-16958

Fatigue defects accumulation in aluminum alloy under impact tensile loads programmed to simulate loads encountered by aircraft in practice

05 p0947 A70-17009

Nickel-based alloys small cycle thermal and mechanical fatigue limit during tensile stresses and operational temperatures, analyzing fatigue curves

05 p0867 A70-17046

Gas turbine blades thermal fatigue strength under simultaneous temperature cycles and static tensile loads, analyzing temperature and stress fields

05 p0953 A70-17053

Rotor blades structural fatigue strength tested on gas dynamic test stand under cyclic thermal loading and static tensile load

05 p0954 A70-17058

Turbine blades root joints endurance limit concerning tensile stress determination at stress raiser contour for elastoplastic deformation and creep

05 p0954 A70-17062

Thermal fatigue cracks in gas turbine blade models under simultaneous thermal cycling and static tensile loads simulating pulsed regimes

06 p1166 A70-17652

Steels fatigue strength under biaxial tension, considering complex stress-strain state

07 p1304 A70-18823

Fatigue strength of sintered aluminum powder at room and elevated temperatures, discussing sensitivity to tensile loads misalignment

07 p1304 A70-18840

Plastic deformation of thin flexible axisymmetric shells under load, discussing tensile stresses

07 p1407 A70-19383

Stressed state of plate with reinforced circular hole under tension and bending using Airy stress functions

07 p1407 A70-19540

Critical stress-strain diagrams for brittle plate possessing notch-type stress raisers under biaxial tension
07 p1408 A70-19547

Corrosion cracking mechanism for notched metal surface in aqueous environment under tensile stress, discussing electron distribution and H ion concentration
07 p1310 A70-19737

Limiting equilibrium of shells of revolution with different yield points under tension and compression
08 p1583 A70-20527

Dugdale crack model extended to include effects of linearly varying tensile loading, noting plastic zone length sensitivity
08 p1593 A70-21512

Elastoplastic stressed state of variable thickness disk under combined effects of nonuniform heating, repeated centrifugal and surface tensile loads
09 p1778 A70-23091

Axial tensile stress effects on stability of cylindrical shell under nonuniform external pressure
09 p1786 A70-23721

Stress distribution in strip with asymmetrically positioned infinite row of equal and equally spaced circular holes subjected to longitudinal tension or transverse bending
10 p1955 A70-24082

Static tensile stresses effect on magnetized ferromagnetic materials damping properties explained by anisotropic microplastic strains dissipating energy during bending vibration
10 p1904 A70-24246

Power-law stress-strain relation in plastic complex stressed state, showing identical strain hardening curves for shear and tension
10 p1957 A70-24280

Nylon 6 polyamide tensile stress cracking by metal thiocyanates in aqueous and nonaqueous solutions, comparing results with cracking by metal halides
10 p1907 A70-24300

Equivalent rigidity of doubly periodic symmetrically perforated infinite plate strengthened by elastic ring under isotropic tension
10 p1960 A70-25009

Energy methods applied to fatigue crack propagation rate under tensile mean stress
10 p1963 A70-25090

Materials bending fatigue strength calculations for biaxial tension compared with experiments showing agreement
10 p1964 A70-25289

Limiting load for annular plates made of material having different yield points in tension and compression
11 p2129 A70-25560

Plane tension in elastic infinite strip covered by elastic plate, considering applicability to strain measurement errors calculation
11 p2129 A70-25565

Rectangular conical shells reinforced along ribs by belts under tension/compression calculated by initial functions method
11 p2130 A70-25568

Air and salt water tensile and shear mode cracking of titanium alloy sheets examined with electron fractographs
11 p2067 A70-26099

Stress relaxation in combined torsion-tension, developing expressions for torque and axial force
11 p2140 A70-26482

Rectangular beam creep rupture time under bending moment and axial tensile force, using power series to solve integral equations
11 p2142 A70-26635

Tensile strain rate and oxygen concentration effects on peaks of niobium hardening zones involving interstitial atoms
12 p2252 A70-27001

Viscoelastic polymeric materials tensile failure under multiaxial loading
12 p2321 A70-27205

Tension rays and load transfer from compact member via wrinkled membrane determined by variational technique using maximum strain energy
12 p2322 A70-27225

Stress measurements for eye beams forming of high fatigue strength based on brittle lacquer studies of isotropic material models
13 p2507 A70-28482

Stress concentration factors determined for u-shaped and semielliptical edge notches in semiinfinite sheet under uniaxial tension parallel to edge
13 p2509 A70-28535

Stresses in plate containing circular hole with notch under uniaxial tension, determining parametric coefficients by Fourier transforms
14 p2661 A70-31326

Self excited systems limiting states with traveling wave, analyzing oscillator moving along string under tension
16 p2990 A70-33781

Hysteresis loop behavior under tension-compression cycle fatigue related to Meyer strain hardness values of cyclically strained metals
16 p2934 A70-34334

Bond stress distribution in elastic solid with axisymmetrical inclusions under uniform tension, using three function and point matching techniques
17 p3184 A70-34911

Orowan stress calculation, discussing line tension, screw or edge character, spatial distribution and yield strength
17 p3191 A70-35457

Elastic layer with circular cylindrical cavity under axial tension /Kirsch problem/, determining stress concentration from boundary value problem
18 p3335 A70-36130

Critical loads for notched square Al alloy rods under tension
18 p3343 A70-36718

Shallow circular cylindrical shell with rigid collar on lateral surface, calculating stress under axial tension and internal pressure loading
19 p3534 A70-37245

Fatigue strength in pulsed tension of butt-welded tubular joints, evaluating test results statistically
19 p3433 A70-37357

Mathematical representation of heart muscle mechanical properties, examining tensile stress in parallel and series elements
19 p3368 A70-37809

Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads
19 p3548 A70-38459

Blade root design for axial flow compressors and turbines, avoiding tensile stress concentration
19 p3490 A70-38616

Disk equations to determine tensions around arbitrary hole or stiffening contours
20 p3720 A70-39623

Elastoplastic equilibrium of thin infinite plate with periodic slit system along straight line under tension, investigating localized plastic deformation domains
20 p3721 A70-39769

Stress-strain zero moment state of thin walled helical shell under uniformly distributed tensile loads
20 p3721 A70-39778

Weighing systems electronic load cells calibration for tension and compression loading, attributing non-repeatability to bending moments [SAWE PAPER 816]
20 p3634 A70-40356

Elastic and viscoelastic plates, calculating stress concentration and separation of embedded smooth circular inclusion under uniaxial tension
21 p3932 A70-40548

Perforated infinite plate finite elastic deformation under biaxial tension, using successive approximation in connection with complex variable method of plane elasticity
21 p3932 A70-40551

Carbon steel thin walled cylinders creep fracture subjected to combined tension and internal pressure by large strain theory
21 p3840 A70-41438

Slip, fracture and rupture in sintered and cast ductile and brittle polycrystalline Mo under tension, using optical and electron microscopy
23 p4204 A70-43884

German monograph on notched structural steels fatigue properties and crack propagation under tensile-compressive alternating loads
24 p4356 A70-45086

German monograph on deformations and tensile stresses calculation in axisymmetric bodies via finite element method involving matrix displacement method
24 p4420 A70-45225

TENSILE TESTERS

U TENSILE TESTS

TENSILE TESTS

Automatic loading control system for tensile test machine permitting creep and creep-rupture testing
01 p0054 A70-10075

Tensile tests of heat treated silicon carbide coated B filament reinforced metals, discussing fiber strength and interfacial stability
01 p0117 A70-10483

Transmission electron microscope study of deformation mode during rapid tensile testing of Ni-base superalloy, discussing twinning and stacking fault modes
01 p0118 A70-10705

Transformation induced plasticity steels tensile properties measurement indicating loss of ductility due to H embrittlement
01 p0118 A70-10729

Offset yield strengths of TD-Ni and Al-aluminum oxide SAP type two phase alloys in tension and compression
01 p0119 A70-10736

Ferritic stainless steel embrittlement caused by He injected into tensile samples by alpha particle cyclotron irradiation tested at elevated temperatures
01 p0122 A70-11235

Tensile tests of polycrystalline Nb-Hf alloys at low temperatures, noting cooling rate effect on ductility in terms of microstructure
01 p0122 A70-11240

Polycrystalline material tensile failure at high temperature, discussing intergranular cracking, shearing, etc
03 p0508 A70-13155

Tensile tests facility design for wide temperature ranges with loading system to maintain constant strain rate up to failure
05 p0830 A70-17072

Tensile and stress rupture tests facility for microsamples stability at temperatures up to 3300 K, investigating deformation and failure
05 p0830 A70-17073

Microstructure effects on smooth and notched fatigue and room temperature tensile properties of Ti-Al-V alloy using heat treatment combinations
06 p1087 A70-17458

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens
07 p1309 A70-19710

C-axis single crystalline sapphire filament tensile and fracture tests
08 p1514 A70-20647

Analytic solution for computerized vibration analysis of high speed tension test
08 p1590 A70-21332

Test specimen shapes for determining tensile, compressive and edge-wise shear properties of reinforced plastic laminates
08 p1529 A70-21878

Tension, compression and in-plane shear tests to obtain boron epoxy composite materials mechanical properties to design FB-111 wing box extension
08 p1529 A70-21879

Test methods for evaluating tensile, compressive, interlaminar shear and bearing strength properties of carbon yarns and flat and tubular composites
08 p1529 A70-21881

Specimen design of laminated angle-ply composite materials for straight-sided axial coupon and long beam flexure tension testing
08 p1530 A70-21885

Test standards for boron epoxy flat laminates, proposing specimen geometries and testing methods
08 p1530 A70-21887

Metals yield locus in strain hardening range in sigma-tau plane determined using slip theory, considering Bauschinger effects
09 p1771 A70-22395

Solid propellants mechanical properties under uniaxial tension
09 p1741 A70-22423

Polybutadiene-ammonium perchlorate solid propellant microscopic failure analysis under uniaxial tension
09 p1741 A70-22424

Polybutadiene-ammonium perchlorate solid propellant BPT-1 mechanical properties viscoelastic analysis under constant strain rate tension
09 p1742 A70-22425

Metals and plastics tensile strain rate sensitivity tested by drop weight tests, obtaining dynamic and static stress-strain curves
09 p1704 A70-22725

Elongation measurement in tensile testing of thin films and sheeting, coupling with gripping test program
10 p1887 A70-24042

Thickness effects on elongation of sheet type Al alloys, tabulating tensile test results
10 p1887 A70-24043

Stability conditions in metal specimens tension tests, considering fcc and bcc metals strain hardening, rate and gradients and temperature dependence
10 p1966 A70-25326

Glass epoxy cross ply laminates with brittle or ductile epoxy matrices tensile tested, comparing mechanical performance
11 p2068 A70-25686

Hot shortness of molybdenum alloys under tensile testing due to molybdenum carbide precipitation on grain boundaries
11 p2066 A70-25914

Hot torsion test for Al alloys workability assessment, noting test temperature and specimen geometry effects on fracture strain values
13 p2436 A70-29816

Polycrystalline Al microstrain distribution nonuniformity under creep and static tension
14 p2595 A70-30173

Optimum diffusion welding temperature for Ti-6Al-4V alloy determined from tensile and creep tests
14 p2591 A70-30934

Iron sample shape determination for studying relationship between tensile strength and rate from stress wave propagation during high speed tensile tests
15 p2814 A70-31547

Torsional vibrations amplitude effect on polycrystalline Al stress-strain curve during uniaxial tensile test
15 p2758 A70-32125

Alternating stress required for edge crack propagation in metal plates under tensile loading cycles
15 p2762 A70-32464

Materials testing machine for tension, compression and flexure at constant strain rate and for fatigue
16 p2900 A70-33067

Constant grain size cast Mo ductile-brittle transition temperature dependence on annealing temperature using tensile test
16 p2933 A70-34274

Structural stability in tension and strength tests of thin walled tubes at various stress and strain intensities, noting dependence on stress-strain state type
17 p3192 A70-35713

Tensile test device for continuous recording of sample load and strain
20 p3728 A70-40000

Duralumin constant speed tensile strength tests at 200 C, discussing creep thresholds statistical distribution in elongations interval
21 p3840 A70-41432

Longitudinal tension impact tests on nylon tape and Apollo pilot parachute riser construction, determining wave propagation effects
[AIAA PAPER 70-1182] 21 p3843 A70-41831

Solid rocket fuels mechanical properties, using high speed pneumatic test machine and impact tensile tester
22 p4088 A70-42342

Strain rate change effect on stress-strain diagram shape of polycrystalline alpha-Ti during tensile tests over temperature range
22 p4054 A70-42737

Ti alloy tension creep tests at room temperature, determining strength for correlation with stress relaxation
22 p4055 A70-43097

Metallurgical interaction phenomena in welding zone of heat treated Inconel 600, using hot ductility testing and metallographic methods
22 p4046 A70-43150

Mo single crystals tensile properties at different orientations, noting asymmetric slip in plastic behavior
22 p4056 A70-43155

Tension-torsion machine developed from aircraft carrier catapult principle, producing radial loading paths
22 p4117 A70-43453

Composites made by unidirectional solidification of eutectics with transition metal carbide fibers embedded in metal matrix, discussing tensile tests
[ONERA-TP-853] 22 p4057 A70-43457

Metal and alloy sheets, investigating deformation and failure under biaxial stretching tensile tests
24 p4358 A70-45240

Steel and duralumin strips with circular holes tested under axial tension, determining relationship between strength weakening and ultimate stress
24 p4420 A70-45272

Strain rate sensitive materials tensile tests using machine with external variable speed motor
24 p4422 A70-45517

TENSION
Spinal cord overstretching and circumscribed pathological tension mechanism, considering histological and radiological findings
07 p1204 A70-19242

TENSION TESTERS
U TENSILE TESTS
TENSOMETERS
Vinoflex glue for constant strain gauges in low temperature tensiometry, showing satisfactory recording at single and multiple loadings
08 p1495 A70-20984

Foil type resistance strain gages /tensometers/, studying measurement current effects on readings
11 p2053 A70-26428

Semiconductor strain gages /tensometers/ materials, fabrication and properties
11 p2054 A70-26429

Hermetically sealed miniature strain gages /tensometers/ design and testing, noting insensitivity to effects of fuels and oils
11 p2054 A70-26430

Resistance strain gages /tensometers/ for force and moment measurement in aerodynamic research, giving design and structural recommendations
11 p2054 A70-26431

Lead resistance effects on resistance strain gage measurements as function of utilized measurement system and procedure
11 p2054 A70-26432

Multichannel tensometric AC bridge network for static and dynamic measurements of mechanical quantities in structural elements
11 p2054 A70-26436

Thermocompensated wire loop microtensensors for machine part stress concentration measurements, including parameter selection nomograms
13 p2409 A70-29519

Low temperature tensiometry application to stress-strain state of turbine disks
15 p2733 A70-31537

SENSOR ANALYSIS

Turbulent fluid flow analysis described by Navier-Stokes equations, introducing asymmetric tensors for anisotropic cases
01 p0068 A70-11605

Riemann tensor symbolic computation by compact method using differential forms, discussing advantages due to antisymmetry
05 p0818 A70-16681

Lorentz principle application to general relativity freeing formalism from inconsistencies to derive expressions for Christoffel symbols and Riemann-Christoffel tensor
06 p1105 A70-17537

Plasma dielectric tensor derived quantum mechanically, emphasizing similarity in classical and quantum mechanical methods, discussing linear wave propagation, kinetic equations, etc
06 p1121 A70-17904

Strain rate tensor coincidence in Lagrangian and Eulerian descriptions of turbulence demonstrated for homogeneous flow of incompressible fluid
07 p1252 A70-18672

Group theory investigation of three photon light scattering tensor for all vibration modes of specific crystal classes
07 p1299 A70-19861

Lagrangian tensor formalism for hydrodynamic stretching of material line and surface elements under statistically isotropic incompressible turbulence
07 p1260 A70-19979

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action
08 p1554 A70-21805

Piezo-rotatory coefficients R/11/ and R/12/ of isotropic non-enantiomorphic optically active crystals from fourth rank axial tensor, discussing stress effects
11 p2098 A70-26298

Book on tensor calculus in materials science covering the thermodynamic equilibrium, gaseous and solid phase heat engines, solids crystalline structure, etc
12 p2282 A70-26866

Nonviscous relativistic fluid energy momentum tensor modification to rule out sound wave propagation velocities above speed of light
13 p2454 A70-29900

Scalar-tensor theory in canonical form, discussing neutral particle and electron self energy problem
15 p2773 A70-31439

Strain rate tensor coincidence in Lagrangian and Eulerian descriptions of turbulence demonstrated for homogeneous flow of incompressible fluid
15 p2718 A70-31464

Neumann and Maxwell photoelasticity laws reformulation with aid of characteristic tensor of mechanical state
17 p3187 A70-35044

Vector and tensor calculus features, examining contravariance and covariance with bra and ket algebra and absolute differential
18 p3281 A70-36354

German book on continuum theory of flowing media covering tensor analysis, equations for kinematics, mechanics, thermodynamics and electrodynamics
18 p3243 A70-37226

Acceleration wave propagation in materially uniform inhomogeneous isotropic elastic bodies, using tensor analysis
19 p3536 A70-37563

Polynomial tensor functions generated by vector functions in space of invariants, noting applicability to isotropic media
20 p3728 A70-39895

Interactions between components of turbulent flow velocity correlation tensor due to pressure fluctuations
21 p3810 A70-41956

Nonlinear elasticity theory, deriving geometrical relations applicable to small deformation tensor components
23 p4267 A70-44167

Static spherically symmetric charged mass distribution exact solutions derived for electrons in scalar tensor theory of gravity by Hamilton-Jacobi method
23 p4222 A70-44403

Transport equation relation between irreducible tensorial sets, examining geometrical symmetry influence and thermomagnetic and galvanomagnetic effects
24 p4428 A70-45520

SENSOR FIELDS
U TENSORS
TENSORS
NT STRESS TENSORS
Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristics of pulverized material representing gravitational fields
01 p0193 A70-11629

Permittivity tensor calculations of weakly inhomogeneous plasma with monoenergetic component, using distribution function of particles produced by thermonuclear reactions
03 p0529 A70-13055

Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer
03 p0526 A70-14305

Dipole shielding tensor of atom in arbitrary time dependent field, giving conditions for general variational calculations yielding results
04 p0721 A70-14389

HF conductivity tensor of isotropic plasma, taking into account particle correlations describing weakly Langmuir turbulent plasma
05 p0889 A70-16532

Momentum-energy tensor and angular momentum for hydrodynamic and electrodynamic fields determined in transformations of m-parametric Lie group
10 p1922 A70-24098

Tensor and torsion functors on Abelian semigroups
13 p2440 A70-29076

Four dimensional Einstein space metric of signature 2 with N type Weyl tensor and nonintegrable rays
13 p2453 A70-29636

Chromium lattice vibrational properties based on fourth-nearest-neighbor tensor force model, obtaining agreement with inelastic neutron diffraction data and elastic constants
14 p2626 A70-30480

Elementary particles gravitational interactions, identifying tensor field with local gravitation
15 p2776 A70-31732

Book on continuum mechanics covering tensor kinematics, energy balance, virtual work, constitutive equations, etc
16 p2987 A70-32914

Symmetric functions of second rank tensors with syngonies in elastic anisotropic media
18 p3340 A70-36576

Energy and impulse tensor of nonviscous relativistic fluid, excluding sound velocity greater than light velocity
19 p3404 A70-37593

Permittivity tensor of weakly turbulent magnetoactive cold electron plasma, calculating nonlinear currents
20 p3677 A70-39296

Continuous media theory, deriving first order constitutive differential equations for isotropic tensor functions
24 p4378 A70-45270

Isotropic transformation of tensor space, proving theorem for reducing hemiptic function to N invariants of rotations and single vector
24 p4378 A70-45271

TERBIUM
Absorption spectra of single crystals TbAlG and DyAlG garnets, investigating Verdet constant dependence on ion concentration
07 p1355 A70-18705

TERMINAL BALLISTICS
Electroexplosive devices output energy measurement through metal deformation by lead block and projectile penetration methods
03 p0548 A70-14121

Penetration depth calculation of high speed non-deformable sphere into massive body, approximating force on sphere by ideal incompressible fluid cavitating flow
04 p0776 A70-15269

Single impact data considered ineffective in estimating target damage induced by micron-sized particle cloud impingement
04 p0737 A70-15425

Thin sheet and laminate bullet hole deformation zone microstructure observation by electron microscopy, considering terminal ballistics approach
07 p1413 A70-20049

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage
08 p1572 A70-20944

Meteorites explosive fragmentation under aerodynamic loads simulated by steel balls shot into increasing-density target, discussing parameters
08 p1572 A70-20947

Projectile penetration of Al alloys, noting melting during intense shear band formation
08 p1522 A70-21710

Energy spectra of electrons transmitted through Be, Al and Au targets measured for incident electron energy
10 p1918 A70-23984

Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc
[AIAA PAPER 69-368] 14 p2657 A70-30765

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage
15 p2806 A70-32756

Meteorites explosive fragmentation under aerodynamic loads simulated by steel balls shot into increasing-density target, discussing parameters
15 p2806 A70-32759

Forces acting at thrust termination time with aluminum solid propellant rocket fuel, predicting thrust reversal ratio under vacuum conditions

21 p3869 A70-41869

Mathematical model for projectile penetration into metallic targets, calculating velocity after perforation

21 p3939 A70-41968

TERMINAL FACILITIES

Airport terminal configurations payload flow-through characteristics and space allocations, discussing passenger processing, baggage systems, etc [AIAA PAPER 69-1088]

01 p0000 A70-10622

ATC terminal displays procurement and use, discussing effects of traffic growth and FAA automation program

01 p0139 A70-11285

Secondary surveillance radar and interferometry techniques to determine aircraft positions in real time and all weathers for air terminal approach control

02 p0331 A70-11965

Three dimensional radar system for automatic tracking all aircraft in terminal area to increase air traffic control system safety and capacity

02 p0332 A70-11967

Ground support and service features present facilities to handle B-747 and DC-10 aircraft

[SAE PAPER 690560] 03 p0463 A70-13264
Encounter statistics and operational environment of aircraft collision-hazard warning systems in terminal area

07 p1331 A70-20060

Air transport facilities planning in Canada, describing systems planning approach and major influencing factors

08 p1481 A70-20621

ATC and SST operations in terminal area simulation study involving airline crews and controllers in real time traffic situation

09 p1721 A70-22946

AIRLORD system consisting of central data processing and I/O units for predeparture handling of passengers and freight at airports

11 p2013 A70-25365

Ground ATC facilities, discussing landing, automation, surveillance, communication and navigation

11 p2079 A70-25723

Airspace and airport use at terminals, discussing segregation of aircraft by performance categories [SAE PAPER 700229]

11 p2153 A70-25899

Remote area terminal system providing navigation and guidance signals for aircraft landing

11 p2081 A70-26509

Air terminal design, describing mechanical systems for moving people, baggage and cargo

[SAE PAPER 700259] 12 p2206 A70-27431

Performance standards for intra-airport batch type people-moving systems, discussing seating requirements, platforms and stations, communications and power systems, etc

[SAE PAPER 700260] 12 p2206 A70-27432

Terminal automation system (ARTS) digital computerized beacon tracking for future ATC facilities, noting add-on packages to increase system reliability

[SAE PAPER 700282] 12 p2206 A70-27441

Urban airport runway capacity increase via reduced aircraft separation, additional parallels and improved terminal traffic control, discussing design for acceptable safety levels

12 p2207 A70-27627

Midair collisions between controlled and uncontrolled traffic in terminal areas associated with aircraft operations and airport density

12 p2267 A70-27632

Air terminal and ground transfer design to provide improved access to aircraft and total transportation time reduction

12 p2208 A70-27992

Boeing 747 ground operations and airport services, discussing computerized check-in, baggage handling equipment, etc

[AIAA PAPER 70-892] 17 p3019 A70-35808

Automated baggage handling and processing, requiring total aviation community participation

[AIAA PAPER 70-917] 17 p3204 A70-35829

Mobile lounges and airport productivity concepts for optimal handling of passengers at airport terminal

[AIAA PAPER 70-918] 17 p3064 A70-35830

Large capacity transports influence on air cargo operations, and joint use cargo terminal planning

[AIAA PAPER 70-920] 17 p3204 A70-35832

Terminal airspace utilization from ATC viewpoint, discussing airport capacity, data acquisition, weather, etc

[SAE PAPER 700281] 18 p3237 A70-36809

STOL systems 1975 technical and economic characteristics in terms of passenger market, aircraft design, terminal facilities and ATC capability

[SAE PAPER 700311] 18 p3350 A70-36812

Airport terminal design, describing electromechanical baggage handling and sorting systems

[SAE PAPER 700261] 18 p3237 A70-36822

International civil aviation, discussing ICAO functions, airports and terminal facilities problems

19 p3553 A70-37748

Hamburg airport terminal design including circular planets system for large aircraft, efficient intermodal transfer facilities, etc

19 p3396 A70-37750

National Airspace System air traffic control automation program for en route and terminal facilities

19 p3464 A70-37914

Air traffic control third generation system upgrading programs increasing airport, en route and terminal airspace capacities

19 p3464 A70-38227

ATC systems safety, capacity and delay, discussing terminal operations, runway capacity and aircraft spacing

19 p3465 A70-38228

Helicopter operations integration into civil air traffic system, noting special requirements for mixed fixed and rotary wing terminal environments

19 p3465 A70-38230

ATC integration of SST, discussing en route and terminal projects of national airspace system, modular automation, instrument flight rules, etc

19 p3467 A70-38633

UK organization of ATC services, considering responsibilities, facilities and personnel recruitment

19 p3467 A70-38634

Boeing 747, L-1011 and DC-10 introduction costs, profits and terminal facilities

19 p3357 A70-38951

International transportation regional hub airport planning with spin-off parking, circular terminal facilities and high speed interterminal passenger and baggage controls

20 p3606 A70-39673

Air cargo terminal operations analysis, discussing manpower cost reduction

20 p3607 A70-40127

Metropolitan air transit system design, considering compound helicopters, automatic control by central computer, onboard avionics system and terminal facilities

21 p3956 A70-41250

Air cargo traffic problems, discussing mechanized terminals, automatic handling equipment, direct container delivery, mass traffic and large freighter aircraft

22 p4126 A70-43268

Centralized terminal air cargo handling capacity, discussing Jumbo aircraft, airside ramp system, container movement, computer control and automation

22 p4006 A70-43270

Passenger seaplanes virtues and drawbacks, discussing bases, servicing, refueling, passenger conveyance, prospects, etc

23 p4137 A70-43887

Airport accessibility role in planning V/STOL aircraft landing facilities [AIAA PAPER 70-1311]

24 p4323 A70-45947

TERMINAL GUIDANCE

Flight test experiments for H-19 helicopter to evaluate aided inertial system performance for terminal guidance

01 p0136 A70-10303

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle

04 p0661 A70-15011

Airborne digital letdown computer to guide VTOL aircraft flying complex trajectories to relieve airport congestion

05 p0880 A70-16416

Instrument landing system techniques based on hyperbolic geometry and correlation detection for terminal area traffic control, discussing applications

06 p1102 A70-17637

Lunar module rendezvous with command and service module by coelliptic sequence establishing standard lighting and relative position and velocity for final approach

[AIAA PAPER 70-26] 06 p1157 A70-18129

Terminal air traffic control automation, discussing Advanced Radar Traffic Control System (ARTS) and control tower data transfer aspects

08 p1540 A70-20678

ILS systems, considering possible improvements

08 p1541 A70-21021

Subsonic glide landing approach guidance for unpowered lifting vehicles, using perturbation feedback and approximation of heading and position coordinates

[AIAA PAPER 69-865] 09 p1725 A70-23253

Radar signal quick indication and extrapolation for terminal guidance control of Mars soft lander, reducing radar lock on loss sensitivity and engine spurious noise throttling

11 p2080 A70-26210

Automatic-manual space rendezvous control system for Cosmos and Soyuz satellites, considering terminal phase control at specific closing range and velocity

13 p2499 A70-28402

Terminal constraints affecting matrices comprising linear impulsive guidance law for earth approach, discussing Mars mission

13 p2447 A70-28516

Flight test experiments for H-19 helicopter to evaluate aided inertial system performance for terminal guidance

13 p2449 A70-29622

Terminal guidance by dynamic programming to obtain optimal feedback control law in nominal trajectory neighborhood for minimum energy consumption

13 p2449 A70-29963

Landing point redesignation during Apollo lunar module descent terminal portion, defining information and control system

14 p2613 A70-30454

Apollo 12 navigation for pinpoint lunar landing, correcting errors in downtrack position in guidance computer near powered descent initiation time

14 p2613 A70-30456

Terminal area guidance for unpowered aircraft in instrument approach relevant to manned space shuttle effort

14 p2614 A70-30465

Terminal kinematic variables prediction for missile homing, discussing line of sight angle, rate and acceleration

15 p2773 A70-32525

Optimal open loop controller and suboptimal feedback law to minimize terminal error of entry vehicle

16 p2947 A70-33439

Terminal guidance for Mars softlander utilizing Doppler and range radar for steering and propulsive control

17 p3133 A70-35286

Multistage rockets terminal control synthesis based on linear functionals

18 p3333 A70-36163

Automated radar terminal system, ARTS-III Beacon Tracking Level for continuous aircraft identity on controllers radar display

18 p3288 A70-36393

Algorithm for trajectory analysis in closed loop terminal guidance of solar electrically thrusted interplanetary spacecraft [AIAA PAPER 70-1152]

20 p3670 A70-40203

Optimal terminal control stochastic synthesis for linear systems by Bellman second order nonlinear partial differential equation

21 p3801 A70-40607

Lunar module rendezvous with command and service module by coelliptic sequence, establishing standard lighting and relative position and velocity for final approach

[AIAA PAPER 70-26] 21 p3931 A70-41860

TERMINAL VELOCITY

Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles

[AIAA PAPER 68-1147] 01 p0195 A70-10828

Optimal control of aircraft angle of attack based on minimum terminal velocity during passive flight in spherical nonrotating earth atmosphere

02 p0227 A70-12409

Lunar module rendezvous with command and service module by coelliptic sequence establishing standard lighting and relative position and velocity for final approach

[AIAA PAPER 70-26] 06 p1157 A70-18129

Cross product steering for space vehicles and ballistic missiles guidance during powered vacuum flight, pointing thrust acceleration vector to null velocity at termination

16 p2947 A70-33440

Spinning blunt entry vehicles dynamic stability tests in terminal regime, discussing dependence on angle of attack

[AIAA PAPER 70-988] 20 p3714 A70-39541

Lunar module rendezvous with command and service module by coelliptic sequence, establishing standard lighting and relative position and velocity for final approach

[AIAA PAPER 70-26] 21 p3931 A70-41860

Mathematical model for projectile penetration into metallic targets, calculating velocity after perforation

21 p3939 A70-41968

TERMINALS

Electrostatic discharge at magnetopause by idealized circuit analog, discussing transmission lines and terminal impedances

14 p2579 A70-31247

Deep space optical communications link, fabricating operational prototype of flight hardware for spaceborne terminal

16 p2863 A70-33190

Connectors for supersonic jetliners, discussing butyl rubber grommet, power distribution collector, modular terminal blocks and passenger service connector

16 p2878 A70-33956

Stepped termination design for rectangular waveguides achieving minimum length and maximum reflection coefficient

23 p4169 A70-43783

TERMINOLOGY

Low temperature terminology at December 1969 Paris conference, discussing temperature scale, superconductivity, liquid He, supercooling, subcooling, cryo and cryogenic

14 p2616 A70-31013

Juridical condition of earth orbiting space stations, discussing term definitions in treaty on outer space 17 p3202 A70-35785

Trim changes definition, discussing exact meaning 24 p4289 A70-45436

TERNARY ALLOYS

Ternary chemical element additions /O, Sn, Zr, Pb, Mo, V/ effects on solubility range of primary alpha region of Ti-Al base alloys 01 p0122 A70-11239

Ferrite and martensite precipitation hardening in Fe-Ni-Mo alloy, studying dislocation structure and aging kinetics 01 p0123 A70-11243

Ternary Al-Zn-Mg alloys stress corrosion cracking properties, showing effects of aging temperature and prestrain 01 p0123 A70-11387

Ti-Al-Co alloys reactions in solid phase in Ti-rich region, using optical microscopy and X ray diffraction analysis 01 p0125 A70-11645

Ta-V-Cb and Ta-V-Ti alloys used as brazing fillers for refractory metals bonding, noting wetting and flow characteristics, shear strength, remelt temperatures, etc 02 p0319 A70-12753

Two phase theory of ordered to disordered state transition in ternary alloys with fcc lattice, constructing phase diagrams 03 p0505 A70-13103

Ti-Al-Sn alloy tensile deformation mechanisms at cryogenic temperature under uniaxial and biaxial stress noting twinning, prismatic slip and dislocation characteristics 03 p0507 A70-13141

Superconducting properties of polycrystalline disordered cold worked Nb-Ti-V alloys showing unexpected sensitivity to fast neutron irradiation 03 p0508 A70-13144

Superconducting transition temperature variation in bcc region of Ti-Nb-V ternary alloys measured as function of valence electrons and composition 03 p0538 A70-13154

Heat treatment effects on phase components of Cr-Mn-B alloys with W and Nb additions, discussing heat resistance 03 p0510 A70-13280

Phase structure and corrosion resistance of alloys in Ti-V-Cr system, discussing effects in HCl, sulfuric acid, nitric acid, acetic acid and NaCl solution 03 p0510 A70-13282

Nb binary and tertiary alloys density changes found proportional to alloying element content 03 p0511 A70-13489

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys 03 p0512 A70-13855

Extension characteristics of delta and sigma related phases in Mo-Ni ternary systems and evaluation of unit cell dimension variations on alloying 04 p0704 A70-14392

Ti-Al-V alloys after annealing investigated for equilibrium diagram at high temperatures 04 p0708 A70-15313

Heat treatment produced semicoherent and incoherent precipitations diminished susceptibility to stress corrosion cracking of aluminum binary and ternary alloys 04 p0708 A70-15370

Ternary Ti-Ta-Nb solidus surface determination by simplex lattices and cubic approximation, statistically evaluating equation derived 05 p0864 A70-16547

Ternary Ti-Al-Mo part phase diagrams constructed from Mo corner to plane titanium aluminide, including isothermal phase diagram for 600 C 05 p0864 A70-16548

Alpha and beta solid solutions chemical composition in two phase alloys of Ti-Al-Mo and Ti-Al-V determined by electron microprobe analyzer 05 p0864 A70-16549

Isothermal sections in Ti-Ni-B, Mo-Ni-B and W-Ni-B at 800 C determined by X ray analysis 06 p1090 A70-17846

Isothermal section determination in Mo-Cr-B at 1000 C using X ray, metallographic analyses and microhardness measurements 06 p1090 A70-17847

Vibration frequency influence on vibrational creep of Al-Mg-Si alloy, describing mechanism in terms of strain hardening, additional slip and dislocation movements 06 p1168 A70-17931

Ni influence in high temperature oxidation of austenitic Fe-Cr-Ni alloys investigated thermogravimetrically, metallographically and by electron probe microanalysis 07 p1305 A70-18965

Fe-Cr-Ni alloys for use in high temperature oxidizing environments 07 p1305 A70-18966

Ternary Al-Mn alloys precipitation hardening with Cr, V and Ti, investigating ferro and ferrimagnetic phases 07 p1307 A70-19390

Precipitation in Fe-Ni-Co maraging alloys produced by austenite plates formation from martensite, discussing effects of Ti addition 08 p1524 A70-21955

Binary and ternary systems phase diagrams construction by diffusion layer method and X ray analysis, studying concentration dependence of diffusion coefficient 09 p1703 A70-22564

Ternary metastable phase diagram for W-Ti-B system at room temperature 10 p1905 A70-25226

Fe-Mo-C and Fe-Ti-C alloys microstructure and hardness after rapid cooling from melt, considering phase dispersion and particle size, spacing and shape 11 p2065 A70-25774

Fe-Cr system and Fe-Cr-Ni liquid alloys studied by Knudsen cell-mass spectrometer combination, deriving phase equilibria from ion current ratios 12 p2255 A70-27602

Binary and ternary Mg alloys ductile fracture mechanism, studying coherent/noncoherent particles effects 12 p2256 A70-27612

Alloy oxidation at high temperatures emphasizing binary and ternary alloys 12 p2257 A70-28005

Phase equilibria in quasi-ternary alloys by microstructural, thermographic and X ray analyses, showing continuous solid solutions formation in titanium-niobium-titanium aluminide 12 p2258 A70-28275

Li and Cr additives effects on Al-Zn-Mg stress corrosion resistance, considering cracking, precipitation hardening and intercrystalline corrosion 13 p2433 A70-28844

Cu-Fe-Ti ternary system via microscopic, X ray and thermal analyses, measuring microhardness, electrical resistivity and magnetometry 13 p2433 A70-28863

Evaporated Au-Ni-Cr alloy resistor films physical and electrical characteristics, noting dependence on composition 14 p2625 A70-30285

Superconducting resistive critical field H_c of bcc region of Ti-Nb-V ternary system 15 p2782 A70-31754

Thermal conductivity and shock resistance of flame and plasma sprayed zirconia coatings on Ni-Mo-C metal [ACS PAPER 22-C-68F] 15 p2762 A70-32527

Ti-Al-Nb system creep strength, oxidation resistance, density, forging and rolling 17 p3120 A70-34426

Mn and Ti effects on hardening of Fe-Ni-Mn-Ti and Fe-Ni-Mn maraging martensitic steels 17 p3125 A70-35145

Corrosion and stress corrosion behavior comparison of aged Al-Zn-Mg alloy in aqueous chloride solution, discussing pH variation effect 18 p3271 A70-36028

Ti-Al binary and Ti-Al-X ternary alloys grain boundary precipitation kinetics and correlation with mechanical properties 18 p3272 A70-36035

Relaxation peaks associated with interaction clusters of Zr and N dissolved in Nb 18 p3274 A70-36056

Isothermal phase equilibria in Ti rich ternary Ti-Al-Fe alloys, noting eutectoid transformation 18 p3275 A70-36123

Dynamic and static stress effects on martensite formation temperature in Fe-Ni-C alloys 19 p3451 A70-37569

Plastic deformation in Ni-Cr-Nb alloy precipitation hardened at different long terms of high temperature 19 p3451 A70-37706

Ternary Al-Cu-Mg alloys, considering aged structure relationship to fatigue strength 19 p3454 A70-38955

Al-Zn-Mg alloys structural transformations by diffraction electron microscopy, investigating grain boundary and dislocation structure as function of heat treatment and chemical composition 20 p3646 A70-39044

Magnetic and structural characteristics of ternary intermetallic systems with lanthanides, considering Ln substitution by other rare earth elements 22 p4085 A70-42481

Ternary Co-Cr-C alloys unidirectional solidification with metal matrix and carbide simultaneous freezing at eutectic liquidus line 24 p4358 A70-45235

Weak superstructure line patterns of ternary phases with TiFeSi and ordered iron phosphides by single crystal, Guinier powder and diffractometer techniques 24 p4359 A70-45249

Ni-Nb-W and Ni-W alloys phase equilibrium, obtaining diagrams from analysis of liquid and solid phases separated electromagnetically before tempering 24 p4359 A70-45372

Fe-Ni-Mn ternary martensitic alloy, discussing metastable miscibility gap island existence in bcc phase 24 p4363 A70-46193

TERNARY SYSTEMS

Superconducting properties of Nb-Ti-N thin films prepared by reactive sputtering process, obtaining transition temperature maximums 04 p0732 A70-15689

Ternary data transmission systems characteristics for modulated codes with known parameters or random initial phases 05 p0816 A70-17006

Be atoms effect on lattice structure of three component sodium oxide-beryllia-silicate glasses using IR absorption spectra 07 p1315 A70-18704

Phase equilibria, crystallization and solidus surface in transition conode triangle of ternary system Mo-Ti-C at high temperatures 07 p1310 A70-19804

Carbide layer formation on Ta and Ta-W alloys, discussing Ta-C phase diagram and phases 07 p1320 A70-19892

Phase equilibrium and homogeneity regions of solid solutions system Ni-Nb-O at elevated temperature 07 p1315 A70-20313

Mo effect on structure and properties of Ni-Al-Nb system alloys in gamma and gamma prime solid solutions range, discussing high temperature strength 08 p1514 A70-20549

Diffusive separation of Ar 36 and 40 and He in axisymmetric supersonic jet taking into account pressure diffusion 08 p1431 A70-21027

Diffusion layer correspondence to phase diagram in terms of constituent phases and composition 09 p1702 A70-22563

High temperature fuel cell electrolytes, analyzing electrical conductivity of ternary systems of zirconium, cesium or tantalum and yttrium oxides in fluorite phase 10 p1830 A70-24460

Raney alloy catalyst activity and stability in fuel cell anodes, noting properties of ternary phases of nickel, aluminum and iron, molybdenum or titanium 10 p1831 A70-24466

Ternary phase diagrams and quaternary excess free energy prediction using binary data, applied to Pb-Sn-Zn, Ag-Pd-Cu and Pb-Sn-Cd-Bi systems 12 p2254 A70-27475

Chemical compositions and structure of carbides in Fe-W-C and Co-W-C systems, clarifying eta phases 12 p2255 A70-27601

ETA oxides compositions in Hf-Ni-O, Ta-Ni-O and W-Ni-O systems determined by studying 1000 C isothermal sections with X ray diffraction 12 p2255 A70-27607

Ti-Cu-Ag phase diagrams and liquidus surface structure, using metallographic, thermal and X ray techniques 16 p2931 A70-33221

Isothermal section at 1150 C of V-Zr-Cr cast and annealed alloys investigated by X ray and metallographic analyses, establishing various phase regions 19 p3453 A70-38711

Phase relations in system Ag-Fe-S in 700-1200 C range at various vapor pressures by quenching and differential thermal analysis, observing liquid-immiscibility fields 22 p4053 A70-42732

Thermodynamics and statistical physics of dense plasma with particle interaction energy exceeding kinetic energy, discussing three-component model phase equilibrium 23 p4229 A70-45073

TERNARY SYSTEMS (DIGITAL)

U DIGITAL SYSTEMS

TERPENES

NT AZULENE

TERRADYNAMICS

Melting zone evolution in thermal history of earth, investigating upper mantle heat transfer effect on layer motion due to radioactive decay 06 p1056 A70-17804

Sand bed stability under shear flow of low Froude number 24 p4330 A70-45980

TERRAIN

Radio wave propagation over inhomogeneous terrains, determining perturbing effects of details on wave characteristics 19 p3381 A70-38573

Terrestrial atmospheric structure, determining zero and extremum point positions and amplitudes to obtain information of VLF wave propagation path 19 p3416 A70-38574

Antenna polarization and terrain depolarization effects on radar ground return, calculating echo pulse from smooth and rough terrains 22 p3990 A70-43327

TERRAIN ANALYSIS

Terrain imaging radar applied to sensing earth resources 02 p0298 A70-12181

Terrain computerized mathematical model for determining unobstructed line of sight between observer and target 03 p0455 A70-14172

Earth resources observation satellite /EROS/ program, discussing geologic terrain and land-use planning maps
[SPE PAPER 2703] 06 p1053 A70-17155

Noontime ground surface temperature relationship to exposure and slope angle for meadows and woodland, using airborne IR pyrhelometer
06 p1054 A70-17415

Minimum altitudes for illumination levels of aerial color photographic film calculated for different landscapes
07 p1283 A70-19633

Electro-optical analogies application to sidelobe reduction of radar antenna illumination patterns and optics far field diffraction patterns in terrain image formation
09 p1631 A70-22009

Electromagnetic radiation sources for remote sensing application to identification of water, moist soil and vegetation, discussing optical properties of diverse materials
09 p1667 A70-22851

Philosophy and technology of spacecraft-borne sensors for earth resource surveys, noting ERTS-A satellite
[AIAA PAPER 70-302] 09 p1668 A70-22883

Color and color IR aerial photography, discussing effects of solar spectrum, films, filters, etc, in connection with terrain analysis
10 p1880 A70-24751

Volcanic terrain by high precision photogrammetry for studying planetary surface roughness traversability by three wheeled vehicle
10 p1882 A70-25047

Radar observation of landscape regions, discussing dependence on recognition of variations in texture patterns on radar image
11 p2004 A70-25642

Universal Automatic Map Compilation Equipment /UNAMACE/ for terrain altitudes determination on uniform and dense grid in stereo model to obtain orthophotographic projection
11 p2051 A70-26042

Slope failure erosional and mass wastage forms identification, characteristics and distribution based on large scale aerial photography depicted by remote sensor returns
12 p2217 A70-26913

Collapse prone land detected by multispectral scanning and photography with analog data processing
12 p2220 A70-26933

Airborne laser profilometer terrain roughness measurement and recording, considering error sources
12 p2244 A70-26938

Radar look direction effects on geological features detectability, considering topographic relief and incidence angles roles in feature enhancement and suppression
12 p2221 A70-26962

Landscape structure interpreting from aerial photos taken vertically from overflying aircraft
12 p2231 A70-27237

Terrain spectral imagery from satellites for natural resources investigations
12 p2235 A70-27745

Earth resource observation from orbiting spacecraft, discussing photo-image map construction for continents and continental shelves, terrain analysis, delta formation, etc
12 p2225 A70-27747

Aerial reconnaissance of soils, rocks, vegetation and streams, comparing color, IR color, and black-and-white photography
12 p2236 A70-27873

Martian terrain features and atmospheric activity observation by Mariner 6 and 7
13 p2494 A70-29526

Lunar surface terrain types and chemical composition based on Surveyor pictures
14 p2634 A70-30193

Book on microwave propagation physics covering unbounded homogeneous medium, terrain effects, uniform refractivity gradient, nonstandard refractivity, fading, etc
14 p2551 A70-30953

Snow field mapping with K band radar imagery determining signal return difference with surrounding terrain, noting role of volume scattering and old snow structure
14 p2578 A70-31238

Surface temperature measurement with airborne IR scanning imager for terrain analysis
16 p2905 A70-33170

Map making for Soviet soil fertilization, discussing map symbols and scale
19 p3407 A70-37275

Automatic measurement of drainage networks for lengths and areas by copper plate etching or flying spot scanner on transparencies or radar images
20 p3633 A70-39794

Aerial cameras for topographic mapping, emphasizing geometrical image accuracy, optical picture quality and shutter performance
21 p3826 A70-41268

Natural and cultural landscape pattern classification in aerial photointerpretation using land-system concept
21 p3826 A70-41401

Soil science and climatology in Central Europe archeological site location by aerial photography
21 p3826 A70-41402

Internal and integral photointerpretation in aerial photography, discussing landscape information reliability increase by interdisciplinary method
21 p3826 A70-41403

Aerial terrain analysis by color and color IR photography, analyzing physical factors affecting final image
22 p4018 A70-42963

Synthetic aperture terrain-imaging radar systems, calculating tropospheric turbulence induced phase errors for comparison with microwave propagation experiment
22 p3991 A70-43579

Rotating gravity gradiometer for simulated terrain mapping with subsurface density fluctuations
22 p4007 A70-43668

Roving vehicle self contained automatic control systems, discussing terrain scanning technique, stereo TV and electronic coordinate measuring and data processing equipment
23 p4260 A70-44628

Optimal timing for aerial photographic mapping of landscape types including tundra, forest, steppe, meadow, desert and mountain areas
24 p4328 A70-45196

Earth curvature effects on position of terrain points on planar aerial photographs for various survey altitudes
24 p4333 A70-45197

Optical properties of terrain for optimal time charting of aerial mapping, considering seasonal variations and atmospheric transmittance
24 p4333 A70-45199

TERRAIN FOLLOWING AIRCRAFT

Aircraft flight displays, simulating low altitude high speed mission by four degree of freedom Dynamic Flight Simulator
10 p1859 A70-24216

Pilot navigation efficiency in low altitude terrain following flight, using synchronized TV and simulator with inertial guidance
24 p4307 A70-45506

TERRESTRIAL DUST BELT

Micrometeoroid experiments on OGO 2 and OGO 4 satellites, measuring velocity, masses and particle orbits in earth dust cloud
01 p0086 A70-10444

Lower thermosphere dust particle layers correlated with polarization anomaly twilight fluctuations and noctilucent clouds frequency distribution
10 p1944 A70-24949

Circumterrestrial dust component in Doppler shifted zodiacal light, considering Mie theory
11 p2045 A70-25698

Tropical and midlatitude stratospheric dust by twilight photometry, considering possible causes of anomalous turbidity levels
11 p2046 A70-26388

Near earth motion equations for electrically charged dust particles in gravitating dipole magnetic fields, using zero-relative-velocity surfaces and energy integral
18 p3315 A70-36606

Earth aerosol layer formation mechanism, giving atmospheric brightness measurements in terms of dust particles density and size
18 p3251 A70-36981

TERRESTRIAL MAGNETISM

U GEOMAGNETISM

TERRESTRIAL RADIATION

Diffraction correction of terrestrial, atmospheric and cosmic background radiation at aperture and disk determined by artificial moon method
03 p0442 A70-13084

Lunar regolith and polarized component of earthlight observations by Surveyor 7 TV camera
04 p0752 A70-15061

Atmospheric temperature gradients above 30 km near sunrise using earth spectral radiance measurements by balloon
04 p0694 A70-15523

Assessing background magnitude caused by earth natural radiation sources during underground detection of solar neutrinos by radiochemical methods
05 p0899 A70-15950

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift
05 p0841 A70-16729

Self calibrating radiometer for in-flight measurement of earth surface thermal microwave radiation
07 p1282 A70-19616

Grating spectrometer performance in measuring earth IR radiance determined from balloon flights
12 p2235 A70-27752

Earth radiation balance /net flux/ determination from satellite measurements of long wave radiance and reflected solar radiation in upper atmosphere
12 p2264 A70-28090

Terrestrial ELF waves F layer nighttime reflections, discussing effects of electron density, geomagnetic field radial component and absorption by ions
13 p2365 A70-29190

Precision radiometry of electromagnetic energy transfer in atmospheric and space physics emphasizing solar and terrestrial radiative fluxes measurements
13 p2409 A70-29652

Solar and terrestrial radiation measurements and computations in meteorology, considering diffuse radiation and radiative transfer in atmosphere
13 p2410 A70-29661

Trapped particles radial diffusion in formation and decay of radiation belts
13 p2484 A70-30096

Earth radiation balance climatological characteristics based on satellite and published data, analyzing earth-atmosphere albedo on global scale
14 p2603 A70-30402

Earth/atmosphere system outgoing microwave radiation calculations, surveying aircraft/ satellite measurements at various wavelengths
16 p2896 A70-33217

Earth Lyman alpha emission rates as function of atomic hydrogen column density in outer atmosphere, using Mariner 5 measurements
18 p3244 A70-36007

Ring current belt stability against LF electrostatic perturbations, including effects of finite electric field along magnetic lines of force
18 p3306 A70-36009

Airborne IR scanner as geophysical research tool depicting surface emission and heat mass transfer
18 p3259 A70-36558

Earth radiation measurement at 10-12 microns by Cosmos 243 satellite-borne radiometer, comparing temperatures for boundary air layers in cloudless conditions
18 p3247 A70-36630

Angular structure of outgoing short wave radiation field measured from Cosmos satellite for clear and cloudy skies and various sun heights
18 p3286 A70-36965

Climatological maps of earth mean annual radiation balance compared with satellite data
18 p3286 A70-36966

Human bioclimatology at high altitude, discussing energy balance in terms of net solar and terrestrial radiation balance in mountain area
19 p3367 A70-37369

Atmospheric moisture content vertical profile from terrestrial radiation measurements, using statistical regularization procedure
19 p3460 A70-37418

Terrestrial ELF electromagnetic wave fields strength variation with distance over earth surface, using residue series zero-order term
19 p3380 A70-38405

Soviet book on atmosphere and earth surface radiation characteristics covering absorption, scattering, spectral and angular distributions, radiation field, spatial structure, etc
20 p3661 A70-39171

Earth intrinsic radiation flux incident angular coefficient, examining effect on partially screened flat spacecraft elements
21 p3942 A70-40847

Atmospheric temperature profiles from terrestrial IR spectral radiances measured by balloon-borne grating spectrometer, discussing surface temperature variations
21 p3813 A70-40905

Pulse height distributions due to terrestrial gamma rays, using NaI/Tl scintillation counter
23 p4187 A70-43899

Earth and atmosphere thermal emission spectra via Nimbus 4 Michelson interferometer, obtaining atmospheric temperature, humidity and ozone profiles
23 p4192 A70-44866

Solar stimulated terrestrial materials luminescence remote detection by Fraunhofer line depth method using UV grating spectrometer
23 p4199 A70-45007

Earth/atmosphere system outgoing microwave radiation calculations, surveying aircraft/ satellite measurements at various wavelengths
24 p4328 A70-45192

Thermal emission spectra of earth and atmosphere from IR Michelson interferometer onboard Nimbus 3 satellite
24 p4330 A70-45977

TESSERAL HARMONICS

Earth potential errors from gravity and satellite motion measurements, discussing sectoral, tesseral and zonal harmonics with large and small second indices
03 p0473 A70-13190

Resonance effects on satellite orbits due to tesseral harmonics in potential field
05 p0908 A70-16335

Orbital perturbations earth satellite due to zonal and tesseral earth gravitational harmonics and external body fields
12 p2302 A70-27671

Tesseral and sectoral harmonics effect on satellite perturbations using numerical integration
13 p2494 A70-29531

Tesseral harmonics of geopotential and station coordinates from combined Baker-Nunn, laser and range data from satellites 24 p4407 A70-45538

TEST BEDS

U TEST EQUIPMENT

TEST CHAMBERS

NT ANECHOIC CHAMBERS

NT PRESSURE CHAMBERS

NT VACUUM CHAMBERS

Test chamber to simulate helicopter rotor downwash for engine inlet air particle separator optimization 01 p0056 A70-10676

Fixed gap electrostatic spark discharge apparatus for booster type explosive sensitivity tests, discussing construction of two models, safety features and results 03 p0548 A70-14120

Near IR reflectance spectrometer integrated into environmental chamber to study frost spectral properties 06 p1072 A70-18522

Space environment simulation chamber for testing of equipment temperature and satellite thermal model 19 p3402 A70-38897

Man-rated chamber facilities at Manned Spacecraft Center (MSC), discussing safety requirements and criteria, environmental test chamber design and test results 23 p4152 A70-44458

TEST EQUIPMENT

Automatic loading control system for tensile test machine permitting creep and creep-rupture testing 01 p0054 A70-10075

Ultrasonic wheel-type portable inspection device with internal coupling immersion fluid contained in silicone tire, allowing angle beam inspection without temperature correction 01 p0105 A70-11396

Dynamic testing instrumentation for oxygen breathing equipment emphasizing demand regulators and masks, connecting hose, helmets and individual components 01 p0041 A70-11458

Avionic units automatic testing to increase speed and reliability, discussing system configuration, parts, economics and computer language use 02 p0295 A70-11838

Hardware-software integrated time sharing computer system for testing transmission control units and associated terminals on line 02 p0275 A70-12189

Test fixture for determining mechanical properties of metals and steels at moderate strain rates, detailing design and instrumentation 03 p0462 A70-12883

Boeing 747 nacelle development programs involving outdoor and ground test rigs, flying test bed, flight tests, etc 03 p0550 A70-12894

Apparatus for short term thermal vacuum mechanical testing of materials 03 p0463 A70-13253

Apparatus for small specimen torsion tests at room temperature, describing machine capabilities 03 p0493 A70-13960

Nonlinear stochastic differential equations formulated during random loading processes generation, designing testing devices with stable performance parameters 03 p0598 A70-14236

Equipment for cyclic biaxial testing, producing five biaxial stress states by simultaneous direct pressurization and axial loading of thin walled cylindrical specimen 03 p0464 A70-14309

Apparatus and techniques for investigating spacecraft materials mechanical and thermal properties, using vacuum effect to simulate space environment [ASME PAPER 69-WA/PID-22] 04 p0663 A70-14752

Altitude simulation equipment for third stage Europa I booster rocket 04 p0664 A70-15302

Torsion testing apparatus for refractory materials at 2400 C, measuring applied torsion moment, twisting angle and second order modulus of elasticity 05 p0825 A70-15881

Amsler Vibrophore machine modifications to permit narrow band random fatigue tests 05 p0826 A70-15887

Test apparatus for investigating crystal defects in influence on simultaneous measurement of metals thermal and electric conductivity under plastic deformation at cryogenic temperature 05 p0829 A70-16399

Testing equipment and methods for metallic materials selection for low temperature applications, characterizing plasticity by yield strength, tensile strength, elongation, etc 05 p0864 A70-16805

Computer-controlled automatic test bench for black box modifications and electronic, hydraulic and pneumatic testing on Concorde aircraft 07 p1249 A70-19742

Computer controlled automatic test system (NARF 5500) for naval avionics systems support, discussing system hardware and applications and programming cost reductions 08 p1469 A70-20652

Aerospace digital computers automatic checkout, considering computers functional and mechanical properties and test equipment configuration and operation 08 p1469 A70-20653

Automatic test equipment from fourth generation computer viewpoint, considering cost and size reduction trends in avionics 08 p1469 A70-20654

Automatic multiple station test system for manufacturing plants, considering centrally controlled vs free standing and intelligent vs nonintelligent remote stations 08 p1470 A70-20655

General purpose automatic test system (GPATS) for electronic equipment fault location, discussing software and hardware for integrating programmable oscilloscope 08 p1470 A70-20656

Automatic test equipment for electronic devices, discussing computerized design of interface adapters for unit under test 08 p1470 A70-20657

Automatic test equipment programming for cost reduction by eliminating duplicated effort between manufacturers of test equipment and unit to be tested 08 p1464 A70-20658

Automatic testing hardware and software compatibility emphasizing versatile avionic shop test (VAST) 08 p1470 A70-20662

Versatile avionics shop test (VAST) Implementation Study recommendations on project management for automatic test equipment support system aboard attack aircraft carriers 08 p1601 A70-20663

Avionics maintainability concepts, discussing built-in test equipment, test connectors, automatic test equipment, fault detection and fault isolation 08 p1470 A70-20664

Computer program for automated test station simulation, considering station operating characteristics and performance prediction 08 p1465 A70-20666

Onboard automatic test equipment design, evaluating failure detection and reporting ability 08 p1470 A70-20667

Onboard integrated maintenance system for aircraft avionics in-flight subsystems monitoring 08 p1471 A70-20669

Built-in test equipment for automatic flight control systems, discussing testing programs and fail safe hybrid circuitry 08 p1471 A70-20670

Program, test equipment and data reduction of aircraft prototype flight tests 08 p1438 A70-21865

Specimen holder for 300 K/4.2 K resistance ratio measurement 09 p1655 A70-22645

Rig using holographic techniques for vibration testing and aircraft engine components inspection 09 p1680 A70-23069

Acoustic impact technique (AIT) for aerospace structures nondestructive testing, describing theory, instrumentation and applications 10 p1894 A70-24175

Automatic test equipment for different type of planes and relation to self organizing systems, considering airport implantation 10 p1970 A70-24476

Ultrasonic pulse frequency spectrum analyzer, describing electronic components, transducer type and positioning, beam collimation, applications in testing, etc 10 p1895 A70-24830

Microwave device test system design, considering measurement ranges and parameters, calibration, repeatability, accuracy, maintainability, etc 10 p1852 A70-24890

Computer aided on-line test generation for prelaunch checkout, describing interpretive test language for rapid man machine information transfer [AIAA PAPER 70-384] 10 p1846 A70-24921

Automatic Malfunction Analysis (AMA) digital computer software system supporting checkout and testing, defining normal system status by computer simulation [AIAA PAPER 70-383] 10 p1861 A70-24922

Automatic maintenance testing of avionic systems, discussing tape controlled equipment and program preparation 11 p2017 A70-25837

Ground testing apparatus with three degrees of freedom for artificial satellites attitude control systems, establishing mathematical model by digital and analog techniques 11 p2031 A70-26290

Automatic test and checkout system difficulties in space vehicles 11 p2032 A70-26338

Vibration generators based on magnetic field electrodynamic effect, giving design, schematic diagram and exploitation properties 11 p2032 A70-26441

Force controlled vibration for shock tests, discussing feasibility and merits for simulation testing 12 p2205 A70-27099

Beam-bending and circular plate testing rigs for creep with constant and variable loading, discussing tests repeatability and accuracy 12 p2207 A70-27618

Ocular focus stimulator with provision for optical distance change between object and observer without brightness and visual angle variation 12 p2237 A70-28125

Test and measuring equipment control systems analysis, discussing metrology and calibration requirements in overall quality assurance problem 13 p2416 A70-28374

Automatic test equipment performance and effectiveness below customer expectations, discussing design factors 13 p2525 A70-29677

Automatic test equipment effect on product design, discussing test planning and quality control 13 p2422 A70-29678

Relative cost benefits estimation of manual and automatic test systems for avionics in maintenance organization, proposing integrated maintenance and ATC data system 13 p2525 A70-29679

Automatic test equipment third generation specifications and design 13 p2525 A70-29682

MELVIN compact inexpensive multipurpose automatic test system, utilizing MSI single printed circuits to work optimally with computer 13 p2374 A70-29683

Digital computer controlled test system suitable for verifying response to single input pattern containing time dependent functions 13 p2374 A70-29684

Test Equipment for Rapid Automatic Checkout and Evaluation (TRACE) system, describing method for interfacing computer with peripherals 13 p2374 A70-29685

Man machine interface between operator and automatic testing equipment based on ergonomic design cost 13 p2360 A70-29687

Automatic test equipment programming procedure including analysis, coding, validation and demonstration 13 p2422 A70-29689

Digital computers in automatic test equipment, describing required control tasks 13 p2375 A70-29690

Multistation automatic test equipment assembly management or maintenance organization, using digital computer control 13 p2385 A70-29691

Automatic dynamic response system for testing logic and semiconductor devices 13 p2379 A70-29693

Quality assurance of automatic testing in military or industrial equipment, including acceptance criteria and statistical proving 13 p2423 A70-29694

Automatic laboratory or field testing equipment design requirements 13 p2423 A70-29695

Failure prediction testing and elements replacement at field maintenance level for increasing equipment reliability 13 p2423 A70-29697

Avionics on military combat-reconnaissance aircraft, discussing automatic systems testing and cost effectiveness model 13 p2380 A70-29698

Automatic test equipment for assembly shops, considering skilled personnel shortage, units complexity and repeatable test and repair 13 p2423 A70-29699

Anechoic chambers and test equipment for microwave antenna pattern measurements, discussing electromagnetic shielding and construction 14 p2557 A70-31180

Aeroelastic test equipment for Concorde, describing operating principles, installation, test results, etc 15 p2717 A70-31810

Materials testing machine for tension, compression and flexure at constant strain rate and for fatigue 16 p2900 A70-33067

Automated programmed device for fatigue tests based on harmonic oscillator, presenting schematic diagram 16 p2900 A70-33068

Low energy ion beam system for studying electron ejection from controlled metal surfaces, describing vacuum, ion source, lens and mass spectrometer components 18 p3261 A70-37086

Gas gun and instrumentation for impact tests 18 p3238 A70-37090

Low temperature creep deformation recorder with liquid He coolant, discussing Al and Pb single crystal tests

19 p3395 A70-37352

Apparatus for short term thermal vacuum mechanical testing of materials

19 p3401 A70-38471

Ultraminiature pressure transducer for airplane model and inlet/engine subsystem in wind tunnel tests, considering design, calibration, environments, etc

19 p3430 A70-38523

Portable catapult and arresting gear analog instrumentation data acquisition system testing aboard aircraft carriers and at land-based facilities

19 p3384 A70-38533

Digital computer magnetic tape recording system for flight tests of Jaguar aircraft, discussing data treatment

19 p3384 A70-38537

Automatic test equipment, considering capability, control and display facilities and system cost

19 p3401 A70-38542

Automatic test technology for avionics systems, discussing equipment and cost reduction

19 p3401 A70-38543

Avionic systems automatic test equipment, discussing maintenance, reliability, cost and time reduction

19 p3402 A70-38544

Emmanuel magnetic recording system used with airborne digital computers for aircraft in-flight tests

19 p3432 A70-38547

Aeroelastic test equipment for Concorde SST using harmonic method and electromagnetic shakers

19 p3402 A70-38548

Digital readout test equipment characteristics and parameters for electrical properties measurement, proposing pulse counting analog-digital conversion technique

19 p3432 A70-38701

Ronchi test interferometer for optical quality checking of laser crystals

20 p3627 A70-39094

Multiple choice rotation chair for clinical experimental research and pilot vestibular tests

20 p3580 A70-39438

Inertial platform with integral dynamic self test and fault monitoring scheme, describing design and operation

[AIAA PAPER 70-1013]

20 p3667 A70-39520

Aircraft gas turbine engine smoke emission measurement, discussing test equipment and procedure standardization

20 p3689 A70-39720

Tensile test device for continuous recording of sample load and strain

20 p3728 A70-40000

Measuring and test equipment economic approach to quality levels and accuracy ratios, deriving cost tradeoffs in optimum inspection fidelity

20 p3634 A70-40453

Optical thermal testing by IR radiation, reviewing thermistor bolometer, various detectors, radiometric microscopes, NDT equipment, etc

21 p3831 A70-40747

Versatile Avionic Shop Test maintenance system supporting avionic equipment aboard aircraft carriers

21 p3804 A70-40772

Test measurement instruments - Conference, Houston, October 1969

21 p3823 A70-40855

Electromagnetic test equipment transient waveform control using on-line digital computer in near real time configuration

21 p3805 A70-41270

Pure Fe and Ta hot hardness tests by ultrahigh temperature tester involving use of electron microscope

21 p3840 A70-41900

Low cost and weight reliable microminiaturized IC automatic cockpit checklist systems for aircraft pilots

22 p3977 A70-42298

Avionics hardware design guidelines to meet automated testing constraints including malfunction isolation, block requirements, packaging, etc

23 p4173 A70-44538

Automatic electronics test equipment, discussing choice between tape or computer controlled interpreter systems based on language, time, versatility and cost

23 p4173 A70-44539

Electronic equipment automatic testing systems signal routing and switching trees and matrices design, emphasizing modular approach

23 p4173 A70-44540

Electronic equipment automated testing objectives and requirements, considering man machine interaction, system controls, on-line reporting, and software/hardware availability

23 p4174 A70-44541

Pressure sensor testing and calibrating at cryogenic temperatures, describing special test rig structural, insulation, fittings and materials requirements

23 p4174 A70-44846

Servo-hydraulic testing machine for measuring cyclic stress-strain behavior of materials subjected to fatigue and creep at elevated temperature

23 p4178 A70-44912

Strain rate sensitive materials tensile tests using machine with external variable speed motor

24 p4422 A70-45517

Metal sheets thickness measurement and monitoring by through-transmission eddy current nondestructive testing, using phase locked amplifier

24 p4344 A70-45699

Magnetic and nonmagnetic metals flaw detection, using orthogonal eddy current probe to reduce permeability and conductivity variations effects

24 p4344 A70-45700

Metals flaw detection, using electronic balancing type eddy current detecting coil

24 p4336 A70-45701

Encasing and welded pipes flaws detection with high resolution by nondestructive testing, using eddy current method

24 p4345 A70-45702

Metallic rods and tubes permeability and resistivity nondestructive measurement by AC apparatus with self balancing sensing coil, using computer program for data reduction

24 p4345 A70-45704

Resonant fixtures utilization attaining high amplitude in shock synthesis testing, discussing test specifications

[SAE PAPER 700848]

24 p4322 A70-45886

Multifan cross wind jet engine test facility to produce variable wind velocity in various directions

01 p0056 A70-10698

Concorde power plant tests using supersonic free jet altitude test facility with Olympus 593 engine

01 p0165 A70-10701

Simulated lunar environmental facility to investigate effects of high risk vacuum, lunar gravity and terrain characteristics and spacesuit encumbrances on astronaut performance

01 p0037 A70-10961

Water immersion technique to simulate zero and partial gravity conditions for investigation of astronaut capability to execute extravehicular work procedures

01 p0038 A70-10963

Missile tracer mixture performance control facility noting chamber for pressure measurement during operation

03 p0544 A70-13758

Automatic simulator for guidance system installed on cartographic satellite in circular orbit at 600 km, discussing weightlessness and vacuum simulation devices

03 p0464 A70-13834

Czechoslovakian Aeronautical Research and Test Institute history, organization, activities, equipment and achievements

03 p0464 A70-13925

Noise suppressor research for jet engine components, describing test equipment and facilities for models work

05 p0825 A70-15808

Clean room design problems concerning dampers, high pressure blowers, humidifiers, filters, etc

05 p0808 A70-16709

Clean room complex consisting of quality control analysis laboratory, main and pre-clean rooms and airlock

05 p0808 A70-16710

Tensile tests facility design for wide temperature ranges with loading system to maintain constant strain rate up to failure

05 p0830 A70-17072

Tensile and stress rupture tests facility for microsamples stability at temperatures up to 3300 K, investigating deformation and failure

05 p0830 A70-17073

Test facilities for studying materials thermophysical properties and stress relaxation, including dynamic hardness measurement and torsion tests up to 2500 K

05 p0830 A70-17074

Facility for testing thin walled tubular specimens in stressed state at low temperatures by keeping stresses constant with helical gear

05 p0830 A70-17075

Materials stress rupture strength and elastic constants at liquid hydrogen temperature, describing method and facility

05 p0955 A70-17076

Facility for studying energy characteristics of electrohydraulic stamping, discussing copper wire exploding in water

06 p1077 A70-17869

Hot air breather test facility design to increase flowrate range at maximum pressure level

[WSCJ PAPER 69-45]

Test facilities and procedures for obtaining aerodynamic data required for studying vehicle-in-tube transportation systems

[AIAA PAPER 70-225]

Radiative heating rates and gas environments effects on ablative material performance from tests at arc image facility

07 p1319 A70-19888

Electrically conductive ablative materials rapidly heated to 7000 F in test facility, discussing heating method and high strain rate testing

07 p1250 A70-20042

Environmental test facilities for space transportation systems, discussing aerodynamic, propulsion and structural problems, operational requirements and existing capabilities

[AIAA PAPER 70-275]

Computer system for real time data acquisition and servicing of asynchronous inertial guidance system test stations

07 p1251 A70-20384

Test-aided aerospace design, noting design engineer attitude and software problems

08 p1467 A70-21591

High resolution multiple spark photography, discussing facility

09 p1680 A70-23070

Avionics test station optimum design by computerized simulation involving iteration of computer run, analysis and model change

10 p1861 A70-24907

Vehicle System Simulator/VSS/test program for L-1011 Tristar encompassing primary and secondary flight controls, avionics, hydraulics and landing gear systems

[AIAA PAPER 70-388]

Weapon Systems Level testing methods and machines application to missiles, manned space flight vehicles and Safeguard System

[AIAA PAPER 70-380]

Helicopter flight test and evaluation tools including data processing facilities to improve test validity

[AIAA PAPER 70-373]

Hollow cylindrical sample scale effect on accuracy of testing heat resistance of brittle materials

10 p1862 A70-24923

Solar simulation laboratory test facility for extraterrestrial solar radiation effects on vehicles beyond earth atmosphere, emphasizing spectral filters

10 p1965 A70-25301

Optimum sequence integration and ground testing of Defense Communication System Phase II Satellite, considering vibration, shock, space simulation, spin/despin, RF and acoustic requirements

[AIAA PAPER 70-447]

C-4 supersonic free jet test cell, discussing Concorde development contribution and model tests on full scale cell nozzle

11 p2030 A70-25353

Free jet test facility for supersonic engine/ intake combination testing, discussing benefits to aircraft flying hours, development costs and safety

11 p2031 A70-25853

Three axis motion simulator for in-orbit spacecraft attitude control evaluation using earth, sun and star sensor references

[AIAA PAPER 69-1029]

Italian polyvalent data acquisition system for ground space tests, discussing electronic instrumentation system

11 p2031 A70-26147

Telemetric systems for moving machine elements tests, discussing seven channel PFM and FM/FM systems

11 p2032 A70-26293

Quasi-steady devices design to investigate high Reynolds number flows for flight vehicles, noting test time

11 p2056 A70-26451

Low cycle fatigue testing facility and methods used at NASA Lewis Research Center

11 p2041 A70-26573

Altitude Test Facility in air breathing aircraft engine design, discussing plant, test cells design and flight representation and systems accuracy

11 p2033 A70-26610

Space environment simulators and test facilities for solar cells and arrays, describing solar and magnetic field simulators and universal battery charger

13 p2473 A70-28538

Pressure sensor testing and calibrating at cryogenic temperatures, describing special test rig structural, insulation, fittings and materials requirements

23 p4174 A70-44541

23 p4174 A70-44846

Automatic test systems - Conference, Birmingham, England, April 1970

Aircraft equipment automatic test methods, comparing in-flight, on ground and second line testings

Turbojet engine testing in ground level facilities with automatic instrument reading and parameters calculation

Configuration management of software concerning automatic test systems in large maintenance depot

Ablation test facilities capability extension by surrounding high enthalpy flow with coaxial cold air jet

Reliability test facilities for military shipboard electronic equipment, subjecting equipment to combined thermal shock and vibration cycles

Two dimensional film cooled turbine blade aerodynamics, investigating massive blowing effect through discrete holes in single blade test facility

Space molecular sink simulator facility /Molsink/ for extreme high vacuum outer space environment simulation, discussing Mariner Mars 1969 spacecraft components tests

Test machine for partial gravity environment simulation for aerospace subsystem testing in vacuum chamber

Test facilities automation, discussing program storage, stimuli, measurement, data accumulation and storage and system control

Digital data acquisition and control system for acoustic testing of large spacecraft

Frequency and time information transmission, discussing frequency and time measurement equipment at Czechoslovak facility

Plane and annular cascade facilities data application to aerodynamic design of axial flow compressors

Thermal stability test assembly for refractory materials cylindrical specimens, using argon plasma jet

Computer aided laboratory testing of flight vehicles in real environmental conditions, illustrating vertical stabilizer subject to gust loads

Computer merits in test laboratory data acquisition systems

Data management methodology for test facilities, considering on-line analog/digital computers

Spacecraft test programming at test facilities providing vacuum and thermal space simulation suggested by Azur and Dial satellite development experience

Heos 1 research satellite space simulation tests at ESTEC test facility

Satellite vibration tests simulation installations, describing measurement and control devices for lateral motion and test object safety

Reliability enforcement in design by competition and test program, using gyroscope example

Spinning blunt entry vehicles dynamic stability tests in terminal regime, discussing dependence on angle of attack

Geophysical environment, discussing vibrations, foundation conditions, local gravity vector and atmospheric conditions in relation to precision instruments tests and operation

Langley 20 megawatt plasma accelerator design and operation, describing arc heater modifications, exit parameters, electrical properties, etc

High speed track facility for V/STOL aircraft tests, discussing characteristics and design

Polish Institute of Aviation, describing facilities and current test programs

Shock tube facility with high explosive driver for reentry flow conditions simulation of manned planetary flights

Automated data handling system for satellite environmental testing used by ESRO

High bypass model jet noise study, describing test setup and noise measurement results as function of secondary/primary flow velocity ratio

Testing laboratory for safety, survival and life support equipment concerning parachutes, aircrew protective helmets and maintenance manuals

Rumanian book on methods, equipment and facilities for aeromechanical measurements covering fluid flow, wind and shock tunnels, flow measurements, etc

TEST FIRING

Thermal efficiency of modified transtage of Titan 3C spacecraft, discussing environmental simulation, heat rejection system and test firing

TEST METHODS

Age correlations with ballistocardiogram amplitudes and waveform grades in test pilots

Cooper aircraft handling rating scale on basis of test pilot experience

Experimental test pilots - Conference, Beverly Hills, September 1969

Cardiovascular aging and aeromedical maintenance programs for selecting test pilots

Hearing loss thresholds and spontaneous and caloric nystagmus corollationship in test pilots

TEST PROGRAMS

Free flight ranges for hypersonic simulation from Mach 1 to Mach 30, noting onboard high-g telemetry instrumentation

Missile and space vehicle range safety policies and practices using past statistical performance data and cost consideration

Toxic fuel test site selection, evaluating meteorological factors in Gypsum Canyon, California

TEST STANDS

Rolls-Royce RB 211 three shaft turbofan engines development and tests, noting preparation, building, cradle installment, open air facilities and noise measurements

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data

Gas dynamic stand for testing turbine disks strength under mechanical and cyclic thermal loads, analyzing breakdown data for various disk geometry

Test stand design and automatic recording of turbine blade fatigue test data, including statistical evaluation

Test stand for endurance and creep testing of plastics, glazed ceramics and other brittle materials

Aircraft ground and flight tests effectiveness planning, preparation and conduct for operational safety, noting Flight Controls Development Test Stand

Gasdynamic test stand analyzing elastoplastic strains in aircraft gas turbine disks and liquid-propellant rocket engines turbopumps under alternating nonisothermal loads

Test stand based on Froude pendulum for measuring friction coefficients and oscillation parameters of porous bushings

Passive type stable test platforms /slabs/ covering configurations, foundations, vibration isolation, environmental effects, etc

Hollow test platform for gyros and accelerometers used in inertial navigation

Micropound extended range thrust stand /MERTS/ for testing electric thrusters for spacecraft auxiliary propulsion, providing three thrust measurement ranges and data telemetry system

TEST VEHICLES

Flight tests with mounted and unmounted SG 1262 hovering test rig in Germany to determine optimal control and stability characteristics for VTOL VAK 191B

Transposition and lunar docking simulation tests for Apollo 9 and subsequent missions using test vehicles equipped with flight type hardware

Runway test vehicle for lifting rotor performance in simulated forward flight, comparing with wind tunnel tests

Transposition and lunar docking simulation tests for Apollo 9 and subsequent missions using test vehicles equipped with flight type hardware

Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan power plants

European participation in small space shuttle development, discussing design, test vehicle program and European applications

TESTERS

Pre-space flight tests effects on Macaca nemestrina monkeys spermatogenesis, considering immobilization and exposure time effects

TESTING

Wind tunnel testing technique innovations, reducing time and cost for low drag aircraft configurations by simultaneous force and pressure model transonic testing

TESTING MACHINES

Thermal transducer for rapid nondestructive testing, discussing imaging of specimen bond defects and thermal property differences

Time-optimal testing sequence for system failure detection, considering maintenance and reliability data

Continuous variation measurements of wind tunnel parameters minimizing testing time, discussing flow characteristics measurements during angle of attack variation

TESTS

Digital computer for data recording in stress-strain curves and data points for mechanical tests

Aerospace vehicles testing cost and technical analysis, discussing component failure, motivation effects, test design optimization, flight simulation, etc

Integrated planning and testing for systems reliability improvement

Reliability model for analyzing operational phase test programs developed from R and D phase models, processing data according to test scope

Systems engineering approach to test planning with emphasis on risk reduction for spacecraft

Controllability test for second order differential systems, noting applicability to linear first order time dependent systems

Integrated test program including proper timing for various testing levels, discussing environmental effects and sample size determination

Test selecting and sequencing for adaptive checkout processes, determining malfunctions

Aerospace vehicles testing cost and technical analysis, discussing component failure, motivation effects, test design optimization, flight simulation, etc

TETHERED BALLOONS

WINDAV anemometer used as low power wind direction and velocity transducer for tethered balloon

Parafail models development, comparing characteristics to kites and round and kite balloons

TETHERING

Relative motion of two bodies linked by flexible weightless tether in artificial earth satellite orbit, simulating extravehicular walk

Tethered orbiting interferometer configurations for future Radio Astronomy Explorer satellites, discussing gravitational stabilization and delta launching into orbit as single payload

Earth-pointing satellites joined by tether, discussing reel back and drag brake orbital deployment techniques and dynamic behavior

- Planar Tethered Orbiting Interferometer satellite for long wavelength solar and planetary radio astronomy, discussing deployment control and libration damping
18 p3333 A70-36230
- Structure and systems design of large gravity gradient stabilized orbiting tethered satellites structure for radio astronomy
23 p4259 A70-44603

TETHERLINES

- Parachute decelerator towline energy absorber shock attenuation characteristics, discussing drop test results
[AIAA PAPER 70-1202] 21 p3752 A70-41815

TETRACHLOROMETHANE

U CARBON TETRACHLORIDE

TETRAGONS

NT PARALLELOGRAMS

NT RECTANGLES

NT TRAPEZOIDS

TETRODES

- Balanced ELF chemotron tetrode amplifiers with series-fed output circuits, showing characteristics calculations and use in pyrometric assembly
06 p1022 A70-17782

- Thyristor tetrode silicon controlled switches (SCS), considering unijunction transistors and pulse generator circuits
13 p2377 A70-29115

- Thyristor tetrodes application to current and voltage stabilization, frequency division and lighting control
16 p2880 A70-34099

- Tetrode for single sideband short wave transmitter, discussing design, characteristics and intermodulation distortion reduction
17 p3054 A70-35412

- Four-terminal p-n-p-n small signal semiconductor tetrode amplifier operation principle and linear circuit applications
19 p3390 A70-38305

TEXTILES

NT COTTON FIBERS

NT RAYON

- Static electricity suppression for textile materials by blending conducting metal fibers into yarn
05 p0870 A70-16299

TEXTURES

- Subjects sensitivity to differences in statistical distributions of locally defined element density and shape, using stochastically textured visual patterns
06 p0998 A70-17223

- Harris method for determining inverse pole figures as description of sheet metal texture
06 p1088 A70-17611

- Rolling texture and recrystallization of Mo single crystals and deformation effect on texture formation using X ray transmission technique
07 p1309 A70-19613

- Cubic texture components preferred orientation shares into rolling texture during cold rolling of aluminum sheets determined quantitatively
09 p1690 A70-22255

- Computer texture analysis for two dimensional scenery pictures involving periodicity invariance under Fourier transform
11 p2014 A70-26251

TFX AIRCRAFT

U F-111 AIRCRAFT

THAILAND

- Fe diffusion coefficients measured at various temperatures above 1150 C to calculate homogenization times of Thailand tektite source
05 p0917 A70-16841

THALAMUS

- Cerebral histamine distribution in rat brains, noting highest concentrations in hypothalamus and thalamus
01 p0020 A70-10708

- Temporary suppression of cortical associative responses in cats with electrocoagulated thalamic relay nuclei lesions
04 p0632 A70-15220

- Thalamic N. VPL role in distributing afferent flux in anesthetized cats cortex, using stimulating contralateral sciatic nerve
07 p1199 A70-18723

- Neuron activity of cortical motor and visual regions and corpus geniculatum laterale in cats during diffuse thalamic electrostimulation combined with light signals
12 p2173 A70-28355

- Thyroxine stimuli transmission from posterior hypothalamus to cerebral cortex ascribed to dorso-medial nucleus of thalamus
16 p2848 A70-33261

- Lemniscus neurons in switching nucleus of thalamus, showing switching cells with direct cortical projections into somatosensory cortical zones
16 p2848 A70-33262

- Posterior ventral thalamic nucleus neuron reactions converging lemniscus and spinothalamic signals in cats
18 p3221 A70-36639

- Extracellular spontaneous sequences of action potentials of thalamic neurons during asphyxia in rats under artificial respiration
19 p3361 A70-38306

- Pathways of short latency reticulo-cortical responses to thalamic nuclei and hypothalamus destruction in cats
24 p4299 A70-45837

- Mesencephalic reticular formation influence on threshold stimulation of cortex, hippocampus, amygdala, thalamic nuclei and caudatum in rabbits
24 p4300 A70-45839

- Bilateral oligosynaptic interaction between posterior lateral thalamic nucleus and afferent systems in visual and acoustic cortical areas in cats
24 p4300 A70-45840

THALLIUM

NT THALLIUM COMPOUNDS

- Isotopic composition of meteoritic Tl determined in Ivigtut galena, Plainview chondrite, Canyon Diablo troilite and Canyon Diablo metal
03 p0576 A70-14091

- Plastic deformation effects on superconductivity of wire specimens of high purity Pb, In and Tl cold worked at liquid He and annealed
06 p1127 A70-18614

- Lead and thallium isotopic compositions of Apollo 11 fines compared with meteorites and earth for lunar surface age determination
21 p3775 A70-41588

- Chondrites Tl content by neutron activation analysis
21 p3921 A70-41941

THALLIUM COMPOUNDS

- Thermodynamics of electrochemical cells consisting of Li with lithium chloride or bromide and thallium amalgam with thallium chloride or bromide in propylene carbonate
01 p0042 A70-11107

THAWING

U MELTING

THEMIS PROJECT

- THEMIS source encoding systems research program to investigate inherent quantizing noise and degradation of analog to digital conversion
11 p2014 A70-26255

THEODOLITES

NT CINETHEODOLITES

- Automatic camera theodolite at Sophia satellite tracking station, discussing instrument constants
02 p0273 A70-11774

- Gyrotheodolites application to azimuth determination, discussing use for directional control, photogrammetry in geodetic measurements, etc
02 p0295 A70-11800

THEOREM PROVING

- Integral theorems for wave-type heat conductivity equation
01 p0219 A70-11398

- Structure theorem for time invariant multivariable linear systems proof and formulation for use in controller design and synthesis
03 p0461 A70-14166

- Stronger locally convex topology on space C/S/ of bounded continuous functions proved in nonagreement with strict topology on norm bounded sets
05 p0875 A70-16050

- Continuous dependence theorem and differentiability properties of free boundary problem solution for heat equation
09 p1788 A70-22609

- Theorem formulation and proof for maximal length cycle classification by weight
11 p2073 A70-26309

- Work and energy theorems in linear elasticity, discussing potential energy, real work, complementary energy and energy coefficients
11 p2142 A70-26625

- Generalized Frankl boundary value problem solution uniqueness formulation and proof using auxiliary function
13 p2390 A70-29647

- Boundedness theorem for solutions to differential equations system in applied mechanics
16 p2944 A70-34287

- Stability theorem for mechanical systems with constraint damping subjected to energy dissipation
17 p3176 A70-34956

- Limiting theorems for sums of random variables linked in Markovian chain, applying probabilistic and analytical methods
19 p3456 A70-37235

THEOREMS

NT ADDITION THEOREM

NT BAYES THEOREM

NT BERNOULLI THEOREM

NT BINOMIAL THEOREM

NT EXISTENCE THEOREMS

NT FLOUQUET THEOREM

NT GAUSS-MARKOV THEOREM

NT HELLMANN-FEYNMAN THEOREM

NT LAGRANGE SIMILARITY HYPOTHESIS

NT POYNTING THEOREM

NT RECIPROCAL THEOREMS

NT SIMILARITY THEOREM

NT STOKES THEOREM [VECTOR CALCULUS]

NT UNIQUENESS THEOREM

- Joseph theorem on parallel flow linear stability, allowing stronger limitation on amplification velocity of perturbation by using simple inequalities
13 p2464 A70-29543

THEORETICAL PHYSICS

NT BOHR THEORY

NT NEWTON THEORY

NT QUANTUM THEORY

- Collection of papers on boundary value problems of mathematical physics and related aspects of function theory, Part 1
01 p0131 A70-11066

- Splitting procedures application to steady and unsteady problems of mathematical physics and predictor-corrector method application to unsteady problems
04 p0719 A70-14959

- Soviet book on three dimensional boundary value problems in mathematical theory of elasticity and thermoelasticity
04 p0777 A70-15474

- Book on some methods of solving boundary value problems of mathematical physics covering linear operators, boundary conditions, perturbation and Monte Carlo methods
07 p1326 A70-19696

- Soviet collection of papers on mathematical physics covering natural oscillation frequencies, particles periodic motion, dynamic stability of pendulum, gyro drift during perturbations, etc
08 p1542 A70-20483

- Book on mathematical theory of electromagnetic waves covering vector analysis, reduced wave equation, linear transformations, boundary value problems and radiation patterns
08 p1533 A70-20759

- Soviet book on mathematical physics covering equilibrium equations of vibration, thermal conductance and diffusion with emphasis on Laplace equations
08 p1544 A70-20763

- Book on light and matter covering mathematical laser theory
13 p2429 A70-29574

- Book on space physics covering charged particles in magnetic, electric and dipole fields, cosmic rays, magnetically trapped radiation and interplanetary plasma
14 p2633 A70-30099

- Theory of matter from low energy data, discussing particle and charge classification, relativistic quantum dynamics, charge dynamics and superstrong reactions
14 p2620 A70-30783

- Elasticity theory in general relativity formulated from classical nonlinear three dimensional theory, discussing thermodynamics and weak field limit
15 p2774 A70-31734

- Small deformation thermoelasticity theory, discussing thermal conductivity, dynamic elasticity, strain field-temperature relationship, etc
15 p2818 A70-32177

- Maxwell equations derivation, describing assumptions needed
17 p3136 A70-35198

- Hypotheses concerning optimal methods of solving mathematical physics problems, choosing algorithms employable in digital computers
18 p3291 A70-36284

- Theoretical and applied mechanics - Conference, Tulane University, February-March 1968
19 p3543 A70-38326

- Initial value or boundary value problems in mathematical physics, solving by process of condition elimination
19 p3472 A70-38727

- Asymptotic properties of integral equations solutions for boundary value problems in theory of elasticity and mathematical physics
24 p4422 A70-45490

THERAPY

NT CHEMOTHERAPY

NT MASSAGING

NT PSYCHOTHERAPY

NT RADIATION THERAPY

- Myocardial infarction therapeutic prevention possibilities on basis of epidemiologic and dietary studies involving hypercholesterolemia and hyperlipemia in coronary disease
04 p0635 A70-15463

- Centrifuging with therapeutical device tested on male assault victim with bullet fragment floating freely in brain ventricular system
11 p1993 A70-26523

- G suit application to clinical therapeutics, noting intra-abdominal bleeding control
21 p3767 A70-40737

- Ballistocardiography and cardiovascular therapy - Conference, Oporto, Portugal, March-April 1969
21 p3762 A70-41226

THERMAL ABSORPTION

NT POLAR CAP ABSORPTION

- Space temperature determination, discussing planet or satellite absorption and radiation rate dependence on surface characteristics, solar radiation, planet albedo and thermal radiation
05 p0914 A70-16629

Multicomponent gas absorption analysis to illustrate interactions of coupled fluxes in ammonia-water system 08 p1597 A70-21028

Thermal radiation absorption in hemispherical cavity, determining apparent absorptivity for diffuse and parallel irradiation 09 p1790 A70-23565

Photoconductive and thermal IR detectors development 13 p2410 A70-29656

Laser pulse amplification by stimulated thermal Rayleigh scattering in absorbing media by transient theory 20 p3640 A70-39113

Pulse light amplification by stimulated thermal Rayleigh scattering measured as function of time, absorption coefficient and interaction length 20 p3640 A70-39114

Thermal defocusing and deflection of light beam by lateral wind effect in absorbing media 23 p4200 A70-43950

THERMAL ACCOMMODATION COEFFICIENTS

U ACCOMMODATION COEFFICIENT

THERMAL AGITATION

U THERMAL ENERGY

THERMAL BOUNDARY LAYER

Laminar boundary layer analysis of heat and mass transfer in dispersed two phase flow over heated surface 01 p0214 A70-10293

Book on flow and thermal boundary layers covering laminar and turbulent flow velocity profiles, Prandtl equation, heat transfer problems, etc 03 p0465 A70-13015

Boundary layer approximation for natural convection in flat vertical symmetrically heated channel with stabilized laminar flow for local and mean Nusselt numbers 03 p0605 A70-13395

Energy equation for thermal turbulent boundary layer on adiabatic flat plate 03 p0466 A70-13421

Karman formula generalization for turbulent motion in atmospheric boundary layer, including improved variant for thermally stable and unstable conditions 05 p0878 A70-16205

Flow disturbance calculation for heat transfer between boundary layer flows and adjacent walls modified to allow for wall attachment of thermal boundary layer 06 p1032 A70-17228

Thermal boundary layer thickness and Nusselt number approximations for heat transfer in laminar flow along flat plate with power law heat flux distribution 08 p1599 A70-21583

Heat transfer in axially symmetric laminar viscous boundary layer flow due to rotating bodies of revolution, obtaining temperature distribution 08 p1485 A70-21698

Electron temperature distribution in thermal boundary layer about probe electrodes calculated by successive approximations allowing for electron heating by arc 09 p1734 A70-22167

Boundary function of unsteady temperature field in bodies with moving surface at constant temperature calculated by least squares method 09 p1791 A70-23620

Thermal boundary layer similarity at extreme Prandtl numbers as series expansion, allowing for temperature distribution at wall 11 p2148 A70-25983

Thermal boundary layer equations solved for compressible gas at rotating axisymmetric surface with viscosity as linear function of temperature 12 p2331 A70-27698

Corona-induced thermal boundary layer breakup effects on convective heat transfer from wire electrode to surrounding gas 12 p2333 A70-28110

Unsteady heat or mass transfer to translating fluid sphere thermal boundary layer, determining analytical solution method accuracy 12 p2333 A70-28116

Transient heat transfer considered for thermal boundary layer over rotating disk following temperature change 13 p2519 A70-28493

Thermal boundary layer separation in conducting fluids by rotating magnetized blunt body 13 p2469 A70-30008

Laminar heat transfer to blunted wedge with constant wall temperature, describing energy field in boundary layer by analytic solution 15 p2825 A70-31818

Heat transfer through axially symmetric boundary layer on moving circular fiber at uniform temperature 15 p2825 A70-31819

Thermal boundary layer and heat and mass transfer at porous horizontal heated surface in presence of free convection, considering blowing and suction effects 15 p2827 A70-32133

Nonlinear dynamic stability of fluid layer heated from below in time dependent bounded domain 16 p2943 A70-34249

MHD and thermal boundary layer, considering difference scheme for conducting medium flow past body in crossed electric and magnetic fields 18 p3293 A70-36116

Free convection boundary layer on two dimensional or axisymmetric body with sudden temperature increase, determining skin friction and heat transfer coefficients 18 p3346 A70-36487

Skin friction measurement in supersonic flows by thin film heated element method, describing thermal boundary layer properties 18 p3243 A70-36710

Laminar flows with surface injection, calculating thermal boundary layer-porous wall coupling effects [ASME PAPER 70-GT-1] 18 p3243 A70-36860

Laminar thermal boundary layer at atmospheric pressure adjacent to cooled wall, measuring electron temperature and number density 20 p3737 A70-39990

Thermal boundary layer theory for turbulent jets of incompressible fluids from relationship between velocity fluctuations and temperature 20 p3614 A70-40347

Karman-Polhausen method applied to unsteady thermal boundary layer on isothermal flat plate 21 p3954 A70-42208

Dynamic nonstationary thermal convection in closed region with heat input from lateral surface for high Rayleigh and Fourier numbers 21 p3954 A70-42214

Nonstationary axisymmetric thermal convection in spherical cavity with boundary heat flux proportional to temperature, using difference scheme and networks method 21 p3954 A70-42215

Probe technique for plasma electron temperature measurements at medium and high pressures, examining thermal boundary effects 22 p4078 A70-42362

Turbulent hydrodynamic and thermal boundary layer development in internally heated annulus [ASME PAPER 70-HT-9] 22 p4008 A70-42438

Thermal boundary layer near stagnation point in three dimensional fluctuating incompressible flow, using Lighthill method 22 p4124 A70-42685

Unsteady incompressible thermal boundary layer flow past three dimensional obstacle for Prandtl numbers near unity 24 p4428 A70-45366

THERMAL BUCKLING

Nonlinear stress relation in elastic media incompatible deformations, eliminating elastic distortions for known temperature distribution and thermal distortion 01 p0201 A70-10890

Fatigue life of rocket nozzle coolant tubes under thermal cycling environmental conditions, considering design formulas for thermal buckling prediction 03 p0579 A70-12963

Flat plates thermal buckling calculations with allowance for transverse shear deformation effect, using Riessner variational principle 04 p0773 A70-15091

Thermal buckling of elliptic cylindrical shells assuming tangential temperature, constant axial pressure and conservation of elastic properties 04 p0775 A70-15203

Solid state lasers thermal resonator buckling time dependence and compensation, graphing results of resonator field analysis 07 p1303 A70-20359

Thermal buckling theory for multilayered stiffened cylindrical shells under various combined loads 12 p2321 A70-27149

Thin circular cylindrical shell stability subjected to axisymmetric thermal pulse, describing buckling process by mathematical model 18 p3342 A70-36641

Dynamic compensation of thermal pumping-induced deformation of laser active elements via thermal bending of resonator mirrors achieved by coatings 20 p3642 A70-39744

Clamped parallelogram metal plate thermal deformation under single surface radiant heating 24 p4426 A70-46009

THERMAL COMFORT

Thermal discomfort by changing operational temperature of human subjects environment found to follow power law 01 p0041 A70-11647

Comfort and thermal sensations and associated physiological responses during exercise at various ambient temperatures, noting effects on sensory estimates 01 p0031 A70-11648

Thermal comfort in disparate environments, discussing human subjects skin mean temperature and body water loss 03 p0429 A70-14158

Thermal tolerance and comfort graph for air conditioned spaces with low air velocity, considering fighter plane cockpits 08 p1454 A70-21949

THERMAL CONDUCTIVITY

Thermal diffusivity coefficient and conductivity of Cr at high temperatures determined by plane temperature wave method 01 p0117 A70-10190

Solid bodies unsteady thermal conductivity in presence of quasi-steady heat transfer under combined radiant and thermal fluxes, presenting thermodynamic nomograms 01 p0213 A70-10215

Three dimensional thermal conductivity problems solution applied to moving body, body of revolution and hollow cylinder 01 p0213 A70-10218

GeTe thermoelectric power, electrical/thermal conductivity and expansion coefficient measured at 20-600 C, determining suitability as thermoelectric material 01 p0158 A70-10755

Short sound waves propagation in moving inhomogeneous medium, studying viscosity and heat conductivity influence 01 p0146 A70-11581

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers 01 p0069 A70-11624

Mesothermal flow of collisionless plasma around conducting cylinder, calculating densities, velocities, temperatures and electrical potential [ONERA-TP-769] 02 p0346 A70-12102

Component proportion and porosity effect on fiberglass reinforced plastics properties, establishing relation between bending strength and thermal conductivity coefficient 02 p0323 A70-12814

Transparent bodies photon thermal conductivity temperature dependence 03 p0515 A70-13206

Circulation gas lens temperature distribution, considering effects of gravity, wall thermal conductivity, glass interlayer, etc 03 p0604 A70-13387

Thermal conductivity, electrical resistivity, Lorentz ratio and thermopower of aerospace alloys at cryogenic temperatures, considering Inconel, Hastelloy, Ti and Al alloys 03 p0512 A70-13807

Nonthermal heating mechanism in quiet solar wind, tabulating observed and predicted parameters 03 p0561 A70-13998

Specific heat, electrical resistivity and thermal conductivity changes in materials properties at cryogenic temperatures, noting parasitic phenomena, mechanical and dielectric properties 03 p0525 A70-14269

Finite element method applied to heat conduction in solids with temperature dependent thermal conductivity, using nonlinear constitutive equation for heat flux [ASME PAPER 69-WA/HT-34] 04 p0782 A70-14806

Kinetic theory of thermal conduction in collisionless Knudsen gas in arbitrary closed systems with various geometries, establishing similarity law [ASME PAPER 69-WA/HT-20] 04 p0783 A70-14814

Thermal conductivity and hysteresis measured in cylindrical In foil under magnetic fields at temperatures below 1 K 05 p0891 A70-15792

Laser characteristics relevant to microwelding and micromachining, discussing heat conduction based models limitations 05 p0857 A70-15999

Fillers effect on thermal conductivity in porous cermet elements, investigating powdered Ti plates with air replaced by Hg, benzene, ethanol, ether and water vapor 05 p0957 A70-16291

Relation between Fourier harmonics equilibrium distribution and bulk viscosity and second thermal conductivity established in critical regions of liquid-vapor condensation and mixing 05 p0958 A70-16550

Thermal conductivity temperature dependence measured in greases bulk and thin layers at liquid helium temperature 05 p0874 A70-16842

Thermal conductivity and aperiodic temperature distribution in microstructure of composite materials reinforced with solid and hollow fibers 05 p0958 A70-16952

Gaseous He measured for thermal conductivity along isotherms to observe pressure dependence 06 p1174 A70-17678

Thermal conductivity and diffusion-thermal coefficients analysis for nonequilibrium and highly ionized plasmas based on particle velocities 06 p1120 A70-17698

Three dimensional ablation calculated for reentry sphere-cone taking into account shape changes and internal heat conduction [AIAA PAPER 70-199] 06 p1181 A70-18150

Stellar atmospheric models thermal conductivity coefficient computation for various temperatures and pressures neglecting magnetic field

06 p1150 A70-18464

Heat flux, electrical and thermal conductivity of H measured on plasma in cascade arc chamber of high power load at 1 atm pressure

06 p1107 A70-18525

Thermal conductivity calculation for chemically reacting multicomponent gas mixture, comparing results from Brokaw method and simplified formula

06 p1184 A70-18554

Thermal diffusivity measurements for Ta-W, Ta-W-Hf, Hf-Ta-Mo alloys using pulse technique

07 p1305 A70-18960

Temperature dependence of thermal conductivity of granulated borazon powders measured in He and vacuum

07 p1319 A70-19803

Thermal conductivities and total emittance of Ta, W, Re and alloys at high temperatures compared with NBS values

07 p1313 A70-19894

Thermal conductivities of glass reinforced polystyrene and polyethylene plastics measured over range of glass concentrations and sizes

07 p1320 A70-19958

Temperature gradients, viscosity and conduction measurements in air stream between parallel plates, investigating limiting value of total Prandtl number

07 p1260 A70-19999

Thermal conductivity for organic compound gases at atmospheric pressure

08 p1597 A70-21026

Solar wind ejection, analyzing regions of heat conducting fluxes and laminar patterns

08 p1561 A70-21059

Thermal conductivity and diffusivity of two phase composites determined by iterative solution of heat conduction equation with space fluctuating properties

08 p1598 A70-21511

Metals thermal conductivity at high temperatures determined by direct electrical heating method, considering specimen geometry effects on radiation losses

08 p1497 A70-21526

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas

08 p1485 A70-21638

Silicates thermal conductivity-Debye temperature relationship from thermal conductivity and acoustic data, applying to earth conductivity measurements

09 p1665 A70-22054

Thermal conductivity of multicomponent gas mixtures obtained in higher approximations

09 p1788 A70-22317

Magnetic field and gas thermal conductivity effects in analysis of solar wind as one dimensional, steady and spherically symmetric flow

09 p1745 A70-22687

Thermal conductivity of arbitrarily inhomogeneous bodies, considering vectorial field isotropy and temperature gradients dispersion

09 p1789 A70-23103

Amorphous polymers thermal conductivity measured at 0.4-4 K, observing similar temperature dependences

10 p1906 A70-23979

Viscosity and heat conductivity effects in compressible fluid flow past finite body showing dependence on spatial dimensions

10 p1800 A70-24135

Electric current flow effect on thermoelectric figure of merit from thermal conductivity measurements on thermoelement

10 p1808 A70-25034

Thermal conductivity on coupled heat conducting rods calculated by implicit difference scheme on finite graphs

10 p1969 A70-25189

Thermal conductivity - Conference, Purdue University, October 1968

11 p2146 A70-25751

Thermal conductivity of thin metallic films and wires at cryogenic temperatures, discussing electron transport properties

11 p2083 A70-25752

Thermal conductivity coefficients of argon in 25-700 C range and up to 1200 bars pressure, using vertical concentric cylinder apparatus

11 p2147 A70-25754

Thermal conductivity of monatomic binary gas mixtures at moderately low temperatures and pressures, considering various Ar-He mixtures

11 p2147 A70-25755

Thermal conductivity of nitrogen in 350-1500 K range using hot-wire diffusion columns

11 p2147 A70-25756

Thermal conductivity of neutron irradiated copper at low temperature noting lattice defects

11 p2148 A70-25757

Thermal conductivity, electrical resistivity, Lorentz ratio and thermopower of aerospace alloys in 4-300 K range, separating electronic and lattice contributions

11 p2065 A70-25758

Thermal conductivity of argon, nitrogen and air plasmas at atmospheric pressure and 6500-16500 K range, discussing electric arc source

11 p2148 A70-25760

Thermal conductivity coefficient of metals and alloys above 1000 C by longitudinal heat flow method

11 p2065 A70-25761

Thermal conductivity of metals and alloys, separating electronic and lattice contributions

11 p2098 A70-25762

Interfacial thermal conductivity model based on statistical features of two faces in contact, discussing surface roughness and heat flow

11 p2083 A70-25763

Thermal comparator for conductivity determination, discussing probe fabrication, surface finish, sensitivity, etc

11 p2050 A70-25765

Thermal conductivity determination for charring materials by dynamic technique, with application to carbon, graphite and silica cloth phenolics

11 p2068 A70-25766

Hydrogen, nitrogen and argon electrical and thermal conductivity measured at high temperature using electric arc as plasma source

11 p2148 A70-26016

Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results

[AIAA PAPER 69-1013] 11 p2051 A70-26142

Apiezon N grease thermal conductivity at liquid helium temperatures noting behavior as insulator

12 p2258 A70-27024

Thin plates finite length effects on thermal conductivity measurement by impulse method, verifying results with n-type silicon samples

12 p2332 A70-28047

Ni and Ni alloys thermal properties, discussing expansion and conductivity, melting and boiling points, vapor pressure, specific heat, entropy, etc

13 p2432 A70-28759

Nickel chromite structural changes, thermal conductivity and dilatation during tetragonal-cubic transition, noting phonon-lattice effect

13 p2437 A70-28855

N-type Te-doped gallium antimonide conversion to p-type by electron irradiation, noting thermal conductivity variations

13 p2470 A70-29167

Fluid quantum corrections to viscosity, thermal conductivity and diffusion, expanding Wigner operator in Planck constant

14 p2665 A70-30655

Soviet monograph on thermal conductivity of plates and bodies of revolution covering temperature and stress distributions, multilayer shells, etc

14 p2666 A70-30952

Thermal and electric conductivities for interface separating two parts of system with different temperature and chemical and electrical potential

14 p2617 A70-31296

Heat conductivity of Xe-He binary gas mixtures, allowing for molecular transfer and polarity effects

15 p2827 A70-32107

Carbon-graphite porous materials thermal conductivity at various temperatures

15 p2765 A70-32141

Heat conductivity equations transformation for Cartesian and cylindrical coordinates and various boundary conditions using static electrointegrator

15 p2827 A70-32172

Thermal conductivity and shock resistance of flame and plasma sprayed zirconia coatings on Ni-Mo-C metal

[ACS PAPER 22-C-68F] 15 p2762 A70-32527

Thermal conductivity of gaseous and liquid hydrogen with guarded horizontal flat plate calorimeter, investigating temperature and density effects in critical region

16 p2996 A70-33011

Thermal conductivity of multilayer and mixed powder high temperature insulation systems over wide temperature range and vacuum conditions

[AIAA PAPER 70-637] 16 p2997 A70-33596

Minerals radiative thermal conductivity at high temperatures from IR measurement of absorption coefficient and refractive index

16 p2897 A70-33648

Effective thermal conductivity parallel to laminations of multilayer insulation as function of temperature, layer density and length

[AIAA PAPER 70-846] 16 p2999 A70-33913

Thermal conductivity along parallel radiation shields, proposing calculation method for energy transport

[AIAA PAPER 70-847] 16 p3000 A70-33914

Cryogenic multilayer insulation (MLI), comparing radiation magnitudes, gas conduction and contact solid conduction to calorimeter and tank data

[AIAA PAPER 70-850] 16 p2939 A70-33917

Contacting metal surfaces thermal conductance prediction in vacuum, formulating dimensionless parameters in terms of properties, surface measurements and load/temperature conditions of contact

[AIAA PAPER 70-852] 16 p2932 A70-33919

Nongray radiant heat transfer corrections to thermal conductivity measurements for water vapor at atmospheric pressure

16 p3003 A70-34200

Incompressible laminar boundary layer, determining thermal conductivity gradient effect on temperature profiles

17 p3070 A70-35045

Thermal conductivity of particulate basalt as function of density in simulated lunar and Martian environments, noting temperature and pressure effects

18 p3316 A70-36772

Thermal conductivity of frost, using imbedded hot-wire method

18 p3262 A70-37118

Viscosity and thermal conductivity of dilute gaseous para and normal hydrogen at various temperatures

19 p3551 A70-37710

Electrical and thermal conductivities in white dwarf stars cores and neutron stars outer layers, calculating electron-photon collisions transition probability

20 p3702 A70-39016

Molecular and noble gas rotational collision numbers from thermal transpiration measurements

20 p3738 A70-39995

Liquid and solid semiconductors thermal emf and electrical and heat conductivities measurement over wide temperature range

20 p3634 A70-40300

Dry and water-saturated sintered fiber metal wick thermal conductivity, obtaining semiempirical correlations for solid and fluid phases and void fraction

21 p3945 A70-41041

Apollo 11 rocks IR absorption properties, specific heat and thermal conductivity, discussing heat flow in surface layer

21 p3913 A70-41642

Apollo 11 fines thermal conductivity under vacuum, using line heat source technique

21 p3913 A70-41647

Apollo 11 lunar specimen thermal diffusivity, conductivity and inertia in breccias and crystalline igneous rocks measured over wide temperature range

21 p3916 A70-41663

Approximate calculations of thermal and viscous transport in high temperature air based on empirical transport equations

21 p3951 A70-41750

Gases interaction with ablator and components during thermal conductivity, measuring nitrogen, helium, carbon dioxide and water sorption

21 p3951 A70-41873

Direct electrical heating for high temperature thermal conductivity measurements of pure W, giving results for graphite

21 p3850 A70-42057

Amorphous and partly crystalline polymers low temperature thermal conductivity and heat capacity

21 p3844 A70-42136

Thermocouple transient response characteristics in deflagrating and ablative low conductivity materials with high temperature gradients

[ASME PAPER 70-HT-7] 22 p4122 A70-42440

One fluid solutions for solar wind with reduced electron heat conduction in agreement with observed characteristics at corona base

22 p4093 A70-42472

Variational formulation for steady and transient heat conduction with variable thermal conductivity, applying to cylindrical element

22 p4123 A70-42546

Heat conduction into semiinfinite homogeneous solid with thermal conductivity dependence on temperature, noting temperature profile asymptotic behavior for similarity solution

22 p4123 A70-42641

Ultrasonic absorption in gaseous molecular relaxation processes, considering error due to neglecting thermal conductivity effect on frequency dependence

22 p4073 A70-42649

Ti phase transformation effects on thermal conductivity, electrical resistivity and spectral and total emittances at 1100-1500 K

22 p4056 A70-43222

Thermal relaxation effect on thermal contact of two semiinfinite walls, showing existence of dynamic contact resistance

22 p4125 A70-43243

Cylindrical wall nonstationary heat conduction for time variable heat transfer coefficient

22 p4125 A70-43358

Nonlinear unsteady thermal conductivity problems linearization based on temperature substitution by integral analogs

22 p4125 A70-43370

Terrestrial and synthetic lunar igneous rocks thermal conductivities in melting range, discussing thermal gradient

23 p4238 A70-43804

Thermal conductivity coefficient calculation by multiple temperature measurements of plate-shaped sample, using iteration process

23 p4276 A70-44166

Thermal conductivity of water, toluene and benzene in coaxial cylinders, taking into account edge heat losses 23 p4276 A70-44216

Thermosphere diurnal thermal influx theory, allowing for heat conductivity 23 p4214 A70-44265

Thermal calibration errors and sensitivity equations for hot-wire anemometers 23 p4195 A70-44288

Approximate method for solving thermal conductivity first boundary value problem via reduction to auxiliary Cauchy problem solved by Laplace transform and power series 23 p4277 A70-44339

Guarded electrical cylindrical calorimeter measuring multilayer insulation thermal conductivity, discussing construction, test and error 23 p4195 A70-44366

Closed cell polyurethane foam for cryogenic insulation, determining thermal conductivity and net heat flow by analytical model and test 23 p4280 A70-44367

Hg vapor thermal conductivity at various temperatures, using fine wire frequency response and kinetic theory 23 p4281 A70-44428

Compressibility, viscosity and thermal conductivity of dense gases, examining high temperature and pressure effects 23 p4222 A70-44431

Temperature distribution and thermal conductivity determination in Ar plasma cascade arc 23 p4226 A70-44438

Apollo 11 lunar fine thermal conductivity measurement under vacuum conditions and lunar temperature range, using line heat source method 23 p4243 A70-44442

Thermal and electrical conductivities of zirconium and hafnium diborides polycrystalline powders at 300-1300 K 23 p4209 A70-44443

Neutron star crust conductivity, obtaining electrical conductivity formula for outer kilometer 24 p4403 A70-45394

THERMAL CONDUCTORS

Surface constitutive assumptions restrictions for rigid heat conductor, accounting for radiative heat supply 24 p4429 A70-46032

THERMAL CONVECTION

U FREE CONVECTION

THERMAL CURRENTS

U CONVECTIVE FLOW

THERMAL CYCLING TESTS

Cost-effective look at vacuum testing of spacecraft components, noting sensitivity prediction and thermal cycle test 01 p0055 A70-10113

Flip chip and beam lead methods for microcircuit assembling, discussing heat removal using heat spreader and temperature cycling effects on tensile strength 01 p0050 A70-10330

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects 02 p0383 A70-11653

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number 02 p0383 A70-11654

Fatigue life of rocket nozzle coolant tubes under thermal cycling environmental conditions, considering design formulas for thermal buckling prediction 03 p0579 A70-12963

Electro-pyrotechnic initiators for space applications subjected to dry heat sterilization cycles and to post-sterilization mechanical and electrical environments 03 p0495 A70-14131

Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling 04 p0628 A70-15333

Radial bond stresses in case/liner bond line of full-scale rocket motor measured, describing instrumentation, motor design and thermal cycling test sequence [ALAA PAPER 68-510] 04 p0736 A70-15407

Postweld heating cycle for circular patch test to predict strain age cracking susceptibility in welded Rene 41 04 p0700 A70-15654

Refractory Ni alloys defects accumulation under creep and cyclic temperature variations assessed by relative lifetime additive method 05 p0866 A70-17032

Low cycle fatigue of alloy and steel materials under bending and cyclic heating, relating strains and number of cycles to failure 05 p0866 A70-17036

Thermocyclic creep and rupture strength of Nb, Ta and Mo refractory alloys under temperature and load variations, showing failure dependence on cycle parameters 05 p0867 A70-17043

Scale factor effect on crack development in blanks and structure elements undergoing linear and complex stressed states under cyclic thermal loads 05 p0867 A70-17045

Gas turbine blades thermal fatigue strength under simultaneous temperature cycles and static tensile loads, analyzing temperature and stress fields 05 p0953 A70-17053

Temperature cycle duration effects on heat resistant alloys thermal fatigue resistance, noting stress relaxation occurrence 06 p1085 A70-17398

Steel tube deformation under constant internal pressure and cyclic heating, plotting tangential and axial strain curves as function of cyclic loading 06 p1163 A70-17399

Structures elastic-plastic behavior under changing cyclic heating, calculating long time strength from linear damage accumulation assumptions 06 p1164 A70-17405

Adverse effects of temperature and strain rate on low cycle fatigue resistance of austenitic stainless steels at elevated temperatures compared with tension tests 06 p1086 A70-17452

Refractory Nb alloy low cycle fatigue characteristics in vacuum at high temperatures, describing testing machine 06 p1086 A70-17453

Creep deformation resistance decrease in pure Al tubular specimens at high temperatures under multiple stress reversals 06 p1087 A70-17456

Elevated isothermal and low cycle thermal fatigue of Hastelloy X, investigating test temperature, cycle frequency and stress temperature effects 06 p1087 A70-17457

Thermal fatigue cracks in gas turbine blade models under simultaneous thermal cycling and static tensile loads simulating pulsed regimes 06 p1166 A70-17652

Weldability of super alpha high creep strength Ti alloy investigated by synthetic heat affected zone method using thermal cycling tests 06 p1090 A70-18501

Thermal fatigue resistance of steel to copper weldments under thermal cycling, noting intergranular crack growth accompanied by oxidation along crack boundaries 06 p1078 A70-18515

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens 07 p1309 A70-19710

Subboundary migration in Mo, W and W-Re alloy single crystals subjected to cyclic heating, using metallographic technique involving electrolytic polishing and special etching 09 p1701 A70-22297

Cyclic heating and thermal stresses effect on fatigue strength and durability of turbine blade alloys and structural elements 09 p1771 A70-22463

Turbine components design for low cycle fatigue, estimating thermal cycle number for high temperature crack initiation and propagation 09 p1774 A70-22583

Thermal fatigue cycle produced by cooled gas turbine blades, using stress-strain tests and thermal simulation 09 p1655 A70-22585

Turbines rotary shafts and stationary components thermal fatigue analysis, considering cycle numbers and stress concentrations under start-up, continuous operation and shut-down 09 p1775 A70-22593

Microorganisms survivability in soils near spacecraft assembly areas during simulated Martian freeze-thaw cycles 09 p1619 A70-22768

Thermal cyclic loads effects on heat resistant materials strength during strain hardening, considering role of time factors in durability 09 p1779 A70-23104

Plastic strains buildup during thermal cycling, establishing relation between strain interval and cycles number to failure for strain hardening materials 10 p1965 A70-25293

Heat resistant alloys low cycle fatigue tests between 20-800 C, establishing residual strain change patterns as function of stress and temperature 10 p1906 A70-25294

Welding techniques for Nb-stainless steel bimetal tubing for liquid metal containment, determining structural integrity and bond interface condition after thermal cycling 10 p1897 A70-25309

Temperature cycling through phase transformation effects on plastic deformation of Ti and Ti-Al-V alloy under torsion and tension 17 p3117 A70-34400

Creep testing machine with constant load for HF thermal cycling under vacuum 17 p3063 A70-35587

Chromium-nickel steel fatigue strength under repeated thermal cycles, showing dependence on long term fatigue buildup and single cycle fatigue damage effects 19 p3547 A70-38426

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number 19 p3547 A70-38427

Cyclic thermal loading in viscoelastic spherical and cylindrical pressure vessels, investigating thermal frequency effect 21 p3937 A70-41430

Vacuum-melted and deformed Mo alloys tests, showing long term strength decrease under cyclic heating 22 p4055 A70-43123

Avionic components reliability, determining non-steady cooling air environment effects 23 p4175 A70-44744

Pure Al thermal cycling tests, investigating effect of minimizing thermal stress during quenching on behavior of dislocations 24 p4360 A70-45518

THERMAL DECOMPOSITION

U PYROLYSIS

THERMAL DEGRADATION

Radiator selection for manned spacecraft, considering thermal coating degradation, structural design, micrometeorite protection, plume impingement, reliability and fabrication 01 p0215 A70-10631

Polymeric materials thermal degradation kinetic parameters using combined mass spectrometric and thermogravimetric analysis /MS-TGA/ 11 p2069 A70-25806

Saturation of self induced thermal lens resulting from thermal distortion of carbon dioxide laser radiation in wind 11 p2063 A70-26401

Glass- and quartz-fabric reinforced polymers for high temperature microwave insulation, evaluating electrical and thermal aging properties 12 p2259 A70-28149

Teflon and fluropolymers relative toxicity due to thermal degradation at 370 C, testing carboxy nitroso rubber, Kapton polyimide film, perfluorated polymers, etc 13 p2439 A70-29260

Thermal degradation of anhydride-cured epoxy resin by carbon dioxide laser heating through platinum crucible 15 p2695 A70-32828

Optical resonator thermal deformations during pumping of circular cylindrical interferometer rods in illuminators, measuring thermo-optical constants of neodymium glass 15 p2754 A70-32863

Thermal design of hybrid microelectronics modules, considering resistance, assembly, joining, encapsulation and final packaging 16 p2879 A70-33957

GaAs laser diodes thermal degradation, observing nature, extent and occurrence of permanent damage 19 p3446 A70-37818

Toxicity problems from burning or heating of polymeric materials, discussing laboratory experiments and standardized toxicity testing procedures 20 p3579 A70-39406

Plate temperature field and stress distribution under thermal pulses, evaluating critical heat load for damage 20 p3737 A70-39635

Thermally induced mirror deformations and wavefront distortions under radially nonuniform heating 21 p3942 A70-40806

Copper disulfide-cadmium sulfide thin film solar cell degradation under simulated low orbit conditions, investigating thermal stress 21 p3759 A70-41313

Nondestructive tests of work-hardening Al alloy structural deterioration due to overheating, using eddy current conductivity techniques 24 p4345 A70-45703

Apollo 11 deployed solar cells, investigating degradation of surface properties and thermal control due to lunar module ascent effects 24 p4295 A70-46262

THERMAL DIFFUSION

Coupled diffusion of heat and vorticity in gaseous vortex caused by radial mass convection and temperature dependence of gas properties 02 p0400 A70-12858

Variational equation describing thermal diffusion in solid body undergoing deformation 03 p0589 A70-13348

Titanium alloys case hardened by diffusion of various metals at high temperatures, measuring increase in wear resistance 03 p0513 A70-13858

Book on rational thermodynamics covering homogeneous processes, internal dissipation, Coleman theorem, wave propagation in dissipative materials, diffusion, chemical reactions, Onsager relationship, etc

03 p0525 A70-14042

Fe diffusion coefficients measured at various temperatures above 1150 C to calculate homogenization times of Thailand tektite source

05 p0917 A70-16841

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions

07 p1365 A70-19706

Thermal conductivity and diffusivity of two phase composites determined by iterative solution of heat conduction equation with space fluctuating properties

08 p1598 A70-21511

Error analysis of Barakat-Clark explicit heat diffusion equations for thermally insulated surface

08 p1600 A70-21831

Electrons thermodiffusion and energy transport coefficients in noble gases at mean reduced electric field intensities, obtaining distribution functions

11 p2089 A70-25868

Ion temperature gradient along magnetic field lines in outer plasmasphere by thermal diffusion equations compared with electron temperature observations

11 p2047 A70-26568

Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers

12 p2210 A70-27322

Critical loads for brittle bodies weakened by sharp holes under combined diffuse thermal fluxes and crack crossing

12 p0000 A70-28321

Residual stresses in cylindrical shell made of two component solid solution under thermal diffusion

12 p2329 A70-28323

Thermal diffusion effects on F 2 region ion densities, deriving diffusion coefficients for partially ionized atomic oxygen plasma

13 p2398 A70-29232

Radiating drop unsteady vaporization or growth for uniformly distributed internal heat sources, discussing gas temperature distribution and diffusion thermal effect

13 p2521 A70-29417

Transport cross sections for isotopic methane and mixtures, considering inelastic and thermal diffusion effects

14 p2665 A70-30652

Variational equation describing thermal diffusion in solid body undergoing deformation

14 p2657 A70-30722

Invariant imbedding application to solution of partial differential equations by continuous-space discrete-time (CSDT) method, discussing time dependent heat diffusion

16 p2942 A70-33735

Ti alloys thermodiffusion impregnation with rarefied nitrogen and oxygen plasma, determining optimal gas pressure and temperature conditions and magnetic field frequency effects

17 p3101 A70-35391

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

17 p3125 A70-35404

Baron thermal diffusion effects on plastic of pure Mo subjected to recrystallization

17 p3102 A70-35408

Thermal diffusion of isotropic, nonisotropic and multicomponent mixtures with monatomic and polyatomic molecules, considering kinetic theory and experimental results

17 p3197 A70-35537

Fluxless paste for thermodiffusion calorizing stainless and heat resistant steels and alloys

19 p3434 A70-37459

Ti alloys fine structure, mechanical properties and alloying elements diffusion mobility during heat treatment, observing chemical and structural inhomogeneities

20 p3645 A70-39040

Lithium-diffused silicon, investigating heat treatment and electron irradiation effects on electrical resistivity at high temperatures

20 p3687 A70-40164

Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers

21 p3811 A70-42063

Cu-Ni diffusion couples voids and edges effect on concentration gradients measurement by electron probe microanalysis

22 p4054 A70-42740

Convective diffusion limited oxidation of Mo, measuring kinetics up to 2000 K by rotating disk method

24 p4358 A70-45233

Nonlinear distributed sources induced diffusion, calculating relationship between source intensity and maximum temperature or mass concentration field

24 p4380 A70-46034

Fe-Cr alloy powders obtained with thermodiffusive saturation from point sources, determining optimal mixture compositions and parameters

24 p4350 A70-46338

THERMAL DIFFUSIVITY

Refractory and heat resistant materials thermal diffusivity coefficient, discussing theoretical basis and technical implementation for measurement at high temperature

01 p0085 A70-10178

Thermal diffusivity coefficient and conductivity of Cr at high temperatures determined by plane temperature wave method

01 p0117 A70-10190

Diffusive transport term in hydrodynamic equations describing flow over strongly ablating entry objects, discussing charge separation and pressure diffusion

03 p0405 A70-12926

Heat conduction equation containing diffusivity coefficient as Stefan type function

05 p0958 A70-16867

Thermal diffusivity of opaque materials by phase shift method, using modulated radiation beam from carbon arc to heat material

11 p2068 A70-25767

Thermal diffusivity of elements over wide temperature ranges based on TPRC recommended thermal conductivity and specific heat

11 p2065 A70-25770

Apollo 11 lunar specimen thermal diffusivity, conductivity and inertia in breccias and crystalline igneous rocks measured over wide temperature range

21 p3916 A70-41663

Directional emissivity and thermal diffusivity of solids at 1000-3000 K by radiation comparison method, applying to sintered and plasma sprayed Mu, Ta and W

23 p4207 A70-44661

THERMAL DISSOCIATION

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings

01 p0042 A70-11583

State equation for entropy of dissociated air with enthalpy and pressure as independent variables for calculating gas dynamic processes on computers

10 p1966 A70-23839

Thermal dissociation kinetics in chlorine pentafluoride over high temperature range

11 p1994 A70-25823

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios

[AIAA PAPER 69-420]

13 p2473 A70-28507

Vapor pressures and dissociation energy of yttrium dicarbide and tetracarbide over extended temperature, measured by Knudsen double focusing spectrometer

16 p2858 A70-34015

Thermal dissociation mechanism of diatomic molecules in inert diluent behind shock wave, assuming distribution function described by Fokker-Planck equation

18 p3292 A70-36242

Quartz- and silicate-graphite mixtures carbothermal reduction in vacuum at 1400 C

20 p3583 A70-40425

Laser torch plasma dispersion gas dynamics from motion and kinetics of ionization processes

21 p3839 A70-42238

Thermal separation of ortho and para hydrogen and deuterium, discussing kinetic theory of nonspherical molecules in terms of rotational collision numbers

22 p3983 A70-43154

Thermodynamic equilibrium analysis of metal oxidation and thermal dissociation of oxides in vacuum, noting decreased affinity by evaporation

24 p4361 A70-45835

THERMAL EFFECTS

U TEMPERATURE EFFECTS

THERMAL EFFICIENCY

U THERMODYNAMIC EFFICIENCY

THERMAL EMISSION

NT THERMIONIC EMISSION

Local thermal emission from Jupiter at 5 microns, discussing North Equatorial Belt and atmospheric transparency

01 p0173 A70-10043

Thermal emission of inhomogeneous plasma sphere having dielectric constant as function of radius

01 p0149 A70-10164

Geophysical parameters of atmosphere and underlying surfaces from outgoing thermal radio emission measurements on Cosmos 243 satellite

07 p1261 A70-18724

Atmospheric integral moisture content determination from thermal radio emission measurements by Cosmos 243 satellite

07 p1329 A70-19649

F corona heliocentric dust cloud model to account for temperature variations with particle size and optical properties, computing thermal emission

08 p1571 A70-20907

Solar meter wave emissions enhancement or emission centers, comparing radio and optical coronal enhancements

08 p1576 A70-21402

Thermally emitted photons of atmospheric molecules and aerosols and planetary surface followed by Monte Carlo method, using anisotropic single scattering functions

09 p1719 A70-23524

Thermal emission of inhomogeneous plasma sphere having dielectric constant as function of radius

10 p1925 A70-25012

Nonisothermal dielectric coating on conductor surface, analyzing temperature distribution effect on thermal emission characteristics

11 p2148 A70-25975

Microwaves reflection, absorption and thermal emission at smooth air-water interface, tabulating calculated coefficients

12 p2183 A70-27169

Materials absorption coefficients determination at high temperatures based on spectrophotometric analysis of emission from samples of different thicknesses

12 p2331 A70-27305

Lunar surface brightness temperatures from IR observations, determining thermal emission directional characteristics to infer surface temperatures from Surveyor data

[AIAA PAPER 69-593]

13 p2486 A70-28501

Lunar horizontal and inclined surfaces net radiation and components, discussing surface temperature, thermal emission and absorbed solar radiation

14 p2634 A70-30194

Lunar surface thermal emission spectra, calculating IR emissivities

14 p2637 A70-30495

Lunar surface thermal emission spectra based on laboratory analysis of rocks and minerals emissivity

14 p2637 A70-30496

Lunar remote probing by IR and microwave thermal emission and by radar

14 p2644 A70-31056

Thermal radio emission from major planets at mm and cm wavelengths and at decimeter wavelengths for Jupiter and Saturn

14 p2648 A70-31084

Sea surface temperature and atmospheric moisture determination from satellite measurements of atmospheric thermal radio emission on quiet and cloudy windy days

15 p2770 A70-32069

Nitrogen dioxide continuous visible emission under thermal and recombination excitation, examining spectral characteristics

19 p3374 A70-38267

MOS field effect transistor, measuring electrons and holes thermal emission rates and activation energies at gold centers in Si

22 p3997 A70-43016

Thermal emission cathodes made from lanthanum, yttrium and gadolinium hexaborides, measuring I-V characteristics

22 p3998 A70-43442

Earth and atmosphere thermal emission spectra via Nimbus 4 Michelson interferometer, obtaining atmospheric temperature, humidity and ozone profiles

23 p4192 A70-44866

H II region dust grains thermal emission, examining effect on diffuse nebulae

24 p4413 A70-46158

Albedo and thermal emission of Jovian satellites I-IV at 3 to 12 micron wavelengths

24 p4413 A70-46171

THERMAL ENERGY

Solar energy absorbers and thermal storage devices for high temperature energy conversion to electric power by thermionic or thermoelectric method

01 p0010 A70-10764

Thermal energies and angular momenta of Hubble galactic sequence using differential rotation and decreasing density stellar system model to test stellar evolution theories

02 p0376 A70-12447

Mechanical losses in fiberglass reinforced textolite converted into thermal energy during cyclic tension and compression

02 p0323 A70-12807

Conservation equation for thermal energy in turbulent shear flow, including turbulence kinetic energy equation terms

[WSCI PAPER 69-43]

06 p1179 A70-17983

Nozzle source design for high intensity thermal energy molecular beam with small dispersion in velocity suitable for scattering experiments

11 p2086 A70-25973

Neutral molecule-solid surface interactions mass spectrometric techniques for measuring molecular flux and mean thermal energy after interaction

12 p2181 A70-27257

Lunar two cycle interior thermal history influence on maria and crater morphology, noting active and passive phase roles

12 p2311 A70-28302

Heat energy transport mechanism in metallic plasma deposited coating, investigating role of elastic crystal lattice vibrations, electrons, molecules, etc

13 p2419 A70-28858

Energy balance in radiation detector cooling, analyzing refrigerator capacity and thermal load

13 p2412 A70-29870

Solar, nuclear, chemical and thermal energy sources for short and long duration exploration on moon

14 p2634 A70-30195

Intensity and velocity distributions of thermal energy argon atoms scattered from silver /111/ face, using time of flight methods

16 p2953 A70-33007

Thermal product distributions and energy dependencies of ion-molecule reactions in allene and propyne, using ion cyclotron resonance

16 p2856 A70-33651

Stellar thermal and vibrational energy losses due to URCA shells in interiors

18 p3310 A70-35935

Thermal release profiles and retention coefficients of injected argon ions for silicates and iron simulating meteoritic materials

19 p3474 A70-38601

Hydrogen negative ion thermal energy reactions with oxygen, nitric oxide, carbon monoxide and nitrous oxide, determining rate constants

20 p3583 A70-39616

Vacuum distillation vapor filtered catalytic oxidation water recovery system, using radioisotopes for thermal energy supply

21 p3769 A70-40994

Space systems and thermal technology - ASME Conference, Los Angeles, June 1970, Part 2

21 p3942 A70-41014

Thermal energy conversion into coherent laser light, examining various thermodynamic limitations

22 p4076 A70-43674

Diurnal variations of photoelectron heat fluxes and energy production by thermal coupling between upper F 2 region and magnetosphere

24 p4328 A70-45354

THERMAL ENERGY STORAGE

U HEAT STORAGE

THERMAL ENVIRONMENTS

Thermal and pressure environments analysis in Saturn S-IC stage base during flight tests, noting base gas flowfield and heating

01 p0195 A70-10833

Thermal discomfort by changing operational temperature of human subjects environment found to follow power law

01 p0041 A70-11647

Plume-induced flow separation effect on thermal environment using Saturn 5 film and instrument data, attributing heating rate increase to recirculated exhaust gases

[ASME PAPER 69-WA/HT-18] 04 p0761 A70-14815

High temperature coatings in industrial, military and space applications, noting use in metal melting and working, furnace protection, propulsion systems, rocket engines, etc

04 p0709 A70-15630

Thermal testing of planetary lander vehicle in vacuum chamber, modeling electronics modules and experiments using resistance heaters

[AIAA PAPER 70-222] 06 p1157 A70-18128

Wind tunnel tests for aerodynamic and thermal environment of hypersonic glider VERAS /Vehicle for Experimentation and Research in Aerothermodynamics and Structures/

07 p1187 A70-18981

U.S., U.S.S.R. and European space environment simulation chambers accommodating assembled spacecraft for thermal tests, describing design and characteristics

07 p1249 A70-19659

Fatigue tests to relate boron-epoxy laminate fatigue behavior to thermal preconditioning environments

07 p1320 A70-19960

Bonds strength involving metallic, organic and ceramic adhesives at various temperatures, considering metallic additives effect

08 p1504 A70-20891

Airborne real time IR imagery of thermal anomalies for geophysical exploration of water resources

09 p1674 A70-22262

Lunar internal temperature approximation correcting solution of heat conduction equation for moon thermal histories

09 p1753 A70-22385

Heat accumulation, oral temperature and heart rate recovery of subjects in various thermal environments

10 p1810 A70-24034

Environmental thermal stress effect on human performance under high mental and low physical workload

10 p1812 A70-24505

Book on thermal environmental engineering covering refrigeration, psychometrics, solar radiation and heat transmission in buildings

12 p2163 A70-26865

U.S., U.S.S.R. and European space environment simulation chambers accommodating assembled spacecraft for thermal test, describing design and characteristics

15 p2718 A70-32696

Fluid mechanics and engine dynamics and start-up experiments simulating thermal environment in nuclear light bulb engine

16 p2949 A70-33552

Ablative materials performance in high radiative heat flux environments produced by CW carbon dioxide laser

[AIAA PAPER 70-864] 16 p2939 A70-33907

Lunar surface radiative balance and thermal environment measurement by portable meteorological station, considering lunar environment peculiarities for instruments design

19 p3514 A70-37631

THERMAL EXPANSION

NT THERMAL BUCKLING

Structural efficiency of composite tube columns with zero axial coefficient of thermal expansion, discussing three dimensional and planar fiber arrays

01 p0126 A70-10120

Elastic properties of thin curved cylindrical panels with constant mechanical properties subjected to thermal expansion and single face pressure

01 p0201 A70-10943

Structural orientation and defects in graphitized coke crystallites, establishing relation between thermal expansion coefficient and macrostructure

03 p0514 A70-12868

Long thin cylindrical tube with circumferential restraint analyzed for thermal expansions, obtaining maximum strains, bending moments, shear forces and plastic zone extent

[ASME PAPER 69-WA/NE-7] 04 p0768 A70-14756

Density, refractivity, thermal expansion coefficient, softening point and soaking stability for glass containing barium, lead, boron, bismuth and titanium oxides

05 p0871 A70-16594

Titanium and zirconium dihydrides room and higher temperature electrical resistivity, Hall effect and thermal expansion coefficients

08 p1517 A70-21149

Temperature increase effects on fully turbulent boundary layers at low Reynolds number in air investigated in wind tunnel

08 p1485 A70-21606

High temperature vacuum dilatometer for continuous photographic recording of expansion curves for refractory materials, determining thermal expansion coefficient

09 p1675 A70-22565

Composite materials macroscopic thermoelastic properties relationships to constituents properties, discussing effective thermal expansion coefficients and specific heats

09 p1703 A70-22682

Rapid guiding system for high resolution astronomical observations using thermal expansion of electrically conducting wires

09 p1721 A70-22741

Deuterium plasma expansion resulting from thermal shock produced by laser impulse

10 p1923 A70-24526

Thermal imaging device adaptable to IR, microwave or ultrasound radiation, projecting image on heat sensitive surface

11 p2050 A70-25643

Ni and Ni alloys thermal properties, discussing expansion and conductivity, melting and boiling points, vapor pressure, specific heat, entropy, etc

13 p2432 A70-28759

Free jet expansions in molecular beam sampling systems, using Sherman equations and chemical kinetic equations

[WSCI PAPER 70-12] 13 p2389 A70-29608

Composite cylindrical laser rods end region stress and optical pathlength change with thermal expansion or contraction between core and cladding

13 p2429 A70-29703

Specific heat, thermal pressure and molar volume of liquid krypton measured with adiabatic calorimeter, discussing thermal expansion coefficients

14 p2617 A70-31016

Gravitational atmosphere thermally driven motions, noting expansion towards lower density regions in solar chromosphere

15 p2804 A70-32619

Cobalt binary alloys allotropic transformation and thermal expansion at various temperatures

18 p3271 A70-35967

Automatic dilatometers for volume variations in steel and Co-W alloy during aging and heat treatment, noting microstructural changes

18 p3257 A70-36202

Thermal expansion anisotropy in graphite-epoxy composites causing residual stresses

[ASME PAPER 70-GT-129] 18 p3279 A70-36855

Microelectronic packages encapsulation by resin systems with emphasis on thermal expansion, discussing effects of curing temperature, reactive diluents, etc

20 p3655 A70-39444

Thermal stress and changes in modulus of elasticity and expansion coefficient effects on dynamical properties of turbine disks at high temperatures

20 p3721 A70-39783

Lattice parameter and thermal expansion of AlAs as function of temperature, indicating lattice match at 900 C with GaAs

22 p4086 A70-43004

Materials for glass-metal compressed joints, tabulating stress and thermal expansion coefficients

22 p3999 A70-43447

Allotropic transformation points and linear thermal expansion coefficients of Co-base binary alloy terminal solutions, using dilatometric method

23 p4203 A70-43864

Spacecraft thin walled tubular booms thermal curvature time constants in relation to solar induced despin of satellites

23 p4258 A70-44521

Circuit design providing thermal compensation for atmospheric pressure sensor, using mercury barometer

24 p4340 A70-46403

THERMAL FATIGUE

Fatigue tests results parametric representation for nickel base alloys tested at various temperatures and times to failure

04 p0707 A70-15264

Thermal stress and thermal fatigue data for utilization in design problems

05 p0932 A70-16161

Gas turbine blade material properties change effect on thermal fatigue strength after long term heating

05 p0864 A70-16700

Deformation and failure of refractory metals at high temperatures under constant and variable thermal loads concerning turbomachine components

05 p0865 A70-17027

Refractory materials deformation and failure analysis based on relations between stresses, strains and irreversible energy absorption per cycle in thermal cyclic fatigue testing

05 p0867 A70-17042

Scale factor effect on crack development in blanks and structure elements undergoing linear and complex stressed states under cyclic thermal loads

05 p0867 A70-17045

Nickel-based alloys small cycle thermal and mechanical fatigue limit during tensile stresses and operational temperatures, analyzing fatigue curves

05 p0867 A70-17046

Gas turbine blades thermal fatigue strength under simultaneous temperature cycles and static tensile loads, analyzing temperature and stress fields

05 p0953 A70-17053

Test stand design and automatic recording of turbine blade fatigue test data, including statistical evaluation

05 p0953 A70-17054

Steel elements failure during nonstationary thermal fatigue with varying strain and temperature, discussing linear damage accumulation theory

06 p1163 A70-17397

Temperature cycle duration effects on heat resistant alloys thermal fatigue resistance, noting stress relaxation occurrence

06 p1085 A70-17398

Structures elastic-plastic behavior under changing cyclic heating, calculating long time strength from linear damage accumulation assumptions

06 p1164 A70-17405

Thermal fatigue cracks in gas turbine blade models under simultaneous thermal cycling and static tensile loads simulating pulsed regimes

06 p1166 A70-17652

Thermal fatigue resistance of steel to copper weldments under thermal cycling, noting intergranular crack growth accompanied by oxidation along crack boundaries

06 p1078 A70-18515

Cylindrical Mo single crystals during cyclic heating, studying characteristic dislocation changes at various stages of thermal fatigue

07 p1308 A70-19609

Coffin method for thermal fatigue testing noting deficiencies in determining plastic strain, temperature distribution and tubular specimens durability characteristics, etc

09 p1701 A70-22298

Thermal and high strain fatigue covering cyclic tests, crack initiation and propagation, stress-strain behavior, structural design, frequency and temperature effects, etc

09 p1773 A70-22576

Multiaxial thermal fatigue cracking in carbon steels predicted by elastoplastic stress-strain analysis using finite element method

09 p1773 A70-22578

Turbine components design for low cycle fatigue, estimating thermal cycle number for high temperature crack initiation and propagation

09 p1774 A70-22583

Thermal fatigue cycle produced by cooled gas turbine blades, using stress-strain tests and thermal simulation

09 p1655 A70-22585

Turbines rotary shafts and stationary components thermal fatigue analysis, considering cycle numbers and stress concentrations under start-up, continuous operation and shut-down

09 p1775 A70-22593

High temperature fatigue crack growth in metal, suggesting condensation of vacancies at crack front after each loading cycle

09 p1776 A70-22644

Heat resistant materials strength characteristics with long service periods, formulating equation for time dependence of rupture resistance

10 p1903 A70-24237

Uniaxial low cycle thermal fatigue test procedure for ductile metals, describing strain measuring system allowing direct recording of load vs mechanical deformation

11 p2034 A70-26615

Gas turbine blade materials investigated for effect of prolonged heating on mechanical properties and thermal fatigue strength

13 p2434 A70-28994

Thermal fatigue cracking of gas turbine blades in fuel combustion product flow, investigating surface composition, microhardness and structure under simulated loads

19 p3490 A70-37338

Steels thermal fatigue in testing machine, investigating strains and stresses due to nonuniform temperature distribution during thermal cycle

21 p3840 A70-41433

THERMAL INSTABILITY

Protogalaxy mass limits determined for galactic formation by thermal instability due to radiative cooling and followed by nonlinear gravitational contraction

04 p0744 A70-14469

Thermal instability of uniformly rotating self gravitating homogeneous medium with perturbations in plane perpendicular to rotation axis

04 p0745 A70-14471

Unsteady inverse heat conduction of semibounded body solved by least squares method

06 p1178 A70-17856

Unsteady calorimetric sensor for measurement of heat transfer between gas jets and solid targets

06 p1064 A70-17857

Electromagnetic wave instability propagating across static magnetic field in presence of thermal anisotropy, considering interplanetary plasma and plasma devices stability

08 p1553 A70-21610

Radiative transfer effect on thermal instability and critical Rayleigh number in gray transparent fluid layer heated from below

10 p1967 A70-23952

Optimization in epihydrostatics and epihydrodynamics, discussing liquid in rectangular tank, electro-magneto-epi hydrodynamics and thermal instability

10 p1866 A70-24108

Stellar evolution in globular clusters, considering H-R diagrams of age, He abundance and thermal instability

16 p2973 A70-33076

Interstellar gas thermal instability under cosmic ray heating, investigating perturbations causing transition to dense cool phase in pressure equilibrium with intercloud phase

18 p3309 A70-37003

THERMAL INSULATION

Thermoelectric-couple life tests and efficiency measurements at constant thermal input, noting insulation for limiting parasitic heat losses [ASME PAPER 69-WA/ENER-14]

04 p0731 A70-14896

Reentry body aerodynamic heating and thermal insulation system design, discussing analytical procedure taking into account complex geometrical configurations

04 p0616 A70-15186

Multilayer insulation blankets with slits normal to energy transfer direction for thermal control of spacecraft and cryogenic tankage [AIAA PAPER 70-15]

06 p1156 A70-18076

Thermal isolation characteristics of interstitial materials in vacuum environment, inserting materials between contacting metal surfaces at various pressures and temperatures

06 p1181 A70-18143

Insulation materials selection for Martian soft lander to meet mission environmental conditions based on tests [AIAA PAPER 70-11]

06 p1182 A70-18224

Steady turbulent boundary layer of compressible perfect gas on heat insulated surface with suction and longitudinal pressure gradient

07 p1254 A70-19081

Turbulent incompressible boundary layer on porous heat insulated plate with uniform suction, calculating ratio of friction drag coefficients

07 p1254 A70-19082

Helium high energy molecular beams for insulating body heating and thermal constants determination

07 p1344 A70-20129

Thermal control coatings as solar reflectors for spacecraft heat dissipation

08 p1527 A70-21357

Error analysis of Barakat-Clark explicit heat diffusion equations for thermally insulated surface

08 p1600 A70-21831

Carbon deposit formation in gas turbine engines with various fuels, studying thermal insulation properties

09 p1742 A70-22472

Fire performance of spray applied rigid urethane foam applied as storage vessel insulation, noting continued functioning until destruction

09 p1710 A70-23345

Conduction to isothermal insulated cylinder from semiinfinite region

09 p1790 A70-23563

Heat insulated plate compressible boundary layer energy equations approximate solutions in hypergeometric functions

10 p1966 A70-23867

Moisture detector for evaluating trapped water effects in thermal insulation, describing equipment and test procedure

10 p1891 A70-24829

Insulation foils and surface coatings thermal properties effect on radiation properties for spacecraft thermal control systems

10 p1951 A70-24863

Plasma energy confinement time as function of discharge parameters for plasma thermal insulation in Tokamak-3

11 p2088 A70-25713

Radiative heat transfer due to radiation conductivity and transmission in low density glass fiber insulations by heat flowmeter for hot and cold surfaces

11 p2148 A70-25769

Insulators, ablators, reflectors and computer analyses for aerodynamic and engine heat for aerospace thermal design

11 p1980 A70-25874

Embossed/crinkled aluminized film multilayer insulation blankets with joints performance variation with temperature predicted by radiation heat transfer correlation

11 p2150 A70-26365

Thick superinsulation system design for long term cryogenic storage using superfloc, radiation shield and spacer material

11 p2150 A70-26367

Apiezon N grease thermal conductivity at liquid helium temperatures noting behavior as insulator

12 p2258 A70-27024

Heat conduction for thermally insulated bilayer metal wall for time-variable heat transfer and ambient temperature, using Green function

12 p2330 A70-27292

Heat transfer mechanism in foil-vacuum insulations, analyzing factors responsible for point of inflection on experimental temperature field curves

13 p2521 A70-28861

Thermal testing of inflatable solar shields for cryogenic space vehicles, discussing shield misalignment effects on propellant tank temperatures [AIAA PAPER 70-856]

16 p2982 A70-33901

Space suit thermal insulation properties, wear durability and nonflammability improvements, reflecting techniques in fabricating cryogenic multilayer insulation systems

[AIAA PAPER 70-851]

16 p2939 A70-33918

Concorde engine bay thermal insulation combining stainless steel foil and polytetrafluorethylene film, considering noise level, engine fire conditions and molten Ti globules penetration

18 p3346 A70-36345

Pyranometer with additional external glass cupola to eliminate temperature differences and heat exchange, discussing laboratory and field test results

20 p3626 A70-39034

Solar wind effects on thermal control coatings reflectance and absorbance, noting simulation and thermophysical measurement requirements [AIAA PAPER 70-833]

20 p3655 A70-39825

Numerical solution for multilayer insulation system comprised of infinite parallel metallic films separated by optically thin dielectrics

21 p3947 A70-41054

Multilayer insulation thermal scale modeling, discussing surface control techniques

21 p3951 A70-41865

Closed cell polyurethane foam for cryogenic insulation, determining thermal conductivity and net heat flow by analytical model and test

23 p4280 A70-44367

Aircraft passengers and crew fire protection in crashes via insulating air-carrying foam ejected into compartment from fuselage

23 p4140 A70-44465

THERMAL NEUTRONS

High energy neutron counter designed for recording slow neutrons produced in lead detector

05 p0845 A70-15935

Lunar rocks isotopic composition for Gd and variations due to low energy neutron capture produced by cosmic ray interactions

13 p2485 A70-28473

Electromotive force appearance in fissionable material semiconductor during thermal neutrons irradiation

13 p2469 A70-28879

Reactor, isotropic and accelerator neutron sources for thermal neutron radiography

24 p4375 A70-45746

Thermal neutron radiography with small accelerators using optimized collimator and fission increased flux

24 p4376 A70-45752

Thermal neutron radiography with 2.5 MeV Van de Graaff accelerator

24 p4376 A70-45753

THERMAL NOISE

Junction gate and MOS field effect transistors thermal noise calculations, using circuit analysis based on equivalent circuits

02 p0258 A70-12424

Electric potential fluctuations beyond long collisionless plasma cylinder in uniform magnetic field, noting thermal noise intensity

03 p0530 A70-13086

VHF field effect transistors thermal noise characteristics and effects of feedback and parasitic impedance

05 p0814 A70-16420

Gain-stabilization of SHF traveling wave maser radiometer, using thermal noise from neon discharge tube

12 p2228 A70-26881

Thermal feedback theory of flicker noise generation in transistors and temperature fluctuations effect in vicinity of recombination centers

12 p2196 A70-27687

Cryogenic Ge bolometers sensitivity variation and noise, noting radiation absorption by sensor and by coating

12 p2237 A70-28151

Junction and MOSFET transistors thermal noise characteristics at cryogenic temperatures

15 p2710 A70-32585

Pursuit-evasion differential games involving two linear dynamic systems with state and control dependent thermal noise

16 p2881 A70-32985

Frequency instability of oscillator perturbed by internal thermal noise [ONERA-TP-838]

16 p2872 A70-33105

Thermal noise in space charge limited solid state diodes by Langevin equation, relating spectral intensity for open and short circuit voltage and current

16 p2878 A70-33694

Shot, thermal, induced gate and flicker noise in various solid state devices and lasers

21 p3792 A70-42112

Crosstalk error in binary phase modulated communications systems due to RFI and thermal noise

23 p4158 A70-43752

THERMAL PLASMAS

Warm Maxwellian plasma stabilization of velocity-space instabilities, evaluating densities and temperatures for stabilizing resonant loss-cone modes

02 p0347 A70-12237

Bremsstrahlung emission from thermal plasma coexisting with relativistic electron tails, noting enhancement at electron plasma frequency harmonics

02 p0348 A70-12240

Field patterns of thin resonant and nonresonant antennas in warm plasma, using digital computer to evaluate propagation constant for current distribution

02 p0263 A70-12655

Wave-wave coupling of two HF electromagnetic waves launched into warm plasma across constant confining magnetic field, using Maxwell-Vlasov equations for electrons

02 p0349 A70-12757

Plasma devices for spacecraft propulsion taking into account electrothermal, electromagnetic and electrostatic systems

05 p0895 A70-15817

Wave dispersion across magnetic field in cold and warm collisionless Maxwellian plasma, discussing electromagnetic and electrostatic Bernstein modes

06 p1116 A70-17364

Coupled mode method, analyzing interaction between slow space charge wave of electron beam and electroacoustic wave of lossless warm plasma

07 p1349 A70-19687

Chemical synthesis in streaming thermal plasmas including HCN from cold methane and N plasma discharge chemistry

07 p1351 A70-19879

Thermal sheaths effect on cooled probes for stationary and flowing plasmas measurements at high pressure

08 p1497 A70-21528

Thermal plasma devices with discrete modes, describing periodic pulling and transition to continuous noise spectrum characteristic of turbulence
11 p2094 A70-26754

Spherical electroacoustic waves in drifting thermal plasma, describing ion acoustic perturbations
12 p2279 A70-27779

Plasmapause irregular structure and position indicated by measured distributions of hydrogen and helium thermal positive ions in duskside magnetosphere
13 p2397 A70-29185

Discharge effects on LF oscillations and ion extraction in hot cathode Penning plasma
13 p2463 A70-29370

Thermal induction plasma discharge characteristics, considering radiation and conduction losses
13 p2465 A70-29702

Wall stabilized arc source for spectroscopic measurements of isothermal plasma at various pressures
14 p2584 A70-30505

Streaming thermal plasma chemistry, reviewing diagnostic techniques and product oriented research
14 p2545 A70-30905

Small amplitude HF electromagnetic wave penetration in hot plasma slab, showing wave period/transit time ratio dependence of electromagnetic field distribution
14 p2551 A70-31037

Thermal relaxation rate in one and two dimensional electron plasma models with positive background, using particle in cell simulation
14 p2624 A70-31047

Wave propagation and group velocity in warm magnetoplasma, using adiabatic theory for ionosphere and far magnetosphere models
16 p2859 A70-32937

Coherent wave propagation in warm turbulent plasma, using perturbation method for wave dispersion
16 p2860 A70-32945

Thermal electrodeless plasmas generation at audio frequencies with closed magnetic circuit model
[AIAA PAPER 70-776] 17 p3139 A70-34478

Warm homogeneous magnetoplasma longitudinal cyclotron harmonic wave propagation perpendicular to static magnetic field, noting instabilities
17 p3140 A70-34927

Two component warm plasma wave propagation along magnetic field, considering full pressure tensor equation with momentum and pressure relaxation mechanisms
18 p3294 A70-36405

Magnetospheric thermal plasma electron density measurement during solar flare by OGO-5 satellite
19 p3411 A70-37513

Tonks-Dattner resonances in warm inhomogeneous plasma column, examining kinetic theory for waveform shapes and resonance location
19 p3475 A70-37534

Equilibrium compositions of helium-nitrogen, argon-nitrogen and xenon-nitrogen plasmas at atmospheric pressure between 5000 and 35,000 K
19 p3552 A70-37831

Square loop antenna radiation resistance in warm plasma, comparing theoretical results with measured values from Ariel 3 satellite antenna
21 p3796 A70-40562

Decomposition kinetics of alumina particles injected into thermal argon induction plasmas
21 p3855 A70-40878

Thermal plasma model along magnetic field lines outside plasmasphere with sharp density gradient in equatorial plane, using OGO-4 ion composition measurements
21 p3815 A70-41057

Shock waves and solitons structure propagating oblique to magnetic field in warm plasma based on two-fluid equations
21 p3857 A70-41382

Numerical analysis of inductive electrodeless discharge of thermal Ar plasma column heated by RF axial magnetic field
21 p3859 A70-41902

Maintenance voltage of RF argon thermal induction plasma at atmospheric pressure as function of ring probe
21 p3859 A70-41904

Nonzero electron temperature effect on mutual impedance of quadrupole probe in hot isotropic plasma
22 p4080 A70-42720

Magnetospheric thermal plasma studies via ground based whistler method, identifying radial and longitudinal irregularities in electron density, bulk motion and plasmapause position and displacements
22 p4021 A70-43281

Effective collision cross section for reaction resulting in Cs ions neutralization in thermal Cs plasma calculated from measured ion currents
22 p4082 A70-43374

German monograph on thermal and nonthermal phenomena in quasi-stationary convectionless plasma arc column, using 13-moment approximation for Boltzmann equation
24 p4382 A70-45089

Thermal power
U TURBOGENERATORS
THERMAL PROPERTIES
U THERMODYNAMIC PROPERTIES
THERMAL PROTECTION

Thermal protection systems /TPS/ design criteria for maneuverable reentry spacecraft, comparing weight and cost for various alloy systems
02 p0392 A70-11940

Thermal protective device for models exposed to flow buildup in intermittent wind tunnel, offering straightforward design, easy applicability, low cost and favorable experimental conditions
[ONERA-TP-755] 03 p0463 A70-13627

Thermal protection rating systems for clothing fabrics based on pain and blister effects in human skin
03 p0438 A70-14064

Interaction between surface liquid film and hot gaseous turbulent boundary layer analyzed for hypersonic vehicle surface thermal protection design problems
04 p0669 A70-14927

Reusable booster rocket heat protection system design, discussing ablation and insulation methods
05 p0958 A70-16635

Heat transfer boundary conditions determination in studying heat protective coatings effectiveness, discussing measurement methods for stagnation temperatures and heat fluxes from exhaust gases
06 p1173 A70-17662

Series emittance thermal control coatings of polymeric dielectric films overlaying reflectors vacuum exposed to UV, X ray and proton radiation
[AIAA PAPER 70-64] 06 p1106 A70-18069

Stable two phase water flow system for transpiration cooling in thermal protection of SST noise suppressor situated in afterburning engine exhaust gas stream
[AIAA PAPER 70-151] 06 p1181 A70-18146

Ablative materials for thermal protection at low convective heating rates, comparing foam and state-of-art materials performance
07 p1316 A70-18927

Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall
07 p1420 A70-19066

Reentry thermal protection materials technology, discussing thermophysical, thermomechanical and kinetic effects, noting interdisciplinary approach
07 p1319 A70-19878

Structural composite materials for thermal protection of reusable weight-saving vehicles in space transportation system
[AIAA PAPER 70-272] 07 p1397 A70-20382

Reusable metallic and nonmetallic thermal protection materials for space shuttle applications
[AIAA PAPER 70-273] 07 p1397 A70-20383

Abradable and abrasive types thermal spray coatings application to jet engine parts
10 p1893 A70-23856

Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall
10 p1970 A70-25217

Thermal protection polymers ablators efficiency evaluation using high vacuum DTA cell coupled to high resolution mass spectrometer
11 p2070 A70-25813

Lifting entry vehicle thermal protection system /TPS/ material performance, analyzing metallic radiator and passive transpiration systems and rigid insulator
11 p2150 A70-26368

Preoxidation treatment alleviating silicide pest in protective coatings for refractory metals, discussing effectiveness against high temperature oxidation
13 p2434 A70-29082

Supersonic slot cooling for surface protection at hypersonic speeds using contoured axisymmetric nozzle with streamlined body
14 p2663 A70-30257

Thermal porous bronze screened microphones for noise measurements in medium under large heat flow
14 p2555 A70-30298

Apollo thermal protection system noting low density ablation, flight and ground tests
[AIAA PAPER 68-1142] 15 p2813 A70-32514

Optimum guidance and control law for lifting reentry bodies, investigating plane descent trajectories for minimum structural heating
16 p2982 A70-33774

ZnO coating pigment for spacecraft thermal control, examining UV irradiation effects on electrical properties
16 p2961 A70-34056

Surveyor thermal switch for temperature control to assure spacecraft components performance during temperature extremes on lunar surface
16 p2845 A70-34127

Space shuttle systems structural design and thermal protection technology, stressing hardware reliability and reusability
16 p2986 A70-34227

Spacecraft shape and thermal coating pattern optimization by computer program
17 p3178 A70-35251

Reinforced plastic composites thermal protection and ablative performance in high temperature environments for reentry vehicle applications
20 p3656 A70-40029

Composite structural materials for thermal protection in reentry vehicles applications, evaluating fused quartz yarns, silicone rubber and phenolic resins
20 p3656 A70-40031

Metallic shell with passive thermal protection coating, solving boundary value problem for high temperature heating with simplified mathematical model
20 p3739 A70-40296

Thermal protection system based on radiation cooling for high altitude cruising hypersonic flight, achieving zero net mass transfer
21 p3950 A70-41745

Ablative response predictions analysis heat sources, discussing boundary layer edge conditions definition, atmospheric entry, rocket propulsion, etc
21 p3952 A70-42055

Reentry protection for radioisotope heat sources, using thermal switch of composite ceramic foam with metal impregnants
22 p4054 A70-42958

Space vehicles with shielding for protection against meteor impacts, discussing tubular radiator design for heat removal
23 p4284 A70-45008

THERMAL RADIATION

Polarization of nonspherical plasma emission region in thermal X ray stars
02 p0357 A70-11787

Radiation from flames in gas turbines and rocket engines, discussing effects of soot formation fuel chemical composition, combustor operating conditions, etc
02 p0354 A70-12050

GaAs n-type single crystals thermoreflectance spectra at various energies
03 p0541 A70-13721

Heat transfer to absorbing fluid by coupled thermal radiation and laminar forced convection at pipe entry region, considering gray and nongray absorption
[ASME PAPER 69-WA/HT-16] 04 p0783 A70-14818

Line scanning IR imagery system for thermal mapping of fire, water and soil conditions
05 p0836 A70-15770

Thermal and dynamical evolution of gas clouds in transparent and opaque stages by comparing rates of cooling, heating, contraction and expansion
05 p0907 A70-16041

Space temperature determination, discussing planet or satellite absorption and radiation rate dependence on surface characteristics, solar radiation, planet albedo and thermal radiation
05 p0914 A70-16629

Thermal radiation effects on plane magnetoacoustic waves in seminfinte expanse of radiating gas of perfect electrical conductivity
05 p0890 A70-16822

Solar, albedo and earth thermal radiations absorbed by partially obscured spacecraft calculated on digital computer for various orbital positions
06 p1173 A70-17556

Atmospheric temperature vertical profile reconstruction from ascending radiation observations using data regularization
06 p1097 A70-17793

Thermal emittance of Cu measured in vacuum in spherical enclosure by calorimetric method to investigate oxidation effect
[AIAA PAPER 70-66] 06 p1180 A70-18139

Emittance measurement by thermal decay integration method
06 p1184 A70-18597

Step profile decay of initial perturbations of radiating gas as function of optical depth and Boltzmann number
07 p1255 A70-19212

Volt-watt sensitivity of dilatocapacitor types of thermal radiation receivers, noting low natural noise levels
07 p1284 A70-19815

Far IR radiation at galactic center suggested as thermal emission by dust particles
09 p1744 A70-22502

Thermal radiative transfer in nonuniform anisotropic magnetoactive plasma, correcting term of Zheleznyakov equation
09 p1734 A70-22514

Molybdenum heat capacity, electrical resistivity and thermal radiation measurements at high temperatures with millisecond resolution
09 p1706 A70-22955

Thermal radiation absorption in hemispherical cavity, determining apparent absorptivity for diffuse and parallel irradiation
09 p1790 A70-23565

Terrestrial surface radiometric imaging by sensing thermal radiation at centimeter wavelengths to reduce atmospheric scattering attenuation
09 p1687 A70-23763

Thermal radiation shield influence on stationary radiative heat transfer in closed arbitrarily shaped two gray surface system

10 p1966 A70-23865

Thermal transducer for rapid nondestructive testing, discussing imaging of specimen bond defects and thermal property differences

10 p1894 A70-24173

Atmospheric temperature vertical profile reconstruction from ascending radiation observations using data regularization

10 p1913 A70-25024

Meteorological Nimbus 3 satellite and aircraft observations of thermal radiation for vertical atmospheric temperature profile measurement

11 p2075 A70-25921

Intensity and photocounts statistical distribution of harmonic generated in nonlinear crystal by laser and thermal radiation

12 p2248 A70-27547

Standard sources and detectors for thermal radiation measurement

13 p2410 A70-29654

Thermal longwave radiation measurement applications to atmospheric radiation transfer and weather processes

13 p2411 A70-29663

Stefan-Boltzmann formula validity for flames and combustion products radiation affected by time dependence of emissivity coefficient, place and wavelength

14 p2662 A70-30179

Lunar surface roughness effects on thermal radiation, using model surface with parallel troughs

14 p2649 A70-31212

Temperature measurement of rotating shafts under cyclic loading, using thermistor as thermal radiation sensor

15 p2734 A70-31581

Shock waves structure in radiating gases at high temperatures, taking into account radiation anisotropy in shock front

15 p2720 A70-31645

Thermal EM field as function of coherent states, outlining quantum theory for thermal radiation and solar energy

15 p2678 A70-32423

Kirchhoff law validity for freely radiating metallic surfaces, using emissometer to measure hemispherical emittance

[AIAA PAPER 70-858]

16 p2999 A70-33903

Diffuse specular rough surface measure for imperfect reflections in thermal radiation transfer through slot passages

[AIAA PAPER 70-860]

16 p2999 A70-33905

Titan 3C solid rocket motor exhaust plumes thermal radiation analysis for designing Stage I engines and components thermal protection

[AIAA PAPER 70-842]

16 p3000 A70-33925

Extinction parameters of submicron carbon, tungsten and Si particles in hydrogen measured at various temperatures, discussing scattering amplitude functions and Monte Carlo calculations

[AIAA PAPER 70-838]

16 p3001 A70-33933

Thermal radiation configuration factors tables giving reference sources, discussing historical development of factors

[AIAA PAPER 70-814]

16 p3002 A70-33947

Radiation gas dynamics, investigating thermal radiation effects on flow field of high temperature gas

17 p3195 A70-35038

Thermal choking of channel flow by radiative transfer from upstream and application to shock waves generation

17 p3195 A70-35039

Lunar millimeter wavelength thermal radiation measurement noting surface roughness effect on polarization

17 p3171 A70-35559

Rayleigh-Gans-Born approximation application to thermal radiation of reflecting convex plasma sphere, cylinder and ellipsoid

18 p3294 A70-36146

Background thermal radiation veiling effect on IR photography extension into long wave spectrum

18 p3257 A70-36282

Atmospheric layer attenuation of thermal radiation from water surface by airborne radiation thermometer measurements

18 p3260 A70-36969

Skin simulation for thermal radiation protection studies, considering fused silica and epoxy resin filled with Al powder

18 p3225 A70-37093

Book on heat transfer covering conduction, convection, thermal radiation and heat exchange equipment

19 p3550 A70-37231

Thermal radiation effect on plane shock wave propagation, using perturbation technique and method of characteristics

19 p3551 A70-37532

Tables on thermal radiative properties of heated air covering absorption coefficients for wide range of photon energies and temperatures

19 p3552 A70-38009

Book on thermal radiative properties of air, Volume 2, covering reaction rates, photons and charged particles interactions with air molecules, secondary air excitation, etc

19 p3552 A70-38010

Thermal radiation detectors operation principles, design, specifications and applications

20 p3632 A70-39626

Thermal radiation spectrum power of small spherical tin and lead particles

20 p3737 A70-39745

Microsecond response bolometer for measuring thermal radiation fluxes in shock tube, discussing design, calibration and performance

21 p3824 A70-40859

Surface roughness effects on thermal radiant energy interchange between opaque interacting surfaces formulated for unequal temperature adjoin plates

21 p3944 A70-41018

Traveling thermal wave induced channel flow, examining velocity profile thermal boundary conditions and shear stress

21 p3948 A70-41247

Radiative propagation nondiffusive effects of thermal pulse in explosion, obtaining solutions for plane and spherical case by asymptotic expansion and numerical integration

21 p3950 A70-41379

Thermal design of high altitude balloons and instrument packages, analyzing vertical motion dependence on heat transfer and radiation environment

21 p3755 A70-42077

Contrail effects on atmospheric thermal radiation budget in heavy jet traffic regions from airborne IR and solar radiometric observations

23 p4214 A70-44033

Thermal radiation emissivity predictions for metal surfaces at cryogenic temperatures, comparing anomalous skin effect and Drude single electron theories

23 p4218 A70-44388

Launch optimization of artificial satellites for minimizing thermal radiative heat input during low altitude orbit

23 p4264 A70-45047

Delphini and Serpentis Novae radio emission in microwave spectra, noting consistency with thermal radiation of expanding ionized gas envelopes

24 p4410 A70-45771

THERMAL RADIO EMISSION

U RADIO EMISSION

U THERMAL EMISSION

THERMAL REACTORS

ZrH reactor program and multikilowatt space oriented thermoelectric power conversion systems

22 p4071 A70-43190

THERMAL RESISTANCE

Refractory and heat resistant materials thermal diffusivity coefficient, discussing theoretical basis and technical implementation for measurement at high temperature

01 p0085 A70-10178

Heat resistant coatings in high temperature gas flow, studying external layer deformation kinetics during shrinkage

03 p0483 A70-13250

Constant temperature hot-wire anemometer to compensate for thermal lag of wire/film resistance thermometer within useful frequency range

03 p0492 A70-13761

Unsteady heat conduction and thermal stresses in thin isotropic semibounded plates with butt joint possessing internal thermal resistance

04 p0766 A70-14479

Graphite foam reinforced by carburized high polymers used for fabricating highly porous heat and corrosion resistant material

[DGLR-69-57]

04 p0712 A70-15178

Dry heat resistance of bacillus subtilis var. niger spores on selected planetary lander capsule surface materials

04 p0645 A70-15442

High temperature polymers including polybutadiene, polyphenylene sulfide, polysulfone, polybenzimidazole, etc

05 p0869 A70-16038

Thermal resistance of multicontact heat conducting stainless steel plate stacks with different interface purities in vacuum

05 p0957 A70-16293

Binary Al-Y system thermal and microstructural analyses at room temperature and 200 C, obtaining partial diagram and mechanical properties

05 p0864 A70-16546

Heat resistant silicate enamel coatings to protect steels and alloys against high temperature gas corrosion, studying properties by various methods

05 p0872 A70-16600

Polymers with high temperature oxidation resistance, discussing problems caused by aromatic heterocyclic structures and manufacturing methods

05 p0873 A70-16604

Heat resistant materials damping properties at high temperatures under distributed stresses measured in thin walled tubular specimens with vibrogram

05 p0952 A70-17049

Heat resistant enamel coatings effect on vibration damping of cast steels for turbine blades

05 p0868 A70-17050

Precooling effect on load carrying capacity of heat resistant plastics subjected to unilateral heating

05 p0874 A70-17065

Heat resistant plastics stability subject to unilateral heating with allowance for mass removal, obtaining dimensionless stability characteristics for structures design

05 p0874 A70-17066

Metals mechanical properties with inorganic heat resistant coatings between 1900-2300 K in oxidizing medium, describing facility based on solar furnace

05 p0875 A70-17069

Diffusion layer and protective oxide composition changed to increase chrome plated Mo heat resistance

06 p1089 A70-17742

Aluminosilicate coatings for increased Ni-Cr alloys heat resistance due to silicon properties

06 p1089 A70-17743

Structure, phase composition and heat resistance of diffusion layers obtained by surface alloying of Nb alloy with Cr, Ti and Si

06 p1089 A70-17744

Multilayer insulation blankets with slits normal to energy transfer direction for thermal control of spacecraft and cryogenic tankage

[AIAA PAPER 70-15]

06 p1156 A70-18076

Rough metal surfaces thermal constriction resistance for total heat flow through microcontacts

07 p1418 A70-18648

CW high power operation of transferred-electron oscillators realized by low thermal resistance, describing fabrication

07 p1241 A70-19300

Alloying elements effect on polymorphic alpha-beta transformation temperature of Ti systems, discussing heat resistance

07 p1307 A70-19555

Molybdenum single crystals orientation effect on thermal resistance to argon plasma flow

07 p1309 A70-19614

Steady temperature field of two dimensional periodic contact surface in vacuum, using conjugate harmonic functions for thermal flux lines, isotherms and thermal resistance

07 p1423 A70-19820

PbTe-based Sn, Se and Ge alloys lattice constant, thermal EMF and resistance, fusibility and microstructure

08 p1555 A70-21117

Harmonics generated in hot-wire anemometers responses by wires thermal lag and amplitude of flow velocity fluctuations using computerized simulation

08 p1498 A70-21586

Thermal resistance for inappropriately spaced contacts using electrolytic analog experiments

08 p1599 A70-21590

Correlation functions for resistance to heat and momentum transfer in viscous sublayer at rough walls defined for varied geometry flows

[ASME PAPER 69-HT-2]

08 p1486 A70-21833

Thermal contact resistance of anisotropic materials using mathematical geometric transformation

[ASME PAPER 69-HT-47]

09 p1790 A70-23552

Phase equilibrium diagram and heat resistance of Ti-Al-Nb alloys along radial section by thermal and microstructural analysis

09 p1709 A70-23789

Temperature insensitive telescope with metallic mirror at Milan-Merate Observatory

10 p1889 A70-24584

Hollow cylindrical sample scale effect on accuracy of testing heat resistance of brittle materials

10 p1965 A70-25301

Heat resistance and elastic properties of binary Ti-Mo alloys as function of phase structure and chemical composition

11 p2066 A70-25915

Thermal metal fatigue testing, including resistance to cyclic temperature variation, operating conditions simulation and stress-strain determination

12 p2322 A70-27218

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects

12 p2243 A70-27290

Fine grained structure effect on steels and Ni alloys short term heat resistance at high temperatures

14 p1594 A70-30168

Interatomic bond strength in solid solutions of Ti-Sn-O with respect to heat resistance at elevated temperatures

14 p2595 A70-30170

Thermal and electrical resistances of Na at low temperatures measured by germanium thermometers and galvanometer amplifier

14 p2617 A70-31021

Kovpak method for estimating and extrapolating heat resistance characteristics, considering alloy long term strength

15 p2755 A70-31528

Macromolecular polymer based heat resistant materials

15 p2765 A70-32264

Thermal constriction resistance between contacting metallic paraboloids applied to instrument bearings [AIAA PAPER 70-857] 16 p2998 A70-33902

Heat resistance evaluation of Zh S6-K alloy subjected to multicomponents surface diffusion 17 p3125 A70-35407

Thermal contact resistance, discussing behavior at cryogenic temperatures and directional or thermal rectifying effect 17 p3197 A70-35541

Polythermal phase equilibrium and heat resistance of Ti-rich Ti-Zr-Al alloys, noting creep and tensile tests 18 p3275 A70-36124

Heat resistance of cast, forged and annealed Ti-Cu alloys, discussing forged alloys mechanical properties as function of chemical composition and temperature 19 p3449 A70-37273

Power and exponential time dependences of long term creep strength for wide stress range, assuming linear heat resistance 19 p3449 A70-37340

Heat resistant coatings in high temperature gas flow, studying external layer deformation kinetics during shrinkage 19 p3428 A70-38468

Dimensionless heat transfer and resistance coefficients during stabilized nonNewtonian fluid flow in circular pipe 20 p3613 A70-40176

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects 20 p3638 A70-40340

Crystal orientation dependence of thermal resistance and gage factor in electron irradiated n-type silicon strain gages 21 p3824 A70-40862

Surface films effect on thermal contact resistance of microscopically sized contacts 21 p3944 A70-41023

Surface films effect on thermal contact conductance of aluminum surfaces contacting in high vacuum environment 21 p3944 A70-41024

Gold foil surface thermal contact resistance, investigating temperature and pressure effects and elastic and plastic deformation of surface structure 21 p3953 A70-42166

Temperature distribution and thermal constriction resistance due to steady heat flow in laminated composite 22 p4126 A70-43689

Fibrous, cellulosic, elastomeric and plastic materials with improved flame resistant properties for space applications 23 p4152 A70-44461

Manned spacecraft nonmetallic construction materials selection criteria, testing and configuration control, considering flammability hazard 23 p4152 A70-44462

Chemical composition effects on heat resistance, elastic properties and density of Ti-Ta alloys 24 p4360 A70-45830

Heat resistant surface diffusion alloying of Ni alloys with Cr, Ti and Si saturation 24 p4361 A70-45834

Thermal constriction resistance due to nonuniform metal surface conditions, considering macroscopic contact resistance for nonuniform interface pressure distribution 24 p4429 A70-46177

High temperature solar furnace for investigating heat resistant protective coatings thermal stability 24 p4350 A70-46331

Molybdenum disilicate and aluminum oxide coating sealing heat resistance tests 24 p4364 A70-46341

THERMAL SHIELDING

U HEAT SHIELDING

THERMAL SHOCK

Laser beam technique applied to thermal shock testing of metal disks, using solid state laser, compared to predicted results 01 p0113 A70-11058

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera 04 p0730 A70-14458

Fracture mechanical theory for crack propagation in brittle ceramics subjected to thermal shock, deriving crack stability criteria 04 p0767 A70-14505

Structural material selection for thermal shock conditions, deriving index from parameters governing solutions in thermoelasticity 07 p1413 A70-20002

Deuterium plasma expansion resulting from thermal shock produced by laser impulse 10 p1923 A70-24526

One dimensional compressible flow with heat addition in nonconstant area duct extended for friction addition, discussing critical thermal shocking 11 p2041 A70-26651

Thermal shock waves structure and effective temperature in stellar atmospheres taking into account absorption effects and possible isothermicity 12 p2306 A70-27861

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera 13 p2510 A70-28655

Thermal conductivity and shock resistance of flame and plasma sprayed zirconia coatings on Ni-Mo-C metal [ACS PAPER 22-C-68F] 15 p2762 A70-32527

Photothermometer response to thermal shock, considering rapidly varying surface temperature measurement 16 p2901 A70-33104

Reliability test facilities for military shipboard electronic equipment, subjecting equipment to combined thermal shock and vibration cycles 16 p2888 A70-33125

German monograph on thermal stresses due to thermal shocks on front surface of infinitely long circular solid cylinder 17 p3189 A70-35371

Creep resistant Ni-base superalloys ductility and thermal shock resistance improvement by precision casting technique, producing columnar grain and single crystal structures 20 p3648 A70-39415

Polycrystalline aluminas under thermal shock, investigating strength decrease and subcritical crack formation 22 p4059 A70-43413

THERMAL SIMULATION

Jupiter atmosphere temperature and density profiles determined from thermal models based on thermal structure above dense cloud level 02 p0367 A70-11814

Space simulation test results compared with analytical methods for thermal data prediction of Azur satellite 04 p0762 A70-15182

Computerized thermal model simulating environment control system, crew and vehicle structure in performance prediction for Apollo lunar module [SAE PAPER 690621] 05 p0922 A70 15848

Plasma arc tests to simulate stagnation reentry heating on spherical subized models of nuclear heat source to investigate heat shield materials ablation characteristics 06 p0974 A70-18172

Simulated Concorde kinetic heating system for ground studies of thermal stresses 07 p1250 A70-19744

Computer program predicting thermal response of fusion welding tooling chill bars and holding fixtures, simulating moving heat source and contact 08 p1508 A70-21487

Three dimensional RC network simulating temperature fields in IC at different heat source power dissipation laws, discussing harmonic heat source field 09 p1643 A70-22128

Microorganisms survivability in soils near spacecraft assembly areas during simulated Martian freeze-thaw cycles 09 p1619 A70-22768

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature 09 p1656 A70-23241

Thermal metal fatigue testing, including resistance to cyclic temperature variation, operating conditions simulation and stress-strain determination 12 p2322 A70-27218

Spacecraft thermal mathematical model adjustment to fit measured temperatures, using iteration method 15 p2812 A70-32513

Computerized thermal modeling of spacecraft environmental control systems (ECS) 15 p2705 A70-32523

Radiation and conduction of open joint multilayer insulation systems, analyzing dependence on contact area by numerical methods 16 p2939 A70-33915

Correction techniques for thermal network lumped parameter inaccuracies with conduction and radiation coupling, considering temperature control system [AIAA PAPER 70-821] 16 p3002 A70-33943

Mathematical model of heat flux absorbed by heated part in radiant heating reflector systems, considering shape, spectral, directional and polarizing effects [AIAA PAPER 70-818] 16 p3002 A70-33945

Nonlinear three nodes analysis for thermal design of spinning spherical satellite 17 p3177 A70-35249

Satellite temperature distribution prediction from digital simulation 17 p3177 A70-35250

Thermal space simulation tests on Azur research satellite relating to temperature control subsystems and qualification and acceptance procedures 19 p3399 A70-38288

Thermal scale modeling of heat pipe in deep space, using material and heat flux preservation techniques 21 p3946 A70-41048

SST sonic boom noise level reduction by thermal simulation of long body aircraft, considering thermal spike or keel [AIAA PAPER 70-1323] 24 p4291 A70-45942

THERMAL STABILITY

Conflicting requirements for reflection reduction, thermal stabilization and radiation protection satisfied by three layer coatings on Si photocells 01 p0159 A70-10768

Transmitting-receiving latching ferrite switch with 180 degree differential phase shift toroids for temperature stability and receiver protection in case of driver failure 03 p0458 A70-14036

Thermal stability of graphite core-solid hydrogen mantle grains determined from temperature and evaporation rates calculated for interstellar space 04 p0743 A70-14398

Thermal stability of turbine sealant mica-ceramic materials containing boron nitride 04 p0712 A70-14467

Thermal recovery factors at hemispheric probe stagnation point in low density supersonic jets of He-Ar and H-N mixtures [ASME PAPER 69-WA/HT-27] 04 p0782 A70-14810

Commercial Ni-Co gas tungsten arc filler metal with mechanical properties stable following stress relief 04 p0710 A70-15653

Mechanical properties of eutectic superalloys compared with commercial superalloys, noting thermal stability applicability to gas turbine engines [SAE PAPER 690689] 05 p0861 A70-15827

Insulating materials and apparatus evaluation in terms of thermal capability to effect competitive cost saving 05 p0869 A70-16033

Adjustable pulse delay circuit design utilizing slow switching action of storage diodes emphasizing thermal stability 05 p0820 A70-16343

Crack stability under tension and thermal stresses caused by uniform disturbed heat flow, using Barenblatt fracture criterion 05 p0939 A70-16483

Thermal stability of materials and structural elements - Conference, Kiev, Ukrainian SSR, December 1967 05 p0947 A70-17026

Optimal thermomechanical treatment for austenitic steel stability to resist propagation and unloading of dislocations in cyclic loading process 05 p0867 A70-17041

Precooling effect on load carrying capacity of heat resistant plastics subjected to unilateral heating 05 p0874 A70-17065

Heat resistant plastics stability subject to unilateral heating with allowance for mass removal, obtaining dimensionless stability characteristics for structures design 05 p0874 A70-17066

Tensile and stress rupture tests facility for microsamples stability at temperatures up to 3300 K, investigating deformation and failure 05 p0830 A70-17073

Automatic temperature stabilizer with high order amplification due to direct heater sensing, noting applicability for synthetic fiber plants and thermophysical laboratories 06 p1064 A70-17783

Chromized molybdenum thermal stability under cyclic induction heating and subsequent air cooling 07 p1304 A70-18743

Soviet book on structures design for stability at high temperatures with large gradients, discussing thermoelasticity, thermoplasticity and creep equations for shells, plates, etc 07 p1409 A70-19601

Penetrative thermal convection stability for statically unstable layer surmounted by statically stable layer from numerical integration of linearized equations of motion and heat conduction 07 p1269 A70-19947

Thermal convection determination in earth, Venus, Mars and moon interiors based on thermal stability analysis, obtaining viscosity depth profiles 07 p1272 A70-20203

Silicon containing alpha matrix Ti alloy with high creep strength and stability at elevated temperatures, studying processing and heat treatment effects on properties 08 p1509 A70-21853

Irreversible viscosity decrease and thermal stability in polymer-containing lubricating oils under shearing forces effect 09 p1693 A70-23408

Long time static strength, durability and thermal stability relations determined for heat resistant alloys at operational temperatures 10 p1903 A70-24238

Carbon composition resistors investigated for cause of resistance dependence on thermal pulses, suggesting application as stabilization process

10 p1849 A70-24617

Thermal imbalance effect on stellar pulsational stability using linear quasi-adiabatic pulsation theory

10 p1946 A70-24980

Temperature instability of electro-optical laser modulators using ADP, KDP and DKDP crystals taking into account phase shift between coherent light beams

11 p2063 A70-25848

Water cooled metallic diaphragm thermal stability effect on plasmatron electric arc characteristics stabilized by vortex air flow

11 p2093 A70-26736

Gamma irradiation effects on thermal stability and decomposition of ammonium perchlorate

12 p2289 A70-26870

Interstitial solid solutions stability in cast molybdenum subjected to heat treatment

12 p2257 A70-28225

Aliphatic diesters as high temperature lubricants, discussing viscosity range extension, oxidation inhibition and thermal stability

13 p2438 A70-29125

Elastic material filled cylindrical, segmented toroidal and conical shells thermal stability, allowing for stiffener eccentricity

13 p2516 A70-29523

Cobalt surface X ray analysis after spark erosion treatment, revealing phase with high temperature stability

14 p2596 A70-30840

Thermal stability of simply supported bimetallic shallow spherical shell, considering rotationally symmetric deflection modes

14 p2657 A70-30845

Thermodynamic stability of methane clathrate hydrate, building up ice grains halo within comets inner coma

14 p2650 A70-31243

Space erectable boom with interlocked seam, perforations and coatings to provide torsional rigidity and thermal stability

16 p2986 A70-34143

Creep resistant Ti alloys with high temperature strength and stability, comparing tensile data for room temperature and 900 F

17 p3122 A70-34440

Thermal stability of glycolytic enzymes from thermophilic clostridia

17 p3042 A70-35327

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

17 p3125 A70-35404

Flexible thermostat for specific temperature range with liquid nitrogen coolant and gas transfer medium

17 p3096 A70-35850

Solar prominences thermal and dynamical stability in terms of optically thin plasma supported by magnetic field against gravity

17 p3174 A70-35867

Amorphous film formation and crystallization, discussing thermal stability

18 p3297 A70-36320

Thermal stability test assembly for refractory materials cylindrical specimens, using argon plasma jet

19 p3395 A70-37351

Nonuniform emitter current distribution effect on power transistor thermal stability, discussing temperature distribution effects

19 p3387 A70-37821

Semiconductors, ferrites and segnetoelectrics automatic temperature stabilization problem based on heat source energy conversion

20 p3597 A70-39255

Portable telescope for river and ocean vessels, discussing design and operation thermal stability and hermetization

20 p3629 A70-39311

Ammonium and magnesium perchlorate mixture thermal stability study with differential scanning calorimetry, noting exothermic decomposition of AP

20 p3688 A70-40272

Aromatic polymers synthesis for good thermal stability, describing single and double stranded chains

21 p3782 A70-42127

Organic spiro polymers synthesis for thermal stability by condensation of aliphatic spiro tetraamines and aromatic dianhydrides

21 p3782 A70-42128

Thermal stability of polymers based on aromatic diamines and isomeric dibenzoylbenzenes

21 p3782 A70-42129

Thermally stable arylsulfonamide polymers incorporating 1, 2-disulfonamide group

21 p3782 A70-42130

Polyimadazopyrrolone films relative thermophysical properties, noting polymers thermal stability dependence on carbonyl groups percentage

21 p3783 A70-42132

Poly(perfluoroalkylene oxides) preparation and curing, considering molecular weight and thermal stability

21 p3783 A70-42145

Thermally stable polyimide resins for carbon fiber composites, noting high temperature strength, oxidation resistance and electrical insulation properties

22 p4058 A70-42478

High thermal stability glass fibers alternatives improving stiffness-to-weight ratio of resin and Al-based composites used in F-111 boron epoxy wings

22 p4058 A70-42480

Temperature stable homogeneous single phase zirconate solid solution ceramics for microwave dielectric resonators and microstrip substrates

22 p3996 A70-42922

Thermal-acoustic oscillations in forced convection, giving time delay analog for perturbation feedback

23 p4280 A70-44369

Nonspherical stars thermal stability, considering solar rotational models and oblateness problem

23 p4252 A70-44833

High temperature solar furnace for investigating heat resistant protective coatings thermal stability

24 p4350 A70-46331

THERMAL STRESSES

Thermal stresses in infinite layer of transversely isotropic material due to crack with prescribed normal displacement, deriving temperature distribution

01 p0200 A70-10552

Circular plate nonlinear analysis under load and uniform midplane temperatures, using stationary potential energy principle

01 p0205 A70-11145

Transient temperature profiles and thermal stress distribution in circular plates and cylinders with eccentric hole determined by conformal mapping

01 p0207 A70-11153

Transient thermal stress concentration at small thickness change of plate obtained by photoelastic studies

01 p0207 A70-11157

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number

02 p0383 A70-11654

Fiber composites dimensional changes, stresses and plastic flow during component allotropic transformation, studying temperature variations effects

03 p0585 A70-12973

Laminate approximation model of randomly oriented fibrous composites estimating stiffness and thermal and expansional strains

03 p0587 A70-13126

Bearing strength and rupture of reinforced plastic composites under intense one-sided electric heating and hydrostatic pressure due to pyrolysis of plastic bond

03 p0515 A70-13244

Unsteady temperature field induced stresses and strains in hollow viscoelastic sphere calculated by solving integrodifferential equation having right hand side dependent on time function

03 p0590 A70-13398

Thermoelastic stresses in plate due to arbitrary temperature variations of heat transfer agent calculated in second approximation, allowing for transfer coefficient time dependence

03 p0590 A70-13400

Thermoelastic stresses in diode of pulsed and CW injection lasers, showing energy parameter limitation

03 p0499 A70-13437

Temperature field in thermally stressed electric machine rotor obtained by solving Poisson and Laplace equations with digital computer, using network method

03 p0414 A70-13517

Transient thermal stresses in photoelastic models of various shapes under various steady state or transient temperature conditions, describing instrumentation and experimental methods

03 p0600 A70-14308

Thermal stress concentration produced by cracks, notches and fillets in plates free from external loads measured photoelastically

03 p0600 A70-14310

Thermal stresses of semiinfinite plate with circular hole filled with elastic inclusion and subjected to uniform heat flow

03 p0601 A70-14317

Thermoelastic stresses in solid cylinder under cyclic temperature variation, calculating amplitude for Biot numbers

04 p0766 A70-14477

Unsteady heat conduction and thermal stresses in thin isotropic semibounded plates with butt joint possessing internal thermal resistance

04 p0766 A70-14479

Transient temperature distribution, thermal stresses and deformations in thin finite circular disk due to continuous point heat source, using linear thermoelasticity

[ASME PAPER 69-WA/PVP-6] 04 p0768 A70-14789

Thermal stresses in transversely isotropic hollow circular cylinder, applying formulas derived to reentry vehicles aerodynamic heating

04 p0779 A70-15608

Pressure sensitive components in cordwood modules noting temperature and pressure damaging stresses during encapsulation

05 p0855 A70-16037

Thermoelastic stresses in rotating circular cylinder, analyzing temperature effect on angular velocity for neo-Hookean material using finite deformation theory

05 p0930 A70-16080

Thermal stress and thermal fatigue data for utilization in design problems

05 p0932 A70-16161

Crack stability under tension and thermal stresses caused by uniform disturbed heat flow, using Barenblatt fracture criterion

05 p0939 A70-16483

Thermal stresses in shell with spherical and circular cylindrical sections, using thin shell approximations and shallow shell theory

05 p0945 A70-16818

Tektite size restricted by thermal stress limit on diameter and aerodynamic load limit on length

05 p0916 A70-16831

Gas dynamic stand for testing turbine disks strength under mechanical and cyclic thermal loads, analyzing breakdown data for various disk geometry

05 p0953 A70-17052

Rotor blades structural fatigue strength tested on gas dynamic test stand under cyclic thermal loading and static tensile load

05 p0954 A70-17058

Error resulting from elasticity modulus and linear thermal field coefficient removal from integral in Burger formula for turbine blade thermal stresses

05 p0954 A70-17061

Fiberglass reinforced plastics load carrying capacity under unsteady unilateral heating described by thermal similarity criteria

05 p0955 A70-17070

Heat stress due to microwave radiation, establishing reduction factor for radiation protection guide number under adverse thermal environments

06 p0998 A70-17202

Thermal and mechanical stresses in rectangular composite beams, considering effects of temperature and reinforcing fiber orientation

06 p1164 A70-17503

Uncoupled quasi-static boundary value problem for linear viscoelastic solids undergoing thermal and mechanical deformation solved by computational algorithm

06 p1168 A70-17937

Energy methods used in thermoelastic analysis of thermal stresses and deflections in thin rings

07 p1401 A70-18935

Unsteady temperature field and thermal stresses in reinforced anisotropic plate strengthened at rim by thin isotropic rod

07 p1408 A70-19543

Cylindrical Mo single crystals during cyclic heating, studying characteristic dislocation changes at various stages of thermal fatigue

07 p1308 A70-19609

Simulated Concorde kinetic heating system for ground studies of thermal stresses

07 p1250 A70-19744

Computer procedures for solving temperature stresses in thin infinite isotropic viscoelastic plate with heat transfer

07 p1411 A70-19817

Temperature stress distribution in cylinder or sphere with variable surface temperature and heated by external sources

07 p1411 A70-19819

Temperature stress in ring-like plate caused by point heat source, discussing thermoelastic problem

07 p1413 A70-20147

Thermoelastic stress degradation of injection lasers at high excitation levels, giving critical current densities for short pulse, CW and quasi-CW conditions

08 p1512 A70-20861

Steady temperature field and stresses produced by thermal sources in infinite elastic plane containing insulated rectilinear crack, determining thermoelastic state of half plane

08 p1587 A70-21172

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses

[ASME PAPER 68-WA/MET-19] 08 p1591 A70-21457

Transient thermal stresses in plates with distributed heat source and heat exchange with arbitrary time dependent surroundings

08 p1593 A70-21623

Cyclic heating and thermal stresses effect on fatigue strength and durability of turbine blade alloys and structural elements

09 p1771 A70-22463

Temperature and stress fields in rotating thin tube exposed to stationary heat source with constant strength, considering materials

09 p1774 A70-22579

Boundary point least squares technique extended to thermal and thermal stress problems in similar regions, deriving temperature and stress functions

09 p1774 A70-22580

Thermal strain measurement in operational and experimental components of high temperature plant, discussing full-bridge weldable type strain gage for transient strains

09 p1675 A70-22582

Thermo-elastic analysis and optimum start-up in power plant, discussing transfer function for thermally loaded bodies with restricted boundary temperature

09 p1774 A70-22584

Plastic growth of pressurized shell under cyclic thermal stresses superimposed on steady pressure load, investigating shake down using bending approximation

09 p1774 A70-22586

Elastic solution and finite element method applied to heat conduction and thermal stress in temperature field determination

09 p1774 A70-22587

Thermal gradients and associated strains measurement in steam turbogenerator casings, considering strain gage placement and heat transfer calculations

09 p1774 A70-22590

Turbine components thermal stress calculations for static and variable loads, considering plastic strain, creep and temperature effects

09 p1775 A70-22592

Creep failure fatigue life prediction methods involving hold period effects on high temperature fatigue properties

09 p1775 A70-22594

Thermal stresses in gas turbine blade calculated, showing role of initial temperature increase of blade cooling air

09 p1775 A70-22596

Thermoelastic stresses in plates and shells in random temperature fields, studying influence on service life

09 p1778 A70-23084

Structural elements reliability determination simulated by microinhomogeneous polycrystalline medium under thermal stresses and in stationary nonuniform temperature fields

09 p1778 A70-23085

Thermal stress state of nonuniformly heated elastic body with bounding surfaces formed by parts of coordinate surfaces

09 p1778 A70-23087

Axisymmetric thermal stress state in bodies of revolution studied by successive approximation algorithm for digital computer

09 p1778 A70-23088

Thermal stress concentrations at arbitrary holes for nonlinearly elastic materials, developing small deformation theory for two dimensional problem

09 p1779 A70-23093

Algorithm for stress-strain state calculation of nonuniformly heated cylinder weakened by star-shaped cavity

09 p1779 A70-23094

Thermal stress freezing during optical polarization study of perforated disk three dimensional thermoelasticity

09 p1780 A70-23105

Thermal stresses determination in turbine blades by making analogy between actual and electrical model, using EGDA integrator

09 p1785 A70-23598

Temperature fields and thermal stresses in FN fiberglass reinforced textolite under nonstationary unilateral heating, determining stress as function of time and heating rate

09 p1710 A70-23724

Temperature limitation on CRT tube performance in high brightness displays imposed by glass breakage danger, discussing liquid cooling of phosphor substrate

09 p1686 A70-23759

Heat tolerance time extension due to prior body cooling observed in aircrew subjected to heat stresses

10 p1824 A70-24036

Stress-strain determination in nonuniformly heated thin walled cylindrical beams with nonlinear stringers and skin

10 p1957 A70-24281

Environmental thermal stress effect on human performance under high mental and low physical workload

10 p1812 A70-24505

Dynamic stresses, temperature and displacements fields in thin circular disk under transient heat sources, considering mechanical resonance vibration

10 p1958 A70-24518

Algorithm for propellant flow rate increase of nuclear rocket in minimum time without exceeding maximum allowable stress in reactor core

10 p1914 A70-24870

Transient thermal stresses in restrained-in-bending slab with surfaces heated and cooled with finite heat transfer coefficients

10 p1964 A70-25095

Nomograms for thermoelastic stress in plate determined as function of dimensions and heat transfer

10 p1965 A70-25300

Transient and steady state thermal stress distribution measured by strain gages embedded in epoxy models

11 p2130 A70-25585

Transient and steady state thermal stresses measured by holographic extension of photoelastic analysis

11 p2049 A70-25592

Semiinfinite elastic body with instantaneous heat source on surface, analyzing temperature and thermal stress distributions

11 p2139 A70-26406

Thermal stress /high ambient and body temperatures/ effect on human performance in high mental and low physical activities

12 p2177 A70-27043

Thermal stresses in temperature dependent multilayered cylindrically anisotropic hollow cylinders

12 p2321 A70-27203

Thermal metal fatigue testing, including resistance to cyclic temperature variation, operating conditions simulation and stress-strain determination

12 p2322 A70-27218

Thermal stress concentration in constant thickness orthotropic plate with rounded square hole

12 p2323 A70-27338

Hollow homogeneous polymer cylinder thermoelastic stressed state, analyzing radial temperature and Poisson Coefficient variations

12 p2325 A70-27532

Ring rib structure transient thermal stresses analysis using photothermoelastic method

12 p2327 A70-27982

Thermoelastic stresses distribution in transmitting dielectric under short nonfocused laser pulses

12 p2251 A70-28327

Stress concentration in fiber reinforced materials resulting from thermal self straining, using finite element method and photoelastic analysis

13 p2509 A70-28533

Hypersonic wind tunnel testing of Plexiglas and nylon hemispheres instrumented with strain gages and thermocouples, comparing with calculated strain, temperature and ablation

13 p2520 A70-28727

Thermal stresses in solid nonhomogeneous sphere in high periodic temperature field, assuming temperature dependent Young modulus and linear thermal expansion coefficient

13 p2512 A70-28979

Elastoplastic thermal stress analysis using finite element matrix method exemplified by cylindrical bar induction quenching

13 p2513 A70-28992

Thermal stresses and curing in electronic modules transfer molding, discussing various design test models

13 p2420 A70-29252

Initial thermal stresses effect on natural oscillation frequencies of thin cylindrical elastic shells, obtaining linearized equations of motion and boundary conditions

13 p2514 A70-29286

Thermal stresses dependence on temperature field during axisymmetric heating of rigid cylindrical shells

13 p2421 A70-29426

High temperature dislocation model based on dislocation dynamics, rate theory and varying back stress ratio

13 p2436 A70-29563

Thermoelastic stresses in sphere with cylindrical cut under axisymmetric temperature field and constant surface temperature

14 p2655 A70-30135

Thermally induced strain measurement using four gage rosettes without temperature gradient limitations

14 p2585 A70-30684

Crack initiation and breakdown under thermal stresses of boron nitride containing aluminosilicate

15 p2764 A70-31532

Point heat source generation of thermal stresses in elliptical plate with circular hole, using functions of complex variable for stress field determination

15 p2818 A70-32182

Thermal loads on semiconductors in solid state converters during short circuit and overload

15 p2709 A70-32205

Elastic micropolar body thermal stresses induced by discontinuous temperature field, using differential equations of thermoelasticity

15 p2822 A70-32353

Initial thermally stressed state of solid bounded by concentric circular cylinders, applying Cauchy thermoelastic stress theory

16 p2987 A70-32993

Ceramic material ranking, using thermal stress crack initiation method

16 p2934 A70-33274

Book on elasticity theory covering end effects, Saint Venant principle, edge and screw dislocations, moire method, thermoelasticity, cavity and inclusion effects, Muskhelishvili methods, etc

17 p3183 A70-34603

German monograph on thermal stresses due to thermal shocks on front surface of infinitely long circular solid cylinder

17 p3189 A70-35371

Nonaxisymmetric thermal stress distribution in infinite elastic solid containing external stress-free crack with prescribed heat flux

17 p3196 A70-35437

Cylindrical shell of variable thickness, deriving axisymmetric thermal stresses in terms of hypergeometric functions

18 p3336 A70-36137

Critical stresses and stability of thin Maxwell plates under random temperature fields

18 p3337 A70-36368

Thermal effects on aircraft elastic vibration mode shapes, recommending investigation to develop analysis and design tools

18 p3213 A70-36459

Cyclic plastic breakdown of thin cylindrical shell under ring shaped load in temperature field, using linear programming method

18 p3341 A70-36585

Half space nonstationary temperature field with mobile heating at edges, using integral transformations

18 p3348 A70-36725

Graphite-epoxy resin cross-ply composites fabrication, analyzing residual thermal stresses role in cracking

[ASME PAPER 70-GT-84] 18 p3279 A70-36828

Combined mechanical and cyclic thermal stresses effect on plastic deformation buildup in E1435 alloy preceding breakdown

19 p3449 A70-37349

Gliders made of glass fiber reinforced plastics, investigating thermodynamic properties under solar irradiation and surrounding warm air

19 p3454 A70-37370

Transient thermal stresses in spherical shell with distributed source and general Sturm-Liouville boundary conditions

19 p3539 A70-37800

Thermoelastic stresses in infinite anisotropic slab due to temperature field variations along thickness and length

19 p3539 A70-37872

Book on thermoelasticity covering thermal stresses in disks, plates, shells and bodies of revolution under steady and unsteady temperature fields

19 p3541 A70-37974

Composite body with free surface under plane deformation, analyzing residual, thermal and dislocation stresses dependence on elastic constants

19 p3544 A70-38332

Machine parts fatigue strength under thermal cycles, studying nonlinear dependence of energy dissipation per unit volume on cycles number

19 p3547 A70-38427

Bearing strength and rupture of reinforced plastic composites under intense one-sided electric heating and hydrostatic pressure due to pyrolysis of plastic bond

19 p3455 A70-38462

Spherical shell under nonuniform temperature field, calculating stress-strain state around round hole

20 p3719 A70-39247

Plate temperature field and stress distribution under thermal pulses, evaluating critical heat load for damage

20 p3737 A70-39635

Infinite elastic plate with pair of insulated unequal circular holes, calculating thermal stresses

20 p3720 A70-39672

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

20 p3720 A70-39676

Stressed state in thermoelasticity plane steady state problem of thin plate under bending based on dislocations and temperature stresses relationship

20 p3721 A70-39780

Thermal stress and changes in modulus of elasticity and expansion coefficient effects on dynamical properties of turbine disks at high temperatures

20 p3721 A70-39783

Medium thickness shells under thermal creep using Saint Venant semiinverse method

20 p3722 A70-39787

Thermally induced stress birefringence effect on linearly polarized CW YAG-Nd laser

21 p3834 A70-40566

Silicon solar cell array interconnector design based on analysis of stresses caused by thermal expansion and vibrational motion

21 p3756 A70-41009

- Anisotropic elastic solid body thermal stresses, investigating static plain strain problem in thermoelastic linear theory 21 p3936 A70-41414
- Materials for glass-metal compressed joints, tabulating stress and thermal expansion coefficients 22 p3999 A70-43447
- Thermomechanical contact and heat transfer on reinforced edge in plates butt joined by curvilinear closed rigidity rib 22 p4120 A70-43718
- Nonsteady temperature and thermal stress distribution in gas turbine blades, using plastic model and photothermoelastic method 22 p4093 A70-43743
- Cryogenic pipelines cooldown to operating temperature, calculating cryogen flow rate limits due to thermal stresses in steel and Al flanges 23 p4280 A70-44368
- Cylindrical shells dynamic thermoelastic response to sudden rotating thermal inputs, using Galerkin method 24 p4421 A70-45285
- Pure Al thermal cycling tests, investigating effect of minimizing thermal stress during quenching on behavior of dislocations 24 p4360 A70-45518
- German monograph on thermally induced elastic stress effects on crack formation and propagation in plates 24 p4422 A70-45524
- Polar elastic materials constitutive relations for thermoelastic couple stresses by general theory of incompatible strains, obtaining linearization for isotropic materials 24 p4428 A70-45578
- Tempering stress in circular plates and cylinders in casting of solid propellants 24 p4427 A70-46147
- THERMAL VACUUM TESTS**
- Explorer 38 critical component equilibrium temperature tests in thermal vacuum chamber using modified solar simulator, noting agreement with model [AIAA PAPER 69-999] 02 p0275 A70-12527
- Apparatus for short term thermal vacuum mechanical testing of materials 03 p0463 A70-13253
- Machine for refractory crystals creep testing in thermal vacuum or inert protective medium 03 p0493 A70-13959
- Material evaluation and selection for compact nuclear reactor control bearings operating at high temperature in vacuum [ASME PAPER 69-WA/LUB-11] 04 p0697 A70-14765
- Temperature dependence of Vickers pyramid hardness for Ti, Zr and Hf carbides at wide temperature range in vacuum 08 p1516 A70-20986
- Apollo lunar module manned testing in thermal vacuum, emphasizing safety aspects of hardware, procedures and training 10 p1859 A70-24389
- Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results [AIAA PAPER 69-1013] 11 p2051 A70-26142
- Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits [AIAA PAPER 69-1012] 11 p2149 A70-26153
- Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation [AIAA PAPER 69-1033] 13 p2384 A70-28518
- Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters [AIAA PAPER 69-991] 15 p2718 A70-32515
- Thermal mapping vacuum chamber tests of nuclear fuel capsules for lunar surface experiments, using remote IR radiometric microscope 15 p2718 A70-32800
- Metals and hard materials sliding wear due to granular abrasives in heated vacuum chamber 17 p3100 A70-34646
- Real time data processing and display for spacecraft thermal vacuum testing, using hybrid computer 17 p3059 A70-35176
- Creep testing machine with constant load for HF thermal cycling under vacuum 17 p3063 A70-35587
- Solar simulation methods, discussing optical elements and artificial radiation sources suitability for thermal testing 19 p3398 A70-38282
- Solar simulator combined with space environment simulation chamber for thermal tests of artificial satellites 19 p3398 A70-38283
- Spacecraft thermal vacuum test installations design and operations for locating spacecraft structural weak points 19 p3400 A70-38297
- Signal measurement and processing in thermal vacuum and space simulation tests of Azur and Dial satellites 19 p3400 A70-38298
- Space environment simulation and thermal vacuum tests for satellite thermal balance during development 19 p3401 A70-38300
- Space environment simulator for thermal vacuum performance of artificial satellites and components 19 p3401 A70-38308
- Apparatus for short term thermal vacuum mechanical testing of materials 19 p3401 A70-38471
- Polyimide resin vacuum thermal decomposition, using mass spectral and differential thermal analysis 21 p3783 A70-42133
- THERMALIZATION [ENERGY ABSORPTION]**
- NT NEUTRON THERMALIZATION**
- Molecular densities and population inversion pulse shape in working gas in mixture with thermally excited auxiliary gas 10 p1920 A70-25112
- Elastic energy transfer cross sections calculation of H-H scattering to estimate neutralized solar wind particles thermalization 18 p3309 A70-36951
- THERMIONIC CATHODES**
- MHD generator cathode current-sheath voltage characteristics for thermionic arc spot emission mode, noting role of cathode temperature [ASME PAPER 69-WA/HT-51] 04 p0625 A70-14797
- Cathode emission from hollow cathode controlled by variable magnetic field to ensure proper I-V characteristics for efficient ion generation in thrusters [AIAA PAPER 70-175] 06 p1131 A70-18032
- Arc ignition and cathode spot movement dynamics of thermionically emitting cathode surfaces in heat feedback plasma 21 p3859 A70-41903
- Thermal emission cathodes made from lanthanum, yttrium and gadolinium hexaborides, measuring I-V characteristics 22 p3998 A70-43442
- THERMIONIC CONVERSION SYSTEMS**
- U THERMIONIC POWER GENERATION**
- THERMIONIC CONVERTERS**
- Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization 01 p0150 A70-10173
- Plasma instabilities of Ce filled auxiliary discharge thermionic energy converter compared with Langmuir theory 03 p0415 A70-14367
- Thermionic converter with oriented W electrodes, describing test method and computerized data acquisition for performance mapping 04 p0627 A70-14945
- Anode work functions from cesiated metal surfaces as parameters for thermionic converter systems analysis 04 p0627 A70-14946
- Mo/Mo cylindrical thermionic converter steady state performance, measuring efficiency and power density at various low emitter and collector temperatures 04 p0627 A70-14947
- Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization 10 p1925 A70-25018
- Nuclear converter with porous metal adsorption reservoir working with or without liquid cesium 10 p1915 A70-25039
- Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect 10 p1808 A70-25124
- Solar energy direct conversion into electricity, surveying photoelectric, thermoelectric and thermoemissive methods 15 p2677 A70-31598
- Anodic temperature effect on Cs thermionic converter operation under arc regime, obtaining potential jump electron temperature relation near anode 15 p2677 A70-32119
- Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect 20 p3568 A70-40517
- Electron and ion transport in cesium plasma for thermionic and MHD energy converters 21 p3859 A70-41912
- Radioisotope thermoelectric generator with lead telluride converter, discussing intact reentry and impact capability, refractory construction and reliability 22 p4072 A70-43196
- THERMIONIC DIODES**
- NT CESIUM DIODES**
- Thermionic diode development for nuclear reactor systems [ASME PAPER 69-WA/ENER-5] 04 p0717 A70-14900
- Reactor gamma in-pile effects on thermionic diodes simulated in electron accelerator, noting ion production insufficient to support saturation currents 04 p0717 A70-14948
- Vacuum-type thermionic laboratory diode featuring variable electrode spacing, interchangeable electrodes and guard-ring structure 04 p0628 A70-15400
- Electron work function variation of W in Ba-Cs-Sr vapor combinations determined using thermionic diode 05 p0891 A70-15974
- Thermionic diode development for nuclear reactor systems [ASME PAPER 69-WA/ENER-5] 15 p2773 A70-31959
- THERMIONIC EMISSION**
- Thermionic emission characteristics of W and Mo subjected to focused CW carbon dioxide laser radiation, discussing direct energy conversion 02 p0312 A70-12068
- Laser-induced electron emission from metals and insulators in form of evaporated films and single crystals, discussing many-photon photoelectric effects and thermionic emission 08 p1556 A70-21509
- Nomographic Richardson-Dushman equation solutions for thermionic electron emission devices, giving current density for various work functions and electrode temperatures 12 p2271 A70-26894
- Electrostatic probes response due to thermionic electron emission, considering I-V characteristics and space-charge-limited current 13 p2459 A70-28635
- Nb single crystal faces electron work functions and comparison of thermionic emission patterns with Ba-Nb system 14 p2625 A70-30162
- Interactions between moving alkali-metal seeded dense plasma and metallic thermionically emitting electrode with surface properties influenced by seed particle absorption 20 p3681 A70-40007
- THERMIONIC EMITTERS**
- Diffusion rates in refractory metal alloys for thermionic emitters as function of time and temperature [GA-9495] 05 p0892 A70-16075
- Surface oxidation effects on thermionic work functions of Be determined by visual observation and X ray diffraction patterns analysis 12 p2288 A70-28004
- THERMIONIC POWER GENERATION**
- Rankine cycle technology concerning high temperature, refractory alloy and liquid metal experience, showing applicability to nuclear Brayton and thermionic power systems 02 p0229 A70-12513
- Electrical power system adaptable to intermediate solar probes, discussing thermoelectric, thermionic, photovoltaic systems and battery for energy storage [ASME PAPER 69-WA/SOL-5] 04 p0625 A70-14753
- Optimal control of nuclear propulsion and energetic plants of space vehicle, considering thermionic generator 13 p2450 A70-28436
- Unmanned electric propulsion spacecraft with external fuel and flashlight thermionic reactors, discussing thruster arrays, weight and performance for reference Jupiter orbiter mission [AIAA PAPER 70-644] 16 p2966 A70-33547
- Thermionic reactors for spacecraft auxiliary power and electric propulsion, discussing in-core conversion system and diodes 22 p4071 A70-43191
- THERMIONIC REACTORS**
- U ION ENGINES**
- U NUCLEAR ROCKET ENGINES**
- THERMIONICS**
- Cool flame isothermal theory with oscillatory features accounting for damping time evolution and thermic reaction nature 21 p3942 A70-40886
- High temperature acceleration of propellants in electrothermal thrusters including resistojets, arcjet, thermionic and plasma configurations 22 p4091 A70-42763
- THERMISTORS**
- Corrections to observed thermistor temperature profiles presented for spherical bead thermistors with long lead or thin film mounting [AAS PAPER 69-568] 04 p0687 A70-14664
- Monitor for linearizing nonlinear characteristics of thermistors used for temperature sensors in Apollo Telescope Mount, optimizing circuit values with FORTRAN IV computer program 05 p0851 A70-16692
- Rocket sounding to obtain thermistor temperature profiles of 30-65 km atmospheric region, discussing error correction equation 07 p1288 A70-20261
- Thermistors used in temperature measurements aboard satellites, discussing results of electrical and mechanical tests 08 p1493 A70-20612

Ambient temperature measurement by constant level balloon mounted thermistors, discussing errors from differential heating of thermistor support by solar radiation
10 p1886 A70-23935

Air velocities measurement with heated thermistors probe, discussing calibration and reliability dependence on flow velocity range
13 p2405 A70-28841

Temperature measurement of rotating shafts under cyclic loading, using thermistor as thermal radiation sensor
15 p2734 A70-31581

Thermistors theory, manufacture, stability, drawbacks and applications to temperature sensors
16 p2915 A70-34322

Thermoresistor parameters of organic semiconductor polymers with conjugated bond system, plotting temperature and EV characteristics
20 p3595 A70-38966

Thermistor and dew cell as remote air temperature and dewpoint measurement at airports
21 p3822 A70-40760

High resistance thermistor measurements of rapid blood temperature variation, discussing power dissipation effects
21 p3769 A70-41143

Regional cerebral cortical blood flow measurement, using heat clearance thermistor probe
23 p4157 A70-45082

Long term storage effects on recalibrated thermistors performance stability, comparing measurements with first calibration data
24 p4333 A70-45136

THERMO-PHOTOVOLTAIC GENERATORS
U PHOTOELECTRIC GENERATORS
U THERMOELECTRIC GENERATORS
THERMOAEROELASTICITY
U AEROELASTICITY
U THERMOELASTICITY
THERMOCHEMICAL PROPERTIES
NT HEAT OF COMBUSTION
NT HEAT OF FORMATION
NT HEAT OF VAPORIZATION
Thermochemical relaxation influence on shock heated plasma gases via heat transfer experiments on ionized Ar, molecular nitrogen and carbon dioxide
03 p0536 A70-14366

Computerized nonequilibrium thermochemical gas dynamic solutions for nozzle, shock tube and stream tube flow with arbitrary species and kinetic reactions numbers
22 p3982 A70-42762

Thermal decomposition of freeze dried Ta and niobium-lithium-oxalate, using surface area and electron micrographs
24 p4363 A70-46212

THERMOCHEMISTRY
NT AEROTHERMOCHEMISTRY
Chemical bonding of high temperature molecular species, discussing ab initio calculations for diatomic atoms
07 p1225 A70-19882

Ablation products and high temperature boundary layer chemistry of polytetrafluoroethylene /Teflon/ in arc jet streams using mass spectrometer
07 p1319 A70-19886

Thermochemical predictions for high temperature oxidation of Mo and W, discussing oxide films or scales, reactant gases flow rate, etc
09 p1630 A70-22943

Quartz- and silicate-graphite mixtures carbothermal reduction in vacuum at 1400 C
20 p3583 A70-40425

Soviet papers on thermodynamic and thermochemical constants covering solid, liquid and gaseous state properties, phase equilibrium, etc
22 p4123 A70-42676

Thermochemical method for directional crystallization of wear-resistant alloy coatings on machine parts
23 p4205 A70-44043

Differential scanning calorimetry and thermogravimetric analysis combination for thermochemical kinetic measurements, matching analytical and experimental curves for data accuracy
23 p4196 A70-44429

Nondestructive thermal and thermochemical treatment penetration depth measurement in metal, examining magnetic test and ultrasonic techniques
24 p4346 A70-45721

THERMOCOMPRESSION
U COMPRESSING
U HEATING
THERMOCOUPLES
NT THERMOPILES
Thermocouples response to rapid temperature rise produced by discharge from low inductance high voltage capacitor bank
03 p0486 A70-13559

Embedded sheathed thermocouples temperature measurement of cooled jet engine turbine buckets subjected to high heat flux
03 p0486 A70-13560

Doped beta-iron disilicide thermocouples measured for electrical characteristics and energy conversion efficiency at various temperatures
05 p0798 A70-16357

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering
07 p1341 A70-20107

Thermocouple vacuum gauge joined to Apollo lunar sample return containers /ALSRC/, describing two step welding procedure with transition cylinder
08 p1507 A70-21483

Tungsten-rhenium thermocouple for high temperature measurement of samples under unsteady heating processes, analyzing instrument error sources
09 p1789 A70-23108

Si-Ge air-vacuum thermocouples for thermoelectric conversion, describing construction materials, mechanical and electrical properties, radiative heat transfer operation, etc
10 p1807 A70-24896

Thermoelectric generators design, discussing Si-Ge air-vac thermocouple configurations, compression modules, thermal losses, etc
10 p1808 A70-25034

Electric current flow effect on thermoelectric figure of merit from thermal conductivity measurements on thermoelement
11 p2065 A70-25768

Transient heat flux measurement with surface thermocouples, thin film resistance thermometers and mathematical computation programs
11 p2065 A70-25768

Thermocouples performance during fast varying temperature measurements in solids, considering physical parameters effects on accuracy
15 p2734 A70-31646

IR radiating bodies angular displacement determination by vacuum evaporated thermocouple radiation detectors, describing stationary communication satellite altitude control
15 p2740 A70-32422

Electric temperature sensors accuracy and stability, considering thermocouples, resistance thermometry, radiation and color pyrometry
15 p2743 A70-32798

Thermoelectric force due to thermocouple inhomogeneities, showing relation to temperature gradient and measurement error
16 p2900 A70-33070

Cryogenic temperature measurement including metallic and semiconductor resistance thermometers, thermocouples and bibliography
17 p3082 A70-34740

W-3 percent Re-W-25 percent Re thermocouple reliability and stability, describing emf vs temperature table in 0-2400 C range
18 p3257 A70-36200

Surface temperature fluctuations during steady state boiling from tube, using fast response thermocouple
18 p3347 A70-36504

Thermocouples and resistance thermometers comparison for low temperature measurements
19 p3432 A70-38703

Thermocouple and IR temperature measurement techniques comparison for double base solid propellants at low pressures
20 p3694 A70-40275

Heat conduction errors in immersion thermocouples and resistance temperature sensors, using mathematical model
21 p3823 A70-40856

Installed system calibration thermocouples using temperature plateaus due to pure metals melting and freezing heat of fusion
21 p3823 A70-40857

Thick film thermocouple gages for roughened model surface heat flux measurements in high Reynolds number shock tunnel
21 p3824 A70-40860

Thermocouple transient response characteristics in deflagrating and ablative low conductivity materials with high temperature gradients
22 p4122 A70-42440

Cryogenic thermocouples of various metal pairs for low temperature measurements, discussing performance tests and calibrations
24 p4378 A70-45385

THERMODYNAMIC COUPLING
Multicomponent gas absorption analysis to illustrate interactions of coupled fluxes in ammonia-water system
08 p1597 A70-21028

Thermomechanical coupling effect on stability of elastic continuous systems subjected to nonconservative forces, reducing flutter load by thermal damping
08 p1589 A70-21245

Equatorial electrojet Lorentz coupling to neutral atmosphere as source of long period traveling ionospheric disturbances
13 p2399 A70-29235

Thermal anchoring of wire or rod components to heat sinks in cryogenic equipment in vacuum
14 p2584 A70-30501

THERMODYNAMIC EQUILIBRIUM
THERMODYNAMIC CYCLES
NT BRAYTON CYCLE
NT RANKINE CYCLE
NT STIRLING CYCLE
Periodic process analysis method based on trigonometric Fourier series, noting applications to heat conduction problems
03 p0606 A70-13519

Systematization of thermodynamic cycles from elementary reversible evolutions concerning exchange of work, heat and combined relations
06 p1173 A70-17470

Cryogenic refrigeration below 20 K, analyzing cycles using similarities of work and heat exchange mechanisms
09 p1726 A70-22290

Turbofan engine performance optimization by closed form solution of operating cycle parameter functions
18 p3303 A70-36840

Stepwise heat removal for increased continuous combustion gas turbine engine cycle efficiency, deriving equations describing cycles
22 p4092 A70-43372

THERMODYNAMIC EFFICIENCY
MHD generators physical phenomena, discussing thermal efficiency, inlet parameters, operating principles, etc
04 p0625 A70-14716

Thermal efficiency of modified transtage of Titan 3C spacecraft, discussing environmental simulation, heat rejection system and test firing
06 p1156 A70-18027

Finned tube radiators with constant longitudinal specific heat flow, determining thermal efficiency and optimal thermal and structural parameters
06 p1184 A70-18556

Multiple pass tube heat exchangers efficiency, solving energy and heat transfer equations from fluids homogeneity and constant thermal capacity considerations
08 p1596 A70-20613

Reciprocating Rankine-cycle engine with organic working fluids, noting piston speed and efficiency
11 p1982 A70-25372

Working body properties effects on one component liquid-metal MHD system efficiency with vapor condensation cycle
12 p2164 A70-27329

Heat transfer in Z shaped regenerative heat exchangers with/without air mixing, determining parameters defining thermal efficiency
13 p2520 A70-28857

Transpiration cooling for high temperature gas turbines, investigating effects on aerodynamic and thermodynamic performance
18 p3303 A70-36839

Flexible heat pipe test for heat flux and wick pumping capacity under vibration and evaporator-condenser modification
21 p3945 A70-41040

Liquid or vapor phase working fluids penetration effects on steady state and transient performance of hot reservoir gas controlled heat pipes
21 p3946 A70-41047

Heat pipe performance map with ammonia as working fluid, comparing thermal transport efficiency with water pipe
21 p3947 A70-41050

Thermal efficiency of ceramic and metal heat exchangers for biowaste resistojet thrusters
21 p3868 A70-41779

Working body properties effects on one component liquid-metal MHD system efficiency with vapor condensation cycle
21 p3760 A70-42070

Effective pressure ratio nomographs for mechanical energy conversion and heat transfer of closed regenerative Stirling engines, using isothermal theory
22 p4091 A70-42757

Stepwise heat removal for increased continuous combustion gas turbine engine cycle efficiency, deriving equations describing cycles
22 p4092 A70-43372

Computerized calculation of gas turbine cycles thermal efficiency, using hydrocarbon fuel, considering fuel composition and heat of combustion changes
22 p4125 A70-43439

Thermodynamic-kinetic analysis of fluorine/lithium/hydrogen tripropellant combustion efficiency, discussing liquid metal atomization, firings, facility and thrust chamber
23 p4232 A70-44512

Film cooling efficiency for flat plate behind tangential slot at blowing coefficients below unity
23 p4282 A70-44727

THERMODYNAMIC EQUILIBRIUM
Tungsten effect on phase transformations and carbide reactions to attain equilibrium at 850 C in Ni-base superalloys
01 p0118 A70-10727

Hypersonic dissociated laminar boundary layers with/without heat transfer calculated by integral method for case of thermodynamic equilibrium
01 p0003 A70-10933

Equilibrium of thin curved cylindrical panels subjected to thermal expansion and pressure numerically analyzed by Ritz method

01 p0201 A70-10945

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region

01 p0068 A70-11584

Local thermodynamic equilibrium conditions in superhigh pressure He plasma produced by laser action, obtaining threshold electric field relationship with gas pressure and temperature

02 p0312 A70-12078

Transient energy transfer during expansion of plane layer of radiating gas bounded by strong shock, assuming LTE and perfect inviscid nonconducting gas

02 p0279 A70-12230

Structure of hydrogen-oxygen diffusion flame in equilibrium using iterative solution

02 p0352 A70-12796

Hypersonic flow in thermodynamic equilibrium of diatomic dissociating gas with power law shock, investigating self similar solutions of Van Dyke small disturbance equations

03 p0405 A70-12925

Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air

03 p0409 A70-13874

Equilibrium composition and thermodynamic functions calculated for mixtures of dissociating and ionizing high temperature gases from standard data

04 p0780 A70-14538

Thermal steady state characterization of isotope radioisotope thermoelectric generator, discussing design features and heat transfer models for operating temperature and output performance [ASME PAPER 69-WA/ENER-12]

04 p0717 A70-14897

Thermodynamic equilibrium of rotating liquid He II on basis of Landau theory, noting stability and dissipative effects

04 p0785 A70-14986

Classical Couette flow for emitting and conducting gas media, discussing velocity distribution and temperature effects at LTE and non-LTE

04 p0787 A70-15675

Boltzmann-type kinetic equation for homogeneous electron plasma in uniform magnetic field, describing relaxation to thermal equilibrium by convergent collision integral

05 p0888 A70-16329

LTE departures in late B stars from measurements of Balmer and Paschen discontinuities

05 p0919 A70-16937

Dynamic response of constant resistance anemometers, investigating unsteady probe thermal equilibrium, inductance and feedback equations

06 p1063 A70-17620

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases

06 p1083 A70-18563

Particles infinite systems equilibrium state by canonical ensemble theory, demonstrating existence and uniqueness of limiting distribution functions dependence on density

07 p1333 A70-18936

Critical regions equilibrium thermodynamic properties of fluids and magnets using scaled equation of state

07 p1421 A70-19298

Electrochemical generators based on thermodynamic equilibrium processes, deriving expressions for EMF, efficiency, and I-V characteristics

07 p1196 A70-20462

Fluids equilibrium stability within medium at constant temperature and pressure, discussing time behavior of thermodynamic processes

09 p1786 A70-22062

Stainless steel corrosion rates in flowing liquid Na from mechanism based on thermodynamic partitioning of oxygen

09 p1706 A70-22942

Plane, cylindrical and spherical blast waves structure with ionization at local thermodynamic equilibrium analyzed using successive approximation to non-similar solution

10 p1967 A70-23991

Viscous fluids nonlinearized thermodynamical description with equilibrium state defined by two parameters, expressing angular momentum density by momentum density

10 p1967 A70-24153

Thermal imbalance effect on stellar pulsational stability using linear quasi-adiabatic pulsation theory

10 p1946 A70-24980

Enthalpy-entropy, enthalpy-pressure and composition diagrams of fluorine-hydrogen system, noting possible applications to rocket propulsion systems

10 p1929 A70-25100

Steady state surface temperature measurement errors by thermistors, thinistors and thermocouples, discussing sources

11 p2052 A70-26361

Transformed distribution function of particle velocity of plasma in Debye thermodynamic equilibrium approximation based on statistical mechanics

11 p2091 A70-26459

Book on tensor calculus in materials science covering thermodynamic equilibrium, gaseous and solid phase heat engines, solids crystalline structure, etc

12 p2282 A70-26866

Trumpet-type plane waves instability thresholds in plasma drifted by electric field, including calculation of thermodynamic equilibrium

12 p2184 A70-27236

Shock ionized xenon electrical conductivity measurement at high temperatures as function of Mach number, noting equilibrium effects

12 p2281 A70-27807

Nonlinear dielectric function and propagators of plasma submitted to electric field by Vlasov equation iterative solution, considering electron plasma in thermodynamic equilibrium

13 p2458 A70-28565

Radiative heat transfer through gray gas in equilibrium between concentric spheres, using variational method

13 p2521 A70-29137

Induction plasmas in thermal equilibrium dominated by radial conduction losses, discussing energy balance equation and Ar plasmas at atmospheric pressure

13 p2465 A70-29701

Thermal induction plasma discharge characteristics, considering radiation and conduction losses

13 p2465 A70-29702

Magnetic moment fluctuations of arbitrary solid body by fluctuation-dissipation theorem for thermal equilibrium

13 p2454 A70-30033

Forbidden lines of OI, NI, CI, Fe II, Ni II, Si I, Si and Ca II in solar absorption, investigating effects on element abundance and gaps in thermodynamic equilibrium

14 p2637 A70-30339

Non-LTE and LTE line profiles and equivalent widths for transitions in singlet and triplet systems of neutral He in hot stars, explaining anomaly

14 p2641 A70-30884

B3V stars atmospheres by LTE model and spectroscopic techniques

14 p2652 A70-31384

Radiatively interacting adjacent plates in presence of collimated solar flux, considering surface roughness effects on equilibrium temperature distribution

16 p3002 A70-33946

Solar limb intensity distribution in Lyman alpha line, computing LTE departures

17 p3162 A70-34895

High temperature plasmas of mixtures of nitrogen with rare gases, calculating equilibrium thermodynamic properties

17 p3195 A70-34932

Non-LTE effects on flux and center to limb variation of solar spectrum at 1500-1680 Å

17 p3169 A70-35384

Nonequilibrium fluid system with two subsystems in local equilibrium, investigating thermodynamic properties including entropy creation

17 p3196 A70-35530

Statistical theory of irreversible transport processes in fluids, considering deviation from equilibrium as stochastic process

17 p3131 A70-35532

Time correlation functions approach to calculation of properties of nonequilibrium ensembles in fluid molecular motions

17 p3197 A70-35535

Dilute gas transport expressions experimental substantiation, emphasizing nonequilibrium thermodynamics as macroscopic theory rather than empirical postulate

17 p3072 A70-35536

Relativistic thermal equilibrium conditions in external gravitational field, considering heat with inertial and gravitational mass

18 p3291 A70-36552

Product distribution of organic nitrogen compounds plasma sources computed by assuming high temperature limited thermodynamic equilibrium

18 p3226 A70-36764

LTE verification for argon plasma generated in free burning arc by measuring atomic line transition probability at various pressures

21 p3854 A70-40588

Cloudy planetary atmospheres model, assessing nonlocal thermodynamic equilibrium role

21 p3813 A70-40903

Elastic bodies under motion-dependent loads, examining thermodynamic conditions of equilibrium states stability

22 p4123 A70-42538

Atomic hydrogen plasma slab, calculating thermodynamic equilibrium deviations effect on resonance radiation

23 p4223 A70-43824

Local thermal equilibrium validity for electron temperature and density determination in reflected shock

waves in He plasma, comparing laser scattering and spectroscopic methods

23 p4229 A70-44986

Non-LTE radiative gas flow conservation equations

24 p4325 A70-45610

Chemical composition and degree of thermodynamic equilibrium reflected in ferromagnesian silicates of chondrites

24 p4411 A70-45793

Thermodynamic equilibrium analysis of metal oxidation and thermal dissociation of oxides in vacuum, noting decreased affinity by evaporation

24 p4361 A70-45835

Statistical characteristics of stability of single phase one component system under external force

24 p4381 A70-46144

Thermodynamic and transport properties of Na, K, Rb and Cs vapors to 3000 K, for use in liquid metal coolant and power systems

01 p0214 A70-10299

Variational methods for investigation of thermal and electrical properties of semiconducting materials, noting accuracy

01 p0159 A70-10759

Vapor pressures of cobalt over pure cobalt and over Ni-Co alloys determined as function of temperature by isotope exchange method

01 p0121 A70-11233

Cooling time estimation for white dwarf stars with ion component undergoing condensation, based on plasma thermodynamic properties

01 p0189 A70-11341

Thermal properties of neutral interstellar gas heated by low energy cosmic rays, noting role of electrons in heating processes

02 p0364 A70-11783

Nb-NbH solid solutions thermodynamic properties at various temperatures described by formulas

02 p0320 A70-12819

Solid thorium yttria electrolyte applications in EMF measurements for Cr thermodynamic properties in Fe-Cr and Ni-Cr alloys

03 p0483 A70-13140

Gas dynamics analysis of explosion phenomena based on unsteady flow fields and thermodynamic properties of chemically reacting substance

03 p0607 A70-13922

Equilibrium model of laminar arc constrictor plasma generator, correlating heat transfer, wall shear stress, friction factor and development length

03 p0533 A70-13952

Electrical and thermal factors in mathematical characterization of electroexplosive devices, including heuristic predictions

03 p0548 A70-14119

Alpha beryllium nitride enthalpy and thermodynamic properties measured between 273-1173 K using drop calorimetric method

04 p0646 A70-14582

Solid and liquid lithium tetrafluoroborate enthalpy relative to 273 K measured at temperatures between 323-873 K, deriving thermodynamic properties

04 p0646 A70-14583

Apparatus and techniques for investigating spacecraft materials mechanical and thermal properties, using vacuum effect to simulate space environment

[ASME PAPER 69-WA/PID-22]

04 p0663 A70-14752

Surface coating optical and thermal properties investigated in preparation for HELIOS solar probe [DGLR-69-46]

04 p0762 A70-15163

Corrosion problems in Ti and alloys chemical and aerospace applications, describing thermodynamics and electrochemistry in aqueous media
04 p0710 A70-15677

Ideal equivalent gas method for studying thermodynamic properties in supersonic gas flows behind shock wave
05 p0831 A70-15872

Thermal and gas dynamic characteristics of aircraft turbine engine annular vaporizing combustion chamber determined from air distribution ratio
05 p0895 A70-15897

Martian surface temperature distributions based on IR scans of disk compared with predictions of thermal properties
05 p0909 A70-16389

Mathematical model for investigating satellite thermal behavior in space based on space simulation in vacuum chamber with walls maintained at liquid nitrogen temperature
05 p0924 A70-17022

Test facilities for studying materials thermophysical properties and stress relaxation, including dynamic hardness measurement and torsion tests up to 2500 K
05 p0830 A70-17074

Thermodynamics of LiBr in anhydrous dimethyl sulfoxide determined at several temperatures using EMF method
06 p1003 A70-17219

Soviet book on thermodynamic and ballistic fundamentals of designing solid propellant rocket engines
06 p1130 A70-17421

Gas mixture internal energy in internal combustion engine cylinder calculated with allowance for thermal discontinuity
06 p1130 A70-17628

Thermal and dynamic considerations of materials choice for satellite mounted telescope mirrors noting Be and silica properties
06 p1064 A70-17781

Surface thermal factors influencing ignition delay time of composite solid propellants, using double wavelength optical detector
[AIAA PAPER 70-121] 06 p1128 A70-18043

Atmospheric thermodynamic properties determined from radar studies of detonation waves from cesium-seeded explosive bursts in lower ionosphere
06 p1012 A70-18542

Thermodynamic properties of nonideal multicomponent gas mixtures including Fermi-Dirac statistics effect, discussing internal partition function for free and confined atoms
06 p1184 A70-18637

Electrical and thermal characteristics of stabilized gas heating by electric arc at high pressures calculated by successive approximation
07 p1350 A70-19840

Dynamic pearlite-austenite transformation and melt temperatures measured in laser-irradiated steel, discussing thermal response as function of heating rate
07 p1301 A70-19897

Helium high energy molecular beams for insulating body heating and thermal constants determination
07 p1344 A70-20129

Heat exchange during solidification of castings in molds, studying thermal properties effect for achieving constant mold surface temperature
08 p1506 A70-21141

Thermodynamic properties of real gases estimated using Hirschfelder equation of state
08 p1598 A70-21363

Thermal properties associated with temperature gradients in He-K plasma, studying mass motions initiated by cold wall contact
09 p1735 A70-22844

Macroscopic properties of thermal molecular flow between coaxial cylinders and concentric spheres, using transpiration theory in Knudsen gas
09 p1788 A70-22906

Oxygen pressure, volume and temperature data and derived thermodynamic properties presented in tabular form
09 p1788 A70-22956

Thermodynamic properties of periodically variable air volume in pneumatic pressure generator of pressure sensor calibration bench
10 p1863 A70-24027

Oxygen-kerosene combustion product composition and characteristics in engine thermodynamic design allowing for intermolecular interaction forces
10 p1968 A70-24284

Perfect gas mixtures thermodynamic functions at high temperatures with correction for Debye-type electrostatic interaction effects
10 p1968 A70-24707

Insulation foils and surface coatings thermal properties effect on radiation properties for spacecraft thermal control systems
10 p1951 A70-24863

CW Nd-doped YAG laser rods, measuring thermal and optical properties before and during pumping with W lamps
10 p1900 A70-24942

Lil thermodynamic properties in dimethyl sulfoxide determined by emf method, discussing ionic solvation energies
10 p1831 A70-25041

Thermodynamic and transport properties of high temperature and pressure gases measured with ultrasonic pulse technique
11 p2147 A70-25753

Heat flow comparator for nondestructive testing of resin-impregnated fiber glass, detecting nonuniformities leading to thermal properties variation
11 p2059 A70-25764

Metals thermal properties simultaneous determination at high temperatures, describing measuring equipment operation and circuitry
12 p2206 A70-27219

Nitrogen tetroxide thermodynamic properties calculation from pressure-volume-temperature equation of state in gas and liquid phases
12 p2332 A70-27975

Charring ablative plastic thermal properties simultaneous measurement using modified heat transfer model and nonlinear regression analysis
12 p2333 A70-28111

Thermohydrodynamic seals design, properties and performance compared with standard mechanical seals
13 p2417 A70-28612

Collection of papers on nickel and nickel alloys covering thermal and mechanical properties during annealing and precipitation hardening behavior
13 p2432 A70-28758

Ni and Ni alloys thermal properties, discussing expansion and conductivity, melting and boiling points, vapor pressure, specific heat, entropy, etc
13 p2432 A70-28759

Thermodynamic data for chemical reactions of Ti alloys formation with Al obtained by measuring galvanic cells emf with solid electrolytes at elevated temperatures
13 p2434 A70-28889

Iron and stony iron meteorite cooling rates and thermal models, showing melting, radioactive heat source redistribution and surface heating effects
13 p2497 A70-29861

Chemically reacting ideal substance model, describing thermodynamic properties and application to energy conversion processes
14 p2533 A70-30529

Lunar IR radiation measurements for estimating thermophysical properties and small scale surface nature
14 p2645 A70-31057

Mercury mm wave observations, examining longitude dependence of disk average brightness temperature and epilith thermal parameters range
14 p2647 A70-31076

Radiative properties of construction properties and working media, noting importance to radiative heat transfer calculation
15 p2827 A70-32143

Thermodynamically perfect fluids in general relativity, considering heat transmission paradox and wave propagation velocities
16 p2997 A70-33103

Monograph on steady shock waves in one dimensional frictionless gas flows with thermodynamic relaxation, using continuum mechanics
16 p2891 A70-33294

Nonlinear regression techniques for statistical simultaneous measurement of thermal properties including convergence criterion
16 p2998 A70-33859

Thermal and mechanical properties of materials for spacecraft booms design
16 p2986 A70-34138

Surface temperature or heat flux density estimation for nonlinear inverse heat conduction problem involving temperature dependent thermal properties
16 p3002 A70-34195

Thermodynamic properties of bcc beta phase in Ti-Cu and Ti-Al systems, discussing activities determination technique
17 p3114 A70-34378

Ti alloys M sub s and beta sub s points thermodynamics, considering initiation of bcc-cph martensitic transformation
17 p3193 A70-34407

Thermal and thermoelastic constants of macroscopically isotropic composite materials based on self consistent calculations
17 p3194 A70-34555

NTWO Fortran IV family of subroutines for thermodynamic and transport properties of nitrogen
17 p3195 A70-34746

Isotropic fluid systems in nonequilibrium, investigating thermodynamic characteristics of transport phenomena
17 p3072 A70-35529

Nonequilibrium fluid system with two subsystems in local equilibrium, investigating thermodynamic properties including entropy creation
17 p3196 A70-35530

Nonideal plasma thermodynamics data, discussing particle interactions, Coulomb potential, stability, etc
17 p3142 A70-35733

Ni-S melts thermodynamic properties in 700-1100 C range by continuous thermal balance method, calculating S vapor pressure
18 p3271 A70-36029

Oxygen dilute solutions in liquid Fe-Ni-Co alloys, investigating thermodynamic properties by hydrogen-water vapor equilibrium
18 p3272 A70-36033

Micropolar elasticity theory, discussing difficulties from erroneous thermodynamic inequality
18 p3335 A70-36061

Elastic continuum conducting heat under general loads, investigating stability thermodynamics-Liapunov criterion relations
18 p3337 A70-36336

Electronic excitation contribution to frozen properties and cut-off criteria of high temperature gas plasma
18 p3296 A70-36955

Soviet reference book on highly refractory elements and compounds covering crystalline, chemical, thermodynamic, thermophysical, electrical, optical and nuclear properties
19 p3451 A70-37470

Dense plasma thermodynamic and electromagnetic properties, discussing correlation energy
19 p3480 A70-38181

One-component rigid epoxy foam system suitable for lightweight electronic potting, determining mechanical, electrical and thermal properties
20 p3652 A70-39167

Carbon/carbon composites constituent characteristics effects on thermal and mechanical properties, using polarized light and scanning electron microscopy
20 p3653 A70-39204

Carbon/carbon composites thermal and mechanical properties measurements by NDT including image transducer, IR scanning and ultrasonic methods
20 p3636 A70-39213

Solid body nonelastic deformation in terms of thermodynamic principles of nonequilibrium processes
20 p3718 A70-39246

Nb single and polycrystalline thermal properties at high temperatures
20 p3648 A70-39639

Apollo 11 fines gas evolution and physical changes via heat treatment, discussing Ar 40 anomaly, lava structure origin and oxidation rate
21 p3907 A70-41577

Reacting planetary carbon dioxide-nitrogen atmospheres high temperature equilibrium thermodynamic and transport properties
21 p3950 A70-41747

Electrical and thermal characteristics of DC magnetic annular arc operating continuously at atmospheric pressure
21 p3805 A70-41758

Oxygen-kerosene fuel combustion products thermodynamic properties, tabulating computed values
21 p3865 A70-41771

Aromatic polysulfone thermomechanical behavior by torsional braid analysis, discussing structure, synthesis, thermal stability, radiation effects, etc
21 p3783 A70-42134

Soviet papers on thermodynamic and thermochemical constants covering solid, liquid and gaseous state properties, phase equilibrium, etc
22 p4123 A70-42676

Specific heat and thermodynamic functions of endo- and exo-isomers of 2-methylbicyclo heptane in 12-310 K temperature range
22 p3982 A70-42681

Gaseous substances thermodynamic functions and chemical equilibrium constants logarithms dependence on temperature and pressure, deriving internally self consistent formulas
22 p4124 A70-42682

Liquid and solid phases of substance, calculating thermodynamic properties and vapor pressure logarithm dependence on temperature
22 p4124 A70-42683

Nonequilibrium gasdynamic and thermodynamic properties of chemically reacting gas mixtures in high expansion subsonic and supersonic nozzles for selected rocket propellants
22 p3982 A70-42761

Isothermal kinetic rates of polymer swelling and dissolution, using thermomechanical analyzer
22 p4059 A70-43078

Isothermal kinetic rates of penetration of polymer by spherical indenter, using thermomechanical analyzer
22 p4059 A70-43079

Thermodynamic parameters of stellar matter in electronic degeneration conditions, discussing energy balances discrepancies
22 p4106 A70-43260

Liquid propellant rocket engine nonisobaric cylindrical combustion chamber parameters from thermodynamic data
22 p4092 A70-43355

Thermomechanical contact and heat transfer on reinforced edge in plates butt joined by curvilinear closed rigidity rib

22 p4120 A70-43718

Time optimal problems involving parabolic equations in heating of rod with piecewise continuous thermophysical characteristics and temperature distribution constraints, deriving iterative solution

23 p4277 A70-44306

Near critical heat transfer in cryogenic fluids, discussing thermodynamic and transport properties

23 p4279 A70-44357

Intermolecular forces at close approach distances in calculating thermodynamic and transport properties of high temperature dilute gases, using molecular beam methods

23 p4222 A70-44430

Thermodynamic properties, tables and equations of state of liquid para hydrogen from liquid-gas and liquid-solid phase equilibria

23 p4220 A70-44434

High temperature aluminum species in vapor over solid alumina, determining thermodynamic properties, composition and accommodation coefficient by Knudsen effusion and mass spectroscopy

23 p4281 A70-44451

Perfect nonrelativistic bounded gas thermodynamics and surface tension, assuming single particle energy level density dependence on external potential

23 p4284 A70-44928

High speed internal combustion engine mixed flow type liquid cooling system, deriving dynamic thermal characteristics from differential equations solution

24 p4393 A70-45502

Psychrometric chart for physiological research involving moist air thermodynamic properties

24 p4304 A70-46275

THERMODYNAMICS

NT AEROTHERMODYNAMICS

NT COMBUSTION PHYSICS

Sliding friction and adhesion mechanisms theories based on thermodynamics, noting frictional heat and adhesive joints

[ASME PAPER 69-LUB-4] Moving gas with thermodynamic relaxation process, discussing bulk viscosity and application to shock structure calculations

01 p0103 A70-10398

Thermodynamics of electrochemical cells consisting of Li with lithium chloride or bromide and thallium amalgam with thallium chloride or bromide in propylene carbonate

01 p0063 A70-10927

Discrete models formulated for thermomechanical behavior of materials with memory, obtaining equations of motion and heat conduction for finite elements of nonlinear continua

01 p0402 A70-11107

Thermodynamic aspects of ray invariance of spectral brightness ratio to square of local index of refraction compared to black body power radiation

01 p0144 A70-11293

Asymmetric thermoelasticity derived for constitutive equations based on thermodynamics of irreversible processes, formulating variational and reciprocity theorems

01 p0209 A70-11384

Integral theorems for wave-type heat conductivity equation

01 p0219 A70-11398

Soviet book on gas thermodynamics of solid propellant rocket engines covering combustion products equilibrium in nozzle and chamber, engine design, etc

02 p0353 A70-11690

Classical mechanics and thermodynamics principles restated using functions of sets, material sets and reciprocal actions between material sets

02 p0339 A70-11896

Gravitational theory for disk galaxies, considering radial velocity variations, spiral structure, heat equation verification, etc

02 p0378 A70-12688

Thermodynamic constitutive equations for large dynamic plastic deformation problems

03 p0585 A70-12971

Heat equation prediction, considering insulated uniform rod with unknown temperature distribution

03 p0604 A70-12993

Unsteady heat transfer theories reviewed to assess steady state heat transfer relations applicability

03 p0605 A70-13401

Thermodynamics of radiation and photosynthesis, discussing Ross-Calvin maximal efficiencies, Duysens method, light and dark conditions and polarized light

03 p0428 A70-14011

Book on rational thermodynamics covering homogeneous processes, internal dissipation, Coleman theorem, wave propagation in dissipative materials, diffusion, chemical reactions, Onsager relationship, etc

03 p0525 A70-14042

Thermodynamics second law application to pyrotechnic systems, discussing solid-solid and reversible reactions

03 p0547 A70-14114

Heat conduction equation solutions, comparing finite element and finite difference methods

[ASME PAPER 69-WA/HT-35] Approximate boundary controllability of heat equation, considering smoothness conditions on piecewise-smooth boundary

05 p0875 A70-15781

Thermodynamics of elastic continuum with microstructure, modifying second law to include microtemperatures

05 p0930 A70-16083

Hydrothermodynamic equations used in forecasting meteorological components solved by assuming equations of motion quasi-linear and reducing to ordinary differential equations

05 p0878 A70-16195

Heat conduction equation containing diffusivity coefficient as Stefan type function

05 p0958 A70-16867

Toupin and Knowles elasticity theory applied to spatial decay estimate for parabolic heat equation used in diffusive temperature field

07 p1409 A70-19565

Nonlinear thermodynamic theories of plates, elastic shells and rods derived from three dimensional theory of classical continuum mechanics

07 p1414 A70-20172

Finite element models for nonlinear problems analysis in coupled thermoelasticity dynamical theory, deriving heat conduction equations from energy balance considerations

07 p1417 A70-20363

Difference schemes approximating quasi-linear heat conduction equation, demonstrating convergence

08 p1596 A70-20857

Transformed thermodynamics equations derived automatically by substitution codes, noting exceptions for real gas and discharge flow

08 p1597 A70-20918

Thermal conductivity and diffusivity of two phase composites determined by iterative solution of heat conduction equation with space fluctuating properties

08 p1598 A70-21511

Collective approach to thermodynamics of N-particle electron gas including transverse radiation, calculating internal energy and pressure of modes

08 p1553 A70-21612

Error analysis of Barakat-Clark explicit heat diffusion equations for thermally insulated surface

08 p1600 A70-21831

Thermomechanical tests effectiveness and determination of stress level defining boundary between destructive and nondestructive testing

09 p1689 A70-22004

Continuous dependence theorem and differentiability properties of free boundary problem solution for heat equation

09 p1788 A70-22609

Irreversible processes thermodynamics during thermoelastic deformation of solid bodies, deriving thermodynamic potentials, state and coupled heat equations

09 p1777 A70-23077

Variational principle of steady state transport process derived from basic inequality in macroscopic theory of nonequilibrium thermodynamics

09 p1789 A70-23224

Unsteady flow equations and thermodynamics for studying homogeneous fluidic transmission in circular and rectangular cross section lines

09 p1613 A70-23403

Thermodynamics and fluid mechanics - Conference, Glasgow, March 1970

09 p1607 A70-23733

Temperature field and heat conduction equation for two layer polymer cylinder multiply heated from within, considering material decomposition

10 p1966 A70-23870

Flux equations of single velocity Boltzmann type for unsteady transport problems applied to concentration discontinuity propagation through plane layer

10 p1966 A70-23871

Shock and thermodynamic phenomena of real gases near critical points, discussing specific volume and specific enthalpy increases

10 p1867 A70-24136

Information theory as basis for statistical thermodynamics, discussing maximum entropy principle and probability as frequency in Gibbs ensemble

11 p2083 A70-25694

Thermodynamics and statistical mechanics taking into account irreversibility, arrow of time and astrophysical schemes

11 p2146 A70-25695

Hydrodynamics and thermodynamics in mechanical rade face seal design

11 p2059 A70-25792

Polyimide resins and composites state of cure determination by thermomechanical analysis/TMA/

11 p2069 A70-25807

Space flight thermodynamics and thermophysics - Conference, Palo Alto, California, March 1970

11 p2149 A70-26351

SAE aerospace applied thermodynamics manual covering aerodynamics, fluid dynamics, heat transfer,

materials properties, aerospace application engineering, etc

12 p2329 A70-26872

Energy derivation for mechanics and thermodynamics with generalization to systems of more than two dynamic variables, considering transformations and Newton and Kepler laws

12 p2164 A70-27070

Heat equation initial value problem with dissipative term nondecreasing and discontinuous function of unknown, discussing existence and uniqueness theorem of periodic solution

12 p2330 A70-27160

Asymptotic properties of Cauchy problem solution for heat conduction equation

12 p2331 A70-27300

Nonequilibrium self gravitating medium unified thermodynamics theory based on propagators, describing spatial and temporal fluctuations and coupling for galactic formation

12 p2310 A70-27978

Three-nodes analysis for thermal design of spinning spherical satellite using heat transfer equations in mathematical model

12 p2332 A70-28061

Local heat sink thermal processes on convectively cooled solid surface, noting applications to temperature measurement errors

12 p2333 A70-28112

Stagnation point position as function of gas thermodynamic state behind detached shock for spherical segment at incidence in three dimensional hypersonic flow

12 p2159 A70-28247

Cauchy problem for relativistic heat equation for unbounded domain generated by streamlines of future oriented vector field

13 p2451 A70-28709

Boundary value problems of ordinary and generalized heat conduction equations using reflection method

13 p2521 A70-29311

Cold worked metal, estimating lattice imperfections mol fractions based on reversible cell thermodynamics

15 p2676 A70-31564

Soviet papers on high temperature thermophysics covering body-gas heat exchange, plasma jet breakdown of subliming materials, electric arc heaters, plasmatron regime, etc

15 p2826 A70-32101

Heat conductivity equations transformation for Cartesian and cylindrical coordinates and various boundary conditions using static electrointegrator

15 p2827 A70-32172

Redundant variable errors in weather prediction, specifying initial conditions for time integration of hydrothermodynamic equations for atmospheric motion

15 p2771 A70-32368

Dissociation energy of gaseous TiN molecule at high temperature

15 p2695 A70-32748

Thermodynamic equations of state for dissociating and ionizing air in equilibrium, noting applications to vertical and oblique compression shocks

15 p2828 A70-32840

Metastable beta phase decomposition in Ti alloy during mechanicochemical treatment and aging, determining correspondence to alpha phase segregations via electron microscopy

16 p2931 A70-33207

Thermodynamic diagram indicating enthalpy and entropy of oil combustion gases for any state and air excess value

16 p2997 A70-33295

Transport processes in chemical reactions and biological functions of living systems, using nonequilibrium thermodynamics approach

17 p3032 A70-35539

Sodium sulfate induced accelerated oxidation of Ni and superalloys, investigating thermodynamics and reaction mechanism

18 p3272 A70-36037

Thermodynamics - Conference, University of Pittsburgh, April 1969

18 p3347 A70-36551

Relativistic thermodynamics, developing relativity theories in nonvacuo regimes and discussing covariant scalars and formalisms

18 p3291 A70-36553

Ideal relativistic fluids adiabatic flow, investigating heat exchange effects within framework of special relativity

18 p3347 A70-36554

Thermodynamic application to strained solids, considering paradoxes, irreversible processes and continuum mechanics

18 p3340 A70-36555

Thermodynamics of solids deformation, tracing macroscopic inelastic behavior to deformation induced internal structural changes governed by atomic and molecular processes

18 p3340 A70-36556

- Thermodynamics of thermoviscous fluids based on Riemannian space time notions and balance laws of general theory of relativistic continuum mechanics 18 p3347 A70-36557
- Meteorological prediction methods based on dynamic or thermodynamic considerations 18 p3285 A70-36949
- Chemical vapor deposition of carbon matrix material in fiber structure, investigating thermodynamic fundamentals in processes 20 p3654 A70-39207
- Uniqueness theorem for first boundary value problem of heat conduction equation with discontinuous coefficient 20 p3737 A70-39710
- Thermomechanical disturbances propagation in viscoelastic solids, investigating effects of viscous flow, second order strains and temperature dependent material properties 21 p3937 A70-41427
- Elastic-plastic deformation analysis at finite strain by two component thermodynamic model 21 p3937 A70-41431
- Rocket engines propulsion systems design and performance based on thermodynamical theory, involving expanding gas 21 p3869 A70-42038
- Coherent behavior associated with thermodynamic description projected from dynamical behavior of many body system, using relation between asymptotic operators 22 p4062 A70-42547
- Alloys stacking faults thermodynamics based on Gibbs treatment of interfacial free energy 22 p4124 A70-42726
- Electro-thermal-mechanical switches based on shape-memory effect in Ti-Ni alloys 22 p3965 A70-43330
- Graphite fiber oxidation prevention in metal matrix composites, examining various thermodynamic parameters 22 p4126 A70-43676
- Iterative method for boundary value problems in mathematical physics, showing convergence by heat conduction equation solutions 23 p4276 A70-44218
- Heat conductivity problem of body with variable density and specific thermal conductivity reduced to differential equation via power series 23 p4277 A70-44340
- Steady state radiative heat transfer through gray gas in spherical cavity, solving transport equation by singular integral equations for uniform heat generation 23 p4283 A70-44784
- Thermodynamics and statistical physics of dense plasma with particle interaction energy exceeding kinetic energy, discussing three-component model phase equilibrium 23 p4229 A70-45073
- Isothermal plasticity thermodynamic foundation, deriving constitutive equations for various deformations 24 p4426 A70-45994
- German book on aircraft thermal propulsion systems calculation, design and evaluation, covering thermodynamic principles and atmospheric composition and properties 24 p4396 A70-46150
- One dimensional gas pressure as function of activity, using Poisson-type partition function for perturbation calculation of thermodynamic limit 24 p4430 A70-46269
- THERMOELASTICITY**
- NT AEROTHERMOELASTICITY**
- Asymmetric thermoelasticity derived for constitutive equations based on thermodynamics of irreversible processes, formulating variational and reciprocity theorems 01 p0209 A70-11384
- Temperature fields and universal motions in homogeneous isotropic thermoelastic body in absence of body forces and external heat supply 02 p0387 A70-12000
- Integral formulas of thermoelasticity theory for calculating displacements and rotations caused by temperature field action in micropolar Cosserat and Hooke media 02 p0391 A70-12817
- Thermoelastic stresses in plate due to arbitrary temperature variations of heat transfer agent calculated in second approximation, allowing for transfer coefficient time dependence 03 p0590 A70-13400
- Thermoelastic stresses in diode of pulsed and CW injection lasers, showing energy parameter limitation 03 p0499 A70-13437
- Steady thermoelastic state of inhomogeneous plane with circular discontinuity on perimeter, studying stress concentration at thermally insulated crack 03 p0595 A70-13738
- Thermoelastic stresses in solid cylinder under cyclic temperature variation, calculating amplitude for Biot numbers 04 p0766 A70-14477
- Transient temperature distribution, thermal stresses and deformations in thin finite circular disk due to continuous point heat source, using linear thermoelasticity [ASME PAPER 69-WA/PVP-6] 04 p0768 A70-14789
- Thermoelastic boundary value problems solutions in quadratures applicable to problems with given parameters on boundary sections 04 p0775 A70-15257
- Soviet book on three dimensional boundary value problems in mathematical theory of elasticity and thermoelasticity 04 p0777 A70-15474
- Thin film transmission electron microscopy study of precipitation in Fe-Ni-Cr-Mo alloy with added Be and specific thermoelastic properties 05 p0862 A70-16022
- Thermoelasticity generalization from physically motivated modification of Fourier heat conduction law, postulating constitutive equations valid for finite deformations and temperature variations 05 p0929 A70-16062
- Thermoelastic stresses in rotating circular cylinder, analyzing temperature effect on angular velocity for neo-Hookean material using finite deformation theory 05 p0930 A70-16080
- Constitutive equations for isotropic elastic and thermoelastic materials with microstructure derived using free energy function, giving uniqueness theorems 05 p0932 A70-16136
- Fibers random curvature effect on thermoelastic properties of unidirectionally reinforced fibrous materials 05 p0946 A70-16953
- Thermoelasticity boundary value problems solutions in quadratures based on symmetry property and Fourier integrals 05 p0947 A70-16971
- Low temperature thermoelasticity theory for elastic fluids, considering fountain and second sound effects and viscosity anomalies in He II 06 p1164 A70-17442
- Thermoelasticity equations derived for regular systems of M bodies in dynamic and thermal interaction using nonlocal continuous model 07 p1407 A70-19381
- Structural material selection for thermal shock conditions, deriving index from parameters governing solutions in thermoelasticity 07 p1413 A70-20002
- Gruneisen parameter for metal and semiconductor single crystals obtained from measuring one dimensional thermoelastic response during exposure to pulsed electron beam 07 p1357 A70-20020
- Uniqueness theorem for coupled dynamic problem of linear thermoviscoelastic theory assuming contact-type boundary conditions 07 p1416 A70-20296
- Finite element models for nonlinear problems analysis in coupled thermoelasticity dynamical theory, deriving heat conduction equations from energy balance considerations 07 p1417 A70-20363
- Thermoelastic stress degradation of injection lasers at high excitation levels, giving critical current densities for short pulse, CW and quasi-CW conditions 08 p1512 A70-20861
- Thermoelastic characteristics of glass fiber reinforced plastic materials, determining temperature dependent deformation of composite plate 08 p1526 A70-21164
- Thermoelastic state of plate near foreign circular inclusion, assuming heating by uniformly distributed sources and ideal plate-inclusion thermal contact 08 p1587 A70-21171
- Steady temperature field and stresses produced by thermal sources in infinite elastic plane containing insulated rectilinear crack, determining thermoelastic state of half plane 08 p1587 A70-21172
- Boundary value contact problems in thermoelastic oscillations theory found to have unique solutions for any frequency 08 p1591 A70-21440
- Thermoelastic energy functions bounding by variational principles for anisotropic composite materials properties 08 p1592 A70-21510
- Composite materials macroscopic thermoelastic properties relationships to constituents properties, discussing effective thermal expansion coefficients and specific heats 09 p1703 A70-22682
- Irreversible processes thermodynamics during thermoelastic deformation of solid bodies, deriving thermodynamic potentials, state and coupled heat equations 09 p1777 A70-23077
- Temperature fields and thermoelastic stresses in doubly connected structural elements solved in curvilinear coordinates system corresponding to conformal mapping of annulus 09 p1777 A70-23080
- Thermoelastic stresses in plates and shells in random temperature fields, studying influence on service life 09 p1778 A70-23084
- Thermoacoustic waves formation and propagation in metallic rods by light pulses, studying pulse rise time influence on waves shape and amplitude 09 p1778 A70-23090
- Thermal stress concentrations at arbitrary holes for nonlinearly elastic materials, developing small deformation theory for two dimensional problem 09 p1779 A70-23093
- Thermal stress freezing during optical polarization study of perforated disk three dimensional thermoelasticity 09 p1780 A70-23105
- Kantorovich variational method extended to thermoelastic plane stress problem of rectangular plates 09 p1781 A70-23278
- Mixed thermoelastic problem in elastic layer with arbitrarily prescribed temperature in upper free surface 10 p1954 A70-23878
- Nonstationary thermoelasticity in half space with moving boundary condition described in Cartesian rectilinear coordinates allowing for time term in heat conduction equation 10 p1954 A70-24012
- Thermoelasticity problem for plane with rectilinear cut with constant temperature at initial moment of time, using approximating kernel of integral equation 10 p1965 A70-25296
- Nomograms for thermoelastic stress in plate determined as function of dimensions and heat transfer 10 p1965 A70-25300
- Two dimensional dynamic thermoelastic problem for thin plates with internal heat sources solved by integral Laplace and Fourier transforms 12 p2323 A70-27337
- Hollow homogeneous polymer cylinder thermoelastic stressed state, analyzing radial temperature and Poisson Coefficient variations 12 p2325 A70-27532
- Thermoelastic stresses distribution in transmitting dielectric under short nonfocused laser pulses 12 p2251 A70-28327
- Thermoelastic equations for circular sandwich plates bending due to asymmetric temperature distribution 13 p2518 A70-29976
- Thermoelastic stresses in sphere with cylindrical cut under axisymmetric temperature field and constant surface temperature 14 p2655 A70-30135
- Thermoelasticity of incompressible solids, integrating linearized equations using Helmholtz solution 14 p2660 A70-31224
- Stress, strain, temperature, electric and magnetic field distributions resulting from magneto-thermoelastic interactions in infinite elastic solid subjected to transient heat source 14 p2661 A70-31229
- Small deformation thermoelasticity theory, discussing thermal conductivity, dynamic elasticity, strain field-temperature relationship, etc 15 p2818 A70-32177
- Induced strain plane state in elastic micropolar medium by temperature effect, discussing thermoelastic problem stress functions 15 p2821 A70-32341
- Micropolar Cosserat medium of thermoelasticity wave equations for Hooke medium, deriving elastic potentials and stress functions 15 p2822 A70-32354
- Initial thermally stressed state of solid bounded by concentric circular cylinders, applying Cauchy thermoelastic stress theory 16 p2987 A70-32993
- Thermal and thermoelastic constants of macroscopically isotropic composite materials based on self consistent calculations 17 p3194 A70-34555
- Composite orthotropic cylindrical shells linear thermoelastic equations solution for fixed end boundary conditions, noting heterogeneity effects on stress distribution 17 p3184 A70-34909
- Stress concentration near holes in plate in plane problem of thermoelasticity, taking into account physical and geometrical nonlinearities 18 p3336 A70-36133
- Cylindrical shell of variable thickness, deriving axisymmetric thermal stresses in terms of hypergeometric functions 18 p3336 A70-36137
- Elastic continuum conducting heat under general loads, investigating stability thermodynamics-Liapunov criterion relations 18 p3337 A70-36336
- Plane strain and stress produced in elastic micropolar medium by action of temperature 18 p3338 A70-36429
- Thermodynamical modeling by regular systems of deformable bodies bound by hyperelastic medium

with internal degrees of freedom, formulating equations of motion

18 p3338 A70-36432

Elastic Cosserat half plane, analyzing wave propagation of small amplitude thermoelastic disturbances and uniform motion of concentrated line load along surface

18 p3338 A70-36434

Thermoelasticity boundary value problems by finite difference method, determining thermal, displacement and stress fields in continuous medium

18 p3342 A70-36671

Thermoelastic stresses in infinite anisotropic slab due to temperature field variations along thickness and length

19 p3539 A70-37872

Thermoelastic composite materials, deriving crystal lattice type model of equations for predicting dynamic or thermomechanical behavior

19 p3540 A70-37958

Book on thermoelasticity covering thermal stresses in disks, plates, shells and bodies of revolution under steady and unsteady temperature fields

19 p3541 A70-37974

Minimum weight thermoelastic design of sandwich beam for given deflection, using potential energy principle

19 p3541 A70-38044

Thermoelastic seismic-energy release as source mechanism for volcanic earthquakes, describing thermal microfracture tests

20 p3619 A70-39217

Radial and shearing stresses in hollow composite sphere due to thermoelastic strain nucleus

20 p3719 A70-39602

Hot gas pipe thermoelastic reduction factors, determining elastic support, material and dimensions

20 p3720 A70-39624

Stressed state in thermoelasticity plane steady state problem of thin plate under bending based on dislocations and temperature stresses relationship

20 p3721 A70-39780

Asymmetric micropolar thermoelasticity, deriving integral expressions for strains, rotations and temperatures in finite body

20 p3726 A70-39878

Thermoelasticity of fiber reinforced materials, considering stress concentration in beams and reinforcing fibers buckling under thermal loading

20 p3730 A70-40037

Thermoinelasticity - Conference, East Kilbride, Scotland, June 1968

21 p3936 A70-41426

Thermoinelasticity theory for elastic material with different moduli in tension and compression, noting heteroresistance

21 p3937 A70-41428

Dynamical linear thermoelasticity theorem generalization with time dependent conductivities, elasticities and density

22 p4112 A70-42483

Linear coupled thermoelasticity theory for homogeneous isotropic solid with two temperatures

22 p4123 A70-42540

Thermoelasticity theory concerning Navier-Stokes-Fourier type fluid universal motion characterization in absence of body forces and external heat supply

22 p4010 A70-42637

Variable thickness flexible plates thermoelastic flexure and buckling, obtaining nonlinear differential matrix equations by difference-differential method

22 p4115 A70-42811

Thin plates two dimensional dynamic thermoelastic problem, determining hyperbolic type heat conduction for temperature field

23 p4265 A70-43985

Cylindrical shells dynamic thermoelastic response to sudden rotating thermal inputs, using Galerkin method

24 p4421 A70-45285

German monograph on thermally induced elastic stress effects on crack formation and propagation in plates

24 p4422 A70-45524

Polar elastic materials constitutive relations for thermoelastic couple stresses by general theory of incompatible strains, obtaining linearization for isotropic materials

24 p4428 A70-45578

Controllable states with prescribed heat flux for incompressible isotropic thermoelastic bodies with temperature dependent response functions

24 p4426 A70-46041

THERMOELECTRIC CONVERSION SYSTEMS

U THERMOELECTRIC POWER GENERATION THERMOELECTRIC COOLING

Thermoelectrically cooled GaAlAs injection laser illuminator, discussing optical-electronic interface problems and design and performance characteristics

22 p4052 A70-43603

THERMOELECTRIC GENERATORS

NT SNAP 19

NT SNAP 27

Semiconductor solar thermoelectric generator allowing thermoelement replacement during service including construction, bridging methods and characteristics

01 p0009 A70-10751

Current-voltage characteristics of cascaded solar thermoelectric generator, determining optimum hot junction temperature as function of radiation concentration

01 p0000 A70-10752

Solar energy concentrator with truncated conical mirror and toroidal lens to illuminate cylindrical thermoelectric generators or radiation pumped lasers

01 p0010 A70-10760

Selective glass coatings applications in solar thermoelectric generators working without radiation concentrators

01 p0011 A70-10767

Thermoelectric-couple life tests and efficiency measurements at constant thermal input, noting insulation for limiting parasitic heat losses

[ASME PAPER 69-WA/ENER-14]

04 p0731 A70-14896

Thermal steady state characterization of isotope radioisotope thermoelectric generator, discussing design features and heat transfer models for operating temperatures and output performance

[ASME PAPER 69-WA/ENER-12]

04 p0717 A70-14897

Thermoelectric generators design, discussing Si-Ge air-vac thermocouple configurations, compression modules, thermal losses, etc

10 p1808 A70-24897

Commercial thermoelectric generator design, applications and economics compared to batteries and small MG sets

10 p1808 A70-25033

Figure of merit for thermoelectric generator determined experimentally, assuming temperature difference between heated and cooled junctions

10 p1808 A70-25035

Electrodynamic generator with spatial charge neutralization for direct thermal-to-electrical energy conversion at high gas pressures

12 p2165 A70-27330

Solar energy direct conversion into electricity, surveying photoelectric, thermoelectric and thermoemissive methods

15 p2677 A70-31598

Solar thermoelectric generator /STEG/ with two stage converter, discussing weight factors and efficiency

15 p2678 A70-32425

Deep space spacecraft radioisotope thermoelectric generators, discussing testing and evaluating for future missions

18 p3215 A70-36229

Thermoelectric generators design for space and remote terrestrial sites, discussing fuel source, conversion section, heat rejection, etc

20 p3563 A70-39225

TOPS/thermoelectric outer planet spacecraft/ project integrating R and D for specific space missions

21 p3920 A70-41793

Thermoelectric outer planet spacecraft /TOPS/ flight environment, systems design and Titan 3D/Centaur launch vehicle with Burner II upper stage

21 p3930 A70-41795

Thermoelectric outer planet spacecraft /TOPS/ data subsystems for 12 year missions compared with Mariner subsystem

21 p3795 A70-41796

Trajectory correction propulsion subsystem /TCPS/, attitude propulsion subsystem /APS/ and pyrotechnic subsystem of thermoelectric outer planet spacecraft /TOPS/

21 p3868 A70-41800

Thermoelectric outer planet spacecraft /TOPS/ solar-independent power subsystem

21 p3760 A70-41802

Electrodynamic generator with spatial charge neutralization for direct thermal-to-electrical energy conversion at high gas pressures

21 p3760 A70-42071

SNAP 19 radioisotope thermoelectric generator module for Viking Lander and Pioneer applications, discussing design requirements, environmental and mission constraints, life, performance and reliability characteristics, etc

22 p4071 A70-43195

Radioisotope thermoelectric generator with lead telluride converter, discussing intact reentry and impact capability, refractory construction and reliability

22 p4072 A70-43196

Spacecraft radioisotope thermoelectric generator interference in onboard instrument operation, using analytical models to determine necessary shielding

24 p4375 A70-45175

SNAP 27 thermoelectric generator for Apollo Lunar Surface Experiments Package /ALSEP/

24 p4377 A70-46385

THERMOELECTRIC MATERIALS

Hot junctions nonuniform heating influence on thermoelectric generator efficiency, taking into account

temperature dependence of thermoelement materials properties

01 p0009 A70-10753

Cascaded thermoelements with high figure of merit for increasing solar thermoelectric generator efficiency, noting high temperature materials effect

01 p0158 A70-10754

GeTe thermoelectric power, electrical/thermal conductivity and expansion coefficient measured at 20-600 C, determining suitability as thermoelectric material

01 p0158 A70-10755

PbSe and GeTe cast and pressed samples thermoelectric properties before and after high energy gamma ray irradiation, using scintillation counter with photomultiplier

01 p0159 A70-10756

Bridging joints resistance effect on thermoelement efficiency, describing W and Co coatings deposition on GeTe based thermoelectric alloys

01 p0159 A70-10757

Molten bridging alloy deposition on p and n type thermoelectric materials, utilizing diffusion process brief duration during contact

01 p0009 A70-10758

Thermoelectric-couple life tests and efficiency measurements at constant thermal input, noting insulation for limiting parasitic heat losses

[ASME PAPER 69-WA/ENER-14]

04 p0731 A70-14896

Thermoelectric powers of liquid metals calculated from structure factors, using screened model potential

05 p0892 A70-16313

Electric current flow effect on thermoelectric figure of merit from thermal conductivity measurements on thermoelement

10 p1808 A70-25034

Metallic thermoelectric materials, measuring electrical resistivities and Seebeck coefficients of binary Ni alloys

14 p2533 A70-30530

THERMOELECTRIC POWER GENERATION

Hot junctions nonuniform heating influence on thermoelectric generator efficiency, taking into account temperature dependence of thermoelement materials properties

01 p0009 A70-10753

Cascaded thermoelements with high figure of merit for increasing solar thermoelectric generator efficiency, noting high temperature materials effect

01 p0158 A70-10754

Electrical power system adaptable to intermediate solar probes, discussing thermoelectric, thermionic, photovoltaic systems and battery for energy storage

[ASME PAPER 69-WA/SOL-5] 04 p6625 A70-14753

Mercury plasma flow rate change effect on electron temperature and density in thermoelectric converter determined by spectroscopy

05 p0887 A70-16028

Thermoelectric power /TEP/ of transition metals, detecting empirical regularities in TEP, nonlinear temperature dependence, etc

05 p0893 A70-16949

Si-Ge air-vacuum thermocouples for thermoelectric conversion, describing construction materials, mechanical and electrical properties, radiative heat transfer operation, etc

10 p1807 A70-24896

Thermoelectric power and Hall effect quantum resonances in pressure annealed pyrolytic graphite crystals for carrier locations evidence

11 p2097 A70-25616

ZrH reactor program and multikilowatt space oriented thermoelectric power conversion systems

22 p4071 A70-43190

Thermoelectric power and Hall effect quantum resonances in graphite for locating majority carrier electron and hole Fermi Surfaces in Brillouin zone

24 p4389 A70-45597

THERMOELECTRICITY

Voltage-power sensitivity, response time, frequency limit and minimum registered power of hot carrier thermoelectric detectors calculated from characteristic semiconductor parameters

03 p0540 A70-13436

Calor-electric voltage calculation for stoichiometric flame burning in air introducing allowance for charged particle densities

04 p0780 A70-14706

Physical exercise and rest regime evaluation by thermoelectric method recording skin temperature above gastrocnemius muscle

04 p0640 A70-15513

Specific heat and thermal EMF increase due to radiation damage in lattice of fast neutron bombarded Cu, Mo and W specimens

05 p0863 A70-16292

Thermoelectric characteristics of graphite and titanium carbide compared with platinum after prolonged annealing at 2300 C

07 p1316 A70-19661

Ovshinsky switching effect, considering electrothermal initiation and field dependent conductivity at elevated temperatures

14 p2626 A70-30336

Equilibrium and steady state Hall and thermoelectric effects in inhomogeneous semiconductor materials 15 p2783 A70-31760

Electric conductivity, thermal emf and EPR spectra of oxide semiconductor glasses based on vanadium and phosphorus oxides, correlating unpaired electron and charge carrier concentrations 15 p2784 A70-32201

Thermoelectric power measurement of thin Au films, relating results to transport parameters and internal stresses 15 p2785 A70-32582

Thermoelectric force due to thermocouple inhomogeneities, showing relation to temperature gradient and measurement error 16 p2900 A70-33070

Ni-Fe ferrites resistivity and thermoelectric power as function of temperature, proposing two energy level model for Fe ions 17 p3143 A70-35604

Electrical conductivity, Hall constant and differential thermal emf n-type GaAs-CdS solid solutions 18 p3298 A70-36596

Thermo-electret surface charge and dielectric constant time variation measurements, considering hole-electron pairs production hypothesis 21 p3797 A70-40890

Double tunneling electrothermal initiation of threshold electronic switching in semiconducting glasses, discussing temperature profile and current density saturation effects 21 p3864 A70-42019

THERMOGRAMS

U RECORDING INSTRUMENTS
U TEMPERATURE MEASURING INSTRUMENTS

THERMOGRAPHS

U RECORDING INSTRUMENTS
U TEMPERATURE MEASURING INSTRUMENTS

THERMOGRAVIMETRY

Transition kinetics during linear to parabolic oxidation of Cr in water-hydrogen gas mixture measured thermogravimetrically 08 p1521 A70-21558

Composite propellant catalysts /copper chromate and chromite/ thermal decomposition using simultaneous thermogravimetric and differential thermal analysis 11 p2100 A70-26382

Thermogravimetric analysis /TGA/ of gadolinium-doped silver carbonate decomposition, obtaining activation energy, preexponential factor and reaction order 15 p2694 A70-32074

High temperature organic resin binders and solid lubricant thermal and oxidative behavior examined by thermogravimetric analysis [ASME PAPER 70-HT-30] 22 p4058 A70-42436

Differential scanning calorimetry and thermogravimetric analysis combination for thermochemical kinetic measurements, matching analytical and experimental curves for data accuracy 23 p4196 A70-44429

THERMOLUMINESCENCE

Thermoluminescent glass X ray dosimeter sensitivity tested as function of rigidity of gamma and X radiation, noting compensating filters for incident radiation 08 p1496 A70-21217

Saint-Severin meteorite thermoluminescence from mineralogical fractions separated by density 15 p2800 A70-32025

Natural thermoluminescence of limestone within/near Charlevoix meteorite impact structure, discussing impact effects on quartz-rich rocks 18 p3314 A70-36499

Apollo 11 rocks red luminescence and blue thermoluminescence under proton bombardment, discussing energy efficiency 21 p3913 A70-41644

Apollo 11 fines, breccias and crystalline rocks thermoluminescence, observing temperature dependence of glow curve peaks 21 p3914 A70-41649

Thermoluminescence, X ray and stored energy measurements of Apollo 11 samples, comparing surface outputs to interior 21 p3916 A70-41665

Thermal energy conversion into coherent laser light, examining various thermodynamic limitations 22 p4076 A70-43674

U THERMOMAGNETIC EFFECTS

THERMOMAGNETIC EFFECTS

Transient response analysis in isotropic material under thermal galvanomagnetic effects involving interaction electric and thermal conduction in applied magnetic field [AIAA PAPER 70-17] 06 p1107 A70-18213

Magnetothermal instability and radiative effects on incipient fragmentation of rotating gravitating interstellar fluid forming condensations 08 p1578 A70-21545

Thermomagnetic transport coefficients in anisotropic metals based on theory for galvanometric properties, producing closed form expression for conductivity tensor 11 p2097 A70-25618

Thermomagnetomicroelasticity wave equations of heat conduction for thermal and coupled perturbations propagating in isotropic medium at finite velocities 16 p2953 A70-34326

Apollo 11 lunar rock and dust samples thermomagnetic properties, Curie points, magnetization and demagnetization characteristics 21 p3915 A70-41661

Apollo 11 lunar dust hysteresis curves and thermomagnetic curves, discussing metallic Fe abundance, susceptibility, alpha-gamma transition, etc 21 p3918 A70-41676

Transport equation relation between irreducible tensorial sets, examining geometrical symmetry influence and thermomagnetic and galvanomagnetic effects 24 p4428 A70-45520

THERMOMAGNETISM

U THERMOMAGNETIC EFFECTS

THERMOMECHANICS

U THERMODYNAMICS

THERMOMETERS

NT RESISTANCE THERMOMETERS

High temperature thermometer using pulsed excitation ultrasonic resonance with ruthenium sensor, discussing resonator types, transmission lines and transducer 02 p0300 A70-12468

Aerological radio thermometers random and systematic errors compared to network radio probe 05 p0848 A70-16206

Thermometer dynamic response under various working conditions predicted from time constant curves 05 p0849 A70-16518

Noncontact thermometer designed around YIG modulator to demonstrate usefulness of optical component in near IR systems 09 p1676 A70-22788

Helium melting pressure curve to calibrate cerium magnesium nitrate or NMR low temperature thermometers 09 p1728 A70-22999

IR thermometers in situ calibration, analyzing maximum error due to reflection effect 09 p1684 A70-23536

Heat flux measurements in hypersonic rarefied gas flow by thin film surface thermometer 15 p2825 A70-31820

Photothermometer response to thermal shock, considering rapidly varying surface temperature measurement 16 p2901 A70-33104

Low temperature Ge diode thermometer with computer circuit transforming voltage to temperature readout 21 p3828 A70-41473

Thin film granular aluminum superconductors as sensitive thermometers 22 p4031 A70-43009

Semiconductor thermometer for skin temperature differences using resistance bridge, transistor amplifier and thermistors 23 p4150 A70-44317

THERMOMETRY

U TEMPERATURE MEASUREMENT

THERMONUCLEAR ENERGY

U THERMONUCLEAR POWER GENERATION

THERMONUCLEAR EXPLOSIONS

Ionosphere disturbances due to high altitude thermomagnetic explosions, discussing experimental proof by cosmo satellites short wave transmitter radio signal scintillation statistical evaluation 06 p1057 A70-17888

Thermal explosion in degenerate nucleus of white dwarf due to formation of laminar energy source in presence of hydrogen 11 p2115 A70-26577

Thermomagnetic explosion Operation Starfish effect on ionospheric state from recording in central Kazakhstan, studying frequency characteristics 11 p2047 A70-26790

Electron density decrease in F 2 layer ascribed to 9 July 1962 thermomagnetic explosion, noting dissociative recombination role 11 p2047 A70-26791

THERMONUCLEAR POWER GENERATION

Controlled thermomagnetic power generation, considering fusion reactors feasibility and reactor energy balance improvement 04 p0717 A70-14528

Worldwide developments in controlled fusion, discussing low beta open ended configurations, open and closed high beta systems, full scale reactors, etc 11 p2089 A70-25718

Controllable thermomagnetic reactor with free-floating HF discharge plasma in deuterium 12 p2271 A70-27351

Controllable thermomagnetic reactor with free-floating HF discharge plasma in deuterium 22 p4084 A70-43595

Thermomagnetic spacecraft propulsion, comparing X ray pumped gas laser and ion drive systems 24 p4377 A70-46211

THERMONUCLEAR PROPULSION

U NUCLEAR PROPULSION

THERMONUCLEAR REACTIONS

NT CONTROLLED FUSION

NT NUCLEAR FUSION

Neutron star atmospheric composition as function of time, including effects of diffusion, cooling and nucleosynthesis 02 p0378 A70-12698

Tokamak-type magnetic configurations application to thermomagnetic reactor, discussing equilibrium and stability parameters minimum values, operating pattern and heating method 02 p0349 A70-12756

Permittivity tensor calculations of weakly inhomogeneous plasma with monoenergetic component, using distribution function of particles produced by thermomagnetic reactions 03 p0529 A70-13055

Effective potential of electron screening of Coulomb nuclei field leading to thermomagnetic reaction rate increase using self consistent field method 07 p1346 A70-20206

Energy balance of self sustaining thermomagnetic reaction with nonuniform magnetic field in wall-contained dense plasma, allowing for radiation losses 11 p2088 A70-25709

Electrostatic shielding of nuclei Coulomb field during thermomagnetic reactions in degenerate gases of arbitrary densities 11 p2087 A70-26578

Neutrino astronomy for processes in stellar interiors, emphasizing thermomagnetic reactions in sun and main sequence stars 13 p2490 A70-28947

Thermomagnetic reactions in interior of sun, discussing models for He isotope concentration and flow to interpret solar neutrino generation 13 p2494 A70-29573

Inverse beta decay thermomagnetic reactions induced by neutrinos proposed for neutrino detection from solar interior 20 p3704 A70-39471

Explosive nucleosynthesis as heavy nuclei source for stars 20 p3712 A70-40426

Thermomagnetic rate constant for deuterium atom recombination, using orbiting resonance theory 21 p3781 A70-41886

Plasma physics computational problems concerning controlled thermomagnetic reactions, considering instability and equilibrium numerical calculations 23 p4224 A70-44181

THERMOPHILES

Gas chromatography study of fatty acids and polar lipids of thermophilic filamentous bacterial masses from hot Yellowstone Park springs 01 p0021 A70-10791

THERMOPHILIC PLANTS

NT BLUE GREEN ALGAE

NT NOSTOC

THERMOPHYSICAL PROPERTIES

NT CRITICAL POINT

NT CRITICAL PRESSURE

NT CRITICAL TEMPERATURE

NT EMISSIVITY

NT FUSIBILITY

NT HEAT OF SOLUTION

NT MELTING POINTS

NT PYROELECTRICITY

NT SPECIFIC HEAT

NT SUPERCRITICAL PRESSURES

NT THERMAL CONDUCTIVITY

NT THERMAL DIFFUSION

NT THERMAL DIFFUSIVITY

NT THERMAL STABILITY

NT VAPOR PRESSURE

NT VOLATILITY

ESRO 1 thermal behavior, discussing trajectory effects, onboard temperature measurement, data storage, data transmission, telemetered data and data comparison 04 p0762 A70-15164

Heat conduction in anisotropic materials to measure thermophysical parameters, using pulsed point or line heat source 05 p0957 A70-16457

Thermophysical characteristics of annealed Ta and Mo alloy welded joints under electron beam and ray heating, noting use for short term tests 05 p0865 A70-17028

Refractory oxides synthesized using metal alkoxide thermal decomposition, comparing thermophysical properties with conventional ceramics 07 p1320 A70-19891

Cooled turbine blades temperature field calculated considering variations at turbine inlet, over blade length, material temperature dependence and heat transfer boundary conditions 08 p1597 A70-21185

Thermooptical constant of laser neodymium glasses measured with interferometer 13 p2430 A70-29761

Quasi-stationary analysis of thermophysical characteristics of materials, considering cylinder and plate samples under unsteady heating

15 p2826 A70-32105

Papers on thermophysics for spacecraft thermal design

19 p3551 A70-37781

Polyimidepyrrolone films relative thermophysical properties, noting polymers thermal stability dependence on carbonyl groups percentage

21 p3783 A70-42132

Thermophysical properties - ASME Conference, Newton, Mass., September-October 1970

23 p2410 A70-44426

Fibrous composites thermomechanical properties derivation by theoretical analysis from basic constituents characteristics, presenting comparisons with experimental results

24 p4366 A70-45170

THERMOPHYSICS

U THERMODYNAMICS

THERMOPILES

UV, visible and IR radiation measurement, discussing spectral distribution, thermopiles, monochromatic radiation and power measurements

13 p2410 A70-29653

Armored actinometer with electroplated thermopile, describing construction and performance

24 p4333 A70-45137

THERMOPLASTIC FILMS

U POLYMERIC FILMS

THERMOPLASTIC RESINS

Fiber glass reinforcement effect on flammability properties of thermoplastics

01 p0128 A70-10771

Reinforcement of thermoplastic resins, considering single crystal whisker and carbon fibers and micro-spheres

01 p0129 A70-10774

Glass reinforced and unreinforced thermoplastics HF fatigue failure modes, discussing isothermal and nonisothermal test procedure

01 p0129 A70-11081

Mechanical properties of asbestos as reinforcing material for fiber filled thermoplastics compared with glass fiber

02 p0320 A70-11677

Fortified thermoplastic compounds for increased flame retardancy, environmental resistance and toughness

02 p0320 A70-11865

High modulus fibers as reinforcing fillers in thermoplastic matrices, discussing cost compensation in low fiber loadings

05 p0870 A70-16578

Glass filled thermoplastics fabrication techniques and composites, discussing molding compounds and processes, reinforced thermoplastics properties and applications

05 p0873 A70-16605

Thermoplastic polymers adhesion to glass fibers determined by measuring force necessary to pull fiber from flat film of polymer

06 p1091 A70-17317

Glass fiber reinforced thermoplastics fatigue behavior during and after cyclic loading

06 p1091 A70-17600

Fibrillated asbestos dispersed in thermoplastic ionomer lattices, precipitated, dried and compression molded into bars, testing for flexural modulus, flexural stress and Vicat softening temperature

10 p1906 A70-24024

Thermoplastics reinforcement with glass and asbestos fibers taking into account fiber properties

11 p2070 A70-25825

Flexural stress relaxation properties of thermoplastics and composite materials, assessing strain energy by ballistic pendulum

11 p2070 A70-26342

Fiberglass reinforcement effects on injection molded thermoplastics physical properties, noting role of binder and glass content

13 p2438 A70-29204

Thermoplastics fatigue strength, considering stress variations with time in constant strain tests

14 p2598 A70-31425

Book on engineering properties of thermoplastics covering strength characteristics, plastic components design, etc

15 p2766 A70-32843

Friction properties of internally lubricated and glass-fortified thermoplastic resins for gears and bearings

16 p2935 A70-33354

Cold forming of thermoset-thermoplastic laminate consisting of reinforced epoxy core sandwiched between thermoplastic face sheets

16 p2916 A70-33362

Smooth surface polyester premix and sheet molding compound technology applied to reinforced plastics industry

16 p2917 A70-33364

Flexural creep deflections of glass fiber reinforced polycarbonate and Nylon thermoplastics

17 p3127 A70-34657

Papers on thermoplastics covering types, properties and applications

22 p4060 A70-43624

German monograph on glass fiber reinforcement effect on soft thermoplastics strength, adhesion and slip properties

24 p4366 A70-45088

THERMOPLASTICITY

Reinforced thermoplastics - Conference, Hartford, October 1969

01 p0128 A70-10769

Glass fiber-fortified thermoplastics development, properties and applications, considering ionomer, polyimide, chlorinated trifluoroethylene polymer, polymethylpentene, polybutylene, polyaryl ether and nylon

01 p0128 A70-10770

Synthetic polymers properties and processing, discussing thermoplastics, elastomers, thermosets, etc

02 p0322 A70-12715

Thermoplastic behavior of bodies under variable loads obtainable as function of time variable external temperature field

04 p0775 A70-15200

Rectangular plate in unsteady temperature field, analyzing thermoplasticity problem by reducing solution to linear system with variable coefficients

09 p1779 A70-23098

THERMORECEPTORS

Human thermoregulatory responses as function of peripheral thermoreceptors during imposed negative heat load in different ambient environments

01 p0024 A70-10977

Esthesiometric analysis of cutaneous thermoreceptors reaction dependence on heat production rates of human organisms

07 p1206 A70-19472

THERMOREGULATION

Physiological research on humans in hypothermia resulting from confinement to life raft on open sea, analyzing thermal conditions, thermoregulation and survival

01 p0013 A70-10233

Thermoregulatory salivary responses of dog to various ambient temperatures, emphasizing hypothalamic temperature, threshold and proportionality constant

01 p0017 A70-10465

Skin and hypothalamic temperature inputs for behavioral regulation of hypothalamic temperature of rats

01 p0020 A70-10725

Human thermoregulatory responses as function of peripheral thermoreceptors during imposed negative heat load in different ambient environments

01 p0024 A70-10977

Brown fat thermoregulatory function and physiological control in mammals, discussing heat production and biochemical stimulation

02 p0230 A70-11683

Esthesiometric analysis of cutaneous thermoreceptors reaction dependence on heat production rates of human organisms

07 p1206 A70-19472

Extravascular activity space suits evolution emphasizing appropriate body temperature control under various conditions and work loads

10 p1824 A70-24412

Thermostability and survival rates of white mice in ambient medium with temperature variations

13 p2351 A70-29330

Thermoregulatory vasodilation conditioned reflexes developed by combination of prolonged physical and acoustic stimuli

15 p2679 A70-31606

Biological media thermal behavior, discussing maintenance of constant internal temperature under varying conditions in man

[ALAA PAPER 70-813] Soviet papers on physiological adaptation to heat and cold covering thermoregulatory reflexes, bionics, temperature gradients, hypothalamus, gas exchange, heat generation, etc

16 p2854 A70-33948

Physiological mechanisms of cold adaptation in terms of individual, type and population categories, examining thermoregulatory muscular reflex

18 p3217 A70-36526

Human muscular function in conditioned and unconditioned thermoregulatory reflex changes of gaseous metabolism during repeated cooling

18 p3218 A70-36527

Mathematical simulation of human thermoregulatory system, considering automatic control theory

18 p3224 A70-36530

Varying thermoregulatory responses of different rodent species to long term heat and cold

18 p3218 A70-36534

Thermoregulation processes in oxygen consumption, blood and body temperatures and skeletal muscles in adult nutria and muskrats in air and water

18 p3218 A70-36535

Gas metabolism, chemical thermoregulation, body temperature and weight of rats during adaptation to repeated high temperature exposure

18 p3219 A70-36538

High temperature adaptation, gas exchange and thermoregulation in dogs during repeated overheatings in open sunshine

18 p3219 A70-36539

Thermoregulation of hedgehogs during muscular activity in cold environment, recording electrical activity, oxygen consumption and body temperature during work-rest cycles

18 p3219 A70-37977

Book on survival in cold water covering physiology and treatment of immersion hypothermia and drowning, thermoregulation, etc

19 p3360 A70-37977

Circadian and seasonal adaptive function rhythms in animals, discussing terrestrial environment and thermoregulation

19 p3365 A70-38409

Human body core temperature control dependence during exercise on heat dissipation, noting sweating control

20 p3570 A70-38997

Human peripheral blood flow rewarming in cold ambient temperature, examining skin, rectal and tympanic membrane and oxygen uptake

20 p3576 A70-40327

Localization and functional topology of thermosensible central nervous structures in rats cervical spinal cord, discussing role in generating heat to avert coldness

22 p3967 A70-42316

Dynamic response of peripheral blood flow to hypothalamic temperature waveforms in baboon, using implanted thermodes

24 p4303 A70-46116

Chronically implantable water perfused thermode system for hypothalamic temperature waveforms generation

24 p4309 A70-46117

THERMOSETTING RESINS

NT EPOXY RESINS

NT PHENOLIC RESINS

NT POLYAMIDE RESINS

Synthetic polymers properties and processing, discussing thermoplastics, elastomers, thermosets, etc

02 p0322 A70-12715

Nozzle throat ablative materials for controlled high regression rates in tactical rocket motors, primarily nylon reinforced thermosetting resins

[ALAA PAPER 69-423] 04 p0713 A70-15428

Cold forming of thermoset-thermoplastic laminate consisting of reinforced epoxy core sandwiched between thermoplastic face sheets

16 p2916 A70-33362

Chemical and moisture resistance, electrical and mechanical properties of engineering thermosetting plastics made of HYSTL resins

16 p2938 A70-33380

Solvents and chemicals resistant thermosetting resin producing high strength glass reinforced laminates based on polyanhydride crosslinked with monoepoxide

16 p2938 A70-33382

Thermosetting glass reinforced plastics fabrication and use for pressure vessels, vacuum vessels and pipes

24 p4350 A70-46388

THERMOSIPHONS

Monograph on application of semiclosed thermosiphon system to gas turbine blade cooling, covering heat transfer and temperature distribution analysis, etc

03 p0551 A70-12992

THERMOSPHERE

Thermospheric neutral density amplitudes and phases using one dimensional model of geomagnetic activity effect, 27 day variation and semiannual variation

01 p0070 A70-10402

Nonlinear flow conductance and convective terms effects on planetary thermospheres heating diurnal variations, emphasizing solar EUV heating

01 p0178 A70-10413

Diurnal variation for structure and energy balance of thermosphere, noting effect of global wind pattern

01 p0074 A70-10592

Polar thermosphere temperature measurements from artificial clouds indicating geophysical-associated variations, nocturnal decrease and annual variations

01 p0077 A70-11201

Atmospheric density variations in thermosphere determined from braking satellite data, discussing correlation with solar activity and temperature variations

01 p0077 A70-11202

Thermospheric structure and variations obtained from satellite drag data analysis, discussing gas density, temperature and atmospheric composition

01 p0077 A70-11203

Thermospheric horizontal winds diurnal bulge, discussing maximum density-maximum temperature phase relationship

01 p0078 A70-11210

F region ion velocity measurements by Thompson scatter probe, deducing neutral winds diurnal and seasonal variations in thermosphere

01 p0078 A70-11214

Internal gravity waves theory to interpret large amplitude oscillations in electron density and temperature and ion temperature and velocity observed in thermosphere

01 p0079 A70-11215

Static thermosphere model using hydrodynamic equations, assuming uniform temperature and non-existent Coriolis forces, viscous stresses, horizontal velocity vector and thermal fluxes

02 p0327 A70-12384

Height scale of loss coefficient in F 2 region under geomagnetic perturbation at midnight based on electron number profiles, estimating thermosphere temperature

07 p1265 A70-19433

Vertical eddy diffusion effect on chemical composition of mesosphere and lower thermosphere using photochemical model containing oxygen and hydrogen

07 p1274 A70-20269

Omegatron mass spectrometer for rocket measurements of molecular nitrogen density and temperature in middle thermosphere

07 p1289 A70-20308

Atmospheric density in thermosphere observed by satellites, noting daily and semiannual variations related to solar and geomagnetic activities

09 p1667 A70-22626

Thermospheric molecular nitrogen vibrational temperature, studying various chemical reactions and collisions as energy sources

10 p1872 A70-23827

Seasonal changes in thermospheric composition in middle latitudes, investigating molecular oxygen density and solar activity effects

10 p1881 A70-24817

Lower thermosphere dust particle layers correlated with polarization anomaly twilight fluctuations and noctilucent clouds frequency distribution

10 p1944 A70-24949

Thermospheric background radiation from Cosmos 225 data

13 p2478 A70-29700

Thermospheric heating and conversion efficiency of short wave radiation as functions of solar radiation spectral flux, atmospheric components concentration and elementary processes cross sections

14 p2569 A70-30212

Static diffusion model of thermosphere with allowance for temperature and chemical composition and not limited by constant 120 km boundary conditions

14 p2606 A70-30560

Incoherent scatter observations of atmospheric density and temperature in lower thermosphere, observing seasonal variations

14 p2578 A70-31246

Atomic hydrogen escape effects on altitude distribution, discussing lateral flow limitations on thermospheric diurnal variation

15 p2725 A70-31796

Neutral particle and electron density measurements by Explorer 32 proving thermospheric gravity waves association with wave-like structure in F region electron density

15 p2727 A70-31907

Height scale of loss coefficient in F 2 region under geomagnetic perturbation at midnight based on electron number profiles, estimating thermosphere temperature

18 p3249 A70-36907

Diurnal variations of thermospheric atomic hydrogen, investigating lateral flow effects on global distribution

19 p3415 A70-38419

Maximum to minimum exospheric temperature ratio determination, concluding solar wind dependence of diurnal variation in thermosphere

20 p3621 A70-39345

Lower thermosphere minor gaseous constituents vertical transport by nonlinear gravity wave process, showing density scale height decrease from diffusive equilibrium

21 p3818 A70-41098

Quadrupolar mass spectrometer design for lower thermosphere neutral composition measurement, discussing atmospheric physics, installation on rockets, etc

21 p3830 A70-41990

Internal gravity waves mathematical model for atmosphere with arbitrary distributions of temperature, molecular weight, viscosity and conductivity, deriving wave propagation into thermosphere

21 p3821 A70-42257

Thermospheric density variations as equivalent oscillator circuit system, applying to atmospheric tides

22 p4023 A70-43297

Thermosphere, stratosphere and mesosphere reactions involving water, hydrogen, methane, ozone, nitric oxide and nitrogen peroxide

22 p4023 A70-43298

Phase delay between thermospheric neutral temperature and neutral density, considering frequency dependent time response to solar heat input

23 p4187 A70-43858

ELF acoustic gravity wave arrival from Apollo launches recorded by Doppler shift ionospheric sounder channeled near mesopause and lower thermosphere

23 p4187 A70-43859

Thermospheric heating by solar radiation in Schumann-Runge continuum, taking height and atmospheric components distribution into account

23 p4188 A70-44060

Thermosphere diurnal thermal influx theory, allowing for heat conductivity

23 p4214 A70-44265

Thermospheric heating and conversion efficiency of short wave radiation as functions of solar radiation spectral flux, atmospheric components concentration and elementary processes cross sections

24 p4331 A70-46287

THERMOSTABILITY

U THERMAL STABILITY

THERMOSTATS

Surveyor thermal switch for temperature control to assure spacecraft components performance during temperature extremes on lunar surface

16 p2845 A70-34127

Differential fast-acting thermostat for temperature variation effects on elements, systems and subassemblies in gas filled space

17 p3090 A70-35433

Flexible thermostat for specific temperature range with liquid nitrogen coolant and gas transfer medium

17 p3096 A70-35850

THERMOTROPISM

U ANISOTROPY

U TEMPERATURE EFFECTS

THERMOVISCOELASTICITY

Temperature-time-variable stress-strain state of polymer structures, solving creep equation by linear model with rheological properties

01 p0211 A70-11426

Thermoviscoelasticity stochastic problems for bar with temperature independent viscosity, discussing Fokker-Planck equation for two temperature processes

21 p3937 A70-41435

THETA PINCH

Stark broadening of ionized helium lines by collective electric fields in theta pinch

04 p0722 A70-14684

Monograph on research by Japanese Institute of Plasma Physics covering theta pinch, plasma heating, flow, diagnostics, etc

07 p1350 A70-19843

Neodymium glass laser stimulated by pinch discharge radiation in He and Kr, increasing power, energy and pulse repetition frequency by improved pumping energy coupling

08 p1512 A70-21213

Plasma cylinder surface drive current buildup, using theta pinch two dimensional model

14 p2624 A70-31049

Magnetic pressure fast opening gas puff valve for hydrogen bursts in conical theta pinch plasma source

21 p3833 A70-41472

High density plasmas production and containment in theta pinch device, discussing shock and Joule heating

23 p4225 A70-44186

Theta pinch He plasma stability using cusp coils added to mirror coil ends

24 p4386 A70-45611

THICK FILMS

Radiative transfer between two infinite parallel metallic surfaces separated by nonconducting thick film ideal dielectric based on electromagnetic wave theory

04 p0784 A70-14824

Thick film hybrid circuit technology providing higher packaging density and better cooling

06 p1016 A70-17276

Sounding rocket telemetry systems, discussing use of PCM and thick film techniques

13 p2363 A70-28681

Microwave conductivity of thick film screen-printed microstrip circuits, measuring closed resonators SHF Q factors

19 p3388 A70-37964

Thick film thermocouple gages for roughened model surface heat flux measurements in high Reynolds number shock tunnel

21 p3824 A70-40860

THICK WALLS

Thick walled incompressible hyperelastic dielectric sphere periodic oscillations, noting dielectric properties influence on amplitude and period

01 p0209 A70-11386

Arterial model with effects of thick walls, linear viscoelasticity and wall tethering for studying arterial mechanics

02 p0247 A70-12550

Stress concentration in long thick cylindrical tube under diametrically opposite normal loads using elasticity theory

05 p0939 A70-16505

Thick walled orthotropic cylinder subjected to internal pressure analyzed for stress distribution and creep rates, using constitutive equations and Norton law

07 p1416 A70-20234

Shear stress in thick cylindrical closed shells subjected to plastic torsion determined from displacement distribution over thickness and generatrix

08 p1588 A70-21182

Linear and nonlinear rupture mechanics applied to thick walled pressure vessels of high strength materials

09 p1769 A70-22184

Thick-walled toroidal shell under various load distributions, analyzing stress-strain state by networks method using computer program

10 p1957 A70-24250

Wave propagation through Newtonian fluid in compressible thick walled viscoelastic tube, considering blood flow in arteries

15 p2691 A70-31938

THICKENED LEADING EDGES

U LEADING EDGES

THICKENERS [MATERIALS]

Thickening of fluids with tetrafluoroethylene polymer to provide physically and chemically stable grease type lubricants for military applications

07 p1292 A70-18863

Thickeners and low shrink additives for premix and sheet molding compounds/SMC/

16 p2936 A70-33363

THICKNESS

NT FILM THICKNESS

NT TARGET THICKNESS

Long term storage effects on noise, leakage current and thickness of Li drifted Si surface barrier detectors

03 p0482 A70-13023

Bending analysis of cracked plate with arbitrary stress distribution across thickness

[ASME PAPER 69-WA/PVP-2] 04 p0768 A70-14791

Nozzle boundary layer displacement thickness at Mach 30-70 in helium using Langley hotshot tunnel tests

04 p0675 A70-15603

Nonlinear theory extended to slender triangular and rectangular wings with symmetric profile, taking into account finite wing thickness

06 p0966 A70-17254

Stress-strain state of flexible circular plates as function of thickness distribution using finite difference theory

08 p1583 A70-20529

Elastoplastic bending of inhomogeneous rectangular plates with modulus of elasticity and yield stress varying over plate thickness

08 p1583 A70-20530

Thickness effects on elongation of sheet type Al alloys, tabulating tensile test results

10 p1887 A70-24043

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil [AIAA PAPER 69-738]

12 p2155 A70-27195

Anisotropy and variable thickness effects on elastic stress distribution in rotating disks, discussing limiting cases

17 p3185 A70-34912

Thickness determination of external elastic plates in freely supported three layer structures of uniform strength under perpendicular loads

18 p3343 A70-36717

Lunar maria rock thickness estimation, giving depth vs diameter diagrams for craters to show procerrarian system thickness

19 p3516 A70-37982

Optimal variable shell thickness, describing numerical solution as function of forces, moments and thickness

20 p3725 A70-39865

Thickness of equally stressed cylindrical shells, using thin elastic shell theory and Kirchhoff-Love hypotheses

22 p4120 A70-43715

Crack length and bend specimen thickness effects in plane strain fracture toughness tests of high strength steels

23 p4268 A70-44192

Wall thickness measurement by supersonic testing method based on resonance

24 p4336 A70-45681

Noncontact electromagnetic acoustic transducer/E-MAT/ for metallic products ultrasonic thickness testing

24 p4336 A70-45682

Thickness measurement and internal defects inspection by ultrasonic resonance technique

24 p4343 A70-45683

THICKNESS RATIO

Conical shells stability under uniform pressure, studying varying thickness influence by variational stress and bending equation

07 p1402 A70-19052

Rocket motor combustion chamber lining thickness distribution matching to effusor by designing effusor as multiple nozzle made of circular graphite plate

15 p2790 A70-32271

Optimum thickness ratio and minimum drag of slender bodies in hypersonic viscous flow as function of altitude

23 p4134 A70-44571

THIGH

Occlusion training during hypodynamia with inflatable cuffs to prevent unfavorable effects on cardiovascular system

10 p1816 A70-24689

THIN AIRFOILS

NT THIN WINGS

Thin airfoil magnetoaerodynamics problem revised solution to avoid divergent integrals expressing kernels of integral equations

03 p0405 A70-12933

Far and near field solutions of plane steady transonic flow past thin airfoil including imbedded shock waves using small disturbance theory

[ALAA PAPER 70-188] 06 p0969 A70-18056

Thin airfoil theory, discussing harmonic Dirichlet problem for complex plane

10 p1798 A70-24105

Alfvén flow of dissipative conducting incompressible fluids in presence of thin airfoil in magnetic field, considering flow turbulence calculation

10 p1922 A70-24143

Load generation on two dimensional thin airfoil by yawed sinusoidal gust in incompressible flow, using lifting surface theory

13 p2344 A70-30025

Unsteady aerodynamic forces at stall flutter, applying vortex sheet theory to separated flow field around thin airfoil at high angle of attack

22 p3957 A70-42284

Free jet stream effect on thin jet-flapped airfoil with fully developed wake, using linear theory

22 p3960 A70-43737

Pressure distribution on thin nonlifting airfoils in steady two dimensional flow with freestream Mach number at or near unity

23 p4134 A70-44583

Jet-ambient air mixing effect on flow characteristics around thin airfoil with jet flap

24 p4288 A70-45439

Inviscid conducting incompressible fluid steady motion past thin airfoils, presenting crossed and aligned fields and Alfvén motion with Hall effect

24 p4289 A70-46033

THIN BODIES

Apparatus for continuous creep measurement at high temperature for fine wire and thin tubular samples with small cross sectional areas

01 p0088 A70-10746

Vibration of thin bodies subjected to large angle attack in hypersonic flow, discussing curved bodies method to reduce problem to steady state flows

09 p1771 A70-22445

Friction drag on thin pyramidal lobed bodies in supersonic flow, analyzing detached shock region and body geometry function

09 p1606 A70-23612

Low Mach number aerodynamic sound generation by turbulent flow at sharp edged thin scattering half plane solved with Green function

10 p1802 A70-24521

Thin cylinder longitudinal two phase dispersed flow, examining heat transfer coefficient

18 p3345 A70-36112

Two identical conducting thin cylinders illuminated by plane wave at arbitrary incidence angle, determining backscattering cross sections and induced current

24 p4314 A70-46133

THIN FILMS

NT FERROMAGNETIC FILMS

NT MONOMOLECULAR FILMS

Airborne aeromagnetic gradiometer theory and design, using superconducting thin film tunneling junctions

01 p0085 A70-10289

Polybenzimidazole (PBI) resin-bonded solid film lubricants composed of molybdenum disulfide, antimony trioxide and PBI resins

[ASME PAPER 69-LUB-15] 01 p0101 A70-10390

Hydrodynamic and elasticity equations for squeeze films between elastic cylinders in normal approach reduced to integral equation

[ASME PAPER 69-LUB-13] 01 p0102 A70-10392

Film-vapor interface shape for thin liquid lubricating film, analyzing two dimensional Newtonian flow including gravity, inertia and surface tension effects

[ASME PAPER 69-LUB-3] 01 p0103 A70-10399

Book on thin film transistors microelectronics covering semiconductor physics, fabrication, analysis, applications and comparison with MOS transistors

01 p0052 A70-11329

Inertia effects in squeeze film between two curved surfaces and in externally pressurized bearing with converging lubricant film

01 p0104 A70-11388

Thin liquid film equilibrium on rotating sphere, determining conditions for detachment as function of angular velocity

01 p0068 A70-11578

Titanium thin films prepared in ultrahigh vacuum to determine low temperature/pressure oxidation kinetics, using electron microscopy and X ray diffraction

02 p0317 A70-12316

Thin superconducting films nonlinear microwave properties including impedance-amplitude relation, superconducting current threshold decrease, mode production, frequency mixing, etc

03 p0539 A70-13409

Frequency spectrum, Q factor and single mode selectivity of two mirror laser resonator with absorbing thin metallic films, showing agreement for Ag and Ni

03 p0500 A70-13459

Electrical conductivity of GaSe thin films developed in vacuum by electron bombardment as function of temperature

03 p0540 A70-13686

Vacuum deposited thin film bridges in electroexplosive devices, discussing composition, surface conditions, substrate temperature, bell jar atmosphere and deposition rate

03 p0546 A70-14107

Thin film heat gauge for measuring thermal transport from plasma to end wall of shock tube, discussing measurements in high temperature Ar

03 p0496 A70-14381

Augmented small parameter gas film equation for squeeze film journal bearing solved in terms of radial displacement

[ASME PAPER 69-WA/LUB-9] 04 p0697 A70-14766

Superconducting properties of Nb-Ti-N thin films prepared by reactive sputtering process, obtaining transition temperature maximums

04 p0732 A70-15689

Particle, resin and inorganic bonding of solid lubricant to surface and dry lubricant film performance

05 p0855 A70-16043

Electron transmission diffraction patterns of thin monocrystal films using Ar laser

06 p1080 A70-17444

Possible pairing without superconductivity at low carrier concentrations in bulk and thin film superconducting semiconductors

06 p1127 A70-18641

Rheology applied to motor oil viscosity, elastohydrodynamic (EHD) and extremely thin film lubrication, examining viscosity relationship to film thickness

07 p1293 A70-18954

Film type solar energy reflector peripheral blades for connection to receiver, discussing precession control and despin for rotating concentrators

07 p1196 A70-19501

Spectral reflectivity measurement method for optical thin film coating in 10.6 micron IR region using carbon dioxide laser source

07 p1302 A70-20084

Coplanar waveguide consisting of thin metallic film strip on dielectric slab with ground electrodes adjacent and parallel to strip for nonreciprocal gyromagnetic device applications

08 p1475 A70-21281

Interdigitated microstrip quadrature couplers suited for monolithic or hybrid thin film microwave integrated circuitry

08 p1476 A70-21291

Photolithographically produced thin film lumped element circulator, assuring physical and electrical symmetry by interweaving junction conductors

08 p1476 A70-21293

Switching and memory phenomena in semiconductor glasses, thin films and variable threshold metal-oxide-nitride-semiconductor MNOS transistor

08 p1556 A70-21304

Film properties of organic liquids squeezed between two solid flats using order liquid model, discussing applications to boundary layer lubrication

08 p1508 A70-21601

Permittivity of thin films in millimeter and submillimeter wavelengths measured by diffraction grating method

08 p1464 A70-21985

Passive film on stainless steels in boiling nitric medium studied by recording constant potential on sample subjected to polarizations

09 p1700 A70-22010

Thin resistive layers located in rectangular waveguide assuming constant and surface variable conductivity and permittivity

09 p1644 A70-22279

Far IR radiation transmission through bismuth and gallium normal and superconducting thin films, considering transition temperature role

09 p1739 A70-22323

Integrated circuit film and hybrid technologies in microelectronics, discussing role of monolithic Si arrays

09 p1645 A70-22632

Current-voltage characteristics and lifetime of thin film diodes on chalcogenide glass substrate with symmetrical and asymmetrical electrodes

09 p1647 A70-22751

Thin film capacitive bolometer dependent on temperature sensitivity derived from electron trapping effects

09 p1683 A70-23509

Compound semioaque thin films quality control for thickness uniformity by observing fringe patterns generated by optical data processing techniques

09 p1687 A70-23765

Elongation measurement in tensile testing of thin films and sheeting, coupling with gripping test program

10 p1887 A70-24042

Thin soap membranes shape determined by photogrammetric method, using stereo camera and fluorescent light

10 p1891 A70-24735

Vacuum condensed thin carbon films graphitization stages using electron diffraction

11 p2068 A70-25381

Thermal conductivity of thin metallic films and wires at cryogenic temperatures, discussing electron transport properties

11 p2083 A70-25752

Thin films of vanadium niobium and tantalum obtained by vacuum thermal decomposition of metal iodides

12 p2253 A70-27210

Superconducting thin films of beta-tungsten structure Nb-Al-Ge compound, discussing high purity sputtering preparation techniques and properties in magnetic fields

12 p2285 A70-27259

Low resistivity films synthesized on seminsulating GaAs by xenon, krypton, selenium and zinc ions bombardment

12 p2286 A70-27364

Microwave transmission through thin film screens with apertures placed in transverse plane of X band rectangular guides

12 p2202 A70-28164

Film cavitation between flat annular surfaces in face seal resulting from hydrodynamic pressure generated by misalignment and surface waviness

13 p2417 A70-28613

Water contaminating effects on thin thermal oxide passivated silicon planar devices

13 p2361 A70-28930

RF-sputtered CdS thin films structural and electrical characteristics from X ray diffractometer tracings, reflection electron diffraction and X ray double crystal spectrometry

13 p2470 A70-29201

Electromagnetic theory of forces for coalescence in granular layers during thermal evaporation of thin films, calculating interaction between instantaneous dipoles

13 p2471 A70-29640

Electron microscope-thin film microprobe techniques in biomaterial studies of chemical segregation, species diffusion and small particle analysis

13 p2411 A70-29808

Thin ferromagnetic film sensitive elements for detection of weak magnetic fields

13 p2415 A70-30041

Ta thin film integrated circuit technology including resistor and capacitor elements, conductors, cross-overs, etc

14 p2625 A70-30284

Thin film sandwich Ag/Ni/Cu, demonstrating multiple electron diffraction

14 p2627 A70-30724

Nonlinear effects in microwave resonators containing thin superconducting films and low values of microwave power

15 p2782 A70-31525

Titanium monoxide thin film as low temperature getter, measuring activity coefficient and capacity under ultra high vacuum

15 p2783 A70-31844

InAs thin films electrical properties and IR reflectance, determining thickness and substrate temperature effects on carrier concentration and mobility

15 p2783 A70-31965

Plasma reflection edge in thin film InAs semiconductors, calculating refractive index and extinction coefficient from free charge parameters

15 p2783 A70-31966

Photoemission optical analysis from thin films with uniaxial anisotropy, discussing reflectance, transmittance and divergence of Poynting vector

15 p2774 A70-32012

Thin film solar cells photosensitivity improvement by semiconductors with graded energy gap, describing construction techniques and electrical properties

15 p2678 A70-32420

CdS and CdTe thin film solar cells R and D survey, describing construction and electrical properties

15 p2678 A70-32421

Thickness measurement for thin films in inaccessible locations using scanning electron microscope, comparing accuracy with interferometric techniques

15 p2741 A70-32435

Thermoelectric power measurement of thin Au films, relating results to transport parameters and internal stresses

15 p2785 A70-32582

Integrated circuits failures due to electromigration in thin films, discussing hole formation and circuit reliability prediction

15 p2713 A70-32649

Film type solar energy reflector peripheral blades for connection to receiver, discussing precession control and despin for rotating concentrators

15 p2678 A70-32746

X band acoustic delay lines using thin film piezoelectric transducers

16 p2874 A70-33391

Surface growth morphology and crystallographic orientation of beta-SiC films formed by chemical conversion and heating

17 p3142 A70-34678

Satellite electronics production, discussing dielectric film capacitor, solar probe magnetic oxide memory core and thin film assemblies

17 p3053 A70-35268

Amorphous film formation and crystallization, discussing thermal stability

18 p3297 A70-36320

Skin friction measurement in supersonic flows by thin film heated element method, describing thermal boundary layer properties

18 p3243 A70-36710

Hybrid integrated microwave power amplifiers, using high-Q thin film lumped passive elements

18 p3232 A70-36760

Dielectric properties of thin barium titanate films from microwave resonance frequencies and resonance reflection coefficient

19 p3482 A70-37255

Augmented small parameter gas film equation for squeeze film journal bearing solved in terms of radial displacement

[ASME PAPER 69-WA/LUB-9] 19 p3435 A70-37609

Film-vapor interface shape for thin liquid lubricated film, analyzing two dimensional Newtonian flow including gravity, inertia and surface tension effects

[ASME PAPER 69-LUB-3] 19 p3435 A70-37610

Single crystal ferrite thin film microwave parameters measurement, examining susceptibility in weak magnetic fields and ferromagnetic resonance

19 p3485 A70-37628

Electrical conduction and surface properties of beta-SiC films obtained by heating Si wafer in presence of hydrocarbon

19 p3485 A70-37685

Laser beam alignment system for monitoring dielectric film evaporation

19 p3445 A70-37686

Thin films physics for microelectronic applications

19 p3389 A70-38194

Thin films for semiconductor integrated circuits and solid state devices

19 p3389 A70-38195

Thin metal film electrical conduction current noise characteristics

19 p3487 A70-38196

Thin films optical properties and measurements

19 p3487 A70-38197

Superconductor thin films, discussing transition temperature, critical field and current, solid state applications, etc

19 p3488 A70-38198

Deformation effects on metallic and semiconductor thin films conductivity

19 p3488 A70-38199

Epitaxial growth of GaAs thin films in vapor phase using hydrogen, gallium and arsenic trichloride as sources

19 p3488 A70-38200

Antireflection titanium dioxide thin films for aerospace silicon solar cells

19 p3358 A70-38201

Photoemitting cesium antimonide thin films for IR detectors

19 p3488 A70-38202

Tantalum oxide thin films electro-optical effects due to refractivity changes

19 p3488 A70-38203

Thin films optical constants and thickness measurements and UV bandpass interference filters design

19 p3488 A70-38204

SI and thin film solar cells for satellite power supplies, considering manufacture and space environment

19 p3358 A70-38478

Impurity distribution in diffused p-n junction in thin epitaxial film, calculating space charge region width and junction capacitance

20 p3685 A70-38967

Copper disulfide-cadmium sulfide thin film solar cell degradation under simulated low orbit conditions, investigating thermal stress

21 p3759 A70-41313

High temperature combined differential thermal analysis and spectrophotometric cell for phase transformation monitoring of evaporated thin film and bulk phthalocyanine

21 p3827 A70-41459

Harmonic generation and small signal mixing in thin magnetic films subjected to static and time varying fields, generating output voltage expressions

21 p3864 A70-42012

Thin titania films electrical breakdown under high DC fields in high vacuum, suggesting reduction to lower order semiconducting oxide

22 p4085 A70-42621

Prism film device coupling laser beam into thin film dielectric light guides, discussing operational theory

22 p4030 A70-42947

Prism film device for high efficiency laser beam coupling into light guiding thin film, deriving operation theory by plane wave analysis

22 p4030 A70-42948

Thin film granular aluminum superconductors as sensitive thermometers

22 p4031 A70-43009

Orthogonal susceptibility of uniaxial thin nonmagnetorestrictive Permalloy films

22 p4086 A70-43011

In thin film resistance thermometers fabrication by vapor deposition in vacuum, considering electrical properties dependence on temperature

22 p4039 A70-43446

Thin two phase film conductivity, noting conditions for equality with geometric mean and for metal-to-dielectric transition

22 p4088 A70-43466

Current and vector potential in thin superconducting film in HF field, considering high and low temperatures

22 p4088 A70-43467

CdS thin film solar cells, describing manufacture for increased degradation resistance

22 p3966 A70-43537

MIS model applied to memory transistor with thin insulator consisting of silicon nitride on silicon dioxide

23 p4172 A70-44197

Metal vapor flow measurement by quadrupole mass spectrometer for control of thin film depositions by evaporation

23 p4198 A70-44872

Thin liquid film /melt layer/ on body in supersonic flow, examining crosshatched wave patterns stability

23 p4183 A70-44979

Atomic oxygen height profile measurements in upper atmosphere by sensor consisting of thin silver film on small pyrex rod permitting molecular transport

24 p4329 A70-45359

Crystal growth in polycrystalline Au, Ag and Au-Ag thin films annealing, observing by electron microscopy and electron diffraction

24 p4391 A70-45672

Oxygen and nitrogen adsorption on thin tantalum films, measuring pressure, electrical resistivity and temperature

24 p4363 A70-46219

Thin epitaxial Ag films on mica, measuring electrical resistivity strain dependence

24 p4391 A70-46266

Multivibrator designs incorporating distributed R-C-NR thin film structures

24 p4321 A70-46395

THIN LAYER CHROMATOGRAPHY

Tranquilizers and hypnotics from rats organs analyzed by thin layer chromatography

22 p3978 A70-42879

THIN PLATES

Thin flat plates effective width under axial edge compression slightly beyond buckling limit, solving von Karman differential equations

01 p0198 A70-10094

Out-of-plane displacement restraint at thin photoelastic plates bonded to rigid boundaries of inclusions inducing transverse stress components causing plane stress solution deviation

01 p0202 A70-11059

Thin anisotropic elliptical plate elastic equilibrium weakened by hole and under concentrated loads

01 p0211 A70-11445

Thin simply supported circular rigid ideally plastic plate subjected to dynamic transverse load uniformly distributed over central circular region

02 p0389 A70-12668

Finite element method for postbuckling analysis of thin elastic plates, using iterative method to obtain equilibrium configurations

03 p0583 A70-12917

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load

03 p0589 A70-13336

Thin elastic cylindrical panel motion induced by plane acoustic shock wave analyzed by integrating nonlinear motion equations using finite difference scheme

03 p0524 A70-13377

Bubnov-Galerkin approximations convergence in problem of thin plate nonlinear vibrations, allowing for inertial forces due to rotation

03 p0593 A70-13470

Unsteady state lift and moment action on lattice of profiles moving in incompressible fluid, determining suction originating at leading edges of profiles

03 p0409 A70-13868

Reaction of three dimensional shock wave with turbulent boundary layer in supersonic flow around plate

03 p0409 A70-13876

Impulsive and transient load disturbances in thin elastic finite circular plate on Pasternak type viscoelastic foundation

03 p0595 A70-13905

Tension field theory describing buckling of membranes or thin plates with boundaries subjected to excessive planar displacements

03 p0599 A70-14246

Linear isothermal response of viscously damped thin homogeneous polygonal plates subjected to uniform dynamic loading, calculating forced solutions by numerical integration

03 p0601 A70-14318

Thin elastic plate oscillations plane two dimensional steady state problem assuming constant thickness, finite dimension and moving load

04 p0766 A70-14420

Unsteady heat conduction and thermal stresses in thin isotropic semibounded plates with butt joint possessing internal thermal resistance

04 p0766 A70-14479

Laminar compressible wake behind thin flat plate at zero angle of attack, solving boundary layer equations in von Mises coordinate plane

[ASME PAPER 69-WA/FE-6] 04 p0614 A70-14783

Computational procedures for matrix analysis of stability and vibration of thin flat rectangular plates in longitudinal compression

05 p0927 A70-16010

Viscous damping effect on aeroelastic stability of thin plate in inviscid compressible airstream, observing instability in subsonic and supersonic flow

05 p0941 A70-16517

Backscattered field determination at edge on incidence from thin circular plates illuminated by plane waves

06 p1008 A70-17563

Upper surface suction effect on thin plate aerodynamic characteristics, considering relations for lift and pitching moment coefficients

06 p0968 A70-17851

Stress and buckling measurement of shallow cylindrical steel shells linked to thin plate using resistant strain gauges and high precision indicators

06 p1167 A70-17866

Computer procedures for solving temperature stresses in thin infinite isotropic viscoelastic plate with heat transfer

07 p1411 A70-19817

Thin sheet and laminate bullet hole deformation zone microstructure observation by electron microscopy, considering terminal ballistics approach

07 p1413 A70-20049

Rectangular thin plates in small deformation transient creep bending, using finite element method in iterative procedure

08 p1590 A70-21356

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges

08 p1591 A70-21415

Thin metal plate surface impedance during excitation by HF electromagnetic field as function of magnetic field, calculating line shapes

08 p1557 A70-21754

Nonuniqueness theorems for von Karman equations governing thin flat elastic plate deflections clamped at edges and subjected to normal and edge loading

09 p1768 A70-22063

Temperature field distribution in long thin narrow plate composed of materials differing in thermophysical characteristics, creating field by moving heat source on plate

09 p1791 A70-23723

Stress intensity and strain energy of pressurized line crack in cross form in thin elastic plate solved by Wiener-Hopf technique

10 p1956 A70-24192

Dynamic postbuckling response of thin elastic circular plates under axisymmetric time dependent radial thrust, discussing response to step loading

10 p1964 A70-25206

Thin elastic plates and shells parametric resonance amplitudes by solving nonlinear differential equations, considering dynamic stability

11 p2129 A70-25523

Vibration of thin elastic plates under random driving forces simulated digitally, using power residue method for pseudorandom number generation

11 p2139 A70-26277

Clamped thin circular plate bending under various loadings due to action of rigid square column on center

11 p2139 A70-26404

Relative permittivity of small thickness dielectric substrate plates determined from reflection coefficient in rectangular waveguides

11 p2011 A70-26603

Stress tensor and displacement vector in thin elastic shells/plates derived from three dimensional nonlinear equations using asymptotic integration
11 p2142 A70-26634

Finite element bending stress analysis of thin rectangular and skew plates, discussing computational procedure generating stiffness matrices
11 p2143 A70-26641

Thin rectangular plates transverse natural frequencies, deriving equations of motion and boundary conditions in bending moment terms by vibrational principle
11 p2143 A70-26645

Flutter instability critical velocity and frequency for thin cantilevered plate with follower jet determined by Galerkin and computer simulation
12 p2316 A70-27106

Thin circular cylindrical panels of arbitrary curvature calculated for end support and loading at contour
12 p2323 A70-27335

Two dimensional dynamic thermoelastic problem for thin plates with internal heat sources solved by integral Laplace and Fourier transforms
12 p2323 A70-27337

Glass fiber reinforced thin rectilinear orthotropic plastic plates bending using finite difference method with allowance for creep
12 p2324 A70-27531

Thin plates finite length effects on thermal conductivity measurement by impulse method, verifying results with n-type silicon samples
12 p2332 A70-28047

Thin cut plate quasi-brittle breakdown under tensile stress, considering elastoplastic equilibrium under Tresca-St. Venant yield conditions
12 p2329 A70-28325

Compressible fluids Alfvén flow with Hall effect presence of thin foils, reducing problem to Fourier integral equation
13 p2442 A70-29484

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering lure theory and variational principle for uniform compression load
14 p2657 A70-30714

Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates
14 p2657 A70-30763

Pontryagin principle for thin vibrating plates under mixed boundary conditions, examining optimal control
14 p2660 A70-31205

Thin plates with central circular holes, investigating creep behavior for biaxial edge tractions
15 p2822 A70-32359

Transverse vibration of thin circular elastic turbine disk of variable thickness rotating axially at constant angular velocity
16 p2916 A70-32994

Elastoplastic bending of thin plate under increasing and uniformly distributed loads, defining statically admissible stresses
16 p2988 A70-33107

Hypervelocity impact of spheres on thin targets using numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model
16 p2991 A70-33853

Normally loaded thin plate displacements, bending moments and stresses determined by hologram interferometry and indirect moiré and superposition of grilles
17 p3085 A70-35011

Nonstationary temperature fields and stresses in wedge shaped strip and thin plates with heat transfer for discontinuous boundary conditions
17 p3189 A70-35342

Critical stresses and stability of thin Maxwell plates under random temperature fields
18 p3337 A70-36368

Inverse variational principles of thin plate, dividing into subregions/finite elements/for optimal thickness distribution, sectional forces and displacement values
18 p3339 A70-36481

Linear bending theory of thin homogeneous isotropic plates
18 p3339 A70-36482

Torsional vibration of thin beam with varying cross section, formulating fundamental equation and boundary conditions
18 p3339 A70-36519

Heat conduction three dimensional problem in radiation heated thin crystalline plates with temperature dependent thermophysical characteristics
18 p3348 A70-36644

Waveform changes in postbuckling behavior of thin rectangular plates under axial compression
19 p3535 A70-37380

Soviet book on theory of shell and plate type thin walled structural elements stability covering strength, boundary value problems, oscillations, design, etc
19 p3535 A70-37401

Energy flow between two superfluid helium baths at different temperatures and separated by thin plate
19 p3471 A70-37648

Nodal patterns on thin elastic circular plate vibrating in flexure, considering natural and compounded modes
19 p3543 A70-38245

Thin plates and thin walled cylinders aeroelastic stability in fluid flow, analyzing panel flutter
19 p3546 A70-38342

Clamped edge thin flat elliptic plate subject to elliptic paraboloidal loading, determining middle surface deformations for nonlinear large deflections
19 p3547 A70-38359

Elastoplastic equilibrium of thin infinite plate with periodic slit system along straight line under tension, investigating localized plastic deformation domains
20 p3721 A70-39769

Supersonic flow past slender bodies in presence of strong blowing, extending solution by expansion at leading edge of thin plate
20 p3559 A70-39771

Elastoplastic deformation of thin circular plates under uniformly distributed transverse loads, using mixed type variational equation
20 p3721 A70-39776

Stressed state in thermoelasticity plane steady state problem of thin plate under bending based on dislocations and temperature stresses relationship
20 p3721 A70-39780

Spherical shell equilibrium states dynamic calculation method applied to thin plates nonlinear theory statistical problems
20 p3725 A70-39871

Thin plane bars elasticity theory, constructing integrals of equations by asymptotic series expansion
20 p3726 A70-39881

Thin circular plate clamped along edge, calculating large displacements and elastoplastic strains for comparison with measurement
21 p3935 A70-41406

Plastic zones between symmetric and collinear edge cracks in thin plexiglass strips, using He-Ne laser interferometry
21 p3939 A70-41967

Heat transfer from thin plate in compressible gas flow, considering interface temperature as nonanalytic function
21 p3953 A70-42086

Thin plates radiant cooling with mutual irradiation in spacecraft radiators
22 p4122 A70-42518

Thin walled column buckling relation to plate element buckling, studying deformation, stress state, failure mechanism and ultimate load
22 p4116 A70-43214

Thin plates two dimensional dynamic thermoelastic problem, determining hyperbolic type heat conduction for temperature field
23 p4265 A70-43985

Centrally cracked sheet, calculating riveted and uniformly spaced stringers effect on stress intensity factor
23 p4270 A70-44549

Electromagnetic scattering by two dimensional periodic arrays of conducting thin plates, calculating induced current and near field radiation distribution
23 p4165 A70-44961

Radar cross section for thin dielectric plate and spherical and conical shells
23 p4166 A70-44975

Radar backscattering cross sections of horizontal and vertical polarizations for thin rectangular plate near grazing incidence
23 p4166 A70-44976

German monograph on fatigue crack propagation in thin notched plate, considering microscopic element fracture probability
24 p4422 A70-45574

THIN WALLED SHELLS

Steels tested to evaluate proposed incremental strain theories predicting loads on thin walled cylinders subjected to nonproportionate loading, discussing stress-strain diagram
01 p0202 A70-11057

Thin shells of revolution torsional vibration including bending terms and thickness considerations
01 p0205 A70-11142

Thin elastic shells parallel surface nonlinear tangential strains derived in terms of midsurface tangential and bending strain components
01 p0205 A70-11143

Finite element method for thin shells using specialized form of Reissner variational principle for stresses and displacements
01 p0208 A70-11184

Elastic bending of thin circular conical shell subject to arbitrary variation of edge loads
01 p0209 A70-11385

Internal hydrostatic or lateral pressure effect on deformations of infinitely long thin cylindrical isotropic shell subjected to equal concentrated radial loads
03 p0584 A70-12922

Incremental strain theories for nonproportionate loading of thin walled cylinders, discussing Tresca flow, von Mises theory and Prandtl-Reuss relations
03 p0480 A70-12953

Liquid heating in thin walled porous shells under various boundary conditions, deriving formulas for temperature fields
03 p0604 A70-13208

Thin shells stressed state calculations by iteration, considering suitability for computer adaptation
03 p0592 A70-13442

Nonlinear theory for thin elastic shells with small strains and rotations, analyzing nonzero Gaussian curvature
03 p0594 A70-13622

Stress distribution of thin walled structure of open section, considering warping and torsional bending, using calculus of variations
03 p0596 A70-14030

Thin shells of revolution plastic collapse under axisymmetric loads on basis of Tresca-Nakamura yield criterion, using computer algorithm
03 p0598 A70-14238

Stress wave propagation tests in thin walled tubes under combined tension and torsion, discussing predicted and observed strain-time profiles discrepancies
03 p0599 A70-14245

Thin elastic laminar shells nonlinear physical theory assuming Love-Kirchhoff hypothesis validity, rigidly connected layers and nonlinear mechanical behavior
04 p0765 A70-14419

Nonlinear thin shell theory kinematics generalized in terms of physical strain and surface deformation and geometry
04 p0766 A70-14450

Thin elastic revolving shells free axisymmetric oscillations by determining differential equations eigenvalues and eigenfunctions
04 p0768 A70-14604

Long thin cylindrical tube with circumferential restraint analyzed for thermal expansions, obtaining maximum strains, bending moments, shear forces and plastic zone extent
04 p0768 A70-14756

ASME PAPER 69-WA/NE-7 Axial compression effect on low cycle fatigue of thin walled metal tubes in torsion
04 p0705 A70-14880

Thin walled plate simply supported on three edges, studying behavior following local stability loss
04 p0772 A70-14923

Thin walled uniform open bar stability under arbitrary boundary conditions, using Vlasov assumptions and matrix methods
04 p0774 A70-15099

Thin elastic shallow shell static problem solved using numerical integration of differential equation
04 p0778 A70-15558

Closed form solutions describing nonlinear motions of incompressible fluid flowing in thin walled tube buckled by uniform external pressure
05 p0832 A70-16090

Strain parameters and equilibrium equation of rib-reinforced thin shells, analyzing length, curvature and torsion variations using smooth shell analogy
05 p0935 A70-16230

Plane deformation of plastic thin walled tubes under complex tensile and torsional load
05 p0935 A70-16233

Unsteady vibrations of cylindrical thin walled elastic closed shell under random loads, using correlation method
05 p0937 A70-16371

Fatigue crack propagation and fracture toughness in pressurized thin walled cylindrical tubes, basing analysis on shallow shell bending theory
05 p0942 A70-16802

Finite element method analysis of axisymmetrically loaded thin shells of revolution, considering nonlinearity due to material properties and shell geometry changes
05 p0944 A70-16812

Finite element analysis of elastic thin shells, approximating shell surface by network of triangular plate elements
05 p0944 A70-16813

Lower bound limit analysis of symmetrically loaded thin shells of revolution having arbitrary meridional profiles, demonstrating methods for pressure vessel problems
05 p0944 A70-16815

Thermal stresses in shell with spherical and circular cylindrical sections, using thin shell approximations and shallow shell theory
05 p0945 A70-16818

Membrane reinforced thin walled cylindrical shells stability as asymmetric contact problem in shell and plate theory
05 p0947 A70-17011

Facility for testing thin walled tubular specimens in stressed state at low temperatures by keeping stresses constant with helical gear
05 p0830 A70-17075

Thin shell buckling stressing maximum applied loads analysis for circular cylindrical shells with imperfect walls under axial compression

06 p1165 A70-17647

Thin walled tubular aluminum specimens hardening by temporary reduction of temperature during creep under torsion

06 p1089 A70-17795

Stability analysis of deflected shallow thin walled elastic noncircular conical and cylindrical orthotropic shells using straight lines method

06 p1167 A70-17865

Thin walled cylindrical shells design for axisymmetric impulsive loads, calculating strains due to explosive forming in water

06 p1167 A70-17867

Nonlinear postbuckling equilibrium of thin cylindrical shell and axisymmetric buckling pressure of imperfect spherical shell calculated by Rayleigh-Ritz method

[AIAA PAPER 70-102] 06 p1169 A70-18036

Thin walled cylindrical shell stability under stochastic lateral and axial compression loads using Liapunov method

[AIAA PAPER 70-104] 06 p1169 A70-18037

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient

06 p1172 A70-18566

Structural analysis of thin walled cylinder material using normal ultrasonic wave to achieve high resolution determination of components

06 p1172 A70-18630

Thin walled cylindrical shell stability with hollow filler under distributed external loads, determining critical loads

07 p1399 A70-18663

Energy methods used in thermoelastic analysis of thermal stresses and deflections in thin rings

07 p1401 A70-18935

Uniform thickness thin helicoidal shell stress-strain state with middle surface in asymptotic lines, assuming parameters governed by one dimensional law

07 p1402 A70-19055

Plastic deformation of thin flexible axisymmetric shells under load, discussing tensile stresses

07 p1407 A70-19383

Thin walled metal cylinders residual deformation microstructures under internal impulsive loading

07 p1285 A70-19969

Soviet book on free, forced and parametric vibrations of thin walled shells containing liquid, gas and continuous elastic medium

08 p1584 A70-20762

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory

08 p1585 A70-20955

Rheological factors effect on deformation behavior of thin walled spherical shell made of strongly extensible elastically hereditary material and subjected to internal pressure

08 p1587 A70-21168

Thin shells of revolution natural oscillation frequencies approximation based on shell subdivision into series of cylindrical shells

08 p1588 A70-21194

Linear and nonlinear equilibrium equations for bending deformation of thin elastic cylindrical using Kirchhoff-Love hypotheses

08 p1588 A70-21242

Prismatic thin walled shells with box type cross section under torsion using Vlasov variational method in conjunction with transfer matrices

08 p1589 A70-21248

Eigenfrequencies of thin barrel shaped shells on simple supports, noting correspondence of ratio of radius to shell wall thickness

08 p1592 A70-21474

Uniaxial and multiaxial stiffness and property characterization of anisotropic composite materials formed as thin walled cylinders

08 p1529 A70-21880

Temperature fields and stress-strain state in elastic bodies with thin walled cylindrical shell inclusions during uniform heat flow at infinity

09 p1778 A70-23083

Elastoplastic stressed state of thin walled shells of revolution under repeated loads, assuming isotropic incompressible material

09 p1779 A70-23092

Contour immobility effect on load carrying capacity of rigid plastic thin shells of revolution, establishing minimum reinforcement value for edge

09 p1783 A70-23388

Lower critical load for shallow rigidly convex shell expression refined by considering effect of rigid clamping of shell edge on buckling boundary deformation

09 p1784 A70-23594

Stress-strain state analysis of prestained thin circular cylindrical shell using Vlasov general shell theory

10 p1955 A70-24021

Flexural rigidity of thin walled beams, analyzing relationship between loads and displacements taking into account Saint Venant torsional resistance

10 p1955 A70-24052

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography

10 p1964 A70-25120

Thin cylindrical shell stresses and displacements enclosed in elastic casing under pressure band using classical theory of Flugge and Love functions

11 p1218 A70-25336

Eccentrically stiffened thin circular cylindrical shell stability under torsion emphasizing exact finite formulas derivation

11 p1219 A70-25561

Random displacement fields in thin circular cylindrical shells with initial imperfections under axial compression using statistical analysis

11 p1219 A70-25562

Stress distributions in thin walled pressure vessels analyzed by scattered light photoelasticity technique compared to strain gage analysis

11 p1231 A70-25593

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration

[AIAA PAPER 69-56] 11 p12135 A70-25962

Creep deflections and collapse times for supported thin shallow spherical shells under uniform pressure predicted using variational theorem

11 p12135 A70-25963

Membrane theory for thin single layer orthotropic cylindrical shells experiencing harmonic axisymmetric motion

11 p12136 A70-26084

Length effect on modulus determination test for thin laminated tube under combined loading using shell theory

11 p12136 A70-26086
